(1.) *The morning service.* After having enjoyed their repose, the priests bathed themselves in the rooms provided for that purpose and waited the arrival of the president of the lots. This officer having arrived, they divided themselves into two companies, each of which was provided with lamps or torches, and made a circuit of the Temple, going in different directions, and meeting at the pastryman's chamber on the south side of the gate Nicnor. Having summoned him to prepare the cakes for the high-priest's meat-offering, they retired with the president to the south-east corner of the court and cast lots for the duties connected with the altar. The priest being chosen to remove the ashes from the altar, he again washed his feet at the laver, and then with the silver shovel proceeded to his work. As soon as he had removed one shovelful of the ashes, the other priests retired to wash their hands and feet, and then joined him in cleansing the altar and renewing the fires. The next act was to cast lots for the thirteen particular duties connected with offering the sacrifice; which being settled, the president ordered one of them to fetch the lamb for the morning sacrifice. While the priests on this duty were engaged in fetching and examining the victim, those who carried the keys were opening the seven gates of the Court of Israel and the two doors that separated between the porch and the holy place. When the last of the seven gates was opened, the silver trumpets gave a flourish to call the Levites to their desks for the music, and the stationary men to their places as the representatives of the people. The opening of the folding-doors of the Temple was the established signal for killing the sacrifice, which was cut in pieces and carried to the top of the altar, where it was salted and left while the priests once more retired to the room Gazith to join in prayer. While the sacrifice was slain in the court of the priests, the two priests appointed to trim the lamps and cleanse the altar of incense were attending to their duties in the holy place. After the conclusion of their prayer and a rehearsal of the ten commandments and their phylacteries, the priests again cast lots to choose two to offer incense on the golden altar, and another to lay the pieces of the sacrifice on the fire of the brazen altar. The lot being determined, the two who were to offer the incense proceeded to discharge their duty, the time for which was between the sprinkling of the blood and the laying the pieces upon the altar, in the morning, and in the evening, between the laying the pieces upon the altar and the drink-offering. As they proceeded to the Temple they rang the *megemphita*, or great bell, to warn the absent priests to come to wor-

ship, the absent Levites to come to sing, and the stationary men to bring to the gate Nicanor those whose purification was not perfected. The priest who carried the censer of coals which had been taken from one of the three fires on the great altar, after kindling the fire on the incense altar, worshipped and came out into the porch, leaving the priest who had the incense alone in the holy place. As soon as the signal was given by the president, the incense was kindled, the holy place was filled with perfume, and the congregation without joined in the prayers (Luke, i, 9). These being ended, the priest whose lot it was to lay the pieces of the sacrifice upon the altar threw them into the fire, and then, taking the tongs, disposed them in somewhat of their natural order. The four priests who had been in the holy place now appeared upon the steps that led to the porch, and, extending their arms so as to raise their hands higher than their heads, one of them pronounced the solemn blessing (Numb. vi, 24-26). After this benediction, the daily meat-offering was offered; then the meat-offering of the high-priest; and last of all the drink-offering; at the conclusion of which the Levites began the song of praise, and at every pause in the music the trumpets sounded and the people worshipped. This was the termination of the morning service. It should be stated that the morning service of the priests began with the dawn of day, except in the great festivals, when it began much earlier; the sacrifice was offered immediately after sunrise.

(2) During the middle of the day, the priests held themselves in readiness to offer the sacrifices which might be presented by any of the Israelites, either of a voluntary or an expiatory nature. Their duties would therefore vary according to the number and nature of the offerings they might have to present.

(3) The evening service varied in a very trifling measure from that of the morning; and the same priests ministered, except when there was one in the house of their Father who had never burned incense, in which case that office was assigned to him, or, if there were more than one, they cast lots who should be employed. See *DAILY OFFERING*.

2. *Holiness of the Place.*—The injunction of Lev. xix, 3, "Ye shall reverence my sanctuary," laid the people under an obligation to maintain a solemn and holy behavior when they came to worship in the Temple. We have already seen that such as were ceremonially unclean were forbidden to enter the sacred court on pain of death; but in the course of time there were several prohibitions enforced by the Sanhedrim which the law had not named. The following have been collected by Lightfoot out of the Rabbinical writings (*Temple Service*, ch. x):

(1.) "No man might enter the mountain of the house with his staff."

(2.) "None might enter in thither with his shoes on his feet," though he might with his sandals.

(3.) "Nor might any man enter the mountain of the house with his scrip on."

(4.) "Nor might he come in with the dust on his feet," but he must wash or wipe them, "and look to his feet when he entered into the house of God," to remind him, perhaps, that he should then shake off all worldly thoughts and affections.

(5.) "Nor with money in his purse." He might bring it in his hand, however; and in this way it was brought in for various purposes. If this had not been the case, it would seem strange that the cripple should have been placed at the gate of the Temple to ask alms of those who entered therein (see Acts iii, 2).

(6.) "None might spit in the Temple; if he were necessitated to spit, it must be done in some corner of his garment."

(7.) "He might not use any irreverent gesture, especially before the gate of Nicanor," that being exactly in front of the Temple.

(8.) "He might not make the mountain of the house a thoroughfare," for the purpose of reaching the place by a nearer way; for it was devoted to the purposes of religion.

(9.) "He that went into the court must go leisurely and gravely into his place; and there he must demean himself, as in the presence of the Lord God, in all reverence and fear."

(10.) "He must worship standing, with his feet close to each other, his eyes directed to the ground, his hands upon his breast, with the right one above the left" (see Luke xviii, 13).

(11.) "No one, however weary, might sit down in the court." The only exception was in favor of the kings of the house of David.

(12.) "None might pray with his head uncovered. And the wise men and their scholars never prayed without a veil." This custom is alluded to in 1 Cor. xi, 4, where the apostle directs the men to reverse the practice adopted in the Jewish Temple.

(13.) Their bodily gesture in bowing before the Lord

was either "bending of the knees," "bowing the head," or "falling prostrate on the ground."

(14.) Having performed the service, and being about to retire, "they might not turn their backs upon the altar." They therefore went backwards till they were out of the court.

Concerning the high veneration which the Jews cherished for their Temple, Dr. Harwood has collected some interesting particulars from Philo, Josephus, and the writings of Luke. Their reverence for the sacred edifice was such that rather than witness its defilement they would cheerfully submit to death. They could not bear the least disrespectful or dishonorable thing to be said of it. The least injurious slight of it, real or apprehended, instantly awakened all the choler of a Jew, and was an affront never to be forgiven. Our Saviour, in the course of his public instructions, happening to say, "Destroy this Temple, and in three days I will raise it up again" (John ii, 19)—it was construed into a contemptuous disrespect, designedly thrown out against the Temple—his words instantly descended into the heart of a Jew and kept rankling there for several years; for, upon his trial, this declaration, which it was impossible for a Jew ever to forget or to forgive, was alleged against him as big with the most atrocious guilt and impiety (Matt. xxvi, 61). Nor was the rancor and virulence which this expression had occasioned at all softened by all the affecting circumstances of that excruciating and wretched death they saw him die; even as he hung upon the cross, with infinite triumph, scorn, and exultation, they upbraided him with it, contemptuously shaking their heads and saying, "O thou who couldst demolish our Temple and rear it up again in all its splendor in the space of three days, now save thyself, and descend from the cross" (xxvii, 40). Their superstitious veneration for the Temple further appears from the account of Stephen. When his adversaries were baffled and confounded by that superior wisdom and those distinguished gifts he possessed, they were so exasperated at the victory he had gained over them that they went and suborned persons to swear that they had heard him speak blasphemy against Moses and against God. These inflaming the populace, the magistrates, and the Jewish clergy, he was seized, dragged away, and brought before the Sanhedrim. Here the false witnesses whom they had procured stood up and said, "This person before you is continually uttering the most reproachful expressions against this sacred place" (Acts vi, 13), meaning the Temple. This was blasphemy not to be pardoned. A judicature composed of high-priests and scribes would never forgive such impiety. We witness the same thing in the case of Paul when they imagined that he had taken Trophimus, an Ephesian, with him into the Temple; for which insult they had determined to imbrue their hands in his blood (xxi, 28, etc.).

XI. *Literature.*—As we have said above, the two classical authorities on the Temple are the general description of Josephus (*Ant.* xv, 11, and *War*, v, 5) and the minute account of the Herodian building in the Talmudic tract *Middoth* (Mishna, v, 10), which has been edited and commented upon by L'Empereur of Oppyck (Lugd. Bat. 1630, 4to). Among the older works on the subject we especially name vols. viii and ix of *Antiquitates Hebraicae*, by Ugolino, which contain, in addition to other dissertations, Moses Maimonides, *Constitutiones de Domo Electa*; Abraham ben-David, *De Templo*; see also Schulze, *De Variis Judæorum Erroribus in Descriptione Templi Secundi* (F. ad M. 1756; also prefixed to his edition of Reland, *De Spoliis Templi Hierosolymitani* [Ultraj. 1775]); Hafenreffer, *Templum Ezech.* (Tubing. 1613); Villalpando and Prado, *In Ezechiel*; Jud. Leo, *Libri Quatuor de Templo Hieros.* tam *Priori quam Poster. ex Hebr. Lat. Vers.* a J. Saubert (Helmst. 1665, 4to); Cappellus, *Ἱερὸν, sive Triplex Templi Delineatio* (Amst. 1643, 4to; also inserted in the *Critici Anglicani*, vol. viii, and in vol. i of Walton's Polyglot); Harenberg, *In d. Brem. u. Verdisch. Biblioth.*

iv, 1 sq., 573 sq., 879 sq.; Lamy, *De Tabern. Fœd., Urbe Hieros. et de Templo* (Par. 1720 sq.); Cremer, *De Salom. Templo* (Harderov. 1748); Ernesti, *De Templo Herod.* (Lips. 1752); Grulick, *De Divino in Templo Ezech. Consilio* (Vitemb. 1775). Monographs on the Temple in Hebrew have been written by C. Altschul (Amst. 1724), J. M. Altschul (ibid. 1782), W. Altschul (Sklov, 1794; Warsaw, 1814), Leone (Amst. 1660; Middelh. 1642; in Latin by Saurbert [Helmst. 1665]), Heller (Prague, 1602; F. ad M. 1714), Chefetz (Ven. 1696), Wilna (Sklov, 1802), Snizler (Lond. 1825). The principal later works on the subject are those of Lightfoot, *Descriptio Templi Hierosolymitani*, in *Opp.* i, 533 sq.; Hirt, *Der Tempel Salomons* (Berlin, 1809, 4to); Stieglitz, *Gesch. der Baukunst* (Nuremb. 1827), p. 125 sq.; Less, *Beiträge zur Geschich. d. ausbild. Baukunst* (Leips. 1834), i, 63 sq.; Meyer, *Der Tempel Salom.* (Berlin, 1830; inserted also in *Blätter f. höhere Wahrheit*, i); Grüneisen, in the *Kunstblatt z. Morgenbl.* 1831, No. 73–75, 77–80. Other works are mentioned by Meusel, *Biblioth. Histor.* i, ii, 113 sq.; and Winer, *Realwörterb.* s. v. "Temple." See also Bennett, *The Temple of Ezekiel* (Lond. 1824); Isreels, *Ezekiel's Temple* (ibid. 1827); Kirchner, *Der Tempel zu Jerus.* (Neu-Ebers. 1834); El-Sinti, *Hist. of the Temple* (from the Arabic by Reynolds, Lond. 1837); Keil, *Der Tempel Salomons* (Dorp. 1839); Kopp, *id.* (Stuttgart, 1839); the *Stud. u. Krit.* 1844, ii, 320, 361; Thénius, *Erklär. d. Könige*, in the *Kurzgef. exeg. Handb.* ix, Anhang, p. 25 sq.; Bähr, *Der Salom. Tempel* (Carlsr. 1848); Balmer-Rinck, *Gesch. d. Tempel-Architectur* (Ludwigsb. 1858). The latest works are those of Bannister, *The Temples of the Hebrews* (Lond. 1861); Paine, *Solomon's Temple*, etc. (Bost. 1861); Unruh, *d. alte Jerus. u. s. Bauwerke* (Lagensatz, 1861); Rosen, *Der Tempel-Platz des Moria* (Gotha, 1866); Fergusson, *The Temples of the Jews* (Lond. 1878). This last and most pretentious effort at reconstructing the Jewish Temple is thoroughly vitiated by two favorite preconceptions of the author—namely, a false location of the structure at the south-west angle of the Haram, and an overweening estimate of modern architectural taste as a guide on so ancient a subject. Thus he flippantly dismisses the explicit and repeated Rabbinical statement of the dimensions of the Court of the Women as "absurd" (p. 98) and "impossible" (p. 117), because it cannot be got within his imaginary "rectangle 600 feet square" (Josephus's round number for the entire Temple area). He falsely asserts that this Rabbinical account "is borrowed avowedly, but unintelligently, from Ezekiel" (p. 117), ignoring the fact that the Mishna, which contains these measurements, has come down, traditionally if not in writing, from contemporaries of Herod's Temple itself. What a pity that these authorities, or even Herod himself, did not have the benefit of such learned criticism on their work!

TEMPLE. This name was scarcely ever used in the first three ages by any Christian writer for a church, but only for the heathen temples; but when idolatry was destroyed, and temples were purged and consecrated as Christian churches, then the writers of the following ages freely gave them the name of temples. At first no idol temples were made use of as churches, but were generally tolerated until the twenty-fifth year of Constantine, A.D. 333. In that year he published his laws commanding the destruction of temples, altars, and images. This policy was continued until the reign of Theodosius, when another method was adopted, and we find the emperor turning the famous temple of Heliopolis, called Balanium, into a Christian church. Honorius (A.D. 408) published two laws forbidding the destruction of temples in the cities, because, being purged, they might serve for ornament or public use. Bede (lib. i, c. 30) tells us "that Gregory the Great gave Austin the monk instructions about the temples among the Saxons in Britain, that if they were well built they should not be destroyed, but only converted to the service of the true God." Sometimes the temples were

pulled down, and the materials were given to the Church, out of which new edifices were erected for the service of religion. Sometimes additions were made to the emoluments of the clergy by the donation of heathen temples and the revenues that were settled upon them, although the latter were usually appropriated by the emperors themselves. See Bingham, *Christ. Antiq.* bk. v, ch. iv, § 10; bk. viii, ch. i, § 6; ch. ii, § 4.

Temple, DANIEL, a Congregational minister, was born at Reading, Mass., Dec. 23, 1789. He was employed in mechanical labors until he was twenty-one years old. In 1810 he was converted, and joined the Church. His attention was called to the missionary field by reading Buchanan's *Researches*, and he commenced the work of preparation by entering Phillips Academy at Andover. He subsequently entered Dartmouth College, from which he graduated in 1817. His influence for good in college was great. He spent three years at the Andover Theological Seminary, and was licensed to preach at Billerica by the Andover association in August, 1820. After being employed one year in Massachusetts by the American board, he was ordained at the same time with the Rev. Isaac Bird at North Bridgewater, Oct. 3, 1821. After his marriage with Miss Rachel B. Dix, he sailed from Boston for Malta, Jan. 2, 1822, carrying with him the first printing-press, which has since proved such a blessing to the people of the Orient. His wife died in Malta in 1827. Two of his four children survive, and are now preaching the Gospel. He returned to America in 1830, and after remaining a short time, during which he married again, he went back to Malta, where he remained until 1833, when he left for Smyrna, taking with him the whole printing establishment. Though he first set up the press in Malta, its productions were for regions beyond. The authorities ordered the press away from Smyrna, yet he retained it until he left the coast. He established schools there among the Greeks, but whoever would see what he accomplished must go to Constantinople, Aintab, and elsewhere in that land. He continued his connection with the press until he left the mission, in 1844, and returned to America. After his return, he commenced preaching at Phelps, Ontario Co., N. Y., where his labors were greatly blessed. His acquaintance with the Scriptures was wonderful, being familiar with every part of them. For some time before his end he was not able to preach; but in sickness and in health, in suffering as in labors, he glorified his Master until his death, which took place at Reading, Mass., Aug. 11, 1851. See Sprague, *Annals of the Amer. Pulpit*, ii, 677 sq. (W. P. S.)

Temporal, a term often used for *secular*, in a distinction from spiritual or ecclesiastical; likewise for anything belonging to time in contrast with eternity.

Temporal Power of the POPE is a phrase susceptible of two meanings, which are very distinct from each other, and the confusion of which has led to frequent and serious misunderstanding.

I. In one of these senses it means the sovereign power possessed by the pope as ruler of the Papal States, or STATES OF THE CHURCH (q. v.), where the history of its origin, progress, and downfall is briefly detailed. The question as to the necessity or utility of such a power vested in the hands of a spiritual ruler, and even its lawfulness and its compatibility with his spiritual duties, has been warmly debated. This controversy is not of entirely recent origin, for many of the mediæval sectaries urged the incompatibility of the spiritual with the temporal power in the same person, not only in relation to the pope, but also to the baron-bishops. Such were the doctrines of the Vaudois, of Pierre de Bruis, and especially of Arnold of Brescia. In the centuries following, the antipapal controversies turned so entirely upon doctrine that there was little attention paid to this question. It did not enter in any way into the conflict of Gallican and Ultramontane principles. Even Bossuet

not only admitted the lawfulness of the pope's temporal sovereignty, but contended that it was in some sense necessary to the free exercise of his spiritual power. The controversy only assumed any practical interest during the conflict between Pius VII and Napoleon I, the design of the latter of annexing papal territory to France being one of the main causes of dispute. No formal and authoritative judgment of the Roman Church has been pronounced regarding the question of temporal power, but a strong and almost unanimous expression of opinion was tendered to the late pope, Pius IX, in the form of letters and addresses from bishops and others in every part of Catholic Christendom. They profess that the possession of temporal power is no essential part of the privileges of the successor of Peter, but they regard it as the means providentially established for the protection of the spiritual independence of the pope and the free exercise of his functions as spiritual ruler of the Church.

II. By the second signification of the phrase "temporal power of the pope" is understood what would more properly be called the claim of the pope, in virtue of his office, to a power over the temporalities of other kings and states. This power may be of two kinds: 1. *Directive*, or the power, as supreme moral teacher, to instruct all members of his Church, whether subjects or sovereigns, in the moral duties of their several states. 2. *Coercive*. If the power be regarded as coercive, it is necessary to distinguish the nature of the coercion which may be employed. Coercion may either consist in the threat or infliction of *purely spiritual censures*, or it may involve temporal consequences, such as suspension or deprivation from office, forfeiture of the allegiance of subjects, and even liability to the punishment of death. In the former sense it may be regarded as the natural consequence of the spiritual headship of the Church, which is acknowledged by all Catholics. But the claim to authority over the temporalities of kings has gone far beyond these limits. From the 10th century popes have claimed and repeatedly exercised a power of coercing kings, and have punished them when refractory by suspension, by deprivation, and by the transfer of the allegiance of their subjects. This claim has been a subject of controversy between the Gallican and Ultramontane schools, and in the latter two theories have been devised for its explanation. The first and most extreme supposes that this power was given directly by God to Peter and his successors; that the two powers are foreshown by the "two swords" (Luke xxii, 38); and that the temporal power is a privilege of the primacy by divine law equally with the spiritual sovereignty itself. The second, or *indirect*, theory holds that the temporal power is not directly of divine institution, but is an indirect though necessary consequence of the spiritual supremacy, and is only given as a means of completing and, in a corrupt and disorganized state, rendering more efficacious the work which the spiritual supremacy is directly instituted to accomplish. In this latter form the theory of the temporal power was defended by cardinal Bellarmine, and the celebrated declaration of the Gallican clergy in 1862 was directed against it.

A third view of the temporal power was propounded by Fénelon, and is generally described as the "historical theory of the temporal power." According to this, the pope does not possess, whether by direct divine appointment or in virtue of the necessities of his spiritual office, any temporal power whatsoever; but he possesses the plenitude of spiritual power which is required for the government of the Church, and is empowered to enforce it by spiritual penalties, and especially by excommunication. Although these penalties are purely spiritual, yet the religious sentiment and awe with which the Church is regarded by many invest them with certain temporal effects. In several countries, as England (A.D. 859), France, Spain (A.D. 638), and Germany, the forfeiture of certain civil rights was attached, in the

case of private persons, to the spiritual censure of excommunication. The same spirit of the age is seen in the form of the oath taken at the coronation of the sovereign in many countries, by which the monarch swore to be the protector and defender of the sovereign pontiff and the holy Catholic Church—thus making their kingdoms feudatory to the see of Rome. From these and similar indications of the public feeling of the mediæval time, the advocates of this theory of the temporal power infer that orthodoxy and obedience to the pope were accepted as a condition of the tenure of supreme civil authority. On the other hand, it is difficult, if not impossible, to reconcile this theory with the language used by the popes in enforcing their claims to temporal authority, and with the fact that such power continued to be claimed and exercised until very recent times. See Baruum, *Romanism As It Is*; Elliott, *Delineation of Romanism*; and the articles PAPACY and STATES OF THE CHURCH.

**Temporalities of BISHOPS**, in law, are the lay revenues, lands, tenements, and fees belonging to the sees of bishops or archbishops, as they are barons and lords of Parliament, including their baronies. They are defined as all things which a bishop hath by livery from the king, as manors, lands, tithes. From the time of Edward I to the Reformation, it was customary, when bishops received their temporalities from the king, to renounce in writing all right to the same by virtue of any provision from the pope, and to admit that they received them from the king alone. The custody of these temporalities is said by Blackstone to form part of the king's ordinary revenue, and thus, a vacancy in the bishopric occurring, is a right of the crown, originating in its prerogative in Church matters, the king being, in intentment of law, preserver of all episcopal sees. For the same reason, before the dissolution of religious houses, the sovereign had the custody of the temporalities of all such abbeys and priories as were of royal foundation. There is another reason in virtue of which the king possesses this right, which is, that as the successor is not known, the property of the see would be liable to spoil and devastation. The law, therefore, has wisely given to the king the custody of these temporalities until a new election, with power to take to himself all intermediate profits, and to present to all preferments falling vacant during the vacancy of the see. This revenue cannot be granted to a subject; but the 14 Edward III, stat. iv, ch. iv, v, empowers the king, on a vacancy occurring, to lease the temporalities to the dean and chapter, with a reservation of all advowsons, escheats, and the like. To remedy the wrongs to the Church perpetrated by former sovereigns, who sometimes kept bishoprics vacant in order to enjoy the possession of their temporalities, and when they did supply the vacancy compelled the new bishop to purchase back his temporalities at an exorbitant price, Henry I, by charter, agreed neither to sell, let to farm, nor take anything from the domains of the Church until the successor was installed. By Magna Charta provision was made that no waste should be committed in the temporalities of the bishoprics, and that neither should the custody of them be sold. At present this revenue of the crown is of very small account; for as soon as the new bishop is consecrated and confirmed, he usually receives restitution of his temporalities entire and untouched from his sovereign, to whom he at the same time does homage, and then possesses, which he did not before, a fee simple in his bishopric, and may maintain an action for the profits.

**Tempt** is used in the Bible in the Latin sense of *prove*, as a rendering especially of *ἰσθῆναι*, *ischēnai*, and *πειράζω*, which both signify to *test* or *try*. It is applied to various beings in different senses, not always involving an evil purpose wherein the temptation is presented to the mind as an inducement to sin. See TEMPTATION.

1. God is said to have tempted Abraham by commanding him to offer up his son Isaac (Gen. xxii, 1), intending to prove his obedience and faith, to confirm and strengthen him by this trial, and to furnish in his person an example and pattern of perfect obedience for all succeeding ages. God does not tempt or try men in order to ascertain their tempers and dispositions, as if he were ignorant of them, but to exercise their virtue, to purify it, to render it conspicuous to others, to give them an opportunity of receiving favors from his hands. When we read in Scripture that God proved his people, whether they would walk in his law or not (Exod. xvi, 4), and that he permitted false prophets to arise among them, who prophesied vain things to try them whether they would seek the Lord with their whole hearts, we should interpret these expressions by that of James (i, 13-14), "Let no man say when he is tempted, 'I am tempted of God,' for God cannot be tempted with evil, neither tempteth he any man. But every man is tempted when he is drawn away by his own lust and enticed."

2. The devil tempts us to evil of every kind, and lays snares for us, even in our best actions. Satan, having access to the sensorium, lays inducements before the minds of men to solicit them to sin (1 Cor. vii, 5; 1 Thess. iii, 5; James i, 13, 14). Hence Satan is called that old serpent, the devil, and "the tempter" (Rev. xii, 9; Matt. iv, 3), and the temptation of our first parents to sin is expressly recognised as the work of the devil (Gen. iii, 1-15; John viii, 44; 2 Cor. xi, 3; 1 John iii, 8). He tempted our Saviour in the wilderness, and endeavored to infuse into him sentiments of pride, ambition, and distrust (Matt. iv, 1; Mark i, 13; Luke iv, 2). He tempted Ananias and Sapphira to lie to the Holy Ghost (Acts v, 3). In the prayer that Christ himself has taught us, we pray God "to lead us not into temptation" (Matt. vi, 13); and a little before his death, our Saviour exhorted his disciples to "watch and pray, that they might not enter into temptation" (xxvi, 41). Paul says, "God will not suffer us to be tempted above what we are able to bear" (1 Cor. x, 13).

3. Men are said to tempt the Lord when they unseasonably require proofs of the divine presence, power, or goodness. Without doubt, we are allowed to seek the Lord for his assistance, and to pray him to give us what we need; but it is not allowed us to tempt him, nor to expose ourselves to dangers from which we cannot escape unless by miraculous interposition of his omnipotence. God is not obliged to work miracles in our favor; he requires of us only the performance of such actions as are within the ordinary measures of our strength. The Israelites in the desert repeatedly tempted the Lord, as if they had reason to doubt his presence among them, or his goodness, or his power, after all his appearances in their favor (Exod. xvi, 2, 7, 17; Numb. xx, 12; Psa. lxxviii, 18, 41, etc.).

4. Men tempt or try one another when they would know whether things are really what they seem to be, whether men are such as they are thought or desired to be. The queen of Sheba came to prove the wisdom of Solomon by proposing riddles for him to explain (1 Kings xi, 1; 2 Chron. ix, 1). Daniel desired of him who had the care of feeding him and his companions to prove them for some days whether abstinence from food of certain kinds would make them leaner (Dan. i, 12, 14). The scribes and Pharisees often tempted our Saviour, and endeavored to decoy him into their snares (Matt. xvi, 1; xix, 3; xxii, 18).

**Temptation** (ῥῆμα, πειρασμός, both meaning *trial*), in the modern usage of the term, is the enticement of a person to commit sin by offering some seeming advantage. There are four things, says one, in temptation—(1) deception, (2) infection, (3) seduction, (4) perdition. The sources of temptation are Satan, the world, and the flesh. We are exposed to them in every state, in every place, and in every time of life. They may be

wisely permitted to show us our weakness, to try our faith, to promote our humility, and to teach us to place our dependence on a superior Power; yet we must not run into them, but watch and pray; avoid sinful company; consider the love, sufferings, and constancy of Christ, and the awful consequences of falling a victim to temptation. The following rules have been laid down, by which we may in some measure know when a temptation comes from Satan: 1. When the temptation is unnatural, or contrary to the general bias or temper of our minds; 2. When it is opposite to the present frame of the mind; 3. When the temptation itself is irrational, being contrary to whatever we could imagine our own minds would suggest to us; 4. When a temptation is detested in its first rising and appearance; 5. Lastly, when it is violent. See Brooks, Owen, Gilpin, Capel, and Gillespie on Temptation; South, *Seven Sermons on Temptation*, in vol. vi of his *Sermons*; Pike and Hayward, *Cases of Conscience*; and Bishop Porteus, *Sermons*, vol. i, ser. 3 and 4.

**TEMPTATION OF CHRIST.** Immediately after the inauguration of his ministry, Jesus was led up of the Spirit into the wilderness to be tempted of the devil; and after enduring for forty days the general assault of Satan, he suffered three special solicitations, which are recited in detail (Matt. iv, 1-11; Mark i, 12, 13; Luke iv, 1-13). See JESUS CHRIST.

I. *Particulars and Drift of the Trial.*—In the first temptation the Redeemer is ahungred, and when the devil bids him, if he be the Son of God, command that the stones may be made bread, there would seem to be no great sin in this use of divine power to overcome the pressing human want. Our Lord's answer is required to show us where the essence of the temptation lay. He takes the words of Moses to the children of Israel (Deut. viii, 3), which mean, not that men must dispense with bread and feed only on the study of the Divine Word, but that our meat and drink, our food and raiment, are all the work of the creating hand of God, and that a sense of *dependence on God* is the duty of man. He tells the tempter that as the sons of Israel standing in the wilderness were forced to humble themselves and to wait upon the hand of God for the bread from heaven which he gave them, so the Son of man, fainting in the wilderness from hunger, will be humble and will wait upon his Father in heaven for the Word that shall bring him food, and will not be hasty to deliver himself from that dependent state, but will wait patiently for the gifts of his goodness.

In the second temptation, it is not probable that they left the wilderness, but that Satan was allowed to suggest to our Lord's mind the place and the marvel that could be wrought there. They stood, it has been suggested, on the lofty porch that overhung the valley of Kedron, where the steep side of the valley was added to the height of the Temple (Josephus, *Ant.* xv, 11, 5), and made a depth that the eye could scarcely have borne to look down upon. "Cast thyself down"—perform in the holy city, in a public place, a wonder that will at once make all men confess that none but the Son of God could perform it. A passage from Psalm xci is quoted to give a color to the argument. Our Lord replies by an allusion to another text that carries us back again to the Israelites wandering in the wilderness: "Ye shall not tempt the Lord your God, as ye tempted him in Massah" (Deut. vi, 16). Their conduct is more fully described by the psalmist as a tempting of God: "They tempted God in their heart by asking meat for their lust; yea, they spake against God: they said, Can God furnish a table in the wilderness? Behold he smote the rock that the waters gushed out and the streams overflowed. Can he give bread also? Can he provide flesh for his people?" (Psa. lxxviii). Just parallel was the temptation here. God has protected thee so far, brought thee up, put his seal upon thee by

manifest proofs of his favor. Can he do this also? Can he send the angels to buoy thee up in thy descent? Can he make the air thick to sustain and the earth soft to receive thee? The appropriate answer is, "Thou shalt not tempt the Lord thy God."

In the third temptation it is not asserted that there is any mountain from which the eyes of common men can see the world and its kingdoms at once displayed; it was with the mental vision of One who knew all things that these kingdoms and their glory were seen. Satan has now begun to discover, if he knew not from the beginning, that One is here who can become the King over them all. He says, "All these things will I give thee if thou wilt fall down and worship me." In Luke the words are fuller: "All this power will I give thee, and the glory of them, for that is delivered unto me, and to whomsoever I will, I give it;" but these words are the lie of the tempter, which he uses to mislead. "Thou art come to be great—to be a King on the earth; but I am strong, and will resist thee. Thy followers shall be imprisoned and slain; some of them shall fall away through fear; others shall forsake thy cause, loving this present world. Cast in thy lot with me; let thy kingdom be an earthly kingdom, only the greatest of all—a kingdom such as the Jews seek to see established on the throne of David. Worship me by living as the children of this world live, and so honoring me in thy life: then all shall be thine." The Lord knows that the tempter is right in foretelling such trials to him; but though clouds and darkness hang over the path of his ministry he must work the work of him that sent him, and not another work: he must worship God, and none other. "Get thee hence, Satan; for it is written, Thou shalt worship the Lord thy God, and him only shalt thou serve." As regards the order of the temptations, there are internal marks that the account of Matthew assigns them their historical order. Luke transposes the last two, for which various reasons are suggested by commentators (Matt. iv, 1-11; Mark i, 12, 13; Luke iv, 1-13).

The three temptations are addressed to the three forms in which the disease of sin makes its appearance on the soul—to the solace of sense, and the love of praise, and the desire of gain (1 John ii, 16). But there is one element common to them all—they are attempts to call up a wilful and wayward spirit in contrast to a patient self-denying one. See TEMPT.

The author of *Eccle Homo*, although he takes too subjective a view of the last temptation scene, has admirably developed the thought, as lying at the foundation of Christ's whole public demeanor, that he was constantly on his guard against the prevailing notion of an establishment of the Messiah's kingdom by force instead of the influence of love; and he well observes that the temptation to this course was one that must have presented itself at some time to the Redeemer's mind.

II. *Credibility and Design of the Narrative.*—That when our Lord retired to the interior part of the wilderness the enemy of mankind should present the most plausible temptation to our Redeemer, under these trying circumstances, is perfectly consistent with the malevolence of his character. The grand question is, Why was Satan suffered thus to insult the Son of God? Wherefore did the Redeemer suffer his state of retirement to be thus disturbed with the malicious suggestions of the fiend? It may be answered that herein (1) he gave an instance of his own condescension and humiliation, (2) he hereby proved his power over the tempter, (3) he set an example of firmness and virtue to his followers, and (4) he here affords consolation to his suffering people by showing not only that he himself was tempted, but is able to succor those who are tempted (Heb. ii, 13; iv, 15).

III. *Historical Character of the Scene.*—As the baptism of our Lord cannot have been for him the token of repentance and intended reformation which it was for

sinful men, so does our Lord's sinlessness affect the nature of his temptation, for it was the trial of one who could not possibly have fallen. This makes a complete conception of the temptation impossible for minds wherein temptation is always associated with the possibility of sin. But while we must be content with an incomplete conception, we must avoid the wrong conceptions that are often substituted for it. The popular view of this undoubted portion of our Saviour's history is that it is a narrative of outward transactions; that our Saviour, immediately after his baptism, was conducted by the Spirit into the wilderness—either the desolate and mountainous region now called Quarantania by the people of Palestine (Kitto, *Phys. Hist.* p. 39, 40), or the great desert of Arabia, mentioned in Deut. viii, 15; xxxii, 10; Hos. xiii, 5; Jer. ii, 6, etc.—where the devil tempted him in person, appeared to him in a visible form, spoke to him in an audible voice, removed him to the summit "of an exceeding high mountain," and to the top of "a pinnacle of the Temple at Jerusalem;" whereas the view taken by many learned commentators, ancient and modern, is that it is the narrative of a vision, which was designed to "supply that ideal experience of temptation, or trial, which it was provided in the divine counsels for our Lord to receive previously to entering upon the actual trials and difficulties of his ministry" (Bishop Malby, *Sermons* [Lond. 1822], ii, 276). Farmer also considers it a "divine vision," and endeavors with much learning and ingenuity to "illustrate the wise and benevolent intention of its various scenes as symbolical predictions and representations of the principal trials attending Christ's public ministry" (*Inquiry into the Nature and Design of Christ's Temptation* [Lond. 1776, 8vo], preface).

On behalf of the popular interpretation, it is urged that the accounts given by the evangelists convey no intimation that they refer to a vision; that the feeling of hunger could not have been merely ideal; that a vision of forty days' continuance is incredible; that Moses, who was a type of Christ, saw no "visions," and that hence it may be concluded Christ did not; that it is highly probable there would be a personal conflict between Christ and Satan when the former entered on his ministry. Satan had ruined the first Adam, and might hope to prevail with the second (Trollope, *Analecta* [Lond. 1830], i, 46). Why, too, say others, was our Lord taken up into a mountain to see a vision? As reasonably might Paul have taken the Corinthians into a mountain to "show them the more excellent way of charity" (1 Cor. xii, 31).

On the contrary side, it is rejoined that the evangelists do really describe the temptation as a vision. Matthew says, ἀνῆχθη εἰς τὴν ἔρημον ὑπὸ τοῦ πνεύματος; Mark, τὸ πνεῦμα αὐτοῦ ἐκβάλλει; and Luke, ἤγατο ἐν τῇ πνεύματι. Do these phrases mean no more than that Jesus went by the guidance or impulse of the Spirit to a particular locality? Do they not rather import that Christ was brought into the wilderness under the full influence of the prophetic spirit making suitable revelations to his mind? With regard to the hunger, the prophets are represented as experiencing bodily sensations in their visions (Ezek. iii, 3; Rev. x, 10). Further arguments, derived from an unauthorized application of types, are precarious—that the first Adam really had no personal encounter with Satan; that all the purposes of our Lord's temptation might be answered by a vision, for, whatever might be the mode, the effect was intended to be produced upon his mind and moral feelings, like Peter's vision concerning Cornelius, etc. (Acts x, 11-17); that commentators least given to speculate allow that the temptation during the first forty days was carried on by mental suggestion only, and that the visible part of the temptation began "when the tempter came to him" (Matt. iv, 3; Luke iv, 3; Scott, *ad loc.*); that with regard to Christ's being "taken up into an exceeding high mountain," Ezekiel says (xl, 2), "in the visions of God brought he me into the land of Is-

rael, and set me upon a very high mountain," etc.; and that John says, "he carried me away in the spirit to a great and high mountain, and showed me that great city, the holy Jerusalem" (Rev. xxi, 10). But certain *direct arguments* are also urged on the same side. Thus, is it consistent with the sagacity and policy of the evil spirit to suppose that he appeared in his own proper person to our Lord uttering solicitations to evil? Was not this the readiest mode to frustrate his own intentions? Archbishop Secker says, "certainly he did not appear what he was, for that would have entirely frustrated his intent" (*Sermons*, ii, 114). Chandler says, "The devil appeared not as himself, for that would have frustrated the effect of his temptation" (*Serm.* iii, 178). Secker supposes that "Satan transformed himself into an angel of light;" but was it likely that he would put on this form in order to tempt our Lord to idolatry? (Matt. iv, 9). Chandler thinks he appeared as "a good man;" but would it have served his purpose to appear as a good man promising universal dominion? The supposition that the devil disguised himself in any form might indeed constitute the temptation a trial of our Lord's understanding, but not of his heart. Besides, Christ is represented as addressing him as "Satan" (ver. 10). It is further urged that the literal interpretation does but little honor to the Saviour, whom it represents as carried or conducted "by the devil at his will," and therefore as accessory to his own temptation and danger; nor does it promote the consolation of his followers, none of whom could ever be similarly tempted. Our Lord indeed submitted to all the liabilities of the human condition; but do these involve the dominion of Satan over the body to the extent thus represented? The literal interpretation also attributes miraculous powers to the devil, who, though a spiritual being, is represented as becoming visible at pleasure, speaking in an audible voice, and conveying mankind where he pleases—miracles not inferior to what our Lord's preservation would have been had he cast himself headlong from the Temple. Suppose we even give up the old notion that "the devil hurried Christ through the air, and carried him from the wilderness to the Temple" (Benson, *Life of Christ*, p. 35), and say, with Doddridge and others, that "the devil took our Lord about with him as one person takes another to different places," yet how without a miracle shall we account for our Saviour's admission to the exterior of the Temple, unless he first, indeed, obtained permission of the authorities, which is not recorded (comp. Josephus, *Ant.* xv, 11; iii, 5; *War.* v, 5). The difficulty is solved by the supposition simply of a change in our Lord's perceptions. How can we further understand, except by the aid of a vision or a miracle, that the devil "showed our Lord all the kingdoms of the world and the glory of them in a moment of time" (*ἐν στιγμή χρόνου*), a phrase referring to the mathematical point, and meaning the most minute and indivisible portion of duration, that is, instantaneously; yet in this space of time, according to the literal interpretation, "the devil showed our Lord all the kingdoms of the world and all the glory of them," i. e. whatever relates to their magnificence, as imperial robes, crowns, thrones, palaces, courts, guards, armies, etc. Scott and Doddridge resort to the supposition of an "illusory show;" but it may be asked, if one of the temptations was conducted by such means, why not the other two? Macknight endeavors to explain "all the kingdoms of the world and the glory of them" as relating only to the land of promise (*Harmony of the Gospels* [Lond. 1822], p. 350, note). Farmer conceives that no mountain in Palestine commands so extensive a prospect. It is a further difficulty attending the literal interpretation that Satan represents all the kingdoms of the world and their glory to be at his disposal; an assertion not denied by our Lord, who simply rejects the offer. It may readily be conceived that it would answer all purposes that Jesus should *seem* to have the proposal in question made to him. It is next observed that

many things are spoken of in Scripture as being done which were only done in vision. See the numerous instances collected by bishop Law (*Considerations of the Theory of Religion* [Lond. 1820], p. 85, 86). The reader may refer to Gen. xxxii, 30; Hos. i, iii; Jer. xiii, xxv, xxvii; Ezek. iii, iv, v. Paul calls his being "caught up into the third heaven and into Paradise" a vision and revelation of the Lord (2 Cor. xii, 1-4). It is plain from this instance in the case of Paul, and from that of Peter (Acts xii, 7-9), who had already experienced visions (x, 10, etc.), that neither of the apostles could at first distinguish visions from impressions made on the senses. In further illustration it is urged that the prophets are often said to be *carried about* in visions (Ezek. viii, 1-10; xi, 24, 25; xxxvii, 1; xl, 1, 2). The phrase "by the spirit," etc., is said to be equivalent to "the hand of God," etc., among the prophets (1 Kings xviii, 46; 2 Kings iii, 15; Ezek. i, 3). A comparison of the parallel phrases in the Sept. of Ezekiel and in the evangelists, in regard to Christ's temptation, is thought to cast much light upon the subject; the phrase "the devil leaveth him" being equivalent to the phrase "the vision I had seen went up from me" (xi, 24).

Another form of the above theory is that the presence of the tempter, the words spoken, etc., were merely conceptual, i. e. mental phenomena or impressions upon the Saviour, similar to the suggestions ordinarily experienced by saints in temptations of peculiar vividness or pungency. This view is confuted by the following considerations: 1. The language ("came," "said," "taketh him," etc.) implies, if not a physical, certainly at least a visual presentation as distinct as if actual. Such expressions as "The word of the Lord came," urged as parallel, are not in point; for in these the subject presented being necessarily immaterial of itself, defines the presentation as being merely mental. 2. The comparison of our Saviour's psychology in this case with that of common mortals is inapposite, since they, being fallen, are always, in some sense at least, tempted *ab intra* (James i, 14), whereas Jesus, being immaculate, could have no evil thoughts of his own surmising; nor could they arise in his mind except as directly suggested from some absolutely external source. And even supposing they could have occurred as an intellectual proposition to his mental perception, they must have instantly passed away without any of that vividness and pertinacity which the whole narration implies, unless they had been enforced and sustained by the personal solicitation of a palpable being and a formal conversation. 3. The parallel with the temptation of Adam in Paradise requires more than an imaginary scene. Some, indeed, have by a like process of interpretation taken the record of the Fall in Eden likewise out of the province of actual history; and it is difficult to see why one event is not as fit a subject for this evincing rationalism in hermeneutics as the other (see Townsend, *Chronological Arrangement* [Lond. 1828], i, 92). In short, there must have been a substantial basis of *fact* in the case of our Saviour to justify the marked character of the transaction as recorded by the evangelists.

We conclude, therefore, that all these suppositions set aside the historical testimony of the gospels; the temptation as there described arose not from the sinless mind of the Son of God, where, indeed, thoughts of evil could not have harbored, but from Satan, the enemy of the human race. Nor can it be supposed that this account is a mere parable, unless we assume that Matthew and Luke have wholly misunderstood their Master's meaning. The story is that of a fact, hard indeed to be understood, but not to be made easier by explanations such as would invalidate the only testimony on which it rests (Heubner, *Practical Commentary on Matthew*).

IV. *Literature*.—See, besides the works cited above, Bagot, *Temptation in the Wilderness* (Lond. 1840); Hall,

*Sermons on Our Lord's Temptation* (ibid. 1845); Dallas, *Christ's Temptation* (ibid. 1848); Krummacher, *Christ in the Wilderness* (from the Germ., 3d ed. ibid. 1852); Smith [T. T.], *Temptation of Our Saviour* (ibid. 1852); Monod, *Temptation of Christ* (from the French, ibid. 1854); Macleod, *Temptation of Our Lord* (ibid. 1872); and the *Am. Theol. Rev.* July, 1861; *Bost. Rev.* March, 1863; also the monographs cited by Wolf, *Curæ in N. T.* i, 66; by Volbeding, *Index Programmaturum*, p. 23; by Hase, *Leben Jesu*, p. 89; and by Meyer, *Commentary on Matt. iv* (Edinb. ed.), i, 129.

**Tempus Clausum** (FERIATUM, SACRATUM), a closed time, is the period during which noisy festivities are prohibited in the Church of Rome, particularly such as are common in connection with the celebration of a marriage. The origin of such prohibitions is to be found in the ideas which exercised, in some degree at least, a determining influence over the regulation of fasts. See FASTING. Prayer and continence were employed as a preparation for the worthy observance of feasts among the Israelites (Exod. xix, 14 sq.; 1 Sam. xxi, 4), and the custom is endorsed by Paul in 1 Cor. vii, 5. The most ancient ecclesiastical regulations upon this subject date back to the middle of the 4th century (e. g. *Conc. Laodiceæ*, c. 51, 52). The civil authorities confirmed the prohibitions imposed by the Church (e. g. *Cod. De Feriis*, c. 11, iii, 12 of Leo, and Anthemius 469), and thereupon the *Tempus Clausum* was generally made to apply to the Lenten period, and its extension over the Advent and other festal periods recommended. No general and inflexible rule for the *dies observabiles* existed during the Middle Ages, and none has since been established. The usual time is contained between the first Sunday in Advent and the octave of Epiphany, Septuagesima and Easter, Rogation and Trinity Sundays. Quiet weddings, as they are termed, are permitted to be celebrated during those periods, but never without a dispensation from the local bishop.

The *tempus clausum* was adopted by the Protestant churches of Germany (see Göschel, *Doctr. de Matrimon. ex Ordin. Eccl. Evang.* etc. [Halis, 1848, 4to], p. 38, 39; art. 133-140), and the subject received careful consideration so late as 1857 in the conference of Eisenach (see Moser, *Allgem. Kirchenbl. f. d. evangel. Deutschl.* 1857, p. 325 sq., 343; 1858, p. 197 sq.). The *Tempus Clausum Quadragesimæ* in such churches commonly extends over the period between Ash-Wednesday and Easter-Sunday, though it includes only the Passion week in some regions, and in others is not recognised at all. Its observance also varies greatly. Public amusements are prohibited, and marriages are sometimes wholly forbidden or are compelled to be quietly celebrated. Where such legal prohibitions are in force, dispensations from their operation may usually be obtained, except in Altenburg and the principality of Lubeck and Reuss. On the subject, see Hartzheim, *Concilia Germaniæ*, iii, 56; *Conc. Trident.* sess. xxiv, 10, *De Reform. Matrimon.*; Böhmer, *Jus Eccles. Prot.* lib. iii, tit. xvi, § 45; lib. iv, tit. xvi, § 2 sq.; Kliefoth, *Liturgische Abhandlungen*, i, 55 sq.—Herzog, *Real-Encyklop.* s. v. See LENT.

**Temurah.** See CABALA; TALMUD.

**Ten** (עָשָׂר, *éser*, or some modification of it; δέκα; the Heb. plur. עָשָׂרִים, *esrim*, means "twenty;" the root עָשָׂר, *asár*, is thought by Fürst and Mühlau to signify *heaping*, but Gesenius regards it as primitive), the number which lies at the basis of modern numeration, having its natural origin in the twice five fingers used for counting, and largely employed as such even by the Hebrews, notwithstanding their peculiar regard for seven as containing the notion of completeness. See NUMBER.

In the civil and ecclesiastical usages of the Israelites this numerical idea especially appears in their word for "tithe" (עֲשֵׂרֶה, Lev. xxvii, 30, 31, 32, etc.; Sept. δέκα-

τη, scil. μῦρα, "a part;" Vulg. *decimæ*), plainly derived from עָשָׂר, "ten," which also (in the form עָשָׂר) means "to be rich;" hence ten is the *rich* number, perhaps because including all the units under it. The same idea has been rather hastily conceived as being retained in the Greek; thus, δέκα, *déxamai*, "to receive," "hold," etc., δέκα, "ten," because the ten fingers hold everything; and in the Latin, *teneo*; French, *contenir*; English, *contain*, *ten*. Pythagoras speaks of the Decade, which is the sum of all the preceding numbers 1+2+3+4, as comprehending all musical and arithmetical proportions. For a view of his doctrine of numbers and the probability of its Egyptian origin, see Wilkinson, *Manners and Customs of the Ancient Egyptians*, iv, 193-200. For Aristotle's similar ideas of the number ten, see *Probl.* iii, 15. This number seems significant of completeness or abundance in many passages of Scripture. Jacob said unto Laban, "Thou hast changed my wages these ten times" (Gen. xxxi, 41); "Am not I better to thee than ten sons?" (1 Sam. i, 8); "These ten times have ye reproached me" (Job xix, 3); "Thy pound hath gained ten pounds" (Luke xix, 16), etc. This number, as the end of less numbers and beginning of greater, and as thus signifying perfection, sufficiency, etc., may have been selected for its suitableness to those eucharistic donations to religion, etc., which mankind were required to make, probably, in primeval times. Abraham gave to Melchizedec, "priest of the Most High God," a tenth of all the spoils he had taken from Chedorlaomer (Gen. xiv, 20; Heb. vii, 4). The incidental way in which this fact is stated seems to indicate an established custom. Why should Abraham give tithes of the spoils of war and not of other things? For instances of the heathen dedicating to their gods the tenth of warlike spoils, see Wettstein, *On Heb. vii*, 4. Jacob's vow (Gen. xxviii, 22) seems simply to relate to compliance with an established custom; his words are, literally, "And all that thou shalt give me I will assuredly tithe it unto thee," עָשָׂר לְךָ אֶנְשֵׁרְכִי לֵךְ. On the practice of the heathen, in various and distant countries, to dedicate tithes to their gods, see Spelman, *On Tithes*, ch. xxvi; Selden, ch. iii; Lesley, *Divine Right of Tithes*, § 7; Wettstein, *On Heb. vii*, 2. The Mosaic law, therefore, in this respect, as well as in others, was simply a reconstitution of the patriarchal religion. Thus the tenth of military spoils is commanded (Numb. xxxi, 31). For the law concerning tithes generally, see Lev. xxvii, 30, etc., where they are first spoken of as things already known. These tithes consisted of a tenth of all that remained after payment of the first-fruits of seeds and fruits, and of calves, lambs, and kids. This was called the first tithe, and belonged to God as the sovereign. See TITHES.

**Ten Articles.** In the year 1536 convocation under Henry VIII gave sanction to the "Ten Articles," entitled "Articles devised by the king's highness majesty to stablish Christian quietness and unity among us." These were probably compiled by Cramer, though ostensibly emanating from the crown. Five of the articles related to doctrines and five to ceremonies. The former were: 1. That Holy Scriptures and the three Creeds are the basis and summary of a true Christian faith. 2. That baptism conveys remission of sins and the regenerating grace of the Holy Spirit, and is absolutely necessary as well for children as adults. 3. That penance consists of contrition, confession, and reformation, and is necessary to salvation. 4. That the body and blood of Christ are really present in the elements of the eucharist. 5. That justification is remission of sin and reconciliation to God by the merits of Christ; but good works are necessary. The latter were: 1. That images are useful as remembrancers, but are not objects of worship. 2. That saints are to be honored as examples of life, and as furthering our prayers. 3. That saints may be invoked as intercessors, and their holidays observed. 4. That ceremonies are

to be observed for the sake of their mystical significance, and as conducive to devotion. 5. That prayers for the dead are good and useful, but the efficacy of papal pardon, and of soul-masses offered at certain localities, is negated. Upon these articles was founded the work entitled *Institution of a Christian Man* (q. v.), commonly known as "The Bishop's Book" (q. v.). See ARTICLES.

**Ten Commandments.** THE, the common designation of the *Decalogue*, or that portion of the law of Moses which contains the moral law. See LAW OF MOSES.

I. *Title*.—The popular name in this, as in so many instances, is not that of Scripture. There we have the "ten words" (עֲשֵׂרֵת הַדְּבָרִים, *asêreth haddebarim*, the decade of the words; Sept. τὰ δέκα ῥήματα; Vulg. *verba decem*), not the ten commandments (Exod. xxxiv, 28; Deut. iv, 13; x, 4, Heb.). The difference is not altogether an unmeaning one. The word of God, the "word of the Lord," the constantly recurring term for the fullest revelation, was higher than any phrase expressing merely a command, and carried with it more the idea of a self-fulfilling power. If, on the one side, there was the special contrast to which our Lord refers between the commandments of God and the traditions of men (Matt. xv, 3), the arrogance of the rabbins showed itself, on the other, in placing the words of the scribes on the same level as the words of God. See SCRIBE. Nowhere in the later books of the Old Test. is any direct reference made to their number. The treatise of Philo, however, *περὶ τῶν δέκα λόγιων*, shows that it had fixed itself on the Jewish mind, and, later still, it gave occasion to the formation of a new word (the "Decalogue," ἡ δέκαλογος, first in Clem. Al. *Pæd.* iii, 12), which has perpetuated itself in modern languages. Other names are even more significant. These, and these alone, are "the words of the covenant," the unchanging ground of the union between Jehovah and his people, all else being as a superstructure, accessory and subordinate (Exod. xxxiv, 28). They are also the tables of testimony, sometimes simply "the testimony," the witness to men of the divine will, righteous itself, demanding righteousness in man (xxv, 16; xxxi, 18, etc.). It is by virtue of their presence in it that the ark becomes, in its turn, the ark of the covenant (Numb. x, 33, etc.), that the sacred tent became the tabernacle of witness, of testimony (Exod. xxxviii, 21, etc.). See TABERNACLE. They remain there, throughout the glory of the kingdom, the primeval relics of a hoar antiquity (1 Kings viii, 9), their material, the writing on them, the sharp incisive character of the laws themselves, presenting a striking contrast to the more expanded teaching of a later time. Not less did the commandments themselves speak of the earlier age when not the silver and the gold, but the ox and the ass, were the great representatives of wealth (comp. 1 Sam. xii, 3).

Ewald is disposed to think that even in the form in which we have the commandments there are some additions made at a later period, and that the second and the fourth commandment were originally as briefly imperative as the sixth or seventh (*Gesch. Isr.* ii, 206). The difference between the reason given in Exod. xx, 11 for the fourth commandment and that stated to have been given in Deut. v, 15 makes, perhaps, such a conjecture possible. *Scholía*, which modern annotators put into the margin, are, in the existing state of the Old Test., incorporated into the text. Obviously both forms could not have appeared written on the two tables of stone, yet Deut. v, 15, 22 not only states a different reason, but affirms that "all these words" were thus written. Keil (*Comment. on Exod.* xx) seems on this point disposed to agree with Ewald.

II. *Double Record*.—The Decalogue is found in two passages, first in Exod. xx, 2-17, again in Deut. v, 6-21; and there are certain differences between the two forms, which have been taken advantage of by rationalistic interpreters, sometimes for the purpose of dis-

paraging the historical correctness of either form, and sometimes as a conclusive argument against the doctrine of inspiration. The differences are of three kinds: (1.) Simply verbal, consisting in the insertion or omission of the Hebrew letter ך, which signifies *and*; in Exod. it is only omitted once where it is found in Deut., namely, between *graven image* and *any likeness*, in the second commandment; but in Deut. it occurs altogether six times where it is wanting in Exod.; and of these, four are at the commencement of the last four commandments, which are severally introduced with an *and*, joining them to what precedes. (2.) Differences in form, where still the sense remains essentially the same: under the fourth commandment, it is in Exod. "nor thy cattle," while in Deut. it is "nor thine ox, nor thine ass, nor any of thy cattle"—a mere amplification of the former by one or two leading particulars; and in the tenth commandment, as given in Exod., "thy neighbor's house" comes first, while in Deut. it is "thy neighbor's wife," and here also after "thy neighbor's house," is added "his field"—another slight amplification. (3.) Differences in respect to matter: these are altogether four. The fourth commandment is introduced in Exod. with *remember*, in Deut. with *keep*; the reason also assigned for its observance in Exod. is derived from God's original act and procedure at creation, while in Deut. this is omitted, and the deliverance of Israel from the land of Egypt is put in its stead; in Deut. the fifth commandment runs, "Honor thy father and thy mother, as the Lord thy God commanded thee," the latter words having no place in Exod.; and in the tenth commandment, instead of "Thou shalt not covet thy neighbor's wife," it stands in Deut. "Thou shalt not desire thy neighbor's wife"—differing only, however, in this, that the one (covet) fixes attention more upon the improper desire to possess, and the other upon the improper desire itself.

It is obvious that these differences leave the main body or substance of the Decalogue, as a revelation of law, entirely untouched; not one of them affects the import and bearing of a single precept; nor, if viewed in their historical relation, can they be regarded as involving in any doubt or uncertainty the verbal accuracy of the form presented in Exod. We have no reason to doubt that the words there recorded are precisely those which were uttered from Sinai, and written upon the tables of stone. In Deut. Moses gives a revised account of the transactions, using throughout certain freedoms, as speaking in a hortative manner, and from a more distant point of view; and, while he repeats the commandments as those which the Lord had spoken from the midst of the fire and written on tables of stone (Deut. v, 22), he yet shows in his very mode of doing it that he did not aim at an exact reproduction of the past, but wished to preserve to some extent the form of a free rehearsal. This especially appears in the addition to the fifth commandment, "as the Lord thy God commanded thee," which distinctly pointed back to a prior original, and even recognised that as the permanently existing form. The introducing also of so many of the later commands with the copulative *and* tends to the same result; as it is precisely what would be natural in a rehearsal, though not in the original announcements, and came from combining with the legislative something of the narrative style. Such being plainly the character of this later edition, its other and more noticeable deviations—the occasional amplifications admitted into it, the substitution of *desire* for *covet*, with respect to a neighbor's wife, in the tenth command; and of the deliverance of Israel from Egypt, for the divine order of procedure at the creation, in the fourth—must be regarded as slightly varied and explanatory statements, which it was perfectly competent for the authorized mediator of the covenant to introduce, and which, in nature and design, do not materially differ from the alterations sometimes made by inspired

writers of the New Test. on the passages they quote from the Old (see Fairbairn, *Hermen. Manual*, p. 354 sq.). They are not without use in an exegetical respect; and in the present case have also a distinct historical value, from the important evidence they yield in favor of the Mosaic authorship of Deut.; since it is inconceivable that any later author, fictitiously personating Moses, would have ventured on making such alterations on what had been so expressly ascribed by Moses to God himself, and which seemed to bear on it such peculiar marks of sacredness and inviolability (Hävernick, *Introduction to the Pentateuch*, § 25).

III. *Source.*—The circumstances in which the ten great words were first given to the people surrounded them with an awe which attached to no other precept. In the midst of the cloud, and the darkness, and the flashing lightning, and the fiery smoke, and the thunder, like the voice of a trumpet, Moses was called to receive the law without which the people would cease to be a holy nation. Here, as elsewhere, Scripture unites two facts which men separate. God, and not man, was speaking to the Israelites in those terrors, and yet in the language of later inspired teachers, other instrumentality was not excluded. Buxtorf, it is true, asserts that Jewish interpreters, with hardly an exception, maintain that "Deus verba Decalogi per se immediate locutus est" (*Diss. de Decal.*). The language of Josephus, however (*Ant.* xv, 5, 3), not less than that of the New Test., shows that at one time the traditions of the Jewish schools pointed to the opposite conclusion. The law was "ordained by angels" (Gal. iii, 9), "spoken by angels" (Heb. ii, 2), received as the ordinance of angels (Acts vii, 53). The agency of those whom the thoughts of the Psalmist connected with the winds and the flaming fire (Psa. civ, 4; Heb. i, 7) was present also on Sinai. The part of Moses himself was, as the language of Paul (Gal. iii, 19) affirms, that of "a mediator." He stood "between" the people and the Lord "to show them the word of the Lord" (Deut. v, 5), while they stood afar off to give form and distinctness to what would else have been terrible and overwhelming. The "voice of the Lord" which they heard in the thunderings and the sound of the trumpet, "full of majesty," "dividing the flames of fire" (Psa. xxix, 3-9), was for him a divine word, the testimony of an eternal will, just as in the parallel instance of John xii, 29, a like testimony led some to say "it thundered," while others received the witness. No other words were proclaimed in like manner. The people shrank even from this nearness to the awful presence, even from the very echoes of the divine voice. The record was as exceptional as the original revelation. Of no other words could it be said that they were written as these were written, engraved on the tables of stone, not as originating in man's contrivance or sagacity, but by the power of the Eternal Spirit, by the "finger of God" (Exod. xxxi, 18; xxxii, 16). See BATH-KOL.

IV. *The number ten* was, we can hardly doubt, itself significant to Moses and the Israelites. The received symbol, then and at all times, of completeness (Bähr, *Symbolik*, i, 175-183), it taught the people that the law of Jehovah was perfect (Psa. xix, 7). The fact that they were written not on one, but on two tables, probably in two groups of five each (*infra*), taught men (though with some variations from the classification of later ethics) the great division of duties towards God and duties towards our neighbor, which we recognise as the groundwork of every true moral system. It taught them also, five being the symbol of imperfection (Bähr, i, 183-187), how incomplete each set of duties would be when divorced from its companion. The recurrence of these numbers in the Pentateuch is at once frequent and striking. Ewald (*Gesch. Isr.* ii, 212-217) has shown by a large induction how continually laws and precepts meet us in groups of five or ten. The numbers, it will be remembered, meet us again as the basis of all the pro-

portions of the tabernacle (q. v.) and temple. It would show an ignorance of all modes of Hebrew thought to exclude this symbolic aspect. We need not, however, shut out altogether that which some writers (e. g. Grotius, *De Decal.* p. 36) have substituted for it, the connection of the ten words with a decimal system of numeration through the ten fingers on which a man counts. Words which were to be the rule of life for the poor as well as the learned, the groundwork of education for all children, might well be connected with the simplest facts and processes in man's mental growth, and thus stamped more indelibly on the memory. Bähr, absorbed in symbolism, has nothing for this natural suggestion but two notes of admiration (!). The analogy of ten great commandments in the moral law of Buddhism might have shown him how naturally men crave a number that thus helps them. A true system was as little likely to ignore the natural craving as a false (see note in Ewald, *Gesch. Isr.* ii, 207). See TEN.

V. *Tables.*—In what way the ten commandments were to be divided has, however, been a matter of much controversy. At least four distinct arrangements present themselves.

1. In the received teaching of the Latin Church resting on that of Augustine (*Qu. in Ex.* 71; *Ep. ad Januar.* c. 11; *De Decal.* etc.), the first table contained three commandments, the second the other seven. Partly on mystical grounds, because the tables thus symbolized the trinity of divine persons and the eternal Sabbath, partly as seeing in it a true ethical division, he adopted this classification. It involved, however, and in part proceeded from, an alteration in the received arrangement. What we know as the first and second were united, and consequently the Sabbath law appeared at the close of the first table as the third, not as the fourth, commandment. The completeness of the number was restored in the second table by making a separate (the ninth) command of the precept, "Thou shalt not covet thy neighbor's wife," which with us forms part of the tenth. It is an almost fatal objection to this order that in the first table it confounds, where it ought to distinguish, the two sins of polytheism and idolatry; and that in the second it introduces an arbitrary and meaningless distinction. The later theology of the Church of Rome apparently adopted it as seeming to prohibit image-worship only so far as it accompanied the acknowledgment of another God (*Catech. Trident.* iii, 2, 20).

2. The familiar division—referring the first four to our duty towards God, and the six remaining to our duty towards man—is, on ethical grounds, simple and natural enough. If it is not altogether satisfying, it is because it fails to recognise the symmetry which gives to the number five so great a prominence; and perhaps, also, because it looks on the duty of the fifth commandment from the point of view of modern ethics rather than from that of the ancient Israelites and the first disciples of Christ (*infra*).

3. A modification of 1 has been adopted by later Jewish writers (Jonathan ben-Uzziel, Aben-Ezra, Moses ben-Nachman, in Suicer, *Thesaur.* s. v. Δεκάλογος). Retaining the combination of the first and second commandments of the common order, they have made a new "word" of the opening declaration, "I am the Lord thy God which brought thee out of the land of Egypt, out of the house of bondage," and so have avoided the necessity of the subdivision of the tenth. The objection to this division is (1), that it rests on no adequate authority, and (2) that it turns into a single precept what is evidently given as the groundwork of the whole body of laws.

4. Rejecting these three, there remains that recognised by the older Jewish writers—Josephus (*Ant.* iii, 6, 6) and Philo (*De Decal.* i), and supported ably and thoughtfully by Ewald (*Gesch. Isr.* ii, 208), which places five commandments in each table, and thus preserves the *pentad* and *decad* grouping which pervades the whole code. A modern jurist would perhaps object that

this places the fifth commandment in a wrong position; that a duty to parents is a duty towards our neighbor. From the Jewish point of view, it is believed, the place thus given to that commandment was essentially the right one. Instead of duties towards God, and duties towards our neighbors, we must think of the first table as containing all that belonged to the *Εὐδοκία* of the Greeks, to the *Pietas* of the Romans—duties, i. e., with no corresponding rights; while the second deals with duties which involve rights, and come, therefore, under the head of *Justitia*. The duty of honoring, i. e. supporting, parents came under the former head. As soon as the son was capable of it, and the parents required it, it was an absolute, unconditional duty. His right to any maintenance from them had ceased. He owed them reverence as he owed it to his Father in heaven (Heb. xii, 9). He was to show piety (*εὐσεβεῖν*) to them (1 Tim. v, 4). What made the "Corban" casuistry of the Scribes so specially evil was that it was, in this way, a sin against the piety of the first table, not merely against the lower obligations of the second (Mark vii, 11). It at least harmonizes with this division that the second, third, fourth, and fifth commandments all stand on the same footing as having special sanctions attaching to them, while the others that follow are left in their simplicity by themselves, as if the parity of rights were in itself a sufficient ground for obedience. A further confirmation of the truth of this division is found in Rom. xiii, 9, Paul, summing up the duties "briefly comprehended" in the one great law, "Thou shalt love thy neighbor as thyself," enumerates the last five commandments, but makes no mention of the fifth.

VI. *Addition*.—To these ten commandments we find in the Samaritan Pentateuch an eleventh added:

"But when the Lord thy God shall have brought thee into the land of Canaan, whither thou goest to possess it, thou shalt set thee up two great stones, and shalt plaster them with plaster, and shalt write upon these stones all the words of this law. Moreover, after thou shalt have passed over Jordan, thou shalt set up those stones, which I command thee this day, on Mount Gerizim, and thou shalt build there an altar to the Lord thy God, an altar of stones: thou shalt not lift up any iron thereon. Of unheavenly stones shalt thou build that altar to the Lord thy God, and thou shalt offer on it burnt-offerings to the Lord thy God, and thou shalt sacrifice peace-offerings, and shalt eat them there; and thou shalt rejoice before the Lord thy God in that mountain beyond Jordan, by the way where the sun goeth down, in the land of the Canaanite that dwelleth in the plain country over against Gilgal, by the oak of Moreh, towards Sichem" (Walton, *Bibl. Polyglott.*).

In the absence of any direct evidence, we can only guess as to the history of this remarkable addition. (1.) It will be seen that the whole passage is made up of two which are found in the Hebrew text of Deut. xxvii, 2-7 and xi, 30, with the substitution, in the former, of Gerizim for Ebal. (2.) In the absence of confirmation from any other version, Ebal must, so far as textual criticism is concerned, be looked upon as the true reading; Gerizim as a falsification, casual or deliberate, of the text. (3.) Probably the choice of Gerizim as the site of the Samaritan temple was determined by the fact that it had been the Mount of Blessings, Ebal that of Curses. Possibly, as Walton suggests (*Proleg.* c. xi), the difficulty of understanding how the latter should have been chosen instead of the former as a place for sacrifice and offering may have led them to look on the reading Ebal as erroneous. They were unwilling to expose themselves to the taunts of their Judaean enemies by building a temple on the Hill of Curses. They would claim the inheritance of the blessings; they would set the authority of their text against that of the scribes of the Great Synagogue. One was as likely to be accepted as the other. The "Hebrew verity" was not then acknowledged as it has been since. (4.) In other repetitions or transfers in the Samaritan Pentateuch we may

perhaps admit the plea which Walton makes in its behalf (*loc. cit.*) that, in the first formation of the Pentateuch as a Codex, the transcribers had a large number of separate documents to copy, and that consequently much was left to the discretion of the individual scribe. Here, however, that excuse is hardly admissible. The interpolation has every mark of being a bold attempt to claim for the schismatic worship on Gerizim the solemn sanction of the voice on Sinai, to place it on the same footing as the ten great words of God. The guilt of the interpolation belonged, of course, only to the first contrivers of it. The later Samaritans might easily come to look on their text as the true one; on that of the Jews as corrupted by a fraudulent omission. It is to the credit of the Jewish scribes that they were not tempted to retaliate, and that their reverence for the sacred records prevented them from suppressing the history which connected the rival sanctuary with the blessings of Gerizim. See SAMARITAN PENTATEUCH.

VII. *Targum*.—The treatment of the ten commandments in the Targum of Jonathan ben-Uzziel is not without interest. There, as noticed above, the first and second commandments are united to make up the second, and the words "I am the Lord thy God," etc., are given as the first. More remarkable is the addition of a distinct reason for the last five commandments no less than for the first five. "Thou shalt commit no murder, for because of the sins of murderers the sword goeth forth upon the world." So, in like manner and with the same formula, "death goeth forth upon the world" as the punishment of adultery; famine as that of theft; drought as that of false witness; invasion, plunder, captivity, as those of covetousness (Walton, *Bibl. Polyglott.*). See TARGUM.

VIII. *Talmud*.—The absence of any distinct reference to the ten commandments as such in the *Pirke Aboth* (=Maxims of the Fathers) is both strange and significant. One chapter (ch. v) is expressly given to an enumeration of all the scriptural facts which may be grouped in decades—the ten words of Creation, the ten generations from Adam to Noah and from Noah to Abraham, the ten trials of Abraham, the ten plagues of Egypt, and the like; but the ten divine words find no place in the list. With all their ostentation of profound reverence for the law, the teaching of the rabbins turned on other points than the great laws of duty. In this way, as in others, they made void the commandments of God that they might keep their own traditions. Comp. Stanley, *Jewish Church*, lect. vii, in illustration of many of the points here noticed. See TALMUD.

commandments marks an æra in the history of God's dispensations. Of the whole law this was both the first portion to be communicated, and the basis of all that followed. Various things attested this superiority. It was spoken directly by the Lord himself—not communicated, like other parts of the old economy, through the ministration of Moses—and spoken amid the most impressive signs of his glorious presence and majesty. Not only were the ten commandments thus spoken by God, but the further mark of relative importance was put upon them of being written on tables of stone—written by the very finger of God. They were thus elevated to a place above all the statutes and ordinances that were made known through the mediator of the old covenant; and the place then given them they were also destined to hold in the future; for the rocky tablets on which

they were engraved undoubtedly imaged an abiding validity and importance. It was an emblem of relative perpetuity. The very number of words, or utterances, in which they were comprised, *ten*, bespoke the same thing; for in the significancy that in ancient times was ascribed to certain numbers, ten was universally regarded as the symbol of completeness (Spencer, *De Leg. Heb.* l, iii; Bähr, *Symbolik*, i, 175). See DECALOGUE.

**Tenēbræ** (*darkness*), an office for the Wednesday, Thursday, and Friday of Holy Week, commemorating the sufferings and death of our Blessed Saviour. The name of the office has been traced to the fact that it was formerly celebrated at midnight, as an allusion to Christ walking no more openly with the Jews, as Cranmer says. Others suggest that it is derived from the gradual extinction of lights, which originally were put out one by one as the morning began to grow clear; or in symbol of grief and mourning; or, as Beleth suggests, of the eclipse of three hours at the Passion. The number of lights varied. In some churches there was a candle corresponding to each psalm and lesson of the office. Thus we find seven, nine, twelve, fifteen, twenty-four, twenty-five at York, thirty, seventy-two, or even as many as each person thought fit to bring. These were extinguished sometimes at once, or at two or three intervals. In some places they were quenched with a moist sponge, and in others with a hand of wax to represent Judas. St. Gregory of Tours says that on the night of Good-Friday the watchings were kept in darkness until the third hour, when a small light appeared above the altar. Cranmer explains that the Lamentations of Jeremiah were read in memory of the Jews seeking our Lord's life at this time. The Reproaches and Trisagion were not sung until the 14th century on Good-Friday.

**Tenison**, THOMAS, a learned English prelate, was born at Cottenham, Cambridgeshire, Sept. 29, 1636; and receiving his primary education at the free school at Norwich, entered Corpus Christi College, Cambridge, where he graduated in Lent term, 1656-7. He began to study medicine, but on the eve of the Restoration decided upon the theological profession, and was ordained privately at Richmond in Surrey by the bishop of Salisbury. Being admitted fellow of his college March 24, 1662, he became tutor, and in 1665 was chosen one of the university preachers, and about the same time was presented to the cure of St. Andrew the Great in Cambridge. In 1667 he received the rectory of Holywell and Nedingworth, Huntingdonshire, from the earl of Manchester, and in 1674 was chosen principal minister to the Church of St. Peter's Mancroft, Norwich. In 1680 he took the degree of D.D., and in October of the same year was presented by Charles II, being then a royal chaplain, to the vicarage of St. Martin's-in-the-Fields, London. Immediately after the Revolution he was promoted to be archdeacon of London; was consecrated bishop of Lincoln, Jan. 10, 1692; and was raised to the archbishopric of Canterbury in 1694. In 1700 he was appointed one of a committee to recommend to the king proper persons for all ecclesiastical preferments in his gift above the value of £20 per annum. He attended his majesty during his last illness, and crowned queen Anne. He was, in April, 1706, made first commissioner in the treaty of union between England and Scotland; and afterwards crowned George I. His death occurred at Lambeth Palace Dec. 14, 1715. By his will he bequeathed large sums to charitable purposes, and proved a liberal benefactor to Benedict College, Cambridge, the library of St. Paul's Cathedral, the Society for the Promotion of the Gospel, Bromley College, etc. He published, *The Creed of Mr. (Thomas) Hobbes Examined* (Lond. 1670, 18mo):—*Idolatry: a Discourse* (1678, 4to):—*Baconiana; or Certain Genuine Remains of Lord Bacon* (1679, 8vo; 1674, 4to). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Tennent, Gilbert**, an eloquent Presbyterian divine, and eldest son of the Rev. William Tennent, Sen., was born in the County of Armagh, Ireland, Feb. 5, 1703; emigrated with his father to America in 1718; received his education under the paternal roof; had the honorary degree of master of arts conferred upon him by Yale College in 1725; studied theology privately; was licensed to preach in May, 1725; and was ordained and installed minister of a Presbyterian congregation at New Brunswick, N. J., in 1726. In 1740 he was prevailed on by Whitefield to accompany him on a preaching tour to Boston; and this tour constituted one of the great events of his life. The effect of his preaching in Boston is thus described by the Rev. Mr. Prince, minister of the Old South Church: "It was both terrible and searching. . . . By his arousing and spiritual preaching, deep and pungent convictions were wrought in the minds of many hundreds of persons in that town; and the same effect was produced on several scores in the neighboring congregations. And now was such a time as we never knew. The Rev. Mr. Cooper was wont to say that more came to him in one week in deep concern than in the whole twenty-four years of his preceding ministry. I can say also the same as to the numbers who repaired to me." He had much to do in bringing about the division of the Presbyterian Church in 1741; indeed, it was owing, in a great measure, to one sermon called the "Nottingham Sermon," which Dr. Alexander declares to be "one of the most severely abusive sermons that were ever penned," that that schism occurred. It is to his honor, however, that, seventeen years after, he was a principal instrument in a reunion of the two parties. In 1743 he became pastor of a Presbyterian congregation (disciples of Whitefield) in Philadelphia, where he continued the residue of his ministry and life, which was about twenty years. He died July 23, 1764. Mr. Tennent, as a preacher, had few equals in his vigorous days. "His reasoning powers were strong; his thoughts nervous and often sublime; his style flowery and diffusive; his manner of address warm and pathetic—such as must convince his audience that he was in earnest." Henry B. Smith, D.D., says of him, "Gilbert Tennent, that soul of fire." He was of a truly public spirit, needing no other motive to exert himself than only to be persuaded that the matter in question was an important public good. He published *Sermons* (Phila. 1744, 8vo):—*Discourses* (1745, 12mo):—*Sermons* (1758, 12mo). He also published many occasional sermons, some pamphlets, etc. See Sprague, *Annals of the Amer. Pulpit*, iii, 35-41; *Serm. on his Death*, by S. Finley, D.D. (1764, 8vo); Alexander, *Hist. of the Log College*, p. 91-94; *Sermons and Essays by the Tenents and their Contemporaries* (1855, 12mo); Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Gillies, *Hist. Coll.* (J. L. S.)

**Tennent, John**, a Presbyterian minister, and third son of the Rev. William Tennent, Sen., was born in the County of Antrim, Ireland, Nov. 12, 1706. His parents emigrated to America when he was twelve years old. He was educated at the Log College, and licensed to preach Sept. 18, 1729. On Nov. 19, 1730, he was installed pastor of the Presbyterian Church of Freehold, Monmouth Co., N. J. He had but a brief ministry, his death occurring April 23, 1732. He was distinguished for a clear, discriminating mind and earnest manner. One of his sermons, on regeneration, was published, with a short memoir of his life, by his brother Gilbert Tennent. See Sprague, *Annals of the Amer. Pulpit*, iii, 41.

**Tennent, William** (1), a Presbyterian minister and educator, and the father of Gilbert, John, and William Tennent, was born in Ireland in 1673. He received a liberal education in his native country, and was probably a graduate of Trinity College, Dublin. He entered the ministry originally in the Episcopal Church, and was ordained deacon by the bishop of Down, July 1, 1704; and priest, Sept. 22, 1706. He emigrated to Amer-

ica in 1718, and immediately changed his ecclesiastical relations, being received into the Presbyterian Church September 17 of the same year. He supplied East Chester and Bedford, N. Y.; Bensalem and Smithfield, Bucks Co., Pa.; and in 1726 accepted a call from the Church at Neshaminy, in the same county, where he spent the remainder of his life. He was but fully settled when he was impressed with the conviction that there were other duties than those of a pastor demanding his attention. The country was in a forming state, and he felt that it was all-important that it should have a right direction. His four sons followed in the footsteps of their godly father, and were consistent Christians. His attention was early directed to the young men who were growing up around him, and who he saw must be educated to become useful members of society. As there were no schools or colleges in that region, he determined to erect a building for educational purposes. His means were limited, and consequently the building must correspond with them. In process of time a log house was erected of humble proportions about a mile from Neshaminy Creek, near to the church. This building was afterwards designated the "Log College," and was the first literary and theological institution of the Presbyterian Church in this country. It was the immediate parent of Princeton College and Theological Seminary, and of all other institutions of a similar character in the Church. The site of the Log College was in every way desirable, commanding as it did an extensive prospect of level, fertile country, bounded by distant hills. The distinguished Whitefield, who visited it in 1739, says of it:

"The place wherein the young men study is a log house about twenty feet long and nearly as many broad, and to me it seemed to resemble the school of the old prophets, for their habitations were mean; and that they sought not great things for themselves is plain from those passages of Scripture wherein we are told that 'each of them took a beam to build them a house;' and that at a feast of the sons of the prophets 'one of them put on the pot, while the others went to fetch some herbs out of the field.' All we can say of most of our universities is, that they are glorious without. From this despised place seven or eight worthy ministers of Jesus have lately been sent forth; more are almost ready to be sent, and the foundation is now laying for the instruction of many others."

Of Mr. Tennent, the founder of this college, but little is known outside of his connection with the institution. Whitefield's journal refers to him thus:

"At my return home was much comforted by the coming of one Mr. Tennent, an old gray-headed disciple and soldier of Jesus Christ. He keeps an academy about twenty miles from Philadelphia, and has been blessed with four gracious sons, three of which have been, and still continue to be, useful in the Church of Christ. He is a great friend of Mr. Erskine of Scotland, and he and his sons are secretly despised by the synod generally, as Mr. Erskine and his friends are hated by the judicatories of Scotland, and as the Methodist preachers are by the brethren in England."

Whitefield further says:

"Set out for Neshaminy, where old Mr. Tennent lives, and where I was to preach to-day according to appointment. About twelve o'clock we came together and found 8000 people assembled in the meeting-house yard. Mr. Wm. Tennent, Jr., as we stayed beyond the time, was preaching to them. When I came up he soon stopped, gave out a psalm, which was sung, and then I began to speak as the Lord gave me utterance. At first the people seemed unaffected, but in the midst of my discourse the power of the Lord Jesus came upon me, and I felt such a struggling within myself for the people as I scarce ever felt before; the hearers began to be melted down immediately and to cry much, and we had good reason to hope the Lord intended good for many. After I had finished, Mr. Gilbert Tennent gave a word of exhortation to confirm what had been delivered. After our exercises were over, we went to old Mr. Tennent's, who entertained us like one of the ancient patriarchs. His wife to me seemed like Elizabeth, and he like Zachary. Both, as far as I can learn, walk in the command of the Lord blameless. Though God was pleased to humble my soul so that I was obliged to retire for a while, yet we had sweet communion with each other, and spent the evening in concerting what measures had best be taken

for promoting our dear Lord's kingdom. It happened very providentially that Mr. Tennent and his brethren are appointed to be a presbytery by the synod, so that they intend bringing up gracious youths and sending them out from time to time into the Lord's vineyard."

Among the ministers sent out from Log College to preach the Gospel were his four sons, Gilbert, William, John, and Charles; Rev. Messrs. Samuel Blair, Samuel J. Finley (afterwards D.D. and president of Princeton College), W. Robinson, John Rowland, and Charles Beatty. In 1742 this venerable man became unable to perform his duties as pastor, and his pulpit was supplied by the presbytery. In 1743 Mr. Beatty was ordained as his successor. His work was nearly done, and of him it may be said, in the language of Dr. Alexander, "The Presbyterian Church is probably not more indebted for her prosperity, and for the evangelical spirit which has generally pervaded her body, to any individual than to the elder Tennent." He died at his loved home in Neshaminy, May 6, 1746. His published works consist mostly of sermons, twenty-three of which appear in one volume, 8vo. Two other discourses were also published. Many occasional sermons and pamphlets were published in Philadelphia in 1758. Rev. Samuel Finley, D.D., his former pupil, preached his funeral discourse, which was also published. See Sprague, *Annals of the Amer. Pulpit*, iii, 23; *Gen. Assemb. Miss. Mag. or Evangel. Intell.* ii; Alexander, *Hist. of Log College*; *Tennent's Family Record*. (W. P. S.)

**Tennent, William** (2), a Presbyterian minister, and brother of Gilbert Tennent, was born in the County of Antrim, Ireland, Jan. 3, 1705. He emigrated with his father, the Rev. William Tennent, Sen., to America in 1718, where he received his education under the instruction of his father, and studied theology by the aid of his brother. He was licensed by the Philadelphia Presbytery, and ordained pastor of the Presbyterian Church at Freehold, N. J., Oct. 25, 1733, where he remained until his death, March 8, 1777. About the time that Mr. Tennent completed his theological course, he was the subject of a remarkable trance, which has perhaps given him his greatest celebrity. A full account of this extraordinary incident was published by Elias Boudinot. Mr. Tennent contributed sermons to *Sermons on Sacramental Occasions* (1739), and a *Sermon upon Matt. v. 23-24* (1769). See Sprague, *Annals of the Amer. Pulpit*, iii, 52; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Steel, *Burning and Shining Lights* (1864); *Gen. Assemb. Miss. Mag.* vol. ii; Alexander, *Hist. Log College*; Prince, *Christ. Hist.*; *Life of William Tennent, with an Account of his being Three Days in a Trance* (N. Y. 1847, 18mo); *Sermons and Essays by the Tenents and their Contemporaries* (1855, 12mo); *Blackwood's Mag.* iv, 693; Storr, *Constitution of the Human Soul* (1857), p. 317. (J. L. S.)

**Tennent, William** (3), a Presbyterian minister, and son of the Rev. William Tennent (2), was born in Freehold, N. J., in 1740. He graduated at the College of New Jersey in 1758, was licensed to preach by the presbytery of New Brunswick in 1762, ordained by the same presbytery in 1763, and installed as junior pastor of the Church in Norwalk, Conn., in 1765. In 1772 he became pastor of an Independent Church in Charleston, S. C. He died Aug. 11, 1777. Mr. Tennent was an eloquent preacher. Elegance of style, majesty of thought, and clearness of judgment characterized all his discourses. See Sprague, *Annals of the Amer. Pulpit*, iii, 242; Hall, *Hist. of Norwalk*; Ramsey, *Hist. of South Carolina*, vol. ii; *Hist. of the Church of Charleston*; Alison, *Funeral Sermon*. (J. L. S.)

**Tenney, Asa Peaslee**, a Congregational minister, was born in Corinth, Vt., Feb. 14, 1801. He worked at an anvil in Haverhill, N. H.; studied theology with Rev. Grant Powers and President Tyler of Dartmouth College; preached his first sermon in father Goddard's meeting-house in Norwich, Vt.; and when twenty-seven years old took a five years' commission under the

New Hampshire Missionary Society, laboring in Hebron and Groton. In March, 1833, he became first pastor of the Congregational Church in Concord (West), N. H., where he died, March 1, 1867. Mr. Tenney was original, eloquent, and a mighty revivalist. He had wonderful knowledge of the Bible and human nature, and was a prodigious worker, his sermons for over thirty-four years averaging more than four a week. See *A Blacksmith in the Pulpit and in the Parish*, in the *Congregational Quarterly*, 1867, p. 359 sq., 380.

**Tenney, Caleb Jewett, D.D.**, a Congregational minister, was born at Hollis, N. H., May 3, 1780. He graduated at Dartmouth College in 1801, entered the ministry Aug. 20, 1802, and was ordained Sept. 12, 1804, pastor at Newport, R. I., where he remained until May, 1814, when he resigned and became co-pastor in Wethersfield, March 27, 1816, but, on account of his voice failing, was dismissed in 1840, and removed to Northampton, Mass., where he died, Sept. 28, 1847. He acted as agent for both the American and the Massachusetts Colonization Society. His publications were *Two Discourses on Baptism* (1816) and a few *Occasional Sermons*. See Sprague, *Annals of the Amer. Pulpit*, ii, 472.

**Tenney, Ephraim**, a Presbyterian minister, was born in Dummerston, Vt., Nov. 12, 1813. He graduated at Wheaton College, Ill., in 1841, and entered the Union Theological Seminary the same year, and in the year following he died in Brooklyn, N. Y., March 8. (W. P. S.)

**Tenney, Roswell**, a Presbyterian minister, was born in Hanover, N. H., in 1796. He was educated at Dartmouth College, studied theology in the Union Theological Seminary, Prince Edward Co., Va., was licensed by the Hanover Presbytery April 26, 1828, and ordained by the same Nov. 28, 1829. His first preaching was as a home missionary, after that he preached successively at Salem, Unity, Somerset, and New Lexington, Va.; three points in Perry County, O.—Logan, Belpre, and Warren; two points in Washington County, O.; Dover, Mass.; Hanover Centre, N. H.; again in Salem and Fearing, O.; and finally at Amesville, in Athens County. He died Aug. 6, 1866. See Wilson, *Presb. Hist. Almanac*, 1867, p. 321.

**Tenney, Samuel Gilman**, a Congregational minister, was born at Rowley, Mass., April 12, 1793. He sought an education with a view of entering the ministry, being impressed that it was his duty to preach. He was fitted for college at Meriden, N. H., after which he entered Dartmouth College, from which he graduated in 1823. He studied theology under the Rev. Dr. Chapin at Woodstock, Vt. He was ordained June 29, 1825, and installed pastor of the Lyndon Church, Vt. Here he labored for six years with success. He was subsequently pastor in the following places: Bakersville, Vt., four years; Waitsfield, Vt., two years; Hillsborough, N. H., five years; Wordsborough, Vt., seven years; and Alstead, N. H., seven years, when he retired, after an unbroken ministry of forty-nine years, in the sixty-fourth year of his age. His labors were blessed in many places by special and powerful revivals. He died in Springfield, Vt., Dec. 5, 1874. (W. P. S.)

**Tent** (usually and properly **טֶנֶת**, *ohel*, so called from *glittering* [Gesenius] or being *round* [Fürst], *σκηνή*; both occasionally "tabernacle;" elsewhere **מִשְׁכָּן**, *mish-kân*, a *dwelling* [Cant. i, 8], the regular term for "tabernacle;" **סֹכֶכֶת**, *sukkâh* [2 Sam. xi, 11], a "booth;" or **כִּנּוּבָה**, *knubbâh*, a dome-like pavilion, only in Numb. ii, 8), a movable habitation, made of curtains extended upon poles. See TABERNACLE.

Among the leading characteristics of the nomad races, those two have always been numbered whose origin has been ascribed to Jabel the son of Lamech

(Gen. iv, 20), viz. to be tent-dwellers (**יֹשְׁבֵי אֹהֶל**, comp. xxv, 27; *σκηνοῦντες*, Pliny, vi, 32, 35) and keepers of cattle. Accordingly the patriarchal fathers of the Israelites were dwellers in tents, and their descendants proceeded at once from tents to houses. We therefore read but little of *huts* among them, and never as the fixed habitations of any people with whom they were conversant. By huts we understand small dwellings, made of the green or dry branches of trees intertwined, and sometimes plastered with mud. In Scripture they are called *booths*. Such were made by Jacob to shelter his cattle during the first winter of his return from Mesopotamia (Gen. xxxiii, 17). In after-times we more frequently read of them as being erected in vineyards and orchards to shelter the man who guarded the ripened produce (Job xxvii, 18; Isa. i, 8; xxiv, 20). It was one of the Mosaic institutions that during the Feast of Tabernacles the people should live for a week in huts made of green boughs (Lev. xxiii, 42). In observing the directions of the law respecting the Feast of Tabernacles, the Rabbinical writers laid down as a distinction between the ordinary tent and the booth, *sukkâh*, that the latter must in no case be covered by a cloth, but be restricted to boughs of trees as its shelter (*Sukkâh*, i, 3). In hot weather the Arabs of Mesopotamia often strike their tents and betake themselves to sheds of reeds and grass on the bank of the river (Layard, *Nineveh*, ii, 215; Burckhardt, *Notes on Bed.* i, 37, 46; Volney, *Travels*, i, 398).

In Egypt the Hebrews, for the most part, left off tent life, and lived in houses during their bondage; but on their deliverance, and during their protracted sojourn in the wilderness, tent life was again resumed by the nation (Exod. xvi, 16; Josh. vii, 24), and continued for some time even after their settlement in the Holy Land (xxii, 8). Hence the phraseology of tent life remained among the people long after it had ceased to be their normal condition (1 Kings xii, 16). Here we may observe that tent life is not peculiar to nomads only, for we find settled clans, occupied in agricultural pursuits, still dwell in tents, and such, probably, was the case in Palestine in all ages. The family of Heber the Kenite was apparently of this class (Judg. iv, 11-22), and even the patriarchs seem partly to have adopted that mode of life. Isaac not only "had possession of flocks and possession of herds," but also he "sowed in the land, and received in the same year a hundredfold" (Gen. xxvi, 12). It was not until the return into Canaan from Egypt that the Hebrews became inhabitants of cities, and it may be remarked that the tradition of tent-usage survived for many years later in the tabernacle of Shiloh, which consisted, as many Arab tents still consist, of a walled enclosure covered with curtains (Mishna, *Zebachim*, xiv, 6; Stanley, *Sinai and Palest.* p. 233).

The Midianites, the Philistines, the Syrians, the descendants of Ham, the Hagarites, and Cushanites are mentioned in Scripture as living in tents. But the people most remarkable for this unsettled and wandering mode of life are the Arabs, who, from the time of Ishmael to the present day, have continued the custom of dwelling in tents. Amid the revolutions which have transferred kingdoms from one possessor to another, these wandering tribes still dwell, unsubdued and wild as was their progenitor. This kind of dwelling is not, however, confined to the Arabs, but is used throughout the continent of Asia. In one of the tents shown in Assyrian sculptures a man is represented arranging a couch for sleeping on, in another persons are sitting conversing, and in others cooking utensils and the process of cooking are shown. In the smaller one (on next page), a man is watching a caldron on what appears to be a fire between some stones. Among tent-dwellers of the present day must be reckoned (1) the great Mongol and Tartar hordes of Central Asia, whose tent-dwellings are sometimes of gigantic dimensions, and who exhibit more contrivance both in the dwellings themselves and in

Assyrian Tents (Koyunjik sculptures). 1. Tent of Sennacherib before Lachish; 2. Ordinary Tent.

their method of transporting them from place to place than is the case with the Arab races (Horace, *Carm.* iii, 24, 10; Marco Polo, *Trav.* [ed. Bohn], p. 128, 135, 211; Gibbon, ch. xxvi [vol. iii, p. 298, ed. Smith]); (2) as above observed, the Bedawin Arab tribes, who inhabit tents which are probably constructed on the same plan as those which were the dwelling-places of Abraham and of Jacob (Heb. xi, 9).

The first tents were undoubtedly covered with skins, of which there are traces in the Pentateuch (Exod. xxvi, 14); but nearly all the tents mentioned in Scripture were doubtless of goats'-hair, spun and woven by the women (xxxv, 26; xxxvi, 14), such as are now, in Western Asia, used by all who dwell in tents. Tents of linen were, and still are, only used occasionally for holiday or travelling purposes by those who do not habitually live in them. Some modern tents are constructed of most costly materials, and are very beautiful. Chardin mentions that a late king of Persia had one made which cost upwards of two millions sterling. It was called the "golden house," because gold glittered everywhere about it (see *Pict. Bible*, note on Cant. v, 1). A tent or pavilion on a magnificent scale, constructed for Ptolemy Philadelphus at Alexandria, is described by Athenæus (Exod. v, 196 sq.). This class of tents is furnished with Turkey carpets for the floor and cushions to recline upon, according to the wealth of the owner, though the inside arrangements vary among different clans and tribes. Those who are too poor to afford themselves a proper tent merely hang a piece of cloth from a tree to give them shelter.

An Arab tent is called *beit*, "house;" its covering consists of stuff, about three quarters of a yard broad, made of black goats'-hair (Cant. i, 5; Shaw, *Travels*, p. 220), laid parallel with the tent's length. This is sufficient to resist the heaviest rain. The tent-poles, called *amûd*, or columns, are usually nine in number, placed in three groups, but many tents have only one pole, others two or three. The ropes which hold the tent in its place are fastened, not to the tent-cover itself, but to loops consisting of a leathern thong tied to the ends of a stick, round which is twisted a piece of old cloth, which is itself sewed to the tent-cover. The ends of the tent-ropes are

fastened to short sticks or pins, called *wed* or *wated*, which are driven into the ground with a *chakuj*, or mallet. Of the same kind was the *נִיב*, *naïl* (q. v.), and the *מַכֵּה*, *hammer* (q. v.), which Jael used (Judg. iv, 21). Round the back and sides of the tents runs a piece of stuff removable at pleasure to admit air. The tent is divided into two apartments, separated by a carpet partition drawn across the middle of the tent and fastened to the three middle posts. The men's apartment is usually on the right side on entering, and the women's on the left; but this usage varies in different tribes, and in the Mesopotamian tribes the contrary is the rule. Of the three side posts on the men's side, the first and third are called *yed* (hand), and the one in the middle is rather higher than the other two. Hooks are attached to these posts for hanging various articles (Gen. xviii, 10; Judg. xiii, 6; Niebuhr, *Voyage*, i, 187; Layard, *Nin. and Bab.* p. 261). See **PILLAR**. In the men's apartment the ground is usually covered with carpets or mats, and the wheat sacks and camel bags are heaped up in it around the middle post like a pyramid, at the base of which, or towards the back of the tent, are arranged the camel pack-saddles, against which the men recline as they sit on the ground. The women's apartment is less neat, being encumbered with all the lumber of the tent, the water and butter skins, and the culinary utensils. The part of the tent appropriated to the women is called *harem*; and no stranger is permitted to enter it, unless introduced. Hence, perhaps, Sisera's hope of greater security in the *harem* of Jael. See **HOSPITALITY**. "The tents are arranged in a sort of square; they are made of black hair-cloth, not large; and are mostly open at one end and on the sides, the latter being turned up. The tents form the common rendezvous of men, women, children, calves, lambs, and kids" (Robinson, *Researches*, i, 485). Few Arabs have more than one tent, unless the family be augmented by the families of a son or a deceased brother, or in case the wives disagree, when the master pitches a tent for one of them adjoining his own. An encampment is generally arranged in the form of an enclosure, within which the cattle are driven at night, and the centre of which is occupied by the tent or tents of the emir or sheik. If he is a person of much consequence, he may have three or four tents, for himself, his wives, his servants, and strangers, respectively. The first two are of the most importance, and we know that Abraham's wife had a separate tent (Gen. xxiv, 67). It is more usual, however, for one very large tent to be divided into two or more apartments by curtains. The

Tent-pin (or Hook) and Mallet.

Arab Tents.

holy tabernacle was on this model (Exod. xxvi, 31-37). The individual tents of Leah, Rachel, Zilpah, and Bilhah may thus have been either separate tents or apartments in the principal tent in each case (Gen. xxxi, 33). When the pasture near an encampment is exhausted, the tents are taken down, packed on camels, and removed (Isa. xxxviii, 12; Gen. xxvi, 17, 22, 25). The beauty of an Arab encampment is noticed by Shaw (*Travels*, p. 221; see Numb. xxiv, 5). In choosing places for encampment, Arabs prefer the neighborhood of trees, for the sake of the shade and coolness which they afford (Gen. xviii, 4, 8; Niebuhr, *loc. cit.*). Some tribes have their tents constructed so as to house their flocks at night. Grant describes such a one among the Hertush Kurds: "Our tent was about forty feet long and eighteen or twenty wide, one side left quite open, while a wall of reeds formed the other sides. The ample roof of black hair-cloth was supported by a number of small poles, and secured with cords and wooden pins driven into the earth. About one fourth of the tent was fenced off with a wicker trellis for the lambs of the flock, which are kept there during the night" (*Nestorians*, p. 93).

The manufacture of tents formed a regular and lucrative trade (*σεντοροίς*), at which Paul occasionally labored, especially in connection with Aquila, at Corinth (Acts xviii, 3). See PAUL.

A feature of Oriental life so characteristic as the tent could not fail to suggest many striking metaphors to the Biblical writers, and accordingly the Hebrew has special terms for pitching (*וָסַד* or *וָסַח*) and striking (*וָסַח*) a tent. The tent erected and its cords stretched out are often figuratively alluded to in the Scriptures. Thus Isaiah represents God as the one "that stretcheth out the heavens as a curtain, and spreadeth them out as a tent to dwell in" (xl, 22). He also says, in speaking of the glorious prosperity of the Church and the need of enlargement, "Enlarge the place of thy tent, and let them stretch forth the curtains of thine habitations; spare not, lengthen thy cords, and strengthen thy stakes" (liv, 2; see also xxxiii, 20). It is a work of some effort to pitch a tent properly, especially a large one, requiring the united efforts of willing hands. Hence the pathetic language of Jeremiah in mourning over the desolations of God's people: "My tabernacle is spoiled, and all my cords are broken; my children are gone forth of me, and they are not; there is none to stretch forth my tent any more and to set up my curtains" (x, 20). These tents are rapidly struck and removed from place to place, so that the eye which to-day rests on a large encampment active with life may to-morrow behold nothing but a wilderness. Thus Isaiah says, "Mine age is departed, and is removed from me as a shepherd's tent" (xxxviii, 12). The facility with which tents are taken down and the frailty of their material are beautifully alluded to by Paul in 2 Cor. v, 1 (see also 2 Pet. i, 13, 14). See Hackett, *Illustr. of Script.* p. 33-40; Van Lennep, *Bible Lands*, ch. iii; Rhodes, *Tent-life from the Earliest Times* (Lond. 1858); Conder, *Tent-work in Palest.* ii, 275 sq.

**Tenth Deal** (*עֲשָׂרִית*, *issaron*, a tenth; Sept. *δεκαρόν*), the tenth part, a measure of things dry, specially for grain and meal (Exod. xxix, 40; Lev. xiv; Numb. xv, xxviii, xxix); more fully the tenth of an ephah (as the Sept. and Vulg. explain at xv, 4), i. e. an *omer*, or about three and a half quarts (comp. Lev. v, 15; vi, 13; Numb. v, 15). See METROLOGY.

**Tenths**, in English law, are the tenth part of the yearly value of every spiritual benefice as it is valued in the *Liber Regis*. This was an impost formerly paid to the pope, and was annexed to the crown by the 26 Henry VIII, c. 3, and the 1 Elizabeth, c. 4; but by the 2 Anne, c. 11, was granted, together with the first-fruits, towards the augmentation of poor clergymen. A tax

on the temporality, and also certain rents reserved by the king out of the monastic possessions he granted to his subjects, were also called tenths. Tenths of ecclesiastical benefices and lands were first paid in 1188 towards Henry II's crusade. See TAXATIO ECCLESIASTICA; TEMPORALITIES OF BISHOPS; TITHES.

**Tentzel**, WILHELM ERNST, a German theologian, was born July 11, 1659, at Greussen, in Thuringia. He became lecturer at the gymnasium at Gotha in 1685, and was appointed in 1696 historiographer there, and died at Dresden, Nov. 24, 1707. In the theological department he is especially known by his controversy with the Jesuit Schelstrate on the *arcani disciplina* (q. v.): *Dissertatio de Disciplina Arcani* (Wittenb. 1683; also in his *Exercitationes Selectæ* (Leips. and Frankf. 1692), written against the *Antiquitas Illustrata*. Tentzel also published *Exercitationes X de Hymno Te Deum Laudamus* (ibid. 1692). Of great interest is also his historical narrative of the beginning and first progress of Luther's Reformation, thus explaining Seckendorf's history of Lutheranism, edited by Cyprian (ibid. 1718, 3 vols.): — *De Proseuchis Samaritarum* (Wittenb. 1682): — *Dissertatio de Ritu Lectionum Sacrarum* (ibid. 1685). See *Theol. Universal-Lexikon*, s. v.; Winer, *Handbuch der theol. Literatur*, i, 609, 628, 738, 849, 854; ii, 799; Fabricius, *Biblioth. Ecclesiast.* (Hamburg, 1718), vol. i; *Regensburger Real-Encyclop.* s. v. (B. P.)

**Teo.** See ANTELOPE.

**Teocalli** (Aztec, *teotl*, "god," and *calli*, "house"), a name given to the aboriginal temples, many remains of which are still in existence. Recent investigations have rendered it probable that many structures which, on Spanish authority, have been received as temples and palaces were in reality multiple houses.

**Teotl**, the name for God among the ancient Mexicans. He is called "the Cause of causes" and "the Father of all things." He was identified with the sun-god, which, on this account, was designated the *Teotl*.

**Tephillin.** See PHYLACTERY.

**Te'rah** (Heb. *Te'rach*, *תֵּרַח*, *stition* [see also TARA]; Sept. *Θάρρα*, *Θάρρα*; Josephus, *Θάρρα*, *Ant. i*, 6, 5; Vulg. *Thare*), the father of Abram, Nahor, and Haran, and through them the ancestor of the great families of the Israelites, Ishmaelites, Midianites, Moabites, and Ammonites (Gen. xi, 24-32). B.C. 2293-2088. The account given of him in the Old-Test. narrative is very brief. We learn from it simply that he was an idolater (Josh. xxiv, 2); that he dwelt beyond the Euphrates in Ur of the Chaldees (Gen. xi, 28); that in the westerly migration which he undertook in his old age he went with his son Abram, his daughter-in-law Sarai, and his grandson Lot, "to go into the land of Canaan, and they came unto Haran and dwelt there" (ver. 31); and, finally, that "the days of Terah were two hundred and five years; and Terah died in Haran" (ver. 32). Taking the language of Abraham about Sarai being the daughter of his father but not of his mother (xx, 12) in its natural sense, Terah must have had children by more wives than one; but we have no particular account of his domestic relations in this respect.

In connection with this migration a chronological difficulty has arisen which may be noticed here. In the speech of Stephen (Acts vii, 4) it is said that the further journey of Abraham from Haran to the land of Canaan did not take place till after his father's death. Now as Terah was two hundred and five years old (the Samar. text and version make him one hundred and forty-five, and so avoid this difficulty) when he died, and Abram was seventy-five when he left Haran (Gen. xii, 4) it follows that, if the speech of Stephen be correct, at Abram's birth Terah must have been one hundred and thirty years old; and therefore that the order of

his sons—Abram, Nahor, Haran—given in Gen. xi, 26, 27 is not their order in point of age. Lord Arthur Hervey says (*Geneal.* p. 82, 83), "The difficulty is easily got over by supposing that Abram, though named first on account of his dignity, was not the eldest son, but probably the youngest of the three, born when his father was one hundred and thirty years old—a supposition with which the marriage of Nahor with his elder brother Haran's daughter, Milcah, and the apparent nearness of age between Abram and Lot, and the three generations from Nahor to Rebekah corresponding to only two, from Abraham to Isaac, are in perfect harmony." See ABRAHAM.

From Acts vii, 2-4 it appears that the first call which prompted the family to leave Ur was addressed to Abraham, not to Terah, as well as the second, which, after the death of his father, induced him to proceed from Haran to Canaan. The order to Abraham to proceed to Canaan immediately after Terah's death seems to indicate that the pause at Haran was on his account. Whether he declined to proceed any farther, or his advanced age rendered him unequal to the fatigues of the journey, can only be conjectured. It appears, however, from Josh. xxiv, 2, 14 that Terah was given to idolatry, or rather, perhaps, to certain idolatrous superstitions, retained together with the acknowledgment and worship of Jehovah, such as existed in the family in the time of his great-grandson Laban (Gen. xxxi, 30). This may suggest that it was not in the divine wisdom deemed proper that one who had grown old in such practices should enter the land in which his descendants were destined to exemplify a pure faith.

From the simple facts of Terah's life recorded in the Old Test. has been constructed the entire legend of Abram which is current in Jewish and Arabian traditions. Terah the idolater is turned into a maker of images, and "Ur of the Chaldees" is the original of the "furnace" into which Abram was cast (comp. Ezek. v, 2). Rashi's note on Gen. xi, 28 is as follows: "In the presence of Terah his father: in the lifetime of his father. And the Midrash Haggadah says that he died beside his father, for Terah had complained of Abram his son before Nimrod that he had broken his images, and he cast him into a furnace of fire. And Haran was sitting and saying in his heart, If Abram overcome, I am on his side; and if Nimrod overcome, I am on his side. And when Abram was saved, they said to Haran, On whose side art thou? He said to them, I am on Abram's side. So they cast him into the furnace of fire and he was burned; and this is [what is meant by] *Ur Casdim* (Ur of the Chaldees)." In *Beresith Rabba* (par. 17) the story is told of Abraham being left to sell idols in his father's stead, which is repeated in Weil, *Biblical Legends*, p. 49. The whole legend depends upon the ambiguity of the word *עֲבָדָה*, which signifies "to make" and "to serve or worship;" so that Terah, who in the Biblical narrative is only a worshipper of idols, is in the Jewish tradition an image-maker; and about this single point the whole story has grown. It certainly was unknown to Josephus, who tells nothing of Terah except that it was grief for the death of his son Haran that induced him to quit Ur of the Chaldees (*Ant.* i, 6, 6).

In the Jewish traditions Terah is a prince and a great man in the palace of Nimrod (Jellinek, *Bet ham-Midrash*, p. 27), the captain of his army (*Sepher Hayashar*), his son-in-law according to the Arabs (Beer, *Leben Abraham's*, p. 97). His wife is called in the Talmud (*Baba Bathra*, fol. 91 a) Amtelai, or Emtelai, the daughter of Carnebo. In the book of the Jubilees she is called Edna, the daughter of Arem, or Aram; and by the Arabs Adna (D'Herbelot, *Bibliothèque Orientale*, s. v. "Abraham;" Beer, p. 97). According to D'Herbelot, the name of Abraham's father was Azar in the Arabic traditions, and Terah was his grandfather. Elmakim, quoted by Hottinger (*Smegma Orientale*, p. 281), says

that, after the death of Yuna, Abraham's mother, Terah took another wife, who bare him Sarah. He adds that in the days of Terah the king of Babylon made war upon the country in which he dwelt, and that Hazrun, the brother of Terah, went out against him and slew him; and the kingdom of Babylon was transferred to Nineveh and Mosul. For all these traditions, see the book of Jasher and the works of Hottinger, D'Herbelot, Weil, and Beer above quoted. Philo (*De Somniis*) indulges in some strange speculations with regard to Terah's name and his migration.

**Ter'aphim** (Heb. *teraphim*, תִּרְפִּים; only thus in the masc. plur. in the Bible, but in the fem. plur. תִּרְפִּיּוֹת, *teraphôth*, in Rabbinical writers) seems to denote tutelar household images, by whom families expected, for reverence bestowed, to be rewarded with domestic prosperity, such as plenty of food, health, and various necessities of domestic life. This word is in the A. V. always rendered either by "teraphim," or by "images" with "teraphim" in the margin, except in 1 Sam. xv, 23; Zech. x, 2, where it is represented by "idolatry," "idols." The singular of the word does not occur, though in 1 Sam. xix, 13, 16 it appears that only *one* image is referred to. Possibly, as in the case of the Roman Penates (which word, also, has no singular), these representative images were always two or three in number. Strange to say, in the Sept. they are represented by a different rendering in nearly every book where the word occurs: in Gen. xxxi by εἰδωλα; in Judg. xvii, xviii by τεραφὶν or τὸ τεραφεῖν; in 1 Sam. xix by κενωτάφια; in Ezek. xxi, 21 by γλυπτά; in Hos. iii, 4 by ἑῶλοι; and in Zech. x, 2 by ἀποφθγγόμενοι. In the Vulg. we find nearly the same variations between *teraphim*, *statua*, *idola*, *simulacra*, *figuræ idolorum*, *idololatría*. For other translations, which we find to be equally vague and various, see below.

**I. Derivation of the Term.**—The etymology and meaning of this word may be inferred from the various modes in which it is represented by the Greek translators, such as *τεραφεῖν*, *τὸ τεραφεῖν*, or *τὰ τεραφὶν*, reminding us of the etymological connection of תִּרְיָה, תִּרְיָה, *to nourish*, with *τρέφειν*. Its remote derivatives in modern languages, viz. the Italian *tarifa*, French *tarif*, and even the English *tripe*, throw a little light upon our subject. According to its etymology, the word *teraphim* has been literally translated *nutritores*, *nourishers*. It seems that the plural form was used as a collective singular for the personified combination of all nourishing powers, as the plural *teraphim* signifies God, in whom all superior powers to be revered with reverential awe are combined (comp. the classical epithets of gods—Sol, Phæbus, Ceres, Venus, Cybele, Pales, Trivia, Fides, Sibylla, etc., *almus*, *ὄμπνιος*, *τρίπομος*). The word *teraphim* signified an object or objects of idolatry, as we may learn from some of the above renderings of the Sept., εἰδωλον, γλυπτόν; and that it was in meaning similar to the *Penates* is indicated by κενωτάφια. Aquila renders it *μορφώματα, προτομαί, ἀνθροπίαισεις, ἐπίλυσαι, εἰδωλα*; Symmachus also translates it εἰδωλα.

The book Zohar derives the name *teraphim* from תִּרְיָה, *turpitude*, but mentions also that rabbi Jehuda derives it from תִּרְיָה, *to slacken*, because they slackened the hands of men in well-doing. The rabbi adds that they uttered a נבואה רפה, *prophetia laxa, inanis, vana*, a loose sort of prediction. Hence rabbi Bechai says that תִּרְפִּים are the same as רַפִּים, *feeble*, objects not to be depended upon. But in Tanchuma the former etymology is produced, since the *teraphim* were נִצְחָה תִּרְיָה, *opus turpitudinis seu fœdatis* (see Buxtorff *Lex. Talmud. et Rabbin.* s. v. תִּרְיָה, which root occurs in the Lat. *turpis*). Onkelos renders *teraphim* in Gen. xxxi by צִלְמִינִי, and Jonathan in Judg. xvii and xviii by רִמָּה, *images*. The Targum on Hos. iii, 4 has רִמָּה, *images*.

*indicans*, expounder of oracles, where the Greek has δῆ-  
λων; and the Targum on 1 Sam. xv, 23 זִנְיֹהָ, *idols*.  
Goussetius, under תְּרָפִים, goes so far as to assert that the  
word ἀνθράκωτος is formed from התרפם. Lud. de  
Dieu, and after him Spencer, in *Leg. Rit. Hebr. Dissert.*  
(vii, l. 3, c. 3, § 7), urges the frequent interchange of the  
sounds *t* and *sh*, in order to show that teraphim  
and seraphim are etymologically connected. Hot-  
tinger, in his *Smegma*, and Kircher, in the first vol-  
ume of his *Œdipus Ægyptiacus*, exhibit the etymo-  
logical progression thus: *Sor Apis* (σωρ ἀπ, *ark of the*  
*ox*), *Surapis*, *Serapis*, *Terapis*, *Teraphim*. The Ara-  
bic author Aben Neph also asserts the identity of *Tera-*  
*phim* and *Serapides*. Others appeal to רָפָא, *Sepa-*  
*peúein*, to *heal* (comp. Wichmannshausen, *Dissertatio*  
*de Teraphim*; Witsius, *Ægyptiaca*, i, 8; Ugolino, *Thes.*  
xii, 786). Cölin, in his *Biblische Theologie*, derives  
teraphim from the Syriac *araph*, *percontari*. Gesen-  
ius (*Thesaur.* p. 1519) refers it to the Arabic root  
*taraph*, "to live in comfort;" and compares it with  
the Sanscrit *trip*, "to delight," and the Greek τέτρο-  
μαι. Fürst (*Heb. Lex.*) returns to the root תָּרַךְ, in the  
sense of *nourishing*.

II. *Biblical References*.—1. Teraphim are first men-  
tioned in Gen. xxxi, 19, where we are told that Rachel  
stole the teraphim of her father Laban, and successfully  
concealed them from his search under the *hivan*, or  
coarse carpet which is used to cover the wicker-work  
pack-saddle of the camel. Aben-Ezra says that she  
stole them in order that her father might not, by means  
of their oracles, discover the direction of Jacob's flight  
(and we note that Laban adopted this or some other  
mode of augury from his use of the word *nicháshthi*,  
"I have augured" [xxx, 27]); but Josephus says that  
she carried off these *τύποις τῶν θεῶν* that they might  
serve as a material protection to her if overtaken, al-  
though she herself disbelieved in them (*καταφρονεῖν*  
*μὲν τῆς τοιαύτης τιμῆς τῶν θεῶν ὑδάξαντος αὐτὴν*  
*τοῦ Ἰακώβου* [*Ant.* i, 19, 8]); and, lastly, some sup-  
pose that she was tempted by the precious metals of  
which they were made. It is far more probable that,  
like her father, Rachel, whose mind was evidently taint-  
ed with superstition (Gen. xxx, 14), regarded the tera-  
phim as tutelary "gods" (xxx, 30). Laban's eagerness  
to recover them shows the importance in which they  
were held; and it is important to observe that, although  
a believer in Elohim (ver. 53), he openly paid to these  
teraphim, which were probably ancestral divinities of  
his family (*ibid.*), an idolatrous worship. Jurieu (*Hist.*  
*des Dogmes et des Cultes*, ii, 3, 456), after elaborately  
entering into the question, thinks that they may have  
been images of Shem and Noah. From this Biblical  
notice it would seem that they were usually somewhat  
large figures, which could not very easily be secreted.

2. It is extremely probable that these household de-  
ities were among the "strange gods" and talismanic  
earrings which Jacob required his family to give up,  
and which were buried by him under the boughs of  
*Allon-Moanem*, "the sorcerers' oak" (Judg. ix, 37).  
But an isolated act would naturally be ineffectual to  
abolish a cult which had probably existed for centuries  
in the Aramæan home of the Shemites; and, conse-  
quently, in the time of the Judges we find the worship  
of teraphim existing in full vigor. The 17th and 18th  
chapters of Judges are entirely occupied with the story  
of Micah, an Ephraimite, who in those wild and igno-  
rant times had fancied that he could honor Jehovah  
(xvii, 13) by establishing a worship in his own house.  
To the ephod and teraphim which he already possessed  
(ver. 5) his mother added a *Pesel* and *Massekâh* (possibly  
"a graven and a molten image") made out of the gold  
which she had consecrated to Jehovah and which he  
had stolen. When Jonathan, the grandson of Moses,  
arrived at the house in his accidental wanderings, Mi-  
cah engaged him as a regular priest, and anticipated, in

consequence, the special blessing of Jehovah. The five  
Danite spies consulted these oracular Penates of Micah  
through the intervention of Jonathan (xviii, 5), and in-  
formed the Danites on their way to Laish of the images  
which the house contained. The Danite warriors, with  
the most unscrupulous indifference, violently carried off  
the whole apparatus of this private cult, including the  
priest himself, to their new city; and we are informed  
that it continued to be celebrated till "the day of the  
captivity of the land," which, as we see from the next  
verse, may perhaps mean till the capture of Shiloh by  
the Philistines. What is most remarkable in this nar-  
rative is the fact that both Micah, who was a worship-  
per of Jehovah, and the Danites, who acknowledged  
Elohim (ver. 5, 10), and Jonathan, the grandson of Mo-  
ses himself, should, in spite of the distinctest prohibi-  
tions of the law, have regarded the adoration of tera-  
phim and other images as harmless, if not as laudable;  
and that this form of idolatry, without any political mo-  
tive to palliate it as in the case of Jeroboam, should  
have been adopted and maintained without surprise or  
hesitation, nay, even with eager enthusiasm, by an entire  
tribe of Israel. This is very much as at present some  
forms of image-adoration are blended with the service  
of God. That such will-worship, however, was only  
comparatively innocent, and originated in an obstinate  
*pruritus* of improving rather than obeying God's reve-  
lation, Samuel clearly expressed in reproving Saul (1  
Sam. xv, 23): "Stubbornness is as iniquity and idola-  
try" (literally *teraphim*). We do not read that the  
stubbornness of Saul led him actually to worship tera-  
phim. However, his daughter possessed teraphim, as  
we shall see presently.

3. The next notice of teraphim which we find is in 1  
Sam. xix, 13-16, where Michal, to give David more time  
to escape, deceives the messengers of Saul by putting  
"the teraphim" in his bed, "with a pillow of goats'-hair  
for his bolster." The use of the article shows that "the  
teraphim" was something perfectly well known (Theni-  
us, *ad loc.*); and the fact that we thus find it (or them)  
in the house of a man so pious as David entirely con-  
firms our inference as to the prevalence of these images.  
The suggestions of Michaelis that Michal may have  
worshipped them unknown to David, and that barren  
women were especially devoted to them, are wholly  
without foundation. The article (תְּרָפִים) explodes  
the arguments of Michaelis (*De Teraphis, Comment.*  
*Soc. Gott.* 1763), Bochart (*Hieroz.* i, 623), etc., that the  
teraphim in this instance was a mere hastily made doll  
of rags; in fact, a sort of malkin. We may legitimately  
infer from the passage that they had some rude resem-  
blance to the human shape, being, perhaps, something  
like the Hermæ; hence Aquila in this place renders the  
word by *πορομαί*. The Sept. rendering *κενοράφια*  
very probably points to the belief that the teraphim  
were images of deceased ancestors (*κενοράφια τινα*  
*ἦσαν διασώμενα ὡς τύποις νεκροί*. Suid. *rid.* Bo-  
chart, *Hieroz.* I, ii, 51); and the rendering of "put a  
pillow of goats'-hair for his bolster" by *καὶ ἦπαρ τῶν*  
*αἰγῶν ἔθετο πρὸς κεφαλῆς αὐτοῦ*, "she placed the  
goats' liver at his head," shows that they read קֶבֶר  
"liver," by קֶבֶר "mattress." Now if this ancient  
reading were correct, it brings the passage into remark-  
able parallel with Ezek. xxi, 21, where Nebuchadnezzar  
is said to have decided his course by *belomantia*, togeth-  
er with consultation of teraphim and looking into the  
liver (*extispicium*). It is possible that Michal may have  
been divining by means of a sacrifice to the teraphim  
when Saul's messenger arrived, and that she put the  
yet palpitating liver on the bed with the image, which  
in a small, dark, narrow recess might well enough pass  
for a human being. Josephus, with his usual want of  
honesty, omits all mention of the teraphim, and only  
says that she put the liver under the bedclothes, hop-  
ing that its motion would make the men more easily  
believe that David was gasping! (*Ant.* vi, 11, 4). The-

odoret (*Quest.* 49, in 1 *Reg.*) repeats this preposterous notion.

On every revival of the knowledge of the written revelation of God the teraphim were swept away, together with the worse forms of idolatry (2 Kings xxiii, 24): "The workers with familiar spirits, and the wizards, and the images (teraphim), and the idols, and all the abominations that were spied in the land of Judah and in Jerusalem, did Josiah put away, that he might perform the words of the law which were written in the book that Hilkiah the priest found in the house of the Lord."

4. The next passage in historical order about the teraphim is Hos. iii, 4, which is encompassed by difficulties. The prophet, purchasing Gomer to himself, bids her be chaste for many days, "for the children of Israel shall abide many days without a king, and without a sacrifice, and without an image (*matzebâh*), and without an ephod, and without teraphim." Here it would certainly be the *prima facie* impression of every unbiased reader that the *matzebâh* and the teraphim are mentioned without blame as ordinary parts of religious worship. Without, however, entering into the question (which, perhaps, cannot be decided) whether Hosea did or did not mean to commend or tolerate these material adjuncts to a monotheistic worship, it is certainly not surprising that the reverence paid to the teraphim should have continued in Israel side by side with that paid to the calves, which beyond all doubt were intended to be mere Elohistic symbols; and this is the less surprising when we remember that one of these cherubic emblems was set up in the very city (Dan) to which the teraphim of Micah had been carried; and probably, indeed, because of the existence there of the irregular worship established by Moses' grandson. But here, again, the Sept. version is curious and perplexing, for it uses the word *δῆλοι* (sc. *λίθοι*, bright gems), a word which, like *δῆλωσις*, it uses elsewhere of the Urim and Thummim (Numb. xxvii, 21; 1 Sam. xxviii, 6); and Aquila seems to have had the same notion in adopting the word *φωτισμοίς*, and it is even countenanced by Jerome, who in this passage includes the teraphim among the "instrumenta sacerdotalis habitus." This is one starting-point for the theory, supported with such a mass of splendid but unconvincing learning by Spencer (*De Legg. Hebr.* lib. iii, dissert. vii, p. 920-1038), that the teraphim and urim were identical. He argues not only from this rendering *δῆλοι*, but also (1) from the frequent union of ephod with teraphim; (2) from the supposition that urim means "fires," and that teraphim means the same, being a mere Aramaic equivalent for seraphim, "the burning ones;" (3) from the constant use of teraphim for oracular purposes. He concludes, therefore, that they were small images, permitted as a kind of necessary concession to deeply rooted idolatry, placed in the folds of the ephod and believed to emit predictions of the divine will. How ill the theory accords with the data before us will be obvious at once. This passage seems to indicate that as the use of teraphim, like that of the Penates and Lares among the Romans, was connected with nationality, it necessarily perished with the nationality itself.

5. The teraphim were consulted even after the Captivity by persons upon whom true religion had no firm hold, in order to elicit some supernatural *omina*, similar to the *auguria* of the Romans. Thus (Zech. x, 2): "For the idols (teraphim) have spoken vanity;" etc. In like manner at a previous age, in connection with the *haruspicia* instituted by the king of Babylon, we read (*Ezek.* xxi, 21, 26) that he consulted images (teraphim).

The main and certain results of this review are that the teraphim were rude human images; that the use of them was an antique Aramaic custom; that there is reason to suppose them to have been images of deceased ancestors; that they were consulted oracularly; that they were not confined to Jews; that their use contin-

ued down to the latest period of Jewish history; and lastly, that, although the more enlightened prophets and strictest later kings regarded them as idolatrous, the priests were much less averse to such images, and their cult was not considered in any way repugnant to the pious worship of Elohim; nay, even to the worship of him "under the awful title of Jehovah," as in the case of Aaron, Jonathan, Uriah, etc. (See some acute remarks on this subject in Nicolas, *Études Crit. sur la Bible*, p. 129-135.) In fact, they involved a monotheistic idolatry, very different indeed from polytheism; and the tolerance of them by priests as compared with the denunciation of them by the keener insight and more vivid inspiration of the prophets offers a close analogy to the views of the Roman Catholics respecting pictures and images as compared with the views of Protestants. It was against this use of idolatrous symbols and emblems in a monotheistic worship that the second commandment was directed, whereas the first is aimed against the graver sin of direct polytheism. But the whole history of Israel shows how early and how utterly the law must have fallen into desuetude. The worship of the golden calf and of the calves at Dan and Bethel, against which, so far as we know, neither Elijah nor Elisha said a single word; the tolerance of high-places, teraphim, and *bætyla*; the offering of incense for centuries to the brazen serpent destroyed by Hezekiah; the occasional glimpses of the most startling irregularities sanctioned, apparently, even in the Temple worship itself, prove most decisively that a pure monotheism and an independence of symbols were the result of a slow and painful course of God's disciplinary dealings among the noblest thinkers of a single nation, and not, as is so constantly and erroneously urged, the instinct of the whole Shemitic race; in other words, one single branch of the Shemites was, under God's providence, educated into pure monotheism only by centuries of misfortune and series of inspired men. In fact, we have most remarkable proofs that the use of teraphim coexisted with the worship of Jehovah even in comparatively pious families; and we have more than one instance of the wives of worshippers of Jehovah not finding full contentment and satisfaction in the stern moral truth of spiritual worship, and therefore carrying on some private symbolism by fondling the teraphim. It seems, however, that this swerving from truth was comparatively innocent. It was never denounced and suppressed with the same rigor as the worship of Moloch. There is, in fine, no positive evidence that the teraphim ever were actually worshipped. They seem rather to have been cherished as *talismans* than as idols. See MAGIC.

III. *Opinions of Later Scholars.*—Besides Spencer's theory, to which we have already alluded, we may mention others, utterly valueless indeed, yet curious as bearing on the history of the subject.

1. *Rabbins.*—According to the great rabbi Eliezer, who was the son of Hyrcanus and the brother-in-law of Gamaliel II, who seems to have been the tutor of Paul (in *Pirke Aboth*, and the Targum of Jonathan on Gen. xxxi, 19), the worship of teraphim was connected with atrocities. "The makers of teraphim slaughtered a man who was a first-born, cut his head off and salted it, and cured it with spices and oil. After this, they wrote the name of an impure spirit and sentences of divination on a golden plate, which they placed under the tongue of the head, which was fastened to the wall, and lighted lamps before it, and knelt down in adoration, upon which the tongue began to utter divinations." Rabbi Salomo, or Rashi (2 Kings xxiii, 24), says, "The teraphim uttered divinations by magical and horoscopic arts." On 1 Sam. xix, 13 sq., he adduces the opinion that the teraphim were horoscopic and astrological instruments made of brass; but he confesses that this opinion, to which he is himself most inclined, is not consistent with the account of Michal, from which it is evident that the teraphim had the shape of man. On Gen. xxxi, Aben-Ezra ad-

duces the opinion that the teraphim were *automata*, made by astrologers so as to show the hours and to utter divinations. Hence the Persian Tawas in Gen. xxxi translates *astrolabia*. Aben-Ezra also adduces the opinion that Rachel stole the teraphim of Laban in order to prevent him from idolatry, and from asking the teraphim whither his children had fled. Rabbi Levi ben-Gersom (on Genesis) states that the teraphim were human figures, by which the imagination of diviners was so excited that they supposed they heard a low voice speaking about future events with which their own thoughts were filled, although the image did not speak, an operation which can only be performed by such natural organs as God has provided for that purpose.

2. *Moderns*.—Michaelis, in *Commentationes Societati Gottingensi oblatae* (Brem. 1763), p. 5 sq., compares the teraphim to the *Satyræ* and *Sileni*, referring to the statement of Pausanias (vi, 24, 6), that there were graves of Sileni in the country of the Hebrews; and alluding to the *hairy ones* ("devils," שִׁטְרִיִּים) of Lev. xvii, 7. Creuzer asserts that the teraphim had something of *asses* in them (*Commentationes Herod.* i, 277; *Symb.* iii, 208 sq.); and refers to the old calumny that the Jews worshipped the head of an ass (*Tacit. Hist.* v, 4; *Rutilius*, i, 387). Creuzer appeals also (*Symb.* ii, 340) to Gen. xxxi, in order to prove the fertilizing, or rather fecundizing, power of the תרפים, which scarcely can be proved from ver. 19 (comp. here Rosenmülleri *Scho-lia*; Jahn, iii, 506 sq.).

IV. *Recent Illustrations*.—M. Botta found in cavities under the pavement of the porch of the palace at Khorsabad several small images of baked clay of frightful aspect, sometimes with lynx head and human body, and sometimes with human head and lion's or bull's body. Some have a mitre encircled at the bottom with

Ancient Assyrian Teraphim.

were intended to protect the entrances of the palace from the admission of evil. See Bonomi, *Nineveh*, p. 156.

Figures somewhat similar but less hideous have been found among the Egyptian ruins and elsewhere, which seem to have been employed with a like significance. See Thomson, *Land and Book*, ii, 25.

V. *Literature*.—The principal authorities concerning the teraphim are Michaelis, *De Teraphis*, in the *Comment. Soc. Gott.* (Brem. 1763), p. 5 sq.; Hersen, *De Teraphim* (Viteb. 1665); Wickmannshausen, *De Teraphim* (ibid. 1705); also in Ugolino, *Thesaur.* xxiii, 7; Antast, *De Diis Familiæ Jacobi* (Lips. 1744); Buxtorf, *Lex. Talm.* p. 2660-64; Pfeiffer, *Exerc. Bibl.* p. 1-28; Hottinger, *Hist. Orient.* p. 296; Selden, *De Diis Syris Syntagm.* i, 2; Spencer, *De Legg. Hebr.* p. 920-1038; Bochart, *Hieroz.* i, 623; Carpov, *Appar. Crit.* p. 537-546; Jurieu, *Hist. Crit. des Dogmes*, ii, 3; Gesenius,

Ancient Figures, possibly Teraphim.

*Thesaur.* s. v.; Winkler, *Animadvers. Philol.* ii, 351 sq. See IDOLATRY.

**Terebintb**, a majestic Oriental tree, which has been made by many a rival of the oak, as a representative of the Heb. אֵילִן, אֵלֶּה, אֵלֶּה, or אֵלֶּה. See PLAIN. So Celsius (*Hierob.* ii, 34-58), and naturalists generally since. Travellers frequently confound the two trees. They are, however, quite different in many particulars. The bark, shape, and general character are remarkably alike, but the wood, the leaf, and the blossom differ very obviously. See TOPOGRAPHICAL TERMS.

The terebintb is the *Pistacia terebinthus* of botanists, called by the Arabs the *betm* or *butm*, and well known in the Greek islands as the *turpentine-tree*. See TEIL. In Chios especially a considerable quantity of turpentine is extracted from it by tapping the trunk; but this is not practiced in Palestine, where the inhabitants seem to be ignorant of its commercial value. It is a very common tree in the southern and eastern parts of the country, being generally found in situations too warm for the oak, whose place it there supplies, although they are occasionally found immediately adjoining, as at Tell el-Kady (Tristram, *Land of Israel*, p. 581). It is seldom seen in clumps or groves, never in forests, but stands isolated and weird-like in some bare ravine or on a hillside, where nothing else towers above the lower brushwood. The *butm* is not an evergreen, as is often represented, but its small feathered lancet-shaped leaves fall in the autumn and are renewed in the spring. They are pinnate, the leaflets larger than those of the lentisk, and their hue is a very dark reddish-green, not quite so sombre as the locust-tree. The flowers are in clusters like those of a vine, inconspicuous, and are followed by small oval berries, hanging in clusters from two to five inches in length, resembling much the clusters of the vine when the grapes are just set. They are of a ruddy purple and remarkably juicy. Another fruit, or rather excrescence, is found on the tree, scattered among the leaves, of the size of a chestnut, of a purple color variegated with green and white. The people of Cyprus believe that it is produced by the puncture of a fly; when opened it appears full of worms (Mariti, i, 209; ii, 114). From incisions in the trunk there

Branch of the Terebinth.

flows a sort of transparent balsam, constituting a very pure and fine species of turpentine, with an agreeable odor, like citron or jessamine, and a mild taste, and hardening gradually into a transparent gum. It is called Cyprus or Chian turpentine, and is obtained in July by wounding the bark in several places, leaving a space of about three inches between the wounds. From these the turpentine is received on stones, upon which it becomes so much condensed by the coldness of the night as to admit of being scraped off with a knife, which is always done before sunrise. It is again liquefied in the sun and passed through a strainer, in order to free it from all extraneous matters. The quantity produced is very small, four large trees, sixty years old, only yielding two pounds and a half: it may be somewhat more in favorable situations. In consequence of this, and its superior qualities, the turpentine is very costly, and is often adulterated with inferior substances (Kitto, *Phys. Hist. of Palest.* p. cccxxviii). The tree is found also in Asia Minor (many of them near Smyrna), Greece, Italy, the south of France, Spain, and in the north of Africa, and is there described as not usually rising to the height of more than twenty feet. It often exceeds that size, however, in the mountains, and in the plains of Syria it is very much larger. See OAK.

*Pistacia terebinthus.*

Many terebinths remain to this day objects of veneration in their neighborhood, and the favorite burying-place of a Bedawin sheik is under a solitary tree. Eastern travellers will recall the "Mother of rags" on the outskirts of the desert—a terebinth covered with the votive offerings of superstition or affection. The "oak of Mamre," near Hebron, was said to be a terebinth, which remained till the 4th century (Jerome, *De Loc. Heb.* 87; Sozomen, *Eccles. Hist.* ii, 4; comp. Josephus, *War*, v, 9, 7), and on its site Constantine erected a church, the ruins of which still remain. It is said that the tree dried up in the reign of Theodosius the Younger; but that the trunk produced a new tree, from which Brocard (vii, 64), Salignac (x, 5), and other old travellers declare that they brought slips of the new and old wood to their own country (Zuallart *Voyage de Jérusalem*, iv, 1). The tree was accidentally destroyed by fire in A.D. 1646 (Mariti, p. 520). Its modern representative, however, is a true oak, as is proved both by its leaves and actual acorns. The tree on which Judas hanged himself is said to have been a terebinth, and its descendant is yet shown to the credulous, overhanging the valley of Hinnom. Towards the north of Palestine the tree becomes more scarce; but in ancient Moab and Ammon, and in the region around Heshbon, it is the only one that relieves the monotony of the rolling downs and boundless sheepwalks; and in the few glens south of the Jabbok there are many trees of a larger size than others which remain west of the Jordan (Tristram, *Nat. Hist. of the Bible*, p. 401). In Turkey the burial-grounds of Christians, particularly the Armenians, are planted with terebinth-trees, the cypress being reserved for the Mohammedans (Calcott [Lady], *Script. Herbal*, p. 504). See TURPENTINE-TREE.

**Te'reash** (Heb. *יד ירע*, prob. Pers. *strictness*; Sept. [in some copies only] *Θάραξ* or *Θάρραξ*; Vulg. *Thares*), the second-named of the two eunuchs who kept the door of the palace of Ahasuerus, and who were hanged, their plot to assassinate the king being discovered by Mordecai (*Esth.* ii, 21; vi, 2). B.C. 479. Josephus calls him *Theodestes* (*Θεοδότης*; *Ant.* xi, 6, 4 and 10), and says that, the conspiracy having been detected by Barnabazus, a servant of one of the eunuchs, who was a Jew by birth, and who revealed it to Mordecai, the conspirators were crucified.

**Terminism** and the TERMINISTIC CONTROVERSY. The word *Terminism* has reference to the terminus of the period of grace accorded to man as an individual or in the mass. The basis of the dispute which arose upon this matter was the Middle-Age, Augustinian theory, that the end of this earthly life is in every instance the end of gracious opportunity, so that even unbaptized children become at death the prey of hell. The Reformation led the consciousness of Christians back to the dynamic conditions of salvation, namely, on the one hand, to the free grace of God, and, on the other, to the internal, religious, and moral state of repentance. In the light of the former condition it was possible to suppose that the *terminus gratiæ* might be extended beyond the *terminus vitæ*; under the latter it could be contracted to even narrower limits than the duration of earthly life. A recognition of the possibility of widening the period of grace led to the development of the doctrine of the Apocatastasis (q. v.), while its contrary gave rise to Terminism.

The leading promulgators of Terminism were the *Friends*, who taught that every person has a special day of visitation, which is but transient and may end before the close of the life of earth (see Winer, *Comp. Darstellung*, p. 87). The Pietists also contributed towards the growth of that idea by their depreciation of the worth of repentance late in life. The controversy upon the subject was fairly opened by the appearance of a work by J. G. Böse, deacon at Sorau (died 1700), entitled *Terminus Peremptorius Salutis Humane*, etc

(1698). A number of responses were written, the more important of them by Neumann, professor at Wittenberg, *Diss. de Term. Salut.* etc. (Viteb. 1700), and *Diss. de Tempore Gratiae*, etc. (1701); also Ittig, professor at Leipsic, *Vorträge üb. d. prophet., apostol. u. evang.-luth. Lehre*, etc., with other works. Rechenberg, the son-in-law of Spener, came to the assistance of Böse with his *Diss. de Grat. Revocatrixis Terminis* (Lips. 1700). The dispute was dropped on the death of Ittig, in 1710, and the advance of rationalism deprived the question of interest. For the theology of our time, the only importance of the discussion lies in its possible influence in occasioning profounder determinations with regard to the possibility of becoming hardened against grace in this life, and the infinite consequences depending upon the hour of death and the free sovereignty of God.

The literature of the controversy is largely given in the works of Rechenberg and Ittig. See also Winer, *Theol. Literatur*, p. 446; Bretschneider, *Systemat. Entwickl.* p. 693. On the dispute itself, see Einem, *Kirchengesch. d. 18. Jahrh.* ii, 737; Walch, *Einl. in d. Religionsstreitigk. d. evang.-luth. Kirche*, ii, 551 sq.; Baumgarten, *Geschichte d. Religionsparteien*, p. 1282 sq. — Herzog, *Real-Encyclop.* s. v.

**Terms, in law**, are the periods in England when the courts of law hold their sittings at Westminster for the discharge of their judicial functions. There are four in every year, namely, Hilary term, Easter term, Trinity term, and Michaelmas term; but the last of these is usually at the commencement of the legal year. They were supposed by Selden to have been established by William the Conqueror; but Spelman has shown that they originated in the observances of the Church, and were no more than those leisure periods when there was neither fast nor festival nor rural avocation to withhold the suitor from attending the court. At first the courts in Christian countries continued open all the year round, but the Church interposed. The sacred season of Advent and Christmas originated the winter vacation; the time of Lent and Easter gave rise to that of the spring; the third we owe to Pentecost; and the requisitions of agricultural pursuits account for the long space that intervenes between Midsummer and Michaelmas. Sundays and other holydays were included in the prohibition which, in 517, was established by a canon of the Church, and, says Blackstone, fortified by an imperial constitution of the younger Theodosius, comprised in the *Theodosian Code*. In the commencement and duration of these terms, these regulations of the Church were kept in view. Edward the Confessor, in one of his laws, says that from Advent to the octave of Epiphany, from Septuagesima to the octave of Easter, from the Ascension to the octave of Pentecost, and from four in the afternoon of every Saturday until the end of the succeeding Monday, the peace of God and holy Church should be kept throughout the realm (*Ancient Laws and Institutions of England*, p. 190). We learn from Britton that in the reign of Edward I no secular plea could be held, nor any man sworn on the evangelists during Advent, Lent, Pentecost, or the times of harvest and vintage, and the days of the great litanies and all solemn festivals. The bishops, however, he adds, granted dispensations that assizes and juries might be taken at these seasons; and afterwards, by statute Westminster 1, 3 Edward I, c. 51, it was enacted that assizes of novel disseisin mort d'ancestor and darrein presentment should be taken in Advent, Septuagesima, and Lent. The portions not included in the prohibitions became what are called *terms*, and were denominated according to the saint to whose feast they occurred most nearly.

**TERMS OF COMMUNION**, those conditions on which the members of a particular Church are agreed, and which are the basis of their fellowship. Terms of communion are not to be identified with terms of salvation;

nor should terms of lay communion be as comprehensive and theological as those of clerical fellowship.

**Terrace** (הַרְצֵה, *mesilláh*, 2 Chron. ix, 11; Sept. ἀνάβασις; a *highway*, as elsewhere usually rendered), a staircase, constructed by Solomon for his edifices out of the algum-trees imported from the East Indies. See **PALACE**; **TEMPLE**.

**Terrasson, André**, a French clergyman, and first of a literary family of considerable note in France, was born at Lyons in 1669, became a priest of the Oratory, preacher to the king, and afterwards preacher to the court of Lorraine. His pulpit services were much applauded, and attended by crowded congregations. His exertions during Lent in the metropolitan church at Paris threw him into an illness from which he died, April 25, 1723. His *Sermons* were printed in 1726 (4 vols. 12mo) and 1736. See Chalmers, *Biog. Dict.* s. v.; Hoefer, *Nouv. Biog. Générale*, s. v.

**Terrasson, Gaspard**, brother of the preceding, was born at Lyons, Oct. 5, 1680, and was sent, at the age of eighteen, to the house of the Oratory at Paris. He resided afterwards in different houses of his order, chiefly at Troyes, where he delivered a funeral oration for the dauphin, son of Louis XIV. For some time he employed himself in delivering exhortations in the seminaries, but after André's death he accepted solicitations to preach, and soon acquired a reputation superior to that of his brother. He preached in Paris during five years; but various circumstances, particularly his attachment to the Jansenists, obliged him to leave both the Congregation of the Oratory and the pulpit at the same time. He was appointed curate of Treigny in 1735; but, persecution still following him, he was sent to the Bastille, which he left in 1744 to be confined with the Minims at Argenteuil. He was at length set at liberty, and died in Paris, Jan. 2, 1752, leaving *Sermons* (4 vols. 12mo), and an anonymous book, *Lettres sur la Justice Chrétienne*, which was censured by the Sorbonne.

**Terrasson, Jean**, brother of the two preceding, was born at Lyons in 1670, where he also studied, and entered the Oratory. In 1707 he was admitted into the Academy of Sciences, and he entered into the literary discussions of the day. In 1721 he became professor of philosophy in the College of France, and in 1732 he was made a member of the French Academy. Towards the end of his life he lost his memory. He died in Paris, Sept. 15, 1750. He published a number of historical works. See Hoefer, *Nouv. Biog. Générale*, s. v.

**Terrier**, a formal survey and plan or schedule of Church property, ordered by English canon law to be made and preserved in the bishop's registry. A terrier of glebe lands made under queen Elizabeth is preserved in the British Exchequer.

**Territorial System**. This title is applied to that theory of Church government which assumes that the ruler of a country possesses, by virtue of his sovereignty, the right to govern the Church, if Protestant, which has been established within his realm.

The Middle Ages had witnessed a constant association of the Church with the State, which was at times carried so far as to include the one under the other as one of its parts. When the principles of the Jewish theocracy could be asserted, the Church would attempt to subject the State to its authority; but when a relapse into heathen principles took place, the State was ready to enforce the authority of the civil power over the religion of the land. When the reformatory movements of the 15th century had failed, the renewed agitation, of which Zwingli, Luther, etc., were the representatives, addressed itself to the princes and estates of the land. The sovereign powers of either party assumed the right to dictate the creed of their subjects. The Roman Catholic prince who became a Protestant sought to carry his country with him over to Prote-

tantism; the Lutheran who passed over into the Reformed Church assumed to transfer his subjects also. The belief of the prince was to determine the creed of the land. The Peace of Westphalia ended this anomalous practice, but expressly recognised the sovereignty of the prince as the source of the *ius reformandi*.

The dangerous character of the principle which derived all the rights belonging to an evangelical Church from the head of the State was soon recognised, and led to the development of the theory which is usually known as the *episcopal system*.

The territorial system was formulated at the close of the 17th century as a foil to that theory, finding its leading advocates in Christian Thomasius (q. v.) and his pupil Brenneisen (*De Jure Principis circa Adia-phora* [Hale, 1675], in Thomasius, *Auserlesene deutsche Schriften*, 1696, p. 76 sq.), and its principal opponent in Johann Benedikt Carpov (q. v.). As formulated by Thomasius, the reigning prince possesses, as a natural right, the authority to regulate the ecclesiastical affairs of his country, and of banishing persons who disturb the peace of the Church. He may dismiss a preacher who dispenses false teachings, and may forbid the introduction of new confessions, etc.; but he cannot impose his own creed upon his subjects, nor finally determine in matters of religion. The theory found many supporters, jurists as well as theologians, among them J. H. Böhmer and Joh. Jac. Moser (q. v.). It has been defended in quite recent times, in connection with their liturgical disputes, by Müller, Marheinecke, Augusti, and others. The *collegial system* deprived the territorial theory of every support; and the present tendency towards an entire separation between State and Church is wholly antagonistic to its prevalence. Both legislation and praxis have suffered from its influence to the present day.

On the entire subject, see Stahl, *Kirchenverfassung nach Lehre u. Recht d. Protestanten*, p. 22 sq.; Richter, *Gesch. d. evang. Kirchenverfassung in Deutschland*, p. 212 sq.; Friedberg, *De Finibus inter Ecclesiam et Civitatem*, etc. (Lips. 1861); Lehmann, *De Pace Religiosa*, i, 23; Nettelbladt, *Observatt. Juris Ecclesiastici* (Hala, 1783, 8vo); the works of Thomasius, Carpov, etc.; Böhmer, *Consilia et Decisiones*, tom. i, pars i, respons. xv.—Herzog, *Real-Encyclop.* s. v. See CHURCH AND STATE; COLLEGIAL SYSTEM.

**Terry**, PARSHALL, a Presbyterian minister, was born at Aquebogue, Long Island, N. Y., Nov. 3, 1806; was licensed to preach by the Methodist Protestant Church of New York; preached at Aquebogue for two years; was ordained by the Congregational Convention of Long Island in 1831, and labored for a number of years at Patchogue; but, feeling the need of a more thorough course of theology, studied in the seminary attached to Yale College, graduated in 1840, and became a member of Onondaga Presbytery. In 1843 he was editor of the *Religious Recorder* at Syracuse, N. Y.; in 1848 removed to Marathon, N. Y., and was received by Cortland Presbytery; thence, in 1853, to Painesville, O., where he ministered three years. He subsequently labored, in 1857, at Unionville, O.; 1858, Thompson; 1861, Hudson; 1862, Franklin Mills; 1863, Troy. He died Oct. 20, 1865. He was a man of more than usual talents, which he improved by culture. See Wilson, *Presb. Hist. Almanac*, 1867, p. 322.

**Ter Sanctus** is the triumphal hymn of the ancient liturgies, "Holy, holy, holy, Lord God of hosts, heaven and earth are full of thy glory," etc., and is based on the three holies (Isa. vi, 3; Rev. iv, 8). In all ancient liturgies the *Ter Sanctus* comes near, but before, the prayer of consecration, and is sung by the choir and the people. "The pontiff who is to celebrate approaches the altar and praises the works of God, and, giving thanks for all, associates himself with the angels, and vociferates with them the triumphal hymn Holy, holy, holy; and the people also recite it, typify-

ing the equality of peace which we shall hereafter enjoy with the angels, and our union with them" (Simeon of Thessalonica, *Comm. on Lit. of St. Chrysos.*). This hymn formerly concluded with the words "Hosanna in the highest, blessed is He that cometh in the name of the Lord, Hosanna in the highest." This is the case in the liturgies of St. James, St. Chrysostom, St. Basil, the Malabar, Mozarabic, and Sarum. In that of St. Clement the *Sanctus* and *Hosanna* are separate, and the Mozarabic has the further addition "Hagios, hagios, hagios, Kyrie ho Theos." The prefaces of *Ter Sanctus* are very various, being adapted to different festivals and seasons. But they invariably end with the doxological form represented by the "Therefore with angels and archangels," etc., of the Prayer-book. In all liturgies the preface is sung or said by the celebrant alone, the choir and people joining in at the hymn itself. Hence in the Sarum Missal, followed by the Prayer-books of 1549 and 1552, the *Sanctus* is printed as a separate paragraph. The hymn is also called *Trisagion* (q. v.).

**Tersteegen**, GERHARD, the mystic and sacred poet, was born at Meurs, on Nov. 25, 1697. He early acquired a thorough knowledge of ancient languages, including the Hebrew, and friends advised his preparation for a learned career; but, his father having died, his mother was induced, from domestic considerations, to choose a mercantile life for him instead. He was apprenticed to his brother-in-law at Mülheim in 1713, and in the following year was powerfully wrought upon by the grace of God. Mülheim was at that time the scene of an exalted and vigorous piety which was kept alive through the holding of weekly convocations, and made itself felt in all the affairs of life. These convocations became an occasion of offence to the Church at large, and Hoffmann, the Mülheim pastor, was cited before the Classis of Duisburg, which decided that he must refrain from holding them in future, and induced the Synod of Cleves to take similar action. Nothing has been found, however, to show that Hoffmann was guilty of heterodoxy, or that the convocations served any other purpose than that of leading many souls to Christ. In spite of these inquisitorial measures, the convocations were obstinately continued at Mülheim, and Tersteegen, for his part, was alienated from the Church to such a degree as to refrain from participating in the public worship, and particularly in the sacrament of the Lord's supper, of which evident sinners were allowed to partake. He finished his apprenticeship, but two years afterwards, in 1719, under the impulse of religious sentiment, renounced his business for one of a more retired character. He now became a ribbon-weaver and an ascetic. He had no companion save the girl who wound his silk. His clothing was poor, his food scanty and simple; but his charities, whatever might be his income, were numerous. He considered this ascetical, hermit life the ideal condition of a Christian on the earth, and for a time endured its trials and privations with unwavering confidence in the care of his heavenly Father; but gradually he became the prey of internal anxieties which tortured him during five years with but occasional and transient interventions of hope. But in 1724 that period of suffering came to its close. He celebrated the return of his Saviour's smile in the hymn *Wie bist Du mir so innig gut, mein Hohenpriester Du!* and entered into a covenant with his Lord which he signed with his own blood—probably in imitation of the marquis de Renty, whose life he had treated with great pleasure in his book *Leben heiliger Seelen*, i, 3.

With the conclusion of this period of spiritual darkness his preparation came to an end. He was thenceforward, though much against his will, thrown among men and obliged to take an active part in the affairs of religion. He resided with his brother, and while employed in the tuition of that brother's children was led to undertake a work which initiated his career as a mystical writer—the *Unparteiischer Abriss christlicher*

*Grundwahrheiten*, a catechetical manual, first printed in 1801 and again in 1842. In this book he evidently leaned on the French mystic Pierre Poirer (q. v.) as respects both its arrangement and matter. The first three centuries of the Church are represented as having been pure, and the succeeding ages, from Constantine to the 15th century, as a period of great apostasy. The light broke through with power in the Reformation, but afterwards again declined. Christianity exists more generally in name than in fact. Upon this work followed a number of translations and prefaces, in the preparation of which Tersteegen was accustomed to spend the time after six o'clock in the evening. The list includes Labadie, *Manuel de Piété* (with preface dated Mülheim, May 21, 1726); Jean de Bernières Louvigny's works (*Das verborgene Leben mit Christo in Gott*, etc., with preface dated Dec. 18, 1726); Thomas à Kempis, *Imitatio Christi*; Gerlach Petersen, *Soliloquium* (1727). In 1733 he began the publication of the work entitled *Auserlesene Lebensbeschr. heil. Seelen*, the final (third) volume of which appeared in 1753, followed by a second edition of the whole work in the next year. The saints so commemorated belong altogether to the Roman Catholic communion—a fact which Tersteegen excused on the ground that others had rendered a similar service to Protestantism; but there is satisfactory proof that he possessed an especial fondness for the peculiar piety cultivated by the mystical ascetics of the former Church. In 1749 he published a translation of a poetical composition by Madame Guyon illustrative of the inner life, and with this work completed the series of his mystical writings. In them all he takes Poirer—sometimes Godfrey Arnold (q. v.) also—for his master. His mystical tendency is sometimes exaggerated into Quietism (q. v.) in them, so that he can speak in glowing terms of approval of a state of perfect rest for the soul which begins and continues through the direct operation of God on the soul without any mediation whatever, even though it be that of Scripture or of Christ.

Tersteegen yielded to the persuasions of Hoffmann and others, and began to address public assemblies at about the time when his first literary efforts were put forth. In 1728 he renounced his handicraft and gave himself wholly to the care of souls. His wants were supplied by the contributions of friends and by several legacies, so that he was even able to exercise a liberal benevolence. His advice was desired by great numbers of people living everywhere in the territories of Cleves and Berg. Otterbeck, a farm between Mülheim and Elberfeld, became a station where a number of his adherents lived together in the practice of industry, self-renunciation, and piety. He furnished them twelve rules of conduct (given at the close of vol. iii of his letters), and watched over them with jealous care. A work written in their behalf in 1727 became a bulwark against Antinomianism (q. v.), and saved them from the excesses into which other, but kindred, associations were drawn. A second centre of his influence was Elberfeld, and subsequently Barmen. This region was troubled with the fanatical influence of Eller (q. v.) and his supporters. To counteract that influence, Tersteegen wrote an effectual admonition (comp. *Weg der Wahrheit*, xi). Solingen was a third station, and it was there that Tersteegen delivered the only sermon ever preached by him. At Crefeld extraordinary manifestations accompanied a work of grace, which were controlled through his judicious counsel. He was also brought into relations with the Moravian Brotherhood, and was solicited by Zinzendorf, Dober, and other leaders to cast in his lot with theirs; but he steadily refused, less on the ground of their unusual methods than because he believed their teachings to be erroneous. He charged them with identifying sanctification with justification and with misrepresenting the legal and the evangelical elements of religion. He found in them no earnest striving in the way of a progressive sanctification, and

no willingness to receive the doctrine of the necessity for thorough-going self-denial and persistent watchfulness and prayer, which they denounced as legalism. His position hindered the Moravians from securing an establishment in the regions of the Lower Rhine.

In 1740 an occurrence at Solingen led the authorities to issue a positive prohibition of conventicles, and Tersteegen saw his extended and successful labors interrupted. During ten years he was able to hold public gatherings only in Holland, whither he frequently journeyed; but his correspondence and private labors increased enormously. He regarded the prohibition as a trial, and counselled submission. But when in 1750 a new awakening took place, he began once more to assert the right of "private assemblies." He wrote an awakening sermon at this time on 2 Cor. v, 14, which was favorably received and led to the ultimate publication of a series of discourses under the title *Geistliche Brosamen*, etc. (1773, 2 vols. in 4 pts.). They represent the culmination of his powers, and are equalled in contents and method by but few of the productions of his contemporaries.

The favor with which these sermons were received brought their author into general notice, and led to the appointment of a royal commissioner to inquire into the work of Tersteegen among his adherents. The person selected for this duty was a member of the high consistory named Hecker, a native of the Rhine provinces and a friend to Tersteegen. Through him the latter was induced to draw up a confession of his faith, and subsequently a critique of the *Œuvres du Philosophe de Sans-souci*, which elicited the approval of the king. A steady approximation on the part of Tersteegen and his friends towards the State Church is noticeable from this period, but he was never formally identified with it because of its tolerance of open sinners as communicants. He discussed this question in a tract issued in 1768, shortly before his decease. A feeble and broken constitution troubled him all his days; but he attained to the age of seventy-two years, passing away in a quiet slumber April 3, 1769.

As a poet, Tersteegen was prolific, and thoroughly, though evangelically, mystical. His apprehension of the idea of self-renunciation and a blessed loss of self in God was so profound as to prevent the Church of his day from appreciating his merit. His hymns are now found, however, in the collections of every German Church. His principal collection of hymns was published in 1729 under the title *Geistliches Blumengärtlein* (15th ed. Essen, 1855). He also rendered the mystical poems of Labadie into German, and contributed to the collection known as *Gottgeheiltes Harfenspiel d. Kinder*, etc. His works have been published in Germany by G. D. Bädecker. His life was written by Dr. Kerlen (Mülheim, 1853), and Göbel in his *Geschichte d. christl. Lebens*, etc., iii, 289-447. See Herzog, *Real-Encyclop.* s. v.

**Tertia** (Lat. *third*), the name given in the early Church to the third hour of prayer; that is, nine in the morning. Different theories are given of its origin; some saying that it was observed in regard to our Saviour's being condemned by Pilate at that time, others that it is in memory of the Holy Ghost coming upon the apostles at that hour. This is the reason assigned by Cassian and Basil. On all festivals this service was omitted, because on Sundays the communion was used, which always began at this hour. See Bingham, *Christ. Antiq.* bk. xiii, ch. ix, § 11.

**Tertiāna**, the term applied to the third part of all Church revenues in the Isle of Man, which third part was received by the bishops of that island. See Bingham, *Christ. Antiq.* bk. ix, ch. viii, § 6.

**Tertiaries** (TERTIUS ORDO DE PENITENTIA; TERTIARI; FRATRES CONVERSI; also SORORES TERTII ORDINIS) is the name given to the members of a union organized primarily in connection with the mendicant

orders, but subsequently connected also with other orders. They are not required to live in the convent or undergo the three principal vows, and were designed to retain their place in the world and represent the order in whose privileges they shared in the common walks of life. Their origin is traced back to Norbert, the founder of the Order of Premonstratenses. The Templars, too, had a similar institution connected with their organization. The actual introduction of the Order of Tertiaries was due, however, to Francis of Assisi, and dates back to 1221, the occasion for its creation being the effect produced by his preaching at Carnario, where men and women in great numbers dissolved the matrimonial relation in order to give themselves to repentance. All virtuous and orthodox persons were received into the order. The rule forbade participation in festivities, disputes, and offensive wars, and required works of charity, diligent religious exercises, an annual convocation for penance, and masses for the souls of the Tertiaries, living or dead. The order was governed by superiors periodically chosen. Its costume was to be of inferior stuff, neither wholly white nor black, and without ornament—an ash-colored coat and rope being finally chosen, over which ordinary secular clothing is permitted to be worn. The female tertiaries adopted a similar rule and costume, with the occasional addition of a white veil. The rule was confirmed by popes Honorius III, Gregory IX, and Nicholas IV. The order grew rapidly, and found favor in the highest circles, having numbered among its members the emperor Charles IV, kings Louis of France, Bela of Hungary, and Philip of Spain, queen Blanca of Castile, princess Anna of Austria, etc.

Towards the close of the 13th century a branch order was established among the male, and a century later among the female, Tertiaries to satisfy the craving of some for a stricter rule—the *Regulated Order of Tertiaries* (*Tertiarii Regulares*). After a rapid extension, this secondary order separated into different congregations, which, in substance, followed the Franciscan rule. The latter, in turn, gave rise to a series of congregations of Hospital Brothers and Sisters. They take the simple vows, and an additional one which binds them to care for the sick, and to live in hospitals or unions known as "families" and amenable to the bishops.

Tradition credits Dominic with the founding of an order of Tertiaries, male and female. An association of nobles and knights was formed by him, after the conversion of the Albigenses, to recover the alienated property of the Church and convents. They were accordingly styled *Milites de Militia Christi*. Their vow bound them to that work, to diligent attendance on public worship, etc., and to the wearing of a garb of ashy hue. Their wives were pledged to promote the objects of the order, and were not allowed to marry again after becoming widows. In the middle of the 13th century this association became an order of penitents, assumed the Dominican rule, and was placed under the Dominican general, receiving the title of "Brothers and Sisters of the Penance of St. Dominic." Other orders, e. g. the Augustines, Minims, Servites, Trappists, etc., subsequently organized associations of Tertiaries. See Musson, *Pragmat. Gesch. d. vornehmst. Mönchsorden*, etc. (Paris, 1751 sq.).—Herzog, *Real-Encyclop.* s. v.

**Tertius** (Τέρτιος, Græcized from the Lat. *tertius*, third; Vulg. *Tertius*) was the amanuensis of Paul in writing the Epistle to the Romans (xvi, 22). A.D. 55. He was at Corinth, therefore, and Cenchræ, the port of Corinth, at the time when the apostle wrote to the Church at Rome. It is noticeable that Tertius intercepts the message which Paul sends to the Roman Christians, and inserts a greeting of his own in the first person singular (ἀντάλλομαι ἐνὶ Τέρτιος). Both that circumstance and the frequency of the name among the Romans may indicate that Tertius was a Roman, and was known to those whom Paul salutes at the close of the letter. Secundus (Acts xx, 4) is another instance

of the familiar usage of the Latin ordinals employed as proper names. The idle pedantry (indulged in by Burmann, *Ezerit. Theol.* ii, 161 sq.) which would make him and Silas the same person because *tertius* and תְּרִיטִי mean the same in Latin and Hebrew, hardly deserves to be mentioned (see Wolf, *Curæ Philologica*, iii, 295); and equally idle is Roloff's conjecture (*De Trib. Nomin. Pauli* [Jen. 1731]) and Storck's (*Ezerit. de Tertio*, in the *Fortges. nitzl. Samml.* p. 23) that Tertius is but a pseudonym for Paul himself. In regard to the ancient practice of writing letters from dictation, see Becker's *Gallus*, p. 180. No credit is due to the writers who speak of him as bishop of Iconium (see Fabricius, *Lux Evangelica*, p. 117).—Smith. See also Briegleb, *De Tertio* (Jen. 1754); Eckhard, *De Signo Pauli* (Viteb. 1687); Hertzog, *De Subscriptionibus Pauli* (Lips. 1703). See PAUL.

**Tertre**, JACQUES (as a priest JEAN BAPTISTE) DU, a French missionary, was born at Calais in September, 1610. After travelling for some time, he returned to France, and entered the Dominican order at Paris in 1635. Five years after he was sent as a missionary to the American islands, returned to France in 1658, and died at Paris in 1687. He published *Histoire Générale des Antilles Habitées par les François* (1667-71, 4 vols. 4to). See Hoefer, *Nouv. Biog. Générale*, s. v.

**Tertullian(us)**, QUINTUS SEPTIMIUS FLORENS, is the most ancient of the Latin fathers whose works are now extant, and one of the most noteworthy personages belonging to the early Church. Our knowledge of his personal history is extremely limited. He was born at Carthage in A.D. 160, or near that date, his father being a Roman centurion in the service of the proconsul of Africa. His natural endowments were great, and they were supplemented by a comprehensive course of studies whose fruit appears in the wealth of historical, legal, philosophical, physical, and antiquarian elements contained in his writings. He was destined for the civil service of the empire, and was accordingly trained in Roman jurisprudence and the art of forensic eloquence (comp. Eusebius, *H. E.* ii, 2, where Tertullian is described as one of the most highly esteemed Romans—not as Rufinus renders it, "one of the most distinguished writers of the Latin Church"—"inter nostros scriptores admodum clarus"). His mode of argumentation and terminology everywhere reveal the legal turn of his mind, and his writings in many places throw light on disputed points of the Roman civil law.

Tertullian was converted to Christianity when between thirty and forty years of age, and he immediately became its fearless champion against pagans, Jews, and heretics, especially Gnostics. He was the first religious teacher after the apostles who attained to a clear recognition of the mighty contrast between sin and grace, and who presented it in all its force to the mind of the Church. He was married (see his tract *Ad Uxorem*), but nevertheless entered the ranks of the clergy. Jerome says that he was first a presbyter of the Catholic Church, but his own writings do not determine whether he was a member of the spiritual order prior to his lapse into Montanism or not. It is certain, however, that he sojourned for a time in Rome (see *De Cultu Fem.* c. 7; Eusebius, *H. E.* ii, 2).

The transition to Montanism occurred a few years after Tertullian's conversion, and about A.D. 202. The act doubtless had its origin in his eccentric disposition and rigorous moral views, which predisposed him to regard that heresy with favor and to dislike the Roman Church. Jerome attributes it to personal motives excited by the jealousy and envy of the Roman clergy, and modern writers have ascribed it to disappointed ambition. We know, however, that the penitential discipline of the Church was administered at Rome with exceeding laxity, and that such indifference was an abomination in the eyes of Tertullian (*Philosophumena* [ed. Miller, Oxon. 1851], ix, 290). Assuredly he

did not regard Montanus as the Paraclete. He recognised in the latter simply an inspired organ of the Spirit. He, rather than Montanus, became the head of the Montanistic party in Africa, giving to their undefined views a theological character and a conceded influence over the life of the Church, and establishing it on foundations sufficiently firm to enable it to protract its being down to the 5th century. He died in old age, between A.D. 220 and 240. The assertion that he returned to the Catholic Church before he died is sometimes made, but cannot be substantiated, and the continued existence of the sect of Tertullianists would seem to contradict the assumption (see Neander, *Tertull.* [2d ed.], p. 462; August. *De Her.* H. 86). It is a significant fact, and an argument in behalf of the liberal interpretation of ancient Church history for which Protestantism contends, that it was precisely this great defender of Catholic orthodoxy against Gnostic heresy who was a schismatic to such a degree that he has never been included by the Church of Rome among the number of her saints, or among that of the *patres* as distinguished from the mere *scriptores ecclesiastici*.

As a writer, Tertullian was exceedingly fresh and vigorous, but also angular, abrupt, and impetuous. He possessed a lively imagination, a fund of wit and satire, as well as of acquired knowledge, and considerable depth and keenness; but he was deficient in point of logical clearness and self-possession, as well as of moderation, and of a thorough and harmonious culture. He was a speculative thinker, though the bitter opponent of philosophy. His aspiring mind sought in vain for adequate language in which to express itself, and struggled constantly to force the ideas of Christianity within the forms of the Latin tongue. His style thus became exceedingly forcible, nervous, vivid, concise, and pregnant. His adversaries were assailed without mercy and with all the weapons of truth and of art, and nearly always appear in his writings in ridiculous plight. He was the direct opposite to Origen, holding the extreme position of realism on the borders of materialism. He was, furthermore, the pioneer of orthodox anthropology and soteriology, the teacher of Cyprian, and forerunner of Augustine, in the latter of whom his spirit was reproduced in twofold measure, though without its eccentricities and angularities. It is possible, also, to trace resemblances between him and Luther with respect to native vigor of mind, profound earnestness, unregulated passion, polemical relentlessness, etc.; but the father lacked the childlike amiability of the Reformer, who was both a lion and a lamb.

Tertullian's writings are usually of brief extent, but they traverse nearly all fields of the religious life, and they constitute the most prolific source for the history of the Church and of doctrines in his time. No satisfactory classification of them can be executed, because but few of them afford the necessary data on which to base a scheme. The classification here presented rests upon the nature of the several writings as being either Catholic or Anticatholic, in which light the former are considerably more numerous than the latter.

(I.) *Catholic Writings, or such as Defend Orthodox Christianity against Unbelievers and Heretics.*—Most of these works date from the Montanist æra of the author's life.

1. *Apologies against Pagans and Jews.*—First of all, the *Apologeticus*, addressed to the Roman magistracy, A.D. 198 (Möhler) or 204 (Kaye), and forming one of the best rebuttals of the charges raised by the heathen of the time against Christianity. Similar in character are the *Ad Nationes Libri II.* In *De Testimonio Animæ* the author develops an argument for the unity of God and the reality of a future state from the innate perceptions and feelings of the soul. In the work *Ad Scapulam* he remonstrates with the African governor of that name, who was bitterly persecuting the Christians. The *Adversus Iudeos Liber* draws from the Old-Test. prophets the proof that the Messiah has appeared in the

person of Jesus of Nazareth (comp. Hefele, *Tertull. als Apologet*, in the *Tüb. Quartalschrift*, 1838, p. 30-82).

2. *Doctrinal and Polemical Writings Aimed against Heretics.*—Here belongs, first, the *De Præscriptione Hæreticorum*, or rules to be observed by Christians in dealing with heretics. The argument involves, as its fundamental principle, the idea that heretics, as innovators, are under the necessity of proving their positions, while the Catholic Church is assured in its sole right to the allegiance of Christendom by the uninterrupted current of apostolic tradition and an unimpaired succession, so that it need not enter into controversy with heretics. After the defection to Montanism, Tertullian wrote against various individual heretics, e.g. in the fifteenth year of Septimius Severus (A.D. 207 or 208), *Adversus Marcionem Libri V.* his most extensive and learned polemico-dogmatical work, and a principal source for the study of Gnosticism:—*Adversus Hermogenem*, a painter at Carthage, who had adopted the dualistic theory of the eternity of matter:—*Adversus Valentinianos*, a tragico-comical representation of the Valentinian Gnostics:—and *Scorpiae*, an antidote against the scorpion-poison of such heretics.

Particular Gnostical doctrines are assailed in *De Baptismo*, a defence of water-baptism against the Cainites and their peculiar theory of a mystical spiritual baptism:—*De Anima*, an inquiry into the nature, etc., of the soul:—*De Carne Christi*, a defence of the true humanity of Christ:—and *De Resurrectione Carnis*, a confutation of the heresy which denied the resurrection of the body. The tract *Adversus Praxeam* assails the Phrygian Antimontanist Praxeas, and confutes his patripassionist errors in the interest of the orthodox view of the Trinity.

3. *Ethical and Ascetical Writings.*—This class is composed of works of small size, but of considerable value to the regulation of practical life and the administration of ecclesiastical discipline. The list includes, *De Oratione*, an exposition of the Lord's Prayer and rules for prayer and fasting:—*De Spectaculis*, a warning against theatrical exhibitions:—*De Idololatria*:—*Ad Uxorem Libri II.*, advice to his wife to govern her action in case she should outlive him:—*De Penitentia*, a Catholic and Antimontanist presentation of the doctrine of repentance, dating from the earlier period of his Christian life:—*De Patientia*, a commendation of the virtue of patience, accompanied with a lamentation because of his own lack of that virtue:—*Ad Martyros*, an exhortation addressed to the confessors who in the time of Septimius Severus awaited in prison the martyr's death.

(II.) *Anticatholic Writings, in which Montanistic Divergences from Catholic Customs are Expressly Defended.*—*De Pudicitia*, a retraction of the principles laid down in the earlier work *De Penitentia*, and violent advocacy of the rigoristic view on which deadly sins, like murder, adultery, and flight from persecution, should never be condoned:—*De Monogamia*, an emphatic denunciation of second marriages (comp. Hauber, in *Stud. u. Krit.* 1845, No. 3):—*De Exhortatione Castitatis*, in which three degrees of chastity are distinguished—the first, absolute and lifelong restraint; the second, continence from the time of baptism; the third, refraining from contracting a second marriage:—*De Virginitate Velandis*, denouncing the habit of unmarried women appearing in public unveiled as being contrary to nature, the will of God, and the discipline of the Church generally:—*De Habitu Muliebri et de Cultu Feminarum* condemns the adorning of the person by females with ornaments, etc.:—*De Jejuniis adversus Psychicos* (Catholics) is a defence of exaggerated fasting:—*De Fuga* denies the right of Christians to flee from persecution:—*De Corona Militis* commends a Christian soldier who refused to wear the festive chaplet on a great occasion and suffered punishment for his act:—*De Pallio* is a witty explanation of his conduct in wearing the *pallium* instead of the ordinary Roman *toga*, difficult for us to understand because of its numerous allusions to obscure customs of the time.

The earliest edition of the collected works of Tertul-

lian was that of Beatus Rhenanus (Basle, 1521). It was followed by those of Pamelius (Antw. 1579), Rigaltius (Paris, 1634; Venice, 1744), Semler (Halle, 1770-73, 6 vols.), Leopold in Gersdorf, *Bibl. Patr. Eccl. Latin. Selecta* (Lips. 1839-41), parts iv-vii, and Migne (Paris, 1844). The latest and best edition is that of Oehler, *Q. Sept. Florent. Tertull. etc.* (Lips. 1853, 3 vols.). Vol. iii contains the dissertations on Tertullian of Pamelius, Allix, Nic. de Nourry, Mosheim, Nösselt, Semler, and Kaye. The life of Tertullian has been written by Neander, *Antignosticus, Geist des Tertul. u. Einl. in dessen Schriften* (Berl. 1825; 2d ed. 1849); Hesselberg, *Tertullian's Lehre* (Dorpat, 1848), pt. i, "Life and Writings;" Kaye [Anglican bishop of Lincoln], *Eccl. Hist. of the 2d and 3d Centuries Illust. from the Writings of Tertullian* (Lond. 1845; 3d ed. 1848). See Möhler, *Patrologie* (ed. Reithmayr, Ratisbon, 1840), i, 701-790; Böhringer, *Kirche Christi* (Zurich, 1842), I, i, 270-374; Hase, *Kirchengesch.* (7th ed.), § 84, p. 109; Kurtz, *Handb. d. Kirchengesch.* (3d ed.), i, 307; Hauck, *Tertullian's Leben und Werke* (Erlang. 1877); Herzog, *Real-Encyclop.* s. v.; Smith, *Dict. of Gr. and Rom. Biog.* s. v.

**Tertul'us** (Τέρτυλλος, a diminutive from the Roman name *Tertius*, analogous to *Lucullus* from *Lucius*, *Fabullus* from *Fabius*, etc.), "a certain orator" (Acts xxiv, 1) who was retained by the high-priest and Sanhedrim to accuse the apostle Paul at Caesarea before the Roman procurator Antonius Felix. A.D. 55. See PAUL. He evidently belonged to the class of professional orators, multitudes of whom were to be found not only in Rome, but in other parts of the empire, to which they had betaken themselves in the hope of finding occupation at the tribunals of the provincial magistrates. Both from his name, and from the great probability that the proceedings were conducted in Latin (see especially Milman, *Bampton Lectures for 1827*, p. 185, note), we may infer that Tertullus was of Roman, or at all events of Italian, origin. The Sanhedrim would naturally desire to secure his services on account of their own ignorance both of the Latin language and of the ordinary procedure of a Roman law-court; for the Jews, as well as the other peoples subject to the Romans, in their accusations and processes before the Roman magistrates, were obliged to follow the forms of the Roman law, of which they knew little. The different provinces, and particularly the principal cities, consequently abounded with persons who, at the same time advocates and orators, were equally ready to plead in civil actions or to harangue on public affairs. This they did, either in Greek or Latin, as the place or occasion required.

The exordium of his speech is designed to conciliate the good will of the procurator, and is accordingly overcharged with flattery. There is a strange contrast between the opening clause—πολλῆς εὐχῆς τυγχάνοντες διὰ σοῦ—and the brief summary of the procurator's administration given by Tacitus (*Hist.* v, 9): "Antonius Felix per omnem sævitiam ac libidinem, jus regium servili ingenio exercuit" (comp. Tacit. *Ann.* xii, 54). But the commendations of Tertullus were not altogether unfounded, as Felix had really succeeded in putting down several seditious movements. See FELIX. It is not very easy to determine whether Luke has preserved the oration of Tertullus entire. On the one hand, we have the elaborate and artificial opening, which can hardly be other than an accurate report of that part of the speech; and, on the other hand, we have a narrative which is so very dry and concise that, if there were nothing more, it is not easy to see why the orator should have been called in at all. The difficulty is increased if, in accordance with the greatly preponderating weight of external authority, we omit the words in Acts xxiv, 6-8, καὶ κατὰ τὸν ἡμέτερον . . . ἐρχομαι ἐπὶ σὶς. On the whole, it seems most natural to conclude that the historian, who was almost certainly an ear-witness, merely gives an abstract of the speech, giving, however, in full the most salient points, and those which had

the most forcibly impressed themselves upon him, such as the exordium and the character ascribed to Paul (ver. 5).

The doubtful reading in vers. 6-8, to which reference has already been made, seems likely to remain an unsolved difficulty. Against the external evidence there would be nothing to urge in favor of the disputed passage, were it not that the statement which remains after its removal is not merely extremely brief (its brevity may be accounted for in the manner already suggested), but abrupt and awkward in point of construction. It may be added that it is easier to refer παρ' οὗ (ver. 8) to the tribune Lysias than to Paul. For arguments founded on the words καὶ κατὰ . . . κρίνειν (ver. 6)—arguments which are dependent on the genuineness of the disputed words—see Lardner, *Credibility of the Gospel History*, bk. i, ch. ii; Bisce, *On the Acts*, vi, 16.

We ought not to pass over without notice a strange etymology for the name Tertullus proposed by Calmet, in the place of which another has been suggested by his English editor (ed. 1830), who takes credit for having rejected "fanciful and improbable" etymologies, and substituted improvements of his own. Whether the suggestion is an improvement in this case the reader will judge: "Tertullus, Τέρτυλλος, liar, impostor, from περσολόγος, a teller of stories, a cheat. [Qy.—Was his true appellation *Ter-Tullius*, 'thrice Tully,' that is, extremely eloquent, varied by Jewish wit into Tertullus?]"

**Teschenmacher**, WERNER, a minister of the Reformed Church in Juliers-Cleves-Berg, and a writer of some prominence in ecclesiastical and political literature, was born at Elberfeld in September, 1589. He was educated at Herborn and Heidelberg, and afterwards served the Church from 1610 or 1611 until 1633 in her pulpits, where he gained the reputation of an eloquent and able preacher of the Word. His services were much in request by the churches, Elberfeld, Cleves, and Emmerich, at that time the seat of the Brandenburg government, being his principal fields of labor. He was also greatly esteemed for his fine tact and skill in diplomacy, qualities that led to his selection for the conduct of many affairs in which the preservation and welfare of the Protestant churches of the duchy were at stake during that stormy period of religious wars. He was, however, of hasty temperament and exceedingly self-willed, so that he frequently came into conflict with other clergymen, and occasioned the government, which wished him well, considerable trouble in the effort to sustain him. His retirement from the pulpit was the result of a collision with Stöver, a newly appointed colleague to his charge. He removed to Xanten and gave himself to literary labors until his death, on Good-Friday, April 2, 1638. Teschenmacher's writings are chiefly historical in character, and of brief extent. They are, *Repetitio Brevis Cathol. et Orthodox. Rel. quæ Singularis Dei Beneficio ante Sæculum a Papatu Reform. in Clivia, Julia, Montium Ducatibus*, etc. (Vesellæ, 1635, 43 pp.):—*Annales Eccles. Reformationis Ecclesiarum Clivia*, etc. (1633):—*Annales Clivia*, etc. (1638; 2d ed. by Dithmar, Frankf.-on-the-Oder, 1721), a political work which is still valuable. Works in MS.:—*Sermons*:—*A Commentary on the Epistles to the Corinthians*, in Latin:—*Annulium Eccl. Epitome in qua præcipue Gravissima Questio explicatur de Successione et Statu Eccl. Christ.* etc. An autobiography *in extenso*, and a biography by P. Teschenmacher, are both lost.—Herzog, *Real-Encyclop.* s. v.

**Tessēræ** (tokens). The early Christians, when compelled to travel, were careful to secure a recognition by their fellow-Christians wherever they went. They were always provided with letters of recommendation; and when arriving in a strange town had only to inquire for the church, and to produce these letters, when they were received as brethren, and provided with every accommodation during their stay.

**Test**, the imposition of an oath, or any other act by which the religious principles of any individual are put to proof. Tests and disabilities are distinct from penalties properly so called: it would be absurd to talk of punishing any one for being a woman, a minor, a person destitute of natural capacity, or opportunities of education, etc., on the ground that these are excluded as unfit for certain offices and privileges. Yet test laws do operate as a punishment; not because they are cause of pain, but inasmuch as they tend to produce that change of conduct which punishment is designed to produce.

**Test Acts**, also called CORPORATION ACTS, the popular name given to two English statutes imposing certain oaths on the holders of public offices. Act 13 Charles II, c. 2, directs that all magistrates shall take the oaths of allegiance and supremacy, as well as an oath renouncing the doctrine that it is lawful to take arms against the king; and provides that they must receive the communion according to the rites of the Church of England within a year before election. Act 25 Charles II, c. 1, imposed the like conditions on the holders of all public offices, civil and military, and obliged them, in addition, to abjure all belief in the doctrine of transubstantiation. These acts, which were practically evaded to a large extent by means of an act of indemnity passed every year, were repealed by 9 George IV, c. 17, in so far as regarded the administration of the sacrament, for which a declaration set forth in that act was substituted. A statute of William IV substituted a declaration for an oath in most government offices. A new form of oath has been substituted for the oaths of supremacy, allegiance, and abjuration by 21 and 22 Victoria, c. 48.—*Chambers's Encyclop.* s. v.; see Skeats, *Hist. of Free Churches of England* (see Index).

**Testament** is the frequent rendering, in the New Test., of the Greek διαθήκη (literally a disposal), and both are used in two distinct senses (see Cremer, *Lex. of N.-T. Greek*, p. 576 sq.).

1. The natural, and in classical Greek, as in ordinary English, the only, signification is a devise by will or legacy (Plutarch, *De Adulat.* 28; Plato, *Legg.* 922; Demosth. 1136, 12), and in this sense the word occurs in Heb. ix, 16, 17. See INHERITANCE.

2. But the more common signification in the New Test. is one that has come over from the Sept., which often uses διαθήκη as a rendering of the Heb. בְּרִית, or covenant; and in this sense "testament" is the rendering in the A. V. of the Greek word in Heb. vii, 22; ix, 20; Rev. xi, 19; and especially in the phrase the new testament (Matt. xxvi, 28; Mark xiv, 24; Luke xxii, 20; 1 Cor. iii, 6; Heb. ix, 15 [i. e. "new covenant," as in Heb. viii, 8; xii, 24]), which has gained currency as the title of the Christian Scriptures as a whole. See *New-Englander*, May, 1857, *Lond.* (Wealeyan) *Quar. Rev.* July, 1857. See COVENANT.

**TESTAMENT, OLD AND NEW.** When the books written by the apostles of Jesus Christ, or by apostolic men, came to be placed alongside the sacred books of the Hebrews, as comprising the entire scriptural canon, it became necessary to distinguish the two divisions by appropriate designations. A usage which already prevailed furnished the designations required. The gracious engagements into which God was pleased to enter with individuals and communities bear in the Old Test. the name of בְּרִית, or covenant (q. v.), and to this corresponds the Greek διαθήκη in the Sept. and New Test. Of these covenants two stand out from all the rest as of pre-eminent importance—God's covenant with Israel mediated by Moses, and that covenant which he promised to establish through the Messiah. In the Jewish Scriptures this latter is designated בְּרִית ה' וְיִשְׂרָאֵל, καὶ ἡ διαθήκη (Jer. xxxi, 31), and this, adopted by our Lord (Matt. xxvi, 28), and familiarly used by the apostles (2

Cor. iii, 6; Heb. ix, 15, etc.), would naturally suggest the application of the phrase ἡ παλαιὰ διαθήκη to the former. Among the Jews such expressions as לְחַבֵּר בְּרִית, פְּלָאָהֶם תְּחֵם הַבְּרִית, for the tablets on which the law was inscribed (Deut. ix, 9); וְכָתוּב בְּרִית, בִּיבְלִיֹן תְּחֵם הַבְּרִית (Exod. xxiv, 7; 2 Kings xxiii, 21; 1 Mac. i, 57), βιβλος διαθήκης (Ecclus. xxiv, 23), were in common use. From these it is an easy transition to such an expression as that of the apostle (2 Cor. iii, 14), ἡ ἀνάγνωσις τῆς παλαιᾶς διαθήκης, where the name appropriate to the thing contained is used of that which contains it. There thus arose in the Greek Church the usage of the phrases ἡ παλαιὰ διαθήκη and ἡ καινὴ διαθήκη as designations of the Jewish and Christian sacred writings respectively. In the Latin Church the usage prevailed of calling these *Vetus et Novum Testamentum*. Why the word *Testamentum* was selected to represent διαθήκη rather than *Fœdus* or *Pactum* may be explained by the fact that the former rather than the latter is the proper equivalent of the Greek word. Hence in the old Italia made from the Sept. it is always used where the Greek has διαθήκη; and in the Vulgate it is used similarly in those books that remain in the old version, whereas in those which Jerome translated from the Hebrew בְּרִית is represented by *fœdus* or *pactum*. That this usage was an early one in the Latin Church is evident from the words of Tertullian (*Adv. Marc.* iv, 1): "Duos Deos dividens (Marcion) alterum alterius Instrumenti vel, quod magis usus est dicere, Testamenti." The use of *Testamentum*, however, does not seem to have been universally accepted till a much later period. In the passage quoted Tertullian evidently gives the preference to the word *instrumentum*, a term used technically to denote a writing by which anything is to be attested or proved (comp. Quintil. *Inst. Orat.* xii, 8, 12); and this is the word he generally uses (comp. *Adv. Marc.* iv, 2; *De Pudic.* c. 12, etc.). Rufinus also has "novum et vetus instrumentum" (*Expos. Symb. Apostol.*); and Augustine uses both *instrumentum* and *testamentum* in the same context (*De Civ. Dei*, xx, 4). Lactantius, however, freely uses *testamentum* as a well-accredited term when he wrote (*Inst. Din.* iv, 20).

From the Vulgate and the usage of the Latin fathers, *Testament* has naturally passed into the title of the two divisions of the Scriptures in the English and most of the European versions. See NEW TESTAMENT; OLD TESTAMENT.

**Testaments of the Twelve Patriarchs**, *THE*, is one of the seventy-two Apocryphal books of the Old Test. which were at one time in circulation, and, according to Epiphanius (*Lib. de Mensuris et Ponderibus*, § 10), it formed one of the twenty-two canonical books sent by the Jews to Ptolemy, king of Egypt. See APOCRYPHA.

I. *Author of the Work and his Object.*—There can be no dispute that the writer's main object and purpose was the conversion of the Jewish nation to the Christian faith. To gain his object his appeal is based not on the authority of Moses or the law of Sinai, but is referred back to the earlier period of the patriarchs, where, underlying the simple covenant between God and man, were latent the first germs of Christianity. From this it has been inferred that the writer himself was a Jew. Grabe, the first who treated at length of the Testaments, thought that the writing in question was the work of a Jew shortly before the Christian æra; and to account for the presence of passages which no Jew could possibly have written, he had recourse to the theory of interpolation. This opinion, however, has found but little favor, and critics have generally agreed to the conclusions of Nitzsch, who definitely attributed the work to a Judæo-Christian writer, an opinion adopted now even by Ritschl, who in 1850 maintained that author was a Christian of Pauline tendencies. Without entering upon the different views advanced on this point, we pass on to the

II. *Time of Composition.*—That it was not composed before A.D. 70 we may infer from the author's allusion to the destruction of Jerusalem, which assigns to the *Testaments* a date subsequent to this event. On the other hand, it is already quoted by Tertullian (*Adv. Marc.* v, 1; *Scorp.* c. 13) and Origen (*Hom. in Jos.* xv, c. 6); and thus we may safely infer, without quoting the different opinions, that the most probable date for its composition is 80–110 or 120 of our era.

III. *Language in which the Work was Written.*—The *Testaments*, as we have it now, was no doubt written in the Hellenistic Greek, in which we now possess the work. Grabe maintained that it was originally written in Hebrew and was translated into Greek with the canonical books of the Old Test. But against this view it has been argued that already the title of the book, *αἱ διαθήκαι τῶν υἱῶν Πατριάρχων*, indicates its Greek original, because the Hebrew בְּרִיתֹת אוֹתוֹ would have been presented by the Greek *εὐλογίαι, ἐντολαί, or μαρτύρια*. We also find a number of instances of paronomasia, hardly possible on the hypothesis of a Hebrew original. Such are ἀδερεῖν . . . νουδερεῖν, ἀφαίρεσις . . . ἀναίρεσις (*Test. Judah*, note 23), λιμός . . . λοιμός (*ibid.*); ἡν τάξει . . . ἡν ἁκτον (*Naphth.* note 2), τάξις . . . ἀταξία (*ibid.* 3). We find various expressions pertaining to the Greek philosophy, as διάθεσις, αἰσθησις, φύσις τέλος, διαβούλιον, συμβουλευεῖν τι. Taking all in all, we are led to the supposition that it was originally written in Greek (see Nitzsch, *De Test. XII Patr.* [Wittemb. 1810], p. 16; Vorstman, *Disquis. de Testam. XII Patriarch.* p. 8 sq.).

IV. *Contents of the Testaments.*—The work professes to be, as its name implies, the utterances of the dying patriarchs, the sons of Jacob, to their children. In these are given, more or less briefly, the narrative of their lives, with some particulars not to be found in the scriptural account, and there are built thereon various moral precepts for the guidance of their descendants, who may thereby be preserved from the snares into which their fathers fell. "Still," says Vorstman, "all the patriarchs are convinced that their children will deal wickedly, falling away from God, defiling themselves with the sins of every nation. They therefore prophesy what is to come; they foretell the troubles impending on their children. But they venture to raise more joyous strains than these. God himself is to put an end to their troubles; he will visit his people; he will break the power of sin. Prophecies of a Messiah are brought forward by the patriarchs. With such hopes they die. Their discourses, therefore, may justly be called Testaments, when at the point of death they speak to their children their last words. They leave to them nothing save injunctions and prophecies. The words of Benjamin (c. 10) will apply equally to all: ταῦτα γὰρ ἀντὶ πάσης κληρονομίας ὑμᾶς διδάσκω."

V. *Messianic Ideas of the Book.*—The Messianic views are strongly tinged by national feeling. The Messiah, combining in himself the functions of high-priest and of king, is to arise from the tribe of Levi as well as from the tribe of Judah. Still there is a tendency throughout which aims at teaching that his high-priestly office is greater than his kingly one. The Messianic passages having reference to the promised Messiah of Israel may be divided into such as speak of him as divine—as God coming into the world in the likeness of man—and into such as refer to him as man alone. Of the latter we read in *Test. Levi*, c. 16, "And the man (ἄνθρωπος) who reneweth the law by the power of the Most High shall ye call a deceiver; and at last, as ye suppose, ye will slay him, not knowing his resurrection (ἀνάσσημα), wickedly taking the innocent blood upon your own heads. And because of him shall your holy places be desolate." . . . Judah (c. 24) says, "And after these things a star shall arise to you out of Jacob in peace, and a man (ἄνθρωπος) shall rise up of my seed, as a sun of righteousness, walking with the sons of men in

meekness and righteousness, and no sin shall be found in him." Naphtali says (c. 4), "Until the compassion (σπλαγγχνον) of the Lord shall come, a man (ἄνθρωπος) working righteousness and showing mercy to all that are afar off and to those that are near."

Such are the only passages which dwell merely on the human nature of the Messiah. Let us look at those which refer to his divine nature. Thus the patriarch Dan (c. 6) bids his children "draw near to God and to the angel that intercedeth for you (τῷ θεῷ καὶ τῷ ἀγγέλῳ τῷ παραινουμένῳ ὑμᾶς). He is called "the mediator between God and men" (οὗτός ἐστι μεσίτης θεοῦ καὶ ἀνθρώπων). "His name shall be in every place in Israel, and among the Gentiles, Saviour" (τὸ δὲ ὄνομα αὐτοῦ ἔσται ἐν παντὶ τόπῳ Ἰσραὴλ καὶ ἐν τοῖς ἔθνεσι Σωτήρ). Levi (c. 4) speaks of the Messiah as υἱὸς Κυρίου. Simeon (c. 6) speaks of "the Lord, the Great God of Israel, who shall appear upon the earth as man, and who shall save all the Gentiles and the race of Israel." Judah (c. 22) tells his children, "Among the Gentiles shall my kingdom be consummated, until the salvation shall have come to Israel; until the appearing of the God of righteousness to give quietness in peace to Jacob and all nations." Asher (c. 7) tells his children that they should be dispersed throughout the world until "the Most High should visit the earth, himself coming as a man (ἄνθρωπος), eating and drinking with men. . . . He shall save Israel and all the Gentiles; God speaking in the person of man" (θεὸς εἰς ἄνδρα ὑποκρινόμενος). Joseph (c. 19) says to his children, "And I saw that from Judah was born a virgin wearing a linen garment, and from her went forth a lamb without spot" (ἄμων ἀμωτός). That reference is here made to the sinlessness of the Messiah there can be no doubt. Hagenbach (in his *Dogmengeschichte*, p. 143, ed. 3) refers to Hippolytus as furnishing the first instance of the application of the word "spotless" to our Lord, but we have here an earlier example. Thus Benjamin (c. 3) speaks of "the Lamb of God and the Saviour of the world," that "spotless he shall be delivered up for the wicked, and sinless shall he die for the ungodly." Levi tells his children that they shall slay the Messiah and "wickedly take the innocent (ἀσφός) blood upon their heads." Judah (c. 24) says, "No sin shall be found in him."

As to the office of the Messiah, he is continually spoken of both as king and high-priest (*Sim.* c. 7; *Gad*, c. 8; *Dan*, c. 5; *Jos.* c. 19). As king springing from the tribe of Judah (*Sim.* c. 7), he is to wage war and to triumph over Beliar, the personification of the kingdom of evil (*Levi*, c. 18; *Dan*, c. 5, 6; *Benj.* c. 3). As high-priest he was to have no successor (*Levi*, c. 18), i. e. with him the offering of sacrifices was to come to an end. The Messiah is a Saviour; Levi is bidden to "proclaim concerning him who shall redeem Israel" (c. 2; *Dan*, c. 5; *Jos.* c. 19; *Benj.* c. 3); and another patriarch adds, "He that believes in him shall reign in truth in the heavens" (*Dan*, c. 5). The Messiah was to suffer: "Thy sons shall lay hands upon him to crucify him" (*Levi*, c. 4); "and he shall enter into the front of the Temple (τὸν πρῶτον ναόν), and there shall the Lord be treated with outrage and he shall be lifted up upon a tree" (*Benj.* c. 9; see also *Levi*, c. 10, 14, 16). The rending of the Temple veil is alluded to as the act in which the Spirit of God went over to the Gentiles: "The veil of the Temple shall be rent," says Benjamin (c. 9), "and the Spirit of God shall be removed unto the Gentiles as fire poured forth." Levi (c. 10) says, "The veil of the Temple shall be rent, that it shall not cover your shame." As to the Messiah's ascension and triumphant reception into heaven, see *Levi*, c. 18; *Benj.* c. 9. That he was to return to future judgment, comp. *Levi*, c. 16.

VI. *Dogmatical and Ethical Ideas.*—The salvation of the Messiah is to be obtained by faith as the means of justification with God: The kingdom of evil is to come to an end "on the day on which Israel shall believe" (*Dan*, c. 6). "As many as have believed in him on earth shall

rejoice with him when all shall rise again, some to glory and some to shame" (*Benj.* c. 10). Allusion is made to the importance of baptism for this end. Thus Levi (c. 16) tells his children the punishment that shall befall them for their treatment of the Messiah: "Ye shall be a curse among the Gentiles and shall be scattered abroad until he shall again visit you and in pity shall take you to himself *ἐν πίστει καὶ ἔδῳ*." The same patriarch (c. 18) again says of the Messiah, "In water shall he himself give the glory of the Lord of his sons in truth forever." Both the righteous and the wicked shall rise again; the former to rejoice with the Messiah, the latter to weep and lament and to be destroyed forever (comp. *Judah*, c. 25; *Sim.* c. 6; *Levi*, c. 18; *Zeb.* c. 10). Benjamin declares (c. 10), "Then shall ye behold Enoch, Noah, Shem, and Abraham and Isaac and Jacob, arising on the right hand in joy; then shall we also arise, each one in our tribe, and worship the king of heaven. . . . And as many as believed on him upon earth shall rejoice with him when all shall arise, some to glory and some to contempt. And the Lord shall judge Israel first, even for the wrong they did to him; for when he came as a deliverer, God in the flesh, they believed him not. And then shall he judge all the nations, as many as believed him not when he appeared upon earth."

Man, who has been formed in the image of God (*Naph.* c. 2), is composed of two parts, body and spirit, conformable to each other. To man seven spirits were given at his creation by God, in themselves not necessarily either good or bad, referring, as they do, mainly to external sensations. These spirits were *ζωή* (i. e. the *ΨΔ*, the mere animal life), *ὄρασις*, *ἀκοή*, *ὁσφρησις*, *λαλίη*, *γεύσις*, and *σπορά*, all of which, as *ζωή*, refer exclusively to the mere animal life of man, as does also a supplementary eighth spirit, that of *ὑπνος*. Superadded to these are seven other spirits, given to man by Beliar, representing seven principal evil tendencies (*Reub.* c. 2, 3). The latter, which are spoken of generally as *τὰ πνεύματα τῆς πλάνης*, are wholly bad, and represent different evil tendencies of humanity. They are the spirits of *πορνεία*, *ἀπληστία*, *μάχη*, *ἀμεσκέα* or *μαγγανία*, *ὑπερηφάνια*, *ψεύδος*, and *ἀδικία*. Within man war is waged by his two selves. Judah speaks of the two spirits that "attend (*συχολάζουσι*) upon man, the spirit of truth and the spirit of error; and in the midst is the spirit of the understanding of the mind," which may turn to either side it will (c. 20). The spirit of truth seems to be almost equivalent to conscience, for it is added "The spirit of truth testifieth all things, and accuseth all." Reuben, too, speaks of his conscience (*συνειδήσις*) troubling him all his life long for his crime of incest. Man has a free will to choose between the two ways that God has given to him. He can choose either "the darkness or the light, either the law of the Lord or the works of Beliar" (*Levi*, c. 19); and, though man is weak and ever prone to error, yet if he persevere in his attempts to do right, "every spirit of Beliar will fly" (*Sim.* c. 2, 5; *Judah*, c. 18, 19, 21; *Isaach.* c. 7; *Zeb.* c. 9; *Gad*, c. 4) from him.

Sin, therefore, being especially regarded as proceeding from *τὰ πνεύματα τῆς πλάνης*, is constantly spoken of as *ἄγνοια*, *τόφλωσις*, and the like, for which pardon is readily granted by God. Ignorance, however, though affording a plea for pardon, cannot of itself be accounted an excuse for the sin; the appeal is still to be made to the mercy of God. But as from sins ignorantly committed man passes on to those done against light and knowledge, so is there a deeper cast of sins than *ἄγνοια*. Thus it was *ἄγνοια* on the part of Zebulon (c. 1; comp. *Dan*, c. 1; *Gad*, c. 2) not to reveal to his father his brethren's crime of selling Joseph; that crime, however, was *ἄνομια* on their part. And this is alike true for a sin actually committed and for one as yet in embryo in the thoughts of the heart; for Simeon (c. 2), whose hatred for Joseph had led him to contemplate the sin of murder, is accounted in God's sight guilty of that

crime, and therefore punished. We see here the doctrine of the apostle endorsed: "He that hateth his brother is a murderer."

The doctrine of God's retributive justice is fully believed in. Sin brings its own punishment in this world (comp. *Reub.* c. 1; *Sim.* c. 2; *Gad*, c. 5), therefore man should follow God's laws (comp. *Reub.* c. 4; *Sim.* c. 4; *Levi*, c. 13; *Benj.* c. 3; *Zeb.* c. 8). The fear of God appears as the chief motive for the fulfilment of righteousness (comp. *Reub.* c. 4, *πορεύεσθε ἐν ἀπλότῃ καρδίᾳ, ἐν φόβῳ Κυρίου*; *Sim.* c. 3, *ἡ λύσις τοῦ φθόνου διὰ φόβου Κυρίου γίνεται*; *Gad*, c. 5, *ὁ φόβος τοῦ Θεοῦ νικά τὸ μῖσος*; *Benj.* c. 3, *ὁ γὰρ φοβούμενος τὸν Θεόν, καὶ ἀγαπῶν τὸν πλησίον αὐτοῦ, ὑπὸ τοῦ ἀριού πνεύματος τοῦ Βελιάρ οὐ δύναται πληγῆναι*; *Jos.* c. 11; *Levi*, c. 13).

It is also worthy of remark that most of the patriarchs dwell more especially on some one particular form of vice to be shunned, ordinarily that vice wherein each severally had succumbed to temptation. Thus the system of ethics which prevails throughout the *Testaments* presents a very high and noble code of morals to us, not unworthy of a teacher who sought to win over his countrymen to the Christian faith.

VII. *Sources*.—Having given, in the main, an outline of the most important points contained in the *Testaments*, the question as to the sources for the work cannot be superfluous. From the work itself we infer that the book of Enoch must have been known to the author. Thus seven Testaments out of twelve allude to it as *γραφὴ Ἐνώχ*, *βιβλος* (*βιβλίον*, *βιβλία*, *λόγοι*) *Ἐνώχ τοῦ δικαίου*, *γραφὴ νόμου Ἐνώχ* (see *Sim.* c. 5; *Levi*, c. 9, 10, 14, 16; *Naph.* c. 4; *Judah*, c. 18; *Dan*, c. 5; *Benj.* c. 9), and other similar expressions. Zebulon refers to the *γραφὴ πατέρων* (c. 9), and Levi (c. 5) and Asher (c. 7) refer to *αἱ πλακεῖς τῶν οὐρανῶν*, "heavenly tablets." As to the latter, whether they were a book containing what is foreknown and foreordained in heaven as to the course of the future, and were appealed to when some oracular declaration of weighty import was needed, or whether they were something else, we are at a loss to state, although they are often quoted in the book of Enoch and Jubilees. Besides the works mentioned, there can be no doubt that the author of the *Testaments* knew the book of Jubilees, since the amount of coincidence between the two writings is very great (comp. e. g. *Reub.* c. 3 with *Jubilees*, c. 33; *Levi*, c. 2, 4, 5, 8 with *Jubilees*, c. 32; *Levi*, c. 9 with c. 31; c. 11 with c. 34; *Judah*, c. 3-7 with c. 34, 38; c. 9 with c. 37; c. 10 with c. 41; c. 19 with c. 41; *Reub.* c. 7, *Sim.* c. 8, *Levi*, c. 19, *Judah*, c. 26, *Zeb.* c. 10, *Dan*, c. 7, *Naph.* c. 9, *Gad*, c. 8, *Asher*, c. 8, *Benj.* c. 12 with *Jubilees*, c. 46, etc.). He also made use of the Targums, Josephus, the Midrashim, and the like. Of greater importance is it to know that the author also made use of the New Test., and for the latter fact we refer to the elaborate article of Warfield, *The Apologetical Value of the Testaments of the XII Patriarchs*, in the (N. Y.) *Presbyterian Review*, Jan. 1880, p. 57 sq.

VIII. *History of the Work*.—"Habent sua fata libelli." It is remarkable that this work, which was known to Tertullian (*Adv. Marcionem*, v, 1; *Scorpiae*, c. 13) and Origen (*Hom. in Josuam* x, c. 6), became first known to the world at large through the Latin version of Robert Grosseteste, or Greathead, bishop of Lincoln, of the 13th century. This version soon spread over Europe, and, in the course of time, translations into a large number of languages were made from it—into English, French, German, Dutch, Flemish, Danish, Bohemian, and Armenian. More than four centuries had passed since Grosseteste's Latin version, when at last the Greek text was for the first time published by Grabe, in his *Spicilegium Patrum et Hæreticorum* (Oxford, 1698), from a MS. in the university library of Cambridge, collated with one at Oxford. In 1713 Fabricius published the Greek text in his *Codex Pseudepigraphus V. T.* (Hamburg), adding but slightly to the criticism of the text. In 1714 Grabe published a second edition, re-

taining the true text in several passages, but in many places altering Grosseteste's Latin version, which witnessed to the true reading, to suit Grabe's incorrect text. Fabricius also published a second edition in 1722, on the whole less accurate than his first. Afterwards the text and notes as given in Grabe's second edition were reprinted, with but few additions, by Galland, in his *Bibliotheca Veterum Patrum* (Venice, 1765), i, 193 sq. In 1869 Robert Sinkler published an accurate transcript of the Cambridge MS., carefully collated with the Oxford, to which he added, in 1879, a collation made from two other MSS., viz. a Roman MS. in the Vatican Library (Cod. Græc. 731), and a Patmos MS. in the library of the Monastery of St. John the Evangelist (Cod. 411).

IX. *Versions*.—As already indicated, there existed versions in different languages before the Greek text was published. The editions of the Latin version are numerous. That which is presumably the *editio princeps* bears neither date, printer's name, nor place of printing. The title is *Testamēta duodecim | Patriarcharū | Filiorum Jacob. | e Greco in Latinū | versa Roberto | Lincontensi | Episcopo | interprete*. From this was taken the edition printed at Hagenau in 1532 by John Seckerius, at the instance of Menrad Molther. The work of Julianus Pomerius *Contra Judeos* is published in the same volume. Besides the separate editions, the *Testaments* is published in the *Bibliotheca Patrum*.

In English there exist at least three independent translations—one from the Latin, the others from the Greek. The translation from the Latin first appeared in 1577, and was often reprinted, especially in the 17th century. The first edition is of great rarity, and there exists no copy of it even in the British Museum. The second edition, of 1581, of which there is a copy in the British Museum, has the following title-page:

"The Testaments of the Twelue | Patriarches, the Sonnes of Jacob: translated out of Greeke into Latine by Robert | Grosthead, sometime Bishop of Lincolne, [and out of his copy into French and | Dutch by others: Now eng-lished by A. G.] To the credit whereof an auncient Greeke copie | written in parchment, is kept in the Vni-ersity Library of Cambridge. | At London | Printed by Iohn Daye, dwelling ouer Aldersgate. 1581. | Cum priuilegio Regiæ | Maiestatis."

There are about forty other English editions printed after the year 1581. A translation was made directly from the Greek (of Grabe and Fabricius) by Whiston in his *Collection of Authentic Records belonging to the Old and New Testament* (Lond. 1727), i, 294 sq. In Clark's *Ante-Nicene Christian Library* (vol. xxii), Mr. Sinkler published a translation from his edition of the Greek text. It may be mentioned here that the Muggletonians (q. v.) in England receive the *Testaments of the XII Patriarchs* as inspired, together with the Old and New Testa., the book of Enoch, and the works of Reeve and Muggleton. From the English a Welsh version was published at Carnarvon (1822), *Testament y deuddeg Patriarch, sef Meibion Jacob* . . .

There are at least two translations in French, both taken from the Latin. One was published in 1548 at Paris, another in 1713. The latter was also republished in Migne's *Encyclopédie Théologique*, vol. xxiii (*Dict. des Apocryphes*, vol. i), coll. 854 sq.

In Germany the *Testaments* have evidently been very popular, as may be inferred from the number of editions that have appeared. The oldest German translation is the one published in 1559 at Basel: *Das Testament der zwölf Patriarchen der Sünden Jacobs*; the latest, the one published at Tübingen in 1857, *Aechte apocryphische Bücher der Heiligen Schrift* . . . (ii) *Das T. d. zwölf Patriarchen*.

The Dutch and Flemish editions are also very numerous. There are two editions without any date, but which must have appeared before 1544, since an edition was published in that same year. Altogether there exist about fourteen editions in Dutch and Flemish, the last published in 1679.

The *Testaments* was translated into Danish by Hans

Mogenssön, and four editions of his translation were published, the first in 1580, the last in 1701.

In the Icelandic there exist some MS. translations; but whether one or the other has ever been printed we are at a loss to state.

The Bohemian version can claim to be the first of the translations from the Latin, having been made long before the invention of printing. It is referred to by Thomas Stitný about the year 1376. There exists a MS. at Breslau, in the library of the Dominicans at St. Adalbert, dated 1491, and another in the university library at Prague (xvii, B. 15, No. 6) dated 1465. The oldest printed translation bears the date 1545. Only two copies, each of a different edition, are extant—one in the library of the National Museum at Prague, and the other in the university library there.

An Armenian version exists in MS., dated 887, i. e. A.D. 1388, in the library of the Mechitarists at Vienna, which appears not to have been printed.

X. *Literature*.—Besides Grabe, see Vorstman, *Disquisitio de Testamentorum XII Patriarcharum Origine et Pretio* (Rotterdam, 1857); Nitzsch, *Commentatio Critica de Testamentis XII Patriarcharum*, *Libro V. T. Pseudepigrapho* (Wittenb. 1810); Ritschl, *Die Entstehung der altkatholischen Kirche* (Bonn, 1850); Kayser, in Reuss und Cunitz's *Beiträge zu den theol. Wissenschaften* (Jena, 1851), p. 107–140; Wieseler, *Die 70 Wochen und die 63 Jahrwochen des Propheten Daniel* (Gött. 1839); Langen, *Das Judenthum in Palästina zur Zeit Christi* (Freiburg, 1866), p. 140 sq.; Geiger, *Jüdische Zeitschrift für Wissenschaft und Leben* (Bresl. 1869), p. 116 sq.; Warfield, *The Apologetical Value of the Testaments of the XII Patriarchs*, in the (N. Y.) *Presbyterian Review*, Jan. 1880, p. 57 sq.; but, above all, Sinkler, *Testamenta XII Patriarcharum* (Camb. and Lond. 1869); and his *Appendix* (ibid. 1879). (B. P.)

**Testes Synodales**, persons chosen to help the church-wardens in fulfilling their duties, and in promoting order, quiet, and decorum at visitations, synods, and clerical meetings. They were also called **SIDESMEN**, **synodsmen**, or **QUESTMEN** (q. v.).

**Testimonial**. Every candidate for admission to holy orders in the Church of England is required to present to the bishop a testimonial of good conduct from his college, or from three beneficed clergymen. The usual form of this document is as follows:

"Whereas our well-beloved in Christ, A. B., hath declared to us his intention of offering himself a candidate for the sacred office of [a deacon], and for that end hath requested of us letters testimonial of his learning and good behavior, we, therefore, whose names are hereto subscribed, do testify that the said A. B., having been previously known to us for the space of [three] years last past, hath, during that time, lived piously, soberly, and honestly, and diligently applied himself to his studies: nor hath he at any time, so far as we know and believe, held, written, or taught anything contrary to the doctrine or discipline of the united Church of England and Ireland; and, moreover, we believe him in our consciences to be a person worthy to be admitted to the sacred order of Deacons. In witness whereof," etc.

A similar testimonial is required from candidates by the Protestant Episcopal Church of the United States. As this is one of the safeguards which ecclesiastical rule has established to preserve the purity of its ministers, it would be a fatal error to allow it to become a mere matter of form. No conscientious man can safely sign such a document unless fully assured of the facts to which he bears such solemn testimony.

**Testimony of DISOWNMENT**, an official document issued by the monthly meeting of the Society of Friends against an obdurate and impenitent member. The testimony of disownment is a paper reciting the offence, and sometimes the steps which have led to it; next, the means unavailing used to reclaim the offender; after that a clause disowning him, to which is usually added an expression of desire for his repentance and for his restoration to membership. In case the expelled member repents, he is bound to send in a writ-

ten acknowledgment of his offence, his penitence, and his desire for restoration to the membership of the society.

**Te'ta** (Τῆτά v. r. Ἀρρητά; Vulg. *Topa*), a corrupt Græcized form (1 Esdr. v, 28) of the name **ἡ τῆτα** (q. v.) of the Heb. lists of Temple doorkeepers (Ezra ii, 42; Neh. vii, 45).

**Tetragrammāton** (τέτραπα, *four*, and γράμμα, *letter*), a term to designate the sacred name of the Deity, *Jehovah*, in four letters, יְהוָה. By the possession of this name the early Jewish opponents of Christianity declared that the miracles of Christ were performed. The mystical word *Om* of the Buddhists of India and Thibet is supposed to possess similar virtues to the present day.

**Tetrapla**, a Greek term used to designate a certain edition of the Holy Scriptures, being four independent and separate Greek versions, ranged side by side, viz. those of Aquila, Symmachus, the Seventy-two, and Theodotion.

**Tetrapolitāna Confessio** (also SUEVICA and ARGENTINENSIS) is the title by which the confession of faith submitted to the Diet of Augsburg in 1530 by the four cities of Strasburg, Constance, Memmingen, and Lindau is known.

The endeavor to construct a confession which should fairly represent the views of all the sections of the evangelical party failed through the stubborn refusal of the Saxons to unite in any way with the Zwinglians of the cities, and the Strasburg deputies consequently invited Bucer and Capito to prepare a separate symbol for the use of the latter. Capito had previously prepared a sketch of the Reformed faith by order of the Council of Strasburg, and this paper became the basis of the new confession. The latter was completed by July 11, 1530, and, after having been submitted to the confederated cities and received their signatures (with the single exception of Ulm), was placed in the hands of the imperial vice-chancellor, Merkel, for transmission to the emperor.

The confession contains twenty-three articles, and is characterized by great clearness and moderation of statement, completeness, and thoroughness of elaboration. Its first article asserts the chief formal principle of Protestantism, wholly wanting in the *Augustana*, that the Bible is the only source and rule of doctrine. It teaches that the disciples of Christ partake of his body and blood in the sacrament in a spiritual sense only. The form of expression, however, is everywhere conformed to that of the *Augustana*—a feature which reveals the hand of Bucer (q. v.), who was already at work upon plans for the promotion of union among Protestants.

A reply to this confession, written by Eck, Faber, and Cochläus, was returned Oct. 24. This *Confutation* was filled with perversions and insults, and was read before deputies and theologians of the four cities. A copy of this reply was denied them, but they succeeded in obtaining one, which was appended to the first edition of the *Tetrapolitana*, published in German by Bucer at Strasburg in 1531. A Latin edition followed a month later, in September. Bucer was compelled to publish the confession in order to put an end to false representations of its character; but his own persistent efforts in behalf of union between the Protestant churches contributed to subordinate it to the Saxon confession. In 1532 the Strasburgers consented to subscribe the *Augustana*, though with the express understanding that the *Tetrapolitana* should be regarded as their proper symbol. Finally, when Bucer was dead and Martyr (q. v.) was gone from Strasburg, a rigid Lutheranism took possession of the city. An attempted reprint of the first edition of the *Tetrapolitana* by Sturm in 1580 was prevented by a decree of the council. The last edition, which includes the *Confutation* and *Apology*, appeared, so far as is known, at Zweibrücken in 1604.

For the literature and editions, see Niemeyer, *Collec-*

*tio Confessionum* (Lips. 1840), p. 83 sq.; comp. Baum, *Capito und Bucer* (Elberfeld, 1860), p. 486 sq., 595; Planck, *Gesch. d. prot. Lehrbegriffs* (2d ed. Leips. 1796), III, i, 68 sq.—Herzog, *Real-Encyklop.* s. v.

**Te'trarch** (τετράρχης, from τέτραπα, *four*, and ἀρχή, *government*) properly denotes the governor of a province or district which was regarded as the fourth part of a larger province or kingdom, while the district itself was called a *tetrarchy* (τετραρχία or τετραδαρχία). The earliest use of the word which seems to have been discovered is in connection with the division of Thessaly as originally constituted (Eurip. *Alcest.* 1154; Strabo, ix, 5) and as reconstructed in the time of Philip of Macedon (Demosth. *Phil.* iii, 26), and of Galatia before its conquest by the Romans, B.C. 189. The first of these countries was then divided into four parts, each of which was named a tetrarchy, and its ruler a tetrarch, subordinate to the tagus (Thirlwall, *Hist. of Greece*, vi, 13 sq.). The second was divided into three sections, each of which was again subdivided into four smaller ones, to which and to their governors the same terms were applied (Fischeri *Prolesiones*, p. 428, note); and these were ultimately fused into one *επαρχία* under Deiotarus, cir. B.C. 54 (Strabo, 566; Plutarch, *De V. M.* [ed. Wytt], vol. ii). In the later days of the Roman republic, and during the empire, the etymological meaning was almost entirely lost sight of, and it was applied, like "ethnarch" and "phylarch," to the petty tributaries, "the creatures of a proconsul's breath, and the puppets of his caprice" (Merivale, *Hist. of the Rom.* iv, 167), whose importance did not warrant their receiving the title of "king" (see Sallust, *Catil.* xx, 7; Cicero, *Milo*, xxviii, 76; *Vatin.* xii, 29; Horace, *Sat.* i, 3, 12; Vell. Pat. ii, 51; Tacitus, *Ann.* xv, 25). It is in this secondary sense that in all probability the word is used in the New Test. of the tetrarchs of Syria, the heirs and successors of Herod the Great. Niebuhr (*Hist. of Rome*, ii, 135) compares them to the *zemindars* of Bengal after their recognition by lord Cornwallis (1791-98) as proprietors of the soil, and enjoying some amount of sovereign rights within the limits of their zemindary. The title of tetrarch was certainly given by Antony to Herod the Great in the early part of his career (B.C. 41) and his brother Phasael (Josephus, *Ant.* xiv, 13, 1), without reference to territorial divisions; and though it appears that the tetrarchs Antipas and Philip did actually receive a fourth part of their father's dominions, while Archelaus as "ethnarch" inherited half (*ibid.* xvii, 11, 4; *War.* ii, 6, 3), this correspondence of the name and the share may be considered accidental, or, at furthest, the exact use of the term in the New Test. must be confined to Antipas and Philip.

In the New Test. we meet with the designation, either actually or in the form of its derivative *τετραρχεῖν*, applied to three persons:

1. Herod Antipas (Matt. xiv, 1; Luke iii, 1, 19; ix, 7; Acts xiii, 1), who is commonly distinguished as "Herod the tetrarch," although the title of "king" is also assigned to him both by Matthew (xiv, 9) and by Mark (vi, 14, 22 sq.). Luke, as might be expected, invariably adheres to the formal title which would be recognised by Gentile readers. This Herod is described by the last-named evangelist (iii, 1) as "tetrarch of Galilee;" but his dominions, which were bequeathed to him by his father, Herod the Great, embraced the district of Peræa beyond the Jordan (Josephus, *Ant.* xvii, 8, 1): this bequest was confirmed by Augustus (*War.* ii, 6, 3). After the disgrace and banishment of Antipas, his tetrarchy was added by Caligula to the kingdom of Herod Agrippa I (*Ant.* xviii, 7, 2). See **HEROD ANTIPAS**.

2. Herod Philip (the son of Herod the Great and Cleopatra, not the husband of Herodias), who is said by Luke (iii, 1) to have been "tetrarch of Iturea and of the region of Trachonitis." Josephus tells us that his father bequeathed to him Gaulonitis, Trachonitis, and Paneas (*Ant.* xvii, 8, 1), and that his father's bequest

was confirmed by Augustus, who assigned to him Bata-næa, Trachonitis, and Auranitis, with certain parts about Jamnia belonging to the "house of Zenodorus" (*War*, ii, 6, 3). Accordingly, the territories of Philip extended eastward from the Jordan to the wilderness, and from the borders of Peræa northward to Lebanon and the neighborhood of Damascus. After the death of Philip his tetrarchy was added to the province of Syria by Tiberius (*Ant.* xviii, 4, 6), and subsequently conferred by Caligula on Herod Agrippa I, with the title of king (*ibid.* xviii, 6, 10). See HEROD AGRIPPA I; HEROD PHILIP I.

3. Lysanias, who is said (*Luke* iii, 1) to have been "tetrarch of Abilene," a small district surrounding the town of Abila, in the fertile valley of the Barada or Chrysorrohas, between Damascus and the mountain-range of Antilibanus. See ABILENE. There is some difficulty in fixing the limits of this tetrarchy, and in identifying the person of the tetrarch. See LYSANIAS. We learn, however, from Josephus (*Ant.* xviii, 6, 10; xix, 5, 1) that a Lysanias had been tetrarch of Abila before the time of Caligula, who added this tetrarchy to the dominions of Herod Agrippa I—an addition which was confirmed by the emperor Claudius.

**Tetrastyle** (*τετράστυλον*), a name given to the periphery of the area or court between the porch and the church building proper in ancient times. This court was without any covering except that each side had porticos or cloisters, built upon columns. In the porch or in the porticos stood the first class of penitents to beg the prayers of the faithful as they went into the church.

**Tetzel**, JOHANN, the notorious Dominican monk whose shameless traffic in indulgences impelled Luther to take the first step towards the Reformation, was born and reared at Leipsic, where his father, Johann Tietze, pursued the business of goldsmith. In 1487 Tetzel received the degree of bachelor of philosophy, having distinguished himself in the examination above all the other competitors. He possessed an imposing figure, a sonorous voice, and considerable skill in dialectics and oratory, and was accordingly selected to preach the indulgence connected with the year of jubilee, after he had associated himself with the Dominican fraternity in his native town, and had displayed great zeal in his monastic duties. He entered on the traffic in indulgences in 1502, and prosecuted it to his own great pecuniary advantage and equal notoriety, making use of even blasphemies and obscenities to enforce his appeals for money. Nor was he more circumspect with regard to his conduct. The drinking-rooms of taverns were favorite places of resort in which to ply his trade; he permitted himself to commit crimes of violence; and an adulterous connection with the wife of a citizen led to his being sentenced to death by drowning at Innsbruck. Having been pardoned, and, after a time, liberated from imprisonment, he resumed his traffic, and became, if possible, more bold and shameless than before.

When pope Leo X appointed commissaries for the sale of indulgences for the alleged purpose of obtaining funds with which to complete the edifice of St. Peter's at Rome, Tetzel was made an under-commissary. He held a special concession from the emperor for the prosecution of his business, and after a time obtained a papal brief permitting him to sell indulgences everywhere in Germany. To these advantages he added that of being made an inquisitor. In 1517 he began to issue letters of indulgence in his own name, having previously acted as the agent of archbishop Albert of Mayence. He pro-

nounced absolutions, for money, from the most heinous crimes, without regard to repentance and with the assurance of complete exemption from the fires of purgatory. His peculiarly impudent and frivolous bearing shocked all who possessed intelligence, without at all restraining his conduct, until he arrived on the borders of Saxony. At this point of Tetzel's progress Luther was made aware of the hurtful consequences of his operations through the confessional, and at once denounced the Dominican's business from the pulpit. Tetzel replied, and Luther drew up the famous *Ninety-five Theses*, which Tetzel, for his part, burned in the market-place of Jüterbock. He then obtained the degree of licentiate and doctor of theology from Frankfort-on-the-Oder, in order to combat Luther from a more favorable position, and he enlisted the services of Wimpina, rector of that university, in his cause. The latter drew up 106 theses antagonistic to those of Luther, which were in turn burned by the students at Wittenberg, and afterwards fifty additional theses, upon which Tetzel disputed in January, 1518.

The dispute had in the meantime excited attention in Rome, and aroused the conviction that more positive measures must be employed to preserve the authority of the Church. The negotiations of Cajetan with Luther had failed, and the legate Miltitz was sent to Saxony to manage the affair. Having arrived at Altenberg, the legate cited Tetzel to appear before him; but the latter declined to obey, on the ground that the journey would involve his life in danger at the hands of Luther's adherents. He appeared, however, on the repeated summons of the legate, after the latter had reached Leipsic; and, having been found guilty of immoralities and shameless conduct, was harshly reprimanded and threatened with the anger of the pope and expulsion from his order. He wished to flee from the country in order to avoid the dangers which he now saw to be threatening his peace, but sickened before he could execute his purpose, and died in the Dominican convent at Leipsic in July, 1519. Luther pitied the man in his wretchedness, and forwarded him a letter of consolation. The statement that Tetzel died of the plague is without support.

**Texerants.** A local name given to the ALBIGENSES (q. v.) in those districts of Southern France where the members of that wide-spread sect were mostly found among the weavers—"ab usu texendi" (Ekbert, *Adv. Cathar. in Bibl. Maz. Lugd.* xxiii, 601).

**Text.** The application of the word *text* to the Word of God is derived from the Latin. From the similarity between spinning and weaving, and the art of composition, both in prose and verse, the Latin authors applied to the latter several expressions proper to the former. Horace says, "*Tenui deducta pamauta filo*," and Cicero uses the terms *texere orationem* and *contexere carmen*. Among later Roman writers, *textus* occurs often in the sense of a piece or composition; and, by excellence, came to denote the Word of God, just as the word

Tetrastyle.

a. Church; b. Outer porch; c. Court; dd. Tetrastyle.

*Scriptura* did. The meaning of the words *text* and *gloss* may be ascertained from the method of writing the Scriptures before the art of printing was invented. The following may be taken as a specimen :

(Matt. vii, 23.)

Non novit lux  
tenebras. non  
aspicit, quas al  
spiceret, tene  
bre non essent.

Et tunc confitebor illis quia  
in nulla approbavi, sed reprobovi.  
nunquam novi vos. dis  
cedite à me omnes qui opera  
quia  
non hos novit, ergo ooe, qui mandata  
ejus custodiunt  
mini iniquitatem.

qui operamini,  
non dicit, qui  
operati estis,  
ne tollat peni  
tentiam, sed  
qui in iudicio  
licet non ha  
bentia faculta  
tem peccandi  
tamen habetis  
affectum.

The sentences at the sides are the *gloss*; the middle, which is in larger type, is the *text*; and between the lines of that is put the *interlinear gloss*, in which place a translation, or version, in some ancient manuscripts in the Cottonian and other libraries, is sometimes inserted. The *text* here means the Word of God, as opposed to the *gloss*; and because the text was usually written in a large and strong hand, hence such writing was called *text-hand*. By *gloss* was generally meant a commentary or exposition taken out of the Latin fathers; but afterwards it came to signify any exposition or larger commentary. Hence our English phrase, to *put a gloss on anything*, that is, a favorable construction; *gloss*, a shining outside; and to *glose*, to flatter.

**TEXT OF SCRIPTURE.** This term is used to signify a *portion* of the text; i. e. a short sentence out of Scripture, used either as the groundwork of a discourse from the pulpit, or brought forward to support an argument or in proof of a position. The custom of taking a text for a sermon is probably coeval with that of preaching set discourses; and the use of texts as authority in doctrinal points is of the very essence of true theology, and was ever the custom even of those who, professing the name of Christians, denied the truth of Christ. One must therefore be on his guard against receiving everything for which a text is quoted, not accepting it as proof until its true sense is known; "otherwise, so many sentences, so many authorized falsehoods." In the application of a text we should always consider its meaning in the passage with which it is connected, else we may be putting forward as truth what is in fact but an authorized falsehood; we should also guard against the practice of taking a text from Scripture in a sense which, however sound and true, is not that of the passage itself, as, for instance, "Hear the Church," employed as if it were a precept, in the imperative mood. The non-observance of the latter caution has a tendency to lead others to the neglect of the former.

**Textus** is a technical term for the book of the Gospels as used at the Christian sacrifice. Copies of the Gospels, richly illuminated, and bound in gold and silver, are often exposed on the high-altars of Continental churches. Sometimes they are kept in shrines, and only brought out for use in the mass at the highest and most important festivals. References to such exist in large numbers in early writers, and many remarkable examples are preserved in the sanctuaries on the Continent, two of which, at Aix-la-Chapelle and Mayence, are known to antiquaries. Numerous rich examples are reckoned up among the treasures of old St. Paul's in London, Lincoln Minster, and Salisbury Cathedral. That in the wood-cut at head of next column is from an early Flemish specimen.

**Textus Receptus** (i. e. *the received text*), a phrase generally employed by critics to denote the currently accepted text of the Greek Testament. This is usually considered to be that of the Elzevirs, especially the edition of 1633, the preface of which contains the expression "*Editionem omnibus acceptam denuo doctorum oculis subjecimus*," referring to the edition of which that was a reprint. The most commonly printed text, however, is that of Stevens, usually Mills's edition.

Illumination of an Ancient *Textus*, or Book of the Gospels.

Sometimes the phrase *textus receptus* is in like manner extended to the Masoretic text of the Hebrew Bible, especially Van der Hooght's edition, which has been reprinted by Hahn. See CRITICISM, BIBLICAL.

**Tezcatlipoca** (*Shining Mirror*), the chief of the thirteen greater gods of the ancient Mexicans. On the monuments and in the paintings he is often represented as encircled by the disk of the sun. Lord Kingsborough (*Antiquities of Mexico*) states that "all the attributes and powers which were assigned to Jehovah by the Hebrews were also bestowed upon Tezcatlipoca by the Mexicans." Mr. Hardwick, however, inclines to the belief that this deity was merely the deified impersonation of the generative powers of nature, and as such his highest type was the sun. A festival in his honor was held annually in May, when a young and beautiful person was sacrificed, and the heart of the victim, still warm and palpitating, was held up towards the sun, then thrown down before the image of the god, while the people bowed in adoration.

**Thaborium** (Θαβώριον or Μεταμόρφωσις, *Festum Transfigurationis*, s. *Patefactionis Christi*), the Feast of the Transfiguration of Christ. It was exalted to a feast of universal observance by pope Calixtus III in 1457, the day assigned to it being August 6. The ancient Church had not altogether ignored, but none the less greatly neglected, its observance. The purpose of its modern revival was the commemoration, first, of the transfiguration of Christ, and second, of the defeat of the Turks at the siege of Belgrade in 1456. See Augusti, *Christl. Archæologie* (Leips. 1820), iii, 292 sq.; Herzog, *Real-Encyclop.* s. v.

**Thacher, George, D.D.**, a Congregational minister, was born in Hartford, Conn., July 25, 1817. His early education was received at Hopkins Grammar-school, Hartford. He was graduated from Yale College in 1840, and in the same year entered Yale Theological Seminary, where, after a full three years' course of study, he was regularly graduated in 1843. His first pastorate was at Derby, Conn., where he went in June, 1843; on Jan. 4, 1844, he was ordained, preaching there until Oct. 10, 1848, when he was dismissed. He next received and accepted a call to Nantucket, Mass., where he was installed Nov. 14, 1848, and remained until May 14, 1850, when he was dismissed to the pastorate of the Allen Street Presbyterian Church, New York city, where he was installed May 26, 1850, and dismissed Oct. 9, 1854. He was then successively in-

stalled at the First Church, Meriden, Conn., Nov. 16, 1854, dismissed Sept. 18, 1860; Keokuk, Io., Oct. 30, 1860, dismissed April 8, 1867. At this latter date he went to Europe, where he spent a few months. Returning to New York in 1868, he supplied Mercer Street Church from May to October of the same year. He was then acting pastor at Waterloo, Io., from October, 1868, to March, 1871. In 1871 he was elected president of the State University of Iowa, in which position he remained until June, 1877. He was then, from 1877 to 1878, acting pastor at Iowa City. In 1871 he received the honorary degree of D.D. from Iowa and Knox colleges. He died in Hartford of disease of the brain and heart, Dec. 27, 1878. Dr. Thacher published *Two Sermons* at Meriden, one of which was suggested by the career of John Brown:—*A Sermon: "No Fellowship with Slavery"* (Keokuk, 1861);—*Inaugural Address*, as president of Iowa University (1871). (W. P. S.)

**Thacher, Peter** (1), a Congregational minister, was born at Salem, Mass., in 1651, and was the son of Rev. Thomas Thacher, first pastor of the Old South Church, Boston. He graduated at Harvard College in 1671, and was tutor there for several years following. He then went to England to prepare himself more fully for his profession, but his friend Samuel Danforth dying shortly after, Mr. Thacher returned to America. He refused several tempting offers to enter the Established Church; and in September, 1681, was ordained pastor of the Church in Milton, Mass. Here he labored effectively until a week before his death, which occurred Dec. 17, 1727. "He was a person of eminent sanctity, of a most courteous and complaisant behavior, cheerful, affable, humble, and free of speech to the meanest he met." He published several theological treatises and single sermons (1708-23), for a list of which see Sprague, *Annals of the Amer. Pulpit*, i, 196.

**Thacher, Peter** (2), a Congregational minister, the son of Thomas Thacher, Jun., and grandson of Thomas Thacher, the first minister of the Old South Church, was born in Boston in 1677. He graduated at Harvard in 1696, and immediately after his graduation began to teach at Hatfield, and is supposed to have studied divinity under the Rev. William Williams of that place. On Nov. 26, 1707, he was ordained pastor of the Church at Weymouth, where he remained between eleven and twelve years. In January, 1720, he returned to Boston and was installed pastor of the New North Church as colleague with Mr. Webb. Here he labored until his death, Feb. 26, 1738. Mr. Thacher published an *Election Sermon* (1726), and a *Sermon on the Death of Mrs. Gee* (1730). See Sprague, *Annals of the Amer. Pulpit*, i, 266.

**Thacher, Peter** (3), a Congregational minister, was born in 1688, and graduated at Harvard College in 1706. He was ordained pastor of the Church in Middleborough, Mass., in 1709, and died there April 22, 1744. He published an account of the revival of religion in Middleborough, in Prince's *Christian History*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Thacher, Peter** (4), D.D., an eminent Congregational minister, was born at Milton, Mass., March 21, 1752. He graduated at Harvard College in 1769, and was ordained pastor Sept. 19, 1770, at Malden, Mass., from which charge he was dismissed to allow his acceptance of a call from Brattle Street Church, Boston, Dec. 8, 1784. He entered upon his new charge Jan. 12, 1785, and there continued until his health failed. He died in Savannah Dec. 16, 1802. He was an active member of the convention which met in Boston in 1780 to frame a state constitution, and opposed the retention of the governor's office. The University of Edinburgh made him D.D. in 1791. He published, *An Oration against Standing Armies* (1776);—*Three Sermons in Proof of the Eternity of Future Punishments* (1782);—*Observations on the State of the Clergy in New England, with Strictures upon the Power of Dismissing them*

*Usurped by some Churches* (1783);—*A Reply to Strictures upon the Preceding* (1788);—*Memoirs of Dr. Boylston* (1789);—and several occasional sermons. See Sprague, *Annals of the Amer. Pulpit*, i, 718.

**Thacher, Samuel Cooper**, a Unitarian preacher and son of Peter (4), was born in Boston, Mass., in 1785. He graduated at Harvard College in 1804, and immediately after his graduation commenced his theological studies under the direction of Rev. William E. Channing. In the early part of 1805 Mr. Thacher took charge of the Boston Latin Grammar-school, but in the summer of 1806 was chosen to be the travelling companion of Rev. Mr. Buckminster. Returning in September, 1807, he was shortly after appointed librarian of Harvard College, and entered on his duties in 1808. He prosecuted his theological studies at Cambridge, and succeeded Dr. Kirkland as pastor of the New South Church, May 15, 1811, retaining this connection until his death, at Moulins, France, Jan. 2, 1818. His principal publications were, *Apology for Rational and Evangelical Christianity*, a discourse (Bost. 1815, 8vo);—*Unity of God*, a sermon (Liverpool, 1816, 8vo; 2d Amer. ed. Worcester, 1817, 8vo);—*Sermons*, with a *Memoir* by Rev. F. W. P. Greenwood (Bost. 1824, 8vo);—*Evidence Necessary to Establish the Doctrine of the Trinity* (1828, 12mo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Sprague, *Annals of the Amer. Pulpit*, viii, 435 sq.

**Thacher, Thomas**, a Congregational minister, was born at Salisbury, England, May 1, 1620. He declined the offer of his father to send him to an English university, preferring to emigrate to America. On June 4, 1635, he arrived at Boston, Mass., and soon after entered the family of the Rev. Charles Chauncy, of Scituate. He was ordained pastor of the Weymouth Church, Jan. 2, 1644, where he labored for more than twenty years. He then removed to Boston, where he preached occasionally, but was principally engaged in the practice of medicine, till he was chosen first pastor of the Third (Old South) Church. His installation took place Feb. 16, 1669, and after a happy ministry he died Oct. 15, 1678. He wrote, *A Brief Rule to Guide the Common People of New England how to Order Themselves and Theirs in the Small Pocks or Measles* (Bost. 1677; 2d ed. 1702), said to be the first medical tract published in New England;—*A Fast of God's Chusing*, a sermon (1674, 4to; 1678). See Sprague, *Annals of the Amer. Pulpit*, i, 126.

**Thacher, Tyler**, a Congregational minister, was born at Princeton, Mass., Sept. 11, 1801. "His ancestors for several generations, both in this country and in England, had been Puritan ministers, some of them of high distinction. Among them were Rev. Peter Thacher, of Salisbury, England; Rev. Thomas Thacher, of Boston, Mass.; Rev. Peter Thacher, of Milton, Mass.; and Rev. Peter Thacher, of Attleborough, Mass. In all not less than nine generations of the family have had representatives in the Christian ministry either in England or in America." The subject of this sketch was a graduate of Brown University in the class of 1824, and was licensed to preach April 26, 1825, and ordained as an evangelist in Wrentham, Mass., Dec. 4, 1827. He did not permanently settle in the ministry until May 14, 1834, when he became colleague pastor with Rev. Jonathan Grant over the Congregational Church at Hawley, Mass., where he remained about nine years (1834-43) and then returned to Wrentham. For several years he supplied the Church in North Wrentham, until he moved to California in 1851. Here he remained the rest of his life, teaching and preaching, and engaged in such employments as suited his tastes. "He was distinguished among his brethren for his theological and literary attainments, and even in the wilderness where he made his home he kept up his studies in the Hebrew and Greek languages and in philosophy. He was a man of quiet, scholarly, and devout habits, and much given to the study of nature and the prob-

isms of theology." Mr. Thacher died at Cache Creek, Cal., Dec. 4, 1869. (J. C. S.)

**Thacher, Washington**, a Presbyterian minister, was born at Attleborough, Mass., Feb. 23, 1794. He received his classical education under the Rev. Lyman Richardson; studied theology under the Rev. John Truair; was licensed to preach by the Otsego Presbytery in 1821; was ordained in 1822; officiated as stated supply at Morrisville, N. Y., 1822-26; was pastor of the Church in Jordan, N. Y., 1826-42; resigned his charge on account of ill-health; was afterwards a stated supply at Eaton, N. Y., three years; was appointed secretary and agent of the Central Agency of the American Home Missionary Society in July, 1847; and died June 29, 1850. He was an eminently devout man and an earnest and effective preacher.

**Thaddæi Acta.** The mission of Thaddæus to king Abgar of Edessa, the correspondence between Christ and Abgar, and the picture of Christ which purports to have been taken for Abgar are very old traditions, first mentioned by Eusebius, *Hist. Eccles.* i, 13. Whether these *Acts* formed the basis for these traditions cannot be decided. Tischendorf has published the Greek text from a *codex Paris.* of the 11th century in his *Acta Apostolorum Apocrypha* (Lips. 1851), p. 261-265. (B. P.)

**Thaddæi Evangelium**, mentioned in the *Decret. Gelasii de Libris Apocryphis* (in *Jus Canonicum*, xv, 3). Unless there is an erroneous reading for *Matthæu*, it would either belong to the apostle Judas Thaddæus or to a Judas belonging to the seventy whom Thomas sent to Edessa to king Abgar (Eusebius, *Hist. Eccles.* i, 13; see Fabricius, *Codex Apocryphus*, i, 136, 379). But tradition does not determine whether Thaddæus who was sent to Abgar belonged to the twelve or the seventy, on which point Eusebius and Jerome disagree. See Eusebius, *Hist. Eccles.* (ed. Reading), p. 38, note 5, 6.

On the correspondence between Abgar and Jesus, see especially Hofmann, *Leben Jesu nach den Apokryphen* (Leips. 1851), p. 307 sq. (B. P.)

**Thaddæus** (Θαδδᾱῖος; Vulg. *Thaddæus*), a name in Mark's catalogue of the twelve apostles (iii, 18) in the great majority of MSS. In Matthew's catalogue (x, 3) the corresponding place is assigned to Θαδδᾱῖος by the Vatican MS. (B), and the Sinaitic (N), and to Αεββαῖος by the Codex Bezae (D); while the received text, following the first correction of the Codex Ephraemi (C)—where the original reading is doubtful—as well as many fragmentary uncials and several cursive MSS., reads Αεββαῖος ὁ ἐπικληθεὶς Θαδδᾱῖος. We are probably to infer that Αεββαῖος alone is the original reading of Matt. x, 3, and Θαδδᾱῖος of Mark iii, 18 (so Tischendorf; but Tregelles has Θαδδᾱῖος in both passages). By these two evangelists the tenth place among the apostles is given to Lebbaeus or Thaddæus, the eleventh place being given to Simon the Canaanite. Luke, in both his catalogues (vi, 15; Acts i, 13), places Simon Zelotes tenth among the apostles, and assigns the eleventh place to Ἰούδας Ἰακώβου. As the other names recorded by Luke are identical with those which appear (though in a different order) in the first two gospels, it seems scarcely possible to doubt that the three names of Judas, Lebbaeus, and Thaddæus were borne by one and the same person. See JUDE; LEBBAEUS; THADDÆI ACTA and EVANGELIUM.

**Tha'hash** (Heb. *Tach'ash*, תַּחֲאֵשׁ, *budget* [q. v.]; Sept. *Ταχός*; Josephus, *Taías*, *Ant.* i, 6, 5; Vulg. *Thahas*), third named of the four sons of Nahor by his concubine Reumah (Gen. xxii, 24). B.C. cir. 2050.

**Thalemann, Christoph Wilhelm**, a Lutheran divine, was born in 1727 at Weberstätt, in Thuringia, and died, as doctor and professor of theology, at Leipsic, March 10, 1778. He wrote, *Tractatus de Nube super Arcu Federis Commento Judiciali* (Lips. 1752)—*Tractatus de Philonis et Josephi Auctoritate in Historia Rituum*

*Sacrorum* (ibid. 1771):—*De Sensu Veri et Falsi in Interpretatione Librorum Sacrorum* (ibid. 1775):—*Dissertatio de Eruditione Pauli Apostoli Judaica non Græca* (ibid. 1769):—*Versio Latina Evangeliorum Matth., Luc., et Joh., itemque Act. App.*, edita a K. Ch. Tittmann (Berlin, 1780). See FÜRST, *Bibl. Jud.* iii, 419; WINER, *Handbuch der theol. Literatur*, i, 138, 165, 569, 896; ii, 799. (B. P.)

**Thalès**, a celebrated Greek philosopher, and the first of the seven wise men of Greece, was born at Miletus about B.C. 640. After acquiring the usual learning of his own country, he travelled into Egypt and several parts of Asia to learn astronomy, geometry, mystical divinity, natural knowledge, or philosophy, etc. Returning to his own country, he communicated the knowledge he had acquired to many disciples, among the principal of whom were Anaximander, Anaximenes, and Pythagoras. He was the founder of the Ionian sect of philosophers. Laertes and several other writers agree that he was the father of the Greek philosophy, being the first that made any researches into natural science and mathematics. His doctrine is that water is the principle of which all the bodies in the universe are composed; that the world is the work of God; and that God sees the most secret thoughts in the heart of man. He taught that in order to live well we ought to abstain from what we find fault with in others; that bodily felicity consists in health; and that of the mind in knowledge. That the most ancient of beings is God, because he is uncreated; that nothing is more beautiful than the world, because it is the work of God; nothing more extensive than space, quicker than spirit, stronger than necessity, wiser than time. He used to observe that we ought never to say that to any one which may be turned to our prejudice; and that we should live with our friends as with persons that may become our enemies. In geometry Thales was a considerable inventor as well as an improver; while in astronomy his knowledge and improvements were very considerable. His morals were as just as his mathematics well-grounded, and his judgment in civil affairs equal to either. He died about B.C. 550. Concerning his writings, it remains doubtful whether he left any behind him; at least, none have come down to us. See CHALMERS, *Biog. Dict.* s. v.; SMITH, *Dict. of Class. Biog.* s. v.

**Tha'mah** (Heb. *Te'mach*, תַּמַּח, in pause *Ta'mach*, תַּמַּח, *laughter* [Gesenius], or *combat* [Fürst]; Sept. *Θεμά*; Vulg. *Thema*), one of the Nethinim whose "children" returned from Babylon with Zerubbabel (Ezra ii, 53; "Tamah," Neh. vii, 55). B.C. ante 536.

**Tha'mar** (Matt. i, 3). See TAMAR.

**Thamer, Theobald**, a theological agitator in the time of the Reformation in Germany. He was a native of Rossheim, in Alsace, and studied at Wittenberg under Luther and Melancthon, taking the degree of master in 1539. He had been supported while a student by the landgrave Philip of Hesse, who wished to train the youth for service in his employment; and after a time spent as professor of theology at Frankfurt-on-the-Oder, Thamer responded to the landgrave's call and became professor and preacher at Marburg. To the chagrin of his prince, however, he showed himself a rigid Lutheran, whose influence was directly opposed to the compromises which Philip hoped to bring about between the contending evangelical factions. In the Smalcald war Thamer served in the field as a chaplain. He there saw reason to lose faith in the cause of the Reformation, and to discover the occasion of all the troubles of the situation in the Lutheran doctrine of justification; and on his return to Marburg he assailed that doctrine in the pulpit and the lecture-room. He emphasized the ethical side of Christianity, and separated it from the doctrinal side, thus gradually coming to occupy rationalistic ground. The government dealt with him mildly, at first transferring him to Cassel, and

then entering into extended negotiations with him; but as he persisted in disturbing the peace of the Church, he was dismissed from all his offices Aug. 15, 1549. He secured a position as preacher at Frankfort-on-the-Main, whence he continued to asperse the Lutheran doctrines, until he exhausted the patience of his new patrons. He then turned to the landgrave with the offer to defend his views before competent judges, and he actually visited Melancthon, Gresser, Schuepf, and Bullinger. No settlement was reached in their discussions, however, and Thamer was dismissed from the dominions of Hesse. He went to Italy and in 1557 entered the Romish Church. In time he was made professor of theology at Freiburg. He died May 23, 1569. See Neander, *Theobald Thamer*, etc. (Berl. 1842); id. *Hist. of Dogmas*, p. 631; Pestalozzi, *Bullinger*, p. 461 sq.; Schenkel, *Wesen d. Protestantismus*, i, 144 sq.; Hochbuth, *De Th. Thameri Vita et Scriptis* (Marb. 1858), and the article in *Niedner's Zeitsch. f. hist. Theologie*, 1861, No. 2.—Herzog, *Real-Encyklop.* s. v.

**Tham'natha** (ἡ Θαμναθᾶ; Vulg. *Thamnata*), one of the cities of Judea fortified by Bacchides after he had driven the Maccabees over the Jordan (1 Macc. ix, 50); no doubt an ancient TIMNATH, possibly the present *Tibneh*, half-way between Jerusalem and the Mediterranean. Whether the name should be joined to Pharaethoni, which follows it, or whether it should be independent, is a matter of doubt. See PHARATHON.

**Thane, DANIEL**, a Presbyterian minister, was born in Scotland and received his classical education at Aberdeen. After coming to America, he entered the Princeton Theological Seminary, from which he graduated in 1748. He was ordained by the New York Presbytery and installed pastor at Connecticut Farms, N. J., Aug. 29, 1750. In 1754 he was sent by the Synod of New York to Virginia and the Carolinas. Ramsey, in his *History of South Carolina*, says that he preached on the fork of Broad and Saluda rivers, where there were only six families. These were driven away by the Indians between the years 1755 and 1763, but they returned and set up congregations, served in aftertimes by Dr. Joseph Alexander and others. In 1808 there was a flourishing congregation, with a meeting-house on the spot where Thane preached, in 1754, under a tree. He was dismissed in 1757, and left at liberty to join the Presbytery of Newcastle or Lewes. He was settled in the united congregations of Newcastle and Christina Bridge, where he remained until 1763, when the pastoral relation was dissolved. He died soon after. Dr. Hosack, in his *Memoir of De Witt Clinton*, says that this eminent man was under Thane's tuition, and that he was minister of New Windsor, N. Y. (W. P. S.).

**Thank-offering** (זֶבַח תְּרוּמָה, Lev. xxii, 29; or briefly תְּרוּמָה, 2 Chron. xxix, 3; Psa. lvi, 13; Jer. xvii, 26; literally *praise* or *thanksgiving*, as often rendered), a variety of the peace-offering (hence the full expression זֶבַח תְּרוּמָה הַשְּׁלֵמִים, Lev. vii, 13, 15), the other two kinds being the votive offering, specifically such (זֶבַח נִדָּר), and the ordinary free-will offering (זֶבַח נִדָּבָה). As its name implies, it was a bloody or animal sacrifice, and its specific character was the *praise* which it embodied towards God. Like all the other divisions of the peace-offering, it was entirely voluntary, being placed in the light of a privilege rather than a duty. It is intimately associated with the "meat-offering" (q. v.).

The nature of the victim was left to the sacrificer; it might be male or female, of the flock or of the herd, provided that it was unblemished; the hand of the sacrificer was laid on its head, the fat burned, and the blood sprinkled as in the burnt-offering; of the flesh, the breast and right shoulder (the former of which the offerer was to *heave* and the latter to *ware*) were given

to the priest; the rest belonged to the sacrificer as a sacrificial feast (1 Cor. x, 18), to be eaten, either on the day of sacrifice or on the next day (Lev. vii, 11-18, 29-34), except in the case of the firstlings, which belonged to the priest alone (xxiii, 20). The eating of the flesh of the meat-offering was considered a partaking of the "table of the Lord," and on solemn occasions, as at the dedication of the Temple of Solomon, it was conducted on an enormous scale, and became a great national feast, especially at periods of unusual solemnity or rejoicing; as at the first inauguration of the covenant (Exod. xxiv, 5), at the first consecration of Aaron and of the tabernacle (Lev. ix, 18), at the solemn reading of the law in Canaan by Joshua (Josh. viii, 31), at the accession of Saul (1 Sam. xi, 15), at the bringing of the ark to Mount Zion by David (2 Sam. vi, 17), at the consecration of the Temple, and thrice every year afterwards, by Solomon (1 Kings viii, 63; ix, 25), and at the great Passover of Hezekiah (2 Chron. xxx, 22). In two cases only (Judg. xx, 26; 2 Sam. xxiv, 25) are these or any other kind of peace-offering mentioned as offered with burnt-offerings at a time of national sorrow and fasting. Here their force seems to have been precatory rather than eucharistic. The key to the understanding of this is furnished by Hengstenberg: "To give thanks for grace already received is a refined way of begging for more." As prayer is founded on the divine promise, it "may be expressed in the way of anticipated thanks."

Among thank-offerings, in the most extensive sense, might be reckoned the presentation of the first-born (Exod. xiii, 12, 13); the first-fruits, including the fruit of all manner of trees, honey, oil, and new wine (Lev. xxiii, 10-13; Numb. xviii, 12; 1 Chron. ix, 29; Neh. x, 37; 2 Chron. xxxii, 5); the second tithe (Deut. xii, 17, 18; xiv, 23); and the lamb of the Passover (Exod. xii, 3-17). Leaven and honey were excluded from all offerings made by fire (Lev. ii, 11); and salt was required in all (ii, 13; Mark ix, 49; Col. iv, 6). So also the Hebrews were forbidden to offer anything vile and contemptible (Deut. xxiii, 18; Mal. i, 7, 8). See PEACE-OFFERING.

**Thanksgiving**, the act of giving thanks or expressing gratitude for favors or mercy received. It implies, according to Dr. Barrow (*Sermons*, i, ser. 8, 9), (1) a right apprehension of the benefits conferred; (2) a faithful retention of benefits in the memory, and frequent reflections upon them; (3) a due esteem and valuation of benefits; (4) a reception of those benefits with a willing mind, a vehement affection; (5) due acknowledgment of our obligations; (6) endeavors of real compensation, or, as it respects the Divine Being, a willingness to serve and exalt him; (7) esteem, veneration, and love of the benefactor.

The blessings for which we should be thankful are (1) temporal, such as health, food, raiment, rest, etc.; (2) spiritual, such as the Bible, ordinances, the Gospel and its blessings, as free grace, adoption, pardon, justification, calling, etc.; (3) eternal, or the enjoyment of God in a future state; (4) also for all that is past, what we now enjoy, and what is promised; for private and public, for ordinary and extraordinary blessings; for prosperity, and even adversity, so far as rendered subservient to our good.

The obligation to this duty arises (1) from the relation we stand in to God; (2) the divine command; (3) the promises God has made; (4) the example of all good men; (5) our unworthiness of the blessings we receive; (6) the prospect of eternal glory. Whoever possesses any good without giving thanks for it deprives him who bestows that good of his glory, sets a bad example before others, and prepares a recollection severely painful for himself when he comes in his turn to experience ingratitude. See Chalmers, *Sermons*; Hall, *Sermons*; Dwight, *Theology*.

**Thanksgiving-day**, an annual religious festival observed in the United States. It owes its origin to

the desire of the Puritans for greater simplicity in the forms of worship of the Established Church, and a purpose not to celebrate any of the numerous festival-days observed by that Church. An occasional day of thanksgiving has been recommended by the civil authorities of Europe, and such a day was observed in Leyden, Holland, Oct. 3, 1575, the first anniversary of the deliverance of that city from siege. Before the adoption of an annual thanksgiving-day, we find mention of several appointed for special reasons. After the first harvest at Plymouth, in 1621, Gov. Bradford sent four men out fowling, that they "might after a more special manner rejoice together." In July, 1623, the governor appointed a day of thanksgiving for rain, after a long drought, and the records show a similar appointment in 1632 because of the arrival of supplies from Ireland. There is also record of the appointment of days of thanksgiving in Massachusetts in 1632, 1633, 1634, 1637, 1638, and 1639, and in Plymouth in 1651, 1668, 1680 (when the form of the recommendation indicates that it had become an annual custom), 1689, and 1690. The Dutch governors of New Netherland in 1644, 1645, 1655, and 1664, and the English governors of New York in 1755 and 1760, appointed days of thanksgiving. During the Revolution, Thanksgiving-day was observed by the nation, being annually recommended by Congress; but there was no national appointment between the general thanksgiving for peace in 1784 and 1789, when president Washington recommended a day of thanksgiving for the adoption of the constitution. Since that time special days have been set apart both by presidents and governors until 1864, when the present practice was adopted of a national annual thanksgiving. The president issues an annual proclamation, followed by the governors of the several states and mayors of the principal cities. Custom has fixed the time for the last Thursday in November.

**Thanksgiving Service.** There are various modes under the Old Test. of offering thanksgiving. Sometimes it was public, sometimes in the family. It was frequently accompanied by sacrifices (2 Chron. xxix, 31) and peace-offerings, or offerings of pure devotion, arising from the sentiments of gratitude in the offerer's own mind (Lev. vii, 12, 15; Psa. cvii, 23; cxvi, 7). It is usually connected with praise, joy, gladness, and the voice of melody (Isa. li, 3), or (as Neh. xi, 17) with singing and with honor (Rev. vii, 12); but occasionally, if not generally, with supplication (Phil. iv, 6) and prayer (1 Tim. ii, 3; Neh. xi, 17).

In the Book of Common Prayer there are various forms of thanksgiving, particular and general, as especially the "General Thanksgiving," which was added at the last revision, and appointed for daily use, and more particularly the "Office for the Holy Communion." But there are, besides, particular thanksgivings appointed for deliverance from drought, rain, famine, war, tumult, and pestilence; and there is an entire service of thanksgiving for women after childbirth; and certain days on which are commemorated great deliverances of the Church and nation are marked also with a solemn service of thanksgiving.

**Thanner, IGNAZ**, a Roman Catholic divine, was born Feb. 9, 1770, at Neumarkt, in Bavaria. In 1802 he was appointed professor of catechetics at Salzburg; in 1805 professor of philosophy at Landshut; in 1808 he was called to Innsbruck, and in 1810 to Salzburg again, where he died, May 28, 1856. At first he belonged to the Kantian philosophical school, but soon became converted to that of Schelling. He wrote, *Der Transcendentalismus in seiner dreifachen Steigerung* (Munich, 1805);—*Die Idee des Organismus* (ibid. 1806);—*Handbuch der Vorbereitung zum selbstständigen wissenschaftlichen Studium* (ibid. 1807, 2 vols.);—*Darstellung der absoluten Identitätslehre* (ibid. 1810);—*Logische Aphorismen* (Salzburg, 1811);—*Lehr- und Handbuch der theoretischen und praktischen Philosophie* (ibid. 1811, 2

vols.);—*Wissenschaftliche Aphorismen der kathol. Dogmatik* (ibid. 1816). See Winer, *Handb. der theol. Literatur*, i, 306; ii, 800; *Regensburger Real-Encyclop.* s. v. (B. P.)

**Tha'ra** (Luke iii, 34). See **TERAH**.

**Thar'ra** (Vulg. *Thura*, for the Greek fails here), a corrupt form found in the Apocryphal addition to the book of Esther (xii, 1) for **TERESH** (q. v.).

**Thar'ashiah**, a less exact form of Anglicizing the word **TARSHISH** (q. v.), applied in the A. V. to (a) the place (1 Kings x, 22; xxii, 48) and (b) the man (1 Chron. vii, 10).

**Thas'si** (Θασσι, Θασσις; Vulg. *Thasi, Hassii*), the surname of Simon the son of Mattathias (1 Macc. ii, 8). The derivation of the word is uncertain. Michaelis suggests תַּשִּׁי (Chald.), "the fresh grass springs up," i. e. "the spring is come," in reference to the tranquillity first secured during the supremacy of Simon (Grimm, *Comment. ad loc.*). This seems very farfetched. Winer (*Realwb.* s. v. "Simon") suggests a connection with תַּשִּׁי, *fervere*, as Grotius (*ad loc.*) seems to have done before him. In Josephus (*Ant.* xii, 6, 1) the surname is written Ματθῆς, v. r. Θαδῆς, Θαδῆς. See **MACCABEE**.

**Thaumatopecti** (Θαυματοποιῖ), a term applied by the early Greek writers to those who pretended to work miracles by the power of magic, such as James and Jambres, Simon Magus, and Apollonius Tyaneus. See Bingham, *Christ. Antiq.* bk. xvi, ch. v, § 7.

**Thaumaturgy.** See **MIRACLES**, ECCLESIASTICAL.

**Thaxter, JOSEPH**, a Unitarian minister, was born at Hingham, Mass., April 23, 1742. He graduated at Harvard College in 1768, expecting to enter the medical profession, but, deciding upon the ministry, he studied theology under Dr. Gay, and began to preach in 1771. On Jan. 23, 1776, he received a commission as chaplain in the army, and probably held that position for two or three years. He was installed pastor of the Church in Edgarton, Martha's Vineyard, in 1780. The last Sunday that he preached he fell in the pulpit, was assisted home, and died July 18, 1827. Mr. Thaxter acted as chaplain at the laying of the corner-stone of the Bunker Hill monument, July 17, 1825. His only publication, so far as known, was a *Catechism for Sabbath-schools*. See Sprague, *Annals of the Amer. Pulpit*, viii, 83.

**Thayer, Elihu, D.D.**, a Congregational preacher, was born at Braintree, Mass., March 29, 1747. He was, as a child, very forward in his studies, having read the Bible through three times at the age of seven years. He entered Princeton College, one year in advance, in 1766, and graduated in 1769. His theological studies were prosecuted partly under Rev. John Searle, Stoneham, and partly under Rev. Mr. Weld, Braintree. Licensed to preach, he supplied for nearly a year the church in Newburyport. He was then (Dec. 18, 1776) set apart to take the pastoral care of the Church in Kingston, N. H. He was chosen president of the New Hampshire Missionary Society in 1801, and continued to hold the office till 1811. He died April 3, 1812. A volume of his *Sermons* was published after his death (1813, 8vo). See Sprague, *Annals of the Amer. Pulpit*, ii, 104.

**Thayer, Nathaniel, D.D.**, a Unitarian minister, was born at Hampton, N. H., July 11, 1769, studied at the Phillips Academy, Exeter, and graduated from Harvard College in 1789. He immediately took charge of the grammar-school in Medford, and at the same time commenced the study of theology under Dr. Osgood. At the end of a year he returned to Cambridge, and continued to study under Dr. Tappan, divinity professor in the college. He held the position of tutor in college for about a year, and, being licensed to preach, spent the greater part of a year at Wilkesbarre, Pa., supplying a congregation there. On his return to Mas-

sachusetts, he preached to the New South Church, Boston, and at Dorchester. He was ordained and installed colleague pastor of the Church in Lancaster, Oct. 9, 1793. The pastor, Rev. Timothy Harrington, lived about two years, and at his death Mr. Thayer succeeded to the sole charge of the Church. He was a man whose services were greatly esteemed and frequently employed; he was a member of no less than 150 ecclesiastical councils; preached the Artillery Election sermon in 1798, and the annual sermon before the Legislature of Massachusetts in 1823. He received his D.D. in 1817 from Harvard. When Lafayette made his tour through the United States in 1825, Mr. Thayer addressed him in behalf of the people of Lancaster. Being somewhat debilitated, he, in June, 1840, set out to travel. He reached Rochester on the 22d of that month, retired to rest at his usual hour, and died at two o'clock the next morning. His remains were carried back to Lancaster. Mr. Thayer published a number of sermons and discourses, for a list of which see Sprague, *Annals of the Amer. Pulpit*, viii, 246 sq.

**Theandric Operation** (Θεανδρική ἐνέργεια), a theological term first used in the 7th century, and intended to express that unity of operation in the two natures and the two wills of our Lord Jesus Christ by which they act as the nature and will of one invisible Person, God and man. It was called a novel term by the Council of Lateran (A.D. 649), and discouraged as such in its 15th canon, which speaks of the "heretics" who had introduced it (τὴν ἐκ' αὐτῆς Θεανδρικῆς καὶνῆς ῥήσιν), which makes it seem likely that it has been used by some of the Monothelite sect in justification of their principles. John Damascene (*De Orthod. Fide*, ch. lxvi) thus explains the term: "The Theandric operation, then, signifies this, that when God became man both his human operation was divine, that is, deified, and not void of participation in his divine operation, and his divine operation was not void of participation in his human operation, but either is contemplated in connection with the other. And this manner is styled 'periphrasis' when a person embraces any two things by one expression; for as we call the divided cauterizing and the inflamed incision of a heated knife the same thing, but call the incision one operation and the cauterizing another—calling them operations of different natures, the cauterizing of fire and the incision of iron—so, also, speaking of one Theandric operation of Christ, we understand of the two natures to be two—the divine that of his divinity, and the human that of his humanity."

**Theatines**, an order of regular clergy in the Church of Rome, which was founded in the beginning of the 16th century for the purpose of defeating the efforts towards a reformation outside the Church by reorganizing the clergy, enforcing discipline in the convents, restoring an apostolical simplicity of life, and infusing a religious spirit into the Church by means of the public worship and the sermon. The order was founded by Cajetan of Thiene (thence called *Order of the Cajetans*), bishop John Peter Caraffa of Theate, subsequently pope Paul IV, who was usually called Chieti (hence *Chietines* and *Paulines*) and Boniface of Colle. It was confirmed by Clement VII in 1524 (June 24). Caraffa was its first superior, and his bishopric gave the order its name. The members renounced all worldly possessions, and refused either to labor or beg, depending, instead, on gifts which Providence should confer on them. Their number was never very considerable; but as they were chiefly of noble rank, the reputation of the order was great, and they acquired houses in many cities of Italy, Spain, Poland, and Bavaria. Mazarin conferred on it, in 1644, the only establishment it has been able to secure in France. It attempted missions in Tartary, Georgia, and Circassia, which have been unproductive of results. The garb of the order is the usual black robe of the regular clergy, with the addition of white stockings. See

A Theatine.

Caraccioli, *De Vita Pauli IV*; id. *Cajetani Thienæ, Bonifacii a Colle . . . cum Paulo IV . . . Ord. Clericorum Regul. Fundaverunt Vitæ* (Col. Ubiorum, 1612); *Miræi Regulæ et Constitutiones Clericorum in Cong. Viventium* (Antverp. 1638).

Two congregations of *Sisters* are attached to the Order of Theatines, both of which were founded by the hermit-virgin Ursula Benincasa. She was aided by the Spanish priest Gregory of Navarre, and recommended by Philip Neri, founder of the Oratorians (q. v.). The rule given to the congregation founded by her in 1583 bound the nuns by the three simple vows (to a common life of poverty, affection, and humility), permitted secular employments, etc., and enforced mortifications of the body. Their number was fixed at sixty-six, because the Virgin Mary was said to have attained the age of so many years. Ursula prophesied a world-wide extension of her order, but it was able to obtain only a single house in Palermo. It was attached to the Theatines by pope Gregory XV.

The second congregation was founded in 1610 at Naples. Its members were to be thirty-six in number in each convent, and they were governed by a more rigid rule than the former class. Complete separation from the world and its affairs was enforced, severe penances and mortifications imposed, and stringent vows exacted. A novitiate of two years was required before entering the order. This congregation secured but one additional house, also in Palermo. Clement IX united the sisterhood with the Theatines. Its garb consists of a white robe, black girdle, blue scapulary and mantle, and black veil for the head and neck (see Helyot, *Ausführl. Gesch. aller geistl. u. weltl. Kloster- u. Ritter-Orden* [Leips. 1753-56], iv, 103 sq.).—Herzog, *Real-Encyclop.* s. v.

**Theatre** (Θέατρον). The Greek term, like the corresponding English one, denotes the *place* where dramatic performances are exhibited, and also the *scene* itself, or *spectacle*, which is witnessed there. 1. It occurs in the first or local sense in Acts xix, 29, where it is said that the multitude at Ephesus rushed to the theatre, on the occasion of the excitement stirred up against Paul and his associates by Demetrius, in order to consider

Plan of a Greek Theatre.

a. Seats for spectators; b. Passage-way; c. Covered portico; d. Altar of Bacchus; e. Orchestra; f. Stage; i. Ornamental door; m. Entrance for the players.

what should be done in reference to the charges against them. It may be remarked also (although the word does not occur in the original text or in our English version) that it was in the theatre at Cæsarea that Herod Agrippa I gave audience to the Tyrian deputies, and was himself struck with death, because he heard so gladly the impious acclamations of the people (Acts xii, 21-23). See the remarkable confirmatory account of this event in Josephus (*Ant.* xix, 8, 2). Such a use of the theatre for public assemblies and the transaction of public business, though it was hardly known among the Romans, was a common practice among the Greeks. Thus Valer. Max. ii, 2, "Legati in theatrum, ut est consuetudo Græciæ, introducti;" Justin, xxii, 2, "Veluti reipublicæ statum formaturus in theatrum ad contionem vocari iussit;" Corn. Nep. *Timol.* 4, § 2, "Veniebat in theatrum, cum ibi concilium plebis haberetur." 2. The other sense of the term "theatre" occurs in 1 Cor. iv, 9, where the Common Version renders, "God hath set forth us the apostles last, as it were appointed to death; for we are made (rather, were made, *Σίατρον ἐγενήθημεν*)

a *spectacle* unto the world, and to angels, and to men." Instead of "spectacle" (so also Wycliffe and the Rhemish translators after the Vulgate), some might prefer the more energetic Saxon "gazing-stock," as in Tyndale, Cranmer, and the Geneva version. But the latter would be now inappropriate, if it includes the idea of scorn or exultation, since the angels look down upon the sufferings of the martyrs with a very different interest. Whether "theatre" denotes more here than to be an object of earnest attention (*Σίαμα*), or refers at the same time to the theatre as the place where criminals were sometimes brought forward for punishment, is not agreed among interpreters. In Heb. xii, 1, where the writer speaks of our having around us "so great a cloud of witnesses" (*τοσούτων ἔχοντες περι- κείμενον ἡμῖν νίκης μαρτύρων*), he

has in mind, no doubt, the agonistic scene, in which Christians are viewed as running a race, and not the theatre or stage where the eyes of the spectators are fixed on them.

Among the Greeks and the states of Greek origin, the theatre—the proper appropriation of which was for the celebration of the public games—was also used as the place of assembly for every kind of public business; and served for town-hall, senate-house, forum, etc., and harangues to the people were there delivered. Indeed, all important public business was transacted in these places—war was declared, peace proclaimed, and criminals were executed. Antiochus Epiphanes introduced public shows and games in Syria (2 Macc. iv, 10-16); and in a later age theatres and amphitheatres were erected by the Herods in Jerusalem and other towns of Syria (Josephus, *Ant.* xv, 8, 1; xvi, 5, 1; xix, 7, 5; *War.* i, 21, 8), in which magnificent spectacles were exhibited, principally in honor of the Roman emperors. The remains of

one of these near Cæsarea are still clearly traceable (Thomson, *Land and Book*, ii, 237). For the history and construction of such buildings in that day, see Smith, *Dict. of Class. Antiq.* s. v. Wettstein well observes that the very situation of the theatre at Ephesus would not a little promote and increase the tumult in the case of Paul, since, as we find from the accounts of those who have surveyed the situation of the Temple of Diana, it was within view of the theatre. See EPIPHESUS. The shell of this theatre remains unmistakably to be recognised on Mount Priar, though the marble seats have been removed. Its ruins are described by Fellows (*Asia Minor*, p. 274) as "a wreck of immense grandeur," and it is said to be the largest of any that have come down to us from ancient days. See Lewin, *St. Paul*, ii, 328; Wood, *Discoveries in Ephesus* (Lond. 1877), ch. iv.

**THEATRE AND THE CHURCH.** The writers of the early Church were very severe in their invectives against all frequenters of the theatre and public stage plays, and such frequenters were excluded from the

Ruins of the Theatre at Ephesus.

privilege of baptism. For this sentiment respecting the theatre there are two reasons assigned: 1. The several sorts of heathen games and plays were instituted upon a religious account, in honor of the gods, and men thought they were doing a grateful thing to them while they were engaged in such exercises. Christians could not, therefore, be present at them as spectators without partaking, in some measure, in the idolatry of them. 2. They were the great nurseries of impurity, where incest and adultery were represented with abominable obscenity. Venus was represented in all her lewd behavior, Mars as an adulterer, and Jupiter no less a prince in his vices than in his kingdom. The theatres, by reason of their impurities, were places of unavoidable temptation, and were considered as the devil's own ground and property. Tertullian (*De Spectac.* c. 26) says the devil was once asked, when a woman was seized by him in a theatre, how he durst presume to possess a Christian, and he answered, confidently, "I had a right to, for I found her upon my own ground." In the time of Tertullian, and when the author of the *Constitutions* drew up his collections, a Christian becoming a spectator of these plays lost his title to Christian communion. Later, when the theatres were purged from idolatry, but not from lewdness, the fathers contented themselves with declaiming against them with sharp invectives.—Bingham, *Christ. Antiq.* bk. xi, ch. v, § 9; bk. xvi, ch. xi, § 12.

It is well known, nevertheless, that the dramatic representation of modern Europe grew up under the wing of the Church, and only slowly detached itself from this its earliest shelter. Of the dramatic element which was allowed to find place in its own services we have a curious illustration in the manner in which the offering of the magi was set forth in some churches on the festival of Epiphany (Binterim, *Denkwürdigkeiten*, v, 316). Three boys, clothed in silk, with golden crowns upon their heads, and each a golden vessel in his hand, represented the wise men of the East. Entering the choir, and advancing towards the altar, they chanted the following strophe:

"O quam dignis celebranda dies ista laudibus,  
In qua Christi genitura propalatur gentibus,  
Pax terrenis nunciatur, gloria cœlestibus;  
Novi partu signum fulget Orientis patria:  
Currunt reges Orientis stella sibi prævia,  
Currunt reges et adorant Denum ad præsepia,  
Tres adorant reges unum, triplex est oblatio."

During the singing of these verses they gradually approached the altar; there the first lifted up the vessel which he held in his hand, exclaiming,

"Anrum primo,  
And the second:

thus secundo,

And the third: myrrham dante tertio."

Hereupon, the first once more:

"Anrum regum,  
The second:

thus cœlestem,

And the third: mori nutat nctio."

Then one of them pointed with his hand to the star hanging from the roof of the church, and sang in a loud voice, "Hoc signum magni Regis;" and all three proceeded to make their offerings, singing meanwhile the responsal, "Eamus, inquiramus eum, et offeramus ei munera, aurum, thus, et myrrham." At the conclusion of this responsal, a younger boy lifted up his voice, which was meant to imitate the voice of an angel, from behind the altar, and sang, "Nuntium vobis fero de supernis; Natus est Christus dominator orbis In Bethlehem Judææ; sic enim propheta dixerat ante." Thereupon the three who represented the kings withdrew into the sacristy, singing, "In Bethlehem natus est Rex celorum," etc.

See the Latin monographs on theatrical representations cited by Volbeding, *Index Programmatum*, p. 172. See MYSTERIES.

**Thebes** (THEBÆ, or DIOSPŌLIS MAGNA) was the Greek name of a city of Egypt, and its capital during the empire, called in the Bible *No-Amon* (נֹחַמְן נֹחַמְן; Sept. *μερίς Ἀμμών*; Nah. iii, 8) or *No* (נֹ; Sept. *Διόσπολις*; Jer. xlii, 25; Ezek. xxx, 14, 15, 16), famous in all ancient history.

I. *Name*.—The ancient Egyptian names of Thebes are, as usual, two. The civil name, perhaps the more ancient of the two, is *Ap-t*, *Ap-tu* (Brugsch, *Geographische Inschriften*, i, 177, pl. xxxvi, No. 781-784). Hence the Coptic *tape*, which shows that the fem. article *t* was in this case transferred in pronunciation, and explains the origin of the classical forms, *Θήβη*, *Θήβαι*, *Thebe*, *Thebæ* (see Wilkinson, *Modern Egypt and Thebes*, ii, 136, 137). The sacred name has two forms, *Pa-Amen* or perhaps *Par-Amen* (Brugsch, *Geographische Inschriften*, i, 177, No. 780), the "house of Amen," or Jupiter-Ammon, preserved in the Coptic *ptamom*; and *Nu-Amen*, the "city of Amen," the sound of the first part of which has been discovered by M. Chabas, who reads *No-Amon* (*Recherches sur le Nom Égypt. de Thebes*, p. 5). The latter form of the sacred name is transcribed in the Hebrew *No-Amon*, and it is easy to understand the use of its first part *Nu*, "the city," instead of the whole, at a time when Thebes was still the most important city of Egypt. This sacred name of Thebes, "the abode of Amon," the Greeks reproduced in their *Diospolis* (Διὸς πόλις), especially with the addition the *Great* (ἡ μεγάλη), denoting that this was the chief seat of Jupiter-Ammon. and distinguishing it from *Diospolis the Less* (ἡ μικρά). Of the twenty nomes, or districts, into which Upper Egypt was divided, the fourth in order, proceeding northward from Nubia, was designated in the hieroglyphics as *Zu'm*—the Phathyrite of the Greeks—and Thebes appears as the "*Za'm-city*," the principal city or metropolis of the *Za'm* nome. In later times the name *Zu'm* was applied in common speech to a particular locality on the western side of Thebes.

II. *Position*.—The situation of Thebes with reference to the rest of Egypt well suited it to be the capital of the country. Though farther from the Mediterranean and Syria than Memphis, it was more secure from invasion; and if it was far from the northern trade, it commanded the chief line of commerce from the Red Sea. The actual site is, perhaps, the best of any ancient town of Upper Egypt. Here the valley, usually straitened by the mountains on one side, if not on both, opens out into a plain which is comparatively spacious. On the west bank the mountains leave a broad band of cultivable land; on the east they recede in a semicircle. On the former side they rise to a fine peak about 1200 feet high, unlike the level cliff-like form of the opposite range, a form seldom varied on either bank throughout the whole valley. The plain between is about two miles long, and has an extreme breadth of about four miles, no large space for a great capital except in Egypt. Through the centre of this plain flows the river Nile, usually at this point about half a mile in width, but at the inundation overflowing the plain, especially upon the western bank, for a breadth of two or more miles.

The monuments do not arrest the attention of the traveller as he sails up the river as do the pyramids of Memphis. On the east the massive fort-like winged portal of El-Karnak and the colonnade of El-Uksur (Luxor), and on the west the hills honeycombed with sepulchral grottoes, are the most remarkable objects to be seen, but, being far apart, they are singly seen from the river. If viewed from the western mountain, the many monuments of Thebes give an idea of the grandeur of this ancient city, the greatest in the world for magnificence.

III. *History*.—1. *Classical*.—The origin of the city is lost in antiquity. Niebuhr is of opinion that Thebes was much older than Memphis, and that "after the centre of Egyptian life was transferred to Lower Egypt, Memphis acquired its greatness through the ruin of

Thebes" (*Lectures on Ancient History*, lect. vii). Other authorities assign priority to Memphis. But both cities date from our earliest authentic knowledge of Egyptian history. The first allusion to Thebes in classical literature is the familiar passage of the *Iliad* (ix, 381-385): "Egyptian Thebes, where are vast treasures laid up in the houses; where are a hundred gates, and from each two hundred men go forth with horses and chariots." Homer—speaking with a poet's license, and not with the accuracy of a statistician—no doubt incorporated into his verse the glowing accounts of the Egyptian capital current in his time. Wilkinson thinks it conclusive against a literal understanding of Homer that no traces of an ancient city-wall can be found at Thebes, and accepts as probable the suggestion of Diodorus Siculus that the "gates" of Homer may have been the propylæa of the temples: "Non centum portas habuisse urbem, sed multa et ingentia templorum vestibula" (i, 45, 7). In the time of Diodorus, the city-wall, if any there was, had already disappeared, and the question of its existence in Homer's time was in dispute. But, on the other hand, to regard the "gates" of Homer as temple-porches is to make these the barracks of the army, since from these gates the horsemen and chariots issue forth to war. The almost universal custom of walling the cities of antiquity, and the poet's reference to the gates as pouring forth troops, point strongly to the supposition that the vast area of Thebes was surrounded with a wall having many gates.

Homer's allusion to the treasures of the city, and to the size of its standing army, numbering 20,000 chariots, shows the early repute of Thebes for wealth and power. Its fame as a great capital had crossed the sea when Greece was yet in its infancy as a nation. It has been questioned whether Herodotus visited Upper Egypt, but he says, "I went to Heliopolis and to Thebes, expressly to try whether the priests of those places would agree in their accounts with the priests at Memphis" (ii, 3). Afterwards he describes the features of the Nile valley, and the chief points and distances upon the river, as only an eye-witness would be likely to record them. He informs us that "from Heliopolis to Thebes is nine days' sail up the river, the distance 4800 stadia . . . and the distance from the sea inland to Thebes 6120 stadia" (ii, 8, 9). In ch. xxix of the same book he states that he ascended the Nile as high as Elephantine. Herodotus, however, gives no particular account of the city, which in his time had lost much of its ancient grandeur. He alludes to the Temple of Jupiter there, with its ram-headed image, and to the fact that goats, never sheep, were offered in sacrifice. In the 1st century before Christ, Diodorus visited Thebes, and he devotes several sections of his general work to its history and appearance. Though he saw the city when it had sunk to quite secondary importance, he preserves the tradition of its early grandeur—its circuit of 140 stadia, the size of its public edifices, the magnificence of its temples, the number of its monuments, the dimensions of its private houses, some of them four or five stories high—all giving it an air of grandeur and beauty surpassing not only all other cities of Egypt, but of the world. Diodorus deplores the spoiling of its buildings and monuments by Cambyes (i, 45, 46). Strabo, who visited Egypt a little later—at about the beginning of the Christian era—thus describes (xvii, 816) the city under the name Diospolis: "Vestiges of its magnitude still exist which extend eighty stadia in length. There are a great number of temples, many of which Cambyes mutilated. The spot is at present occupied by villages. One part of it, in which is the city, lies in Arabia; another is in the country on the other side of the river, where is the Memnonium." Strabo here makes the Nile the dividing line between Libya and Arabia. The temples of El-Karnak and El-Uksur (Luxor) are on the eastern side of the river, where was probably the main part of the city. Strabo gives the following de-

scription of the twin colossi still standing upon the western plain: "Here are two colossal figures near each other, each consisting of a single stone. One is entire; the upper parts of the other, from the chair, are fallen down—the effect, it is said, of an earthquake. It is believed that once a day a noise, as of a slight blow, issues from the part of the statue which remains in the seat, and on its base. When I was at those places, with Ælius Gallus, and numerous friends and soldiers about him, I heard a noise at the first hour of the day, but whether proceeding from the base or from the colossus, or produced on purpose by some of those standing around the base, I cannot confidently assert. For, from the uncertainty of the cause, I am inclined to believe anything rather than that stones disposed in that manner could send forth sound" (xvii, 46). Simple, honest, sceptical Strabo! Eighteen centuries later some travellers have interrogated these same stones as to the ancient mystery of sound; and not at sunrise, but in the glaring noon, the statue has emitted a sharp, clear sound like the ringing of a disk of brass under a sudden concussion. This was produced by a ragged urchin, who, for a few piastres, clambered up the knees of the "vocal Memnon," and, there effectually concealing himself from observation, struck with a hammer a sonorous stone in the lap of the statue. Wilkinson conjectures that the priests had a secret chamber in the body of the statue, from which they could strike it unobserved at the instant of sunrise, thus producing in the credulous multitude the notion of a supernatural phenomenon. It is difficult to conceive, however, that such a trick, performed in open day, could have escaped detection, and we are therefore left to share the mingled wonder and scepticism of Strabo (see Thompson, *Photographic Views of Egypt, Past and Present*, p. 156).

Pliny speaks of Thebes in Egypt as known to fame as "a hanging city," i. e. built upon arches, so that an army could be led forth from beneath the city while the inhabitants above were wholly unconscious of it. He mentions also that the river flows through the middle of the city. But he questions the story of the arches, because, "if this had really been the case, there is no doubt that Homer would have mentioned it, seeing that he has celebrated the hundred gates of Thebes." Do not the two stories possibly explain each other? May there not have been near the river-line arched buildings used as barracks, from whose gateways issued forth 20,000 chariots of war?

2. *Monumental*.—The oldest royal names found at Thebes are those of kings of the Nantef line, who are known to have been there buried, and who are variously assigned to the 9th and the 11th dynasty, but undoubtedly reigned not long before the 12th. The 11th dynasty, which probably ruled about half a century, began about 2000 years B.C.; and the 12th was, like it, of Theban kings, according to Manetho, the Egyptian historian. The rise of the city to importance may therefore be dated with the beginning of the first Theban dynasty. With the 12th dynasty it became the capital of Egypt, and continued so for the 200 years of the rule of that line. Of this powerful dynasty the chief monument there is only part of the ancient sanctuary of the great temple of Amen-ra, now called that of El-Karnak. The 12th dynasty was succeeded by the 13th, which appears after a time to have lost the rule of all Egypt by the establishment of a foreign Shepherd dynasty, the 15th to the 17th. Theban kings of the 12th and 13th dynasties continued, however, to govern a limited kingdom, tributary to the Shepherds, until an insurrection arose which led to the conquest of the foreigners and the capture of their capital Zoan by Aahmes, the head of the 18th dynasty and founder of the Egyptian empire, which was ruled by this and the 19th and 20th dynasties, all of Theban kings, for about 400 years from B.C. cir. 1492. During this period Thebes was the capital of the kingdom, and of an empire of which the northern limit was Mesopotamia, and the

southern a territory upon the Upper Nile; and then, especially by the kings of the 18th and 19th dynasties, those great monuments which make Thebes the most wonderful site in Egypt were founded or excavated. The kings who have left the finest works are Thothmes III and Amenoph III of the 18th dynasty, Sethos I and Rameses II of the 19th, and Rameses III of the 20th (19th); but throughout the period of the empire the capital was constantly beautified. During the 20th dynasty the high-priests of Amen-ra gained the sovereign power, perhaps corresponding to Manetho's 21st dynasty, which he calls of Tanites, and which must in this case be considered as of Thebans. They continued to add to the monuments of the capital, though, like the later kings of the empire, their constructions were not of remarkable size. The 22d dynasty, headed by Sheshenk I, the Shishak of the Bible, seems still to have treated Thebes as the capital, although they embellished their native city, Bubastis, in the Delta. Under them and the kings of the 23d, who were evidently of the same line, some additions were made to its temples, but no great independent structures seem to have been raised. The most interesting of these additions is Shishak's list of the countries, cities, and tribes conquered or ruled by him, including the names of those captured from Rehoboam, sculptured in the great temple of El-Karnak. Under the 23d dynasty a period of dissension began, and lasted for some years until the Ethiopian conquest, and establishment of an Ethiopian dynasty, the 25th, about B.C. 714 (see De Rouge's interesting paper, *Inscr. Hist. du Roi Pianchi-Mériamoun*, in the *Rev. Arch. N. S.* viii, 94 sq.). At this time the importance of Thebes must have greatly fallen, but it is probable that the Ethiopians made it their Egyptian capital, for their sculptures found there show that they were careful to add their records to those of the long series of sovereigns who reigned at Thebes. It is at the time of the 25th dynasty, to which we may reasonably assign a duration of fifty years, that Thebes is first mentioned in

Scripture, and from this period to that of the capture of Jerusalem by Nebuchadnezzar it is spoken of as one of the chief cities of Egypt, or as No, "the city." Under the Ethiopians it was no more than a provincial capital; immediately after their rule it was taken twice at least by the Assyrians. Asshur-bani-pal, son and successor of Esar-haddon (Asshur-akh-idanna), who came to the throne about B.C. 667-666, in a first expedition defeated the troops of Tirhakah, and captured the city of Nî'a; a second time he invaded the country, which had revolted, and again captured Nî'a. The exact time of these events has not been fixed, but it is evident that they occurred either at the close of the rule of the Ethiopian dynasty, or early in that of the Saïte 26th, when Egypt was governed by the Dodecarchy. Tirhakah and Nîku, evidently Necho I, the father of Psammetichus I, are mentioned almost as late as the time of the second expedition. Psammetichus I came to the throne B.C. 664, and therefore it is probable that these events took place not long before, and about the time of, or a little after, his accession. These dates are especially important, as it is probable that the prophet Nahum refers to the first capture when warning Nineveh by the fate of her great rival. But this reference may be to a still earlier capture by the Assyrians, for Esar-haddon conquered Egypt and Ethiopia, though it is not distinctly stated that he captured Thebes (see Rawlinson, *Illustrations of Egyptian History, etc.*, from the *Cuneiform Inscriptions*, in the *Transactions of the R. S. Lit.*, 2d ser. vii, 137 sq.). The Saïte kings of the 26th dynasty continued to embellish Thebes, which does not seem to have suffered in its monuments from the Assyrians; but when their rule came to an end with the Persian conquest by Cambyzes, it evidently endured a far more severe blow. Later Egyptian kings still added to its edifices, and the earlier Greek sovereigns followed their example. The revolt against Ptolemy X Lathyrus, in which Thebes stood a siege of three years, was the final blow to its prosperity.

In subsequent times its population dwelt in small villages, and Thebes no longer existed as a city, and this has been the case ever since; no one of these villages, or those that have succeeded them—for the same sites do not appear in all cases to have been occupied—having risen to the importance of a city. At the present time there are two villages on the eastern bank, El-Karnak and El-Uksur (Luxor); the former, which is inconsiderable, near the oldest part of ancient Thebes; the latter, which is large and the most important place on the site, so as to deserve to be called a small town, lying some distance to the south on the river's bank. Opposite El-Karnak is the ruined village of El-Kurneh, of which the population mainly inhabit sepulchral grottos; and opposite El-Uksur is the village of El-Ba'irat, which, indeed, is almost beyond the circuit of the monuments of Thebes.

**IV. Description.**—The plan of the city, as indicated by the principal monuments, was nearly quadrangular, measuring two miles from north to south, and four from east to west. Its four great landmarks still are El-Karnak and El-Uksur upon the eastern or Arabian side, and El-Kurneh and Medinet-Habû upon the western or Libyan side. There are indications that each of these temples may have been connected with those facing it upon two sides by *grand dromoi*, lined with sphinxes and other colossal figures. Upon the western bank there was almost a continuous line of temples and public edifices for a distance of two miles, from El-Kurneh to Medinet-Habû; and Wilkinson conjectures that from a point near the latter, perhaps in the line of the colossi, the "Royal Street" ran down to the river, which was crossed by a ferry terminating at El-Uksur on the eastern side.

As Memphis is remarkable for its vast necropolis, Thebes surpasses the other cities of Egypt in its temples. The primeval kings of Egypt who ruled at the northern capital were tomb-builders, those who preferred the southern capital were rather temple-builders; and as the works of the former give us the best insight into the characteristics of the national mind, those of the latter tell us the history of the country under its most powerful kings. Thebes is the most thoroughly historical site in Egypt. The temples are not only covered with the sculptured representations and histories of the chief campaigns of the conquering kings and the similar records of their presents to the shrines, and many other details of historical interest, but they have the advantage of showing, in the case of the most important temple, or rather collection of temples, what was added under each dynasty, almost each reign, from the 16th century B.C. to the Roman dominion; and thus they indicate the wealth, the power, and the state of art during the chief part of the period for which Thebes was either the capital or an important city of Egypt. The following is the plan of an Egyptian temple (q. v.) of the age of the empire: An avenue of sphinxes, with, at intervals, pairs of colossal statues of a king, usually seated, led up to its entrance. The gate was flanked by lofty and broad wings, extending along the whole front of the temple, the long horizontal lines of which were relieved by tapering obelisks. The first hall was usually hypæthral, unless perhaps it had a wooden roof and was surrounded by colonnades. The second, but sometimes the third, was filled with columns in avenues, the central avenue being loftier than the rest, and supporting a raised portion of the roof. Beyond were the naos and various chambers, all smaller than the court or courts and the hall. This plan was not greatly varied in the Theban temples of which the remains are sufficient for us to form an opinion.—The great temple of El-Karnak, dedicated to Amen-ra, the chief god of Thebes, was founded at least as early as the time of the 12th dynasty, but is mainly of the age of the 18th and 19th. The first winged portal, which is more than 360 feet wide, forms the front of a court 329 feet wide, and 275 long. Outside the eastern portion of the south

wall of this court is sculptured the famous list of the dominions and conquests of Sheshen I, the Shishak of Scripture, which has already been mentioned. See SHISHAK. The great hall of columns is immediately beyond the court, and is of the same width, but 170 feet long: it was supported by 134 columns, the loftiest of which, forming the central avenue, are nearly seventy feet high, and about twelve in diameter; the rest more than forty feet high, and about nine in diameter. This forest of columns produces a singularly grand effect. The external sculptures commemorate the wars of Sethos I and his son Rameses II, mainly in Syria. Beyond the great hall are many ruined chambers, and two great obelisks standing in their places amid a heap of ruins.—More than a mile to the south-west of the temple of El-Karnak is that of El-Uksur (Luxor), a smaller but still gigantic edifice of the same character and age, on the bank of the Nile, and having within and partly around it the houses of the modern village.—On the western bank are three temples of importance, a small one of Sethos I, the beautiful Rameæum of Rameses II, commonly called the Memnonium, and the stately temple of Rameses

Great Hall at Karnak.

III, the Ramesëum of Medinet-Habû, extending in this order towards the south. Between the Ramesëum of Rameses II and that of Rameses III was a temple raised by Amenoph III, of which scarcely any remains are now standing, except the two great colossi, the Vocal Memnon and its fellow, monoliths about forty-seven feet high, exclusive of the pedestals, which have a height of about twelve feet. They represented Amenoph, and were part of the dromos which led to his temple.—Besides these temples of Western Thebes, the desert tract beneath the mountain bordering the cultivable land and the lower elevations of the mountain, in addition to almost countless mummy-pits, are covered with built tombs, and honey-combed with sepulchral grottos, which, in their beautiful paintings, tell us the lives of the former occupants, or represent the mystical subjects of the soul's existence after death. The latter are almost exclusively the decorations of the Tombs of the Kings, which are excavated

in two remote valleys behind the mountain. These tombs are generally very deep galleries, and are remarkable for the extreme delicacy of their paintings, which, like most of the historical records of Thebes, have suffered more at the hands of civilized barbarians in this century than from the effects of time. For fuller descriptions, see the numerous histories and books of travel on Egypt. The ruins have been copiously depicted photographically. See EGYPT.

V. *Biblical Notices.*—The most remarkable of the notices of Thebes in the Bible is that in Nahum, where the prophet warns Nineveh by her rival's overthrow. "Art thou better than No-Amon, that was situate among the rivers, [that had] the waters round about it, whose rampart [was] the sea, [and] her wall [was] from the sea?" Notwithstanding her natural as well as political strength, Thebes had been sacked and the people carried captive (iii, 8-10). The description of the

The Memnonium at Thebes.

city applies remarkably to Thebes, which alone of all the cities of Egypt was built on both sides of the river, here twice called, as now by the modern inhabitants, the sea. The prophecy that it should "be rent asunder" (Ezek. xxx, 16) probably primarily refers to its breaking-up or capture; but the traveller can scarcely doubt a second and more literal sense when he looks upon its vast torn and heaped-up ruins. The other notices are in Ezek. xiv, 15, and in Jer. xlv, 25. See No.

**THEBES, THE SEVEN HEROES OF**, in Grecian mythology, were a body of chieftains who engaged in the first Theban war. Jocaste, the mother of Œdipus, was inadvertently guilty of incest with her son, and bore him the twin-heroes Œteocles and Polynices, though some authorities name Eurygania as their mother. After the discovery of his incest Œdipus was banished, and fled, leaving his curse upon his children. Œteocles and Polynices agreed to reign alternately, a year at a time, and the former ascended the throne by virtue of seniority; but when the year expired he refused to make way for his brother, who thereupon fled to Adrastus, king of Argos, bearing with him the necklace and mantle of Harmonia, both of which were covered with jewels and were exceedingly precious, having been made by Vulcan, but which were to bring misfortune to the person into whose possession they might come. Polynices reached Argos at night, and met Tydeus, who had just arrived from Ætolia, and the two became involved in a quarrel, which Adrastus settled. An ancient oracle having commanded that the daughters of Adrastus should wed a lion and a boar, they were given to the visitors because they bore corresponding devices—Polynices a lion's, and Tydeus a boar's, head. Adrea became the wife of the former, and Deïpyre of the latter. Adrastus promised to recover the lost thrones for his sons-in-law, and directed his first efforts towards Thebes in behalf of Polynices—the war of the *Seven against Thebes* (see *Æschylus*). The leading heroes of the Argives having been summoned, Amphiaræus, Capaneus, Hippomedon, and Parthenopæus joined the expedition, thus completing the list of seven. Amphiaræus, a favorite of Jupiter and Apollo, a seer, foresaw the failure of the attempt, and endeavored to avoid participating in it by concealing himself, but was discovered, and compelled by his sense of honor to unite with his comrades. In the forest of Nemea the heroes suffered much from thirst; but, meeting with Hypsipyle of Lemnos, the nurse of young Opheltes, son of Lycurgus, they induced her to direct them to a spring, which she did—to the harm of Opheltes, however, whom a serpent destroyed in her absence. Funeral games were held in honor of the dead, but the gods had decreed the ruin of the expedition. Tydeus was sent in advance to negotiate, but without other result than that fifty men surprised him while returning, whom, with the single exception of Maon, he slew with his own hand. The heroes then took possession of all approaches to the city, and established themselves before the several gates. The seer Tiresias warned the Thebans that the city must fall, unless some one should voluntarily sacrifice himself for its deliverance. Menœceus accordingly threw himself headlong from the wall, and the war began. Capaneus had already mounted the wall when Jupiter's lightning smote him to the ground, and with him fortune fled. Œteocles and Polynices slew each other in single combat. Five of the seven heroes fell. Amphiaræus fled, and was received by Jupiter into the earth, while Adrastus escaped on his divine steed Arion, the offspring of Neptune. The victorious Thebans forbade the burial of their enemies on pain of death; and Creon caused Antigone, who had performed the last rites of love on the remains of her brother Polynices, to be buried alive. The humane intercession of Theseus, king of Athens, ultimately induced the Thebans to withdraw their cruel prohibition. Adrastus subsequently took up the sword again, and led the sons of the heroes, the so-called Epigoni, in a victorious campaign against Thebes.

**The'bez** (Heb. *Tebets'*, תֵּבֵצ, *conspicuous*; Sept. Θῆβης [v. r. Θαιβας] and Θαβαι; Vulg. *Thebes*), a place mentioned in the Bible only as the scene of the death of the usurper Abimelech (Judg. ix, 50). After suffocating a thousand of the Shechemites in the hold of Baal-berith by the smoke of green wood, he went off with his band to Thebez, whither, no doubt, the rumor of his inhumanity had preceded him. The town was soon taken, all but one tower, into which the people of the place crowded, and which was strong enough to hold out. To this he forced his way, and was about to repeat the barbarous stratagem which had succeeded so well at Shechem, when a fragment of millstone descended and put an end to his turbulent career. The story was well known in Israel, and gave the point to a familiar maxim in the camp (2 Sam. xi, 21). The geographical position of Thebez is not stated; but the narrative leaves the impression that it was not far distant from Shechem. Eusebius defines its position with his usual minuteness. He says, "It is in the borders of Neapolis . . . at the thirteenth mile on the road to Scythopolis" (*Onomast.* s. v. "Thebes"). Just about the distance indicated, on the line of the old Roman highway, is the modern village of *Tubas*, in which it is not difficult to recognise the Thebez of Scripture. It was known to Hap-Parchi in the 13th century (Zunz, *Benjamin*, ii, 426), and is mentioned occasionally by later travellers (Schwarz, *Palest.* p. 152). It stands on a hill-side at the northern end of a plain surrounded by rocky mountains. The hill is skirted by fine olive groves, and the whole environs bear the marks of industry and prosperity. It is defective, however, in water; so that the inhabitants are dependent on the rain-water they keep in cisterns, and when this supply fails, they must bring it from a stream, Fari'a, an hour distant (Robinson, *Bibl. Res.* iii, 305). Some large hewn stones in the walls of the modern houses, and a number of deep wells and cisterns in and around the village, are the only traces of antiquity now remaining (Van de Velde, *Travels*, ii, 335; Porter, *Handbook*, p. 348).

**Thebutes, or Thebuthis.** All that is known of this person is the statement that Eusebius (*Hist. Eccles.* iv, 22) quotes from Hegesippus to the effect that Thebutes made a beginning secretly to corrupt the Church of Jerusalem, because Simon the son of Cleophas was appointed to be bishop of the Christians of that city instead of himself.

**Theca** (Θήκη, a *case*), or **BURSE** (*bursa*, a "purse"), a case-cover containing the corporals, and presented to the priest at mass. It was of square form, made usually of rich stuff, and lined like a bag with fine linen or silk; on the upper side was a sacred image or cross. One of the 15th century, of canvas, remains at Hasett, painted with the Veronica (q. v.) and the Holy Lamb.

**Thecla**, the name of several saints of the Romish Church.

**1.** The daughter of people living at Iconium, who is occasionally mentioned by Epiphanius, Ambrose, Augustine, and other Church fathers, and of whom tradition relates that she was converted through the preaching of Paul in the house of Onesiphorus, and that she thereupon renounced all worldly possessions and separated from her betrothed, a wealthy man named Thamyris. No arguments or appeals could change her course. Both she and Paul were imprisoned; and she was condemned to death by fire, while the apostle was banished. A cloud, however, extinguished the fire, and Thecla, uninjured, accompanied Paul to Antioch. To escape the persistency of a second wooer of noble rank named Alexander, she took refuge with a noble widow whose name was Tryphæna. Again she was condemned to die, this time by the teeth of wild beasts, and again she escaped uninjured, the animals crouching at her feet or being killed by thunder-bolts. She now assumed male clothing and followed Paul to Myra, where she received

direction from him to teach the heathen the truths of Christianity. She thereupon returned to her native city, and afterwards went to Seleucia, where she succeeded in converting many people and in healing large numbers of the sick. A shining cloud accompanied her as she went about. When she died, many miracles were wrought at her grave and by her relics. Her day is variously given—May 18 or 19, or Sept. 23 or 24. A treatise entitled *Περίοδοι Παυλὶ καὶ Θεκλᾷ*, probably the work of an Asiatic presbyter, was in circulation as early as the 3d century. It mentioned her missionary tours in the company of Paul, and her miracles; recommended the celibate state, and asserted its holiness; inculcated the duty of praying for the dead, and belief in purgatory; and was branded as Apocryphal by Tertullian, Jerome, and pope Gelasius I. See *Acta SS.* 23. Sept. (Antw. 1757), vi, 546-568; Baronius, *Annal. Eccl.* (Col. Agrip. 1609), i, 398-402; *Unschuld. Nachr. v. alten u. neuen theol. Sachen* (Leips. 1702), p. 136 sq. See THECLA AND PAUL (*Acts of*).

2. A reputed native of Sicily of noble rank. She was instructed in Christianity by her mother, Isidora, aided many persecuted Christians, and gave burial to the bodies of many martyrs which she had purchased. For this she was brought to trial, but escaped the threatening danger. Afterwards she instructed many heathen people, built a number of churches, and endowed with a rich income a bishopric which she founded. Jan. 10 is consecrated to her memory.

3. An alleged martyr, the associate of Mariana, Martha, Mary, and Enneis. She is reported to have lived near Asa, in Persia. A priest named Paul endeavored to persuade these virgins to renounce the Christian faith, and when they refused he caused them to be terribly scourged and then beheaded. Soon afterwards he became himself the victim of a violent death, as they had predicted. The memory of these martyrs is honored on June 9. See *Ausführl. Heil.-Lexikon* (Cologne and Frankf. 1719), p. 2132 sq.—Herzog, *Real-Encyklop.* s. v.

THECLA AND PAUL, *Acts of*. The name Thecla, which nowhere occurs in Scripture, occupies an important position in the Apocryphal writings of the New Test., because it is closely connected with that of the apostle Paul. Under the title *Acta Pauli et Theclæ* (first edited by Grabe, in his *Spicilegium SS. PP.* [Oxon. 1698; 2d ed. 1700]; then by Jones, *A New and Full Method of Settling the Canonical Authority of the New Testament* [Lond. 1726]; and finally by Tischendorf, in his *Acta Apost. Apocrypha* [Lips. 1851], and Wright, *Apocryphal Acts of the Apostles* [Syriac and English, Lond. 1871, 2 vols.]), we have an Apocryphal work extant which has furnished rich material for the so-called "Thecla Legend."

I. The Contents of it are as follows:

"When Paul had fled from Antioch and went up to Iconium, he was accompanied by Demas and Hermogenes, two men full of hypocrisy, who pretended unto Paul as though they loved him, but they loved him not. On the way Paul made the oracles of the Lord sweet unto them, teaching them the great things of Christ. Onesiphorus, having heard that Paul was coming to Iconium, went out to meet him, that he might bring him into his house. Now he had not seen Paul in the flesh, but Titus had told of him. He therefore went along the road to Lystra, looking for Paul among them that passed by. And when he saw Paul, he beheld a man small in stature, bald-headed, of a good complexion, with eyebrows meeting, and a countenance full of grace. For sometimes he appeared like a man, and sometimes he had, as it were, the face of an angel. And when Paul saw Onesiphorus, he smiled upon him. But Onesiphorus said, 'Hail, servant of the blessed God.' And Paul answered, 'Grace be with thee, and with thy house.' But Demas and Hermogenes were full of wrath and hypocrisy.

"When Paul had come into the house of Onesiphorus, there was great joy, and they bowed their knees and brake bread. And Paul preached unto them the word, saying,

"Blessed are the pure in heart, for they shall see God.

"Blessed are they that bear rule over themselves, for God shall speak with them.

"Blessed are they that have kept chaste their flesh, for they shall become the temple of God.

"Blessed are they that have kept themselves apart from this world, for they shall be called righteous.

"Blessed are they that have wives as though they had none, for they shall have God as their portion.

"Blessed are they which retain the fear of God, for they shall become as the angels of God.

"Blessed are they that have kept the baptism, for they shall have rest with the Father and the Son.

"Blessed are the merciful, for they shall obtain mercy, and shall not behold the bitter day of judgment.

"Blessed are the bodies of the virgins, for they shall be well pleased unto God, and they shall not lose the reward of their chastity.

"Blessed are they that tremble at the words of God, for they shall receive consolation.

"Blessed are they that are partakers of the wisdom of Jesus Christ, for they shall be called the sons of the Most High God.

"Blessed are they who, for the love of Christ, are departed from conformity to this world, for they shall judge the angels, and shall be blessed at the right hand of the Father, and they shall have rest for ever and ever."

"While Paul was thus speaking, there was a certain virgin, called Thecla, the daughter of Theocleia, betrothed to a man whose name was Thamyris; and she sat at a window which was close by, listening attentively to Paul's discourse concerning virginity and prayer; and she gave earnest heed to the things which were spoken, rejoicing with all her heart. And when she saw many women going in to hear Paul, she, also, had an eager desire that she might be deemed worthy to stand in his presence and hear the word of Christ."

"For three days and three nights Thecla listened to the apostle, till her mother sent for Thamyris to see whether he could induce her to come home. His endeavors were in vain, for Thecla only listened to the things which were spoken by Paul. Then Thamyris started up, and went forth into the street of the city, watching those that went in and came out of the house of Onesiphorus. And he saw two men striving bitterly one with the other, and he said, 'Tell me, I pray you, who is this that leadeth astray the souls of young men, and deceiveth virgins, so that they do not marry, but remain as they are? I promise to give you money, for I am one of the chief men of this city.' The men, who were Demas and Hermogenes, said unto him, 'Who indeed he is we know not, but this we know, that he deprives young men of wives, and maidens of husbands, saying unto them that in no other way can they have a resurrection than by not polluting the flesh, and by keeping it chaste.' At the supper which Thamyris gave them in his house, they advised him to bring the apostle before the governor, charging him with persuading the multitudes to embrace this new doctrine of the Christians. The governor, they said, will destroy him, and thou wilt have Thecla to thy wife; and we will teach thee that the resurrection which this man speaks of has taken place already, for we rose again in our children, and we rose again when we came to the knowledge of the true God."

"The next morning Paul was brought before the governor by Thamyris, who acted in accordance with the words of his advisers. The governor said to Paul, 'Who art thou, and what dost thou teach? for they bring no small accusation against thee.' But Paul, lifting up his voice, said, 'Forasmuch as I am this day examined concerning what I teach, listen, O governor! The living God, the God of retributions, he who is a jealous God, a God who is in need of nothing (*ἀρροδείς*), a God who taketh thought for the salvation of men, hath sent me to reclaim them from uncleanness and corruption, from all pleasure, and from death, so that they may not sin. Wherefore, also, God sent his own Son, whom I preach unto you, teaching men that they should rest their hope on him, who alone hath had compassion upon a world that was led astray, that men may no longer be under condemnation, but that they may have faith, and the fear of God, and the knowledge of holiness, and the love of the truth. If I therefore teach that which has been revealed to me by God, wherein do I go astray? When the governor had heard this, he ordered Paul to be bound and be put in ward, saying, 'When I shall be at leisure, I will hear him more attentively.'

"Thecla, having bribed the keeper of the door, was admitted by night to the imprisoned apostle, and sitting at his feet, heard the wonderful works of God. When she was found there, she was brought before the governor together with Paul; the latter was scourged and cast out of the city, but Thecla was ordered to be burned. Soon a pile was erected, and after she had made the sign of the cross she went up thereon, and the wood was kindled. When the fire was blazing, a heavy rain and hail came down from heaven, and thus Thecla was saved."

"Now Paul was fasting with Onesiphorus and his wife and children, in a new tomb, on the way from Iconium to Japhne. After several days, when the children were hungered, Paul took off his cloak and gave it to one of the children, saying, 'Go, my child, and buy bread.' On the way the boy met Thecla, who was looking for Paul. When she was brought to him, he thanked God for her safe deliverance. Thecla said to Paul, 'I will cut my hair, and will follow thee whithersoever thou goest.' But he answered, 'This is a shameless age, and thou art very fair. I fear lest another temptation come upon thee worse than

the first, and that thou withstand it not.' Thecla said, 'Only make me a partaker of the seal that is in Christ, and temptation shall not touch me.' But Paul answered, 'O Thecla, wait with patience and thou shalt possess the water.'

"And Paul sent away Onesiphorus and all his house unto Iconium, and went to Antioch with Thecla. As they were entering into the city, a certain ruler of the Syrians, Alexander by name, seeing Thecla, gave unto her in love, and would have given gifts and presents unto Paul. But he said, 'I know not the woman of whom thou speakest, nor is she mine.' At this Alexander embraced her in the street of the city. But as Thecla would not suffer this, she took hold of Alexander and tore his cloak and pulled off his crown. Ashamed of what had happened, Alexander had her brought before the governor, who condemned her to the wild beasts, allowing her, however, at her own request—that she might remain pure until she should fight with the wild beasts—to stay with a certain woman named Tryphæna.

"When the games were exhibited, they bound Thecla to a fierce lioness, but the beast licked her feet. And the people marvelled greatly. And the title of her accusation was 'Sacrilegious.' And the women cried out, 'An impious sentence has been passed in this city.' After the show, Tryphæna again received Thecla, for her daughter Falconilla was dead, and had said to her mother, in a dream, 'Mother, take this stranger, Thecla, in my stead, and she will pray for me, that I may be transferred to the place of the just.' And Thecla prayed, saying, 'O Lord God, who hast made the heaven and the earth, Son of the Most High, Lord Jesus Christ, grant unto this woman according to her desire, that her daughter Falconilla may live forever.'

"The next day Alexander came again to fetch Thecla. But Tryphæna cried aloud, so that Alexander fled away. And straightway the governor sent an order that Thecla should be brought. And Tryphæna, holding her by the hand, said, 'My daughter Falconilla, indeed, I took to the tomb; and thee, Thecla, I am taking to the wild beasts.' And Thecla wept very bitterly and said, 'O Lord God, in whom I have believed, to whom I have fled for refuge, thou who didst deliver me from the fire, do thou grant a recompense to Tryphæna, who hath had compassion on thy servant, and hath kept me pure.' When Thecla had been taken out of the hands of Tryphæna, they stripped her of her garments, and a girdle was given to her, and she was thrown into the theatre. And lions, and bears, and a savage lioness were set loose against her. But instead of killing Thecla, they tore one another. While she was praying, many more wild beasts were sent in. And when she had ended her prayer, she turned and saw a trench filled with water, and she said, 'Now it is time for me to wash myself.' And she cast herself in, saying, 'In the name of Jesus Christ, I baptize myself on the last day.' And the seals saw the glare of the fire of lightning, and floated about dead. And as she stood naked, there was a fiery cloud round about her, so that neither was she seen naked, nor could the wild beasts do her hurt. And when other beasts were cast into the theatre, the women wept again. And some of them threw down sweet-smelling herbs, so that there was an abundance of perfumes. And all the wild beasts, even as though they had been restrained by sleep, touched her not. When fierce bulls were let loose, Tryphæna fainted, and the multitude cried, 'Queen Tryphæna is dead.' Alexander now asked the governor to release Thecla, saying, 'If Cæsar hear of these things, he will destroy the city, because his kinwoman queen Tryphæna had died beside the theatre.' And the governor called for Thecla out of the midst of the wild beasts, and said unto her, 'Who art thou? and what hast thou about thee, that none of the wild beasts toucheth thee?' And she said, 'I, indeed, am a servant of the living God: and as to what there is about me, I have believed in the Son of God, in whom God is well pleased. Therefore hath not one of the beasts touched me. For he alone is the way of salvation, and the ground of immortal life. He is a refuge to the tempest-tossed, a solace to the afflicted, a shelter to them that are in despair; and, once for all, whosoever shall not believe in him shall not live eternally.' When she was released, she stayed with Tryphæna eight days. And she instructed her in the word of God, so that most, even of the maid-servants, believed. But Thecla desired to see Paul. When she was told that he was staying at Myra of Lycia, she went there, being dressed in man's attire. And when she saw him, she said, 'I have received the baptism, O Paul! For he that wrought together with thee for the gospel hath been effectual also with me for the baptism.' When Thecla told him that she was going to Iconium, Paul said to her, 'Go and teach the word of God.'

"In Iconium she went into the house of Onesiphorus 'where Christ made the light first to shine upon her.' After having tried in vain to convert her mother—Thamyris having died in the meantime—she went to Seleucia, where she enlightened many by the word of God, and where she died in peace."

This is the legend of Thecla. How great or how little the substratum of truth in it, we cannot decide.

The fact is that churches were built in honor of the "beata virgo martyr Thecla," in prose and rhyme the deeds of our heroine were celebrated; and Sept. 24 is commemorated in her honor.

II. *Date of Compilation.*—We have a long line of Greek and Latin fathers by whom Thecla is mentioned in such a manner as to lead to the supposition that whatever is said of her is the same as we find it in the *Acta Pauli et Theclæ*. As one writer has followed the other, our examination will be confined to the earliest testimony—to that of Tertullian. In his treatise *De Baptismo*, ch. xvii, we read: "But if any defend those things which have been rashly ascribed to Paul, under the example of Thecla, so as to give license to women to teach and baptize, let them know that the presbyter in Asia, who compiled the account, as it were, under the title of Paul, accumulating of his own store, being convicted of what he had done, and confessing that he had done it out of love to Paul, was removed from his place. For how could it seem probable that he who would not give any firm permission to a woman to learn should grant to a female power to teach and baptize?" It has been taken for granted that the meaning is that a presbyter of Asia, somewhere towards the end of the 1st century, compiled a history of Paul and Thecla, and, instead of publishing it as a true narrative, either in his own name or with any name at all, but in good faith, published it falsely, and therefore wickedly, under the name of Paul, as though he were himself the writer; that he was convicted of his forgery, and deposed from the priesthood. This account has been marvellously dressed up, and some of its advocates have ventured to say that a Montanist writer of the name of Leucius was the real author of these *Acts* (Tillemont, *Mémoires*, ii, 446). Jerome (*Catalogus Script. Eccl.* c. 7), commenting upon the passage of Tertullian, says that the presbyter who wrote the history of Paul and Thecla was deposed for what he had done by John (*apud Johannem*) the apostle. That Jerome relied upon Tertullian is evident from his statement; but his conduct in fathering the story of the deposition by John upon Tertullian is inexcusable, because no such statement was made by Tertullian. On the other hand, we must bear in mind that, according to tradition, alleged or real events which occurred in Asia Minor and touched upon the life of the Church have been brought in connection with John. Thus he is said to have confuted Cerinthus, Ebion, Marcion, and even Basilides. Even miracles which were first narrated by disciples of the apostles or by bishops of Asia Minor were afterwards referred to him (comp. *Patr. Apost. Opp.* ed. Gebhardt, Harnack, Zahn, i [ed. i], 194). Our passage is a proof of this. Tertullian speaks of an Asiatic presbyter, Jerome adds *apud Johannem*, and his copyists write, instead of "*apud Johannem*," a *Johanne*.

Now, putting aside Jerome's commentary and the other patristic testimonies, which will be found collected at great length in Baronius, Tillemont, and Schlau, we see from the external evidence as contained in Tertullian's passage that the *Acts of Paul and Thecla* must have existed in his time. To this external evidence of antiquity we have the internal, furnished by the *Acts* themselves. This will determine nothing as to who was their author, but will be valuable in helping us to assign an approximate date. An indication of the early origin of a Christian document is the absence of quotations from the New Test. True, this is only a negative evidence; but when found in connection with sayings attributed to Christ or the apostles which are not found in the canonical Scriptures, it tends to establish antiquity. Now there is not a single direct citation from the New Test.; and when Paul preaches upon the Beatitudes, words are boldly put into his mouth which are not in Scripture. This was becoming enough in a contemporary of the apostle, or in a writer of the 2d century who had received them through a not far-distant tradition; but it would have been unbecoming in a writer of the 3d century, and, speaking in general terms,

it was what writers of the 3d century seldom did. Thus we could quote Clement of Rome, Ignatius of Antioch, Justin Martyr, Polycarp, besides referring to the art. SAYINGS, TRADITIONAL, OF CHRIST, that such has been the case; and it is therefore not a matter for surprise, but it is exactly what we might be prepared to expect, if the *Acts of Thecla* are, in the main, a document of the 2d century, that the writer should represent Paul not only as saying "Blessed are the merciful, for they shall obtain mercy," but "Blessed are they which have kept the baptism, for they shall have rest with the Father and the Son." A further indication of the comparatively early date of this composition is its teaching the salvability of departed heathens. All early Christendom believed in the efficacy of prayers for those who had fallen asleep in the faith of Christ. But it was only the first two centuries which taught that prayer was of avail for such as had died without baptism and without the knowledge of Christ on earth. Thus we have a parallel case to the prayer of Thecla for Falconilla in the *Passio Perpetuae et Felicitatis*, where we read that Perpetua, through her prayers, saved her brother Dinocrates, who had died without baptism, "from the dark place;" and from the place of sufferings he comes to the place full of light. Augustine, commenting upon this (*De Origine Animæ*, i, 10; iii, 9), says that Dinocrates must have been baptized, and that he was suffering in consequence of some childish fault committed after baptism. But Augustine's statement that the boy was baptized is arbitrary, because best suited to his own theory. But is it in the least likely that Dinocrates had been baptized, when Perpetua herself was unbaptized, and only received baptism shortly before her martyrdom? Now in the 2d century it was not an uncommon thing to pray for non-Christians; but after the 2d century, not only do we lose all trace of prayer for non-Christians who had departed this life, but we find the contrary opinion firmly maintained. So entirely was this the case that, as we have seen, Augustine, "in order to get rid of the plain inference to be drawn from St. Perpetua's prayer for her brother, was driven to invent the ingenious but scarcely amiable explanation that a little child who had died at the early age of seven years was suffering purgatorial torments for some infantile fault committed *after* his baptism."

Another indication of an early date is the fact that the name *Χριστιανοί*, which occurs twice in the *Acts*, is only used by the two companions of Paul, who call the attention of Thamyris to this fact as a point for accusation. This would place the compilation of the *Acts* at a time when the name "Christian" was sufficient to condemn any one, i. e. at about the time of Trajan, in the year 115. We may feel a reasonable confidence, then, that, whether the legend of Thecla be true or false, it was composed at least before A.D. 200, perhaps somewhere between 165 and 195, and most probably within a few years of the middle of that period.

III. *Object of the Author.*—Whoever may have been the author of the *Acts*, the question has been asked, What was his object? It has been said that he intended to defend and maintain the Montanist theory, and the most important evidence in favor of the Montanist authorship of the *Acts* was taken from the concluding words, "she illuminated many by the word of God;" by which is meant—illumination being taken as a synonym for baptism—she also baptized those whom she converted. Now, leaving aside the statement of Jerome that "Thecla baptized a lion," a statement which he himself calls a *fabula*, and which he did not find in Tertullian, whom he follows, and who would have undoubtedly stigmatized it as nonsense, for such it is; and, without investigating how he came to make such a statement, or whether it was originally meant that Thecla baptized a person of the name of *Leo* (which means, in Latin, "lion"), we know that Thecla baptized none except herself. The only point in the argument now are the words πολλοὺς ἐφώτισεν τῷ λόγῳ τοῦ Θεοῦ, "she illuminated many by the word of God," which, as Basil

of Seleucia (whether he is the author of the *Acts* or merely their editor) says, mean that "Thecla baptized those whom she converted to Christ." Now it is true that φωτίζειν has been used by Gregory of Nazianzum, Gregory of Nyssa, Eusebius (*Hist. Eccl.* iii, 23, 8), and Methodius (*Conv. Decem Virg.*) in the sense of "baptize," and φωτισμός for "baptism," and by Clemens Alexandrinus, Athanasius, Chrysostom, Justin Martyr (*Apol.* i, 61; comp. 65); but this is not the only meaning, for, as Justin himself says, καλεῖται τοῦτο τὸ λουτρὸν φωτισμός ὡς φωτισμοῖν τὴν διάνοιαν τῶν ταῦτα μανθάνοντων, thus deriving the new signification of the word from the old; and Dionysius Areopagita, Clemens Alexandrinus, Chrysostom, and Cyril of Alexandria use the word φωτισμός for "illumination," "instruction," which signification is required here by the addition τῷ λόγῳ τοῦ Θεοῦ. We have here the same *usus loquendi* that we find in Eph. iii, 9; Heb. vi, 4; x, 32; and so also in the Sept., where it is used for ΠΙΣΤΙΣ. For examples, comp. Stephanus, *Theas. Græc. Ling.* s. v. φωτίζειν. We are not told that she instructed in public, which is the main point; and if she had preached at all, it probably was no sermon in the strict sense of the word, but a missionary discourse. This inference we make from the *Acts* themselves, according to which she lived among heathen; there was not as yet a congregation, consequently also no office. That women taught in the apostolic age was nothing uncommon, for of Aquila and Priscilla we are told (*Acts* xviii, 26) that they took Apollo καὶ ἀκριβέστερον αὐτῷ ἐξέθεντο τὴν ὁδὸν τοῦ Θεοῦ; and in Rom. xvi, 3 sq. Paul calls them τοὺς συνεργούς μου ἐν Χριστῷ.

After all, we cannot perceive any Montanistic tendency in the author of the *Acts*, for his Thecla does not remind us of the Montanistic prophetesses, who even performed ecclesiastical functions. That Thecla baptized others we are not told; and when Basil of Seleucia states this of her, he does it because of his interpretation of φωτίζειν, and indicates that in the beginning of Christianity in Asia Minor such things had happened. We need only refer to the letter of Firmilian, bishop of Caesarea, addressed to Cyprian against pope Stephen (the 75th of Cyprian's *Letters*), and to the *Apostolic Constitutions* (iii, 9). The latter expressly forbid women to baptize and teach, it being ἐπισφαλές, μᾶλλον δὲ παράνομον καὶ ἀσέβες, as well as against the Scriptures. We can very well perceive how, in the face of such tendencies, which in the 3d century could have been only of a very rare occurrence, a book must have been welcomed out of which the authority of an apostle could be quoted in favor of female prerogatives in the Church. Being disposed to generalize a single case, the difference in the time and persons was overlooked, and this special case was applied erroneously to different cases. For what we know of Thecla's baptism is, that she asked the apostle for that rite, but he exhorted her to be patient and wait. At Antioch, when in the arena, and believing that she will surely die without having received the baptism, she throws herself into the trench. After her deliverance she remains eight days with Tryphæna, and instructs her in the word of God. We are not told that she baptized some, but that most of the maid-servants believed, and that there was great joy in the house. Then she comes to Paul at Myra, saying, ἔλαβον τὸ λουτρὸν, Παῦλε· ὁ γὰρ σοὶ συνεργήσας εἰς τὸ εὐαγγελίον καὶ μοὶ συνήργησεν εἰς τὸ λούσασθαι (ch. xl). Paul does not utter his disapprobation, but keeps quiet. But when she is about to leave, he does not say to her that she should teach and baptize, but "go and teach." The faculty which Jesus gives to his disciples (*Matt.* xxviii, 19, 20) is entirely different from the one which Paul gives to Thecla.

Thecla's case is exceptional on account of her twofold martyrdom; being left by Paul and the adherents to his teaching, and being in *periculo mortis*, she baptizes herself, using the Christian formula. According to the whole narrative, Paul cannot make any objection, because God has made himself known in delivering her,

and the action of a martyr cannot be prescriptive as to others. Besides, the author brings before us a time in which ecclesiastical affairs had not yet taken a definite form, and there is not the least evidence that the object of the author of the *Acts* was to support Montanistic doctrines, and to establish the same by the authority of the apostle Paul. The only object which the author could have had in view was to describe the apostolic time, in which he succeeded only in part. It is a time when the Church commences to develop herself. But, using his own judgment in this respect, it becomes fatal, since the author connects the person of an apostle

with deeds and doctrines which in this connection must be detrimental to the order of the Church. Such a writing could only be a great hindrance to the leaders of the Church; and in order to render it of no effect, it was severely criticised, and its author called to account and deposed. Yet the possibility of a historical substratum in the *Acts* is not precluded, although it is difficult to say where history ends and legend commences.

IV. *Sources of the Acts.*—We have already stated that the *Acts* contain not a single direct citation from the New Test., yet the student cannot fail to discover many instances in which the New Test. has been used. Thus:

Matt. iii, 17,	comp. with <i>Acta P. et Th.</i> ch. xxxvii,	εις δὲ ἐν εὐδόκησεν ὁ Θεὸς νῖόν αὐτοῦ (comp. also Matt. xii, 18; xvii, 5).
v, 8, 7,	" " " " " " " " " " " "	where the Beatitude are formed according to those of Matt.
viii, 19,	" " " " " " " " " " " "	ἀκολουθήσω σοι ὅπου δ' ἂν πορεύῃ (comp. also Luke ix, 57).
x, 42,	" " " " " " " " " " " "	οὐκ ἀπολέσονται τὸν μισθόν.
xii, 46,	" " " " " " " " " " " "	μη' ἄλλος σε πειρασμός λήψεται χεῖρῶν τοῦ πρώτου (comp. also Matt. xxvii, 64; John v, 14; 2 Pet. ii, 20).
xvii, 5,	" " " " " " " " " " " "	νεφέλῃ ἀνῶθεν ἐπεσκιασεν.
xxi, 9,	" " " " " " " " " " " "	εὐλογημένος.
xxvi, 47, 55,	" " " " " " " " " " " "	μετὰ ξύλων.

		ἀνάπαυσιν ἔξουσιν εἰς αἰῶνα αἰώνων.

That the author of the *Acts* was acquainted with the second epistle to Timothy is unquestionable, because there are many striking parallels between that epistle and the *Acts*, which need not be mentioned.

V. *Literature*.—Espencei *Opera Omnia* (Paris, 1619), p. 998 sq.; Baronius, *Martyrologium Romanum* (Venetia, 1593), ad 23 Sept. p. 431-434; id. *Annales Ecclesiastici ad Annum 47* (Lucæ, 1738), i, 338 sq.; Pantinus, *Notæ in Ed. Librorum II Basilii Seleucia in Isauria Episcopi de Vita ac Miraculis D. Theclæ* (Antv. 1608), p. 222-238; Horneus, *Hist. Eccl.* (Brunsvici, 1649), i, 40-42; *Vetusius Occidentalis Ecclesiæ Martyrologium*, etc. (ed. Franc. M. Florentinus [Lucæ, 1668]), notæ ad 12 et 23 Sept.; Combefis, *Bibliotheca Græcorum Patrum Auctarium Novissimum* (Par. 1672), pt. i; *Not. ad Nicetæ Paphl. Literaturzeitung* (ibid. 1877), p. 543. (B. P.)

**Theco'e** (Θεκωῆ), the Greek form (1 Macc. ix, 33) of the Heb. name (2 Chron. xx, 20) ΤΕΚΟΑ (q. v.).

**Theft** (חֵבֶל, κλέμμα or κλοπή) is treated in the Mosaic code in its widest bearings (Exod. xxii, 1 sq.), especially when accompanied by burglary or the abrehption of animals (Josephus, *Ant.* xvi, 1, 1; Philo, *Opp.* ii, 336). If the stolen property had already been sold or rendered useless, the thief was required to make fivefold restitution in cases of horned cattle (comp. 2 Sam. xii, 6; Philo, *Opp.* ii, 337), or fourfold in case of sheep

or goats; but only twofold in case the living animal was restored. But the statute likewise included the stealing of inanimate articles, as silver and gold (Josephus, *Ant.* iv, 8, 27). The prominence given to the former kind of theft is explainable on the ground of the pastoral characters of the Hebrews (comp. Justin. ii, 2; Walther, *Gesch. d. röm. Rechts*, p. 807; *Sächs. Criminal-Codez*, art. 226; Marezoll, *Criminal-Codez*, p. 388). Any other kind of property might easily be found and recovered, and hence its theft was punished by its simple restoration, with a fifth part of the value added for loss of use (Lev. v, 22 sq.; vi, 3 sq.). Rabbinical legislation on this point may be seen in the Mishna (*Baba Metsiah*, ii). From Prov. vi, 30, Michaelis infers a sevenfold restitution in Solomon's time, but the passage probably speaks only in round numbers. On the ancient Greek laws, see Potter, *Antiq.* i, 364 sq.; and on that of the twelve tables, Adam, *Rom. Antiq.* i, 426; Abegg, *Strif-rechtswiss.* p. 449; or generally Gellius, xi, 18; on that of the modern Arabs, see Wellsted, *Travels*, i, 287; on the Talmudic, see Otho, *Lex. Rab.* p. 253. The Rabbinical interpretations of the law are given in the Mishna, *Baba Kamma*, vii sq. If the burglar suffered a fatal wound in the act by night, the act was regarded as a justifiable homicide (Exod. xxii, 2). So likewise in Solomon's laws (Demosth. *Timoer.* p. 736) and among the ancient Romans (Heinecc. *Antiq. Jur. Rom.* IV, i, 3, 499), as well as Germans (Hanke, *Gesch. d. deutsch. peinl. Rechts*, p. 99). Kidnapping (*plagium*) of a free Israelite was a capital crime (Exod. xxi, 16; Deut. xxiv, 7), punishable with strangulation (*Sanhedr.* xi, 1); and was an act to which a long line of defenceless sea-coast like Palestine was peculiarly liable from piracy. A similar penalty prevailed among the ancient Greeks (Xenoph. *Memor.* i, 2, 62; Demosth. *Philipp.* p. 53) and Romans after Constantine (see Marezoll, *Criminalrecht*, p. 370; Reim, *Criminalr. d. Röm.* p. 390); comp. Philo, *Opp.* ii, 338. See generally Michaelis, *Mos. Recht*, vi, 66 sq., 83 sq. See STEAL.

**THEFT, CHRISTIAN TREATMENT OF.** In the early Church theft was reckoned among the great crimes which brought men under public penance. Among St. Basil's canons there is one that particularly specifies the time of penance. The thief, if he discover himself, shall do one year's penance; if he be discovered by others, two: half the time as a prostrator, the other half a costander.—Bingham, *Christ. Antiq.* bk. xvi, ch. xii, § 4.

**Theile**, CARL GOTTFRIED WILHELM, doctor and professor of theology, was born at Grosscorbetta, near Merseburg, Feb. 25, 1799, and died at Leipsic, Oct. 8, 1853. He wrote, *De Trium Evangeliorum Necessitudine* (Lips. 1823);—*Notitia Novi Commentarii in Novum Testamentum* (ibid. 1829);—*Tabulæ Rerum Dogmaticarum Compendiariæ* (ibid. 1830);—*Christus und die Vernunft* (ibid. 1830);—*Commentarius in Epistolam Jacobi* (ibid. 1839);—*Zur Biographie Jesu* (ibid. 1837);—*Thesaurus Literaturæ Theologicæ Academicæ, sive Recensus Dissertationum*, etc. (ibid. 1840);—*Pro Confessionis Religione adversus Confessionum Theologum* (ibid. 1850). Besides the above, he edited, together with R. Stier, *Polyglotten-Bibel zum Handgebrauch* (Bielefeld, 1854, and often, 6 vols.); he also edited Van der Hooght's *Hebrew Bible* (Leips. 1849, and often), together with *Explicatio Epicrisæ Masorethicarum; Conspectus Lectionum*, etc. This is one of the best editions of the Hebrew Bible. He also published, *Novum Testamentum, Græce et Germanice* (ibid. 1852, and often); and *Novum Testamentum Græce, ex recognitione Knapii emendatus edidit argumentorumque notationes locos parallelos annotationem criticam et indices adjecit* (7th ed. ibid. 1858; 11th ed. ibid. 1875, by Oscar von Gebhardt). See Fürst, *Bibl. Jud.* iii, 419; Winer, *Handbuch der theol. Literatur*, i, 85, 237, 302, 552; ii, 809; Zuchold, *Bibl. Theol.* ii, 1320 sq.; Schrürer, *Theolog. Literaturzeitung*, 1876, p. 1 sq. (B. P.)

**Theiner, Augustin**, a Roman Catholic divine,

was born April 11, 1804, at Breslau, in Silesia. He first studied theology, afterwards philosophy and jurisprudence, and at Halle, in 1829, was made doctor *utriusque juris*. For several years he collected material at the libraries of Vienna, Paris, and London for canonical disquisitions. Shortly before his promotion he published, together with his brother Johann Anton (q. v.), *Die Einführung der erzwungenen Ehelosigkeit bei den christlichen Geistlichen und ihre Folgen* (Altenburg, 1828, 2 vols.); but he soon perceived his errors, and went to Rome, where he entered the Congregation of St. Philip Neri, and received holy orders. He remained in Rome, and in 1855 Pius IX appointed him prefect of the Vatican archives. In 1870 he retired from his office, and died Aug. 10, 1874. Of his many writings we mention, *Commentatio de Romanorum Pontificum Epistolarum Decretalium Antiqua Collectionibus et de Gregorii IX P. M. Decretalium Codice* (Lips. 1829):—*Recherches sur plusieurs Collections Inédites de Décrétales du Moyen-âge* (Paris, 1833):—*Geschichte der geistlichen Bildungsanstalten* (1835):—*Cardinal Frankenbergs und sein Kampf für die Kirche* (Freiburg, 1850):—*Zustände der kuthol. Kirche in Schlesien von 1740 bis 1758* (Ratisbon, 1852, 2 vols.):—*Geschichte des Pontificats Clemens XIV* (Paris, 1853, 2 vols.):—*Vetera Monumenta Historica Hungarum Sacram Illustrantia* (Rome, 1859, 1860, 2 vols.):—*Vett. Monum. Poloniae et Lithuaniae Gentiumque Finistimarum Historiam Illustrantia* (ibid. 1860–63, 3 vols.):—*Vett. Monum. Slavorum Meridionalium Histor. Illustr.* (1863):—*Codex Domusai Temporalis Sanctae Sedis* (1861 sq., 3 vols.). He also published a new edition of the *Annals* of Baronius, and worked assiduously upon the continuation of this gigantic work. See Winer, *Handbuch der theolog. Literatur*, i, 603, 828; ii, 5, 800; Zuchold, *Bibl. Theol.* ii, 1323 sq.; *Theolog. Universal-Lex.* s. v.; *Regensburger Real-Encyklop.* s. v.; *Literarischer Handweiser für das kuthol. Deutschland*, 1864, p. 148 sq.; 1874, p. 303 sq. (B. P.)

**Theiner, Johann Anton.** brother of Augustin, was born at Breslau, Dec. 15, 1799. He studied theology, was made chaplain in 1823 in Zobten on the Bober, and in 1824 was appointed professor of exegesis and canon law at Breslau. The lively interest which he took in the reformatory movements of his Church obliged him to give up his lectures, and he entered upon ministerial duties at different places. In 1845 he sided with the German Catholic movement, from which he soon withdrew, in 1848, and lived excommunicated by his Church until 1855, when he was made custos of the university library at Breslau, where he died, May 15, 1860. He wrote, *Descriptio Codicis qui Versum Pen-tateuchi Arabicam continet* (Berlin, 1822):—*Die zwölf kleinen Propheten* (Leips. 1828):—*Das fünfte Buch Mo-sis* (ibid. 1831):—*De Pseudosidoriana Canonum Collectione* (Breslau, 1837):—*Die reformatorischen Bestrebungen der kuthol. Kirche* (Altenburg, 1845):—*Das Seligkeitsdogma in der kuthol. Kirche* (ibid. 1847):—*Ent-hüllungen über Lehren u. Leben der kuthol. Geistlichkeit*. See Winer, *Handbuch der theolog. Literatur*, i, 174, 603; ii, 22, 800; *Theologisches Universal-Lex.* s. v.; *Regensburger Real-Encyklop.* s. v.; Zuchold, *Bibl. Theol.* ii, 1322; Fürst, *Bibl. Jud.* iii, 419. (B. P.)

**Theism.** The etymological opposite of theism can only be *atheism*, since the word designates a conception of the universe according to which a Deity rules over nature and men, and the atheistic view denies the existence of the Deity and divine powers. Various specific contrasts are, however, contained under this general meaning of the term, as monotheism and polytheism, or deism and pantheism.

The dispute between monotheism and polytheism is no longer open. Philosophy and theology have long been agreed that the Deity can be but one, and that the idea of a multiplicity of gods involves a *contradictio in adjecto*. There can be but one supreme, perfect, absolute Being, and such a Being is required even if the

superior orders generally of supernatural beings be included under the idea of the Deity. This doctrine has, moreover, the support of human experience, since history shows that in every instance where a thorough development of polytheism has been reached, it eventuates in monotheism to the extent of subordinating the many gods to one who is supreme, or of regarding them as simple modes of conceiving of his nature, powers, or manifestations. It may be added that the converse idea, on which the origin of polytheism is found in pantheistic identifications of the Deity with nature and its forces, affords the most satisfactory explanation possible of the beginnings and growth of this error.

The monotheistic conception once received, however, opens the way to discussions respecting the nature of the Deity and of his relations to the universe, and compels recognition of the issue between deism and pantheism. For the conceptions which underlie the terms, we refer to the articles PANTHEISM and DEISM, and in this place note merely that the term *deism* designates that conception of the world on which God is not only different, but also distinct, from the universe, and which therefore denies the immanence of God in the world under any form, and constitutes the direct contradiction to pantheism. It is evident that this deism harmonizes with Christianity as little as does pantheism itself. It is to be noted, however, that the Scriptures return no direct and positive answer to the question, How is the relation of God to the universe to be conceived? and speculation is accordingly compelled to attempt the solution of the problem after its own fashion. *Theology* has attempted the solution—with what degree of success it does not belong to this article to determine, since theism is not a *theological*, but a *philosophical*, term.

The modern literature of philosophy apprehends the idea of theism in a more limited meaning than that indicated above, and understands by the term that tendency and those systems which attempt to mediate between pantheism and deism, and seek to solve the theological problem in question by the method of free philosophical inquiry. Such endeavors grew directly out of the development of the modern philosophy of Germany, beginning with Kant and passing through Fichte, Schelling, Hegel, Herbart, etc., until deism and pantheism came to be direct contradictories within the domain of philosophy itself. A removal of the difficulty was evidently demanded by the state of philosophy; by the considerations that pantheism inevitably leads to atheism or anthropotheism by including the world of nature and mankind in the *essence* of the Deity, and that it contradicts the indestructible and undeniable facts of human consciousness; while deism renders an infinite and absolute Being impossible by its denial of any substantial bond which connects God and the world, and its consequent assertion of the limitation of the Deity.

The object of theistic speculation, it may be assumed, was correctly stated by the younger Fichte in his essay *Ueber den Unterschied zwischen eihischem und naturalistischem Theismus*, in the *Zeitschr. für Philosophie u. philosophische Kritik* (Halle, 1856), p. 229, in these words: "Theism denotes for us the altogether general idea that the absolute world-principle, whatever differences of opinion respecting the limits within which it may be objectively apprehended may obtain, can yet in no case be conceived of as blind and unconscious power under the category either of a universal substance or of an abstract impersonal reason, and must be apprehended as a being having existence *in and for itself*, to whose fundamental attribute human thought can find no other analogy and form of expression than that of *absolute self-consciousness*. Connected with this conception of the Absolute Spirit, and necessarily leading up to it, is the equally general idea that the universal fact of the interconnection of the world indicates a beginning in accident and blind chance no more than it affords room for the thought of an absolute necessity which could not be otherwise. The only appropriate thought, in

view of the conditions of the world, is the intermediate idea of *adaptation to an end*, which, on the one hand, implies the possibility of a differently conditioned world-order, but, on the other, asserts that the existing order is most perfect, and projected in harmony with the ideas of the good and the beautiful. This result of an empirical observation of the world, which may infinitely enlarge itself by the study of particulars in all the departments of nature, and may advance to a steadily increasing degree of certainty, compels metaphysical thought to ascend to the idea of an absolute original reason which determines the end; to whose attributes, as demonstrated in the universe, human language is once more unable to find other designations than perfect thought and a will which requires the good." It will be observed that the leading idea in this definition is the existence of God *in and for himself*, or of his absolute self-conscious being. The prevalence of this idea determined the general current of speculation to disagree with the Hegelian doctrine of the Absolute, according to which God is impersonal and unconscious reason, and attains to consciousness of himself only in man. The distinction between ethical and naturalistic theism is of secondary importance, but, nevertheless, deserves notice to the extent of observing that it grew out of Schelling's advance towards theistic views, in which he attained to the recognition of God as an independent Being, and as the "Lord of Being;" but as he persisted in retaining the theocentric position of his early teachings, and "derived" the finite world out of the absolute essence of God, he really conceived of God simply as a cosmical principle, as the younger Fichte observes. Other philosophers followed in his track, e. g. the Roman Catholic Baader (q. v.); but the representatives of the theistic tendency belonged rather to the school of Hegel than that of Schelling, as a rule, though they "passed beyond" the master and differed widely among themselves, as they adhered more or less closely to his views. The principal names in this class are J. H. Fichte (*Bedingungen eines spekulativen Theismus* [Elberfeld, 1835]) and K. P. Fischer (*Encykl. d. philos. Wissenschaften* [Frankf.-on-Main, 1848; vol. iii 1855]).

The present status of philosophical theism is significantly illustrated in the works of Chr. H. Weisse. This writer regards the dialectics of Hegel as the "completed form of philosophical inquiry," but rejects the pantheism to which its application brought Hegel. He holds that the teleological proof is necessary to lead to the theistic idea of God and counteract the pantheistic tendency of the ontological and cosmological arguments. The world was created for God, and finds its end in him. In his absolute essence God is absolute personality, but necessarily a trinity of persons; and in this trinity the second person, or Son, prior to the creation, and independently of it, represents the eternal reason and possibility of the creation of the world, but *with* the creation is "infused into it," "enters into it," "gives himself to it." This second person of the trinity is, however, to be regarded as the absolute *Primus* of the world, and not be identified with the latter, etc. To avoid the contradiction of an absolute dualism in the Deity, it becomes necessary to postulate a third person in the trinity, who proceeds from the Father and the Son, and is coequal with them. In harmony with this view, the creation is not to be regarded as "the effect of a sufficient reason, but as the result of the *self-renunciation* of the second Divine Personality." This self-renunciation, though represented as the free act of God, comes to pass, however, because only in creation can God become the "God who exists as God," the "really Supreme Being," since "it is only thus that he can be the all-embracing, supermundane, self-conscious Divine Spirit in whom all newly originating beings are preformed, and all existing ones are combined into a higher unity of expression or idea." At the point of his renunciation, the idea of God is seen to coincide with that which is usually termed *matter*; the activity of the Deity be-

coming the matter of the creation. See Weisse, *Philosoph. Dogmatik oder Philosophie d. Christenthums* (Leips. 1855).

A review of the progress of theistic speculation reveals the fact that the demands of pantheism (monism) have been fully met in the principal endeavors to establish the theistic conception of the world on a philosophical basis. The world is represented as having emanated from the being—the nature, essentiality, substance—of the Deity, as the realizing, renunciation, viewing, completing, of himself; his self-consciousness and subjectivity, however, being regarded as existing independently of the world. But no similar justice has been done to the claims of deism; for the leading and fundamental demand of the deistic conception of the world is the idea of God as the *Absolute Spirit* who is *eternally complete in himself* through his absolute power and goodness, as contrasted with the world, which is bound by *conditions* and constantly engaged in the process of *becoming and developing*. This idea is contradicted by every view which makes the world to be in any way a part of the *essence* of God himself, since such a view transfers the becoming and developing condition of the world into the nature of God. The *absolute* is necessarily complete and perfect.

**Thela'sar** (2 Kings xix, 12). See TEL-ASSAR.

**Theler'sas** (Θελερσάς v. r. Θελασάς), a Greek form (1 Esdr. v, 36) of the name Hebraized (Ezra ii, 59) TELHARSA (q. v.).

**The'man**, or THĒMAN (Θαμάν), the Greek form (Baruch iii, 22, 23) of the Heb. name TEMAN (q. v.).

**Themistians**, an early school of theorists which took its name from a deacon, Themistius. An answer given him by the patriarch Timothy led him to conclude that if the body of Christ was corruptible (subject, that is, to the decay arising from the wear and tear of life), then he must also have been so far subject to the defects of human nature that his very knowledge of the present and the future was imperfect, and there were, therefore, some things of which he was ignorant. The patriarch himself repudiated this conclusion, but a school of theorists grew up under the leadership of Themistius, and became known as AGNOETÆ (q. v.).

**Thenius**, OTTO, doctor of theology and philosophy, was born in 1801 at Dresden, where he also died, Aug. 13, 1876. Although Thenius occupied the pulpit for more than twenty years, yet his main renown is as an exegete, and as such he will always hold an honorable position among scholars. He published, *Erklärung der Bücher Samuels* (Leips. 1842; 2d ed. 1864);—*Erklärung der Bücher der Könige* (ibid. 1849; 2d ed. 1873), with an Appendix, which was also published separately, *Das vorzüglichste Jerusalem und dessen Tempel*:—*Erklärung der Klagelieder Jeremia* (ibid. 1855);—*De Loco Joh. xiii, 21–28 Dissertatiuncula* (Dresda, 1837);—*Quis Ps. li Auctor fuisse videatur* (ibid. 1839);—*Die Gräber der Könige von Juda*, in Illgen's *Zeitschrift für die historische Theologie*, 1844;—*Ueber die Stufenpsalmen*, in *Studien und Kritiken*, 1854, vol. iii.

Thenius's works will always be consulted for textual criticism. See Fürst, *Bibl. Jud.* iii, 419; Zuchold, *Bibl. Theol.* ii, 1323; *Theologisches Universal-Lex.* s. v. (B. P.)

**Theoc'anus** (Θεωκανός v. r. Θοκανός and Θωκανός), a corrupt Greek form (1 Esdr. ix, 14) for the Heb. name (Ezra x, 15) טיקנא (q. v.).

**Theocatagnostæ**, a name used by John of Damascus apparently as a general term for heretics who held unorthodox opinions about God, and therefore "thought evil" (κατάγνωσις) respecting him.

**Theocracy** (Θεοκρατία, *rule of God*), a form of government such as prevailed among the ancient Jews, in which Jehovah, the God of the universe, was directly recognised as their supreme civil ruler, and his laws were taken as the statute-book of the kingdom. This principle is repeatedly laid down in the Mosaic code, and was continually acted upon thereafter. See KING. Moses was but the appointee and agent of Jehovah in giving the law and in delivering the people from Egypt; and throughout the Exode the constant presence of God in the pillar and the cloud, as well as upon the mercy-seat, was on every occasion looked to for guidance and control. So, likewise, Joshua and the Judges were special "legates of the skies" to perform their dictatorial functions. Even under the monarchy, God reserved the chief direction of affairs for himself. The kings were each specifically anointed in his name, and prophets were from time to time commissioned to inform them of his will, who did not hesitate to rebuke and even veto their actions if contrary to the divine will. The whole later history of the chosen people is but a rehearsal of this conflict and intercourse between the Great Head of the kingdom and the refractory functionaries. Under the New Economy, this idea passed over, in its spiritual import, to the Messiah as the heir of David's perpetual dynasty, and thus Christ becomes the ruler of his Church and the hearts of its members. See Spencer, *De Theocratia Judaica* (Tüb. 1732); Witsius, *De Theocratia Israel.* (Lugd. 1695); Blechschmidt, *De Theocratia in Populo Sancto Instituta*; Deyling, *De Israelis Jehovæ Dominio*; Goodwin, *De Theocratia Israelitarum* (Ultras. 1690); Hulse, *De Jehovæ Deo Rege ac Duce Militari in Prisco Israele*; Dannhauer, *Politica Biblica*; Conring, *De Politia Hebræorum* (Helmst. 1648); Michaelis, *De Antiquitatibus (Economia) Patriarchalis*; Schickard, *Jus Regium Hebræorum*, cum animadversionibus et notis Carpzovii (Lips. 1674, 1701); Abarbanel, *De Statu et Jure Regio*, etc., in Ugolino, *Thesaurus*, vol. xxiv. See KINGDOM OF HEAVEN.

**Theodemir**, a Goth who was abbot of Psalmodi, in the diocese of Nismes, at the beginning of the 9th century. He was reputed to be very learned, so that even bishop Claudius of Turin (q. v.; comp. Ilgen, *Zeitschr. für die hist. Theologie*, 1843, ii, 39 sq.) dedicated many of his commentaries to him. Theodemir wrote a letter to Claudius, in which he mentioned the approval which the writings of the latter received, especially from the Frankish bishops; but he subsequently discovered expressions in the commentaries, particularly those on Corinthians, which he regarded as being questionable and erroneous, the principal objection being raised against the treatment of the subject of image and relic worship. Claudius thereupon wrote an *Apologeticum* (see Claud. *Taur. Episc. Ined. Operum Specimen*, etc., exhibit A. Rudelbach [Havn. 1824]; Peyron, *Tull. Ciceronis Oratorum Fragmenta Inedita* [Stuttg. 1824], p. 13), to which Theodemir replied. The dispute was ended by the death of Theodemir, about A.D. 825 (see Gieseler, *Lehrb. der Kirchengesch.* vol. ii; Neander, *Church Hist.* iii, 433).—Herzog, *Real-Encyclop.* s. v.

**Theodicy** (*vindication of the divine government*, from Θεός, *God*, and δικη, *justice*). This word dates back, in the sense in which it is now currently employed, no farther than the celebrated essay by Leibnitz,

whose first edition appeared at Amsterdam in 1710. It designates the attempt to justify God with reference to the imperfections, the evil, and especially the sin, which exist in the world, or, in other words, any attempt to show that God appears in the creation and government of the world as the highest wisdom and goodness, despite sin, evil, and apparent imperfections.

Leibnitz preceded such evidence with a *Discours de la Conformité de la Foi avec la Raison*, because a theodicy must evidently proceed on the assumption that reason and revelation do not contradict each other, and that the former has the ability to recognise the facts presented by the latter, whether in nature or in history. As the aim of theodicy is to refute by reason the objections of superficial reasoners against the wisdom and goodness of God, the work necessarily demands agreement between faith and reason. It is consequently the primary object of Leibnitz to show that such agreement exists, or that it must be presumed to exist so soon as a correct view of the idea and nature of reason is entertained. Reason is the "rightful combination" of truths which we recognise, either directly or by means of revelation, and there can be no conflict between it and the truth which God reveals. There are two classes of truths, and, so to speak, two forms of reason. In a narrow meaning of the word, reason has to do only with such truths as it derives from itself or recognises without assistance from without; and in this character it contrasts with experience, and also with faith in so far as the latter is based on authority and forms a sort of empirical certainty. Its truths are "eternal and necessary truths," in no wise dependent on sense-perception, and, *a priori*, such as reason alone can apprehend and formulate, because they are founded on logical, metaphysical, or geometrical necessity. Another class of truths presents to view definite facts, e. g. the laws of nature (*vérités de fait*), such as come immediately within the province of experience and faith. This class of truths likewise involves necessity, and is so far set forth within the domain of reason also; but this necessity is physical, instead of logical or metaphysical. The contrary to such truths is not logically impossible and unthinkable, but cannot be because its existence would be an imperfection, a fault. This physical necessity is thus shown to be at the bottom a moral necessity, founded in the attributes of God as the highest wisdom and goodness; and as moral necessity it appertains also to the doctrines of the faith, being ascertainable by reason, and forming ground on which to comprehend and accept such doctrines.

With respect to the creation of the world, Leibnitz teaches that it was the free act of God, performed that he "might most effectually, and in a manner most worthy of his wisdom and goodness, reveal and impart his perfection." He could create only a *relative* perfection, however; the creation of absolutely perfect beings, i. e. gods, was not possible, and the world and its inhabitants were accordingly created relatively imperfect. This condition of things may be denominated *metaphysical evil*, whose existence was directly conditioned in the will of God by which was determined the creation of limited and imperfect beings. Physical evil, or suffering, and moral evil, or sin, on the other hand, are not directly willed by God, but only indirectly, as serving to promote the good and secure the attainment of a higher perfection of the "whole," though themselves evil as respects the individual. The ground of metaphysical evil was, therefore, the good which God willed to secure in the creation of limited beings, while that of physical and moral evil is "the better" which could only thus be secured.

To the objection that God might have created a world in which physical and moral should have no place, or that he might have altogether refrained from the work of creating, Leibnitz replies that physical evil may serve to help the world to achieve a higher degree of good; and that moral evil, which is possible because

God has endowed man with powers of volition, is likewise so wonderfully controlled as to increase the beauty of his universe as a whole. To the further objection that God thus becomes the author of sin, he replies that sin has no positive cause in so far as it is actualized in consequence of the imperfections of the creature, but only a *causa deficiens*, which, moreover, does not work sin directly and of its own motion, but only *par accident* by reason of the existence of a higher good than sense can recognise or desire. The final objection, that as God foreknew all that is future, and consequently inaugurated a causal connection which must inevitably lead to whatever may come to pass, including sin, the latter is unavoidable and its punishment unjust, is met by Leibnitz by formulating a distinction between predestination and necessity. No volitional act need be performed by man unless he will. Foreordination is not compulsion; and the intervention of foreordained events serves only to influence the will with motives, and not at all to constrain the will with force.

The review of Leibnitz's work shows that it is far from satisfying the demands of the problem with which it deals. The reason for its failure lies in the philosophical views which that author laid at the basis of his scheme—his ideas of the monads, of God as the primitive monad, of the relations between reason and the will, of freedom and necessity, respecting which see the art. LEIBNITZ. Nor is this the place to attempt a new and independent solution of the problem of theodicy, which necessarily must involve the development of an entire system of philosophy. Suffice it to say that the general method of Leibnitz must ever be regulative to those inquirers who approach this problem from the standpoint of Christian theism, and that the main attempt must be to separate more clearly between the conceptions of physical and moral evil, and connect the former more intimately with morality and the moral consummation of the world—to show more clearly the profound reasons for the necessity by which the possibility of sin is included in the concept of human freedom, and the existence of the latter is involved in the idea of the good—and, finally, to tone down certain theological exaggerations of the power of evil, and present freedom and morality in their gradual development out of the natural life and human naturalness, as well as in decided negative contrast with nature.

Most of the philosophers of more recent times who have treated this subject have approximated more or less closely to Leibnitz, and have endeavored by criticism or modification, either avowedly or silently, to correct the faults of his essay. We can only name a series of the older writers, e. g. Balguy, *Divine Benevolence Vindicated* (2d ed. Lond. 1803, 12mo); Werdermann, *Versuch zur Theodicee*, etc. (Dessau and Leips. 1784-98); Benedict, *Theodicæa* (Annaburg, 1822); Blasche, *Das Böse*, etc. (Leips. 1827); Wagner, *Theodicee* (Bamberg, 1810); Erichson, *Verhältn. der Theod. zur spekulative Kosmologie* (Greifswald, 1836); Sigwart, *Problem des Bösen*, etc. (Tüb. 1840); Von Schaden, *Theodicee* (Carlsruhe, 1842); Maret, *Theodicee* (Paris, 1857); Young, *Evil and God, a Mystery* (2d ed. Lond. 1861).—Herzog, *Real-Encyklop.* s. v.

**Theodora** (1), the wife of the emperor Justinian, was the daughter of Acacius, who had charge of the wild beasts of the Prasini at Constantinople. The decease of her father and remarriage of her mother obliged her to earn her living as an actress, and she also became a notorious courtesan. She accompanied Ecebolus as his mistress to Pentapolis when that wealthy Tyrian was appointed prefect of that government, but was soon deserted by him and obliged to return in poverty to Constantinople. She then altered her mode of living and sought to earn a virtuous name; and while living in retirement she won the favor of the imperial prince Justinian, and so excited his passion that on the death of the empress he persuaded the reigning emperor, Jus-

tin, to suspend a law which stood in the way of his marriage with Theodora (see *Cod. Just.* lib. v, tit. 4, "De Nuptiis," i, 23). They were married in A.D. 525; and on Justinian's accession, in 527, Theodora was publicly proclaimed empress and coregent of the empire. Her influence over him became unbounded, and continued even after her decease.

Theodora participated actively in the Monophysite controversy, lending her influence secretly to the propagation of that error, and endeavoring to win her consort from the orthodox view. Colloquies instituted between bishops of the two conflicting parties in A.D. 525; and on Justinian's accession, in 527, Theodora was publicly proclaimed empress and coregent of the empire. Her influence over him became unbounded, and continued even after her decease.

**Theodora** (2), wife of the emperor Theophilus, who succeeded his father, Michael II, on the throne in A.D. 829. She obtained the regency of the empire on the death of her husband, in 842, and hastened to restore the worship of images, which had until then been savagely repressed. She banished John Grammaticus, the patriarch of Constantinople, and gave his place to Methodius, who was in sympathy with her plans, and then called a synod which decreed the restoration of image-worship throughout the empire. To commemorate this event she ordained an annual "festival of orthodoxy." Not content with having thus ended a dispute which had agitated the empire during 150 years, she inaugurated a persecution of the Paulicians (q. v.), and thereby occasioned a succession of wars in which entire provinces were devastated and depopulated by the allied Paulicians and Saracens (see Cedrenus, p. 541 sq.; Zonaras, *Chron.* xvi, 1; Petr. Siculi *Hist. Manich.* p. 70 sq.; Photius, *Contra Manich.* ix, 28; Constantin. Porphyrog. Continuator, iv, 16, 23-26).

A more creditable work was the conversion of the Bulgarians, which was accomplished by the Thessalonian monks Cyril and Methodius in 862. The empress, however, was not permitted to see this success. Her son Michael III compelled her to resign the regency, and incarcerated her in a convent, where she died of grief in A.D. 855 (see Dallæus, *De Imaginibus* [Lugd. 1642]; Spanheim, *Hist. Imaginum Restituta* [ibid. 1686]; id. *Opp.* vol. ii; Schlosser, *Gesch. der bilderstürm. Kaiser*, etc. [1812]; Marx, *Bilderstreit der byzant. Kaiser* [1839]; Walch, *Ketzergesch.* pt. x, xi; Schröckh, *Christl. Kirchengesch.* vol. xx; Gieseler, *Kirchengesch.* [4th ed.], ii, 1, 9).—Herzog, *Real-Encyklop.* s. v.

**Theodore** (THEODŌRUS), *St.*, of the 4th century, was a Syrian or Armenian, or of Amasea as some more definitely state. Gregory of Nyssa relates that Theodore joined the Roman army (thence called *tiro*) when Maximin and Galerius were persecuting the Christians, but was himself denounced. His youthful appearance won for him three days' respite, at the end of which he was to die unless he should recant. While engaged in earnest prayer, a Christian disguised as a soldier, named Didymus, approached and exhorted him to flee, which he did. Didymus was thereupon seized as a Christian and condemned to decapitation. Theodore returned and steadfastly endured horrible tortures until he died by fire. His body was rescued by Christians, and is reported to have been brought to Brindisi in the 12th century, while his head is said to be still preserved at Gaeta. Gregory pronounced a eulogy in his memory. The Greek Church dedicates to him Feb. 17, the Latin, Nov. 9. See *Greg. Nyssa Opp.* (Par. 1615), ii, 1002 sq.; Herzog, *Real-Encyklop.* s. v.

**Theodore**, archbishop of CANTERBURY, succeeded Deusdedit, who died in the year 664. When the elected Anglo-Saxon presbyter Wigheard died in Rome, where he had gone to receive ordination, pope Vitalian declared that he intended to send a worthy substitute. The Roman abbot Hadrian, a native of Africa, refused to be elected, and called attention to Theodore of Tarsus as a man well qualified in every respect for that position. In March, 668, he left Rome for his new post, and was accompanied by Hadrian, who was to act as his adviser, but who, in fact, was to see that nothing of the Roman ritual was replaced by the Greek. Theodore acted in the spirit of Rome; he founded monasteries and schools, and died Sept. 19, 690, in London. His corpse was the first buried in St. Peter's at York. He left a penitential book and a collection of canons (reprinted in the collection of Latin penitential books of the Anglo-Saxons by Kunstmann [Mayence, 1844]). See the *Introduction* to Kunstmann's collection; Baxmann, *Politik der Päpste*, i, 180, 184; *Theologisches Universal-Lexikon*, s. v. (B. P.)

**Theodore**, surnamed GRAPTUS, a monk of St. Saba who is somewhat prominent among the monkish martyrs of iconolatry. He was born at Jerusalem, attained to the rank of presbyter, and was sent by the patriarch Thomas of Jerusalem to Constantinople about 818 to labor in defence of the images. In the execution of this purpose he remonstrated so vehemently to the emperor's face that Leo the Armenian caused him to be scourged and transported to the coast of Pontus. Three years later he was pardoned, but again imprisoned and banished, this time by Michael the Stammerer. The next emperor, Theophilus, caused him to be scourged and carried to the island of Aphusia. Having returned after several years and renewed his passionate advocacy of image-worship, he was threatened and tortured, and finally banished as incorrigible to Apamea. But few writings are ascribed to him; among them are a disputation of the patriarch Nicephorus, given in Combeffis, *Orig. Constantinop.* p. 159:—a letter by John of Cyzicum narrating the sufferings endured under Theophilus, also in Combeffis:—a manuscript, *De Fide Orthodoxa contra Iconomachos*, from which a fragment is given in Combeffis, p. 221. See *Vita Theod. Gr.* in Combeffis, p. 191, Latin by Surius, Dec. 26; and comp. the notices in Cave, and Walch, *Gesch. d. Ketzereien*, x, 677, 717.—Herzog, *Real-Encyklop.* s. v.

**Theodore LECTOR** (*the Reader*), a Church historian in the East, was reader in the Constantinopolitan Church in or about the year 525. He furnished an abstract of the history from the twentieth year of Constantine to the accession of Julian, taken from the works of Socrates, Sozomen, and Theodoret, which is known under the name *Historia Tripartita*, and is still extant in manuscript form. Valesius published so much of its contents as was found to vary from Theodore's

sources. A second and more important work begins an independent record at the point where the history of Socrates ends, and carries it forward to the year 439. Neither of these works can be regarded as a completed whole, and between them is an untouched space of seventy years. The latter history, which was contained in two books, has been lost; but extended fragments have been preserved in John of Damascus, Nilus, and especially Nicephorus Callistus, and published by Robert Stephens and Valesius. These remains show that the histories of Theodore contained much important matter in relation to politics and the progress of the Church. Comp. the literary notices in Cave, Fabricius, Hamberger, and Stäudlin-Hemsen, *Gesch. u. Lit. d. Kirchengesch.* p. 76. Editions: Stephanus, *Ἐκ τῆς ἐκκλησιαστικῆς ιστορίας Θεοδοῦρου ἀναγνώστων ἐκλογαί, cum Eusebio* (Par. 1544); Reading, *Excerpta ex Eccl. Hist. Theod. Lect. et Fragmenta alia H. Valesio Interpr. cum Theod. Historia* (Cantabr. 1720).—Herzog, *Real-Encyklop.* s. v.

**Theodore of MOPSUESTIA**, bishop, and leader in the so-called theological school of Antioch, was born at Antioch about the year 350. He studied philosophy and rhetoric, the latter in company with John Chrysostom at the school of the famous Libanius. Stimulated by Chrysostom to a fervor of Christian enthusiasm, he renounced his proposed secular career in order to devote himself to Christian studies and monastic asceticism; and though affection for a lady named Hermione interrupted his course, he was recalled to it by the zealous efforts of his friend, and, through the influence of his teacher, Diodorus of Tarsus, who introduced him to the study of sacred literature, was confirmed in it for life. Two of Chrysostom's letters to Theodore in relation to this subject are yet extant. He became a presbyter at Antioch and rapidly acquired reputation, but soon removed to Tarsus, and thence to Mopsuestia, in Cilicia Secunda, as bishop. In 394 he attended a council at Constantinople, and subsequently other synods. When Chrysostom was overtaken by his adverse fortunes, Theodore sought to aid his cause, but without success. Theodore himself enjoyed a notable reputation throughout the Church, especially in the Eastern branch. Even Cyril of Alexandria deemed him worthy of praise and esteem. He was accused, indeed, of favoring the heresy of Pelagius, but died in peace in 428 or 429, before the Christological quarrel began between the schools of Antioch and Alexandria, in which his character for orthodoxy was so seriously impaired. After his death, the Nestorians appealed to his writings in support of their opinions, and at the Fifth Œcumenical Council Theodore and his writings were condemned. His memory was revered among the Nestorians, and his works were held in repute in the churches of Syria.

The theological importance of this father grows chiefly out of his relation to the Christological controversies of his time, and, in a lower degree, out of his exegetical labors. He was an uncommonly prolific writer, and expended much effort on the exposition of the Scriptures; but of his exegetical works only a commentary on the minor prophets in Greek has been preserved intact to the present time. Other expositions of minor books, e. g. the Pauline epistles, which had been published in Latin by Hilary of Poitiers, have lately been recognised as the property of Theodore. Fragments of still other exegetical labors by this father are scattered through the compilations of Wegner, Mai, and Fritzsche (see below). Theodore's method was that of sober, historical exposition, although his results are not always satisfactory; and to this he added independent criticism of the canon. He distinguished the books of the Bible into prophetic, historical, and didactic writings, the latter class including the books of Solomon, Job, etc., whose inspiration he denied.

In Christology Theodore was opposed to Augustinianism, and thus naturally approximated to Pelagianism, though his position was intermediate. Adam was

created mortal. The human will, in its earthly environment, would necessarily be drawn into sin. Adam's sin was not transmitted, and Christ's work had for its object the enabling of a created and imperfect nature to realize the true end of its being rather than the restoration of a ruined nature. All intelligent beings were included in this purpose, and it would consequently appear that Theodore taught the impossibility of eternal punishment.

The works of this author which are still extant are, *A Commentary on the Minor Prophets* (Wegner [Berol. 1834]; Mai, *Script. Vet. Nov. Coll.* [Rom. 1832], vol. vi), and *Fragments*, in Mai, *Nov. Patr. Bibl.* 1834, vol. xii. The Greek fragments are more completely given in Fritzsche, *Theod. Mops. in N. Test. Comm.* (Turici, 1847). Pitra, in *Spicil. Solesm.* (Par. 1854), vol. i, has Latin versions of Theodore's commentaries on Philippians, Colossians, and Thessalonians. See also Mercator, *Opp.* ed. Baluz., on the councils growing out of the controversy of the Three Chapters, etc.

**Theodore I.** pope, was a Greek by birth, and reigned from 642 to 649. He excommunicated Paul, the patriarch of Constantinople, in 646, for holding Monothelite views, and recognised in his stead the banished patriarch Pyrrhus, who had recanted his Monothelite errors while at Rome. Pyrrhus, however, returned to his heretical opinions, and Theodore thereupon pronounced the ban against him. Shortly before his death, in 649, this pope convened a synod at Rome which rejected the *Typos* promulgated by the emperor Constans II; and he also sent a vicar, in the person of the bishop of Dore, to Palestine in order to dismiss all bishops who should be found to hold the Monothelite heresy, and thus stamp out the sect's adherents. He wrote *Epistola Synodica ad Paulum Patr. Const.*, and *Exemplar Proposit. Constantinop. Transmissæ ad Pyrrhum*.

**Theodore II.** pope, a native Roman, reigned only twenty days in 897.

**Theodoret** (Θεοδώρητος; also THEODORITUS) was one of the most eminent ecclesiastics of the 5th century. He was born of reputable, wealthy, and pious people at Antioch in 386 (Garnier) or 393 (Tillemont, *Mémoires*, xx, 869). His mother was especially devout, and susceptible to the influence of a number of hermit monks, one of whom had relieved her of an apparently incurable affection of the eyes, and another of whom announced to her, after thirteen years of sterile wedlock, that she should give birth to a son. In obedience to their directions, Theodoret was dedicated to the service of God. At the age of seven years he entered the monastery presided over by St. Euprepus, near Antioch; and there he remained for twenty years engaged in theological study. The works of Diodorus of Tarsus, Chrysostom, and Theodore of Mopsuestia formed his mind, and it appears that the latter was the chief of his actual teachers. In time he was appointed lector in Antioch, and afterwards deacon; and in the latter office he acquired such reputation that he was, against his will (*Ep.* 81), consecrated to the bishopric, 420 or 423.

The diocese intrusted to his care had for its seat the impoverished town of Cyrus, or Cyrrhus, the capital of

the Syrian district of Cyrrhestia, two days' journey to the westward of Antioch, and it included eight hundred parishes. His life as bishop was exemplary, and characterized by charity, public spirit, thorough unselfishness, successful guidance of his clergy, and great zeal for the faith. Though great numbers of Arians, Macedonians, and especially Marcionites were found in his diocese, he succeeded by 449 in regaining them all to the Church. He reports the baptism of no less than ten thousand Marcionites alone. These labors he prosecuted often at imminent risk to his life, and always without invoking the aid of the temporal power.

The quiet tenor of Theodoret's life was interrupted by the Nestorian controversy, whose progress and results imbibed his later career. Garnier states (in *Life of Theodoret*, v, 350) that Nestorius had been Theodoret's fellow-pupil in the monastery of St. Euprepus, and charges the latter with holding, in fact, the views which caused the ruin of the former representative of the Antiochian school. It appears, however, that Theodoret was concerned rather to resist the intolerance of Cyril of Alexandria and combat his errors, opposite to those of Nestorius, than to advocate the views of the latter. With his school, he opposed the unification of the two natures in Christ, and taught that the Logos had assumed, but had not become, flesh. He denied that God had been crucified, and thereby implied that God had not been born, and that the term Θεοτόκος could not, in any proper sense, be applied to Mary. It was, of course, impossible that while holding such views he should become an avowed antagonist of Nestorius. In 430 Theodoret addressed a letter to the monks of Syria and surrounding countries in which he charges Cyril with having promulgated Apollinarianism, Arianism, and other similar errors in the twelve *Capitula*. In 431, at the Synod of Ephesus, he urged delay in the transaction of business until the Eastern bishops could arrive; and when that advice was disregarded, he united with those bishops in a synod which condemned the proceedings of the council and deposed Cyril. He also headed, with John of Antioch, the delegation which the Orientals sent to the emperor with their confession of faith, whose rejection closed the series of incidents connected with the Ephesian synod. After his return from that mission, Theodoret wrote five books on the incarnation (Πενταλόγιον Ἐνανθρωπήσεως), with the intent of setting forth his views and exposing the heretical tendency of Cyril's tenets and the unjust conduct of his party in the proceedings at Ephesus. Of this work only a few fragments remain, which are derived from the Latin version of Marius Mercator, a bigoted adherent of Cyrillian views. He also wrote a work in defence of the memory of his master, Theodore of Mopsuestia, against the charge of having originated Nestorianism (see Hardouin, *Act. Conc.* iii, 106 sq.). He was, however, induced to yield to the pressure brought to bear by John of Antioch on the opponents of the policy of the emperor, and to acknowledge the orthodoxy of Cyril. He also submitted, under protest, to the deposition of Nestorius. But when the Nestorians were treated with extreme severity in 435, he renounced the idea of peace, and once more stood forth the decided opponent of Cyril.

With the accession of Dioscurus as the successor of Cyril, Theodoret's position became more unfavorable. He opposed Eutychianism, as Cyril's doctrine now came to be called, with inflexible energy; and the new patriarch, in 448, procured an order which forbade him, as a mischief-maker, to pass beyond his diocese. Theodoret defended himself in several letters addressed to prominent personages (*Ep.* 79–82), and wrote repeatedly also to Dioscurus; but the latter responded with publicly anathematizing the troublesome bishop, and finally with causing him to be deposed, in 449, by a decree of the "Robber Synod" of Ephesus. Theodoret now invoked the assistance of the see of Rome, which was readily granted by Leo I; and he also applied to other Occi-

dental bishops (*Ep.* 119). In the meantime he had been sent to the monastery of Apamea, where he was subjected to rigorous treatment until the emperor Theodosius died, in 450, and Pulcheria, with her husband, Marcian, ascended the throne. The imperial policy now changed, and the deposed bishops were set at liberty. Theodoret appeared before the œcumenical synod of Chalcedon in 451 as the accuser of Dioscurus and as a petitioner for the restoration of his bishopric. In this synod he found himself charged with being a Nestorian, and was prevented from making any explanation of his views until he consented to pronounce an anathema on Nestorius. He was thereupon unanimously restored (Hardouin, *Conc.* ii, 496). This action has been very generally condemned by students of history as the one blot upon an otherwise spotless career; but there are not wanting apologetists to defend even this (see Smith, *Dict. of Biog. and Mythol.* s. v. "Theodoret"). It would undoubtedly have been more creditable to him to have resisted the clamor of his enemies at that time. He left the synod with a crusty "farewell," and returned to his bishopric, where he died in 457. The Eutychians anathematized his memory at their synods of 499 and 512, and his name was involved in the controversy of the Three Chapters. See CHAPTERS, THE THREE.

Theodoret was the author of many works in exegesis, history, polemics, and dogmatics, the exegetical being of chief consequence. He was generally free from the disposition to allegorize, and had a taste for simple and literal exposition. His method is partly expository, partly apologetic and controversial. On the historical books of the Old Test. he rather discusses difficult passages than presents a continuous commentary. He treated the first eight books, and also Kings and Chronicles, on the plan of simply stating and meeting the difficulties they present to the thoughtful mind, without entering into a consecutive commentary of the several books; but upon other books he wrote expositions in the usual form. His commentaries on Psalms, Canticles, and Isaiah exist no longer save in fragmentary extracts. He wrote also on the remaining prophets, the Apocryphal book Baruch, and the Pauline epistles; and Schröckh preferred Theodoret's commentary on the latter to all others, though it is very defective as regards the statement of the doctrinal contents of the several books. The apologetical work *Ἑλληνικῶν Θεραπευτικῶν Πασημάτων*, etc., was intended to exhibit the confirmations of Christian truth contained in Grecian philosophy, and affords evidence of the author's varied learning, as do also his ten discourses on Providence. His dogmatico-polemical works are, a censure of Cyril's twelve heads of anathematization:—*Ermistes, seu Polymorphus*, containing three treatises in defence of the Antiochian Christology, and directed against Eutyches, in 447, one year before the condemnation of that heretic at Constantinople:—a compendium of heretical fables, whose statements are evidently inexact and very superficial; this work contains so harsh a judgment of Nestorius as to lead Garnier to deny its authenticity:—twenty-seven books against Eutychianism, an abstract of which is supplied by Photius (*Bibl. Cod.* 46). The historical works are two in number—*A History of the Church*, in five books, extending from 325 to 429, which serves to complement Socrates and Sozomen:—and a very much inferior *Φαίδρος Ἱστορία, or Religiosa Historia*, which contains the lives of thirty celebrated hermits, and is rather the work of a credulous ascetic than of a learned theologian.

There are only two complete editions of Theodoret's works, the first by the Jesuits Sirmond and Garnier (Paris, 1642-84), in five volumes. The last volume was added after Garnier's death by Hardouin. The other edition, by Schulze and Nösselt (Halle, 1769-74, 5 vols. in 10 pts. 8vo), is based on the former, and contains all that is good, while it corrects much that is faulty in its predecessor. For an account of editions of separate works, see Hoffmann, *Lex. Bibl. Script. Græc.*

**Theodōrus.** See THEODORE; THEODULUS.

**Theodosians**, a sect of dissenters from the Russo-Greek Church, who separated some years since from the Pomoryans, partly because they neglected to purify by prayer the articles which they purchased from unbelievers. They are noted for their honesty and strict observance of the Sabbath. An early Protestant sect bearing this name was formed in Russia in 1552 by Theodosius, one of three monks who came from the interior of Muscovy to Vitebsk, a town in Lithuania. These monks condemned idolatrous rites, and cast out the images from houses and churches, breaking them in pieces, and exhorting the people, by their addresses and writings, to worship God alone, through our Lord Jesus Christ. The inhabitants renounced idolatry, and built a church, which was served by Protestant ministers from Lithuania and Poland.

**Theodosius I**, Roman emperor, whose services to the State and the Church earned for him the title of "the Great," was descended from an ancient family, and born about A.D. 346 at Cauca or at Italica, in Spain. His father was Comes Theodosius, the soldier who restored Britain to the empire. He was trained in the camp of his father, and entered on a military career, approving his talents in a campaign in Mœsia in 374, where he defeated the Sarmatians; but he renounced his brilliant prospects when the emperor Gratian caused the elder Theodosius to be beheaded at Carthage in 376, and retired to his estates, where he engaged in agricultural pursuits. The incursions of the Goths soon rendered his services necessary in the field. Gratian called him to fill the place of his colleague Valens, who had fallen at Hadrianople, and he was proclaimed Augustus Jan. 19, 379. He received the government of the East. His conduct of the war was distinguished by the prudence with which he handled the dispirited troops, so that victory was gained without the fighting of pitched battles. On his return he passed through a severe sickness, and, in the belief that his end was near, received baptism at the hands of Ascolius, the orthodox bishop of Thessalonica. His baptism was followed, Feb. 28, 380, by an edict which imposed the Nicene Creed on his subjects as the faith of the land. Other laws, having regard to the improvement of morals and the welfare of the State, followed on his restoration to health. The Goths were subdued in successive campaigns, and admitted into the empire as allies.

At the time of the accession of Theodosius, Constantinople was the principal seat of Arianism. Demophilus, the Arian prelate, preferred to resign his dignities rather than subscribe the Nicene Creed, and Gregory of Nazianzum was invited to become his successor. He declined the place, but induced the emperor to deprive the Arians of the possession of all churches and other property, and to expel them from the metropolis. The Eunomians experienced similar treatment. The Manichean heresy was made punishable with death after the Second Œcumenical Council had, in 381, confirmed the Nicene Creed and condemned all heretics. Theodosius also exempted bishops from obedience to the civil tribunals; and to his reign belongs the infamy of first establishing inquisitors of the faith. Measures were also taken to prevent the sacrifice of bloody offerings and the practice of augury among the adherents of heathenism, which induced such votaries to retire from the cities to more distant and unimportant places. This

gave rise to the terms *pagan* and *paganism* in popular usage when speaking of the polytheistic religions.

In the year 385 the princess Pulcheria died, and soon afterwards the empress Flacilla, panegyrics being pronounced in their honor by Gregory of Nyssa; and in the following year Theodosius married Galla, the sister of Valentinian II, emperor of the West. The latter, with his mother, was expelled from Italy in 387 by Maximus, the usurper who ruled in Spain, Gaul, and Britain; and Theodosius, after he had heard that Maximus favored the pagans, marched against and defeated him. He entered Rome on June 13, 389. In 391 occurred the famous incident in which Ambrose, the archbishop of Milan, forbade the emperor to enter his church, and required of him the acknowledgment of his guilt in having delivered over to death 7000 (chiefly innocent) inhabitants of Thessalonica, in retaliation for the murder of his governor, Boteric. The emperor laid aside the insignia of his rank, and entreated pardon for his great sin before the congregation in the Church of Milan; and he issued an edict by which an interval of thirty days was fixed between every severe sentence and its execution.

Coin of Theodosius I.

The affairs of the Western Empire were at length settled, and Valentinian re-established on the throne, so that Theodosius was at liberty to return to his own capital. On the way, he delivered Macedonia from the robbers who lurked in its forests and swamps, and entered Constantinople in November, 391. Valentinian, however, was slain on May 15, 392, probably at the instigation of Arbogastes, a soldier of Frankish race, whose influence with the army made him more powerful than his lord. Eugenius, a learned rhetorician and skilful courtier, the mere instrument of Arbogastes, became emperor. Theodosius met the usurper in the plains of Aquileia, and achieved a victory which destroyed both Eugenius and Arbogastes, and secured the submission of the West. Four months later Theodosius died, Jan. 17, 395, of dropsy. His body was brought to Constantinople, and buried in the mausoleum of Constantine the Great.

**Theodotians**, a name given to the MONARCHIANS (q. v.), from their founder, Theodotus (q. v.).

**Theodotion** is the name of one of the Greek translators of the Old Test. after the time of the Septuagint (q. v.). According to Epiphanius (*De Pond. et Mens.* c. 17, 19), he was a native of Sinope, in Pontus, and for a time sided with the Marcionites, but left them afterwards and became a Jew. Irenæus, however, calls him *Ephesius*, i. e. a native of Ephesus; while Jerome and Eusebius call him an Ebionite, or semi-Christian. Bleek thinks it most probable that Theodotion was a Judaizing heretic, a semi-Christian and Ebionite, according to Jerome's prevailing description of him. His reasons for thinking it probable that he professed to belong to the Christian Church are these two: *a.* "We find no trace of the Jews ever making use of his translation, and still less of its having been held in esteem by them: much more was this the case in the Christian Church, which accepted his translation of Daniel for ecclesiastical use. *b.* He has translated a clause in Isa. xxv, 8, *Κατεπόθη ὁ θάνατος εἰς νίκος*, precisely as in 1 Cor. xv, 54, but thoroughly deviating from the Sept. . . . This concurrence is probably not purely accidental, but is to be explained by Theodotion having appropriated to himself the Pauline translation of the passage; and this, again, makes it extremely probable that he was a Christian at the time of making the translation."

As to the time when this translation was made, according to Epiphanius it was published under the emperor Commodus (A.D. 180-182), which, as Keil remarks, "is not impossible, and can perfectly well be reconciled with the mention of him by Irenæus; yet it is by no means certain. In any case, his translation is not so ancient as that of Aquila, but more ancient than that of Symmachus" (q. v.).

As to the character of the translation, if we receive the testimony of those who had the version in their hands, it approached the Sept. very nearly in sense and phraseology. The mode of translation adopted by Theodotion holds an intermediate place between the scrupulous literalness of Aquila and the free interpretation of Symmachus. The translator appears, indeed, to have made the Alexandrian version the basis of his own, and to have abided by it as long as it represents the Hebrew faithfully; departing from it and freely translating for himself *only* where it inadequately expresses the sense of the original. His object was rather to supply the defects of that version than to give a new and independent one; hence the additions found only in the former reappear in his work. From the remaining fragments, it may be inferred that his knowledge of Hebrew was not great. He has retained Hebrew words not very difficult or obscure, expressing them in Greek letters from ignorance of their meaning: "Præter alia minus docti interpretis signa quæ erudito lectori exploranda remittimus, persæpe illa verba Hebraica, quorum interpretatio non ita difficilis erat ut vertendi molestiam declinaret, Græcis literis expressit" (Monfaucon, *Præliminaria*, VII, iii, 129, *ed. Bahr*). Thus, Isa. iii, 24, *סְחִיגִיל = שִׁחִיגִיל*; xix, 15, *אֲנִימִן = ἀγμών*; xliii, 20, *הַרְיִם = ἑρηνῶν*; Joel ii, 17, *הָאוֹלִם = οὐλᾶμ*; Job viii, 11, *אָחַז = ἄχῃ*. But Jahn (*Einleitung*, i, 178 sq.) conjectures that they were used among the Ebionites, and therefore retained by him—a supposition as improbable as that of Owen, that they were left so for particular reasons, such as the honor of the Jewish nation (*Inquiry into the Present State of the Sept. Version*, p. 108). Among Christians the version of Theodotion was held in higher estimation than that of Aquila and Symmachus; and Origen, in his *Hexapla*, supplied the omissions of the Sept. chiefly from it. At a later period his version of the book of Daniel was universally adopted in the Greek Bible among Christians, instead of the Alexandrian version. According to Bleek, this change occurred some time between the age of Origen and that of Jerome.

The latter says, in his *Præf. in Daniel*. "Danielem juxta LXX interpretēs Domini Salvatoris ecclesiæ non legunt, utentes *Theodotiana* editione, et cur hoc acciderit nescio. Sive enim quia sermo Chaldaicus est, et quibusdam proprietatibus a nostro eloquio discrepat, noluerunt Septuaginta interpretēs easdem linguæ lineas in translatione servare; sive sub nomine eorum a nescio quo non satis Chaldaicam linguam sciente editus est liber, sive aliud quid causæ extiterit ignorans; hoc unum affirmare possum, quod *multum a veritate discordet, et recto judicio repudiatus sit.*" Delitzsch (*De Habacuci Prophetæ Vita atque Ætate Commentatio Historico-sagistica* [Grimæ, 1844], p. 28) says, "Quapropter ego (donec proferantur argumenta contrarii) versionem Danielis Theodotionianam ab ecclesia non prius adoptatam esse censeo, quam ab Origene tanquam castigata Alexandrinæ editio in Hexapla recepta et ab Eusebio et Pamphilio, cum ex his textum septuagintaivalem ederent, septuagintaivari substituta est." Credner thinks that the Christians were so long under the pressure of contradictions, assaults, and mockeries, from Jews and heathens combined, that finally (though, to be sure, not in general before the end of the 3d century) they gave up their Greek translation of the Sept., and set that of Theodotion in its place. From a passage by Jerome on Jer. xxix, 17, "Theodotio interpretatus est *sudrinus*; secunda *pessima*; Symmachus *novissimas*," it has been conjectured that there also existed a second edition of Theodotion's version; but Hody (*De Bibliorum Textibus*, p. 584) thinks that the text of Jerome here is corrupt, and that after *sudrinus* we should insert *Aquila prima editio*.

Jud.* iii, 420 sq., see also Davidson, *Biblical Criticism*, i, 217 sq.; Keil, *Introduction to the Old Test.* ii, 232 sq.; Geiger, *Nachgelassene Schriften* (Berlin, 1877), iv, 87; Kaulen, *Einleitung in die heil. Schrift* (Freiburg, 1876), p. 78; Delitzsch, *op. cit.*, p. 28 sq.; Ginsburg, *Commentary on Ecclesiastes* (Lond. 1861), p. 497 sq. See GREEK VERSIONS. (B. P.)

**Theod'otus** (Θεόδοτος, *God-given = Johanan*), one of the three messengers sent by Nicanor to Judas Maccabæus to negotiate peace (2 Macc. xiv, 19). B.C. cir. 162.

**Theodōtus** THE FULLER (ὁ σκυρεὺς) was a leather-dresser who went from Byzantium to Rome about the end of the 2d century, and there taught Ebionitish doctrines; but the Romish bishop Victor is said to have excommunicated him from the Church. Theodotus maintained that Jesus, although born of the Virgin according to the will of the Father, was a mere man, and that at his baptism the higher Christ descended upon him. But this higher Christ Theodotus conceived as the Son of him who was at once the supreme God and Creator of the world, and not (with Cerinthus and other Gnostics) as the son of a deity superior to the God of the Jews. Epiphanius (*Hæres.* 54) associates him with the Aloji. He must not be confounded with another heretical Theodotus (ὁ ῥαπεζιτῆς ἢ ἀργυραποβός) who was connected with a party of the Gnostics, the Melchisedekites. See Neander, *Hist. of Christ. Church*, i, 580; Ueberweg, *Hist. of Philosophy*, i, 308.

**Theodōrmi** (Θεόδωροι), a term applied to couriers in the early Church. It was their duty to give private notice to every member where and when the Church assemblage was to be held (Baronius, *Anal.* 58, n. 108). See Bingham, *Christ. Antiq.* bk. viii, ch. vii, § 15.

**Theodulph**, termed *Aurelianensis*, probably a Goth, was one of the men whom Charlemagne invited to France for the advancement of learning. He was in Gaul as early as 781, and in his classical tendency resembled Alcuin, whose commendation he received. He was, in fact, one of the foremost representatives of the peculiar renaissance poetry called into being by Charlemagne's forcible promotion of culture. His poems are not without value to an understanding of the social con-

ditions of his time. As a theological writer he is less important, his works being limited to tracts—*De Ordine Baptismi*, *De Spiritu Sancto*—fragments of sermons, and *Capitula* addressed to the presbyters of his parish. The *Capitula* reveal his care for his clergy, and especially his concern for the establishing, by the clergy, of popular schools throughout the diocese. Charlemagne gave him the abbey of Fleury and the bishopric of Orleans, and employed him in affairs of state. In 794 Theodulph was present at the Council of Frankfort. After the death of Charlemagne, he appears to have at first connected himself with the party of Louis the Pious, but afterwards to have desired a more powerful ruler. The complaint laid against him at Aix-la-Chapelle accused him of conspiring with Bernard of Italy, and he was imprisoned in the monastery of Angers. He was pardoned by Louis, but was soon afterwards snatched away by death, in 821.

*Literature.*—*Hist. Lit. de la France*, iv, 459; Tiraboschi, *Storia della Lett. Ital.* III, ii, 196; Bähr, *Gesch. d. röm. Lit. in Carol. Zeitalter* (Carlsruhe, 1840), § 34, 35, 139; Guizot, *Cours d'Histoire Moderne*, ii, 334, Brussels ed. ii, 334; id. *Hist. de la Civilisation en France*, ii, 197–204. Theodulph's poems were collected by Sirmond (Paris, 1646, 8vo). Also in *Bibl. Patr. Max.* (Lugd. 1677), xiv, 28; and in Migne, *Patrol.* 105. See Herzog, *Real-Encyclop.* s. v.

**Theodūlus** (or THEODORUS), the name of three bishops who at different times presided over the see of Valais in Switzerland.

**1. THEODORUS I** was the first bishop of the Church of Valais. He was present at the Synod of Aquileia in 381, which condemned the Arian bishops Palladius and Secundianus, as directed by the command of the emperor Gratian; and his zeal for orthodoxy was such that he refused to recognise Palladius as a Christian and priest. He was especially meritorious in enhancing the welfare and glory of his own Church, where he is said to have established orthodoxy on an assured basis, and to have discovered the relics of the Thebaic martyrs, in whose honor he subsequently built a church near where the Church of St. Maurice now stands. The influx of pilgrims to this church caused him to devise an appropriate cult, and thereby to give occasion for the organization of a monastery. Theodorus also forwarded relics to Vitricius of Rouen and Martin of Tours, for which thanks are rendered by the former in his *De Laudibus Sanctorum*; and he furnished Isaac, bishop of Geneva, with information respecting the discovery of the famous relics which became the basis of the legend written by Eucherius. Theodorus I thus appears to have been the actual apostle of the country, as he was its first consecrated bishop, and also the founder of the Church of Valais and of the cult which became its boast. His name appears in the oldest liturgical manuscripts of the country, the very ancient *Missale Sedunum*, an ancient *Martyrology* preserved in the Castle of Valeria in Sion, and in the *Martyrol. Gallic.* His name occurs also among those of the ten bishops who wrote to pope Siricius from Milan in 390. After this he disappears, and is accordingly supposed to have died about 391. See the ancient *Acta Conc.*; S. Eucherii *Passio Agaunesium Martyr.*; ancient martyrologies; *Vita Theodul. Episc.* in the Bollandists, ad Aug. 16, iii, 278–280.—Herzog, *Real-Encyclop.* s. v.

**2. THEODULUS** or THEODORUS II, bishop of Valais, is mentioned in the spurious articles of endowment by king Sigismund to the Convent of St. Maurice, and was evidently confounded by the author of that document with Theodorus I, as he is made to urge the erection of a new convent and an appropriate endowment, on the ground that the bones of the Thebaic martyrs were yet unburied; all this so late as A.D. 515. Despite the doubts raised by this anachronism, he must be supposed to have existed, as his name occurs in the ancient and trustworthy list of Agaunensian bishops, and in all subsequent lists as well. He is also mentioned by an

anonymous contemporary, in the life of abbot Ambrose of St. Maurice, as having raised collections in behalf of the new church edifice, and as having assisted in the collection of relics for its endowment. A new bishop, Constantius, appears in the Synod of Epaon in A.D. 517; the death of Theodorus was accordingly prior to that date. See Bolland, ad Aug. 27.

3. THEODORUS III. preferably called THEODULUS, the most famous, but also the most imperfectly authenticated, bishop of Valais of this name, is reputed to have lived in the time of Charlemagne. The only source for the assumption that he lived is the legend of St. Theodulus, by Ruodpert, which runs as follows: Theodulus, of the noble family of Grammont, in Burgundy, was invited by Charlemagne to a general council which was to devise means for restoring his peace of mind. All the bishops responded to the monarch's tears with the promise of twenty, and even more, prayers and sacrifices, but Theodulus promised only a single one. His prayer was continued day and night and followed with the mass, so that God sent an angel who revealed to Theodulus the emperor's crime, and assured him that it was forgiven. Thus attested, the emperor could not doubt the bishop's assurance, and rewarded the latter with the prefecture of his country, that he might be able to control the rude inhabitants, while exempting the clergy from the civil authorities. A later addendum to this legend relates that Theodulus had revealed to him by an angel that the pope intended to spend a night in the embraces of a concubine. While thinking upon this revelation, the devil drew near in female form. Theodulus seized him, leaped on his shoulders, and compelled him to serve as a medium of transportation to Rome, where he was able to prevent the papal sin. The Bollandists add to the above a miracle, through which Theodulus filled all obtainable vessels with the juice of a single grape which he had blessed at a time when the vintage had failed. This miracle elevated him to the rank of patron saint of the country, in which character he is still commemorated with great rejoicings on Aug. 16. No martyrologies or similar documents mention this Theodulus. Ruodpert is clearly a mythical personage. The bishop under consideration is imaginary, and probably developed out of the fact that donations to the Church of Valais were made in *honorem S. Marci* or *S. Theodori* (*Theoduli*), and the other fact that Charlemagne had a court bishop named Theodore, who dedicated the Church of Zurich. See Gelpke, *Kirchengesch. d. Schweiz*, i, 91 sq., 120 sq.; ii, 95 sq.; Brigue, *Vallesia Christiana* (1744), p. 48 sq., 95 sq.; Rivaz, *De la Légion Thébéenne* (1779), p. 37, etc.; *Comment. Prævius* Gulielmi Cuperi, etc.—Herzog, *Real-Encyclop.* s. v.

**Theognostus.** A person of this name is said by Philip of Sida (see Dodwell, *Dissert. in Iren.* [Oxon. 1689], p. 488 sq.) to have presided over the catechetical school of Alexandria in the second half of the 3d century. Photius calls him an Alexandrian and an exegete; and he was unquestionably an Origenist, in the strict sense. Photius also expressly states that Theognostus shared the errors of Origen with respect to the Trinity, and termed the Son *κρίστα* (comp. Dionys. Alexand., and see Athanasius, *De Blasph. in Spirit. Sanctum*; also Origen, *De Princ.* i, 3, 7, 63). Theognostus wrote seven books of *Hypotheses*, which, according to Photius, constitute a doctrinal work constructed in the order of *loci*—(1) of God the Father as the exclusive originator of the world (against an assumed eternity of matter); (2) of the Son; (3) of the Holy Spirit; (4) of angels and dæmons; (5 and 6) of the incarnation; (7) of the world-order. The brief extracts from this work which were preserved by Athanasius in *De Decret. Nic. Synod.* § 25, and a fragment from that father's work *On the Blasphemy of the Holy Ghost* (Athan. *Ep. 4 ad Serap.* § 11) may be found in Routh, *Reliq. Sacr.* iii, 221 sq. See Galland, *Bibl. Vet. Patr.* iii; Guericke, *De Schola Alexand.* (Halle, 1824), i, 78; ii, 325 sq.

**Theogony** (*Θεογονία*), the name given in ancient Greece to a class of poems recounting the *genealogy of the gods*. Musæus is said to have written the earliest Theogony; but his work, as well as the theogonies of Orpheus (q. v.) and others, have perished; that of Hesiod being the only one that has come down to us. This has been translated by Thomas Cook (Lond. 1728, 2 vols. 4to).

**Theological.** The third Lateran Council, held in 1179, ordered that teachers should be appointed to the various churches and monasteries who should instruct the clergy, and be rewarded for their labors with suitable benefices. The fourth Lateran Council repeated this ordinance, and provided in Canon 10 that only capable men should be appointed in cathedrals and convent churches, who should, in their capacity of masters, assist the bishops in preaching, hearing confessions, imposing ecclesiastical penalties, and otherwise promoting the welfare of Christians. Canon 11 provided, in addition, that, where the means of a church permitted, a good teacher of grammar should be appointed; while metropolitan churches should appoint a theologian, whose business it should be to instruct the clergy and other religionists in the knowledge of Holy Scripture and all other matters which are important to the care of souls. This teacher should be allowed the income from a prebend so long as he continued to perform the functions of his office, but should not rank as a canon; and it was to such instructors that the name of *theologal* was given. The Council of Basle ordered the more general employment of *theologals*. See *Fortgesetzte Samml. v. alten u. neuen theol. Sachen* (Leips. 1721), p. 968; Mansi, *Sacr. Conc. Nova et Amplius. Collectio* (Venet. 1778), xxii, 998 sq.—Herzog, *Real-Encyclop.* s. v.

**Theologia Germanica** (the German title is *Büchlein von der deutschen Theologie*) is the title of the famous theological work, by an unknown author, which was discovered by Luther and published for the first time by him in 1516. The title implies merely that it is a German theological work, and is not to be understood as asserting the spirit of exclusiveness to which Poiret objected, in any degree.

The contents of the book are entirely in harmony with the writings of Tauler, Suso, and other mystics connected with the *Friends of God* of the 14th century. Its object is to teach self-renunciation, the laying-aside of our own and the accomplishing of the Divine will. It declares that only our self-will separates man from God, the perfect one; it was self-will that changed angels into devils, and it is this alone which feeds the flames of hell. Haughty and opinionated minds, it asserts, aim at perfection in other ways than that of humility and obedience. In this their conduct resembles that of the devil, and they can accordingly end only in ruin. Communion with God is to be had only when the soul passes through repentance and is purified from sin and selfishness, thus attaining to enlightenment. Love and the practice of virtue are also requisite to true enlightenment, as is, in addition, a cheerful endurance of trials and temptations. Thus enlightened, a soul attains to union with God and enters into unending perfection.

The book has been attributed to various authors, e.g. Eblendus, Tauler, etc., but without authority. Luther's preface declares that it was written by a priest and custos in the "Deutschherrn" house at Frankfurt-on-the-Main. A manuscript copy, discovered by Dr. Reuss of Würzburg, calls it simply *Der Frankfurter*. Hamberger, in Herzog, *Real-Encyclop.* s. v., thinks that the priest Heinrich of Rödelheim has been shown beyond controversy to be its author. The question of authorship is a difficult one, because the writer, who was associated with the *Friends of God*, intentionally followed the custom of those mystics in writing anonymously.

The fact that Luther first gave publicity to the work caused it to be regarded in time as the special property of Protestants. The Romish Church at first paid no attention to it, though it gave occasion to the Bavarian bishop Pirstinger to write a *Teutsche Theologie* from his point of view. In March, 1621, however, the *German Theology* was placed on the *Index*. A recent Romish theologian, Günther, has charged it with pantheistic tendencies; but this is evidently malicious, since it strains the language of a book which does not pretend to a strictly scientific character further than the case will warrant. Luther's edition of 1516 was incomplete; but the second edition comprehended the whole work, and was accompanied with a preface from his pen. Numerous editions followed in rapid succession, Luther himself adding five to those already mentioned. The most desirable edition is perhaps that of Johann Arndt, who supplements Luther's preface with an excellent one by himself (1631). The manuscript discovered by Dr. Reuss was edited by Dr. Pfeiffer, of Vienna (2d ed. 1855). This version is more complete than Luther's, particularly in the first third and near the end of the work. Repeated translations have been made into Low-German, Flemish, English, Latin, and French; the best-known English version being that of Miss Susanna Winkworth, with preface by Rev. C. Kingsley, and introduction by Prof. Stowe (Andover, 1856).—Lisco, *Heilslehre der Theologia Germanica*, etc. (Stuttgart, 1857), and Herzog, *Real-Encyklop.* s. v.

**Theologian**, one who treats of theology, or the science of things divine. The most ancient Greeks used the latter term in the sense of *narratio de deo*, and those who wrote the history of the gods, their works and exploits, were called *Θεολόγοι*. Moses is called by Philo *Θεολόγην* when he gives the history of the creation. Among the Romans, from the time of Numa Pompilius to that of the emperors, the knowledge and worship of the gods were made subservient to the interests of the State. Thus, according to Augustine (*De Civ. Dei*, vi, 1), there were three kinds of theology—the *poetical*, or that of the poets; the *physical*, or that of the philosophers; and the *political*, or that of the legislators. The Greek Christians originally designated any deep philosophical apprehension of the truths of religion by the term *Gnosis* (knowledge), which was opposed to *Pistis* (faith). First, during the 3d and 4th centuries, the word theology came into use especially in connection with such of the fathers as defended the doctrine of the deity of the Logos. In this sense the evangelist John and Gregory of Nazianzum were termed theologians. During the same period, the word theology was applied to the doctrine of the Trinity. In the century following, Theodoret widened its application by applying it to the whole circle of theoretical instruction in religion. Finally, in the 12th century, Abelard, in his *Theologia Christiana*, gave the word that comprehensive signification it still bears, as expressive not only of a theoretical, but also of a practical, exposition of religious truth. In general, therefore, theology is the knowledge of God carried to the highest degree of perfection in respect to correctness, clearness, and evidence of which it is susceptible in this world.

Theology is divided into two great branches—(1) *Natural*, or that which relates to such disclosures of himself as God has made in the outward world; and (2) *Revealed*, or such as he has made through his spoken and written word. Eminent writers in the latter department of theology, as Schleiermacher, Hagenbach, Pelt, Godet, and others, present different methods of arranging the different subjects embraced in this study. See **THEOLOGY**. The arrangement adopted by Dr. J. McClinton is given in the article **METHODOLOGY** (q. v.). The different branches are discussed under their several heads. See also **APOLOGETICS**; **ECCLESIASTICAL HISTORY**; **ECCLESIASTICAL POLITY**; **ETHICS**; **POLEMICS**, etc.

**Theologus** is the title of a clerical instructor of the clergy associated in chapters, etc., who was appointed, by the authority of several councils, to teach the Holy Scriptures; the *Theologal* (q. v.).

**Theology** (from *θεός*, *God*, and *λόγος*, *discourse*) is not to be interpreted simply as its etymology requires, as *the doctrine of God*, nor yet historically, as the doctrine of the Trinity, but is to be understood with reference to a definite range of life which it is to bring into the consciousness and apprehend both theoretically and practically. Theology is not, consequently, the doctrine of the Christian religion, nor of the self-consciousness of God in man, as speculative theology is wont to speak, nor yet of the feeling of the Absolute. It is primarily the shaping of a life in man; in the language of Steenstrup, the Danish divine, it is an internal habit which lies deeper than the intellect. This has been conceded since the time of Schleiermacher with reference to both religion and theology. Rudelbach describes it as a science of divine things mediated by the Spirit of God. Vilmar teaches that true theology is esoteric in form, because truly scientific; but also practical, because it involves piety and the entire contents of religion. It sustains to the practical life, however, only the relation of idea to practice. The heart of the Christian life is, moreover, not religion, but the kingdom of God, or God's organic revelation to the world—the Church (see Storr, Schleiermacher, Baumgarten-Crusius, and many Romish theologians; also Kling, in Herzog, *Real-Encyklop.* xii, 600–606). Theology thus becomes the science of the unfolded, objective self-manifestation of the Divine Spirit in the phenomenal kingdom of God—a *practical* science which develops progressively and side by side with that kingdom. But it is none the less a *positive* science also through its relation to the kingdom. Schleiermacher (*Kurze Darstell.*, etc.) describes Christian theology as the comprehension of all that scientific knowledge and those scientific methods without whose possession and use a harmonious direction of the Christian Church, i. e. a Christian Church government, is not possible. This definition is, however, too external; for in the material of theology all truth finds its goal, and that fact should be expressed in its definition. Both the object and the scientific character of theology will be retained if the latter be defined as the scientific self-consciousness of the Church with reference to its development through the Holy Spirit, or, more briefly, its self-consciousness with respect to its self-edification.

From this definition theology branches out into particular departments. The self-consciousness has for its *first* task the apprehension of the Church in actuality by determining its *historical* origin, development, and present state. *Historical theology* is the history of the kingdom of God consciously apprehended. It subdivides into the three special branches of Sacred History, Ecclesiastical History, and Ecclesiastical Statistics.

The determination of sources and portrayal of the outworking and development of the leading principles by which events are governed are of primary importance in historical study. The first source here is wholly unique, being the *might of the Divine Spirit*. The source for the beginnings of the Christian Church is, at the same time, a regulative guide and vivifying principle to the Church. By the side of other sources it affords knowledge respecting the time of the origin of the Old Covenant, and its development until it became the New, and it possesses unquestionable authority as the earliest witness to the operative power of the Divine Spirit in the world, and consequently as its mediating principle, or as the *Bible*, the only sacred book.

The first part of historical theology is consequently a knowledge respecting the Bible (Biblical theology, in the wider meaning). It is all-important to determine what books belong to the Bible, and this is the business of the *Canon*. The whole Bible is to be authenticated both in its parts and its text; to accomplish this is the

work of historical and textual criticism. *Introduction* to the books of the Old and New Testaments (*Isagogics*), or, more exactly, the *History of the Canon and of Biblical Literature*, presents the collective material to view, and is followed by *philological and theological* exposition. The scientific conception of this expository work is *Hermeneutics*, or the art of interpretation. The history of the Word of God, the Divine Revelation, and the presentation of its contents which have attained to their development are given in Sacred History (and Archaeology) and in Biblical Dogmatics and Ethics—usually termed, in Germany, Biblical Theology of the Old and New Testaments; the latter being the final and gradually developing phase of the Divine Revelation, whose central point is the establishing of the kingdom of divine grace through Jesus Christ. This science is theologico-historical, and therefore deals largely with details, e.g. the particular doctrinal contents of separate Old-Testament books, etc.

Personal convictions are of great importance in this connection. Without being rooted in the Divine Revelation, no apprehension of its meaning is possible. The contents of the Revelation as appropriated both by the individual and the Church must accordingly be received into the scientific consciousness, which indicates the task of *scientific theology*. The latter, however, does not derive its contents directly from the Bible, but through numerous intermediate agencies, to contemplate which is the work of Ecclesiastical History, and, in so far as they belong to the present age of the Church, of Ecclesiastical Statistics.

Ecclesiastical History portrays the history of the kingdom of God in time from the founding of the Christian Church on the day of Pentecost to the present day, having the end of prophecy continually in view as its goal. It directs its attention more prominently either to the outward development of that kingdom in the Church and the life as renewed and inspired by Christianity (Church History), or to the consciousness of that development and its contents—the History of Doctrines and the connected History of Christian Ethics, Literature, and Art. The study of Sources, Geography, Chronology, etc., likewise involves much that is peculiar, and requires the separate theological treatment of those branches, in consequence of which originate Patristics, Ecclesiastical Archaeology, History of Liturgies, etc.

The present not only forms the limit of development at which the kingdom of God has arrived, but also the ground on which we stand. The description of this ground is the work of Ecclesiastical Statistics. It includes both external and internal conditions, both of the faith and the life, and gives rise, on the one hand, to Statistics of Churches in different countries and of different denominations and sects, and, on the other, to Historical Symbolics.

Inquiry into the faith and morals of different denominations leads from Statistics over to *Systematic Theology*. The nature of the latter is determined by the nature of the Christian consciousness as based on a new life in the individual and the race. The development of that consciousness into scientific knowledge requires, first, an assured recognition of the principles which underlie the kingdom of God as manifested in Christianity; next, an unfolding of the contents of such principles in systematic form; and, finally, a recognition of the relation of this knowledge to the universe of human knowledge. In this way is obtained a science of the principles and the particular phenomena of Christianity as they are given in its history (the science of Christian principles or fundamentals), a science of their doctrinal and ethical contents generally, and also in the particular confessions (theological), and a philosophy of Christianity (parallel to the philosophy of law in a different field of ethics).

As Systematic Theology does not proceed from the Christian convictions of the individual, but from those

of the entire Church or of one of its subordinate parts, it provides room for Ecclesiastical Tradition. The starting-point is the idea of the kingdom of God which rests on the Word of God as objectively presented to us in the Canon, as approved in the heart in the character of Christ, and as given in Tradition in the forms of faith, custom, constitution, and methods. The consummation is in the Dogma, in which God's kingdom is the object of the scientific consciousness of the general Church, or, under historical limitations, assumes a definite form in the particular denomination (Denominational Principles or Systematic Symbolics). At this point the doctrinal consciousness discovers its variation from the systems of other denominations and of morbid apparitions within the Church to which it belongs. The latter observation gives rise to Polemics, or, better, the Discussion of ethical and doctrinal excrescences in the Church (analogous to pathology in medicine).

The ground has thus been prepared for the founding and establishing of Theical Theology, the confessional Dogmatics and Ethics as traditionally determined on the basis of the underlying faith. Here the dogma, in its character of scriptural truth subjectively apprehended and handed down in the Church by authoritative tradition, attains to its complete development; and here the various doctrines are combined into a system through the labors of critical, religiously ethical, and systematic scholars. The true relation is accurately indicated by the oxymoron in the phrase "the science of the faith." Unquestionable certainty is given in the faith, but the mind transmutes this successively and partially into knowledge.

This dogmatico-ethical process begets a system of knowledge respecting God and divine things. This constitutes Speculative Theology, the last result of a philosophy of Christianity which was conceived in mysticism, unfolded in theosophy, sifted by criticism, and formed by speculation, and now presents Christianity with the science of it as the centre and goal of all culture and as the crown of the scientific labors of the entire human race. Christianity is here presented as a religion, and as the highest manifestation of religion, and also as the complete realization of the kingdom of God on earth through a progressive development which reaches down to the final consummation; and in this light Christianity is presented as the central feature in the philosophy of human history.

The duty of the Church to insure its own edification through the power of the Holy Spirit comes into prominence here, as it does in the historical department. That edification is Ecclesiastical Praxis, and the scientific understanding of its foundations and methods constitutes Practical Theology, the third principal branch of theological science. The starting-point of this science is the energy of the Christian life which is to be perfected. Practical theology is the science of human operations within the kingdom of God and as enabled by the Holy Spirit, to the end that that kingdom may be fully developed. Only through God can we arrive at God, in knowledge as in feeling or in practice.

The setting-forth of these fundamentals, and of the methods by which the organism of God's kingdom, particularly in the Church, is to be erected on them, is the work of the science of Ecclesiastical Foundations, otherwise the science of the principles of Practical Theology, which finds its completion in the science of Church organization. We next discover a separate department of Church law, which constitutes the *second part* of Practical Theology, and subdivides into Church law and Church government (in a restricted sense, Church polity; in an unrestricted, the care of souls). The process of self-edification under the Holy Spirit's influence, moreover, gives rise to a recognition of the means through which this is achieved, and thereby originated a *third* technical part, covering the theories of art methods in the different Christian churches, which are known, with reference to the shaping of the external forms of

worship so that they may represent the worship of the inner man, as Liturgics; with reference to the proclamation of the Word of God, as Homiletics or Keryktics; with reference to the training of the young, as Christian Pædagogics and Catechetics; with reference to the conversion of heathen and other false religionists, as Haliectics and Theory of Missions; and with reference to the organization of scientific instruction for the Church, as Ecclesiastical Pædectics, which has to do with the Christian organization of institutions of learning, as the placing of theological faculties in universities, the founding of theological seminaries, etc. Theological literature cannot, of course, be brought within any rule, but may be classified in conformity with its manner of entering upon the arena of the Christian and the Church life.—Herzog, *Real-Encyklop.* s. v. See THEOLOGIAN.

See Pelt, *Theol. Encyklop.* (Hamb. and Gotha, 1843), with whose theory the above article is substantially agreed. See ENCYCLOPÆDIA OF THEOLOGY, with the literature there referred to.

THEOLOGY, NEW ENGLAND; including "New Divinity," "Edwardean Divinity," "Hopkinsianism," etc.

*I. Origin and Development.*—The original theology of New England was the strict Calvinism of the Reformed standards. In 1648 the Westminster Confession was formally adopted by the synod convened at Cambridge, and it remained the standard of faith for all "the New English churches" until 1680, when "the elders and messengers of the churches in the colony of the Massachusetts in New England" substituted the confession drawn up by the Congregationalists of the mother country, and known as the "Savoy Confession." In 1708 the Connecticut churches made the same change. This substitution was in neither case demanded by a changed theological sentiment in the churches, the Savoy Confession being almost word for word identical with the Westminster, except on points connected with Church polity. Its Calvinism was equally strict. Not long after this, however, strong and independent minds began to appear in the ranks of the New England ministry, whose philosophical acumen and practical earnestness could not rest satisfied with a theological system which to them seemed palpably inconsistent in parts, and morally paralyzing as a whole. These, prompted partly by their own subjective difficulties, and partly by the exigencies and influences of the period which witnessed the rise of New England Unitarianism, the introduction of Universalism, the visits of Charles Wesley and George Whitefield, the planting of Methodism, the Revolutionary War, the abolition of slavery in the New England states, the defection from orthodoxy of Harvard College and the largest churches of Massachusetts, the end of the compulsory support of religion by taxes, the fall of the Lockean and the rise of a transcendental school of philosophy, the extension of the Baptist and of the Methodist Episcopal and Protestant Episcopal churches over all the New England States, the founding of the noble missions of the American Board—not to mention remoter and less important events—commenced a series of modifications in the traditional Calvinistic system of doctrine designed to render it more rational, more palatable to the believer, and more easily defensible against the assailant. The process has been going forward with a good degree of steadiness ever since the days of president Edwards. One has suggested change in one part, another in another; one has brought forward a metaphysical novelty, another a theological one, a third an ethical; liberal and

progressive influences have become incorporated in organs and institutions; free pulpits have popularized the various innovations; new generations have grown up under the influence of the improved doctrine; in short, an almost complete theological revolution has gradually taken place. In their earliest development, the more generally received of these new views were styled "New-light Divinity;" then "New Divinity," afterwards "Edwardean;" sometimes "Hopkintonian" or "Hopkinsian." From the fact that Edwards, Hopkins, West, and Catlin resided in Berkshire County, the system was at one time called "Berkshire Divinity." When embraced in Great Britain by Andrew Fuller, Dr. Ryland, Robert Hall, Sutcliffe, Carey, Jay, and Erskine, it was called "American Theology," to distinguish it from the European systems. In this country it has often been denominated "New England Theology," in order to discriminate it from systems that have prevailed in other parts of the land. This term, however, is far from satisfactory, partly because the New England theology of to-day is very different from the New England theology of a hundred and fifty years ago, and partly because, in speaking of the New England theology of recent times, the term must be used in a sense sufficiently wide and vague to include differing types of doctrine historically associated with various individual divines and with the Andover, New Haven, and East Windsor (now Hartford) schools.

The precise relation sustained by the elder Edwards (1703-58) to this theological development has long been, and still remains, a subject of controversy. The advocates of the most advanced new views are anxious to claim him as the real father of the whole movement, while the Old-school writers, with equal zeal, endeavor to guard the good man's memory from so "slandorous" an allegation. The former appeal to the "Ten Improvements in Theology," enumerated by the younger Edwards (*Works*, i, 481) as having been "made by his father," and claim that such a list entitles their author to the very first rank among the innovators upon New England orthodoxy. The latter find in this enumeration of the younger Edwards only an effort on the part of its author to magnify the number and character of his father's theological novelties, in order the better to prepare the way for the introduction of his own more radical and dangerous ones. One writer (in *Princeton Rev.* Oct. 1858) has attempted to show that president Edwards's only deviations from the current Calvinism of his age were confined to two points—viz., he held to *mediate* instead of *immediate* imputation; and, secondly, advocated "an eccentric philosophical theory of virtue." The true state of the case would seem to be that Edwards, without intending to initiate, or even to occasion, such a grand revolution, really advanced principles and made statements which afterwards suggested, and almost logically necessitated, the peculiar views and even phraseology of his successors (see Park, *On the Rise of the Edwardean Theory of the Atonement*).

To present a complete delineation of New England theology, it would be necessary to write a critical history of New England speculation. Contributions and modifying influences have come from so many sources that even then it would be exceedingly difficult to apportion to each of the original elaborators his precise due. This difficulty is greatly enhanced by the intimacy of the relations which subsisted among them. So close were those relations that in some instances it is next to impossible to determine the real authorship of important modifications. Edwards, Bellamy, and Hopkins, the "great triumvirate of New England theologians," were not merely contemporaries, they were confidential friends, reciprocal teachers and learners, mutual givers and receivers, allied investigators of divine truth. Each had peculiarities of belief, each held fast to the substance of the old Calvinistic system; but there was substantial agreement in much that was new and revolutionary. For many years they enjoyed the most fa-

avorable opportunities for the interchange of sentiments, mutual stimulation, and influence. Their relations to the generation succeeding were also intimate. The first was father of Dr. Edwards, the second his theological teacher, the third was his most valued counsellor, and was intimately associated with him in the examination of his father's MSS. West was a confidential companion of Bellamy and Hopkins, intimate also with Drs. Edwards, Smalley, and Emmons. Through Dr. Edwards the spirit of the triumvirate was transmitted to his pupils Dwight and Griffin, to his friends Backus and Smalley. Smalley was a pupil of Bellamy, the instructor of Emmons, the friend of Hopkins and West. To ascertain the exact contribution of any one of these to the actual development is evidently a task of the greatest difficulty.

About the year 1756 there were four or five clergymen whose views had come to be popularly distinguished as "Edwardean." In 1773 the number had increased, according to Dr. Stiles, to about forty-five. During this year Dr. Hopkins published his *Inquiry into the Nature of True Holiness*, elaborating the Edwardean theory more perfectly than Edwards had done; and, in a voluminous appendix, defending it against the objections which Mr. Hart and others had published against it. Thenceforth the Edwardeans were generally denominated "Hopkinsians." This new term, though first applied to the New Divinity with special reference to its doctrine of the utter sinfulness of all acts preceding regeneration, was soon used to designate all Calvinistic divines who favored the doctrines of general atonement, natural ability, the active nature of all holiness and sin, and the justice of God in imputing to men none but their own personal transgressions. Their number in 1796, according to Dr. Hopkins, was upwards of a hundred. Dr. Stiles enumerates as among the champions of the new system in 1787 the two Edwardeans, Bellamy, Hopkins, Trumbull, Smalley, Judson, Spring, Robinson (father of Dr. Edward Robinson), Strong, Dwight, Emmons. In 1799 Hopkins appended the names of West, Levi Hart, Backus, presidents Balch and Fitch. A later pen has added the honored names of Dr. Catlin, president Appleton, and Dr. Austin. At the present time the peculiarities of New-school New England theology have very general prevalence in the orthodox Congregational churches of the New England and Western States, and are favored by many in other Calvinistic bodies. They are taught in the theological seminaries of Andover, New Haven, Bangor, and Chicago. They are disseminated by quarterly and other organs of marked ability, among which the *Bibliotheca Sacra* and *The New-Englander* hold the first rank. They have affected the current theological teachings of the Baptist churches not a little; and the great schism which divided the Presbyterian Church in 1837 was chiefly traceable to their influence in that communion. See PRESBYTERIAN CHURCH IN THE UNITED STATES.

II. *Relation to Original Calvinism.*—The metaphysical and ethical principles accepted by the New-school representatives of modern New England theology, and fundamental to their system of doctrine, are the following: (1.) There is a radical distinction between necessity and certainty. (2.) All sin is of an active and voluntary nature; the same is true of all holiness. (3.) Although in every exercise the human will possesses the natural power of contrary choice, still, as a matter of fact, it is invariably determined by motives. In other words, although the will always can choose the least apparent good, it always will choose the greatest apparent good. (4.) Natural ability must in all cases equal obligation. (5.) Moral character or deserts are in no case transferable. In logically adhering to these principles and such as these in all their theological applications, the Edwardean divines have deviated from the old Calvinistic system in the following important theological, anthropological, and soteriological points:

1. *Predestination.*—They do not teach that God de-

crees the volitions of moral agents in such a sense as to make those volitions necessary, but only that he has determined so to make and place men that they will act just as they do. In this manner God's decrees secure the certainty of men's choices, but do not secure their necessity. He predetermines all that lies back of the volition—the sensibilities of the agent and whatever may act on these—which predetermination enables him to foresee the result. At the same time, the agent is able in any case to choose otherwise than he actually does; and ought to make a holy choice even where God foresees that the choice will be sinful, and actually decrees to do that which will in fact result in the sinful choice or to omit that which would prevent it.

2. *Original Sin.*—Denying that there can be any ill desert prior to personal transgression, they repudiate the old Calvinistic doctrine respecting the imputation of Adam's guilt to his posterity, both in its mediate and immediate forms, with their realistic and diathetic justifications or theodicies. In its place they maintain that, in consequence of Adam's transgression, all men are so made and placed that they will uniformly, certainly, but freely, choose wrong rather than right. This constitution is not sin, but merely the sure occasion of it.

3. *The Atonement.*—(1.) As to its nature, they teach that the sufferings of Christ were a satisfaction, not to the distributive, but only to the general, justice of God. He suffered not the exact penalty of the law, but pains substituted for that penalty and answering its purpose in the securing of the ends of the moral government. (2.) As to the ground of its necessity. The necessity for an atonement was governmental, not arbitrary or ontological. (3.) *Fruits:* (a) simply release from the curse of the law, and thus mediately the blessings to the reception of which that curse was a bar (Emmons), or (b), all blessings whatsoever (Griffin and the main body). (4.) *Extent.* The atonement was not designed for the elect alone, but was made for all men as truly as for any.

4. *Justification* does not consist in any real or hypothetical transfer of the righteousness of Christ to the believer, but in pardoning his sins for Christ's sake and treating him as if innocent (Emmons), as if holy (main body).

5. *Regeneration.*—Objecting to old Calvinistic descriptions of this work, the New England theologians define it (a) as a divine communication of a new spiritual taste or relish (elder Edwards, Dwight, etc.); or (b), as a spiritual illumination (Bellamy); or (c), as a (human) change of governing purpose under the influences of the Holy Spirit (Taylor, Finney, etc.); or (d), as a gradual conversion by the moral suasion of the Holy Spirit (peculiar to Gilbert and his sympathizers); or (e), as that radical change of the soul which is produced by the interposition of the Holy Spirit, and which consists in a change in the balance of the sensibilities and a change of preference from wrong to right (Prof. Park); or (f), as a restoration of that life-communion with which God was lost by sin (Bushnell). Professor Park would apply the term regeneration to the work instantaneously wrought by the Holy Spirit on the nature of the soul, and the term conversion to the first holy act of the soul itself, the work of God preceding the free act of the soul in the order of nature, though not of time. By some the soul in this change is called wholly active (Emmons, Spring, Pond); by others, wholly passive (Smalley, Burton); by others, both active and passive (Park).

6. *Perseverance.*—The elect can fall away after regeneration, even totally and finally, but never will. This is maintained by most on purely Biblical, as distinguished from psychological, grounds.

Other points might be adduced on which original Calvinism and the new tenets are far from accordant; but these are the most fundamental, and the differences above indicated will be found a key to the whole system. Perhaps nothing better illustrates the spirit of

the two than their respective views of the final end of God in creation and providence. According to Old Calvinism, that end—the end to which all minor ones are subordinated—is the manifestation of God's character, particularly his justice and mercy, to intelligent creatures; according to Dr. Taylor, of New Haven, as understood by many, it is the production of the largest amount of *happiness* possible, holiness being simply a means thereto; according to Andover, and perhaps the main body of New England Calvinists of the New School, it is the securing of the largest amount of *holiness*, the highest happiness being simply a natural consequence. (But see a somewhat different representation of Taylor's views by president Porter in *The New-Englander* for 1860, p. 726-773.)

The controversy respecting the "Doings of the Unregenerate" has been quite too prominent in the history and development of this New Divinity to be passed over in silence. There have been three theories: (1.) That man is under obligation to repent at once, and that all moral choices before repentance are sinful and must be utterly forbidden (Emmons, Spring, Park). (2.) That man is under obligation to repent immediately, but he may perform preliminary acts which are neither sinful nor holy, and hence are not forbidden (Taylor). (3.) (Corresponding with the Old-school theory) That while all acts of choice are sinful before repentance, it is still right to exhort men to the performance of certain acts before repentance, as this is the most probable method of securing their repentance (Dwight).

III. *Relation to Original Arminianism.*—The representatives of old-fashioned Calvinism have often charged that the modifications introduced by the Edwardian divines have simply brought about a substitution of the Arminian system for the Calvinistic one of the primitive New England churches. The teachings of New England theology with respect to the absolute dependence of individual salvation upon individual divine election, as also with respect to "special" grace and to human ability considered apart from the gracious aids of the Holy Spirit, do not sustain this charge; but in almost every other principle and doctrine the allegation is, in our view, susceptible of the fullest substantiation.

1. Take the "five points" of the original Arminian controversy. The Calvinists affirmed and the Arminians denied (1) that the decrees of God respecting the eternal salvation or damnation of individual men are irrespective of the use they may make of their own freedom; (2) that in the divine purpose and by divine decree the benefits of the atonement are limited to unconditionally elected individuals; (3) that in consequence of original sin all persons naturally engendered from Adam are in such a condition of spiritual death that without that effectual calling and supernatural renovation which is by divine decree limited to the elect they can do absolutely nothing either towards the fulfilment of God's law or towards an effectual appropriation of the benefits of redemption; (4) that those gracious influences of the Holy Spirit which are adapted and sufficient to lead a sinner to true repentance and salvation are restricted to a portion of the race, namely, to the unconditionally elect; and (5) that true believers cannot, by any possibility, totally and finally fall from grace. In every one of these memorable issues of the Remonstrant and Contra-Remonstrant parties the representatives of New England theology stand with the original Arminians.

2. The same *metaphysical* and *ethical principles* underlie the two systems. We will review them in the order before given: (1.) Certainty as distinguished from necessity. This was a favorite Arminian distinction (see Arminius, i, 280, 281; iii, 402, 411, 416, 423, 425; *Epistolæ Theologicæ*, epist. xix, lxxii [Arminius]; Curcellæus, p. 774, etc.). (2.) Active and voluntary nature of sin and holiness, universally maintained by the Arminian divines (see, for instance, Episcopius, ii, 92 b; Curcellæus, p. 136, 137, 902, 904; Limborch, II,

xxiii, 15; III, iv, 8; V, iii, 2). (3.) Self-determination in view of motives. According to New-school New England theology, the will invariably chooses the greatest apparent good. This may be deemed incompatible with Arminian principles. Properly explained, however, it does not seem to be so. The theory is not that the will invariably chooses the greatest *real* good proffered for choice, nor even the greatest *apparent* good as estimated by the cool exercise of judgment, but simply that it chooses that good which appears to the subject, organized, circumstanced, and disposed as he is, as most desirable. It is only saying, in other words, that a man invariably chooses just as under the circumstances at that moment the state of his mind prompts him to choose. But, (a), the Arminian authorities *never denied* this position. They denied that the mere absence of co-action constituted liberty (Episcopius, i, 356, 357 a); but New England divines do the same. They denied that mere spontaneity is liberty in its full sense (ibid. p. 198 b; Curcellæus, p. 158, 159); but the New England divines do the same. They denied, as did Leibnitz, that the decision of the will is invariably determined "ab ultimo iudicio rationis practico" (Episcopius, i, 209 b sq.; Curcellæus, p. 985; Limborch, p. 131, etc.); but in the form propounded to them, the divines of New England would in like manner repudiate it. They denied that the will is necessarily determined by motives; but this doctrine is rejected with equal explicitness by champions of New-school New England theology. (b.) The will in all rational choices invariably acts in view of a good (Episcopius, i, 202 b, et al.). (c.) The will is able to choose the least apparent good. This follows from the Arminian doctrine of power to the contrary. It is also illustrated in choices between objects of equal apparent desirableness. "Si paria offerat, quorum alterum tantum eligendum est, libertas plenaria locum habebit" (ibid. p. 207). (d.) In all deliberate choices men *ordinarie* follow the decision of the judgment; when not, it is because "alia quedam causa impedit" (ibid. *De Libero Arbitrio*, VIII, ix). (e.) They will never choose evil as evil, or "sub ratione mali" (ibid. i, 215 b, 318 sq.). (f.) Though the will does not invariably choose the greatest good according to the decision of the judgment, it does in all rational choices invariably choose that good which seems the most desirable to the whole man. This doctrine seems to be clearly implied in cap. x of Episcopius, *Examen Sententiæ Cameronis*. The apparent contradiction found in cap. viii of his *Responsio ad Defensionem Cameronis* is easily solved by observing that according to the doctrine of Episcopius, as according to that of the New England divines, the will does not invariably follow the dictate of reason, nor invariably follow the dictate of the *natura appetitiva*, both which maintenances are perfectly consistent with the doctrine in question—to wit, that the will invariably chooses the good which to the whole man under the inward and outward conditions seems the most desirable. On this point, then, so far is the doctrine of the New-school divines of New England from being incompatible with Arminian teachings that, on the contrary, that doctrine finds in Remonstrant literature some of its earliest and most carefully guarded enunciations. (4.) Obligation cannot transcend ability—an axiom with the Arminians (see Arminius, *Declaratio*, passim; Curcellæus, p. 96 b; also VII, ii, *passim*; Limborch, III, iv, 7, etc.). Here we may remark that the distinction between *natural* and *moral* ability is much older than its emergence in New England theology, being clearly laid down in several of the elder Arminian divines (see Episcopius, ii, 94 a; Curcellæus, p. 156, 421). (5.) Intransferableness of moral character and deserts, strongly asserted by Episcopius, ii, 151 b; by Curcellæus, p. 131-137, 424, 470, 896-902; by Limborch, V, lxxvii, 18; III, iii, 11, etc.

3. In positive *theological*, *anthropological*, and *soteriological* teachings the two systems are in marked accord. (1.) *The Decrees of God*.—The New-school divines of

New England hold to a universal foreordination, absolute as respects all divine acts, effectual as regards all consequences of those acts. One of the consequences of those acts is the establishment and maintenance of human freedom. What said Arminian theology? (a.) All divine acts are absolutely decreed—"Deus nihil facit, nisi prius apud se id decreverit facere" (Curcellæus, p. 82). (b.) God foreordains (positively or permissively) whatsoever cometh to pass—"Nihil absque ipsius permissu aut directione evenit" (ibid. p. 87). (c.) God decrees to do things which he knows will occasion sinful choices on the part of men, and to abstain from acts which, if wrought, he knows would prevent sinful choices. This also is clearly involved in what is laid down by Arminius (iii, 418-429), Episcopius, Curcellæus, and Limborch on *Permissio, Excoercitio, and Induratio*. (d.) God decrees to do that which he knows will occasion sin, for a specific end, and that end is the best possible (Arminius, iii, 419). (e.) A decree to do that which will as a matter of fact occasion sin does not in any wise necessitate that sin (Curcellæus, p. 382, 1021).

(2.) *The Constitution of Men not Sin, but the Invariable Occasion of Sin*.—No New England divine has produced an abler exposition and defence of this view than are found in Curcellæus, *Dissertatio de Peccato Originis*, and in Limborch, III, iv.

(3.) *The Atonement*.—The identity of the Edwardean theory of the atonement with the Dutch Arminian, as respects the nature of the atonement, ground of its necessity, and its extent, is articulately proven in art. iii of the *Meth. Quar. Rev.* July, 1860.

(4.) *Justification*.—Arminius's definition of justification could be subscribed to by the whole body of New England divines with perhaps the exception of Emmons. "Justification is a just and gracious act of God as a judge, by which, from the throne of his grace and mercy, he absolves from his sins man, a sinner, but who is a believer, on account of Christ and the obedience and righteousness of Christ, and considers him righteous [justum], to the salvation of the justified person, and to the glory of divine righteousness and grace" (ii, 116).

(5.) *Regeneration*.—By the elder Arminian, Calvinistic, and Lutheran divines this operation of the Spirit is not sharply and definitely distinguished from sanctification, but in the definitions of the representative New England divines there is nothing to which Arminius or his disciples would have objected.

(6.) *Persistence*.—(a.) The regenerate can fall away. This is universally maintained by the Arminians. (b.) The regenerate in point of fact never do fall away. Arminius did not decide. He says, "At no period have I asserted that believers do finally decline or fall away from faith and salvation" (ii, 281). Like New England Calvinists, he asserted the possibility, but not the fact, of a total and final defection of the elect.

From the foregoing it is evident that the evangelical New England reaction against Calvinism, while remarkably indigenous and original, resembles in a most striking manner the earlier Arminian reaction. The Remonstrants repudiated no part of standard Calvinism which these New England theologians do not repudiate; they revolted from traditional tenets from the same honorable motives; they anticipated by two centuries nearly every favorite idea of their New England successors, and would perhaps have anticipated every one explicitly, had it not been for the backwardness of the psychological and ethical sciences. Nevertheless, there ever remains this radical difference, that according to New England theology, as according to original Calvinism, the real reason why one man is saved and another is not, is always in the last analysis to be found in the different foreordinations of God respecting the two, and this difference of foreordinations is referable solely to the sovereign good-pleasure of God.

IV. *Variations and Side-issues*.—Several noteworthy views and speculations, to which their respective authors owed no small share of their reputation, are either not

adopted or positively repudiated by the great mass of recent New England Calvinists. For example:

1. The Edwardean notion of human liberty. President Edwards is generally understood to have accepted the definition of Locke and of the sensational school, making the liberty of the human will "the power, opportunity, or advantage that any one has to do as he pleases;" in other words, one's ability freely to execute volitions philosophically or coactively necessitated. The inadequacy of this definition is now universally admitted. See EDWARDS.

2. Hopkins's doctrine of disinterested benevolence. This was at one time the most vital and essential element in the New Divinity. With Hopkins it was the corner-stone of systematic theology. See HOPKINS.

3. Emmons's hypothesis of God's efficient causality of every moral act of man. Emmons held that God was the efficient originator of every volition of the human mind, good or evil, holy or sinful. He has had but few adherents, and doubts are expressed as to whether he has been correctly understood by many on this point (Park, *Memoir*, p. 385 sq.). See EMMONS.

4. Nathaniel W. Taylor's view of the non-preventability of sin, his doctrine of the basis of virtue, and his metaphysical explanation of the Sacred Trinity. See TAYLOR.

5. The perfectionism of Prof. Finney. See CHRISTIAN PERFECTION; OBERLIN THEOLOGY.

6. Dr. Edward Beecher's doctrine that all the descendants of Adam have enjoyed an equitable probation in a previous state of being, and that they are born under the curse of original sin on account of having sinned in that pre-existent state. See his *Conflict of Ages and Concord of Ages*. See PRE-EXISTENCE.

7. Dr. Horace Bushnell's view of Christ and of the Sacred Trinity, of revelation, sin, and the atonement. See literature below.

V. *Literature*.—1. *In General*.—*Memoirs and Works of the Edwardses*, Bellamy, Hopkins, Stephen and Samuel West, Samuel Spring, John Smalley, Emmons, Dwight, Leonard Woods, N. W. Taylor, Bennet Tyler, Lyman Beecher, Horace Bushnell, and others above mentioned; Park, *Essay on the Development of the Edwardean Theory of the Atonement* (prefixed to his collection of *Discourses and Treatises on the Atonement* by Edwards, Smalley, Maxcy, Emmons, Griffin, Burge, and Weeks); Woods, *Old and New Theology* (from an Old-school Presbyterian standpoint); Hodgson [Meth.], *New Divinity Examined*; Fisk [Meth.], *The Calvinistic Controversy*; Ellis [Unit.], *Fifty Years of the Unitarian Controversy*; Fiske [Cong.], *New Eng. Theol. in Bibl. Sac.* xxii, 477, 568; Lawrence, in *Amer. Theol. Rev.* May, 1860; *Bibl. Sac. and Princeton Bibl. Repertory*, 1851-52, and *passim*; *The Church Review*, ii, 89; v, 349; Smith, *Church History in Tables*, p. 78; Ueberweg, *Hist. of Phil.* (Amer. ed.), ii, 443-460; Sherman, *New England Divines*; Sprague, *Annals*.

2. *The Pre-Edwardean Period*.—See Sprague, *Annals*, vol. i; COTTON, JOHN; DAVENPORT, JOHN; MATHER, COTTON, INCREASE, and RICHARD; STODDARD, SOLOMON; WIGGLESWORTH, EDWARD.

3. *Jonathan Edwards and his Theology*.—Reviews of his work on the *Will* by Dr. James Dana (1770), J. Day (1841), A. T. Bledsoe (1845), D. D. Whedon (1859); Oliver Wendell Holmes's art. in the *International Rev.* July, 1880. The *Bibliotheca Sacra* will give some of Edwards's yet unpublished manuscripts in 1881. One on Trinity and Redemption, ed. by Smyth, N. Y. 1880. See EDWARDS.

4. *Hopkins and Hopkinsianism*.—*Memoir and Works*, 3 vols.; *Bibl. Sac.* ix, 174 sq.; x, 63 sq.; xix, 633; Ely, *Calvinism and Hopkinsianism*. See HOPKINS, SAMUEL.

5. *Emmons and Emmonsism*.—*Memoir and Works*, 6 vols.; abstract of his theology in *Bibl. Sac.* vii, 254 sq., 479 sq.; see also ix, 170 sq., and xxii, 467 sq.; Smith, *Faith and Philosophy*, p. 215-263.

6. *Taylor and Taylorism*.—*Memoir and Works*, 4

vols.; *Bibl. Sac.* xvii, 355 sq., 452 sq.; Lord, in the *Evang. Mag.* 1832-36; Tyler, *Letter to Dr. Haues*; essays in *Christian Spectator* and *Spirit of Missions*, passim; Pigeon, *New Haven Theology*, in *Lit. and Theol. Review*, v, 149 sq.; vi, 121, 280, 557; Fisher, *Discussions in History and Theology* (1880), p. 285 sq.; Thasher, *Taylorism Examined* (1834, 12mo); *Meth. Quar. Rev.* Oct. 1860, 1862; *New-Englander*, 1859, 1860.

7. *Bushnell and Bushnellism.*—*Life and Letters*; Works, especially *God in Christ*:—*Forgiveness and Law*:—*Vicarious Sacrifice*; Turnbull, *Review of Bushnell's Theories*; Hovey, *God with Us, an Exam. of Bushnell's Vic. Sac.*; Bartol, *Principles and Portraits*, p. 366 sq.; *The New-Englander*, ii, 309, 440; v, 6; *Meth. Quar. Rev.* 1866.

8. *New Dicity in the Presbyterian Church.*—Memoirs and writings of Rev. Albert Barnes; Beman, *On the Atonement*; Duffield, *Regeneration*; Whelpley, *Triangle*; E. S. Ely, E. D. Griffin, etc.; Hodge, *Essays and Reviews*; *Bibl. Sac.* xx, 561. See PRESBYTERIAN CHURCH, NEW-SCHOOL.

9. *The "Old School" in New England Theology.*—Tyler, *Memoir and Lectures*; Woods, *Works* (6 vols.); Burton, *Essays*; Fisher, *Discussions in History and Theology*, p. 227 sq.; *Bibl. Sac.* xx, 311 sq.; xxx, 371 sq.; Parsons Cooke, *New England Puritan*; Recorder, etc. (W. F. W.)

THEOLOGY, PRACTICAL. See PRACTICAL THEOLOGY.

THEOLOGY, SCHOLASTIC. See SCHOLASTIC THEOLOGY.

THEOLOGY AND SCIENCE. See SCIENCE AND RELIGION.

THEOLOGY, SPECULATIVE. This title has come into use, particularly in Germany, to designate that method in systematic theology which, availing itself of all the helps subsidiary to theology, collects its material under the guidance of a philosophical, or speculative, survey of the field, and combines it into a systematic whole.

1. The necessity for such a term is shown by the fact that neither systematic theology nor Christianity itself can be compressed within the compass of a system of practical doctrines only. Christianity is designed to benefit the entire man, his intellect as well as his feelings and will. Indeed, Christian piety is based on the truth; and Christianity is the revelation of the truth and the absolute religion. To attain a direct objective knowledge of God, as distinct from the indirect knowledge obtained from the contemplation of his works, etc., is evidently the work of speculation; and the same is true of that defence of Christianity which not only undermines the arguments of assailants, but establishes the reasons for Christianity in truth.

2. The material of speculative theology is gathered from the realm of experience everywhere, mundane and supermundane, and more directly still from the Christian faith. The task of speculative theology is to combine the experimental facts of the religious life into a harmonious system in which thought and scientific knowledge are the other elements. Its method is to seize on the historical facts connected with Christianity and trace them up until it arrives at the great central fact—the divine life incarnated in the person of Jesus Christ. Faith, by which we mean an immovable footing on the truths and realities of Christianity, is therefore a prerequisite for this science; but this can never become fanaticism, because the science is equally based on the safe ground of known historic fact.

Christianity is specially adapted for speculative treatment by reason of its possessing a point of internal unity which combines both idea and fact, God and man, and therefore concentrates in itself the power to overcome all contrasts. The ancient Church correctly fixed that point in the incarnation of the Logos (Ignatius, Irenæus, Origen, Athanasius, Gregory of Nyssa). The dangers

of speculation in theology are well illustrated in the intellectualism of contemplation as displayed in the Eastern Church. The more practical and ethical tendency of the West served to complete, and, to some extent, correct, the Eastern intellectualism. Tertullian and Augustine gave themselves to practical speculation; but Anselm was the father of genuine Christian speculation (*Cur Deus Homo?*). Aquinas and Duns Scotus, though inferior to him, rendered good service in the same field. The Reformation was concerned rather with the distinctively religious than the speculative interests of Christianity, though Anselm's ideas were carried forward and established in its progress. Not until after fundamental inquiries into the philosophy of knowledge and into the facts connected with God and the world which we possess had been made was it entirely possible to utilize, for speculative purposes, the treasures of Christianity for defence, attack, and positive development. The fruitage of such investigations may be seen in the works of Schleiermacher, Daub, Marheinecke, Rothe, Martensen, etc. See PHILOSOPHY.

Upon the whole subject consult Baur, *Christl. Gnosis* (1835); Ritter, *Gesch. d. christl. Philosophie* (1841-51, 6 vols.). See Herzog, *Real-Encyklop.* s. v.

**Theomancy** (Θεός, God, and μαντρία, divination), a kind of divination drawn from the responses of the oracle among heathen nations.

**Theōnas**, or **Theon** (see the extract from Philostorgius given by Photius), was bishop of Marmarica, in Cyrenaica, in the 4th century, and one of the most devoted adherents of Arius. The synodal circular given in Athanasius, i, 398 sq. (ed. Montfaucon), from bishop Alexander, which mentions the earliest measures taken against Arius, contains the names of Theonas and his colleague and neighbor Secundus of Ptolemais. The circular referred to indicates that both Theonas and Secundus had been deposed; but it would seem that the deposition was not enforced, since they appeared at the Council of Nice in the character of qualified members. They achieved notoriety in that synod by resisting the *Homoousion* more firmly even than did their leaders, Eusebius and others; and as they refused to unite in the condemnation of Arius, they were again deposed and banished. Philostorgius (i, 2, 1) states that Theonas was recalled by the emperor Constantine; but he would seem to have taken no further part in the ecclesiastical conflicts of the time. His name occurs no more in the lists of combatants. See Theodoret, *Hist. Eccles.* i, 7 sq.; Socrates, *Hist. Eccles.* i, 9 (*Decrees of Nice*); Epiphanius, *Hær.* lxi, 8, and comp. lxxvii, 6, and lxi, 11; Tillemont, *Mémoires pour servir à l'Histoire Ecclés.* (Brussels, 8vo ed.), vi, 2; *Hist. Abrégée des Ariens*, art. vi, vii; and *History of the Council of Nice*, art. vi, xi.—Herzog, *Real-Encyklop.* s. v.

**Theopaschites** (from Θεός, God, and πάσχω, to suffer). This term was applied to those persons in the ancient Church who pronounced in favor of the formula that God had suffered and been crucified, and occurs for the first time in the letters of Isidore of Pelusium (q. v.) (*Epp.* i, 102, 124). The addition of the clause *θεὸς ἰσταυρώθη* to the *Trisagion* by Peter Fullo (q. v.) gave greater currency to its use (Theophanis, *Chronographia*, p. 97, 184), and formed an element in the Monophysite disputes. Fulgentius Ferrandus and Fulgentius of Ruspe declared in favor of the formula "One belonging to the Trinity has been crucified" (see Gieseler, i, 2, 365; Schröckh, xviii, 582), which was subsequently approved by the Fifth Œcumenical Synod of Constantinople in 553 (Anathema 10). Fullo's addition to the *Trisagion* was in use among the Catholics of Syria until its rejection by the *Concilium Quinisextum* in 692 (Canon 81), after which only Monophysites and Monothelites continued its use. The Catholics, in the meantime, had reached the conclusion that every addition to the *Trisagion* involved a quaternity. Theopaschitism is a very general conception of the popular mind, even in Protes-

tant countries, and has found support in many hymns which have been admitted into use in the churches. It is also most intimately connected with the conception which underlies the expression "Mother of God;" for if it may be said that God was born of Mary, it may with equal propriety be said that God was crucified. See the Church Histories; Smith's Hagenbach, *Hist. of Doctrines*, § 102; Herzog, *Real-Encyklop.* s. v.

**Theopathetics**, a designation of those mystics who have resigned themselves, more or less passively, to an imagined divine manifestation. Among these may be mentioned Tanchelm, who appeared in the 12th century, and announced himself as the residence of Deity; Gichtel, who believed himself appointed to expiate by his prayers and penance the sins of all mankind; and Kuhlmann, who traversed Europe the imagined head of the fifth monarchy, summoning kings and nobles to submission.

**Theopathy** (Θεός, God, and πάθος, feeling), a word used by Dr. Hartley as synonymous with piety or a sense of Deity.

**Theophānēs** OF BYZANTIUM, the designation of two early ecclesiastical characters.

1. A historian who is supposed to have lived at Constantinople at the close of the 6th century. He wrote a history of the war waged with Persia from 567 to 573, and also, it is said, a history of the reign of Justinian. Photius mentions both works, and quotes from the former (*Cod.* 64). See Labbeus, *Excerpta Legationum* (Paris, 1647).

2. The chronographer, confessor, and saint. Of this man an ancient biography, said to be the work of Theodore Studita (q. v.), relates that he was born in or about the year 578, and that the emperor Constantine Copronymus became his guardian. The monastic impulse led him to bind himself to a life of continence on the eve of his marriage with the daughter of a wealthy patrician chosen to be his bride by the emperor himself, and subsequently to separate himself from his wife altogether. Leo IV called him to court, laid upon him official responsibilities, and placed him over the public buildings in Mysia; but, in Irene's reign, Theophanes became a monk in Lesser Mysia, and in time abbot of the monastery of Ager, which he had built. He was a zealous image-worshipper, and present as such at the second Council of Nice in 787. In 813 Leo the Armenian sought to persuade him to renounce the worship of images, and punished his obstinate refusal with imprisonment and banishment to the island of Samothrace, where Theophanes died about 816. A *Chronography* by him is extant, which records both ecclesiastical and secular matters from the first year of the reign of Diocletian to the first year of Leo the Armenian. It lacks many excellences, and has been attributed, though without sufficient reason, to other authors; but its statements possess considerable value as sources for the Iconoclastic troubles. The best edition is that of Classen (Bonn, 1839, 2 vols.), preceded by a Greek *Vita* and an *Officium S. Patris Nost. Theophanis*, etc., of March 12. See Vossius, *De Hist. Gr.* ii, 24; Cave; Oudin; Fabr., *Bibl. Gr.* vi, 151 (old ed.), etc.—Herzog, *Real-Encyklop.* s. v.

**THEOPHANES**, styled CERAMEUS, archbishop of Tauromenium, between Syracuse and Messina, in the former half of the 11th century (? see his own *Homily* 26, and Leo Allatius; but comp. Scorsus, *ut infra*). He also bore, it would seem, the name of Gregory, which occurs in several MSS. He wrote *Homilies*, sixty-two of which were published in 1644 by the Jesuit Scorsus at Paris, with notes and two proems setting forth the life, teachings, and literary qualities of Theophanes, etc. The *Homilies* are written in Greek, and the style is flowing and easy, but vitiated by an excessive tendency to allegorize. Image-worship and invocation of the Virgin are taught everywhere. Consult Cave, *Hist. Lit.* ii, 132, and see Herzog, *Real-Encyklop.* s. v.

**Theophany**. The ancient Greeks were accustomed, during a certain festival named *τὰ Θεοφάνεια*, to display at Delphos before the public gaze the images of all their gods. *Θεοφάνεια* denoted the apparition of one or more gods. The term thus understood was applied by ancient Christian writers to the manifestations of God under the Old Covenant and to the incarnation of Christ; in the latter instance with reference to the birth, the baptism, and the second advent of Christ. *Ἡ ἐπιφάνεια* was, however, a usual substitute for its employment as respects his birth. See EPIPHANY. Later usage has given to the term a doctrinal meaning, by which it is made to designate a special form of the divine revelation, to determine which form it is necessary to examine the entire series of modes of the divine manifestation (see Bretschneider, *Systemat. Entwicklung*, p. 196). Without delaying to undertake a survey of this kind, we sketch the scriptural view of the theophany in the following paragraphs.

1. The theophany is never an immediate revelation of the supermundane Deity itself (John i, 18; 1 Tim. vi, 16). God reveals himself only in Christ (Matt. xi, 27). The theophany is therefore more accurately defined as a Christophany, or an epiphany of God in Christ; and all nature is a storehouse of signs of the divine presence, which uniformly point to Christ (Rom. i, 20; Col. i, 16). See LOGOS.

2. The theophany, regarded as a Christophany, is developed in three great stages: (1) under the Old Test.; (2) in the incarnation; (3) in Christ's second advent. In that advent the theophany, or revelation of the divine glory, will reach its consummation (Titus ii, 13). The first advent was also a revelation of the kindness and love of God (iii, 4) and of his grace and truth (John i, 14-17; xiv, 9); and with that revelation corresponded the fact that Christ *saw* the Father in all his work, even as the future manifestation of Christ shall be accompanied with the blessed vision of the saints (1 John iii, 2). Our attention is, however, confined by dogmatics to the modes of manifestation which occurred under the Old Test. prior to the advent of Christ, or under the New as accompanying or representing his presence. See ADVENT.

3. The theophany or Christophany of Scripture is the epiphany of the coming Christ, mediated through the angel of the Lord (Gen. xvi, 7, etc.), of the face (Exod. xxxiii, 14; Isa. iii, 9), or of the covenant (Mal. iii, 1). This angel was not a created being. His symbolic sign was the pillar of cloud and fire; his attribute the display of the glory or majesty of God (δὶ' ἑα, כבוד); his later Rabbinical and theological designation the *Shechinah* (q. v.).

4. The manifestation of God in Christological theophany begins with the voice or the miracle of hearing (the voice of God and of heaven being identical, but different from the Bath-Kol of the later Jews), and progresses towards apparition proper, which is a miracle addressed to the eye, and in which the angel of the Lord appears escorted by actual angels, at first only two, but in later instances myriads in number. See IATH-KOL.

5. Theophany, the objective mode of revelation, never takes place without being accompanied in the mind of the observer with an ecstatic vision. This connection with the theophany distinguishes the vision from the ordinary historical occurrence (2 Kin. vi, 17; John xx, 12; Acts ix, 7; comp. xxii, 9; xii, 11). On the other hand, no vision is without its element of theophany, which fact distinguishes it from mere subjective hallucination (Isa. vi, 1 sq.; the book of Daniel; Zechariah; Acts x, 3). See VISION.

6. The various modes of manifestation can be distinguished, therefore, only when the predominantly objective facts of the theophany are compared with the predominantly subjective facts of the vision. See PROPHECY.

7. Theophanic Christophany enters fully into earthly

conditions by being incorporated in elements of nature and of soul-life. It completes itself in one direction by the apparition of angels, and in the other by symbolical representations of an earthly nature (Gen. iii, 24; Exod. iv, 16; Psa. xviii, 11; civ, 4; Isa. lxi, 2; Mal. ii, 7); but most of all by the Urim and Thummim (q. v.).

8. Vision takes place in the way of a momentary vacating of the body or an ecstasy (2 Cor. xii, 4). It expands in an abundance of symbolical and allegorical visions (Ezek., Dan., Zech., Rev.), and finds its completion in the prophetic dream. The latter is conditioned in a higher determination of the ordinary life of the person chosen, and occurs chiefly where the common life has not been developed to any considerable extent, as with the Old-Test. Joseph; or where it is involved with a secular calling, as in the case of the New-Test. Joseph. See DREAM.

9. The life of Christ combined into a higher unity all the fragmentary features of pre-Christian theophanies (πολυτρόπως, Heb. i, 1). His personal life revealed God to the world, and the entire universe became for him, in turn, a theophanic environment attesting himself; because his whole inner life became an incessant subjective vision, in which the contrast between ecstasy and ordinary consciousness of the world no longer exists. Consult Herzog, *Real-Encyklop.* s. v.; Buttstedt, *De Adparitionibus Deorum Gentilium* (Ger. 1744); Millies, *De Variis Generibus Θεοφανειῶν* (Hal. 1802); *Stud. u. Krit.* 1859, No. ii. See CHRISTOLOGY.

**Theophilanthropists** (Gr. *lovers of God and man*), the name assumed by a party of French deists during the Reign of Terror to indicate their adherence to a natural or theistic religion and worship which were intended to supersede Christianity. In February, 1795, freedom of religious opinion, and with it of religious worship, was allowed; and it was clear that neither Christianity nor Catholicism in its usual forms had been driven out of the hearts of the people. The civil authorities were much concerned lest the old political sympathies for royalty should revive with Catholicism. Still, a felt consciousness of the necessity of some religion led many to adopt a form of worship adapted to a natural religion. The foundation of this new religion was laid in 1796 by five heads of families, who, having declared themselves Theophilanthropists, met together every week for united prayer, to listen to moral remarks, and to sing hymns in honor of God. In the same year a kind of catechism or directory for public or social worship was published at Paris under the title of *Manuel des Théantrophiles*. This breviary was based on the simple fundamental articles of a belief in the existence of God and in the immortality of the soul. In 1797 Laréveillère-Lépaux stood at the head of the society; the Directory assigned ten parish churches to the rapidly growing association, and the new worship soon spread over the provinces. As to their mode of worship, there was a simple altar—whereon flowers and fruit, according to their season, were placed as thank-offerings—and a rostrum for the speaker. The walls were adorned with moral mottoes, such as, "Children, honor your parents and respect your elders;" "Husbands and wives, be kind to one another." Instead of the traditional festivals, there now occurred those of nature, arranged according to the seasons of the year; in the place of sacraments, there were arbitrary and highly sentimental ceremonies, which took place at the birth of a child, at the reception of new members, at celebrations of marriage, at distribution of prizes to children, and at funerals. They had four special festivals, in honor of Socrates, St. Vincent de Paul, Jean Jacques Rousseau, and Washington. As religious feeling began to revive, the Theophilanthropists began to decline. They and their sentimental trumpery were turned out of the churches; the Revolutionary government forbade them, Oct. 4, 1801, to use even the three churches which were left in their hands; and when their petition for holding their services elsewhere was

refused, the Theophilanthropist religion soon died of inanition, despised by the infidel party as well as by those who still remained Christians. An attempt to revive it after the revolution of 1830 utterly failed. See Blunt, *Dict. of Sects*, s. v.; Gardner, *Faiths of the World*, s. v.; Grégoire, *Histoire des Sectes Religieuses*; Hagenbach, *Hist. of the Church in the 18th and 19th Centuries*, ii, 435.

**Theophilestāti** (Θεοφιλέστατοι, *most dear to God*), a title of respect given to bishops in the early Church. This title frequently occurs in the emperor's rescript in the civil law, and was of such common use in those times that Socrates (*Proem. ad lib. vi*) thinks himself obliged to make some apology for not giving it to the bishops that were then living. See Bingham, *Christ. Antiq.* bk. ii, ch. x, § 6.

**Theophilus** (Θεόφιλος, *friend of God*), the name of two men associated with sacred history, one of them being mentioned in the New Test. and the other by Josephus.

1. The person to whom Luke inscribes his Gospel and the Acts of the Apostles (Luke i, 3; Acts i, 1). A.D. cir. 56. The important part played by Theophilus as having immediately occasioned the composition of these two books, together with the silence of Scripture concerning him, has at once stimulated conjecture, and left the field clear for it. Accordingly we meet with a considerable number and variety of theories concerning him.

1. Several commentators, especially among the fathers, have been disposed to doubt the personality of Theophilus, regarding the name either as that of a fictitious person or as applicable to every Christian reader. Thus Origen (*Hom. 1 in Luc.*) raises the question, but does not discuss it, his object being merely practical. He says that all who are beloved of God are Theophili, and may therefore appropriate to themselves the gospel which was addressed to Theophilus. Epiphanius (*Heres. li, 429*) speaks doubtfully: εἰρ' οὖν τινὶ Θεοφίλῳ τότε γράφων ἔλεγεν, ἢ παντὶ ἀνθρώπῳ Θεὸν ἀγαπῶντι. Salvianus (*Epist. 9 ad Salonium*) apparently assumes that Theophilus had no historical existence. He justifies the composition of a work addressed *Ad Ecclesiam Catholicam*, under the name of Timotheus, by the example of the evangelist Luke, who addressed his gospel nominally to a particular man, but really to "the love of God;" "Nam sicut Theophili vocabulo amor, sic Timothei honor divinitatis exprimitur." Even Theophylact, who believes in the existence of Theophilus, takes the opportunity of moralizing upon his name: καὶ πᾶς δὲ ἄνθρωπος Θεοφιλὴς, καὶ κράτος κατὰ τῶν παθῶν ἀναδείκνυμενος Θεοφίλος ἐστὶ κρᾶτιστος, ὅς καὶ ἀξίος τῷ ὄντι ἰστὶν ἀκούειν τοῦ Εὐαγγελίου (*Argum. in Luc.*). Among modern commentators, Hammond and Leclerc accept the allegorical view; Erasmus is doubtful, but, on the whole, believes Theophilus to have had a real existence.

2. From the honorable epithet *κράτιστε*, applied to Theophilus in Luke i, 3, compared with the use of the same epithet as applied by Claudius Lysias and Tertullus severally to Felix, and by Paul to Festus (Acts xxiii, 26; xxiv, 3; xxvi, 25), it has been argued with much probability, but not quite conclusively, that he was a person in high official position. Thus Theophylact (*Argum. in Luc.*) conjectures that he was a Roman governor, or a person of senatorial rank, grounding his conjecture expressly on the use of *κράτιστε*. Eusebius (*Ad Act. Apost.* i, 1) tells us that he was a governor, but gives no authority for the assertion. The traditional connection of Luke with Antioch has disposed some to look upon Antioch as the abode of Theophilus, and possibly as the seat of his government. Bengel believes him to have been an inhabitant of Antioch, "ut veteres testantur." The belief may partly have grown out of a story in the so-called *Recognitions of St. Clement* (lib. x), which represents a certain nobleman of Antioch

of that name to have been converted by the preaching of Peter, and to have dedicated his own house as a church, in which, as we are told, the apostle fixed his episcopal seat. Bengel thinks that the omission of *κἀρίστε* in Acts i, 1 proves that Luke was on more familiar terms with Theophilus than when he composed his gospel.

3. In the Syriac lexicon, extracted from the *Lexicon Heptaglot*, of Castell, and edited by Michaelis (p. 948), the following description of Theophilus is quoted from Bar-Bahlul, a Syrian lexicographer of the 10th century: "Theophilus, primus credentium et celeberrimus apud Alexandrienses, qui cum aliis Ægyptiis Lucam rogabat, ut eis evangelium scriberet." In the inscription of the Gospel according to Luke in the Syriac version, we are told that it was published at Alexandria. Hence it is inferred by Hase (*Bibl. Bremensis Class.* ch. iv, fasc. iii, diss. 4, quoted by Michaelis, *Introd. to the New Test.* [ed. Marsh], vol. iii, ch. vi, § 4) and by Bengel (*Ordo Temporum* [2d ed.], p. 196) that Theophilus was, as asserted by Bar-Bahlul, a convert of Alexandria. This writer ventures to advance the startling opinion that Theophilus, if an Alexandrian, was no other than the celebrated Philo, who is said to have borne the Hebrew name of Jedidiah (יְדִידְיָהּ, i. e. Θεόφιλος). It hardly seems necessary to refute this theory, as Michaelis has refuted it, by chronological arguments.

4. Alexander Morus (*Ad Quædam Loca Nov. Fæd. Note: ad Luc. i, 1*) makes the rather hazardous conjecture that the Theophilus of Luke is identical with the person who is recorded by Tacitus (*Annal.* ii, 55) to have been condemned for fraud at Athens by the court of the Areopagus. Grotius also conjectures that he was a magistrate of Achaia baptized by Luke. The conjecture of Grotius must rest upon the assertion of Jerome (an assertion which, if it is received, renders that of Morus possible, though certainly most improbable), namely, that Luke published his gospel in the parts of Achaia and Boeotia (Jerome, *Comm. in Matt. Proem.*).

5. It is obvious to suppose that Theophilus was a Christian; but a different view has been entertained. In a series of dissertations in the *Bibl. Bremensis*, of which Michaelis gives a *résumé* in the section already referred to, the notion that he was not a Christian is maintained by different writers and on different grounds. Heumann, one of the contributors, assuming that he was a Roman governor, argues that he could not be a Christian, because no Christian would be likely to have such a charge intrusted to him. Another writer (Theodore Hase) believes that the Theophilus of Luke was no other than the deposed high-priest Theophilus the son of Ananus (see below). Michaelis himself is inclined to adopt this theory. He thinks that the use of the word *κατηχήτης* in Luke i, 4 proves that Theophilus had an imperfect acquaintance with the facts of the gospel (an argument of which bishop Marsh very properly disposes in his note upon the passage of Michaelis), and further contends, from the *ἐν ἡμῖν* of Luke i, 1, that he was not a member of the Christian community. He thinks it probable that the evangelist wrote his gospel during the imprisonment of Paul at Cæsarea, and addressed it to Theophilus as one of the heads of the Jewish nation. According to this view, it would be regarded as a sort of historical apology for the Christian faith.

In surveying this series of conjectures, and of traditions which are nothing more than conjectures, we find it easier to determine what is to be rejected than what we are to accept. In the first place, we may safely reject the patristic notion that Theophilus was either a fictitious person or a mere personification of Christian love. Such a personification is alien from the spirit of the New-Test. writers, and the epithet *κἀρίστε* is a sufficient evidence of the historical existence of Theophilus. It does not, indeed, prove that he was a governor, but it makes it most probable that he was a person

of high rank. His supposed connection with Antioch, Alexandria, or Achaia rests on too slender evidence either to claim acceptance or to need refutation; and the view of Hase, although endorsed by Michaelis, appears to be incontestably negated by the Gentile complexion of the third gospel. The grounds alleged by Heumann for his hypothesis that Theophilus was not a Christian are not at all trustworthy, as consisting of two very disputable premises; for, in the first place, it is not at all evident that Theophilus was a Roman governor, and, in the second place, even if we assume that at that time no Christian would be appointed to such an office (an assumption which we can scarcely venture to make), it does not at all follow that no person in that position would become a Christian. In fact, we have an example of such a conversion in the case of Sergius Paulus (Acts xiii, 12). In the art. LUKE, GOSPEL ACCORDING TO, reasons are given for believing that Theophilus was "not a native of Palestine . . . not a Macedonian, nor an Athenian, nor a Cretan. But that he was a native of Italy, and perhaps an inhabitant of Rome, is probable from similar data." All that can be conjectured with any degree of safety concerning him comes to this, that he was a Gentile of rank and consideration, who came under the influence of Luke, or (not improbably) under that of Paul, at Rome, and was converted to the Christian faith. It has been observed that the Greek of Luke, which elsewhere approaches more nearly to the classical type than that of the other evangelists, is purer and more elegant in the dedication to Theophilus than in any other part of his gospel. From all these circumstances, and especially from the fact that both the gospel and the Acts were dedicated to Theophilus—both, therefore, being written, in all probability, about the same time, and that time being Paul's imprisonment at Rome, where the latter ends—we may reasonably infer that Theophilus was one of the apostle's converts in the imperial city during the two years' sojourn of Paul there, for a part, if not the most, of which Luke was his companion, and hence likely to be acquainted with, and interested in, the noble convert. See LUKE; PAUL. Monographs in Latin have been written on Theophilus by Heumann (in the *Bibl. Bremensis*, iv, 483), Oslander (Tub. 1659), Stoltze (Viteb. 1698), and Schelvig (Ged. 1711).

2. A Jewish high-priest, the son of Annas or Ananus, brother-in-law to Caiaphas [see ANNAS; CAIAPHAS], and brother and immediate successor of Jonathan. The Roman præfect Vitellius came to Jerusalem at the Passover (A.D. 37), and deposed Caiaphas, appointing Jonathan in his place. In the same year, at the feast of Pentecost, he came to Jerusalem, and deprived Jonathan of the high-priesthood, which he gave to Theophilus (Josephus, *Ant.* xviii, 4, 3; 5, 3). Theophilus was removed from his post by Herod Agrippa I after the accession of that prince to the government of Judæa in A.D. 41, so that he must have continued in office about five years (*ibid.* xix, 6, 2). Theophilus is not mentioned in the New Test., as no events occurred during his pontificate in which the apostles were specially involved. See HIGH-PRIEST.

**THEOPHILUS OF ALEXANDRIA**, a bishop in the latter part of the 4th and the beginning of the 5th century, is distinguished for his persecution of the Origenists, for his hostility to Chrysostom, and as being one of the most violent and unscrupulous even among the ecclesiastics of the 5th century. He succeeded Timotheus as bishop of Alexandria in A.D. 385, and soon after secured the favor of the emperor by a characteristic manœuvre. When the fate of the empire was suspended on the battle which was to decide between Maximus and Theodosius (388), he sent his legate, Isidore, to Rome provided with letters to both, the one or the other of which he was to deliver with certain presents, according to the issue of the battle. He was also very zealous against heathenism, and in 391 obtained the emperor's consent to use severe measures against the

pagans in his district, which resulted in the most of them being driven out of Egypt. His behavior to the different sects of Christians was marked by the same unscrupulous inconsistency. He appears to have passed a part of his early life among the monks of Nitria, some of whom were Origenists and others Anthropomorphites. At first he declared himself decidedly against the latter, and, in opposing them, he sided openly with the Origenists, drawing his arguments from the works of Origen. When, however, it became evident that the majority of the Egyptian monks were Anthropomorphites, Theophilus went over to them about 399, condemned the writings of Origen, commanded all his clergy to burn them, and commenced a cruel persecution of all who opposed the Anthropomorphites, while he himself continued to read the works of Origen with admiration. In 401 he issued a violent letter in which he condemned the writings of Origen and threatened the latter's adherents; in the following year he sent forth another of like character, to the unbounded delight of Jerome. Theophilus was subsequently called to Constantinople by the empress Eudoxia, and secured the deposition and banishment of Chrysostom (q. v.) in 403. During the tumult which followed, Theophilus escaped and returned to Alexandria, where, in 404, he issued a third Paschal letter against the Origenists, and where he died in 412. The works of Theophilus mentioned by the ancient writers are, *Προσφωνητικὸν πρὸς τοὺς φρονούντας τὰ Ὀριγέσιον*, quoted by Theodoret (*Dial.* ii, 191), and which Gennadius (33) calls "adversus Origenem unum et grande volumen;"—*Letter to Porphyry*, Bishop of Antioch, quoted in the *Acta Concil. Ephes.* pt. i, c. 4:—the three *Paschal Letters* already mentioned and one more:—and some other unimportant orations, letters, and controversial works. The *Paschal Letters* are still extant in a translation by Jerome, and are published in the *Antidot. contra Divers. Omnium Sæculorum Hæresias* (Basel, 1528 fol.); and the whole of his extant remains are contained in Galland, *Biblioth. Patr.* vii, 603 fol.; Cave, *Hist. Litt.* s. a. 385, p. 279, 280; Murdock, note to Mosheim, *Eccles. Hist.* i, 444 (Engl. ed.).—Smith, *Dict. of Greek and Latin Biog.* s. v.

**Theophilus of ANTIOCH**, a writer and bishop of the primitive Church, was educated a heathen, and afterwards converted to Christianity. He was ordained bishop of Antioch, succeeding Eros, about A.D. 170, and governed the Church twelve or thirteen years, at the end of which he died. Having been converted from heathenism by the study of the Scriptures, he wrote an apology for the Christian faith, addressed in the form of a letter to his friend Autolycus. The work shows much learning and more simplicity of mind. In its general structure it resembles the works of Justin Martyr and the other early apologists; but it contains a more detailed examination of the evidence for Christianity, derived both from Scripture and from history. The three books of Theophilus to Autolycus were first published in the collection of the monks Antonius and Maximus entitled *Sententiarum sive Capitum, Theologiarum præcipue, ex Sacris et Profanis Libris, Tomi Tres*. There have been a number of editions, the most complete being that of Johann Christoph Wolf (Hamb. 1724, 8vo), and an English translation by Joseph Betty (Oxford, 1722, 8vo). Theophilus was the author of several other works which were extant in the times of Eusebius and Jerome. Among them were works against the heresies of Marcion and Hermogenes:—*Commentary on the Gospels* (still extant in Latin, and published in the *Bibliotheca Patrum* [Paris, 1575, 1598, 1609, 1654, etc.]). Jerome refers to his *Commentaries on the Provverbs*. See Smith, *Dict. of Greek and Roman Biog.* s. v.; Fabric. *Bibl. Græc.* vii, 101–106; Mosheim, *Eccles. Hist.*; Herzog, *Real-Encyklop.* s. v.

**Theophilus of CÆSAREA**, a bishop who presided over the Council of Cæsarea in Palestine, and signed the letter of that council, which appears to have been

drawn up by himself, on the Paschal controversy, A.D. 198.

**Theophilus of CILICIA**, so often mentioned in legend, is said to have originally been the administrator of the Adana bishopric. Out of modesty, he declined the episcopal see, and was deprived of all his honors by the new bishop. He now applied for help to a Jewish sorcerer, who brought him into a nightly convention of devils. Here help was promised to him provided he would deny Christ and Mary and would assign his soul. He was restored to his former position; but, regretting what he had done, he prayed as a penitent to Mary, and through her intercession Christ took the assignment away from the devil and placed it upon his breast while asleep in the church, tired out by prayer. He now openly confessed his sin and died three days later. The author of the legend is said to have been a Greek cleric, Eutychianus; while a Neapolitan priest, Paulus (9th century), made it known in the West. In the *Acta SS.* for Feb. 4 we find this legend in a poetical dress, by the bishop Marbod of Rennes. See Jubinal, *Œuvres de Rutebeuf*, vol. ii; Pfeiffer, *Marienslegenden* (Stuttgart, 1846); Blomaert, *Theophilus* (Ghent, 1836); Hoffmann von Fallersleben, *Theophilus* (Hanov. 1853–54); Meyer, *Rudewims Gedicht über Theophilus* (Munich, 1873; edited after a Munich MS. of the 13th century). (B. P.)

**Theophilus of the INDIES**, bishop of the Homerites, was born in the isle of Diu. When yet a youth he was brought as a hostage to Constantinople, where he became a Christian (Arian). He was made deacon, and finally bishop for the Arabic mission about 350. Being supplied by Constantius with rich presents for the princes at home and with money for the building of churches, he converted the king of the Homerites, and built churches at Taphar, Aden, and Hormuz. The large number of Jews, however, residing in the country prevented a further propagation of Christianity. In the year 356 Constantius appointed him bishop of the Ethiopic Church. From the isle of Socotra he went to Axum, but was soon obliged to leave the place. See Le Quien, *Oriens Christianus*, ii, 644; *Theolog. Universal-Lexikon*, s. v. (B. P.)

**Theophōri** (Θεοφόροι, *God-bearers*), a name assumed by some of the early Christians, signifying that they carried about with them the presence of God. St. Ignatius gives himself this title in his inscriptions to his epistles, both of which begin Ἰγνατίος ὁ καὶ Θεοφόρος; and explains his meaning in his dialogue with Trajan, "Theophorus is one that carries Christ in his heart." "Dost thou, then," said Trajan, "carry him that was crucified in thy heart?" Ignatius answered, "Yes; for it is written, 'I will dwell in them and walk in them.'" Anastasius Bibliothecarius, indeed, gives another reason why Ignatius was called *Theophorus* (Θεοφόρος, *God-borne*)—because he was the child whom our Saviour took and placed in the midst of his disciples, laying his hands upon him; and, therefore, the apostles would never presume to ordain him by imposition of hands after Christ. But, as bishop Pearson and others observe, this is a mere invention of the modern Greeks. Vincentius Bellovacensis and others advance this ridiculous reason: that Ignatius was so called because the name of Jesus Christ was found written in golden letters in his heart. But against these traditions we have the fact that the title was not peculiar to Ignatius, but common to all Christians. See Bingham, *Christ. Antiq.* bk. i, ch. i, § 4.

**Theophylact**, archbishop of Achrida and metropolitan of all Bulgaria, an eminent ecclesiastical writer, was born and educated at Constantinople. He was bishop in 1077, and perhaps some years later. The date of his death is uncertain, but probably about 1112, or later. After he was made bishop, he labored diligently to extend Christianity in his diocese, but met with much opposition, of which he complained in his

epistles. The works of Theophylact are: *Commentaria in Quatuor Evangelia* (Paris, 1631, fol.):—*Commentaries on the Acts of the Apostles*, Greek and Latin (Colon, 1568):—*Commentaries on St. Paul's Epistles*, Greek and Latin (Lond. 1636, fol.):—*Commentaries on Four of the Minor Prophets*; namely, Habakkuk, Jonas, Nahum, and Hosea, in Latin (Paris, 1589, 8vo). The *Commentaries* on all the twelve minor prophets are extant in Greek in the library of Strasburg, and have been described by Michaelis in his *Biblioth. Orientalis*. These commentaries are founded on those of Chrysostom; but his exegesis is so direct, precise, and textual, and his remarks are often so felicitous and to the point, that his commentaries have always been highly prized:—*Seventy-five Epistles*, in Greek, with notes by John Meursius (Leyden, 1617, 4to), and also in the *Bibliotheca Patrum*:—besides several tracts, some of which are rather doubtful. A splendid edition of all his works in Greek and Latin was published by J. F. Bernard Maria de Rubéis (Venet. 1754-63, 4 vols. fol.). See Chalmers, *Biog. Dict.* s. v.; Smith, *Dict. of Greek and Latin Biog.* s. v.

**Theophylactians**, a name given to the orthodox Christians of Alexandria by the Jacobites in the 7th century. See Neale, *Hist. of the Eastern Church*, ii, 87.

**Theosebites**, a sect which spread in Palestine and Phœnicia during the first half of the 5th century, and appear to have been similar to, if not identical with, the HYPHISTARIANS (q. v.). The Theosebites exalted the sun, moon, and stars into objects of worship, and yet acknowledged the Supreme Deity over all. Their religion thus appears to have been an adulteration of Christianity with Magianism. Probably these sects are to be traced to the Therapeutæ and Essenes, who worshipped τὸ ὄν or Ὑψίστος, kept the Jewish Sabbath, and Jewish observances respecting food. They professed a partial belief in Christ, but were, at the same time, strict Unitarians.

**Theosophy** (Theosophia, *divine wisdom*), the name given to a so-called sacred science, which holds a place distinct as well from that of philosophy as from that of theology, even in questions where these latter sciences have the same object with it: namely, the nature and attributes of God. In investigating the divine nature and attributes, philosophy employs as the basis of its investigation the ideas derived from natural reason, while theology superadds to the principles of natural reason those derived from authority and revelation. Theosophy, on the contrary, professes to exclude all dialectical process, and to derive its knowledge of God from direct and immediate intuition and contemplation, or from the immediate communications of God himself. Theosophy, therefore, so far as regards the science of God, is but another name for mysticism (q. v.); and the direct and immediate knowledge or intuition of God, to which the Mystics laid claim, was, in fact, the foundation of that intimate union with God, and consequent abstraction from outer things, which they made the basis of their moral and ascetical system. Theosophy has existed from a very early date; and within the Christian period we may number among Theosophers the Neo-Platonists, especially Plotinus, Iamblichus, and Proclus; the Hesychasts of the Greek Church; all those of the mediæval Mystics who laid claim to any dogmatical theory; and in later times the Paracelsists, Bodenstein and Thalhäuser, Weizel, Jacob Boehme, and Swedenborg.

Below is a brief outline of Theosophy as taught by Boehme (q. v.). Finite existences of every kind are an efflux from the One Infinite Existence, and such an efflux is a necessary attribute of God's own being. All things come from a working-will of the holy, triune, incomprehensible God, who manifests himself through an external efflux of fire, light, and spirit. Angels and men are the true and real offspring of God, their life originating in the divine fire from which light and love are generated in them. This triune life in God is the perfection of being, and the loss of it constituted the fall of angels

and men. Thus man having been made a living image of the divine nature and endowed with immortality, he exchanged the light, life, and Spirit of God for the light, life, and spirit of the world. He died to the influences of the Spirit of God on the very day of his transgression, but remained subject to all the external influences of the world; and the restoration of the influence of the Spirit constitutes the work of redemption and sanctification. Christ restored to men the germ of the paradisiacal life, which is possessed by all through new birth and his indwelling. No son of Adam can be lost except by the wilful loss of this paradisiacal germ of the divine life; and its development is the development of salvation. In the hands of Law, the theosophy of Boehme assumed a much more reasonable form than that in which it had been clothed by its author, whose language was a medley of alchemy, obscure analogies, and false etymologies. It was then exhibited as a philosophy of redemption and spiritual life, which only wanted the keystone of sacramental psychology to make it a firm system of truth. For very full information on the subject, see Walton, *Notes and Materials for an Adequate Biography of William Law, comprising an Elucidation of the Scope and Contents of the Writings of Jacob Boehme, and of his Great Commentator Dionysius Andreas Freher, etc.* (1854). See Blunt, *Dict. of Doctrinal Theology*, s. v.; *Chambers's Encyclop.* s. v.

**Theotōkos** (Θεοτόκος, *God-bearing*). 1. A title applied by various Romish writers to the Virgin Mary as the "mother of God." See MARIOLATRY.

2. An ecclesiastical term adopted at the councils of Ephesus and Chalcedon to assert the doctrine of the divinity of our Lord's person. The truth which it was designed to teach is that although two natures are united in one Christ, yet there are not two persons, but one. Our Lord was a divine person from all eternity, and upon his incarnation he did not cease to be the person he had been before. There was, therefore, no change or interruption of his identity, for the Godhead became incarnate, not by the conversion of the Godhead into flesh, but by taking the manhood into God. Although the nature which he took of the substance of his mother was human, the person who was born was divine, and this was the truth declared in the adoption of the term Θεοτόκος. It is not, of course, meant that the Virgin was the mother of the Godhead of our Lord, but that the human nature, which he had assumed of her substance, was so united to the divinity that the person begotten of her was God as well as man. In this sense she might be called the mother of God. Equivalent expressions are used by Irenæus and Ignatius, while Θεοτόκος is used by Alexander of Alexandria, Athanasius, Cyril of Jerusalem, Origen, and Gregory Theologus. This doctrine has been the cause of much debate, and of more than one council. See CHRISTOLOGY.

**Therapeutæ** (Θεραπευταί [*attendants*, i. e. *workers*, sc. of God] and Θεραπευριδές), a Jewish sect in Egypt, which is described by Philo in a separate treatise Περὶ βίου θεωρητικοῦ ἢ περὶ ἱερῶν ἀρετῶν, or *De Vita Contemplativa* (Opp. [ed. Mangey], ii, 471-486). It is strange that no other writer of that period, not even Josephus, knows anything about the Therapeutæ; for what we find in ecclesiastical writings about them since the time of Eusebius is nothing but a reproduction of the Philonic narrative; and the erroneous opinion of Eusebius, who regarded the Therapeutæ as Christians, has been followed by all Church fathers, with the exception of Photius. Modern critics have, with a few exceptions, identified the Therapeutæ with the Essenes, but with this difference, that while the former were only theorists, the latter were men of practical life. Of late the question as to who the Therapeutæ were has become superfluous, since some scholars, especially the Jewish historian Grätz, believe Philo's treatise to be spurious, and only an embellishment of Christian monachism as it began in Egypt. But, before de-

ciding the question as to whether this treatise is spurious or genuine, we must examine first what Philo tells us about the Therapeutæ.

I. *Manners and Usages of the Therapeutæ.*—The fatherland of the Therapeutæ is Egypt, and beyond this country the order has probably not been propagated. When Philo speaks of their diffusion through the whole world (πολλαχοῦ μὲν οὖν τῆς οἰκουμένης ἐστὶ τοῦτο τὸ γένος), we cannot take his words in their literal sense, as does Lucius (*Die Therapeuten* [Strasburg, 1880], p. 16 sq.), but in a more general sense, because we have no notice whatever of the Therapeutæ outside of Egypt. What he meant to say is that, outside of Egypt, there were also men of a similar tendency, without believing that they really belonged to this order in Egypt. Keim thinks, therefore, that Philo's words are an exaggeration, or rather that he confuses the hermit life of the Jews with like "phenomena among the Greeks and barbarians." Grätz, however, holds a different opinion, and adduces this as an argument for Christian monks, who were generally diffused at an early age (as early as the time of Eusebius or of Philo?). "But," asks Dr. Keim, "has not Philo compared both the Essenes and Therapeutæ with the Gymnosophists and Magi, with the wise man Kalanos, with Anaxagoras and Democritus?" It is evident that Philo, in describing this order, had a certain colony in view near the Lake Mareotis, to the south of Alexandria, where the Therapeutæ lived. They dwelt at no great distance from each other, but every man in his own little house, his sanctuary, and his cell. They lived alone for the whole week, not stepping over the threshold, nor looking out (τὴν αὐλείαν οὐχ ὑπερβαίνοντες, ἀλλ' οὐδὲ ἐξ ἀπόπτου θεωροῦντες).

Simple as was their house, their raiment was equally so, being a cloak of some shaggy hide for winter, and a thin mantle or linen shawl in the summer; and in their religious assemblies they appeared in a white garment. As temperance was regarded as the highest virtue, their mode of living was very simple. None of them took any meat or drink before the setting of the sun, because they believed that the work of philosophizing was one worthy of the light, and that the care for the necessities of the body was suitable only to darkness; on which account they appropriated the day to the one occupation, and a brief portion of the night to the other (ἐπειδὴ τὸ μὲν φιλοσοφεῖν ἄξιον φωτός κρίνουσιν εἶναι, σκότους δὲ τὰς σωματικὰς ἀνάγκας, ὅθεν τῷ μὲν ἡμέρας, ταῖς δὲ βραχὺ τι μέρος τῆς νυκτὸς ἐνεμεν). Many fasted for three days, several for six. They ate nothing of a costly character, but plain bread with a seasoning of salt, which the more luxurious of them further seasoned with hyssop, and their drink was water from the spring. For such a simple mode of living they naturally had no need of great earthly possessions; but, as Philo says, they left their possessions to their relatives or friends, and without any property they went out, as if their mortal life had already come to an end, only anxious for an immortal and blessed existence (εἰτα διὰ τὸν τῆς ἀθανάτου καὶ μακαρίας ζωῆς ἥμερον τετελευτήκειαν νομίζοντες ἤδη τὸν θνητὸν βίον ἀπολείπουσι τὰς οὐσίας υἱοῖς ἢ θυγατέραςιν, εἴτε καὶ ἀλλοις συγγενείαις).

They prayed twice every day, at morning and at evening. When the sun rose, they entreated God that the happiness of the coming day might be real happiness, so that their minds might be filled with heavenly light. The interval between morning and evening was devoted wholly to meditation on, and the practice of, virtue. They took up the Sacred Scriptures and philosophized concerning them, investigating the allegories of their national philosophy, since they looked upon their literal expressions as symbols of some secret meaning of nature intended to be conveyed in those figurative expressions (ἐντυγχάνοντες γὰρ τοὺς ἱεροῖς γράμμασι φιλοσοφοῦσι τὴν πάτριον φιλοσοφίαν, ἀλληγοροῦντες, ἐπειδὴ σύμβολα τὰ τῆς ῥήτης ἐρμηνείας νομίζουσι).

X.—Y

φύσεως ἀποκεκρυμμένης, ἐν ὑπονοίαις δηλουμένης). As a canon of such allegorical exposition of Scripture, the real home of which was in Egypt, they used the writings left by the founders of their sect (ἐστὶ δὲ αὐτοῖς καὶ συγγράμματα παλαιῶν ἀνδρῶν, οἱ τῆς αἰρήσεως ἀρχηγὰ γενόμενοι πολλὰ μνημεῖα τῆς ἀλληγορουμένης ιδέας ἀπέλειπον, οἷς καθάπερ τισὶν ἀρχετύποις χρώμενοι μιμοῦνται τῆς προαιρέσεως τὸν τρόπον). They also composed psalms and hymns to God in every kind of metre and melody imaginable, which they sang at their meetings. Having thus passed the day, they prayed again that their soul, being entirely lightened and relieved of the burden of the outward senses, might be able to trace out truth existing in its own consistory and council-chamber (ἐν τῷ ἐαυτῆς συνεδρίῳ καὶ βουλευτηρίῳ ἀλήθειαν ἱκνησάειν); and many of them, if Philo's statement is to be given credence, are said to have spoken in their sleep, divulging and publishing the celebrated doctrines of the sacred philosophy (πολλοὶ οὖν καὶ ἐκλαλοῦσιν ἐν ὑπνῷ ἀνευσεπτοῦμενοι τὰ τῆς ἱερᾶς φιλοσοφίας ἀόδιμα δόγματα).

Women were also received into their order, the greater part of whom, though old, were virgins in respect to their purity, and were animated by the same admiration for, and love of, wisdom, in the exercise of which they were desirous to pass their lives. These women, like the male members of the order, lived separately, performing the same duties; but at the meetings and banquets both sexes were united.

Slave-labor was dispensed with, because they looked upon the possession of slaves as something absolutely and wholly contrary to nature—for nature had created all men free; but the injustice and covetousness of some men who preferred inequality—that cause of all evil—having subdued the weaker, had given to the more powerful authority over the vanquished. At their common banquets, therefore, no slaves ministered to their wants, but young men who were selected from their order with all possible care, and whose dress was such that nothing of a slavish character could be seen in it, or, to use the words of Philo, ἄζωστοι δὲ καὶ καθεμμένοι τοὺς χιτῶνίσκους εἰσίσαιον ὑπηρετήσαντες, ἕνεκα τοῦ μηδὲν εἰδῶλον ἐπιφέρεισθαι δουλοπρεπεῖς σχήματος, εἰς τοῦτο τὸ συμπόσιον, i. e. they were ungirdled and with their tunics let down, in order that nothing which bears any resemblance to a slavish appearance might be introduced into this festival.

At the banquet they were presided over by a president (πρόεδρος), who addressed them and intoned a hymn, in which all joined. They sat according to their age, i. e. according to the length of time they belonged to the order. We must not, however, think that the president or elders exercised any gubernatorial power, for this is nowhere inferred; their functions were only restricted to the assemblies, in which also ἡγεμόνες and ἑταροὶ were mentioned, who acted as leaders of the choruses. The seventh day was especially distinguished. They anointed their bodies, and, clothed in white garments, they assembled in the common σιμνείον. Here they sat down with all becoming gravity, keeping their hands inside their garments, having their right hand between their chest and their dress, and the left hand down by their side, close to their flank. Then the oldest of them, who had the most profound learning in their doctrines, came forward and spoke with steadfast look and with steadfast voice, with great powers of reasoning, and great prudence—not making exhibition of his oratorical talent, like the rhetoricians of old or the sophists of the present day, but investigating with great pains and explaining with minute accuracy the precise meaning of the laws, which penetrated through their hearing into the soul, and remained there lastingly. Quietly they listened in silence, showing their assent only by nods of the head or the eager look of the eyes. In this sacred assembly the women also shared; but they had their own seats, being sepa-

rated from the male members by a wall rising three or four cubits upwards, but in such a manner that they could hear the voice of the speaker.

The seventh Sabbath, the πεντηκοστή, was especially distinguished. The number fifty was regarded by them as the most holy and natural of numbers, being compounded of the power of the right-angled triangle, which is the principle of the origination and condition of the whole (ἔστι δὲ προεϊρητιος μεγίστης ἑορτῆς, ἦν πεντηκοντάς ἔλαχεν, ἀγιάματος καὶ φυσικώματος ἀριζμῶν, ἐκ τῆς τοῦ ὁρθογωνίου τριγώνων δυνάμεως, ὅπερ ἰστὶν ἀρχὴ τῆς τῶν ὅλων γενέσεως καὶ συστάσεως). Clothed in white garments, they came together to the common feast. Before they partook of the same, they lifted up their eyes and hands to heaven and prayed to God that it might be acceptable to him. After the prayer, they sat down, the men sitting on the right hand and the women on the left, on rugs of the coarsest material. Before the feast commenced, questions were asked and answered. A passage of the Scripture was explained and religious questions were settled. All listened attentively to the speaker, indicating their attention and comprehension by their nods and looks. When the president appeared to have spoken at sufficient length, and to have carried out his intentions adequately, so that his explanation had gone on felicitously and fluently through his own acuteness, and the hearing of the others had been profitable, applause arose from them all as of men rejoicing at what they had seen and heard; and then some one, rising up, sang a hymn which had been made in honor of God, either such as he had composed himself or some ancient one of some old poet. After him others also arose in their ranks, and in becoming manner, while every one else listened in decent silence, except when it was proper to take up the burden of the song and join in at the end. When each individual had finished his psalm, the young men brought in the table on which was the food—the leavened bread with a seasoning of salt, and mingled with some hyssop, out of reverence for the sacred table which was in the holy outer temple; for on this table were placed loaves and salt without seasoning, and the bread was unleavened, and the salt unmixed with anything else.

After the feast they celebrated the sacred festival during the whole night (μετὰ δὲ τὸ δείπνον τὴν ἑβδὴν ἀγούσιν παννυχίδα). All stood up together, and in the middle of the entertainment two choruses were formed at first, the one of men and the other of women. Each chorus had its leader and chief, who was the most honorable and most excellent of the band. Then they sang the hymns in honor of God in many metres and tunes, at one time all singing together, and at another moving their hands, and dancing in corresponding harmony. When each chorus of the men and each chorus of the women had feasted separately by itself, they joined together, and the two became one chorus—an imitation of that one which, in old time, was established by the Red Sea, on account of the wondrous works which were displayed there before Israel, and where both men and women together became all one chorus, Moses leading the men, and Miriam leading the women. When the sun arose, they raised their hands to heaven, imploring tranquillity and truth and acuteness of understanding. After the prayer, each retired to his own separate abode, again practicing the usual philosophy to which each had been wont to devote himself.

II. *Therapeutæ and Essenes.*—On account of the manifold similar traits which were found among the Therapeutæ and Essenes, it has been inferred that the Therapeutæ were but the Egyptian branch of Palestinian Essenism. This hypothesis is seemingly confirmed by what Philo says at the beginning of his treatise on the Therapeutæ: "Having mentioned the Essenes, who in all respects selected for their admiration and for their especial adoption the practical course of life, and who excel in all, or what, perhaps, may be a less unpopular

and invidious thing to say, in most of its parts, I will now proceed, in the regular order of my subject, to speak of those who have embraced the speculative life, and I will say what appears to me to be desirable to be said on the subject." The majority of critics have therefore not hesitated to believe in a causative connection between the two sects, and have thus, on account of Philo's words, separated the Egyptian Therapeutæ, as the theorists, from the Palestinian Essenes, whom they designated the practitioners. In this assumption, there can only be a diversity of opinion as to which of the two sects justly claims the temporal precedence—whether the theory of the Therapeutæ or the practice of the Essenes is the original, or, in other words, whether Egypt or Palestine is the fatherland of that tendency within Judaism which is designated by the name of Essenism. The opinion that the temporal precedence belongs to the Therapeutæ, and that after Therapeutism had been planted on the soil of Judæa the Order of the Essenes originated, is advocated by Gröfner (*Kritische Geschichte des Urchristenthums* [Stuttg. 1831], ii, 335 sq.), Lutterbeck (*Die neutestamentlichen Lehrbegriffe* [Mayence, 1852], i, 275 sq.), Mangold (*Die Irrlehren der Pastoralbriefe* [Murgburg, 1856], p. 57 sq.), and Holtzmann (*Geschichte des Volkes Israel und die Entstehung des Christenthums* [Leips. 1867], ii, 79 sq.). The opposite opinion is represented by Ritschl (*Theologische Jahrbücher* [ed. Baur and Zeller, 1855], p. 343 sq.), Hilgenfeld (*Die jüdische Apokalyptik in ihrer geschichtlichen Entwicklung* [Jena, 1857], p. 278 sq.), Herzfeld (*Geschichte des Volkes Israel* [2d ed. Leips. 1863], iii, 406), Zeller (*Geschichte der Philosophie der Griechen* [ibid. 1868], III, ii, 288 sq.), Bellermann (*Nachrichten aus dem Alterthum über Essener und Therapeuten* [Berlin, 1821], p. 80, note), and Harnischmacher (*De Essenorum apud Judæos Societate* [Bonn, 1866], p. 26), who admit a causative connection of both, without deciding the time of the origin. Now, denying, as we do, in opposition to the above-mentioned critics, any connection between these sects, and thus dismissing altogether the question which of the two formed the connecting-link for the other, we will, for the sake of justifying our assertion, draw a parallel between the two sects, and first consider those points in which both agree.

Both sects diligently studied the Scripture, and interpreted the same allegorically. Besides the Old Test., both had a high consideration for the writings of the older members of their order. They favored the abolishing of slavery; lived in a very simple manner, and were accustomed to appear at their religious exercises in white garments. More common traits cannot be proved, excepting, perhaps, the fact that both led an unmarried life. But even this is no proof, because, according to Josephus, at least one part of the Essenes, though perhaps only the minority, married. It cannot also be said that both agreed in leading a life entirely separated from the world. Of the Therapeutæ, it is true, this can be said, but not of the Essenes, because, as Josephus tells us, they instructed the youth and took otherwise an active part in the weal and woe of their people, as they did, for instance, in the war against the Romans for the liberty of their country.

But more numerous and important are the differences which exist between the Therapeutæ and Essenes. We call attention to the following:

1. The Therapeutæ led a monastic, secluded life, given entirely to contemplation. The Essenes, according to the rules of their order, were obliged to work. Their labor was prescribed and regulated by officers purposely appointed. They cultivated the fields, and were engaged in manual labors as well as in arts.
2. The Therapeutæ lived separated from each other in cells, and only came together on the Sabbath and on special occasions. The Essenes, however, wherever they resided, had their common lodges, where they lived and dined together.
3. The Therapeutæ, upon entering the order, left everything to their relatives and friends. The Essenes delivered their property to the order for the benefit of all.
4. The Therapeutæ did not eat before the setting of the sun; the Essenes enjoyed two meals daily.

5. The Essenes were divided into four classes or grades, which were so marked that a member of the upper class had to bathe himself when he touched anything belonging to a lower class. The Therapeutæ had no such distinction. Of the Essenes we are told that the members of the higher degrees had the knowledge of mysteries, which was not communicated to the lower degrees; of the Therapeutæ we know nothing of the kind.

6. Each Essene had to bathe himself daily; such lustrations were not in use among the Therapeutæ.

7. The Therapeutæ revered the Temple at Jerusalem and the Levitical priesthood, and were not so far apart from orthodox Judaism. The Essenes, on the contrary, believed their lustrations and their mode of living to be of greater importance than the ordinances prescribed to the priests for the service of the Temple. They furnished no offerings to the Temple at Jerusalem, and thus became guilty of apostatizing from an important part of the Mosaic law. The Essenes were especially addicted to medicine and prophecy; we know nothing of these practices among the Therapeutæ.

It is obvious that the differences between the two sects cannot consist in that the one was given to theory and the other to practice, because the supposition of a like ground-principle is not sufficient for explaining so many, and at the same time very important, differences. After all that we know of both these sects, the supposition of a causal connection between the two must appear very hazardous; for if there really were such a connection between them, and if both were essentially one and the same sect, it is surprising that Josephus has not recorded the fact. As little as we believe with Philo in a real connection between the Jewish Essenes, the seven wise men of Greece, and the Indian Gymnosophists, whom he compares in his book *Quod Omnis Probus Liber*, just as little connection is there between the Essenes and Therapeutæ, because Philo divided them into the theorists and practitioners. The Essenes did not originate from the propagation of Therapeutism in Palestine, because, as we know, Alexandrian religious philosophy did not find a fertile soil in Judea, especially at the time in which both these sects originated. We cannot assume that the reverse should have taken place, otherwise the essential traits of Essenism would have been found again among the Therapeutæ. The stamp of both sects is so different that they cannot be identical; and in treating of the Therapeutæ no regard is therefore to be paid to the Essenes.

III. *Therapeutæ and Christianity.*—Assuming that the Essenes were only consistent Chasidim has led the Jewish historian Grätz to make the assertion that Philo's treatise on the Therapeutæ, according to which they were hitherto regarded as an Egyptian offshoot of Palestinian Essenism, could not be genuine. According to the same writer, it is not so much owing to the description of the Essenes by Josephus as to the book *Περὶ βίου θεωρητικοῦ ἢ ἱερῶν ἀρετῶν* that those not coinciding with the former's views have arrived at a false result regarding the essence and origin of the Essene sect. Grätz also asserts that a Jewish sect of the Therapeutæ never existed, but that they were Christians, ascetics of a heretic tendency, who sprang up by the dozen in the 2d and 3d centuries. The author of the book which has caused so much confusion is not Philo, but a Christian "who probably belonged either to the Encratite-gnostic or Montanistic party, and intended to write a panegyric on monasticism, the high antiquity of which Philo's authority was to confirm." This is the result at which Grätz arrives; and although he takes it for granted that the attentive reader of the book *Περὶ βίου θεωρητικοῦ* must at once adopt the correctness of his assertion, he has nevertheless taken the pains to make good his hypothesis at great length.

This hypothesis of Grätz has been analyzed by Zeller, and the result is that the reasons adduced by the former are not sufficient and acceptable at all. In resuming the question once more, and examining the argument of Grätz in order to establish the Christian character of the Therapeutæ, we do so because of its close connection with the essence and origin of the

sect—in this we differ with Zeller—and because there are some points to be proved against Grätz. The latter has denied the existence of a Jewish sect of the Therapeutæ, and consequently also the genuineness of the Philonic treatise *Περὶ βίου θεωρητικοῦ*, on the ground of the silence of Josephus and Pliny, who wrote so much about the Essenes; while they know nothing of the Therapeutæ, the alleged Egyptian branch of this sect. Against this, Zeller has argued that the silence of Josephus cannot be so remarkable, since the Therapeutæ were a branch of the Essenes restricted to Egypt alone, and because Josephus tells very little about the later affairs of the Jews in that country. But if, according to Zeller, the Therapeutæ were really an Egyptian branch of the Palestinian Essenes, or had some connection with them, the Essenes in Palestine ought to have known something about it; and even if Pliny's silence could be explained because he only knows *one* Essenic colony living by the Dead Sea, it might be supposed—and in this Grätz is correct—that Josephus, who otherwise speaks very fully about the order, ought to have mentioned the Therapeutæ. The silence of Josephus can therefore only be explained from the very fact that the Therapeutæ had no connection whatever with the Essenes, but that they formed an independent sect within the Egyptian Judaism, the existence of which—since its number and activity were less important—was entirely unknown to Josephus. What Philo narrates concerning the female Therapeutæ (*θεραπευτρίδες*), Grätz also finds incredible, because Josephus marks it as one of the characteristics of the Essenes to avoid all contact with the opposite sex; hence he believes that these female Therapeutæ were nothing else than the sisters (*sorores subintroductæ*) whom the Christian ascetics used to have about them for the sake of attaining, by constant temptation, a higher virtue, but who, as is known, have been the cause of great scandals. Against this, Zeller remarks that in this respect the Egyptian Essenes or Therapeutæ might have had other institutions than those of the Palestinians, since their principles on the worth of an unmarried state were in the main not affected; and this difference of view does not indicate such a great deviation from the principles of the order as the practice of one branch of the Palestinian Essenes who married. We agree with Grätz that, according to Josephus, the wives of the married Essenes were not, like the female Therapeutæ, members of the order. But this actual deviation—that while the Essenes excluded women entirely from the common feasts and meetings, this was not the case among the Therapeutæ—is only another proof that Essenes and Therapeutæ are not, as Zeller believes, one and the same sect. This being the case, it must not be supposed, as Grätz believes, that the Therapeutæ, not being Essenes, were *Christians*. Grätz overlooks the circumstance that while the so-called *sorores subintroductæ* lived in very close communication with the Christian ascetics, this cannot be said of the female Therapeutæ. For can we safely infer, from the participation of women in the common feasts and meetings, that the Therapeutæ really lived each with a female companion? Against such a hypothesis we have also the words of Philo, *τὰς μὲν οὖν ἐξ ἡμέρας χωρὶς ἕκαστοι μονοῦμενοι παρ' ἑαυτοῖς ἐν τοῖς λεχθέσιν, μοναστηρίους φιλοσοφῶσι*, who emphasizes the fact repeatedly that they sought solitude and desired to be left to themselves in order not to be disturbed in their contemplative life (*ὀχλήρην γὰρ καὶ δυσάρεστον τοῖς ἱερμίαν ἐξηλωκότα καὶ μετὰ δῶκουσιν αἱ γυναικίσαι*). But, above all, we ask, where is the passage in this treatise which indicates, as Grätz tries to prove, that the Therapeutæ, like the Christian ascetics, had aimed at a higher degree of perfection by living together with the female members? From the introductory words of the Philonic treatise, Grätz also infers that it cannot be genuine, since it connects itself with the treatise *Περὶ τοῦ πάντα σπονδαῖον εἶναι ἐλεύθερον* erroneously, as with a writing on the Es-

senes. The words in question are, Ἑσάων περί διαλεχθεῖς, οἱ τὸν πρακτικὸν ἐξήλωσαν καὶ διεπύνησαν βίον ἐν ἁπασιν, κ.τ.λ. Grätz thinks that Philo could not possibly say that he "wrote a treatise" on the Essenes (Ἑσάων περί διαλεχθεῖς), when the passage in question only occupies the twelfth part of the treatise, and he only mentions this sect as one of the many. But against this it must be argued that διαλεχθεῖς περί τινος does not mean "to write a treatise," but to "speak on something," and this, as Zeller remarks, Philo has evidently done concerning the Essenes. Moreover, such an association of topics is not comical at all, as Grätz thinks, because by this two Jewish sects which have at least some traits in common were brought into connection. But the main point for the spuriousness of the treatise on the Therapeutæ and for its being written by a Christian, Grätz thinks to lie in the fact that Christians—so Eusebius (*Hist. Eccles.* ii, 17) and others after him—recognised the Therapeutæ as "flesh of their own flesh." The holy cells of the Therapeutæ are called monasteries. It is evident, argues Grätz, that we have here the beginning of the monastic cells, which existed even before Anthony of Thebes, the founder of monasticism. But even if we admit that the entire mode of living of the Therapeutæ is similar to that of the later Christian monks, we are not at all justified to infer that the Therapeutæ were *Christian monks*. Why—and herein we agree with Grätz—should there not have been in Egypt, the fatherland and the proper home of monasticism, ascetics even before Anthony of Thebes? And why should this not have been possible within the pale of Judaism? And are the Palestinian Essenes not a similar phenomenon? To impress on the Therapeutæ the Christian character because of the word μοναστήριον, which the Christian monks used for their cell, is not reasonable, because, as Zeller reminds us, the expressions μοναστήριον and σεμνεῖον were only used by the Therapeutæ for a part, and not, as did the Christian monks, for the whole, of the dwelling. The supposition seems to be that the Therapeutæ, or rather Philo himself, formed the words μοναστήριον and σεμνεῖον, and that Christian monks borrowed this nomenclature from their Jewish predecessors. That Philo, who was the first to use these expressions, has also formed the same appears from the fact that he himself explains them when saying, ἐν ἐκάστῳ δὲ οἰκίᾳ ἱερὸν ὃ καλεῖται σεμνεῖον καὶ μοναστήριον, ἐν ᾧ μονοῦμενοι τὰ τοῦ σεμνοῦ βίου μυστήρια τελοῦνται. The Therapeutæ, Grätz goes on to argue, had not only a common feast, but after the feast they had a kind of Lord's supper (παναγίστατον σιτίον), consisting of unleavened bread, of which all did not partake, but only the better ones. Grätz evidently believes that we have here the difference between the *missa catechumenorum* and the *missa fidelium*. From the latter, which consisted in the celebration of the Lord's supper and in a kind of liturgy, those who were not yet baptized, together with those who were excommunicated, were excluded; for, he asks, is this not Christian? But this question we must also answer in the negative. Grätz, as Zeller remarks, has overlooked the fact that the so-called Lord's supper did not take place after the common meal, but it was this common meal itself. At this supper not unleavened, but leavened, bread was eaten (ἄρτος ἐζυμωμένος μετὰ προσοφίματος, ὧν οἱ ὕσσωπος ἀναμείκται δι' αἰῶς τῆς ἀνακειμένης ἐν τῷ ἁγίῳ προνάφῃ ἱερᾷ τραπέζῃς) out of reverence for the unleavened showbread in the Temple at Jerusalem. But, above all, Grätz has erred in asserting that this supper was a prerogative of the better ones. Now the words ἵνα ἔχῃσι προνομίαν οἱ κρείττονες do not refer to the Therapeutæ, but to the Jewish priests, to whom alone the Therapeutæ conceded the use of unleavened bread as a special prerogative. This unquestionably follows from the words of Philo: ὅταν δὲ ἐκαστος διαπεράνῃ τὸν ὕμνον, οἱ νεοὶ τὴν πρὸ μικροῦ λεγέεισαν τράπεζαν εἰσκομίζουσιν, ἐφ' ἧς

τὸ παναγίστατον σιτίον ἐζυμωμένους μετὰ προσοφίματος ὧν οἱ ὕσσωπος ἀναμείκται δι' αἰῶς τῆς ἀνακειμένης ἐν τῷ ἁγίῳ προνάφῃ ἱερᾷ τραπέζῃς· ἐπὶ γὰρ ταύτης εἰσὶν ἄρτοι καὶ ἄλλες ἀνεν ἡδύσματος, ἀνυμοὶ μὲν οἱ ἄρτοι, ἄμυγες δὲ καὶ οἱ ἄλλες. Προσῆκον γὰρ ἦν, τὰ μὲν ἀπλούστατα καὶ εἰλικρινέστατα τῇ κρατίστῃ τῶν ἱερῶν ἀπονεμηθῆναι μερίδι, λειτουργίας αἰδλον, τοὺς δὲ ἄλλους τὰ μὲν ὅμοια ζηλοῦν, ἀτεχεσθαι δὲ τῶν ἁρτων, ἵνα ἔχῃσι προνομίαν οἱ κρείττονες. That the Therapeutæ were Christians, Grätz also finds in the fact that the presbyters among them occupied the first position; and that they were not presbyters because of their age, but because of their strict observance of the Therapeutic life (πρεσβυτέρους γὰρ οὐ πολυτετεῖς καὶ παλαίους νομίζουσιν ἀλλὰ ἐτι κομῶντες νύκτας εἰς τὴν προαίρεσιν ἱερᾶς ζωῆς, ἀλλὰ τοὺς ἐκ πρώτης ἡλικίας ἐνηβήσαντας καὶ ἐνακμάσαντας τῷ θεωρητικῷ μέρει φιλοσοφίας, ὃ δὲ κάλλιστον καὶ ζωοτάτον ἐστίν). We have thus, Grätz argues, the presbyters, or ἐπισκοποι, of the Christian congregations, who held one and the same office in the ante-Nicene time. But this conclusion is the less justifiable, since the office of presbyters was not exactly a Christian institution, but existed even before the Christian æra, and was adopted by the Church from Judaism. Even among the Essenes we find such a distinction of rank, and yet Grätz would be the last to call them Christians, although he firmly believes that Christ belonged to the Essenes. The argument which Grätz takes from the vigils, so common among the Therapeutæ, for the sake of making them Christians is also of no avail, because fasting was something peculiar to Judaism and was adopted by the Church; and as to the vigils, such nocturnal services existed before the Christian æra. It is therefore not necessary to think, as does Grätz, following Eusebius (*Hist. Eccles.* ii, 17), of Christian rites before Easter Sunday. From the liturgy, the metrical hymns, and typical mode of explaining the prophets, according to Grätz, other arguments for the Christian character of the Therapeutæ might be made. But even these alleged Christian traits are purely Jewish. Of the hymns of the Therapeutæ, Philo expressly states that they were formed after the hymn of Moses and Miriam (Exod. xv); and as to the allegorical interpretation, it was used among the Alexandrian Jews before the Christian æra, and even before Philo. But as to what Grätz understands of the liturgy of the Therapeutæ and of its Christian character, he has not fully entered upon this point, nor can anything of the kind be deduced from Philo's statement. Grätz refers to Eusebius, and to those after him who regarded the Therapeutæ as Christians, but this proof is the least satisfactory. Eusebius regards the treatise *Περὶ βίου θεωρητικοῦ* as Philonian, and makes the Jewish philosopher a disciple of John Mark, who accompanied Paul on his first missionary tour, and afterwards labored at Alexandria. According to Eusebius, the Therapeutæ existed as Christians in the 1st century. The opinion of Grätz that the Therapeutæ were a Christian monastic sect of the 2d or 3d century of the Christian æra has therefore no support in Eusebius. While, however, later Christian writers, with the exception of Photius (*Myriobiblon sive Bibliotheca* [Rothomagi, 1653], ed. Dav. Halschelus, p. 275), identify Therapeutæ with monks, and while the writings falsely ascribed to Dionysius Areopagita use both expressions synonymously, Scaliger has called attention to the fact that the designation of Therapeutæ for monks depends solely upon the interpretation of Eusebius (Scaliger, *De Emendatione Temporum*, vi, 252). With the exception of Grätz, no writer has regarded the Therapeutæ as a Christian heretical sect, and he himself is yet undecided in what series of heretical sects, which sprang up by the dozen within the Church in the 2d and 3d centuries, he should place them. According to Grätz, the author of the treatise probably belonged to the En-

cratico-gnostic or Montanistic party. But he has not tried to state any plausible reason for his hypothesis, which, in fact, would be impossible; and he himself says that this point is outside of his object, and must be left to those critics who make this question their specialty. We ask, however, what reason could there have been for a Christian, even for a heretic, to father upon Philo such a book, for the sake of recommending monastic asceticism? We nowhere hear, except from Eusebius, whose erroneous view concerning the Therapeutæ led him to the opinion, that Philo had such a good reputation within the Christian Church, and that Christians appealed to him for their views. And what is the more remarkable is the fact that in the whole treatise neither Christ nor the doctrines of Christianity are once mentioned. Where, then, is the Christian character of the Therapeutæ? As for the linguistic character of the book *Περὶ βίου θεωρητικοῦ*, it entirely agrees with Philo's mode of representation; and there is no internal nor external argument for denying Philo to be the author of the book. The Therapeutæ, as we shall see further on, were Jews.

IV. *Character and Origin of the Sect of the Therapeutæ.*—From the manner in which Philo speaks of the Therapeutæ, there can be no doubt that he himself was very much prepossessed regarding them, for the book *Περὶ βίου θεωρητικοῦ* is nothing but a panegyric on the sect. This fact alone would lead to the supposition—which, in truth, is also supported by the whole character of the sect—that the Therapeutæ cultivated and adhered to Jewish religious philosophy, which numbered Philo among its most zealous disciples. It is hardly conceivable, as Gfrörer (*Philo und die jüdisch-alexandrinische Theosophie*, ii, 281 sq.) has indicated, that in a time like that in which Philo wrote, when the religious movement was at a high pitch, and when the most diverse religious parties existed side by side, a man with such peculiar religious views should write such a panegyric on a sect unless it represented his own views.

Now there can be no doubt that the Therapeutæ represented a Jewish sect. They based their investigations and researches upon the writings of the Old Test. In their *συνέμνητα* they had only the law and the prophets (*νόμοι καὶ λόγια θεοσιζήντα διὰ προφητῶν*). Philo calls them *Μωσῆως γυνώριμοι*, and further says that they gave themselves to philosophical speculation, according to the holy doctrines of the prophet Moses (*κατὰ τὰς τοῦ προφήτου Μωσῆως ἐρωτάρας ὑψηλοῦς*). The Therapeutæ strictly observed the Jewish Sabbath, and had great reverence for the Temple at Jerusalem and the Levitical priesthood. Their holy choruses are expressly said to be an imitation of those at the Red Sea. All these traits show that, on the one hand, the Therapeutæ strictly adhered to the traditions and views of Judaism, while, on the other hand, they deviated in many particulars; hence they were characterized as a sect.

As to their name, Philo leaves us to choose between two views. They are called Therapeutæ either because they profess an art of medicine more excellent than that in general use in cities (thus Therapeutæ would be equivalent to "physicians for the soul"), or because they have been instructed by nature and the sacred laws to serve the living God (*θεραπεύειν τὸ ὄν*); thus Therapeutæ would signify those who "serve God." The latter view is probably the more correct, since the Therapeutæ, as the true spiritual "worshippers of God," called themselves the contemplatives *κατ' ἐξοχὴν*, and this appellation accords more fully with the whole tenor and character of the sect than the designation "physicians for the soul." Besides, Philo uses *ἰκέται* and *θεραπευταί*, *γένος θεραπευτικόν*, and *γένος ἱκετικόν* synonymously, in order to designate the worship of God in the sense of Alexandrian theosophy, in opposition to the faith and worship of God of the great mass. (*De Victimis offerentibus* [Mangey], ii, 258:

*ἰκέται καὶ θεραπευταί τοῦ ὄντως ὄντος. De Monarchia*, ii, 425: *ἀνδρὸς ἰκέτου καὶ φιλοθεῖον θεὸν μόνον θεραπεύειν ἀξιούντος. Vita Mosi*, ii, 164: *τὸ θεραπευτικὸν αὐτοῦ [sc. τοῦ θεοῦ] γένος. De Profugis*, i, 552: *τὸ γὰρ θεραπευτικὸν γένος ἀνάδημά ἐστι θεοῦ ἱερωμένον τὴν μεγάλην ἀρχιερωσύνην αὐτῷ μόνῳ.*)

From the Greek derivation of Therapeutæ, we see that there existed a spiritual relationship between this sect and Jewish Alexandrian religious philosophy; and we are led to this assumption when we consider the object which formed the basis of their contemplative life. Its purpose was to lead to the knowledge of the Deity. To achieve this it was necessary to suppress the material man and elevate the spiritual. For this reason they lived in a very simple manner, restricting their wants to the smallest measure. Abstinence and moderation they regarded as the foundation of all virtues, because by these man is brought nearer to the simple, which enables him to see the simple essence of the Deity, and to indulge in the blessed intuition of the same. Therefore the Therapeutæ lived secluded from the outside world; they denied themselves everything that could bring them in contact with others, thus living only to themselves and their contemplation. They denied themselves marriage, because they preferred to live together with the divine wisdom; and sought not after the mortal, but the immortal, fruits of a soul loved by God, and which the same only brings forth when she is impregnated by the spiritual rays of the heavenly Father. For this reason slavery was banished from their midst, because, in a community which was animated by such motives, men could not be tolerated who were degraded below the dignity of men. If the entire aim of the Therapeutæ accords with the object and time of the Alexandrian religious philosophy, the relationship between the two shows itself more fully in the allegorical exegesis, which, distinguishing between spirit and letter, idea and symbol, endeavored to explain the writings of the Old Test. According to Philo, the Therapeutæ had the writings of the ancients, who, as the founders of this tendency, left behind them many memorials of the allegorical system. The same symbolic character we also find in their holy feast. The historical relation with which it connected itself was the exodus from Egypt and the going through the Red Sea, as the choruses sung at this feast were in imitation of those songs which Moses and Miriam sang. Now, according to the allegory of the Alexandrians and Philo, Egypt is the symbol of the sensual life in earthly lust and bodily pleasure; the song of Moses symbolizes the rapture which man feels after he has denied himself every earthly thing and suppressed all sensual lust, and now, as a purely spiritual being, indulges in the intuition of the Deity. Thus the Therapeutæ, like Philo and the Alexandrians, held the view that, the body being the seat of sin, the flight from a corporeal into a purely spiritual existence ought to be the true and highest aim of life. And Philo himself expressly states that the Therapeutæ went into the desert, because they had entirely broken with their earthly life, and intended to lead another, as it were immortal and blessed existence. The Therapeutæ thus represent a sect which earnestly strove after carrying out and practicing those principles and views to which the Jewish Alexandrian religious philosophy did homage. At what time, however, this sect, with its ceremonies, originated it is hard to tell, since Philo does not say anything more definite about it. The only indication in the *Περὶ βίου θεωρητικοῦ* from which we may conclude that the sect existed a long time before Philo, is the notice that the Therapeutæ possessed writings of the ancients which the founders had left behind them as memorials of the allegorical system, and which the Therapeutæ took as a kind of model. The founding of the sect probably took place at the time when the Jewish Alexandrian theosophy originated and developed itself. We may trace it back to the beginning

of the 2d century before Christ, to Aristobulus, who introduced Jewish doctrines into the Orphic hymns because he believed that Greek philosophers had derived their wisdom from an ancient version of the Pentateuch. Whether we have any traces of a connection of Greek philosophy with Jewish theology in the Septuagint, which, according to Josephus, was commenced in B.C. 285, is at least very doubtful; but certain it is that with the beginning of the 2d pre-Christian century the conditions were already given for the origin of the sect. That the sect of the Therapeutæ was propagated beyond Egypt is not probable, and its number was, perhaps, not very large.

After all, it is very interesting to know that about the time when Christ came into the world, among the Jews in Egypt the desire was felt to come into a nearer relation to the Deity, and to be freed from those relations which were not satisfactory. The Therapeutæ endeavored to reach this object by leaving all earthly possessions, and in this respect they resemble the Christian monks, who borrowed from them many traits, as, in fact, Egypt was the real country of monasticism. But when Christians regarded them for a long time as flesh of their own flesh, they misunderstood the character and tendency of the Therapeutæ entirely, because their whole history shows how far they were still from that goal which alone could satisfy the cravings of the heart, but which human reason and power alone cannot reach.

V. Literature.—Grüner, *Philo und die jüdisch-alexandrinische Theosophie* (Stuttg. 1835); Dähne, *Geschichtliche Darstellung der jüdisch-alexandrinischen Religions-Philosophie* (Halle, 1884); Kuenen, *De Godsdiens van Israel* (Haarlem, 1870), ii, 382 sq. (Engl. transl. by May, *The Religion of Israel* [Lond. 1874 sq.]); Ritschl, *Die Entstehung der altkatholischen Kirche* (Bonn, 1857), p. 216; Herzfeld, *Geschichte des Volkes Israel* (Leips. 1863), iii, 496; Delaunay, *Écrits Historiques de Philon* (Par. 1870), p. 55; id. *Moines et Sibylles* (ibid. 1874), p. 385; Baur, *Drei Abhandlungen zur Geschichte der alten Philosophie* (Leips. 1876), p. 216; Schwegler, *Das nachapostolische Zeitalter* (Tüb. 1846), i, 190; Lutterbeck, *Die neutestamentlichen Lehrbegriffe* (Mentz, 1852), i, 131, 271; Wegner, *Ueber das Verhältnis des Christenthums zum Essenismus*, in *Illgen's Zeitsch. f. d. hist. Theol.* 1841, xi, 2, 1 sq.; Leroux, *Encyclopédie Nouvelle* (Par. 1843), iv, 656 sq.; Bauer, *Christus und die Cäsaren* (Berl. 1879), p. 307 sq.; Grätz, *Geschichte der Juden*, 2d ed. iii, 464 sq.; Jost, *Gesch. des Judenthums*, i, 224; Nicolas, *Revue de Théologie* (Strasb. 1868), p. 36 sq.; Dérenbourg, *Journal Asiatique* (Par. 1868), p. 282 sq.; Renan, *Journal des Savants* (ibid. 1874), p. 798 sq.; Clemens, *Die Therapeuten* (Königsb. 1869); Lucius, *Die Therapeuten und ihre Stellung in der Geschichte der Askese. Eine kritische Untersuchung der Schrift de Vita Contemplativa* (Strasb. 1880). The last writer comes to the conclusion that the Therapeutæ were not Jews, and that the treatise bearing the name of Philo was written towards the end of the 3d century as an apology for Christian asceticism. (B. P.)

**Thér'as** (Θέρ'α), a corrupt Greek form (1 Esdr. viii, 41, 61) of the name Hebraized (Esra viii, 21, 31) AHANA (q. v.).

**Theremin**, LUDWIG FRIEDRICH FRANZ, a celebrated German preacher and professor, was born at Gramzow, March 19, 1780. He was of Huguenot extraction, his family having emigrated from France after the Revocation of the Edict of Nantes, and his father was the pastor of the French congregation in the town where Franz was born. After suitable preparation, the latter was ordained at Geneva in 1805, and in 1810 was chosen by the French congregation at Berlin to be its pastor. This post he exchanged, Dec. 29, 1814, for that of preacher to the court. In 1824 he was made a member of the high consistory and lecturer in the department of instruction of the ministry of worship; and in the same

year the degree of Doctor of Divinity was conferred on him by the University of Greifswalde. In 1839 he added to his former dignities that of extraordinary, and in 1840 that of ordinary, honorary, professor in the University of Berlin. He lectured on homiletics, and established a homiletical seminary in his house, devoting himself to the guidance of the latter with an enthusiasm which increased steadily, in proportion as physical infirmities restricted the range of his activity as a preacher. A cataract formed over one of his eyes, and gave rise to the apprehension that he would become totally blind; but he was relieved from such fear by death, which came to him quietly and gently Sept. 26, 1846. His wife had preceded him into the eternal world by more than twenty years. A son and an unmarried daughter survived him.

Theremin was the representative of a specific homiletical tendency which held that classical antiquity is the true school of eloquence and claimed Demosthenes as its master. Its characteristic was that it devoted exclusive attention to finished perfection of form, and consequently had nothing in common with that rugged German school of eloquence of which Luther is the representative, and whose peculiarity it is that "out of the fulness of the heart the mouth speaketh" and shapes its own forms of expression. Not Luther or Harms, but Massillon, was Theremin's ideal; for Theremin's mind was in its structure not German, but French. This peculiarity may partially explain the fact that Theremin did not found a school of pulpit orators in any actual sense; while Reinhard, to whom he was unquestionably superior, had numerous imitators. Theremin's fundamental principle in homiletics was that eloquence is not an art, but a virtue (see his work *Beredsamkeit eine Tugend*). The idea is evidently faulty, since eloquence is not, like other virtues, a duty; nor is the use of eloquence confined altogether to the promotion of ethical results. As a preacher he was accustomed to use brief texts, and consequently to employ considerable latitude in the handling of his themes, often dragging in extraneous matter, instead of educating it from the text. His bearing in the pulpit was that of quiet dignity; his gestures were few and simple, his voice good, his modulation perfect. The finish of his productions, however, produced the impression of an aristocratic refinement, which, though evidently altogether natural in his case, prevented the achieving of such popular results as were secured by Luther, Heinrich Müller, Conrad Rieger, L. Hofacker, and others. Ten volumes of his *Sermons* have been published, most of them in repeated editions (Duncker and Humblot, Berlin). Other works of theological and ascetical character emanated from his pen, and have received deserved recognition, e. g. *Lehre vom göttl. Reiche* (Berlin, 1828):—*A dalbert's Bekenntnisse* (2d ed. 1835):—*Abendstunden* (6th ed. 1858). See Herzog, *Real-Encyklop.* s. v.

**Theresa**, or **Teresa**, St., was born at Avila, in Castile, Spain, March 28, 1515. Her full name was *Theresa Sanchez de Cepeda*. From early childhood she was accustomed, with a favorite brother, to read the lives of the saints and martyrs, until they both became possessed of a passionate desire to obtain the crown of martyrdom. When they were children eight or nine years old, they set off on a begging expedition into the country of the Moors, in hopes of being taken by the infidels and sacrificed for their faith. Disappointed in this, they resolved to turn hermits; but in this they were also prevented. Theresa lost her mother at the age of twelve, and in a few years became so worldly that her father placed her, at the age of sixteen, in a convent. Here her mind again took a religious turn, and when twenty years of age she obtained her father's consent to take the vow, and entered the convent of the Carmelites at Avila. For nearly twenty years, however, she says, she lived without feeling that repose for which she had hoped when she sacrificed the world. But at length while reading the *Confessions* of St. Augustine,

St. Theresa.

she was led to pray with greater confidence, and her enthusiastic and restless spirit found peace. She remained in the convent in her native town till 1561, when she conceived the idea of reforming the Order of the Carmelites, into which several disorders had crept. In 1562 she laid the foundation of the new monastery at Avila, which she dedicated to St. Joseph, whom she had chosen as her patron saint. The branch of her order which she founded were the "Barefooted Carmelites," and also, after her, the **THERESIANS** (q. v.). It was the principle of Theresa that the convents of the Carmelites, under her new rule, should either have no worldly possessions whatever, and literally exist upon the charity of others, or that they should be so endowed as not to require any external aid. This was a principle from which her spiritual directors obliged her to depart; and yet such was her success that at the time of her death she had founded seventeen convents for women and fifteen for men. During the latter part of her life Theresa found ample occupation in travelling from one convent to another to promulgate her new regulations for the government of her order. In 1582 she was seized with her last illness in the palace of the duchess of Alva, but was, by her urgent request, carried back to her convent of San José, where she died a few days afterwards. She was beatified by pope Paul V, April 24, 1614, and canonized by Gregory XV, March 22, 1622, her feast being fixed on October 15. Philip III declared her the second patron saint of the Spanish monarchy after Santiago, a decree solemnly confirmed by the Spanish Cortes in 1812. Her shrine is at Avila, in the church of her convent. The ascetic treatises and letters of Theresa, in which she describes the internal struggles and aspirations of her heart, are among the most remarkable documents of the mystic literature of the Roman Catholic Church. Five of them are extant: *Discurso ó Relacion de su Vida* (1562):—*El Camino de la Perfeccion*, prepared in 1563 as a guide for the nuns of the reformed order:—*El Libro de las Fundaciones*, an account of convents founded by her:—*El Castillo Interior, ó las Moradas* (1577):—*Santos Conceptos del Amor de Dios*. The original MSS. of the first four works are preserved in the library of the Escorial, that of the last was burned by order of her confessor; but a copy had previously been taken by one of her nuns. The first complete edition of St. Theresa's *Works* appeared at Salamanca (1587), and a recent one by Ochoa at Paris (1847):—*Letters* (Sargossa, 1658). The abbé Migne edited a complete collection of her works in French (Paris, 1840-46, 4 vols.); and père Marcel Bouix published a French translation

from the original MSS. (Le Mans, 1852-56, 3 vols. 8vo). For *Lives* of Theresa consult those of Ribera (Salamanca, 1590), père Bouix (Paris, 1865), Bollandist Vandermoere (Brussels, 1845), and Maria French (Lond. 1875). See Mrs. Jameson, *Legends of the Monastic Orders*, p. 415 sq.

**Ther'meleth** (Θερμελίς), a Greek form (1 Esdr. v, 36) of the name Hebraized (Ezra ii, 59) **TRĒ-MELAH** (q. v.).

**Thesaurarius**, the treasurer of a cathedral or collegiate church; the bursar (treasurer) of a college or monastery; the keeper of a shrine house or treasury.

**Thessalo'nian** (Θεσσαλονικεύς), the designation (Acts xxvi, 4; 1 Thess. i, 1; 2 Thess. ii, 1; "of Thessalonica," Acts xxvii, 2) of an inhabitant of Thessalonica (q. v.).

**THESSALONIANS, FIRST EPISTLE TO THE**, is the eighth in order of the Pauline epistles as found in the New Test., but the first in point of chronological date, and immediately followed by the second bearing a corresponding title.

**I. Authorship and Canonicity.**—The *external* evidence in favor of the genuineness of the First Epistle to the Thessalonians is chiefly negative, but this is important enough. There is no trace that it was ever disputed at any age or in any section of the Church, or even by any individual, till the present century. On the other hand, the allusions to it in writers before the close of the 2d century are confessedly faint and uncertain—a circumstance easily explained when we remember the character of the epistle itself, its comparatively simple diction, its silence on the most important doctrinal questions, and, generally speaking, the absence of any salient points to arrest the attention and provoke reference. In Clement of Rome there are some slight coincidences of language, perhaps not purely accidental (c. 38, *κατὰ πάντα εὐχαριστῶν αὐτῷ*, comp. 1 Thess. v, 18; *ibid.* *σωζέσθω οὖν ἡμῖν ὅλον τὸ σῶμα ἐν Χ. Ι.*, comp. ver. 23). Ignatius in two passages (*Polyc.* 1, and *Ephes.* 10) seems to be reminded of Paul's expression *ἀδιαλείπτως προσεύχεσθε* (1 Thess. v, 17), but in both passages of Ignatius the word *ἀδιαλείπτως*, in which the similarity mainly consists, is absent in the Syriac, and is therefore probably spurious. The supposed references in Polycarp (ch. iv to 1 Thess. v, 17, and ch. ii to ver. 22) are also unsatisfactory. It is more important to observe that the epistle was included in the Old Latin and Syriac versions, that it is found in the canon of the Muratorian fragment, and that it was also contained in that of Marcion and of the Council of Laodicea in 364. With Irenæus commence direct citations (*Adv. Hæres.* v, 6, 1): "On account of this the apostle hath set forth the perfect spiritual man, saying in 1 Thess., 'But the God of peace sanctify you wholly, and may your whole body, soul, and spirit be preserved blameless to the coming of our Lord Jesus Christ' " (comp. 1 Thess. v, 23). Clemens Alex. (*Pædag.* i, 88): "But this the blessed Paul hath most clearly signified, saying, 'When we might be burdensome as the apostles of Christ, we were gentle among you, as a nurse cherisheth her children' " (comp. 1 Thess. ii, 7). Tertullian (*De Resurrect. Carnis*, c. 24): "What these times were, learn along with the Thessalonians; for we read, 'How ye were turned from idols to serve the living and true God, and to wait for his Son from heaven, Jesus, whom he hath raised from the dead' " (comp. 1 Thess. i, 9, 10). This father quotes the epistle more than twenty times. To these citations we may add those by Caius (ap. Euseb. *Hist. Eccles.* vi, 20), by Origen (*Cont. Cels.* lib. iii), and by others of the ecclesiastical writers (Lardner, ii, *pl. locc.*).

On the other hand, the *internal* evidence derived from the character of the epistle itself is so strong that it may fairly be called irresistible. It would be impossible to enter into the question of *style* here, but the reader may be referred to the Introduction of Jowett, who has handled this subject very fully and satisfactorily.

An equally strong argument may be drawn also from the *matter* contained in the epistle. Two instances of this must suffice. In the first place, the fineness and delicacy of touch with which the apostle's relations towards his Thessalonian converts are drawn—his yearning to see them, his anxiety in the absence of Timothy, and his heart-felt rejoicing at the good news—are quite beyond the reach of the clumsy forgeries of the early Church. In the second place, the writer uses language which, however it may be explained, is certainly colored by the anticipation of the speedy advent of the Lord—language natural enough on the apostle's own lips, but quite inconceivable in a forgery written after his death, when time had disappointed these anticipations, and when the revival or mention of them would serve no purpose and might seem to discredit the apostle. Such a position would be an anachronism in a writer of the 2d century.

The genuineness of this epistle was first questioned by Schrader (*Apostel Paulus*), who was followed by Baur (*Paulus*, p. 480). The latter writer has elaborated and systematized the attack. The arguments which he alleges in favor of his view are briefly controverted by Lünemann, and more at length, and with great fairness, by Jowett. The following is a summary of Baur's arguments. (a.) He attributes great weight to the general character of the epistle, the difference of style, and especially the absence of distinctive Pauline doctrines—a peculiarity which will be remarked upon and explained below (§ iii). (b.) In the mention of the "wrath" overtaking the Jewish people (ii, 16), Baur sees an allusion to the destruction of Jerusalem, and therefore a proof of the later date of the epistle. The real significance of these words will be considered below in discussing the Apocalyptic passage in the second epistle. (c.) He urges the contradictions to the account in the Acts—a strange argument, surely, to be brought forward by Baur, who postdates and discredits the authority of that narrative. The real extent and bearing of these divergences will be considered below (§ iv). (d.) He discovers references to the Acts, which show that the epistle was written later. It will be seen, however, that the coincidences are subtle and incidental, and the points of divergence and *prima-facie* contradictions, which Baur himself allows, and indeed insists upon, are so numerous as to preclude the supposition of copying. Schleiermacher (*Einfleit. ins N. T.* p. 150) rightly infers the independence of the epistle on these grounds. (e.) He supposes passages in this epistle to have been borrowed from the acknowledged letters of Paul. The resemblances, however, which he points out are not greater than, or, indeed, so great as, those in other epistles, and bear no traces of imitation.

II. *Date*.—This has been approximately determined in the following way: During the course of his second missionary journey, which began in the year 47, Paul founded the Church of Thessalonica. Leaving Thessalonica, he passed on to Berea. From Berea he went to Athens, and from Athens to Corinth (Acts xvii, 1–xviii, 18). With this visit to Corinth, which extends over a period of two years or thereabouts, his second missionary journey closed, for from Corinth he returned to Jerusalem, paying only a brief visit to Ephesus on the way (ver. 20, 21). There is some uncertainty about the movements of Paul's companions at this time (see below); but, whatever view we adopt on this point, it seems indisputable that, when this epistle was written, Silvanus and Timothy were in the apostle's company (1 Thess. i, 1; comp. 2 Thess. i, 1)—a circumstance which confines the date to the second missionary journey, for, though Timothy was with him on several occasions afterwards, the name of Silvanus appears for the last time in connection with Paul during this visit to Corinth (Acts xviii, 5; 2 Cor. i, 19). The epistle, then, must have been written in the interval between Paul's leaving Thessalonica and the close of his residence at Cor-

inth, i. e. within the years 48–51. The following considerations, however, narrow the limits of the possible date still more closely. (1.) When Paul wrote, he had already visited, and probably left, Athens (1 Thess. iii, 1). (2.) Having made two unsuccessful attempts to revisit Thessalonica, he had despatched Timothy to obtain tidings of his converts there. Timothy had returned before the apostle wrote (ver. 2, 6). (3.) Paul speaks of the Thessalonians as "ensamples to all that believe in Macedonia and Achaia," adding that "in every place their faith to God-ward was spread abroad" (i, 7, 8)—language prompted, indeed, by the overflowing of a grateful heart, and therefore not to be rigorously pressed, but still implying some lapse of time at least. (4.) There are several traces of a growth and progress in the condition and circumstances of the Thessalonian Church. Perhaps the mention of "rulers" in the Church (v, 12) ought not to be adduced as proving this, since some organization would be necessary from the very beginning. But there is other evidence besides. Questions had arisen relating to the state of those who had fallen asleep in Christ, so that one or more of the Thessalonian converts must have died in the interval (iv, 13–18). The storm of persecution which the apostle had discerned gathering on the horizon had already burst upon the Christians of Thessalonica (iii, 4, 7). Irregularities had crept in and sullied the infant purity of the Church (iv, 4; v, 14). The lapse of a few months, however, would account for these changes, and a much longer time cannot well be allowed. For (5) the letter was evidently written by Paul immediately on the return of Timothy, in the fulness of his gratitude for the joyful tidings (iii, 6). Moreover (6), the second epistle also was written before he left Corinth, and there must have been a sufficient interval between the two to allow of the growth of fresh difficulties, and of such communication between the apostle and his converts as the case supposes. We shall not be far wrong, therefore, in placing the writing of this epistle early in Paul's residence at Corinth, a few months after he had founded the Church at Thessalonica, i. e. during the year 49.

The statement in the subscription appearing in several MSS. and versions that it was written "from Athens" is a superficial inference from 1 Thess. iii, 1, to which no weight should be attached, as is clear from the epistle itself. (1.) In i, 7, 8 Paul says that the Thessalonians had become "ensamples to all that believe in Macedonia and Achaia: for from you [says he] sounded out the word of the Lord not only in Macedonia and Achaia, but also in every place your faith to God-ward is spread abroad." Now, for such an extensive diffusion of the fame of the Thessalonian Christians and of the Gospel by them, a much longer period of time must have elapsed than is allowed by the supposition that Paul wrote this epistle while at Athens; and, besides, his reference particularly to Achaia seems prompted by the circumstance of his being, at the time he wrote, in Achaia, of which Corinth was the chief city. (2.) His language in iii, 1, 2 favors the opinion that it was not from Athens, but after he had left Athens, that he wrote this epistle; it is hardly the turn which one living at Athens at the time would have given his words. (3.) Is it likely that during the short time Paul was in Athens before writing this epistle (supposing him to have written it there) he should have "over and again" purposed to revisit the Thessalonians, but have been hindered? And yet such purposes he had entertained before writing this epistle, as we learn from ii, 18; and this greatly favors the later date. (4.) Before Paul wrote this epistle, Timothy had come to him from Thessalonica with good tidings concerning the faith and charity of the Christians there (iii, 6). But had Timothy followed Paul to Athens from Berea, what tidings could he have brought the apostle from Thessalonica except such hearsay reports as would inform the apostle of nothing he did not already know? From these considerations it follows that this epistle

was not written from Athens. It must, however, have been written very soon after his arrival at Corinth; for at the time of his writing Timothy had just arrived from Thessalonica (*ἀπὸ ἐλθόντος Τιμοθέου*, iii, 6), and Paul had not been long in Corinth before Timothy and Silas joined him there (Acts xvii, 1-5).

Michaelis contends for a later date, but his arguments are destitute of weight. Before Paul could learn that the fame of the Thessalonian Church had spread through Achaia and far beyond, it was not necessary, as Michaelis supposes, that he should have made several extensive journeys from Corinth; for as that city, from its mercantile importance, was the resort of persons from all parts of the commercial world, the apostle had abundant means of gathering this information even during a brief residence there. As little is it necessary to resort to the supposition that when Paul says that over and again Satan had hindered him from fulfilling his intention of visiting Thessalonica he must refer to shipwrecks or some such misfortunes (as Michaelis suggests); for Satan has many ways of hindering men from such purposes besides accidents in travelling. The views of critics who have assigned to this epistle a later date than the second missionary journey are stated and refuted in the Introduction of Köch (p. 23, etc.) and of Lünemann (§ 3).

III. *Relation to Other Epistles.*—The epistles to the Thessalonians then (for the second followed the first after no long interval) are the earliest of Paul's writings—perhaps the earliest written records of Christianity. They belong to that period which Paul elsewhere styles "the beginning of the Gospel" (Phil. iv, 15). They present the disciples in the first flush of love and devotion, yearning for the day of deliverance, and straining their eyes to catch the first glimpse of their Lord descending amidst the clouds of heaven, till in their feverish anxiety they forget the sober business of life absorbed in this one engrossing thought. It will be remembered that a period of about five years intervenes before the second group of epistles—those to the Corinthians, Galatians, and Romans—were written, and about twice that period to the date of the epistles of the Roman captivity. It is interesting, therefore, to compare the Thessalonian epistles with the later letters and to note the points of difference. These differences are mainly fourfold.

1. In the general style of these earlier letters there is greater simplicity and less exuberance of language. The brevity of the opening salutation is an instance of this. "Paul . . . to the Church of the Thessalonians in God the Father and the Lord Jesus Christ, grace and peace to you" (1 Thess. i, 1; comp. 2 Thess. i, 1). The closing benediction is correspondingly brief: "The grace of our Lord Jesus Christ be with you" (1 Thess. v, 28; comp. 2 Thess. iii, 18). And throughout the epistles there is much more evenness of style; words are not accumulated in the same way, the syntax is less involved, parentheses are not so frequent, the turns of thought and feeling are less sudden and abrupt, and, altogether, there is less intensity and variety than we find in Paul's later epistles.

2. The *antagonism to Paul* is not the same. The direction of the attack has changed in the interval between the writing of these epistles and those of the next group. Here the opposition comes from Jews. The admission of the Gentiles to the hopes and privileges of Messiah's kingdom on any condition is repulsive to them. They "forbade the apostle to speak to the Gentiles that they might be saved" (1 Thess. ii, 16). A period of five years changes the aspect of the controversy. The opponents of Paul are now no longer Jews so much as Judaizing Christians (Ewald, *Jahrb.* iii, 249; *Sendschr.* p. 14). The question of the admission of the Gentiles has been solved by time, for they have "taken the kingdom of heaven by storm." But the antagonism to the apostle of the Gentiles having been driven from its first position, entrenched itself behind a second

barrier. It was now urged that though the Gentiles may be admitted to the Church of Christ, the only door of admission is the Mosaic covenant-rite of circumcision. The language of Paul speaking of the Jewish Christians in this epistle shows that the opposition to his teaching had not at this time assumed this second phase. He does not yet regard them as the disturbers of the peace of the Church, the false teachers who, by imposing a bondage of ceremonial observances, frustrate the free grace of God. He can still point to them as examples to his converts at Thessalonica (1 Thess. ii, 14). The change, indeed, was imminent; the signs of the gathering storm had already appeared (Gal. ii, 11), but hitherto they were faint and indistinct, and had scarcely darkened the horizon of the Gentile churches.

3. It will be no surprise that the *doctrinal teaching* of the apostle does not bear quite the same aspect in these as in the later epistles. Many of the distinctive doctrines of Christianity, which are inseparably connected with Paul's name, though implicitly contained in the teaching of these earlier letters—as indeed they follow directly from the true conception of the person of Christ—were yet not evolved and distinctly enunciated till the needs of the Church drew them out into prominence at a later date. It has often been observed, for instance, that there is in the epistles to the Thessalonians no mention of the characteristic contrast of "faith and works;" that the word "justification" does not once occur; that the idea of dying with Christ and living with Christ, so frequent in Paul's later writings, is absent in these. It was, in fact, the opposition of Judaizing Christians insisting on a strict ritualism which led the apostle, somewhat later, to dwell at greater length on the true doctrine of a saving faith and the true conception of a godly life; but the time had not yet come.

4. This difference appears especially in the *eschatology* of the apostle. In the epistles to the Thessalonians, as has been truly observed, the Gospel preached is that of the coming of Christ, rather than of the cross of Christ. There are many reasons why the subject of the second advent should occupy a larger space in the earliest stage of the apostolic teaching than afterwards. It was closely bound up with the fundamental fact of the Gospel, the resurrection of Christ, and thus it formed a natural starting-point of Christian doctrine. It afforded the true satisfaction to those Messianic hopes which had drawn the Jewish converts to the fold of Christ. It was the best consolation and support of the infant Church under persecution, which must have been most keenly felt in the first abandonment of worldly pleasures and interests. More especially, as telling of a righteous Judge who would not overlook iniquity, it was essential to that call to repentance which must everywhere precede the direct and positive teaching of the Gospel. "Now he commandeth all men everywhere to repent, for he hath appointed a day in the which he will judge the world in righteousness by that Man whom he hath ordained, whereof he hath given assurance unto all men in that he raised him from the dead" (Acts xvii, 30, 31).

There is no just ground, however, for the supposition that the apostle entertained precipitate expectations as to the Lord's second coming. His language is suited to every age of the Church. Where an event is certain of accomplishment, but uncertain as regards the precise time, it may be said to be always "at hand" to devout expectation; and this is the aspect which the topic in question, after all that has been written on the subject, wears in Paul's writings taken as a whole. The task of proving that he was mistaken, and therefore that the gift of inspiration was only partial, is as arduous as one would suppose it must be ungrateful.

IV. *Relation to the Associated History.*—A comparison of the narrative in the Acts with the allusions in this and the Second Epistle to the Thessalonians is equally instructive with the foregoing comparison. With some striking coincidences, there is just that de-

gree of divergence which might be expected between a writer who had borne the principal part in the scenes referred to and a narrator who derives his information from others, between the casual half-expressed allusions of a familiar letter and the direct account of the professed historian.

1. Passing over patent coincidences, we may single out one of a more subtle and delicate kind. It arises out of the form which the accusation brought against Paul and his companions at Thessalonica takes in the Acts: "All these do contrary to the decrees of Cæsar, saying that there is another king, one Jesus" (xvii, 7). The allusions in the epistles to the Thessalonians enable us to understand the ground of this accusation. It appears that the *kingdom* of Christ had entered largely into his oral teaching in this city, as it does into that of the epistles themselves. He had charged his new converts to await the coming of the Son of God from heaven as their deliverer (i, 10). He had dwelt long and earnestly (*προσέταμεν καὶ διευαγγελισάμεθα*) on the terrors of the judgment which would overtake the wicked (iv, 6). He had even explained at length the signs which would usher in the last day (2 Thess. ii, 5). Either from malice or in ignorance such language had been misrepresented, and he was accused of setting up a rival sovereign to the Roman emperor.

2. On the other hand, the language of these epistles diverges from the narrative of Luke on two or three points in such a way as to establish the independence of the two accounts, and even to require some explanation.

(1.) The first of these relates to the composition of the Church of Thessalonica. In the first epistle Paul addresses his readers distinctly as Gentiles, who had been converted from idolatry to the Gospel (i, 9, 10). In the Acts we are told that "some (of the Jews) believed, . . . and of the devout Greeks (i. e. proselytes) a great multitude, and of the chief women not a few" (xvii, 4). If for *σεβομένων Ἑλλήνων* we read *σεβομένων καὶ Ἑλλήνων*, "proselytes and Greeks," the difficulty vanishes; but though internal probabilities are somewhat in favor of this reading, the array of direct evidence (now reinforced by the Codex Sinaiticus) is against it. But even if we retain the common reading, the account of Luke does not exclude a number of believers converted directly from heathendom; indeed, if we may argue from the parallel case at Berea (xvii, 12), the "women" were chiefly of this class; and if any divergence remains, it is not greater than might be expected in two independent writers, one of whom, not being an eye-witness, possessed only a partial and indirect knowledge. Both accounts alike convey the impression that the Gospel made but little progress with the Jews themselves.

(2.) In the epistle the persecutors of the Thessalonian Christians are represented as their fellow-countrymen, i. e. as heathens (*ὑπὸ τῶν ἰδίων συμφυλετῶν*, ii, 14), whereas in the Acts the Jews are regarded as the bitterest opponents of the faith (xvii, 5). This is fairly met by Paley (*Horæ Paul.* ix, No. 5), who points out that the Jews were the instigators of the persecution, which, however, they were powerless of themselves to carry out without aid from the heathen, as may be gathered even from the narrative of Luke. We may add, also, that the expression *ἰδιοὶ συμφυλεταί* need not be restricted to the heathen population, but might include many Hellenist Jews who must have been citizens of the free town of Thessalonica.

(3.) The narrative of Luke appears to state that Paul remained only three weeks at Thessalonica (xvii, 2), whereas in the epistle, though there is no direct mention of the length of his residence among them, the whole language (i, 4; ii, 4-11) points to a much longer period. The latter part of the assertion seems quite correct, the former needs to be modified. In the Acts it is stated simply that for three Sabbath days (three weeks) Paul taught in the synagogue. The silence of

the writer does not exclude subsequent labor among the Gentile population; and, indeed, as much seems to be implied in the success of his preaching, which exasperated the Jews against him.

(4.) The notices of the movements of Silas and Timothy in the two documents do not accord at first sight. In the Acts Paul is conveyed away secretly from Berea to escape the Jews. Arrived at Athens, he sends to Silas and Timothy, whom he had left behind at Berea, urging them to join him as soon as possible (xvii, 14-16). It is evident from the language of Luke that the apostle expects them to join him at Athens; yet we hear nothing more of them for some time, when at length, after Paul had passed on to Corinth, and several incidents had occurred since his arrival there, we are told that Silas and Timothy came from Macedonia (xviii, 5). From the first epistle, on the other hand, we gather the following facts: Paul there tells us that they (*ἡμεῖς*, i. e. himself, and probably Silas), no longer able to endure the suspense, "consented to be left alone at Athens, and sent Timotheus their brother" to Thessalonica (iii, 1, 2). Timothy returned with good news (ver. 6) (whether to Athens or Corinth does not appear), and when the two epistles to the Thessalonians were written, both Timothy and Silas were with Paul (i, 1; 2 Thess. i, 1; comp. 2 Cor. i, 19). Now, though we may not be prepared, with Paley, to construct an undesigned coincidence out of these materials, yet, on the other hand, there is no insoluble difficulty; for the events may be arranged in two different ways, either of which will bring the narrative of the Acts into accordance with the allusions of the epistle.

(a.) Timothy was despatched to Thessalonica, not from Athens, but from Berea, a supposition quite consistent with the apostle's expression of "consenting to be left alone at Athens." In this case Timothy would take up Silas somewhere in Macedonia on his return, and the two would join Paul in company; not, however, at Athens, where he was expecting them, but later on at Corinth, some delay having arisen. This explanation, however, supposes that the plurals "*we* consented, *we* sent" (*ἐδόκασαμεν, ἐπέμψαμεν*), can refer to Paul alone.

(b.) The alternative mode of reconciling the accounts is as follows: Timothy and Silas did join the apostle, at Athens, where we learn from the Acts that he was expecting them. From Athens he despatched Timothy to Thessalonica, so that he and Silas (*ἡμεῖς*) had to forego the services of their fellow-laborer for a time. This mission is mentioned in the epistle, but not in the Acts. Subsequently he sends Silas on some other mission, not recorded either in the history or the epistle; probably to another Macedonian Church—Philippi, for instance, from which he is known to have received contributions about this time, and with which, therefore, he was in communication (2 Cor. xi, 9; comp. Phil. iv, 14-16; see Koch, p. 15). Silas and Timothy returned together from Macedonia and joined the apostle at Corinth. This latter solution, if it assumes more than the former, has the advantage that it preserves the proper sense of the plural "*we* consented, *we* sent," for it is at least doubtful whether Paul ever uses the plural of himself alone. The silence of Luke may in this case be explained either by his possessing only a partial knowledge of the circumstances, or by his passing over incidents of which he was aware as unimportant.

Whether the expected meeting ever took place at Athens is therefore a matter involved in much uncertainty. Michaelis, Eichhorn, De Wette, Koppe, Pelt, and others are of opinion that, at least as respects Timothy, it did take place; and they infer that Paul again remanded him to Thessalonica, and that he made a second journey along with Silas to join the apostle at Corinth. Hug, on the other hand, supposes only one journey, viz. from Thessalonica to Corinth; and understands the apostle, in 1 Thess. iii, 1, 2, as intimating, not that he had sent Timothy from Athens to Thessalonica, but that he had prevented his coming to Athens by send-

ing him from Berea to Thessalonica. Between these two opinions there is nothing to enable us to judge with certainty, unless we attach weight to the expression of Luke, that Paul had desired the presence of Timothy and Silas in Athens *ὡς τάχις*, "as speedily as possible." His desiring them to follow him thus, without loss of time, favors the conclusion that they did rejoin him in Athens, and were thence sent to Thessalonica. See SILAS; TIMOTHY.

V. *Occasion of the Epistle.*—We are now prepared to consider the circumstances of the Church at Thessalonica which drew forth this letter. These were as follows: Paul had twice attempted to revisit Thessalonica, and both times had been disappointed. Thus prevented from seeing them in person, he had sent Timothy to inquire and report to him as to their condition (iii, 1-5). Timothy returned with most favorable tidings, reporting not only their progress in Christian faith and practice, but also their strong attachment to their old teacher (ver. 6-10). The First Epistle to the Thessalonians is the outpouring of the apostle's gratitude on receiving this welcome news.

At the same time, the report of Timothy was not un-mixed with alloy. There were certain features in the condition of the Thessalonian Church which called for Paul's interference, and to which he addresses himself in his letter. (1.) The very intensity of their Christian faith, dwelling too exclusively on the day of the Lord's coming, had been attended with evil consequences. On the one hand, a practical inconvenience had arisen. In their feverish expectation of this great crisis, some had been led to neglect their ordinary business, as if the daily concerns of life were of no account in the immediate presence of so vast a change (iv, 11; comp. 2 Thessa. ii, 1; iii, 6, 11, 12). On the other hand, a theoretical difficulty had been felt. Certain members of the Church had died, and there was great anxiety lest they should be excluded from any share in the glories of the Lord's advent (iv, 13-18). Paul rebukes the irregularities of the former, and dissipates the fears of the latter. (2.) The flame of persecution had broken out, and the Thessalonians needed consolation and encouragement under their sore trial (ii, 14; iii, 2-4). (3.) An unhealthy state of feeling with regard to spiritual gifts was manifesting itself. Like the Corinthians at a later day, they needed to be reminded of the superior value of "prophesying," compared with other gifts of the Spirit which they exalted at its expense (v, 19, 20). (4.) There was the danger, which they shared in common with most Gentile churches, of relapsing into their old heathen profligacy. Against this the apostle offers a word in season (iv, 4-8). We need not suppose, however, that Thessalonica was worse in this respect than other Greek cities. See THESSALONICA.

Yet, notwithstanding all these drawbacks, the condition of the Thessalonian Church was highly satisfactory, and the most cordial relations existed between Paul and his converts there. This honorable distinction it shares with the other great Church of Macedonia, that of Philippi. At all times, and amid every change of circumstance, it is to his Macedonian churches that the apostle turns for sympathy and support. A period of nearly ten years is interposed between the First Epistle to the Thessalonians and the Epistle to the Philippians, and yet no two of his letters more closely resemble each other in this respect. In both he drops his official title of apostle in the opening salutation, thus appealing rather to their affection than to his own authority; in both he commences the body of his letter with hearty and unqualified commendation of his converts; and in both the same spirit of confidence and warm affection breathes throughout.

VI. *Contents.*—The design of this epistle thus being to comfort the Thessalonians under trial, and to encourage them to the patient and consistent profession of Christianity, the letter itself is rather practical than doctrinal. It was suggested more by personal feeling

than by any urgent need, which might have formed a centre of thought, and impressed a distinct character on the whole. Under these circumstances, we need not expect to trace unity of purpose, or a continuous argument, and any analysis must be more or less artificial. The body of the epistle, however, may conveniently be divided into two parts, the former of which, extending over the first three chapters, is chiefly taken up with a retrospect of the apostle's relation to his Thessalonian converts, and an explanation of his present circumstances and feelings; while the latter, comprising the 4th and 5th chapters, contains some seasonable exhortations. At the close of each of these divisions is a prayer commencing with the same words, "May God himself," etc., and expressed in somewhat similar language. The epistle may therefore be tabulated as follows:

#### Salutation (i, 1).

##### I. Narrative portion (i, 2-iii, 18).

1. The apostle gratefully records their conversion to the Gospel and their progress in the faith (i, 2-10).
2. He reminds them how pure and blameless his life and ministry among them had been (ii, 1-12).
3. He repeats his thanksgiving for their conversion, dwelling especially on the persecutions which they had endured (ii, 13-16).
4. He describes his own suspense and anxiety, the consequent mission of Timothy to Thessalonica, and the encouraging report which he brought back (ii, 17-iii, 10).
5. The apostle's prayer for the Thessalonians (iii, 11-13).

##### II. Hortatory portion (iv, 1-v, 24).

1. Warning against impurity (iv, 1-8).
2. Exhortation to brotherly love and sobriety of conduct (iv, 9-12).
3. Touching the advent of the Lord (iv, 13-v, 11).
  - a. The dead shall have their place in the resurrection (iv, 13-18).
  - b. The time, however, is uncertain (v, 1-3).
  - c. Therefore all must be watchful (v, 4-11).
4. Exhortation to orderly living and the due performance of social duties (v, 12-15).
5. Injunctions relating to prayer and spiritual matters generally (v, 16-22).
6. The apostle's prayer for the Thessalonians (v, 23, 24).

The epistle closes with personal injunctions and a benediction (v, 25-28).

VII. *Commentaries.*—The following are the special exegetical helps on both the epistles to the Thessalonians exclusively; to the most important of them we prefix an asterisk: Willich, *Commentarius* (Argent. 1545; Basil. 1546, 8vo); Weller, *Commentarius* [includ. Phil.] (Norib. 1561, 8vo); Major, *Enarratio* (Vitemb. 1563, 8vo); Musculus, *Commentarius* [includ. other ep.] (Basil. 1564, 1578, 1595, fol.); Aretius, *Commentarius* [includ. Phil. and Col.] (Morg. 1580, 8vo); \*Jewell, *Exposition* (Lond. 1583, 12mo; 1811, 8vo; also in Latin, and in Works); Zanchius, *Commentarius* [includ. Phil. and Col.] (Neost. 1595, fol.; also in *Opp.*); \*Rollock, *Commentarius* (Edinb. 1598; Herb. 1601, 8vo); also *Lectures* (Edinb. 1606, 4to); Hunnius, *Expositio* (Francof. 1603, 8vo); Steuart [Rom. Cath.], *Commentarius* (Ingolst. 1609, 4to); Crell [Socin.], *Commentarius* [from Pet. Mocov's notes] (Racov. 1636, 8vo; also in *Opp.*); Ferguson, *Exposition* (Lond. 1674, 8vo); Schmid, *Paraphrasis* [includ. other ep.] (Hamb. 1691, 1696, 1704, 4to); Landresen, *Erklärung* (Frankf. 1707, 4to); Stresou, *Meditation* (Amst. 1710, 8vo); Turretin, *Commentarius* (Basil. 1739, 8vo; also in *Opp.*); Chandler, *Notes* [includ. Gal.] (Lond. 1777, 4to); Krause, *Erklärung* [includ. Phil.] (Frankf. 1790); Schleiermacher, *Notæ* (Berol. 1823, 8vo); \*Pelt, *Commentarius* (Gryph. 1830, 8vo); Schott, *Commentarius* (Lips. 1834, 8vo); Tafel, *Historia Thessalonicensium* (Tub. 1835, 8vo); Sumner, *Lectures* (Lond. 1850, 2 vols. 12mo); Lillie, *Version* (N. Y. 1856, 4to); also *Lectures* (ibid. 1870, 8vo); \*Ellicott, *Commentary* (Lond. 1858, 1862, 1866, 8vo); Edmunds, *Commentary* (ibid. 1858, 8vo); Headland, *Notes* (ibid. 1866, 8vo); \*Eadie, *Commentary* (ibid. 1877, 8vo). See EPISTLE.

On the first epistle alone there are the following: Schlatter, *Exposition* (Lond. 1629, 4to); Martin, *Analysis* (Groening. 1669, 12mo); Van Alphen, *Verklaaring*

(Utrecht, 1741, 4to); Phillips, *Explanation* (Lond. 1751, 4to); Burgerhoudt, *De Argumento*, etc. (L. B. 1825, 8vo); Koch, *Commentar* (Berl. 1848, 1855, 8vo); Pater-son, *Commentary* [includ. James and 1 John] (Edinb. 1857, 8vo). See COMMENTARY.

THESSALONIANS, SECOND EPISTLE TO THE, follows immediately after the first in all the texts and versions of the New Test.

I. *Author*.—1. The external evidence in favor of the second epistle is somewhat more definite than that which can be brought in favor of the first. It seems to be referred to in one or two passages of Polycarp (iii, 15, in Polyc. c. 11, and possibly i, 4 in the same chapter; comp. Polyc. c. 3, and see Lardner, ii, 6); and the language in which Justin Martyr (*Dial.* p. 336 D) speaks of the Man of Sin is so similar that it can scarcely be independent of this epistle. With Irenæus the direct testimony commences (*Adv. Hæc.* iii, 7, 2): "And again in the second epistle to the Thessalonians, speaking concerning Antichrist, 'And then shall the ungodly one be revealed, whom the Lord Jesus Christ shall slay with the breath of his mouth,'" etc. (comp. 2 Thess. ii, 8). Clemens Alexandrinus (*Strom.* v, 554): "The apostle says, 'Pray that we may be delivered from perverse and wicked men, for all have not faith'" (comp. 2 Thess. iii, 2). Tertullian (*De Res. Carnis*, xxiv, 339): "And in the second epistle to the same," viz. the Thessalonians, "with greater earnestness he says, 'I beseech you, brethren, by the coming of the Lord Jesus Christ, etc., that ye be not soon moved in your mind, nor shaken, neither by spirit nor by word,'" etc. (comp. 2 Thess. ii, 2, 3).

The second epistle, like the first, is found in the canons of the Syriac and Old Latin versions, and in those of the Muratorian fragment and of the heretic Marcion, and was universally received by the Church.

2. The internal character of the epistle, as in the former case, bears the strongest testimony to its Pauline origin (see Jowett, i, 143). "The genuineness of this epistle," remarks Eichhorn, "follows from its contents. Its design is to correct the erroneous use which had been made of some things in the first epistle; and who but the writer of that first epistle would have set himself thus to such a task? It, however, appears that the author of the first must also be the author of the second; and, as the former is the production of Paul, we must ascribe the latter also to him. It was essential to the apostle's reputation that the erroneous consequences which had been deduced from his words should be refuted. Had he refrained from noticing the expectation built upon his words of the speedy return of Christ, his silence would have confirmed the conclusion that this was one of his peculiar doctrines; as such it would have passed to the succeeding generation; and when they perceived that in this Paul had been mistaken, what confidence could they have had in other parts of his teaching? The weight of this as an evidence of the genuineness of this Second Epistle to the Thessalonians acquires new strength from the fact that of all the other expressions in the epistle not one is opposed to any point either in the history or the doctrine of the apostle" (*Einleit. ins N. T.* iii, 69).

3. Notwithstanding these evidences in its favor, the genuineness of this epistle has been called into doubt by the restless scepticism of some of the German critics. The way here was led by John Ernest Chr. Schmidt, who, in 1801, published in his *Bibliothek für Kritik und Exegese* a tract entitled *Vermuthungen über die beiden Briefe an die Thessalonier*, in which he impugned the genuineness of the first twelve verses of the second chapter. He afterwards, in his *Einleitung*, p. 256, enlarged his objections and applied them to the whole epistle. He has been followed by Schrader (*Apostel Paulus*), Kern (*Tübing. Zeitschr. f. Theol.* 1839, ii, 145), and Baur (*Paulus der Apostel*). De Wette at first condemned this epistle, but afterwards withdrew his condemnation and frankly accepted it as genuine.

His cavils are more than usually frivolous, and have been most fully replied to by Guericke (*Beiträge zur hist.-krit. Einleit. ins N. T.* [Halle, 1828], p. 92-99), by Reiche (*Authenticæ Post. ad Thessalon. Epist.* Vindiciæ [Gött. 1829], and by Pelt, in the *Prolegomena* to his *Commentary on the Epistles to the Thessalonians* (p. xxvii). See also Grimm, in the *Theol. Stud. u. Krit.* 1850, p. 753 sq.; Lipsius, *ibid.* 1854, p. 905 sq.; Hilgenfeld, in his *Zeitschr. f. wiss. Theol.* 1862, p. 225 sq.

It will thus be seen that this epistle has been rejected by some modern critics who acknowledge the first to be genuine. Such critics, of course, attribute no weight to arguments brought against the first, such as we have considered already. The Apocalyptic passage (2 Thess. ii, 1-12) is the great stumbling-block to them. It has been objected to either as alluding to events subsequent to Paul's death—the Neronian persecution, for instance—or as betraying religious views derived from the Montanism of the 2d century, or, lastly, as contradicting Paul's anticipations expressed elsewhere, especially in the first epistle, of the near approach of the Lord's advent. That there is no reference to Nero we shall endeavor to show presently. That the doctrine of an Antichrist did not start into being with Montanism is shown from the allusions of Jewish writers even before the Christian era (see Bertholdt, *Christ.* p. 69; Gfrörer, *Jahrb. des Heils*, ii, 257); and appears still more clearly from the passage of Justin Martyr referred to in the paragraph above. That the language used of the Lord's coming in the second epistle does not contradict, but rather supplement, the teaching of the first—postponing the day, indeed, but still anticipating its approach as possibly within the apostle's lifetime—may be gathered both from expressions in the passage itself (e. g. ii, 7, "is already working") and from other parts of the epistle (i, 7, 8), especially those which speak of the "signs" of the coming. Other special objections to the epistle will scarcely command a hearing, and must necessarily be passed over here.

II. *Date*.—There is the strongest reason for believing that this second epistle was written very soon after the first, and at the same place, viz. Corinth, A.D. cir. 50. The circumstances of the apostle while writing the one seem very much the same as they were while writing the other; nor do those of the Thessalonians present any greater difference than such as the influences referred to in the second epistle may be supposed in a very short time to have produced. What seems almost to decide the question is that, while writing the second epistle, the apostle had Timothy and Silas still with him. Now, after he left Corinth, it was not for a long time that either of these individuals was found again in his company (Acts xviii, 18; comp. xix, 22); and with regard to one of them, Silas, there is no evidence that he and Paul were ever together at any subsequent period.

It will be seen presently that the teaching of the second epistle is corrective of, or rather supplemental to, that of the first, and therefore presupposes it. Moreover, the first epistle bears on its face evidence that it is the first gush of his affectionate yearnings towards his converts after his departure from Thessalonica; while, on the other hand, the second epistle contains a direct allusion to a previous letter, which may suitably be referred to the first—"Hold fast the tradition which ye were taught either by word or by letter from us" (ii, 15). We can scarcely be wrong, therefore, in maintaining the received order of the two epistles. It is due, however, to the great names of Grotius and of Ewald (*Jahrb.* iii, 250; *Sendschr.* p. 16), who are followed in this by Baur, Hilgenfeld, Laurent, and Davidson, to mention that they reverse the order, placing the second epistle before the first in point of time—on different grounds, indeed, but both equally insufficient to disturb the traditional order, supported as it is by the considerations already alleged.

III. *Occasion and Design*.—In the former letter we

saw chiefly the outpouring of strong personal affection occasioned by the renewal of the apostle's intercourse with the Thessalonians, and the doctrinal and hortatory portions are there subordinate. In the second epistle, on the other hand, his leading motive seems to have been the desire of correcting errors in the Church of Thessalonica. We notice two points especially which call forth his rebuke.

1. It seems that the anxious expectation of the Lord's advent, instead of subsiding, had gained ground since the writing of the first epistle. They now looked upon this great crisis as imminent, and their daily vocations were neglected in consequence. There were expressions in the first epistle which, taken by themselves, might seem to favor this view; and, at all events, such was falsely represented to be the apostle's doctrine. This notion some inculcated as a truth specially confirmed to them by the Spirit; others advocated it as part of the apostolic doctrine; and some claimed for it the specific support of Paul in a letter (ii, 2). Whether the letter here referred to is the apostle's former epistle to the Thessalonians or one forged in his name by some keen and unscrupulous advocates of the notion above referred to is uncertain. The latter opinion has been very generally adopted from the time of Chrysostom downwards, and is certainly somewhat countenanced by the apostle's statement in the close of the epistle as to his autograph salutation being the mark of a genuine letter from him (iii, 17). At the same time, it must be admitted that the probability of such a thing being done by any one at Thessalonica is, under all the circumstances of the case, not very strong. He now writes to soothe this restless spirit and quell their apprehensions by showing that many things must happen first, and that the end was not yet, referring to his oral teaching at Thessalonica in confirmation of this statement (ii, 1-12; iii, 6-12).

2. The apostle had also a personal ground of complaint. His authority was not denied by any, but it was tampered with, and an unauthorized use was made of his name. It is difficult to ascertain the exact circumstances of the case from casual and indirect allusions, and indeed we may perhaps infer from the vagueness of the apostle's own language that he himself was not in possession of definite information; but, at all events, his suspicions were aroused. Designing men might misrepresent his teaching in two ways, either by suppressing what he actually had written or said, or by forging letters and in other ways representing him as teaching what he had not taught. Paul's language hints in different places at both these modes of false dealing. He seems to have entertained suspicions of this dishonesty even when he wrote the first epistle. At the close of that epistle he binds the Thessalonians by a solemn oath, "in the name of the Lord," to see that the epistle is read "to all the holy brethren" (v, 27)—a charge unintelligible in itself, and only to be explained by supposing some misgivings in the apostle's mind. Before the second epistle was written his suspicions seem to have been confirmed, for there are two passages which allude to these misrepresentations of his teaching. In the first of these he tells them in vague language, which may refer equally well to a false interpretation put upon his own words in the first epistle, or to a supplemental letter forged in his name, "not to be troubled either by spirit or by word or by letter, as coming from us, as if the day of the Lord were at hand." They are not to be deceived, he adds, by any one, whatever means he employs (*κατὰ μηδὲνα τρόπον*, ii, 2, 3). In the second passage, at the close of the epistle, he says, "The salutation of Paul with mine own hand, which is a token in every epistle: so I write" (iii, 17)—evidently a precaution against forgery. With these two passages should be combined the expression in iii, 14, from which we infer that he now entertained a fear of direct opposition—"If any man obey not our word conveyed by our epistle, note that man."

IV. *Eschatology.*—The most striking feature in the epistle is the apocalyptic passage, announcing the revelation of the Man of Sin (ii, 1-12); and it will not be irrelevant to investigate its meaning, bearing, as it does, on the circumstances under which the epistle was written, and illustrating this aspect of the apostle's teaching. He had dwelt much on the subject; for he appeals to the Thessalonians as knowing this truth, and reminds them that he told them these things when he was yet with them. The following considerations may help to clear up this obscure subject.

1. The passage speaks of a great apostasy which is to usher in the advent of Christ, the great judgment. There are three prominent figures in the picture—Christ, Antichrist, and the Restrainer. Antichrist is described as the Man of Sin, the Son of Perdition, as the Adversary who exalteth himself above all that is called God, as making himself out to be God. Later on (for apparently the reference is the same) he is styled the "mystery of lawlessness," "the lawless one." The Restrainer is in one place spoken of in the masculine as a person (*ὁ κατέχων*), in another in the neuter as a power, an influence (*τὸ κατέχον*). The "mystery of lawlessness" is already at work. At present it is checked by the Restrainer; but the check will be removed, and then it will break out in all its violence. Then Christ will appear, and the enemy shall be consumed by the breath of his mouth, shall be brought to naught by the splendor of his presence.

2. Many different explanations have been offered of this passage. Each generation and each section in the Church has regarded it as a prophecy of that particular power which seemed to them and in their own time to be most fraught with evil to the true faith. A good account of these manifold interpretations will be found in Litnemann's commentary on the epistle, p. 204, *Schlussbem. zu ii, 1-12* (see also Alford, *Proleg.*). By one class of interpreters it has been referred to circumstances which passed within the circle of the apostle's own experience, the events of his own lifetime, or the period immediately following. Others, again, have seen in it the prediction of a crisis yet to be realized, the end of all things. The former of these, the Præterists, have identified the Man of Sin with divers historical characters, and have sought for a historical counterpart to the Restrainer in like manner. Among them may be mentioned Grotius, Wettstein, Whitby, Schöttgen, Nölselt, Krause, and Kern. Agreeing, however, in the main point of a past accomplishment, these writers differ widely from each other in the details of interpretation. The Man of Sin was, according to Grotius, Caligula; according to Wettstein, Titus; according to Hammond, Simon Magus; by many (Whitby, Le Clerc, etc.) the Jewish people are thought to have been thus indicated in their opposition to Christianity and to the Roman power (*τὸ κατέχον*). Commentators of this class are, of course, compelled to consider the coming of Christ as already past, i. e. to interpret it of the destruction of Jerusalem; and this alone seems to render the view untenable. For Paul's description of the *parousia*, or appearance, of Christ (1 Thess. ii, 19) is far too exalted to correspond to any temporal event. The latter class of interpreters, the Futurists, have also given various accounts of the Antichrist, the mysterious power of evil which is already working. We hold, in general terms, that this view is substantially right, i. e. that the prophecy, however it may have been partially fulfilled in the past, yet awaits its complete fulfilment. But among the advocates of the Futurist opinion also differences of opinion prevail. To the Greek Church the Man of Sin was Mohammed, and the "mystery of iniquity" is Mohammedanism, which, it is held, will yet culminate in some fearfully Antichristian form. From the middle of the 11th century the pope began to be considered the predicted Antichrist, and this view, as might have been expected, became the prevalent one in all the Protestant churches. By way of retaliation, Romanists main-

tained that Luther and Protestantism are pointed at in the passage. This seems to show the danger of limiting the prophecy to any one form of Antichristian error. John writes that even in his time there were "many antichrists" (1 John ii, 18); the one he specifies as denying that "Jesus Christ had come in the flesh" is descriptive neither of Mohammed nor of the pope nor of Luther, but of the Gnostics. Many of the features of Antichrist as portrayed by Paul no doubt present themselves in the papacy, but others hardly so. At any rate, the papacy, so far as it contains elements of impiety, seems to have reached its culminating point; perhaps did so three hundred years ago, and yet Christ has not come. We are disposed, therefore, to adopt the view that there have been, since the prophecy was written, many partial manifestations of Antichristian error—the Gnostics, the Judaizing tendencies of the 1st century, Mohammed, the papacy, the French Revolution, etc.; but that there still is in prospect some mystery of iniquity which will combine in itself the several evil tendencies which the Church has already witnessed, but in a greatly intensified form; and probably that this final outburst of impiety will be embodied in a personal head or representative, the Man of Sin of our epistle. His appearance will be the signal for the second advent of Christ. As regards the Restrainer (ὁ κατέχων, τὸ κατέχον), the view of the fathers does not seem far wrong—viz. that Paul obscurely alludes to the temporal power (in his and their day the Roman empire), by which the excesses of lawless licentiousness are, to some extent, held in check. Hence, in Paul's view, the mission of the State as such was a divine one (Rom. xiii). See ANTICHRIST.

3. More particularly, therefore, in arbitrating between the Præterists and the Futurists, we are led by the analogy of other prophetic announcements, as well as by the language of the passage itself, to take a middle course. Neither is wholly right, and yet both are, to a certain extent, right. It is the special characteristic of prophecy to speak of the distant future through the present and immediate. The persons and events falling within the horizon of the prophet's own view are the types and representatives of greater figures and crises far off, and as yet but dimly discerned. Thus the older prophets, while speaking of a delivery from the temporary oppression of Egypt or Babylon, spoke also of Messiah's kingdom. Thus our Lord himself, foretelling the doom which was even then hanging over the holy city, glances at the future judgment of the world as typified and portrayed in this; and the two are so interwoven that it is impossible to disentangle them. See DOUBLE SENSE. Following this analogy, we may agree with the Præterists that Paul is referring to events which fell under his own cognizance; for indeed the Restrainer is said to be restraining now, and the mystery of iniquity to be already working; while, at the same time, we may accept the Futurist view, that the apostle is describing the end of all things, and that therefore the prophecy has not yet received its most striking and complete fulfilment. This commingling of the immediate and partial with the final and universal manifestation of God's judgments, characteristic of all prophecy, is rendered more easy in Paul's case, because he seems to have contemplated the end of all things as possibly, or even probably, near at hand; and therefore the particular manifestation of Antichrist, which he witnessed with his own eyes, would naturally be merged in and identified with the final Antichrist, in which the opposition to the Gospel will culminate. See ESCHATOLOGY.

4. If this view be correct, it remains to inquire what particular adversary of the Gospel, and what particular restraining influence, Paul may have had primarily in view. But, before attempting to approximate to an explanation, we may clear the way by laying down two rules. (1.) The imagery of the passage must be interpreted mainly by itself, and by the circumstances of the

time. The symbols may be borrowed in some cases from the Old Test.; they may reappear in other parts of the New. But we cannot be sure that the same image denotes exactly the same thing in both cases. The language describing the Man of Sin is borrowed, to some extent, from the representation of Antiochus Epiphanes in the Book of Daniel, but Antiochus cannot be meant here. The great adversary in the Revelation seems to be the Roman power, but it may be widely different here. There were even in the apostolic age "many antichrists;" and we cannot be sure that the Antichrist present to the mind of Paul was the same with the Antichrist contemplated by John. (2.) In all figurative passages it is arbitrary to assume that a person is denoted where we find a personification. Thus the Man of Sin here need not be an individual man; it may be a body of men, or a power, a spiritual influence. In the case of the Restrainer we seem to have positive ground for so interpreting it, since in one passage the neuter gender is used, "the thing which restraineth" (τὸ κατέχον), as if synonymous. (See Jowett, *Essay on the Man of Sin*, i, 178, rather for suggestions as to the mode of interpretation than for the conclusion he arrives at; also Cowles, in the *Biblioth. Sacra*, xxix, 623.) See MAX OF SIN.

5. When we inquire definitely, then, what Paul had immediately in view when he spoke of the Man of Sin and the Restrainer, we can only hope to get even an approximate answer by investigating the circumstances of the apostle's life at this epoch. Now we find that the chief opposition to the Gospel, and especially to Paul's preaching at this time, arose from the Jews. The Jews had conspired against the apostle and his companions at Thessalonica, and he only saved himself by secret flight. Thence they followed him to Berea, which he hurriedly left in the same way. At Corinth, whence the letters to the Thessalonians were written, they persecuted him still further, raising a cry of treason against him, and bringing him before the Roman proconsul. These incidents explain the strong expressions he uses of them in these epistles: "They slew the Lord Jesus and the prophets, and persecuted the apostles; they are hateful to God; they are the common enemies of mankind, whom the Divine wrath (ἡ ὀργή) at length overtakes" (1 Thess. ii, 15, 16). With these facts in view, it seems, on the whole, probable that the Antichrist, in its primary aspect, is represented especially by Judaism. With a prophetic insight the apostle foresaw, as he contemplated the moral and political condition of the race, the approach of a great and overwhelming catastrophe. And it is not improbable that our Lord's predictions of the vengeance which threatened Jerusalem blended with the apostle's vision, and gave a color to this passage. If it seem strange that "lawlessness" should be mentioned as the distinguishing feature of those whose very zeal for "the law" stimulated their opposition to the Gospel, we may appeal to our Lord's own words (Matt. xxiii, 28) describing the Jewish teachers, "within they are full of hypocrisy and lawlessness (ἀνομίας)." Corresponding to this view of the Antichrist, we shall probably be correct, as already suggested, in regarding the Roman empire as the restraining power, for so it was taken by many of the fathers, though without altogether understanding its bearing. It was to Roman justice and Roman magistrates that the apostle had recourse at this time to shield him from the enmity of the Jews, and to check their violence. At Philippi, his Roman citizenship extorted an ample apology for ill-treatment. At Thessalonica, Roman law secured him fair play. At Corinth, a Roman proconsul acquitted him of frivolous charges brought by the Jews. It was only at a later date under Nero that Rome became the antagonist of Christendom, and then she also, in turn, was fitly portrayed by John as the type of Antichrist. Whether the Jewish opposition to the Gospel entirely exhausted Paul's own conception of the "mystery of lawlessness" as he saw it "already working" in his own

day, or whether other elements did not also combine with this to complete the idea, it is impossible to say; but we may presume that he had at least a dim and general anticipation of the more distant future, and at least of the final earthly catastrophe which the Divine Spirit intimates in this striking prediction. Moreover, at this distance of time and with our imperfect information, we cannot hope to explain the exact bearing of all the details in the picture. But, following the guidance of history, we seem justified in adopting this as a probable, though only a partial, explanation of a very difficult passage. See REVELATION, BOOK OF.

V. *Contents*.—This epistle, in the range of subject as well as in style and general character, closely resembles the first; and the remarks made on that epistle apply, for the most part, equally well to this. The structure, also, is somewhat similar, the main body of the epistle being divided into two parts in the same way, and each part closing with a prayer (ii, 16, 17; iii, 16; both commencing with *αὐτὸς δὲ ὁ κύριος*). The following is a tabular summary:

The opening salutation (i, 1, 2).

I. A general expression of thankfulness and interest, leading up to the difficulty about the Lord's advent (i, 3-ii, 17).

1. The apostle pours forth his thanksgiving for their progress in the faith; he encourages them to be patient under persecution, reminding them of the judgment to come, and prays that they may be prepared to meet it (i, 3-12).
2. He is thus led to correct the erroneous idea that the judgment is imminent, pointing out that much must happen first (ii, 1-12).
3. He repeats his thanksgiving and exhortation, and concludes this portion with a *prayer* (ii, 13-17).

II. Direct exhortation (iii, 1-16).

1. He urges them to pray for him, and confidently anticipates their progress in the faith (iii, 1-5).
2. He reproves the idle, disorderly, and disobedient, and charges the faithful to withdraw from such (iii, 6-15).

This portion again closes with a *prayer* (iii, 16).

The epistle ends with a special direction and benediction (iii, 17, 18).

VI. *Commentaries*.—The following exegetical helps are on the Second Epistle to the Thessalonians exclusively: Hoffmann, *Commentarius* [includ. Tit.] (Francof. 1545, 8vo); Bradshaw, *Exposition* (Lond. 1620, 4to); Jackson, *Exposition* (ibid. 1621, 4to); Reiche, *Authentic*, etc. (Gott. 1829, 4to); Sclater, *Exposition* (Lond. 1629, 4to). See EPISTLE.

**Thessalonica** (Θεσσαλονίκη, in classical writers also Θεσσαλονικία and Θεσσαλονίκη), a large and important town of Macedonia, visited by Paul on several occasions, and the seat of a Church to which two of his letters were addressed. (For fuller details we refer to Smith's *Dict. of Greek and Roman Geography*, s. v.)

I. *Name*.—Two legendary names which Thessalonica is said to have borne in early times are *Emathia* (Zonar. *Hist.* xii, 26) and *Haia* (Steph. B. s. v.), the latter probably having reference to the maritime position of the town. During the first period of its authentic history, it was known under the name of *Therma* (Θέρμα, Æsch.; Θέρμη, Herod., Thucyd.; Θέρμαι, Malelas, *Chronog.* p. 190, ed. Bonn), derived, in common with the designation of the gulf (Thermaicus Sinus), from the hot salt-springs which are found on various parts of this

coast, and one of which especially is described by Ptolemy as being at a distance of four English miles from the modern city (see Scylax, p. 278, ed. Gail). Three stories are told of the origin of the name Thessalonica. The first (and by far the most probable) is given by Strabo (vii, *Epit.* 10), who says that *Therma* was rebuilt by Cassander, and called after his wife Thessalonica, the daughter of Philip; the second is found in Steph. B. (s. v.), who says that its new name was a memorial of a victory obtained by Philip over the Thessalians (see Const. Porphyrog. *De Them.* ii, 51, ed. Bonn); the third is in the *Etyim. Magn.* (s. v.), where it is stated that Philip himself gave the name in honor of his daughter. Whichever of these stories is true, the new name of Thessalonica, and the new eminence connected with the name, are distinctly associated with the Macedonian period, and not at all with the earlier passages of true Greek history. The name thus given became permanent. Through the Roman and Byzantine periods it remained unaltered. In the Middle Ages the Italians gave it the form of *Salonichi* or *Saloniki*, which is still frequent. In Latin chronicles we find *Salonica*. In German poems of the 13th century the name appears, with a Teutonic termination, as *Salnek*. The uneducated Greeks of the present day call the place *Σαλονίκη*, the Turks *Selanik*.

II. *Situation*.—This is well described by Pliny (iv, 10) as "medio flexu litoris [sinus Thermaici]." The gulf extends about thirty leagues in a north-westerly direction from the group of the Thessalian islands, and then turns to the north-east, forming a noble basin between Capes Vardár and Karáburnu. On the edge of this basin is the city, partly on the level shore and partly on the slope of a hill, in 40° 38' 47" N. lat., and 22° 57' 22" E. long. The present appearance of the city, as seen from the sea, is described by Leake, Holland, and other travellers as very imposing. It rises in the form of a crescent up the declivity, and is surrounded by lofty whitened walls with towers at intervals. On the east and west sides of the city ravines ascend from the shore and converge towards the highest point, on which is the citadel called 'Επταπύργιον, like that of Constantinople. The port is still convenient for large ships, and the anchorage in front of the town is good. These circumstances in the situation of Thessalonica were evidently favorable for commanding the trade of the Macedonian sea. Its relations to the inland districts were equally advantageous. With one of the two great levels of Macedonia, viz. the plain of the "wide-flowing Axios" (Homer, *Il.* ii, 849), to the north of the range of Olympus, it was immediately connected. With the other, the plain of the Strymon and Lake Cercinitis, it communicated by a pass across the neck of the Chalcidic peninsula. Its distance from Pella, as given by the Itineraries, is twenty-seven miles, and from Amphipolis (with intermediate stations; see Acts xvii, 1) sixty-seven miles. It is still the chief centre of the trade of the district. It contains a population of 60,000 or 70,000, and (though Adrianople may possibly

View of Thessalonica.

be larger) it is the most important town of European Turkey next after Constantinople.

III. *Political and Military History.*—Thessalonica was a place of some importance even while it bore its earlier name of Therna. Three passages of chief interest may be mentioned in this period of its history. Xerxes rested here on his march, his land-forces being encamped on the plain between Therna and the Axios, and his ships cruising about the Thermaic gulf; and it was the view from hence of Olympus and Ossa which tempted him to explore the course of the Peneus (Herod. vii, 128 sq.). A short time (B.C. 421) before the breaking-out of the Peloponnesian war, Therna was occupied by the Athenians (Thucyd. i, 61); but two years later it was given up to Perdiccas (ibid. ii, 29). The third mention of Therna is in Æschines (*De Fals. Leg.* p. 31, ed. Bekk.), where it is spoken of as one of the places taken by Pausanias.

The true history of Thessalonica begins, as we have implied above, with the decay of Greek nationality. The earliest author who mentions it under its new name is Polybius. It seems probable that it was rebuilt in the same year (B.C. 315) with Cassandrea, immediately after the fall of Pydna and the death of Olympias. We are told by Strabo (*loc. cit.*) that Cassander incorporated in his new city the population not only of Therna, but likewise of three smaller towns, viz. Anea and Cissus (which are supposed to have been on the eastern side of the gulf) and Chalastra (which is said by Strabo [vii, *Epit.* 9] to have been on the farther side of the Axios, whence Tafel [p. xxii], by some mistake, infers that it lay between the Axios and Therna). It does not appear that these earlier cities were absolutely destroyed; nor, indeed, is it certain that Therna lost its separate existence. Pliny (*loc. cit.*) seems to imply that a place bearing this name was near Thessalonica; but the text is probably corrupt.

As we approach the Roman period, Thessalonica begins to be more and more mentioned. From Livy (xliv, 10) this city would appear to have been the great Macedonian naval station. It surrendered to the Romans after the battle of Pydna (ibid. xliv, 45), and was made the capital of the second of the four divisions of Macedonia (ibid. xlv, 29). Afterwards, when the whole of Macedonia was reduced to one province (Flor. ii, 14), Thessalonica was its most important city, and virtually its metropolis, though not so called till a later period. See MACEDONIA. Cicero, during his exile, found a refuge here in the quæstor's house (*Pro Planc.* 41); and on his journeys to and from his province of Cilicia he passed this way, and wrote here several of his extant letters. During the first civil war Thessalonica was the headquarters of the Pompeian party and the Senate (Dion Cass. xli, 20). During the second it took the side of Octavius and Antonius (Plutarch, *Brut.* 46; Appian, *B. C.* iv, 118), and reaped the advantage of this course by being made a free city (see Pliny, *loc. cit.*). It is possible that the word *λευτεριαις*, with the head of Octavia, on some of the coins of Thessalonica, has reference to this circumstance (see Eckhel, ii, 79); and some writers see in the Vardár gate, mentioned below, a monument of the victory over Brutus and Cassius.

Even before the close of the Republic, Thessalonica was a city of great importance, in consequence of its position on the line of communication between Rome and the East. Cicero speaks of it as "posita in gremio imperii nostri." It increased in size and rose in importance with the consolidation of the Empire. Strabo, in the 1st century, and Lucian, in the 2d, speak in strong language of the amount of its population. The supreme magistrates (apparently six in number) who ruled in Thessalonica as a free city of the Empire were entitled *πολιτάρχαι*, as we learn from the remarkable coincidence of Luke's language (Acts xvii, 6) with an inscription on the Vardár gate (Böckh, 1967. Belley mentions another inscription containing the same term).

In Acts xvii, 6 the *δημος* is mentioned, which formed part of the constitution of the city. Tafel thinks that it had a *βουλή* also.

During the first three centuries of the Christian æra Thessalonica was the capital of the whole country between the Adriatic and the Black Sea; and even after the founding of Constantinople it remained practically the metropolis of Greece, Macedonia, and Illyricum. In the middle of the 3d century, as we learn from coins, it was made a Roman *colonia*; perhaps with the view of strengthening this position against the barbarian invasions, which now became threatening. Thessalonica

Coins of Thessalonica.

was the great safeguard of the Empire during the first shock of the Gothic inroads. Constantine passed some time here after his victory over the Sarmatians; and perhaps the second arch, which is mentioned below, was a commemoration of this victory. He is said also, by Zosimus (ii, 86, ed. Bonn), to have constructed the port, by which we are, no doubt, to understand that he repaired and improved it after a time of comparative neglect. Passing by the dreadful massacre by Theodosius (Gibbon, *Rome*, ch. xxvii), we come to the Slavonic wars, of which the Gothic wars were only the prelude, and the brunt of which was successfully borne by Thessalonica from the middle of the 6th century to the latter part of the 8th. The history of these six Slavonic wars, and their relation to Thessalonica, has been elaborated with great care by Tafel.

In the course of the Middle Ages, Thessalonica was three times taken; and its history during this period is thus conveniently divided into three stages. On Sunday, July 29, 904, the Saracen fleet appeared before the city, which was stormed after a few days' fighting. The slaughter of the citizens was dreadful, and vast numbers were sold in the various slave-markets of the Levant. The story of these events is told by Jo. Cameniata, who was crossier-bearer to the archbishop of Thessalonica. From his narrative it has been inferred that the population of the city at that time must have been 220,000 (*De Excidio Thessalonicensi*, in the volume entitled *Theophanes Continuatus* of the Bonn ed. of the Byzantine writers [1838]). The next great catastrophe of Thessalonica was caused by a different enemy—the Normans of Sicily. The fleet of Tancred sailed round the Morea to the Thermaic gulf, while an army marched by the Via Egnatia from Dyrrhachium. Thessalonica was taken on Aug. 15, 1185, and the Greeks were barbarously treated by the Latins, whose cruelties are de-

scribed by Nicetas Choniates (*De Andron. Commeno*, p. 388, ed. Bonn, 1835). The celebrated Eustathius was archbishop of Thessalonica at this time; and he wrote an account of this capture of the city, which was first published by Tafel (Tüb. 1832), and is now printed in the Bonn ed. of the Byzantine writers (*De Thessalonica a Latinis Capta*, in the same vol. with Leo Grammaticus [1842]). Soon after this period follows the curious history of Western feudalism in Thessalonica under Boniface, marquis of Montferrat, and his successors, during the first half of the 13th century. The city was again under Latin dominion (having been sold by the Greek emperor to the Venetians), when it was finally taken by the Turks under Amurath II, in 1430. This event also is described by a writer in the Bonn Byzantine series (Joannes Anagnostes, *De Thessalonicensi Excidio Narratio*, in the same vol. with Phranzes and Cananus [1838]).

For the mediæval history of Thessalonica see Mr. Finlay's works, *Mediæval Greece* (1851), p. 70, 71, 135-147; *Byzantine and Greek Empires* (1853), i, 315-332; (1854), ii, 182, 264-266, 607. For its modern condition we must refer to the travellers, especially Beaujour, Cousinéri, Holland, and Leake.

IV. *Ecclesiastical History*.—The annals of Thessalonica are so closely connected with religion that it is desirable to review them in this aspect. After Alexander's death the Jews spread rapidly in all the large cities of the provinces which had formed his empire. Hence there is no doubt that, in the 1st century of the Christian æra, they were settled in considerable numbers at Thessalonica; indeed, this circumstance contributed to the first establishment of Christianity there by Paul (Acts xvii, 1). It seems probable that a large community of Jews has been found in this city ever since. They are mentioned in the 7th century, during the Slavonic wars; and again in the 12th, by Eustathius and Benjamin of Tudela. The events of the 15th century had the effect of bringing a large number of Spanish Jews to Thessalonica. Paul Lucas says that in his day there were 30,000 of this nation here, with 22 synagogues. More recent authorities vary between 10,000 and 20,000. The present Jewish quarter is in the south-east part of the town.

Christianity, once established in Thessalonica, spread from it in various directions, in consequence of the mercantile relations of the city (1 Thess. i, 8). During the succeeding centuries this city was the bulwark, not simply of the Byzantine empire, but of Oriental Christendom; and was largely instrumental in the conversion of the Slavonians and Bulgarians. Thus it received the designation of "The Orthodox City." It is true that the legends of Demetrius, its patron saint (a martyr of the early part of the 4th century), disfigure the Christian history of Thessalonica; in every siege success or failure seems to have been attributed to the granting or withholding of his favor; but still this see has a distinguished place in the annals of the Church. Theodosius was baptized by its bishop; even his massacre, in consequence of the stern severity of Ambrose, is chiefly connected in our minds with ecclesiastical associations. The see of Thessalonica became almost a patriarchate

after this time; and the withdrawal of the provinces subject to its jurisdiction from connection with the see of Rome, in the reign of Leo Isauricus, became one of the principal causes of the separation of East and West. Cameniata, the native historian of the calamity of 904, was, as we have seen, an ecclesiastic. Eustathius, who was archbishop in 1185, was, beyond dispute, the most learned man of his age, and the author of an invaluable commentary on the *Iliad* and *Odyssey*, and of theological works, which have been recently published by Tafel. A list of the Latin archbishops of Thessalonica from 1205 to 1418, when a Roman hierarchy was established along with Western feudalism, is given by Le Quien (*Oriens Christianus*, iii, 1089). Even to the last we find this city connected with questions of religious interest. Simeon of Thessalonica, who is a chief authority in the modern Greek Church on ritual subjects, died a few months before the fatal siege of 1430; and Theodore Gaza, who went to Italy soon after this siege, and, as a Latin ecclesiastic, became the translator of Aristotle, Theophrastus, and Hippocrates, was a native of the city of Demetrius and Eustathius.

V. *Connection with the Apostle Paul*.—Paul's visit to Thessalonica (with Silas and Timothy) occurred during his second missionary journey, and to this is due the introduction of Christianity into Thessalonica. Timothy is not mentioned in any part of the direct narrative of what happened at Thessalonica, though he appears as Paul's companion before at Philippi (Acts xvi, 1-13), and afterwards at Berea (xvii, 14, 15); but from his subsequent mission to Thessalonica (1 Thess. iii, 1-7; see Acts xviii, 5), and the mention of his name in the opening salutation of both epistles to the Thessalonians, we can hardly doubt that he had been with the apostle throughout.

Three circumstances must here be mentioned, which illustrate in an important manner this visit and this journey, as well as the two epistles to the Thessalonians, which the apostle wrote from Corinth very soon after his departure from his new Macedonian converts. (1.) This was the chief station on the great Roman road called the Via Egnatia, which connected Rome with the whole region to the north of the Ægean Sea. Paul was on this road at Neapolis (Acts xvi, 11) and Philippi (ver. 12-40), and his route from the latter place (xvii, 1) had brought him through two of the well-known minor stations mentioned in the Itineraries. See AMPHIPOLIS; APOLLONIA. (2.) Placed as it was on this great road, and in connection with other important Roman ways, Thessalonica was an invaluable centre for the spread of the Gospel. It must be remembered that, be-

Plan of Thessalonica.

sides its inland communication with the rich plains of Macedonia and with far more remote regions, its maritime position made it a great emporium of trade by sea. In fact, it was nearly, if not quite, on a level with Corinth and Ephesus in its share of the commerce of the Levant. Thus we see the force of what Paul says in his first epistle, shortly after leaving Thessalonica—*ἀφ' ὑμῶν ἐξήχηται ὁ λόγος τοῦ Κυρίου οὐ μόνον ἐν τῇ Μακεδονίᾳ καὶ ἐν τῇ Ἀχαΐᾳ, ἀλλ' ἐν παντὶ τόπῳ* (i, 8). (3.) The circumstance noted in Acts xvii, 1, that here was the synagogue of the Jews in this part of Macedonia, had evidently much to do with the apostle's plans, and also doubtless with his success. Trade would inevitably bring Jews to Thessalonica; and it is remarkable that, ever since, they have had a prominent place in the annals of the city.

The first scene of the apostle's work at Thessalonica was the synagogue. According to his custom, he began there, arguing from the ancient Scriptures (Acts xvii, 2, 3); and the same general results followed as in other places. Some believed, both Jews and proselytes, and it is particularly added that among these were many influential women (ver. 4); on which the general body of the Jews, stirred up with jealousy, excited the Gentile population to persecute Paul and Silas (ver. 5-10). It is stated that the ministrations among the Jews continued for three weeks (ver. 2); but we are not obliged to limit to this time the whole stay of the apostles at Thessalonica. A flourishing church was certainly formed there; and the epistles show that its elements were much more Gentile than Jewish. Paul speaks of the Thessalonians as having turned "from idols;" and he does not here, as in other epistles, quote the Jewish Scriptures. In all respects it is important to compare these two letters with the narrative in the Acts; and such references have the greater freshness from the short interval which elapsed between visiting the Thessalonians and writing to them. Such expressions as *ἐν θλίψει πολλῇ* (1 Thess. i, 6), and *ἐν πολλῇ ἀγῶνι* (ii, 2), sum up the suffering and conflict which Paul and Silas and their converts went through at Thessalonica (see also ver. 14, 15; iii, 3, 4; 2 Thess. i, 4-7). The persecution took place through the instrumentality of worthless idlers (*τῶν ἀγοραίων ἀνδράς τινάς πονηροῦς*, Acts xvii, 5), who, instigated by the Jews, raised a tumult. The house of Jason, with whom the apostles seem to have been residing, was attacked; they themselves were not found, but Jason was brought before the authorities on the accusation that the Christians were trying to set up a new king in opposition to the emperor; a guarantee (*τὸ ἱκανόν*) was taken from Jason and others for the maintenance of the peace, and Paul and Silas were sent away by night southward to Beroæ (Acts xvii, 5-10). The particular charge brought against the apostles receives an illustration from the epistles, where the *kingdom* of Christ is prominently mentioned (1 Thess. ii, 12; 2 Thess. i, 5). So, again, the doctrine of the resurrection is conspicuous both in Luke's narrative (xvii, 3) and in the first letter (i, 10; iv, 14, 16). If we pass from these points to such as are personal, we are enabled from the epistles to complete the picture of Paul's conduct and attitude at Thessalonica, as regards his love, tenderness, and zeal, his care of individual souls, and his disinterestedness (see i, 5; ii, 1-10). As to this last point, Paul was partly supported here by contributions from Philippi (Phil. iv, 15, 16), partly by the labor of his own hands, which he diligently practiced for the sake of the better success of the Gospel, and that he might set an example to the idle and selfish. (He refers very expressly to what he had said and done at Thessalonica in regard to this point; see 1 Thess. ii, 9; iv, 11; comp. 2 Thess. iii, 8-12.) See THESSALONIANS. To complete the account

of Paul's connection with Thessalonica, it must be noticed that he was certainly there again, though the name of the city is not specified, on his third missionary journey, both in going and returning (Acts xx, 1-3). Possibly he was also there again after his liberation from his first imprisonment. See Phil. i, 25, 26; ii, 24, for the hope of revisiting Macedonia, entertained by the apostle at Rome, and 1 Tim. i, 3; 2 Tim. iv, 13; Tit. iii, 12, for subsequent journeys in the neighborhood of Thessalonica.

Of the first Christians of Thessalonica, we are able to specify by name the above-mentioned Jason (who may be the same as the apostle's own kinsman mentioned in Rom. xvi, 21), Demas (at least conjecturally; see 2 Tim. iv, 10), Gaius, who shared some of Paul's perils at Ephesus (Acts xix, 29), Secundus (who accompanied him from Macedonia to Asia on the eastward route of his third missionary journey, and was probably concerned in the business of the collection; see xx, 4), and especially Aristarchus (who, besides being mentioned here with Secundus, accompanied Paul on his voyage to Rome, and had therefore probably been with him during the whole interval, and is also specially referred to in two of the epistles written during the first Roman imprisonment; see xxvii, 2; Col. iv, 10; Philem. 24; also Acts xix, 29, for his association with the apostle at Ephesus in the earlier part of the third journey).

VI. *Ancient Remains.*—The two monuments of greatest interest at Thessalonica are two arches connected with the line of the Via Egnatia. The course of this Roman road is undoubtedly preserved in the long street which intersects the city from east to west. At its western extremity is the Vardár gate, which is nearly in the line of the modern wall, and which has received its present name from the circumstance of its leading to the river Vardár, or Axios. This is the Roman arch believed by Beaujour, Holland, and others to have been erected by the people of Thessalonica in honor of Octavius and Antonius, and in memory of the battle of Philippi. The arch is constructed of large blocks of marble, and is about twelve feet wide and eighteen feet high; but a considerable portion of it is buried deep below the surface of the ground. On the outside face are two bas-reliefs of a Roman wearing the toga and standing before a horse. On this arch is the above-mentioned inscription containing the names of the *politarchs* of the city. Leake thinks from the style of the sculpture, and Tafel from the occurrence of the name Flavius in the inscription, that a later date ought to be assigned to the arch (a drawing of it is given by Cousinery). The other arch is near the eastern (said in Clarke's *Travels*, iv, 359, by mistake, to be near the western) extremity of the main street. It is built of brick and

Triumphal Arch of Constantine at Thessalonica.

faced with marble, and formerly consisted of three archways. The sculptured camels give an Oriental aspect to the monument; and it is generally supposed to commemorate the victory of Constantine over Licinius or over the Sarmatians.

Near the line of the main street, between the two above-mentioned arches, are four Corinthian columns supporting an architrave, above which are caryatides. This monument is now part of the house of a Jew; and, from a notion that the figures were petrified by magic, it is called by the Spanish Jews *Las Incantadas*. The Turks call it *Sureth-Maleh*. (A view will be found, with architectural details, in Stuart and Revett, *Athen. Antiq.* iii, 53). This colonnade is supposed by some to have been part of the Propylæa of the Hippodrome, the position of which is believed by Beaujour and Clarke to have been in the south-eastern part of the town, between the sea and a building called the *Rotunda*, now a mosque, previously the church *Eski-Metropoli*, but formerly a temple, and in construction similar to the Pantheon at Rome. Another mosque in Thessalonica, called *Eski-Jumâ*, is said by Beaujour to have been a temple consecrated to Venus Thermæa. The city walls are of brick, and of Greek construction, resting on a much older foundation, which consists of hewn stones of immense thickness. Everywhere are broken columns and fragments of sculpture. Many remains were taken in 1430 to Constantinople. One of the towers in the city wall is called the Tower of the Statue, because it contains a colossal figure of Thessalonica, with the representation of a ship at its feet. The castle is partly Greek and partly Venetian. Some columns of verd antique, supposed to be relics of a temple of Hercules, are to be noticed there, and also a shattered triumphal arch, erected (as an inscription proves) in the reign of Marcus Aurelius, in honor of Antoninus Pius and his daughter Faustina.

In harmony with what has been noticed of its history, Thessalonica has many remains of ecclesiastical antiquity. Leake says that in this respect it surpasses any other city in Greece. The church of greatest interest (now a mosque) is that of St. Sophia, built, according to tradition, like the church of the same name at Constantinople, in the reign of Justinian, and after the designs of the architect Anthemius. This church is often mentioned in the records of the Middle Ages, as in the letters of pope Innocent III, and in the account of the Norman siege. It remains very entire, and is fully described by Beaujour and Leake. The Church of St. Demetrius (apparently the third on the same site, and now also a mosque) is a structure of still greater size and beauty. Tafel believes that it was erected about the end of the 7th century; but Leake conjectures, from its architectural features, that it was built by the Latins in the 13th. Tafel has collected with much diligence the notices of a great number of churches which have existed in Thessalonica. Dapper says that in his day the Greeks had the use of thirty churches. Walpole (in Clarke's *Travels*, iv, 849) gives the number as sixteen. All travellers have noticed two ancient pulpits, consisting of "single blocks of variegated marble, with small steps cut in them," which are among the most interesting ecclesiastical remains of Thessalonica.

VII. *Authorities*.—The travellers who have described Thessalonica are numerous. The most important are Lucas, *Second Voyage* (1705); Pococke, *Description of the East* (1743-45); Beaujour, *Tableau du Commerce de la Grèce*, translated into English (1800); Clarke, *Travels in Europe*, etc. (1810-23); Holland, *Travels in the Ionian Isles*, etc. (1815); Cousinier, *Voyage dans la Macédoine* (1831); Leake, *Northern Greece* (1835); Zachariæ, *Reise in dem Orient* (1840); Griesbach, *Reise durch Rumelien* (1841); Bowen, *Mount Athos, Thessaly, and Epirus* (1852); Dodd, in the *Biblioth. Sacra*, xi, 830; xviii, 845.

In the *Mémoires de l'Académie des Inscriptions*, tom. xxxviii, *sect. Hist.* p. 121-146, is an essay on the subject

of Thessalonica by the abbé Belley. But the most elaborate work on the subject is that by Tafel, *Hist. Thessalonica usque ad A.D. 904*, the first part of which was published at Tübingen in 1835; this was afterwards reprinted as Prolegomena to the *Dissertatio de Thessalonica ejusque Agro Geographica* (Berl. 1839). With this should be compared his work on the *Vin Egmatis*. To these authorities we ought to add the introduction to some of the commentaries on Paul's *Epistles to the Thessalonians*—especially those of Koch (ibid. 1849) and Lünemann (Gött. 1850). The early history of the Thessalonian Church is discussed by Burgerhoudt, *De Cætu Chr. Thessal., Ortu, Fatusque* (Leid. 1825). A good description of the modern place is given in Murray's *Handbook for Greece*, p. 455.

**Theu'das**, a person incidentally mentioned but once in the New Test. (Acts v, 36), and concerning whom much controversy has arisen.

I. *The Name*.—This, in the original, is Θεῦδας (a form which likewise occurs in Josephus, *Ant.* xx, 5, 1), and, if Greek, may be for Θεῦδας, as a contraction of Θεῦδοτος or Θεῦδωρος, i. e. *God-given* = Johanan (comp. Vulg. *Theodas*). A similar form, Θεῦδας, occurs in Diogenes Laert. ix, 116. If Hebrew (Simonis, *Onomast. N. T.* p. 72), it may be תודיס, *praise*. The Mishna has a similar form, תודיס (Bechor. iv, 4).

II. *Scriptural Statement*.—According to Luke's report of Gamaliel's speech before the Jewish Sanhedrim, on the occasion of the first arraignment of the apostles (A.D. 29), Theudas was the leader of a popular tumult some time previously (πρὸ τούτων τῶν ἡμερῶν) (Acts v, 34-36). He is spoken of as a religious impostor of high pretensions (λέγων εἶναι τινα ταυρόν), to whom a considerable body of adherents (ἀνδρῶν ἀριθμὸς ὡς τετρακοσίων) closely attached themselves (προσκολλήθη, προσεβλήθη, A. B.), but who was ultimately slain (ἀντρείθη), and his party annihilated (ἐγένοντο εἰς οὐδέν). Gamaliel, it appears, was counselling prudent and temperate measures towards the apostles. Previous well-known examples, he said, had made it plain that the leaders of a bad cause would soon bring all to ruin, while those of a different kind would be sure to succeed. The first case he appeals to is that of Theudas, as above recited. He then goes on to notice the case of Judas of Galilee, who rose after Theudas in the days of the taxing, and after collecting a considerable band was defeated and slain. Now there can be no doubt that the Judas here spoken of was the Judas Gaulonites of Josephus, or Judas the Galilean, who, in the time of Cyrenius, raised a disturbance by opposing the census then ordered to be taken by the Roman government, and was cut off (Josephus, *Ant.* xviii, 1, 2; *War*, ii, 12). Thus far there is no difficulty; it is only by a comparison of contemporaneous history that a discrepancy is alleged as arising.

III. *Adjustment of the Account with Josephus*.—No insurgent of this name is mentioned by the Jewish historian at the period to which Gamaliel must refer, but he gives statements of several somewhat similar occurrences about that time.

1. A religious impostor (γῶγς τις ἀνὴρ) named Theudas is described by him as having raised a strikingly analogous commotion in the reign of Claudius, when Cuspius Fadus was procurator of Judea. Josephus's account of the matter (*Ant.* xx, 5, 1) is that this fanatic, laying claim to prophetic powers, persuaded a very large body (τὸν πλείστον ὄχλον) to follow him to the Jordan, taking their effects along with them, with the assurance that the waters would divide before him as they had done before Elijah and Elisha in the days of old; but being unexpectedly attacked by a squadron of cavalry sent out after him by Fadus, his followers were killed or taken prisoners, and the leader himself, being taken, was beheaded. The reign of Claudius and the procuratorship of Fadus fix this incident at about A.D. 44, i. e. some fifteen years later than the delivery of Gama-

liel's speech; and some forty after the scriptural event, since Luke places his Theudas, in the order of time, before Judas the Galilean, who made his appearance soon after the dethronement of Archelaus, i. e. A.D. 6 or 7 (Josephus, *War*, ii, 8, 1; *Ant.* xviii, 1, 6; xx, 5, 2).

Now, if we are to regard it as certain that there was only one Jewish insurgent named Theudas, it follows that either Luke or Josephus must be guilty of a chronological blunder. The hypothesis that Josephus has misplaced Theudas, though not impossible, and maintained by Michaelis (*Einleit. in N. T.* i, 63) and Jahn (*Archæol.* ii, 2), is a way of cutting the knot which no unbiassed critic would desire to resort to. That the error is Luke's, though taken for granted by most modern German critics (Eichhorn, De Wette, Credner, Meyer, Baur, etc.), is even more improbable when we take into account the great historical accuracy of his narrative, which closer researches are continually placing in a stronger light, and the date of the publication of the Acts. (It may not be amiss to remind the reader of some fine remarks, in illustration of Luke's historical accuracy, in Tholuck's *Glaubwürdigkeit der evang. Geschichte*, p. 161-177, 375-389. See also Ebrard, *Evangelische Kritik*, p. 678 sq.; and Lechler, *Das Apostolische Zeitalter*, p. 6 sq.) Few things are, therefore, less credible than that a careful author like Luke, writing within a few years of the event, should have been betrayed into such a glaring historical mistake as antedating the insurrection of Theudas by nearly half a century. That he should have done this by an intentional *prolepsis*, as is supposed by some (Vales. *Ad Euseb. H. E.* ii, 11), is as completely at variance with the simplicity and unartistic character of his narrative. It is the height of injustice to charge that the writer of the Acts either fabricated the speech put into the mouth of Gamaliel, or that he carelessly or surreptitiously wrought into it a transaction which took place forty years or more after the time when it is said to have occurred (see Zeller, *Die Apostelgeschichte*, p. 132 sq.).

But without resorting to either of these violent methods, the difficulty may be solved with perfect satisfaction by the simple hypothesis that there were two insurgents of the same name. Since Luke represents Theudas as having preceded Judas the Galilean (q. v.), it is certain that he could not have appeared later, at all events, than the latter part of the reign of Herod the Great. The very year, now, of that monarch's death was remarkably turbulent; the land was overrun with belligerent parties, under the direction of insurrectionary chiefs or fanatics (*ἔτερα μὲν ἰσχυρὰ ἐχόμενα τὴν Ἰουδαίαν κατελάμβανε*, Josephus, *Ant.* xvii, 12, 4). The whole of these, with three exceptions, are passed over by Josephus without particularizing their leaders, so that it need create little surprise that one in which comparatively so small a number were concerned (Gamaliel's 400 can hardly be made to tally with Josephus's *πλείους ὄχλος*) should have been omitted by him, or spoken of in equally general terms. The name Theudas was one of no unfrequent occurrence (see above), while the fact that there were as many as three impostors of the name of Simon (Josephus, *Ant.* xvii, 12, 6; xx, 4, 2), besides Simon Magus, and as many Judases (*ibid.* xvii, 12, 5; *War*, i, 33, 2-4), mentioned by Josephus in the space of about ten years increases the probability that there may have been two named Theudas in the space of forty years. This mode of reconciling Luke with Josephus, which has commended itself to such critics as Beza, Scaliger, Casaubon, and Bengel, in earlier times, and Kuinöl, Olshausen, Winer, and Ebrard, in later days, is ably supported by Anger (*De Temp. in Act. Apost. Ratione*, p. 185), and also by Lardner (*Credibility*, i, 404-414), who remarks that "it is not at all strange that there should be two impostors in Judæa of the same name in the compass of forty years, and that they should come to the same end; on the contrary, it is strange that any learned man should find this hard to believe." So impartial a witness as Jost, the histo-

rian of the Jews (*Geschichte der Israeliten*, ii, Anh. p. 76), admits the reasonableness of such combinations, and holds in this case to the credibility of Luke, as well as that of Josephus. Moreover, Josephus was by no means infallible, as Strauss and critics of his school may almost be said to take for granted; and it is possible certainly (this is the position of some) that Josephus himself may have misplaced the time of Theudas, instead of Luke, who is charged with that oversight. Calvin's view that Judas the Galilean appeared not *after*, but *before*, Theudas (*μετὰ τοῦτον=insuper vel præterea*), and that the examination of the apostles before the Sanhedrim occurred in the time of Claudius (contrary to the manifest chronological order of the Acts), deserves mention only as a waymark of the progress which has been made in Biblical exegesis since his time.

2. Another explanation (essentially different only as proposing to identify the person) is that Luke's Theudas may have been one of the three insurgents whose names are mentioned by Josephus in connection with the disturbances that took place about the time of Herod's death. Sonntag (*Theol. Stud. u. Kritik*, 1837, p. 622, etc.; translated in the *Biblioth. Sacra*, 1848, p. 409 sq.) has advanced this view, and supported it with much learning and ability. He argues that the Theudas referred to by Gamaliel is the individual who occurs in Josephus under the name of *Simon* (*War*, ii, 4, 2; *Ant.* xvii, 10, 6), a slave of Herod, who attempted to make himself king amid the confusion which attended the vacancy of the throne when that monarch died. He urges the following reasons for that opinion: first, this Simon, as he was the most noted among those who disturbed the public peace at that time, would be apt to occur to Gamaliel as an illustration of his point; secondly, he is described as a man of the same lofty pretensions (*εἶναι ἀξίως ἰστίας παρ' ὀντινούν=εἶναι εἰναί τινα ἑαυτὸν*); thirdly, he died a violent death, which Josephus does not mention as true of the other two insurgents; fourthly, he appears to have had comparatively few adherents, in conformity with Luke's *ὥσπερ τετρακοσίων*; and, lastly, his having been originally a slave accounts for the twofold appellation, since it was very common among the Jews to assume a different name on changing their occupation or mode of life. It is very possible, therefore, that Gamaliel speaks of him as Theudas because, having borne that name so long at Jerusalem, he was best known by it to the members of the Sanhedrim; and that Josephus, on the contrary, who wrote for Romans and Greeks, speaks of him as Simon because it was under that name that he set himself up as king, and thus acquired his foreign notoriety (see Tacit. *Hist.* v, 9).

3. Wieseler (*Chron. Synops. of Gospels*, transl. p. 90-92) considers Luke's Theudas to have been the same with *Matthias* or Matthew, the son of Margaloth (*Matthias=מַתְתִּיָּא* being the Hebrew form of *Θεόδοτος=Θευδάς*), of whom Josephus (*Ant.* xvii, 6, 2-4) gives a detailed account as a distinguished teacher among the Jews, who, in the latter days of Herod the Great, raised a band of his scholars to effect a social reform in the spirit of the old Hebrew constitution, by "destroying the heathen works which the king had erected contrary to the law of their fathers." A large golden eagle, which the king had caused to be erected over the great gate of the Temple, in defiance of the law that forbids images or representations of any living creatures, was an object of their special dislike, which, on hearing a false report that Herod was dead, Matthias and his companions proceeded to demolish; when the king's captain, supposing the undertaking to have a higher aim than was the fact, came upon the riotous reformers with a band of soldiers, and arrested the proceedings of the multitude. Dispersing the mob, he apprehended forty of the bolder spirits, together with Matthias and his fellow-leader Judas. Matthias was burned. Now, had we used the term Theudas for the term Matthias,

the reader would at once have seen that what we have just given from the more minute narrative of Josephus is only a somewhat detailed statement of the facts of which Gamaliel gave a brief summary before the Sanhedrim. The chronological difficulty then disappears. Matthias, or Theudas, appeared "before these days," before Judas of Galilee, and before the census; he appeared, that is, some four years anterior to the birth of our Lord.

4. Other identifications are those of Usher (*Ann. p. 797*) and Zuschlag, who regard Theudas as the same person with Judas the robber (Josephus, *Ant. xvii, 10, 5*), or with *Theudion* (*ibid. 4, 2*). Such attempts arise from an unwillingness to acquiesce in the fragmentary character of the annals of the period, and are simply curious as efforts of ingenuity.

IV. *Literature.*—Among the works, in addition to those already mentioned, which discuss this question or touch upon it are the following: Casaubon, *Exercit. Antibar. ii, 18*; Neander, *Geschichte der Pflanzung, i, 75, 76*; Heinrichs, *Exerc. ad Act. ii, 375*; Guericke, *Beiträge zur Einleit. ins N. Test. p. 90*; Baumgarten, *Apostelgeschichte, i, 114*; Lightfoot, *Hor. Heb. ii, 704*; Biscoe, *History of the Acts, p. 428*; Wordsworth, *Commentary, ii, 26*; and the monographs *De Theuda* by Gros (Viteb. 1697), Kling (Hafn. 1714), and Scheuffelhut (Lips. 1774).

**Theurgists**, those mystics who claim to hold converse with the world of spirits, and to have the high power and prerogative of working miracles, not by magic, but by supernatural endowment. Among these may be mentioned Apollonius of Tyana, Peter of Alcantara, and the large company of Romish saints.

**Theurgy** (*Θεουργία, divine work*) is the science concerning the gods and the various classes of superior spirits, their appearing to men and their operations; and the art, by means of certain acts, habits, words, and symbols, of moving the gods to impart to men secrets which surpass the powers of reason, to lay open to them the future, and to become visible to them. These communications were claimed as being held with the inferior orders of supernatural beings, with whom men rose to converse by the power of purificatory rites and by the possession of science. Magic of this kind was considered to be a divine work, as its name clearly shows, and its action entirely beneficent. The theurgical system attained perfection among the Neo-Platonists of the Alexandrian school, particularly those of the last epoch, and the propensity to dæmonological rites which was already marked in the time of Porphyry triumphed completely under Proclus. The magic of ancient Egypt was quite theurgic in origin and doctrine, and we cannot deny that the reveries of the later Neo-Platonists are in a great measure due to its influence; although it did not take the place of all other worship, being considered inferior to the official religion, and not formally recognised as a rite. See Lenormant, *Chaldean Magic*, p. 74 sq.

**Thevet, André**, a writer of some note in the 16th century, was born at Angoulême, France, and entered the Franciscan Order, and afterwards visited Italy, the Holy Land, Egypt, Greece, and Brazil. On his return to France, in 1556, he quitted the Cordelier's habit, took that of an ecclesiastic, and was appointed almoner to queen Catherine de Médicis. He had the titles of historiographer of France and cosmographer to the king, and received the profits of these offices. He died Nov. 23, 1590, leaving *Cosmographie du Levant* (Lyons, 1554, 4to);—*A History of Illustrious Men* (1671, 8 vols. 12mo; or 1684, 2 vols. fol.);—*Singularités de la France Ant-arctique* (Paris, 1558, 4to); and other works.

**Thiard, Cyrus de**, a French prelate, became bishop of Chalon-sur-Saône, Feb. 20, 1594, and assisted at the States-General held in Paris in 1614, having received by letters-patent, Aug. 13, 1602, the right to represent Dijon. He died Jan. 3, 1624, leaving only a *Pastoral* addressed to his clergy (Chalon, 1605).

**Thiard, Henri de**, cardinal of Bissy, was born May 25, 1657, and at the age of twelve received the abbey of Noaille, in reward for his father's services to Louis XIV. He was educated at the Jesuit College of Dijon and at the Sorbonne, and was made doctor of theology in the latter. In 1687 he was named as bishop of Ioul, but was not consecrated until 1692. In 1697 he was offered the archbishopric of Bordeaux, but declined; and soon afterwards was given the abbey of Trois-Fontaines and Saint-Germain, and the bishopric of Meaux. He was raised to the cardinalate May 29, 1715. Other papal honors were subsequently conferred upon him. He died in Paris, July 26, 1737, having published numerous ecclesiastical works, for which see Hoefer, *Novv. Biog. Générale*, s. v.

**Thibaud**, archbishop of Canterbury, of whose family nothing is known, was first made abbot of Bec after the year 1136, and soon after was called to England, where we find him raised to the see of Canterbury in 1139. Under the influence of Thomas à Becket, Thibaud espoused the cause of the pope in the quarrels with the king of England, and was therefore treated by the latter as a public enemy. He escaped to St. Omer, but was afterwards imprisoned by Eustachius for refusing to crown the son of the latter. Some time after 1153 he was restored to his diocese by the duke of Normandy, and died April 18, 1161, leaving a number of *Letters*. See Hook, *Lives of the Archbishops of Canterbury*, s. v.

**Thibet, RELIGION OF.** The religion of Buddha was introduced into Thibet under king Srongstan Gampo, in A.D. 617–698, by priests from Sinde. These priests brought with them the art of writing, and translated the sacred books of the Indian Buddhists into Thibetan, and their monasteries became the centres of learned education and professional skill. In the 11th century, the Bumpa religion (the old worship of evil dæmons) was once more established, but after eighty years the Buddhist priests again came into power. These priests, in the 14th century, had become mere jugglers; and then arose a reformer, the monk Tsoukhapa, born in 1355, in the district of Amdo, where is now the famous monastery of Kunbum. He opposed the tricks and pretended miracles of charlatanism, and undertook the task of uniting and reconciling the dialectical and mystical schools of Thibetan Buddhism. His innovations were never universally acknowledged. In the 15th century, Gedun-Dub, provost of a large monastery, claimed to be an incarnation of Buddha, and assumed the title of the "very costliest teacher ocean." The Mongols called him Gyas-to, or Dalai Lama, the "priest ocean," and thus was inaugurated Lamaism (q. v.), which became the established religion of the country. The election of the grand lama, although by lot, has been so managed as to prevent any child from being elected which might be disagreeable to the Chinese government. The last election took place in 1875, and a child from the western boundary, towards Ladak, was elected, which seems to indicate a decrease of the Chinese influence. Thibet is greatly oppressed by its ecclesiastical system. The number of monasteries and monks is almost incredible. Eighteen thousand live in and around Lassa; on an average every thirteenth, and in some places every seventh, man is a monk, and must be provided for by others. The poverty of the people is very great, their moral depravity still greater. Between 1854 and 1864 some French missionaries attempted to establish a Roman Catholic station at Bonga, in South-eastern Thibet, but were violently assailed by the lamas, and, unprotected by the Chinese authorities, they were obliged to leave. All other efforts to introduce Christianity have also failed; indeed, so jealous of Europeans are the authorities that they are rarely even admitted into the country. See LAMAISM.

**Thibetan Version.** The vast and mountainous tract of country in which the Thibetan language is spoken lies directly north of Hindustan, from which it

is separated by the Himalaya Mountains. Its eastern frontiers border on China; to the west it extends as far as Cashmere, Afghanistan, and Turkestan; while on the north it is bounded by the countries of the Turks and the Mongols. It is, for the most part, comprised within the Chinese empire; the western parts, however, appear to be independent of China. On account of the extreme jealousy of the Chinese government, Thibet has hitherto been almost inaccessible to foreigners, and our knowledge of the country is in consequence extremely limited.

In 1816 an attempt was made by the Church Missionary Society to furnish the Thibetans with a version of the Scriptures in their own language, but, unhappily, this important undertaking ultimately proved abortive. The matter rested until the year 1843, when Dr. Häberlin, an agent of the British and Foreign Bible Society, after journeying through Thibet, again forced the necessity of a Thibetan version upon the attention of Christian societies. Dr. Häberlin states, as the result of his observations and inquiries in Thibet, that "as far as the Thibetan language is spoken and the Lamas have any sway, so far literature exercises an important influence on the people. If there were a version of the Scriptures in the Thibetan language, thousands of volumes might annually be sent into the interior of Asia from five different points along the immense frontier of British India; and the millions of people speaking that language, and inquisitive as the Chinese are, might thus have a profitable opportunity of being made acquainted with the things that belong to their salvation." In spite of this encouraging fact, the object advocated by Dr. Häberlin moved very slowly, for not until 1856 do we read of an effort made towards translating the Gospel of St. Matthew, which in 1863 was published by the Moravian Mission at Khyelang. About the same time, a Bible society for the Punjab, with its headquarters at Lahore, was formed, and one of the projects entertained by that society was the translation of the Scriptures into the Thibetan, which had already been commenced by Moravian missionaries. The difficulties, however, were very great, and the work of translation was naturally very slow. Hence we need not be surprised that about five years after the publication of the Gospel of St. Matthew those of John and Mark were published, while up to date the New Test. has not yet been completed. See *Bible of Every Land*, p. 20 sq. (B. P.)

**Thief** (צָנִיף, κλέπτης). Among the Hebrews, the restitution that was required in case of theft was double the amount taken (Exod. xx, 3-8). If a sheep, however, was stolen, and had been slain or sold, fourfold was required; or if an ox, a fivefold restitution was to be made. The reason of this distinction was that sheep, being kept in the desert, were more exposed than other animals to be stolen; and oxen, being so indispensably necessary in an agricultural community, could not be taken from their owners without great injury and peculiar aggravation (xxii, 1). In case the thief was unable to make the restitution demanded by the law, he was sold, with his wife and children, into servitude (ver. 3; 2 Sam. xii, 6; 2 Kings iv, 1; comp. Gen. xlv, 17). In later times, the fine is thought by some to have been increased (Prov. vi, 30, 31). Whoever slew a thief who was attempting to break a house at night, i. e. any hour before sunrise, was left unpunished, since he did not know but that the thief might have a design upon his life, and he was unable also, owing to the darkness, to identify and thereby bring him to justice (Exod. xxii, 2). See **THEFT**.

"Men do not despise a thief," says Solomon, "if he steal to satisfy his soul when he is hungry. But if he be found, he shall restore sevenfold; he shall give all the substance of his house" (Prov. vi, 30, 31). Bishop Hall is of opinion that Solomon, in this passage, does not so much extenuate the crime of theft as point out the greater criminality of adultery; but we have abundant evidence that theft, unaccompanied by violence, was

viewed more leniently by ancient than by modern legislators. Wilkinson says, "The Egyptians had a singular custom respecting theft and burglary. Those who followed the profession of thief gave in their name to the chief of the robbers, and agreed that he should be informed of everything they might thenceforward steal the moment it was in their possession. In consequence of this, the owner of the lost goods always applied by letter to the chief for their recovery; and having stated their quality and quantity, the day and hour when they were stolen, and other requisite particulars, the goods were identified, and on payment of one quarter of their value they were restored to the applicant in the same state as when taken from his house; for, being fully persuaded of the impracticability of putting an entire check to robbery, either by the dread of punishment or by any other method that could be adopted by the most vigilant police, they considered it more for the advantage of the community that a certain sacrifice should be made, in order to secure the restitution of the remainder, than that the law, by taking on itself to protect the citizen and discover the offender, should be the indirect cause of greater loss; and that the Egyptians, like the Indians, and, I may say, the modern inhabitants of the Nile, were very expert in the art of thieving, we have abundant testimony from ancient authors" (*Anc. Egyptians*, ii, 216). See **STEAL**.

The criminals who were crucified with our Lord appear to have been, not "thieves" in the ordinary sense of the word, but rather public robbers or highwaymen (ῥοῦφῆς is carefully distinguished from κλέπτης, John x, 8), i. e. fellow-insurgents with Barabbas; for it is said that he "lay bound with them that had made insurrection with him in the city, who had committed murder in the insurrection" (Mark xv, 7). These malefactors, as bishop Maltby has well observed, "were not thieves who robbed all for profit, but men who had taken up arms on a principle of resistance to the Roman oppression, and to what they thought an unlawful burden, the tribute-money; who made no scruple to rob all the Romans, and when engaged in these unlawful causes made less difference between Jews and Romans than they at first meant to do" (*Sermons* [1819-22], vol. i). See **ROBBER**.

**Thiemon**, otherwise **DIETHMAR**, a Bavarian prelate and artist, was born of noble parentage about 1045. Agreeably to the custom of his time, he was as well versed in mechanics as in the fine arts. He executed many works in painting and sculpture for the churches, particularly for the Church of St. Blaise, near Ems. In 1079 he was appointed abbe of the diocese of Salzburg, and in 1090 was chosen archbishop of that city. He started for the Holy Land about 1099, and is said to have been taken prisoner by the infidels, who, learning of his skill in sculpture, commanded him to restore the arms of a brazen idol. Refusing to do so on account of religious scruples, he was put to death, in 1101. See Spooner, *Biog. Hist. of the Fine Arts*, s. v.

**Thiermes** (or **Tiermes**), in the mythology of the Laplanders, was the son of the devil by a Lapland girl. The latter was sitting upon the ground under a tree, when Perkel (the devil), disguised as a stranger, came to her, and asked her to hang her fur coat upon a bundle of wood. This she complied with, but suddenly the bundle of wood began to burn, and she, vainly endeavoring to escape his embraces, became his victim. The child was removed to the highest heaven, and was there questioned as to whose child it desired to be, the father's or the mother's. It decided in favor of the mother, after which the high ruler made of it a god of thunder. As such, pursued by its father, it flies about in the heavens, thundering and lightening, now uprooting trees, again splitting rocks, doing good and evil. The Laplanders have a poorly developed worship of the deities. Thus, it seems, there can be accredited to Thiermes only a general worship.

**Thiers, JEAN BAPTISTE**, a French divine, was born at Chartres, Nov. 11, 1636. He was professor at the Collège du Plessis in Paris, and was, in 1666, appointed to the incumbency of Champrond in Gastine (Chartres). Here he came in conflict with the archdeacon of Chartres, and went to Ribraye (Meuse), where he died, Feb. 28, 1703. He wrote, *De Fætorum Dierum Imminutione* (Lyons, 1668), which was placed on the Index "donec corrigatur."—*Traité de l'Exposition du S. Sacrement de l'Autel* (Paris, 1673).—*Traité des Superstitions selon l'Écriture Sainte* (ibid. 1679).—*Dissert. sur la Sainte Larme de Vendôme* (ibid. 1696), against which Mabillon wrote a rejoinder, *Lettre d'un Bénédictin à Mgr. de Blois* (ibid. 1700). Against the priesthood he wrote, *L'Avocat des Pauvres* (ibid. 1676).—*Histoire des Peruques* (ibid. 1690). He also wrote some historical works, for which see Nicéron, *Mémoires pour Servir*, etc., vol. xi.; Dupin, *Nouvelle Bibliothèque*, vol. xix.; *Theolog. Universal-Lex.* s. v.; Hoefer, *Nouv. Biog. Générale*, s. v. (B. P.)

**Thiess, JOHANN O.**, a German doctor of theology, was born Aug. 15, 1762, at Hamburg. For a number of years he lectured at the University of Kiel, retiring in 1805. He died Jan. 7, 1810. He wrote, *Handbuch d. neueren bes. deutschen u. protest. Literat. d. Theol.* (Leips. 1795-97, 2 vols.).—*Neuer krit. Commentar über das N. T.* (pt. i, ii, *Die Evangel. der Apostel und Jesus* [Halle, 1804-6]).—*Vorlesungen über die Moral* (Gera, 1810).—*Fundamenta Theol. Christ. Critico-dogmaticæ* (Lips. 1792).—*A Commentary on 2 Thess.* ii, 1-12 and *John x*, 12-16 (Kiel, 1809).—*Ueber die bibl. und kirchl. Meinung von der Ewigkeit der Höllestrafen* (Hamb. 1791).—*Ueber die Magier und ihren Stern* (ibid. 1794).—*Einleitung in die neuere Gesch. der Religion, der Kirche u. der theol. Wissenschaften* (ibid. 1740, 1796; Sleswick, 1797), etc. See Winer, *Handb. der theol. Literatur*, i, 6, 172, 237, 290, 294, 358, 478, 555, 580, 857, 868; ii, 31, 59, 92, 125, 126, 331, 360, 366; Fürst, *Bibl. Judaica*, iii, 422. (B. P.)

**Thietmar**, a noble Saxon belonging to the family of Waldeck, and related to the imperial house, was born July 25, 976. In 989 he became canon of St. Maurice, and in 1002 provost of Waldeck, which his grandfather had founded. In 1009 he was made bishop of Merseburg, and in 1018 he died. He wrote a chronicle, with the purpose of transmitting to his successors in the bishopric a history of Merseburg; but the work grew into a history of the German State and of the neighboring Germanic and Slavonic countries. It is the most important of accessible sources for the time of the later emperors, since its statements cover almost the whole of the 10th century, and are largely the reports of what the author himself saw and knew. The book is deficient in point of literary excellences, but is characterized by abundance of matter and truthfulness of spirit. It is as important for the illustration of manners and customs in the days of the Saxon emperors as for the statement of historical events.

*Literature.*—Lappenberg's preface to *Mon. Germ. Hist.* vol. iii of *Scriptt.*; Giesebrecht, in *Ranke's Jahrb.* II, i, 156-163, and *Gesch. der Kais.* i, 746, 780; ii, 517, 547 sq.; Wattenbach, *Geschichtsquellen Deutschlands im Mittelalter*, p. 181 sq.; Maurenbrecher, *De Hist. Decimi Scæculi Scriptt.* (Bonn, 1861); Lappenberg, ed. of Thietmar's *Chronik* in *Mon. Germ. Hist.* iii, 733-871. See also Hall, *Allgem. Lit.-Zeitung*, 1849, Nos. 204-206.—Herzog, *Real-Encyclop.* s. v.

**Thieves, THE TWO, ON THE CROSS** (Matt. xxvii, 38-44; Mark xv, 27; Luke xxiii, 39-43; comp. John xviii, 40). The men who under this name appear in the history of the crucifixion were robbers (*λῃσται*) rather than thieves (*κλεπται*), belonging to the lawless bands by which Palestine was at that time and afterwards infested (Josephus, *Ant.* xvii, 10, 8; xx, 8, 10). Against these brigands every Roman procurator had to wage continual war (Josephus, *War*, ii, 13, 2). The

parable of the Good Samaritan shows how common it was for them to attack and plunder travellers even on the high-road from Jerusalem to Jericho (Luke x, 30). It was necessary to use an armed police to encounter them (xxii, 52). Often, as in the case of Barabbas, the wild robber life was connected with a fanatic zeal for freedom which turned the marauding attack into a popular insurrection (Mark xv, 7). For crimes such as these the Romans had but one sentence. Crucifixion was the penalty at once of the robber and the rebel (Josephus, *War*, ii, 13, 2).

Of the previous history of the two who suffered on Golgotha we know nothing. They had been tried and condemned, and were waiting their execution before our Lord was accused. It is probable enough, as the death of Barabbas was clearly expected at the same time, that they were among the *συνασται* who had been imprisoned with him, and had taken part in the insurrection in which zeal, and hate, and patriotism, and lust of plunder were mingled in wild confusion.

They had expected to die with Jesus Barabbas (q. v.). They find themselves with one who bore the same name, but who was described in the superscription on his cross as Jesus of Nazareth. They could hardly fail to have heard something of his fame as a prophet, of his triumphal entry as a king. They now find him sharing the same fate as themselves, condemned on much the same charge (Luke xxiii, 5). They too would bear their crosses to the appointed place, while He fainted by the way. Their garments would be parted among the soldiers. For them also there would be the drugged wine, which He refused, to dull the sharp pain of the first hours on the cross. They catch at first the prevailing tone of scorn. A king of the Jews who could neither save himself nor help them, whose followers had not even fought for him (John xviii, 36), was strangely unlike the many chieftains whom they had probably known claiming the same title (Josephus, *Ant.* xvii, 10, 8), strangely unlike the "notable prisoner" for whom they had not hesitated, it would seem, to incur the risk of bloodshed. But over one of them there came a change. The darkness which, at noon, was beginning to steal over the sky awed him, and the divine patience and silence and meekness of the sufferer touched him. He looked back upon his past life, and saw an infinite evil. He looked to the man dying on the cross beside him, and saw an infinite compassion. There, indeed, was one unlike all other "kings of the Jews" whom the robber had ever known. Such a one must be at that he had claimed to be. To be forgotten by that King seems to him now the most terrible of all punishments; to take part in the triumph of his return, the most blessed of all hopes. The yearning prayer was answered, not in the letter, but in the spirit. To him alone, of all the myriads who had listened to him, did the Lord speak of Paradise (q. v.), waking with that word the thoughts of a purer past and the hopes of an immediate rest. But his joy was to be more than that of fair groves and pleasant streams. "Thou shalt be with me." He should be remembered there.

We cannot marvel that a history of such wonderful interest should at all times have fixed itself on men's minds, and led them to speculate and ask questions which we have no data to answer. The simplest and truest way of looking at it has been that of those who, from the great Alexandrian thinker (Origen, in *Rom.* iii) to the writer of the most popular hymn of our own times, have seen in the "dying thief" the first great typical instance that "a man is justified by faith without the deeds of the law." Even those whose thoughts were less deep and wide acknowledged that in this and other like cases the baptism of blood supplied the place of the outward sign of regeneration (Hilar. *De Trinit.* c. x; Jerome, *Ep.* xiii). The logical speculations of the Pelagian controversy overclouded, in this as in other instances, the clear judgment of Augustine. Maintaining the absolute necessity of baptism to salvation, he

had to discuss the question whether the penitent thief had been baptized or not, and he oscillates, with melancholy indecision, between the two answers. At times he is disposed to rest content with the solution which had satisfied others. Then again he ventures on the conjecture that the water which sprang forth from the pierced side had sprinkled him, and so had been a sufficient baptism. Finally, yielding to the inexorable logic of a sacramental theory, he rests in the assumption that he probably had been baptized before, either in his prison or before he entered on his robber-life (August. *De Anima*, i, 11; iii, 12; *Serm. de Temp.* 130; *Retract.* i, 26; iii, 13, 55).

Other conjectures turn more on the circumstances of the history. Bengel, usually acute, here overshoots the mark, and finds in the Lord's words to him, dropping all mention of the Messianic kingdom, an indication that the penitent thief was a Gentile, the impenitent a Jew, and that thus the scene on Calvary was typical of the position of the two churches (*Gnomon N. T. in Luke xxiii*). Stier (*Words of the Lord Jesus*, ad loc.) reads in the words of reproof (οὐδὲ φοβῆς σὺ τὸν Θεόν) the language of one who had all along listened with grief and horror to the revilings of the multitude, the burst of an indignation previously suppressed. The Apocryphal gospels, as usual, do their best to lower the divine history to the level of a legend. They follow the repentant robber into the unseen world. He is the first to enter Paradise of all mankind. Adam and Seth and the patriarchs find him already there bearing his cross. Michael the archangel had led him to the gate, and the fiery sword had turned aside to let him pass (*Evangel. Nicod.* ii, 10). Names were given to the two robbers. Demas or Dismas was the penitent thief, hanging on the right, Gestas the impenitent on the left (*ibid.* i, 10; *Narrat. Joseph.* c. 3). The cry of entreaty is expanded into a long, wordy prayer (*Narrat. Joseph.* loc. cit.), and the promise suffers the same treatment. The history of the Infancy is made prophetic of that of the crucifixion. The holy family, on their flight to Egypt, come upon a band of robbers. One of them, Titus (the names are different here), has compassion, purchases the silence of his companion Dumas, and the infant Christ prophesies that after thirty years Titus shall be crucified with him, and shall go before him into Paradise (*Evangel. Infant.* c. 23). As in other instances [see MAGI], so in this, the fancy of inventors seems to have been fertile in names. Bede (*Collectan.*) gives Matha and Joca as those which prevailed in his time. The name given in the Gospel of Nicodemus has, however, kept its ground, and St. Dismas takes his place in the hagiology of the Syrian, the Greek, and the Latin Church.—Smith. It has been assumed that the penitent thief had been very wicked; that he continued so till he was nailed to the cross; that he joined the other malefactor in insulting the Saviour; and that then, by a miracle of grace, he was transformed into a penitent Christian; so Origen (*Hom. 35 in Matt.*), Chrysostom (*Hom. 88 in Matt.*), and others (comp. Suicer, s. v. *Ἀποστής*). But this view of the case seems to involve some misconception of the facts, which it may not be inexpedient to indicate. Whitby says, "Almost all interpreters that I have read here say that this thief began his repentance on the cross." With regard to his moral character, he is indeed styled by the evangelist one of the "malefactors (*κακοῦργοι*) who were led with Jesus to be put to death" (Luke xxiii, 32); but the word is evidently used *δοξαστικῶς*, i. e. malefactors as they were considered. Matthew (xxvii, 44) and Mark (xv, 27) call them *ῥοῦροι*; but this word denotes not only robbers, etc., but also brigands, rebels, or any who carry on unauthorized hostilities, *insurgents* (Thucyd. iv, 53). Insurrection was a crime, but it was a crime a person might have committed who had good qualities, and had maintained a respectable character. Again, this man's punishment was crucifixion, which was not in use among the Jews, but was inflicted by the

Romans, as we have seen, not on mere thieves, but rebels. Barabbas had been one of these, and though he "lay bound with them that had made insurrection with him, who had committed murder in the insurrection," Mark (xv, 27) has the same word, *ῥοῦρος*, "robber," which is applied to him by John (xviii, 40). It is most probable that these "malefactors" were two of his companions. Our Lord was condemned under the same charge of insurrection (Luke xxiii, 2), and the man whose case we are considering says to his fellow-sufferer, "Thou art under the same sentence," *ἐν τῷ αὐτῷ κρίματι*, and admits that they both were guilty of the charge, while our Lord was innocent of it (ver. 40, 41). It is impossible, then, to determine the degree of his criminality without knowing what provocations he had received under the despotic and arbitrary rule of a Roman governor such as Pilate, how far he had been active, or only mixed up with the sedition, etc. The notion that he was suddenly and instantaneously converted on the cross is grounded entirely upon the general statement of Matthew, "the thieves also which were crucified with him cast the same in his teeth" (xxvii, 44); whereas Luke, in his relation of the incident, is more exact. Instances of Matthew's style of speaking, which is called *amplification*, abound in the gospels, and in all writers. Thus, "the soldiers brought him vinegar" (Luke xxiii, 36; John xix, 29), "one of them did so" (Matt. xxvii, 48; Mark xv, 36). "The disciples had indignation" (Matt. xxvi, 8), "some of them" (Mark xiv, 4), "one of them" (John xii, 4). So in Mark xvi, 5; Matt. xxviii, 2, there is mention of one angel only: but in Luke xxiv, 4; John xx, 12, there is mention of two. This is substantially the explanation given by Cyprian (*De Passione Domini*), Augustine (*De Cons. Evangel.* iii, 16), and others, which assumes a synecdoche or syllepsis or enallage. The captious objections to the narrative of Luke as inconsistent with that of Matthew and Mark, and the inference drawn from them that both are more or less legendary, are therefore puerile (Strauss, *Leben Jesu*, ii, 519; Ewald, *Christus*, in *Geach.* v, 438). It is far from certain that either faith or repentance of this "thief" was the fruit of this particular season. He must have known something of the Saviour, otherwise he could not have said *οὐδὲν ἄριστον ἔπραξε*, "he hath done nothing amiss." He may have been acquainted with the miracles and preaching of Jesus before he was cast into prison; he may have even conversed with him there. He was convinced of our Lord's Messiahship, "Lord, remember me when thou comest into thy kingdom." His crime possibly consisted of only one act of insubordination, and he might have been both a sincere believer, and, with this one exception, a practical follower of Christ. Köcher (ap. Bloomfield, *Recen. Synop.*) tells us that it is a very ancient tradition that the thief was not converted at the cross, but was previously imbued with a knowledge of the Gospel. See Kuinöl, Macknight, etc.; and the monographs cited by Volbeding, *Index Programmatum*, p. 63; Hase, *Leben Jesu*, p. 212.

**Thigh** (תֵּדֵן, *yarék*; Sept. *μυρὸς*; Vulg. *femur*), properly the part of the body from the legs to the trunk, of men, quadrupeds, etc. (Gen. xxxii, 25, 31, 32; Judg. iii, 16, 21; Psa. xlv, 3; Cant. iii, 8), occurs in several phrases of special significance in the Bible.

1. *Putting the hand under the thigh* appears to have been a very ancient custom, upon occasion of taking an oath to any one. Abraham required this of the oldest servant of his house, when he made him swear that he would not take a wife for Isaac of the daughters of the Canaanites (Gen. xxiv, 2-9). Jacob required it of his son Joseph, when he bound him by oath not to bury him in Egypt, but with his fathers in the land of Canaan (xlvii, 29-31). The origin, form, and import of this ceremony in taking an oath are very doubtful. Aben-Ezra says, "It appears to me that it was the cus-

tom in that age for a servant to place his hand on his master's thigh, at the command of the latter, to show that he considered himself subject to, and undertook, his master's bidding; and such is at present the custom in India." Grotius thinks that, as the sword was worn upon the thigh (comp. Judg. iii, 16, 21; Psa. xlv, 3; Cant. iii, 8), this custom was as much as to say, If I falsify, kill me. Not a few commentators, ancient and modern, explain it of laying the hand on or near the *sectio circumcisionis*, to protest by that solemn covenant of God, whereof circumcision was the badge and type, in the Abrahamic family. So R. Eleazar says, "Before the giving of the law, the ancient fathers swore by the covenant of circumcision" (*Pirke*, c. 49). The Targum of Jonathan ben-Uzziel explains it בגזירת מילה, "in sectione circumcisionis meæ;" the Jerusalem Targum, רחורר ירך קרמי, "sub femore federis mei." Dr. Adam Clarke adopts the former of these two explanations (*Commentary on Gen.* xxii, 9). This interpretation supposes a *meiosis*, or metonymy such as is supposed by some to attend the use of the word with regard to the effect of the *water of Jealousy* (Numb. v, 21, 22, 27). Bochart adduces many similar instances (*Hieroz.* II, v, 15). We may also refer to the margin or Heb. of Gen. xlii, 26; Exod. i, 5; Judg. viii, 30. No further allusion to this ceremony in taking an oath occurs in Scripture, unless the phrase "giving the hand under" refer to it. (See Heb. or margin of 1 Chron. xxix, 24, and "giving the hand," 2 Chron. xxx, 8; Jer. i, 15; Ezek. xvii, 18.) See OATH.

2. Our translation states that "the hollow of Jacob's thigh was out of joint by the touch of the angel who wrestled with him" (Gen. xxxii, 25). Some, however, prefer to render רחורר, *was sprained or wrenched*, and adduce Jer. vi, 8; Ezek. xxiii, 17, 18. The Sept. renders it καὶ ἐνέσκησεν τὸ πλάτος τοῦ μηροῦ; the Vulg. *tegitur nervum femoris ejus, et statim emarcuit*. Some such sense better suits ver. 31, where we find Jacob *limping* on his thigh; see Gesenius on צלע. The custom of Jacob's descendants, founded upon this incident, is recorded in ver. 32, which has been thus translated: "Therefore the children of Israel eat not of the nerve Nashé, which is upon the hollow of the thigh, unto this day; because he struck the hollow of Jacob's thigh, on the nerve Nashé (Sept. τὸ νῆυρον, Vulg. *nervus*). The true derivation of the word נשׂה is considered by Dr. Furst, in his *Concordance*, to be still a secret; but, along with Gesenius, he understands the nerve itself to be the *ischiatric nerve*, which proceeds from the hip to the ankle. This nerve is still extracted from the hinder limbs by the Jews in England, and in other countries where properly qualified persons are appointed to remove it (*New Translation*, etc., by the Rev. D. A. De Sola, p. 333).

3. (שׁוֹך, *shók*.) The phrase "hip and thigh" occurs in Judg. xv, 8, in the account of Samson's slaughter of the Philistines. Gesenius translates שׁוֹך in this passage *with*, and understands it as a proverbial expression for "he smote them all." The Chaldee paraphrast interprets it, "He smote both footmen and horsemen, the one resting on their legs (as the word שׁוֹך should be rendered), the other on their thighs, as they sat on their horses." Others understand that he smote them both on the legs and thighs. Some give another interpretation: *smiting on the thigh* denotes penitence (Jer. xxxi, 19), grief, and mourning (Ezek. xxi, 12).

A few mistranslations occur. The word "thigh" should have been translated "leg" in Isa. xlvii, 2, שׁוֹך, *κνήμας, crura*. In Cant. vii, 1, "The joints of thy thighs," etc., the true meaning is "the *cincture of thy loins* (i. e. the drawers, trousers) is like jewelry." Lady Wortley Montagu describes this article of female attire as "composed of thin rose-colored damask, brocaded with *silver flowers*" (*Letters*, ii, 12; see Harmer, *On Solomon's*

*Song*, p. 110). Cocceius, Buxtorf, Mercerus, and Junius all adopt this explanation. In Rev. xix, 16 it is said "the Word of God (ver. 13) hath on his vesture and on his thigh a name written, King of kings and Lord of lords." Schleusner thinks the name was not written upon the thigh, but upon the sword. Montfaucon gives an account of several images of warriors having inscriptions on the thighs (*Antiquité Expliquée*, III, ii, 268, 269; Grupter, iii, 1489; and Zornii *Opuscula S. S.* ii, 759).

**Thilo, Johann Karl**, a theologian of Halle, was born at Langensalza, in Thuringia, Nov. 28, 1794. While a student he began to distinguish himself by superior philosophical attainments. He completed his studies at Leipsic and Halle, and in 1817 obtained the post of collaborator in the Latin school of the Orphanage at Halle, and subsequently that of teacher in the Royal Pedagogium. He remained in the latter station five years, but joined to its duties those of theological tutor in the university, where he began to deliver lectures on exegetical and patristical subjects in 1819. In 1820 he visited Paris and Oxford in the company of Gesenius, and on his return assisted Knapp, who afterwards became his father-in-law, in the conduct of the Theological Seminary. In 1822 he was made extraordinary, and in 1825 ordinary, professor of theology. In 1833 he received the title of consistorial councillor, and in 1840 the badge of the Order of the Red Eagle. He was a member of the Order of Freemasons, and temporarily of the direction of Francke's institutes. The lectures of Thilo extended into the fields of the history of doctrines and of the Church, and into symbolics and patristics. They were characterized by thoroughness of treatment and fullness of detail as well as simplicity of style; and they came in time to be recognised and valued by the entire university. The progress of his researches led him from the study of classical antiquity and the Greek philosophers to the antiquity of the Church, the Neo-Platonists, and the Greek fathers. He was also led to give attention to the almost uncultivated field of the New-Test. Apocrypha. In 1823 he published *Acta St. Thomæ Apostoli*, etc. The fruit of subsequent labors was accidentally lost in 1828, so that the appearance of the first volume of his *Codex Apocryphus N. T.*, etc., was delayed until 1832. This volume, containing the Apocryphal gospels, proved the greatest literary production of his life. His plans for the completion of the series were only partially executed. In 1838 appeared *Acta Apostol. Petri et Pauli*, etc.:—in 1846, *Acta Apostol. Andree et Matthias*, etc.:—and in 1847, *Fragm. Actuum S. Joannis*, etc. Thilo also furnished a contribution to the literature of the Old-Test. Apocrypha in the memorial written for Knapp's jubilee in 1825, *Specimen Exercit. Criticarum in Sap. Salomonis* (Halle, 1825). Various dissertations display his acquaintance with the Neo-Platonists and the Church writers who followed in their steps; e. g. *De Cælo Empyreo Commentationes III* (1839 sq.):—*Euseb. Alexandr. Oratio de præparandis præmissa de Magis et Stella Questione* (1834):—*Comment. in Synesii Hymnum II* (1842 sq.). He was long employed on a complete edition of the hymns of Synesius, but did not finish the undertaking. This was also the case with his last important work, the *Bibliotheca Patrum Græc. Dogmatica*, a single volume, containing *S. Athanasii Opera Dogmatica Selecta*, after the text of Montfaucon, being the extent to which it was published. Thilo was simply a student and an inquirer. He connected himself with none of the theological parties in the Church, because he saw much to approve and something to condemn in them all. Nor did he found any school, because he was unable to regard his own mind as fully formed. He gave himself simply to the work of inquiry, and became, in consequence, one of the most widely and accurately learned men of the modern Church within the field of his own chosen labors. He was, withal, a devout lover of the Bible, a most genial associate in the friendly circle, and a profoundly interested observer of all impor-

tant events. He died May 17, 1853. Dryander's discourse delivered at the funeral of Thilo was published at Halle in 1853; and a brief characterization of Thilo was given by Meier in the *Hallischer Sektionskatalog* (1853-54); and another in *Convers.-Lexikon d. Gegenwart* (1841), iv, 2, by Henke. See Herzog, *Real-Encyclop.* s.v.

**Thilo, Wilhelm**, a German teacher, was born in the year 1802, and died Feb. 17, 1870, at Berlin. For a number of years he stood at the head of the Berlin seminary for the education of teachers, and published, *Spener als Katechet* (Berlin, 1840):—*Das geistliche Lied in der evangel. Volksschule Deutschlands* (ibid. 1842; 2d ed. 1855):—*Ludwig Helmbold nach Leben und Dichten* (2d ed. 1856):—*Ludamilla Elisabeth Gräfin von Schwarzb.-Rudolstadt. Ein Beitrag zur Geschichte der geistl. Dichtung im 17. Jahrhundert* (ibid. 1855):—*Melanchthon im Dienste an heiliger Schrift* (ibid. 1860):—*Preussisches Volksschulwesen nach Geschichte und Statistik* (ibid. 1867). See Zuchold, *Bibl. Theol.* ii, 1332; *Literarischer Handweiser für das kath. Deutschland*, 1868, p. 66; 1870, p. 486. (B. P.)

**Thimnatha** (Josh. xix, 43). See TIMNATH.

**Thionville**, COUNCILS OF (*Concilia apud Theodonis-villam*). Thionville, now known as *Diedenhofen*, is a town of Germany, in Lorraine, situated on the Moselle; and has belonged in succession to the counts of Luxemburg, to Burgundy, Austria, Spain, and France. It was ceded by the peace of May 10, 1871, to Germany. This town has been the seat of three councils.

I. Held in 822; thirty-two bishops being present, among whom were Aistuphus of Mayence and Ebbo of Rheims. Four or five articles were drawn up in defence of ecclesiastical persons and property. See Mansi, *Concil.* vii, 1519.

II. Held in February, 835; more than forty bishops being present. All the proceedings against Louis le Débonnaire were declared to be null and void, and he was conducted to the cathedral church of Metz, and solemnly restored to his rights and privileges. This done, the prelates returned to Thionville, where Agobard of Lyons and Bernard of Vienne, who were absent, were solemnly deposed, together with Ebbo of Rheims, who, being present, himself consented to the sentence, and renounced the episcopate. See Mansi, vii, 1695.

III. Held in October, 844, in a place called at present "Just" (Judicium); Drogon, bishop of Metz, presided. In this council Lothaire, Louis, and Charles promised to observe brotherly concord among themselves. Six articles were drawn up, which the princes promised to observe. They are exhorted, among other things, to live in unity and brotherly love; to fill without delay the sees which, owing to their quarrels, had remained vacant; to hinder the laity from appropriating to themselves the property of the Church, etc.

**Third Orders** is the name given by Roman Catholics to persons who desire to lead a religious life in their homes, and yet have connection with some regular order. The first mention of such persons is in 1199, in connection with the Augustines, though this order claims that it was established much earlier. There are third orders of nearly all the principal orders, as of Dominicans, Minims, Carmelites, Trinitarians, etc. Their members take the vow of allegiance to the rules of the order, with the exception of that of perpetual chastity; have directors and superiors, yet live in the world, marry, and carry on business. Their only distinguishing mark is a scapulary and leather girdle, but these are often worn under their ordinary dress.

**Thirds**, a peculiar arrangement, under Mary queen of Scots, for the support of the Protestant clergy. "The barons," says Knox, "perceiving that the *Book of Discipline* was refused, presented to the nobility certain articles, requiring idolatry to be suppressed, the Kirk to be planted with true ministers, and some certain provision to be made for them, according to equity and con-

science. . . . And so devised they that the kirkmen" (the former clergy) "should have no intromission with the two parts of their benefices" (that is, with two thirds), "and that the third part should be lifted up by such men as thereto should be appointed, for such uses as in the acts are more fully expressed." The result was that two thirds of the benefices were retained by the popish clergy, and the remaining third handed to a collector for the queen. The ministers and superintendents were to have a sum modified for their support, and the surplus was to become a part of the revenue of the crown. Thus very little was left for the ministers of the Kirk.

**Thirlwall, CONNOP, D.D.**, an English clergyman and historian, was born at Stepney, Middlesex, Feb. 11, 1797. His precocity was so great that his father published for him, at the age of eleven, a volume of his compositions, *Primæ, or Essays and Poems on Various Subjects* (1809). He took the Craven and Bell scholarships at Trinity College, Cambridge, 1815; graduated as senior chancellor's medallist, 1818; became tutor and fellow; and was called to the bar in 1825. In 1828 he entered the Church, and became rector of Kirby-under-Dale, Yorkshire. For several years he was examiner for the classical tripos at Cambridge, classical examiner in the University of London, and visitor of St. David's College, Lampeter. He was created bishop of St. David's in 1840, which office he resigned in June, 1874. He died July 27, 1875. He published a number of sermons, charges, letters, addresses, and essays, which, with other writings, were issued under the title of *Literary and Theological Remains*, edited by canon Perowne (Lond. 1875-6, 3 vols.).

**Thirst** (ΝΥΞ, δίψος) is a painful natural sensation occasioned by the absence of moistening liquors from the stomach. As this sensation is accompanied by vehement desire, the term is sometimes used in Scripture, in a moral sense, for a mental desire, as in Jer. ii, 25, "Withhold thy throat from thirst; but thou saidst, I loved strangers, and after them will I go;" in other words, "I desire the commission of sin—I thirst for criminal indulgence." Matt. v, 6, "Blessed are they who hunger and thirst after righteousness." Psa. xliii, 2, "My soul thirsteth for God." The same figure is employed in the discourse of our Lord with the woman of Samaria, "Whosoever drinketh of the water which I shall give him shall never thirst," an allusion which the woman mistook as if intended of natural water, drawn from some spring possessing peculiar properties (John iii, 14). See HUNGER.

**Thirty-nine Articles.** See ARTICLES, THE THIRTY-NINE.

**Thirty Years' War**, THE, a German political and religious conflict, was not properly one war, but rather an uninterrupted succession of wars (1618-48), in Germany. Austria, most of the Catholic princes of Germany, and Spain were engaged on one side throughout, but against different antagonists.

1. *Causes of the War.*—For the influences which led to this struggle we must look back to the 16th century, when Germany was divided into two parties by the Reformation. Under Maurice of Saxony, Protestantism became triumphant, and by the Peace of Augsburg (1555) each State was allowed to prescribe the form of worship within its bounds, and subjects were allowed to move from those states where their worship was prohibited to those in which it was not. There still remained many unsettled questions which provoked strife. To guard against the future appropriation of prelacies by Protestants, the Catholic party, against the protest of the Lutheran members of the diet, inserted an article by which all prelates who should thereafter abjure Catholicism were to forfeit their benefices. Another matter of dispute was the desire to secure for Protestants the right of worship in Catholic states. The Catholics refused to admit such an article, and all that could be

gained was a personal declaration to this effect from the emperor's brother, Ferdinand, who presided over the diet at Augsburg. Under the reign of Maximilian (1564-76) Protestantism spread in Bohemia, Hungary, and Austria proper; but under his successor, Rudolf II (1576-1612), there was a reaction. Swayed by the Jesuits and the court of Spain, he proceeded to restrict, and even to abolish, Protestant worship.

2. *First Stage of the War.*—Thoroughly aroused, the Protestant princes formed the Evangelical Union at Anhausen, in Franconia, May 4, 1608, under the lead of the elector-palatine, Frederick IV. The rival union of the Catholic powers, under the leadership of the duke of Bavaria, followed, July 11, 1609. The Bohemians had forced from Rudolf an edict of toleration (*Majestäts-brief*), July 11, 1609, which guaranteed them religious liberty; but his successor, Matthias, having signed it upon his accession, appointed his cousin Ferdinand of Styria his heir. Ferdinand, educated by the Jesuits, had taken an oath to exterminate Protestantism from his kingdom; and immediately upon his accession, in 1617, persecutions began. Two Protestant churches, in Klostergraben and Braunau, having been pulled down, a lawsuit was instituted, and decided in favor of the Roman Catholic authorities. An appeal to the emperor only elicited a harsh reply, which aroused the Protestants, who, under the leadership of count Thurn, penetrated into the Castle of Prague (May 23, 1618), threw the imperial councillors out of the window, and organized a general rising. They routed the imperial troops, and actually besieged the emperor in Vienna. Frederick, whose sole allies were Bohemians, Moravians, Hungarians, and a Piedmontese contingent of 8000, was opposed by a well-appointed army of 30,000 under duke Maximilian, and totally routed at Weissenberg, Nov. 8, 1620. The military operations of count Mansfeld and Christian of Brunswick, and the forced cession of large portions of Hungary and Transylvania to Bethlen Gabor, did much to equalize the success of the antagonistic parties.

3. *Second Stage of the War.*—The fearful tyranny of Ferdinand over all the Protestants in his dominions, Hungary excepted, drove them to despair, and prolonged the war. Christian IV of Denmark, smarting under some injuries inflicted upon him by the emperor, and aided by a British subsidy, came to the relief of his German coreligionists in 1624. Holland aided with troops, and Christian of Brunswick and Mansfeld reappeared in the field. In April, 1626, Mansfeld's army was nearly annihilated by Wallenstein at Dessau, while in August Tilly overwhelmed the king of Denmark at Lutter. This victory was followed up by Wallenstein, who drove the Danes into Jutland and extended his operations to the Baltic. Christian IV was compelled by the Peace of Lubeck, May 22, 1629, to withdraw altogether from the contest. Here, again, the war might have ended; but Ferdinand, on March 6, 1629, issued the Edict of Restitution, ordering that all ecclesiastical estates secularized since 1552 should be returned to the Church, and all immediate sees held by Protestants transferred to Roman Catholic prelates. Brandenburg, Saxony, Hesse, Magdeburg, and other states protested, but the edict was carried out by force in all the imperial cities; and Tilly was ordered to move northward and crush every attempt at resistance. At this juncture Gustavus Adolphus came to the rescue of German Protestantism, and thus began the

4. *Third Stage of the War.*—Gustavus landed on the island of Usedom, in June, 1630, and drove away the imperial garrisons from Pomerania and Mecklenburg, where he reinstated the expelled princes. He then formed alliances with Hesse, Saxe-Weimar, Magdeburg, and France; and was afterwards joined by the electors of Brandenburg and Saxony. With these last allies he joined battle with Tilly at Breitenfeld, Sept. 17, 1631, and nearly annihilated his army. Defeating Tilly the second time, April 15, 1632, on the Lech, Gustavus and

Frederick V entered Munich. Wallenstein was recalled, and, after a few months' waiting, the battle of Lützen was fought, Nov. 16, 1632, in which Gustavus fell, but Wallenstein was defeated. The death of Gustavus Adolphus was a severe blow to the Protestants, though the genius and indefatigable zeal of his chancellor, Oxenstierna, and the superior ability of the Swedish generals, preserved the advantages they had gained, till the crushing defeat of Bernard of Weimar at Nordlingen, Sept. 6, 1634, restored to the emperor a preponderating influence in Germany. Saxony now made peace at Prague, May 30, 1635, obtaining such satisfactory terms for the Lutherans that the treaty was, within three months, adhered to by all the princes of that sect. The Calvinists were left to their fate. Sweden, however, resolved to continue the struggle, and Oxenstierna propitiated Richelieu by giving him the direction of the war. Baner led the Swedes into Germany, and won the great battle of Wittstock, Sept. 24, 1636. Upon his death, in 1641, he was succeeded by Torstensson, who made the Swedish arms a terror throughout Germany. Condé and Turenne led the French to victory over the leaguers on the Rhine, until at last the emperor was deserted by all his allies except the duke of Bavaria, whose territories were already mostly in the hands of Turenne and Wrangel. Preliminaries had been arranged for negotiations as early as 1641, but it was not until Oct. 24, 1648, that the Peace of Westphalia was concluded at Münster.

5. *Results of the War.*—These, ecclesiastically considered, were that the possession of the ecclesiastical benefices was placed on the basis of Jan. 1, 1624; and in the case of the Palatinate, Baden, Durlach, and Württemberg, the Catholics were obliged to accept 1638 as the normal year. An age of greater toleration was introduced into Germany. In all religious questions the Protestants secured an equality with the Catholics, and gained equal weight in the diet and high courts of the empire. The Peace of Westphalia terminated the religious wars of Europe, and thus became an important landmark in its history. See WESTPHALIA, PEACE OF.

For literature of the Thirty Years' War, see *Cust, Lives of the Warriors of the Thirty Years' War* (Lond. 1865); Ranke, *Geschichte Wallensteins* (Leips. 1869); Stieve, *Ursprung des dreissigjährigen Krieges* (Munich, 1875), vol. i; and similar sketches by Menzel (Breslau, 1835-39, 3 vols.), Flathe (1840), Mebold (1840), Barthold (1842), Heilmann (1851), Klopp (1861), Haussner (1862), Gindely (Prague, 1869), Gardner (Lond. 1874).

**Thisbe** (Θισβη v. θισβη), a name found only in Tob. i, 2, as that of a city of Naphtali from which Tobit's ancestor had been carried captive by the Assyrians. The real interest of the name resides in the fact that it is maintained by some interpreters (Hiller, *Onom.* p. 236, 947; Reland, *Palest.* p. 1035) to be the place which had the glory of giving birth to Elijah (q. v.) the *Tishbite*. This, however, is, at the best, very questionable, and derives its main support from the fact that the word employed in 1 Kings xvii, 1 to denote the relation of Elijah to Gilead, if pointed as it now stands in the received Hebrew text, signifies that he was not a native of Gilead, but merely a resident there, and came originally from a different and foreign district. But it is also possible to point the word so that the sentence shall mean "from Tishbi of Gilead," in which case all relation between the great prophet and Thisbe of Naphtali at once falls to the ground. There is, however, a truly singular variation in the texts of the passage in Tobit, a glance at which (on the following page) will show how hazardous it is to base any definite topographical conclusions upon it.

Assuming that *Thisbe*, and not *Thibe*, is the correct reading of the name, it has been conjectured (apparently for the first time by Keil, *Comm. über die Könige*, p. 247) that it originated in an erroneous rendering of the Hebrew word תִּשְׁבִּי, which word, in fact, occurs in the

A. V.	VULGATE.	SEPTUAGINT.	REVISED GREEK TEXT.	VETUS LATINA.
Out of Thibse which is at the right hand of that city which is called properly Nephthali in Galilee above Aser.* [Marg. or Kedes of Nephthali in Galilee, Judg. iv, 6.]	Out of the tribe and city of Nephthali which is in the upper parts of Galilee above Naasson, behind the road which leads to the west, having on the left hand the city of Sephet.	Out of Thibse which is at the right hand of Kudîôa of Nephthaleim in Galilee above Aser.	Out of Thibse which is at the right hand of Kudîôn of Nephthaleim in Upper Galilee above Aser, behind the setting sun on the right of Phogor (Peor).	Out of the city of Bihl which is on the right hand of Edisee, a city of Nephthallim in Upper Galilee over against Naasson, behind the road which leads to the west on the left of Raphain. [Another MS. reads Gabriel, Cydiacs, and Raphaim, for Bihl, Edisee, and Raphain.]
* i. e. probably Hazor.				

Hebrew version of the passage, and may be pointed in two ways, so as to mean either "from the inhabitants of," or "from Tishbi," i. e. Thibse. The reverse suggestion, in respect of the same word in 1 Kings xvii, 1, has also been made. See TISHBITE. But this, though very ingenious, and quite within the bounds of possibility, is at present a mere conjecture, since none of the texts support it, and there is no other evidence in its favor.

No name resembling Thibse or Thibe has been yet encountered in the neighborhood of Kedes or Safed, but it seems impossible to suppose that the minute definition of the Latin and Revised Greek texts—equalled in the sacred books only by the well-known description of the position of Shiloh in Judg. xxi, 19—can be mere invention.

**Thistle** is the rendering, in the A. V., of two Heb. and one Gr. word: 1. דַּרְדָּר, *dardâr*, any thorny plant, especially of the weed-like sort; always collectively in parallelism with קִיץ, *kôts*, "thorn" (Gen. iii, 18; Hos. x, 8); 2. חֹזֶחַ, *chôäch*, a stronger or hook-like thorny bush (2 Kings xiv, 9; 2 Chron. xxv, 18; Job xxxi, 40; elsewhere "thorn," etc.); 3. τριβόλος, a three-pronged thorn, the *caltrop* (Matt. vii, 16; "brier," Heb. vi, 8). The tendency of all vegetation in Palestine to run into spines, noticeable in the merest weeds as well as in trees, is a subject of remark to all travellers (see Hackett, *Illust. of Script.* p. 126). The thistle (a common name for various genera, especially *Carduus cirsium*, etc.) grows abundantly in most countries, and is a small plant; but in the warm air of Palestine, and in rich soils like the plain of Esdraelon, the large and luxuriant thistle will overtop the mounted horseman. On the road from Jerusalem to Rama, Hasselquist (*Travels*, p. 280) found six different sorts; and in the south of Judæa, in the course of one afternoon, Messrs. M'Cheyne

and Bonar counted ten or eleven species. Miss Beaufort speaks of giant thistles of the height of a man on horseback, which she saw near the ruins of Felhâm (*Egyptian Sep. and Syrian Shrines*, ii, 45, 50). "The most common species of this weed in Palestine are, *Notobasis Syriaca*, a tall flowering pink thistle with powerful spines; *Scolymus maculatus*, a very noxious plant, with a bright-orange flower; and *Carthamus oorycantha*, another yellow-flowering thistle, whose formidable spines inflict irritating wounds, like the sting of a poisonous insect" (Tristram, *Nat. Hist. of the Bible*, p. 424 sq.). See THORN.

**Thiven**, SYNOD OF, was held by Nierssee, the first bishop, or *catholicus*, of the Armenian Church, in A.D. 536. It was called through the influence of the Persian ruler Chosroes, who desired the separation of his Christian subjects from the Christians of the Roman empire. At the synod the Monophysite system was confirmed, and the anathema pronounced on the Chalcedonian council. See Neander, *Hist. of the Church*, i, 553.

**Tholuck**, FRIEDRICH AUGUST GOTTFREU, one of the greatest Protestant divines of Germany, was born at Breslau, March 30, 1799, of humble parentage. He continued at school till twelve years of age, when he was set to learn his father's trade, which was that of a goldsmith. It is said that he had till late years a ring which he himself had made. Still he hated the trade so much that he determined to get back to study. He soon found his way to the gymnasium, from which he graduated at the age of eighteen. His diligence was so great that he almost destroyed his sight, so that at times he has been on the verge of blindness. For a while he remained at the University of Breslau, but afterwards went to Berlin. In some way or other a taste for Oriental literature was awakened in him, and he sought from Prof. Kosegarten (then of Greifswalde, but from 1817 till 1824 professor at Jena), who was a great Oriental scholar, the means to carry on such studies. Prelate von Dietz, another distinguished Orientalist, took such an interest in him as to adopt him as his son; and when the prelate died, Von Altenstein secured for him all needful support. He went soon after to Jena, where he studied under his benefactor, Kosegarten, and graduated as doctor of philosophy. He always looked back upon these Oriental studies with delight, and said on Dec. 1, 1870 (the evening before the fiftieth anniversary of his appointment as professor), in answer to a congratulatory address from Jena, "You may be assured, my friends, that when I look back upon these studies, it is not with feelings like those with which one recollects a forsaken love, but rather with those felt towards one that still inflames and fills my spirit with youthful enthusiasm, and, at the same time, calls up a grateful remembrance of Prof. Kosegarten of Jena, who so lovingly encouraged and helped me on in the path of these studies." Tholuck's progress in Oriental lore is proved by three works which he published, two of which are learned productions. The first was written in 1821, from Turkish, Persian, and Arabic MSS., and entitled *Sufismus sive Theosophia Persarum Pantheistica, quam e MSS. Bibliothecæ Regiæ Berolinensis Persicis, Arabicis, Turcicis eruit et illustravit* (Berolini, 1821). The second was more popular, and appeared in 1825 with the title *An Anthology of the Oriental Mystic Poems, with an Introduction on the Mystics Generally, and the Eastern in Par-*

Arabian Thistle (*Carduus Arabicus*).

tical. The third of these works appeared in 1826, and was one of learning—*Speculations of the Later Orientalists respecting the Doctrine of the Trinity*.

While at Berlin, the great crisis in his religious life was approaching, and actually took place. In order to understand this, it is necessary carefully to read his work *Sin and Redemption, or the True Consecration of a Sceptic*. This was published in 1825, and was, in effect, a refutation of De Wette's *Theodore, or the Consecration of the Sceptic*. It describes the conversion of two young theologians, Julius and Guido, who were, no doubt, Dr. Julius Müller and the writer himself. This work was written in three weeks, and, like many books written off-hand, it has had remarkable success. Still more insight into Tholuck's spiritual life is caught in his address on the evening preceding the jubilee of December, 1870. A few of its thoughts may here be reproduced, for they furnish the key to his extraordinary success in winning souls to Christ:

"Those whom I see around me are not merely my pupils, nor my admirers, but my friends—my friends in Christ, many of them also my children in Christ, whom I have also borne with much pain. My course has been designated a *successful life among youth*. I have had not merely to water like Apollos, but to plant with Paul, and introduce new life into dead, corrupt, and wayward youthful hearts. But this can only be where the spirit of fire is the beam of a divine influence from God. Nothing fills me more with adoring wonder than to think how this spirit of fire has ever been given to me since the hour when I received the baptism of fire from above. From the age of seventeen I have always asked myself, '*What is the chief end of man's life?*' I could never persuade myself that the acquisition of knowledge was this end. Just then God brought me into contact with a venerable saint who lived in fellowship with Christ, and from that time I have had but one passion, and that is Christ, and Christ alone. Every one out of Christ I look upon as a fortress which I must storm and win. I was in my eighteenth year when the Lord gave me my first convert. He was an artillery officer, a Jew, a wild creature, without rest; but soon he became such a true follower of Christ that he put me to shame. And when I look back upon the thousands of youths whose hearts have opened up under my influence, I can only say the *Lord hath done it*. In working thus to save souls, my life has been one of joy rather than toil. Among the students were many frivolous, careless ones. I just now remember one whom a mother laid on my heart, but who soon fell among companions who led him astray, so that he could be found at home only at six in the morning. More than once I have visited him at that hour, and also in prison, but all seemed in vain, till one day in the sermon I said, 'Ah, yes, we preachers should have hard work were it not that we have one in league with us in every heart, even the most careless, that says, while we are preachers, "Well, the preacher is right." The next evening I received a letter from him, in which he promised to give up evil and enter upon a new life. Alas! four or five days later a card came from him with only these words—'*Tholuck is sighing, Tholuck is praying, but I am drinking like a brute.*' Yet my labor was not in vain, for he is now a noted preacher of the Gospel of Christ. And what a number of those who were once my students have risen up and can now say, each one, like myself, '*I have but one passion, and that is Christ, and Christ alone!*'"

Happy the veteran saint and scholar who could, in a green old age, look back upon such labors! He had all the more confidence in the power of Christianity from having felt it in his own heart. When he left the gymnasium to enter the university, his oration was on *The Superiority of Mohammedanism over Christianity*. He was especially prejudiced against experimental Christianity, which was then called Pietism and Mysticism. He thought it checked all vigor of action and freedom of thought, and impressed on every countenance the pale hue of death, and that all who adopted it must turn their view from the boundless magnificence of the starry heavens and dwell in the damp and gloom of a catacomb. Neander exerted a great influence on him for good, but it was especially baron von Kottwitz who was the instrument of his conversion, as well as of his friends Olshausen, Julius Müller, and Richard Rothe.

On Dec. 2, 1820, Tholuck passed his examination as licentiate of theology at the Berlin University. This was a daring step, for he then suffered from a complaint

which, according to three physicians whom he consulted at the request of baron von Kottwitz, was to end in speedy death. But a young physician, without curing him, removed the imminent danger, and he could go on in his work. Through the consideration and liberality of the Prussian government, he went to England in 1825, and spent nearly a year there in travels undertaken for the purpose of prosecuting scientific researches. On his return to Berlin in 1826, he was called to fill the chair of ordinary theology at Halle, made vacant by the death of Dr. Knapp. Notwithstanding his promotion to the position of extraordinary professor of theology at Berlin, so deeply was he imbued with the spirit and interested in the prosecution of the work of Francke at Halle that the daily longing of his heart was that he might be transferred to the university founded by him. "Every day," says he, "I prayed to God that he might be pleased to call me to that place where, a hundred years before, August H. Francke had built his Orphan Asylum, and had, by his addresses both from the pulpit and from the chair, gathered a faithful community, teaching that the first stage on the way to the tree of knowledge was by the tree of life." His prayer was answered, the mantle of Francke fell upon him, and, by a remarkable coincidence of Providence, after laboring as his successor for more than fifty years, his burial took place within one day of the 150th anniversary of the burial of Francke, and the passage selected as the text of the preacher at the obsequies of Francke served the same purpose at the funeral of Tholuck—"Lord, it is done as thou hast commanded," from the Gospel for the Sunday (June 10) on which Tholuck died.

The state of things which he found when he went to Halle in 1826 is described by himself as follows:

"It is universally known how a dead orthodoxy had, throughout the 17th century, been predominant in German churches and universities. . . . Almost throughout the breadth of the country the tendency to 'rationalism,' as it was termed, about the beginning of the present century, had taken an uncontested possession of the pulpits and academical chairs. . . . At Halle there had been but one single man (Prof. Knapp) who, feebly indeed, and secretly enough, dared to resist all-powerful Rationalism. Out of nine hundred students he found five who, being revived by the aid of a Christian craftsman, believed in the divinity of Christ. They were called the 'idiotic orthodox;' they were the few, the little ones, faint-hearted, weak, and not gifted, and over against them the great multitude of the gifted, active, and assiduous students. The body of the academic teachers, in agreement with the whole mass of the students, had sent a petition to the minister of state for ecclesiastical affairs against my appointment to a professorship at Halle. That was the most trying period of my life, in which I learned seeking and pursuing love."

Such was the state of Germany, its Established Church, and its institutions when Tholuck was called to Halle. Hegel, who, as a philosophical lecturer, had imbibed Christian principles in the religious atmosphere of Berlin, urged Tholuck, in his parting words, that he should "deal a death-blow to the bald rationalism prevalent at Halle." This was no easy task, considering that Gesenius and Wegscheider had such wonderful influence there.

Tholuck's position was, therefore, at first exceedingly difficult in this reign of rationalism. He was scouted, hated, and ridiculed as a pietist, mystic, fanatic, Pharisee, etc.; but he persevered, and God most richly blessed his labors. A radical revolution has been wrought in Halle, so far as theology is concerned. The Rev. L. Witte, one of his pupils, who represented him at the Evangelical Alliance, in 1873, at New York, and read the paper he had prepared on *Evangelical Theology in Germany*, says,

"We know that, in a great measure, the wholesome change from rationalism to faith which has been granted to our native country within the last fifty years is, next to God's grace, owing to the restless zeal of this 'miles Christi,' a genuine good knight without fear and without reproach. In dark and dreary days he has gallantly borne disgrace for Christ's sake. He, a single man, has won the field in the University of Halle; and all his colleagues, one

by one, have been forced to yield to his superiority of Christian energy and knowledge. But, more than that, thousands upon thousands call him their spiritual father, their father in Christ."

Tholuck verified the prophetic words of Prof. Hegel, drew the sword of the Spirit, and gave bald rationalism its death-blow in the University of Halle. It was only with the change of government and ministry in Prussia in 1840 that Tholuck's influence assumed great dimensions. Frederick William IV and the minister of worship, Eichhorn, looked upon his theology as one which avoided all extremes and yet held the faith firmly. They considered it the only justifiable form. When vacancies were to be filled in the Prussian universities, his advice was always valued, whether it had been formally asked or voluntarily proposed. Under the minister Von Raumer, his influence rather declined; but under the succeeding minister, Von Mühlher, it acquired its old power and dimensions, and many of the appointments of that time were suggested by him. His earnest labor for personal and experimental religion caused him to view with mildness smaller departures from ecclesiastical orthodoxy. Divine truth was in his eyes too sublime to be sharply and exactly defined in formulae. In his *True Consecration of the Sceptic*, he does not even stiffly demand an express belief in the personality of God if the self-consciousness and existence of the Divine Being are admitted. Sternly to insist upon creeds seemed to him a departure from the faith. In his sermons he despised all rhetoric and display of learning. There were, however, flashes of appeal that cut into the heart like lightning. And then his life, so warm and tender and loving, made him a universal favorite with his students. It is no wonder that he exerted an almost fascinating influence over them. Indeed, he looked upon personal effort among students as his peculiar calling. Every day he spent two hours in walking, and generally had one or two with him, with whom he engaged in pleasant but earnest conversation. This gave him, after a time, such an extensive psychological knowledge that he could easily find an entrance to the hearts of those whom he would save. Tholuck said himself, in the address which he delivered at his jubilee,

"Not without reason has it been said that I would rather be with candidates [for the ministry] than with pastors, and rather with students than with candidates. Not without cause have they called me a *studenten-professor* [a professor for students, as opposed to a *book professor*], who everywhere had a home with students, and nowhere else would rather have had his home. I had my delight in many a sprouting shoot, and, as it were, their flower-buds as they unfolded petal after petal, and in the full-developed flowers; but every blossom gradually developed, and in a different perfume and color. Yes, that is a blessed delight! and he who has once found his love and his pleasure in it, and to whom God has given the gift of being a professor, will no longer find the life of a professor to be labor, but rather joy and pleasure. And thus have I spent my life, and up to the present day my life as a professor has not been my work, but rather my joy and my delight.

"But, at the same time, the life of a professor is not all pleasure and enjoyment. If upon every word an echo would resound in the awakened heart; if upon every warning spiritual breath green shoots would spring up; if on every bestowal of a gift there would follow its reception—then it would be nothing but enjoyment. But thus it does not always happen, for there are also the silent, the dull, and the slow ones, whom one can call again and again, but no echo resounds; where one can trust in the space day after day before anything is heard resounding under the earth. And to be surrounded by such, that was my lot in the beginning.

"I have seen the secrets of many hundred young men disclosed to me; I have seen them wander far, far from the real aim of human life. I have been able to show them this, and I have had the pleasure to know that many a one perceived it who now enjoys this pleasure once unknown to him.

"This, then, is the life of a student professor; he has not only easy, joy- and pleasure-bringing work, but also a heavy task in youth, seeking love. But what a precious task when such young men are found that sit at the feet of Christ, who have been awakened from their slumbers, or who have returned from their erring ways! Wherever giving is also a receiving, that is a work which affords a higher enjoyment than all others that are more easily performed."

With such a love for students, Dr. Tholuck became a very popular professor, and students flocked to Halle from all parts of the world. His thorough knowledge of the English language made him an especial favorite with American students, large numbers of whom sat at his feet. Among the most distinguished of these we may mention Drs. Hodge, Addison, Alexander, Prentiss, H. B. Smith, Park, and others. The partiality manifested for Tholuck by American students was reciprocated by him. He regarded them with more than ordinary interest, and was in the habit of calling a number of those named his "special pets."

Besides the English, he was a master of a great many languages, and was only surpassed by cardinal Mezzofanti, who is said to have known fifty, including dialects. He was also gifted with poetic genius, and had acquired an immense store of varied learning. He was not only a master in theology, but profoundly versed in philology, philosophy, history, and poetry; in ancient and modern, Oriental and Occidental, heathen, Jewish, Mohammedan, and Christian literature. He was a voluminous writer. He commenced his literary labors as an author in 1821, and, besides the works already named, he wrote *Commentaries* on the Epistle to the Romans, the Hebrews, the Psalms, the Gospel of John:—a philosophico-theological exposition on *The Sermon on the Mount*:—*The Credibility of the Gospel History* (an antidote to *Strauss's Life of Christ*):—*The Spirit of the Lutheran Theologians of Wittenberg in the 17th Century*:—and *The Academic Life of the 17th Century*. In the last two productions he gives, mostly from MS. sources, a very interesting and graphic, but by no means favorable, picture of the palmy days of orthodox Lutheranism, for the instruction and warning of those contemporaries who would so zealously revive it as the best state of the Church, without considering that it was followed by the terrible apostasy of Rationalism. These works were forerunners of an extensive history of Rationalism. We mention the *Hours of Devotion*, together with several volumes of *Sermons*, as well as numerous articles published in the theological journals of Germany. He also issued his miscellaneous writings in two volumes, and republished *The True Consecration of the Sceptic* (1823), under the changed title of *The Doctrine of Sin and the Propitiator*, in 1851. Most of his writings have been translated into the more widely spoken modern languages of Europe.

Dr. Tholuck was also an able and popular preacher. He breathed and exhibited the spirit of evangelical piety in all the circles in which he moved—domestic, social, literary, and theological. He was simple and bland in his manners, social in his disposition, and kindly affectioned towards all men. He did not eschew pleasantries, but gave it its due place in conversation, and thus furnished the matter for many relishable anecdotes. He accepted the Prussian Union as consistent with the catholicity of Christianity, as well as with the doctrines of the Lutheran Church as set forth in her catholic symbol, the *Augustana*, and hence never allied himself with the separatistic Lutherans in their attempt to revive and perpetuate the symbolic dogmatism of the Lutheran theologians of the 17th century. In spite of his frail physical constitution, he was permitted to celebrate his semi-centennial jubilee as a professor Dec. 2, 1870, an occasion which was graced by the presence of a great number of his former pupils from all parts of the world. In responding to one of the addresses presented to him at his semi-centennial jubilee, he referred to the bodily infirmities he had been called upon to bear, and the comparatively small number of his days in which he was in the enjoyment of health. The performance of so much unintermitted labor, and the great age which he attained, are attributable to his abstemious habits and systematic exercise, as well as to the cheerfulness of disposition inspired by his personal piety, and his extraordinary success in doing good and glorifying Christ.

On June 10, 1877, Dr. Tholuck's wife sent the follow-

ing telegram to Dr. Schaff, who was then at Stuttgart, announcing his death, together with his last words:

"HALLE, June 10, 1877.

"This day, at 4 o'clock P. M., my dear husband, Dr. August Tholuck, after long suffering, gently entered into that blessed rest for which he had been longing from the days of his youth. Through the grace of God, his life, which was often threatened with an early termination, has been prolonged in indefatigable and fruitful labors to the age of seventy-eight years, two months, and ten days. Under the heavy pressure and painful anxiety of the last year, his friends around him were permitted to observe, in various ways, the growing assurance of his faith and the victory of love in his heart. His last intelligent words were a cheerful profession of the cross of Christ in view of approaching death: 'I am not afraid; Christ died for me' (*Ich fürchte mich nicht; denn Christus starb für mich*)."

It was a fitting close of a long and useful career which was devoted to Christ. The sum and substance of his theology was that Jesus lived and died for the salvation of sinners. To him as the only Master he led his innumerable pupils. His lecture-room and his pulpit were a school of Christ. Herein lie his significance and fame in the history of German theology and religion. The *New York Observer* (Aug. 16, 1877) thus announced Tholuck's death to its readers: "The greatest theological light of Germany has just been extinguished;" while the *Lutheran Observer* (Aug. 3, 1877) winds up an article on Tholuck in the following words:

"Although Tholuck is dead, he nevertheless, like Abel, 'yet speaketh.' He speaks on earth through the recollection of his conversations, exhortations, and sermons; speaks in the notes taken of his lectures; speaks in his articles published in theological reviews; speaks in the printed volumes written with his own hand; speaks through the sentiments, character, and labors of his students who have finished their course; speaks through the faith, writings, and efforts of his students who still live; speaks through the moulding influence exerted upon the University of Halle, and the evangelical leaven infused into the institutions of Europe; speaks through the resurrection of doctrinal orthodoxy, experimental piety, and religious activity in the Lutheran and other Protestant churches; yea, speaks in his whole life as a Christian man, as a popular writer, as a learned theologian, as an eloquent preacher; and, over and above all, 'he yet speaketh,' and will continue to speak as the *studenten-professor* till time shall be no more."

We have not as yet a complete biography of Dr. Tholuck, who will fill some chapters in the Church history of the 19th century. A sketch was published by Dr. Schaff, in his *Germany: its Universities, Theology, and Religion* (Phila. 1857), p. 278 sq. Another sketch is given in the *Theologisches Universal-Lexikon*, s. v. Our present article is made up from different necrologies. As to Tholuck's works, it would be useless to try to enumerate them. Zuchold alone (*Bibl. Theol.* ii, 1332 sq.) gives four pages. His *Commentaries* have been translated into English, and so also have some others of his works. The last of these, so far as we are aware, is *Hours of Christian Devotion* (Edinb. 1870), a work which has repeatedly been edited in Germany. (B. P.)

**Thom'as** (Θωμᾶς), one of the twelve apostles. A.D. 27-29.

1. *His Name*.—This is evidently a Græcized form of the Aramaic תומא, *Tomâ*, which means *the twin*; and so it is translated in John xi, 16; xx, 24; xxi, 2, ὁ Δίδυμος, which has passed into a name, *Didymus* (q. v.). This name occurs also on Phœnician inscriptions in a form which reminds us of the colloquial English abbreviation, viz. תומא and תומא (Gesenius, *Monumenta*, p. 356). In Heb. also (Cant. vii, 4) it is simply תומא, *teóm*, almost exactly our "Tom." The frequency of the name in England is derived not from the apostle, but from St. Thomas of Canterbury. Out of the signification of this name has grown the tradition that he had a twin-sister, Lysia (*Patres Apost.* p. 272), or that he was a twin-brother of our Lord (Thilo, *Acta Thomæ*, p. 94); which last, again, would confirm his identification with *Jude* (comp. Matt. xiii, 55), with whom Eusebius expressly identifies him (*Hist. Eccles.* i, 13; so

also the *Acta Thomæ*). This may have been a mere confusion with Thaddæus (q. v.), who is mentioned in the extract. But it may also be that Judas was his real name, and that Thomas was a surname.

2. *History and Character from the New Test.*—(We here chiefly adopt Stanley's art. in Smith's *Dict. of the Bible*.) In the catalogue of the apostles he is coupled with Matthew in Matt. x, 3; Mark iii, 18; Luke vi, 15; and with Philip in Acts i, 13.

All that we know of him is derived from the Gospel of John; and this amounts to three traits, which, however, so exactly agree together that, slight as they are, they place his character before us with a precision which belongs to no other of the twelve apostles, except Peter, John, and Judas Iscariot. This character is that of a man slow to believe, seeing all the difficulties of a case, subject to despondency, viewing things on the darker side, and yet full of ardent love for his Master (see Niemeier, *Charakt.* i, 108).

(a.) The first trait is found in his speech when our Lord determined to face the dangers that awaited him in Judæa on his journey to Bethany. Thomas said to his fellow-disciples, "Let us also go (*καὶ ἡμεῖς*), that we may die with him" (John xi, 16). He entertained no hope of his escape—he looked on the journey as leading to total ruin; but he determined to share the peril. "Though he slay me, yet will I trust in him."

(b.) The second occurs in his speech during the last supper: "Thomas saith unto him, Lord, we know not whither thou goest; and how can we know the way?" (John xiv, 5). It was the prosaic, incredulous doubt as to moving a step in the unseen future, and yet an eager inquiry to know how this step was to be taken.

(c.) The third was after the resurrection. He was absent—possibly by accident, perhaps characteristically—from the first assembly when Jesus had appeared. The others told him what they had seen. He broke forth into an exclamation, the terms of which convey to us at once the vehemence of his doubt, and, at the same time, the vivid picture that his mind retained of his Master's form as he had last seen him lifeless on the cross: "Except I see in his hands the print of the nails, and put my finger into the print of the nails, and thrust my hand into his side, I will not, I cannot, believe" (*ὅτι μὴ πιστεύσω*, John xx, 25). On the eighth day he was with them at their gathering, perhaps in expectation of a recurrence of the visit of the previous week; and Jesus stood among them. He pronounced the same salutation, "Peace be unto you;" and then, turning to Thomas, as if this had been the special object of his appearance, uttered the words which convey as strongly the sense of condemnation and tender reproof as those of Thomas had shown the sense of hesitation and doubt: "Bring thy finger hither [*ᾧδε*—as if himself pointing to his wounds] and see my hands; and bring thy hand and thrust it in my side; and do not become (*μὴ γίνῃς*) unbelieving (*ἄπιστος*), but believing (*πιστός*)."

"He answers to the words that Thomas had spoken to the ears of his fellow-disciples only; but it is to the thought of his heart rather than to the words of his lips that the Searcher of hearts answers. . . . Eye, ear, and touch at once appealed to and at once satisfied—the form, the look, the voice, the solid and actual body: and not the senses only, but the mind satisfied too; the knowledge that searches the very reins and the hearts; the love that loveth to the end, infinite and eternal" (Arnold, *Serm.* vi, 238). The effect on Thomas is immediate. It is useless to speculate whether he obeyed our Lord's invitation to examine the wounds. The impression is that he did not. Be that as it may, the conviction produced by the removal of his doubt became deeper and stronger than that of any of the other apostles. The words in which he expressed his belief contain a far higher assertion of his Master's divine nature than is contained in any other expression used by apostolic lips, "My Lord, and my God." Some have supposed that *κύριος* refers to the human

θεός to the divine nature. This is too artificial. It is more to the point to observe the exact terms of the sentence, uttered, as it were, in astonished awe. "It is, then, my Lord and my God!" (It is obviously of no dogmatic importance whether the words are an address or a description. That they are the latter appears from the use of the nominative ὁ κύριος. The form ὁ θεός proves nothing, as this is used for the vocative. At the same time, it should be observed that the passage is said to Christ, εἶπεν αὐτῷ.) The word "my" gives it a personal application to himself. Additional emphasis is given to this declaration from its being the last incident related in the direct narrative of the gospel (before the supplement of ch. xxi), thus corresponding to the opening words of the prologue. "Thus Christ was acknowledged on earth to be what John had in the beginning of his gospel declared him to be from all eternity; and the words of Thomas at the end of the twentieth chapter do but repeat the truth which John had stated before in his own words at the beginning of the first" (Arnold, *Serm.* vi, 401). The answer of our Lord sums up the moral of the whole narrative: "Because ["Thomas" (Θωμά) is omitted in the best MSS.] thou hast seen me, thou hast believed: blessed are they that have not seen me, and yet have believed" (xx, 29). By this incident, therefore, Thomas, "the doubting apostle," is raised at once to the theologian in the original sense of the word. "Ab eo dubitatum est," says Augustine, "ne a nobis dubitaretur." Winer and others find in the character of Thomas what they consider contradictory traits, viz. inconsiderate faith and a turn for exacting the most rigorous evidence. We find that a resolute and lively faith is always necessarily combined with a sense of its importance, and with a desire to keep its objects unalloyed and free from error and superstition. Christ himself did not blame Thomas for availing himself of all possible evidence, but only pronounced those blessed who would be open to conviction even if some external form of evidence should not be within their reach (comp. Niemeyer, *Akademische Predigten und Reden*, p. 321 sq.). Monographs have been written in Latin on this scene in Thomas's life by Carpozov (Helmst. 1757), id. (Vim. 1765), Rost (Budiss. 1785), and Gram (Norimb. 1618).

In the New Test. we hear of Thomas only twice again—once on the Sea of Galilee with the seven disciples, where he is ranked next after Peter (John xxi, 2), and again in the assemblage of the apostles after the Ascension (Acts i, 13).

3. *Traditions.*—Thomas is said to have been born at Antioch, and (as above stated) to have had a twin-sister named Lysia (*Patres Apost.* ed. Coteler. p. 272, 512). The earlier traditions, as believed in the 4th century (Origen, ap. Euseb. *Hist. Eccles.* i, 13; iii, 1; Socrates, *Hist. Eccles.* i, 19), represent him as preaching in Parthia (Clement. *Recogn.* ix, 29) or Persia (according to Jerome; see also Rufinus, *Hist. Eccles.* ii, 4), and as finally buried at Edessa (Socrates, *Hist. Eccles.* iv, 18). Chrysostom mentions his grave at Edessa as being one of the four genuine tombs of apostles, the other three being Peter, Paul, and John (*Hom. in Heb.* 26). With his burial at Edessa agrees the story of his sending Thaddæus to Abgarus with our Lord's letter (Euseb. *Hist. Eccles.* i, 13). According to a later tradition, Thomas went to India and suffered martyrdom there (Gregor. Naz. *Orat. xxv ad Arian.* p. 438, ed. Par.; Ambrose, in *Ps.* xlv, 10; Jerome, *Ep.* 148 [59] *ad Marcell.*; Niceph. *Hist. Eccles.* ii, 40; *Acta Thomæ*, ch. i sq.; Abdîæ *Hist. Apost.* ch. ix; Paulin. a. S. Bartholomæo, *India Orient. Christiana* [Rom. 1794]). This tradition has been attacked by Von Bohlén (*Indien*, i, 375 sq.). The ancient congregations of Christians in India who belong to the Syrian Church are called Thomas-Christians, and consider the apostle Thomas to be their founder (Fabricius, *Luz Evangelii*, p. 626 sq.; Assemani, *Biblioth. Orient.* III, ii. 435 sq.; Ritter, *Erkunde*, V, i, 601 sq.). Against this tradition Thilo wrote in his edition of the *Acta*

*Thomæ*, p. 107 sq. (comp. Augusti, *Denkwürdigkeiten*, iii, 219 sq.). This later tradition is now usually regarded as arising from a confusion with a later Thomas, a missionary from the Nestorians. His martyrdom (whether in Persia or India) is said to have been occasioned by a lance, and is commemorated by the Latin Church on Dec. 21, by the Greek Church on Oct. 6, and by the Indians on July 1. (For these traditions and their authorities, see Butler, *Lives of the Saints*, Dec. 21.)

4. The fathers frequently quote an *Evangelium secundum Thomam* and *Acta Thomæ*, the fragments of the former of which have been edited by Thilo, in his *Codex Apocryphus Novi Testamenti*, i, 275; and by Tischendorf, in his *Evangelia Apocrypha* (Lips. 1843); and the *Acta Thomæ* separately by Thilo (ibid. 1823); and by Tischendorf, in his *Acta Apocrypha* (ibid. 1851). See APOCRYPHA; THOMAS, WRITINGS OF.

THOMAS (St.), CHRISTIANS OF, a body of Syrian Christians dwelling in the interior of Malabar and Travancore, in the south-western part of Hindustan. When the Portuguese landed in India in the 16th century, they discovered what they supposed to be a Nestorian Church there, the members of which called themselves Christians of St. Thomas. They retained the Syrian language, held the validity of only two sacraments, and were governed by bishops under a metropolitan. They rejected the authority of Peter, and did not enforce sacerdotal celibacy. They neither invoked saints nor worshipped images. These churches were soon subjected to severe persecution, and many were forced into Romanism. The inquisition, also, was established at Goa. Dr. Claudius Buchanan found, however, a remnant of them, in 1807, near Travancore. They still retain some ecclesiastical independence. According to a statement of some authority, the St. Thomas Christians number 70,000 individuals, and the Syro-Roman Catholics 90,000, that is, the party who have submitted to the papal jurisdiction. But the Church service in Syriac is not understood by the people, who are ignorant and prejudiced. That their creed is not directly Nestorian may be seen from the declaration of the metropolitan of Malabar made in 1806: "We believe in the Father, Son, and Holy Ghost, three persons in one God, neither confounding the persons nor dividing the substance; One in Three, and Three in One: the Father generator, the Son generated, and the Holy Ghost proceeding. None is before or after the other; in majesty, honor, might, and power coequal; Unity in Trinity, and Trinity in Unity." The metropolitan disclaims the heresies of Arius, Sabellius, Macedonius, Manes, Manianus, Julianus, Nestorius, and the Chalcodonians, adding 'that in the appointed time, through the disposition of the Father and the Holy Ghost, the Son appeared on earth for the salvation of mankind; that he was born of the Virgin Mary through the means of the Holy Ghost, and was incarnate God and man.' They believe that the souls of departed men do not see God till the judgment-day; they allow three sacraments—baptism, orders, and the eucharist; and they abhor auricular confession. In the consecration of the eucharist they use small cakes made with oil and salt; instead of wine is water in which raisins have been steeped; they observe no age for orders, but admit priests at seven, eighteen, twenty, etc., who may marry as often as their wives die. Their children, unless in cases of sickness, are not baptized till the fiftieth day. At the death of any friend the relations keep an eight days' fast in memory of the deceased. They observe the times of Advent and Lent, and many other feasts and festivals, but especially those which relate to Thomas—the *Dominica in albis*, or Sunday after Easter, in memory of the notable confession of Thomas; one on June 1, which is also celebrated by Moors and Pagans. The Church of England Missionary Society has established among these people an extensive mission, occupying two or three stations; and a college has been established at Kottayam for the instruction of candidates for the ministry, which has been

liberally endowed. See Eadie, *Eccles. Cyclop.* s. v.; Farrar, *Eccles. Dict.* s. v. See NESTORIANS.

**THOMAS (St.), DAY OF,** a festival observed, Dec. 21, in memory of Thomas the apostle. It was held by the Greek Church on Oct. 6.

**THOMAS (St.), WRITINGS OF.** These are as follows:

1. **THOMÆ ACTA** (*Acts of Thomas*), an Apocryphal work which belongs to a very high antiquity and was greatly esteemed among the Gnostics and Manichæans (comp. Euseb. *Hist. Eccles.* iii, 25; Epiphan. *Hæres.* xlii, 1; li, 1; liii, 2, etc.). Augustine has undoubtedly referred to them in three places, viz. *Cont. Faust.* xxii, 79; *Adimant.* 17; *De Sermone Domini*, i, 20. In the *Hist. Apostol. Abdiæ*, ix, 1 (Fabricius, *Codex Apocryph.* i, 689) these *Acts* are especially referred to. They were first edited by Thilo, in *Codex Apocryphus Nov. Test.* (Lips. 1832), vol. i; afterwards by Tischendorf, in *Acta Apostolorum Apocrypha* (ibid. 1851), p. 190-234; see also the appendix to *Apocalypses Apocryphæ* (ibid. 1856), p. 156-161. Connected with the *Acts* is the—

2. **THOMÆ CONSUMMATIO** (*Consummation of Thomæ*), which, like the former, was the source for the *Hist. Apost. Abdiæ*. It was edited first by Tischendorf from a cod. Paris. of the 11th century, and published in his *Acta Apostolorum*, p. 235-242. More important than these is the—

3. **THOMÆ EVANGELIUM** (*Gospel of Thomas*). Next to the *Protævangeliū of James*, it was the oldest and best known. Irenæus probably knew it (comp. *Adv. Hæres.* i, 20), while Origen (*Hom. I in Lucam*) mentions the same explicitly; Pseudo-Origen. Philocephus (ed. Emm. Miller, Oxon. 1851), p. 101 (comp. p. 94), speaks of its having been used by a Gnostic sect, the Naasenes, in the middle of the 2d century; Euseb. (*Hist. Eccles.* iii, 25) mentions this gospel also, and Cyrill. Hierosol. (*Catech.* p. 98, ed. Oxon. 1702; comp. *ibid.* 4, p. 66) thinks that this Thomas was the disciple of Manes. The origin of this, as well as of most of the Apocryphal gospels, must be sought among the Gnostics, and especially among those who embraced Docetism with regard to the person of Christ; and the very large number of miraculous stories mentioned in this gospel, which found so much favor among the Manichæans, points to this Docetism. According to Irenæus, *loc. cit.*, the author must have belonged to the Marcosian sect.

We have no complete text of this gospel, but fragments only. Cotelierius first published, in the notes to his *Constit. Apostol.* vi, 17, a fragment according to the Parisian MS. of the 15th century; a larger portion was published by Mingarelli, *Nuova Raccolta d' Opuscoli Scientifici* (Venet. 1764), xii, 73-155. Tischendorf found a larger number of MSS., but their variations caused him to publish a triple text in his collection—viz. two Greek and one Latin—with the following titles: Θωμᾶ Ἰσραηλῖτου φιλοσόφου ῥητὰ εἰς τὰ παιδικὰ τοῦ Κυρίου. This gives us the childhood of Jesus from his fifth to his twelfth year in nineteen chapters. Σύγγραμμα τοῦ ἁγίου ἀποστόλου Θωμᾶ περὶ τῆς παιδείας ἀνατροφῆς τοῦ Κυρίου gives in eleven chapters the time from the fifth to the eighth year. *Tractatus de Pueritia Jesu secundum Thomam* gives in fifteen chapters the time from the flight into Egypt to the eighth year of Christ's life. These texts are published by Tischendorf in his *Evangel. Apocrypha* (Lips. 1853); see also the *LXI Prolegom.* of the *Apocal. Apocryph.* A Syriac codex was published by Wright (Lond. 1875), in his *Contributions to the Apocryphal Literature of the New Test., Collected and Edited from Syrian MSS. in the British Museum.* (B. P.)

**Thomas λ BECKET, OF OF CANTERBURY.** See BECKET, THOMAS λ.

**Thomas λ KEMPIS.** See KEMPIS, THOMAS λ.

**Thomas AQUINAS.** See AQUINAS, ST. THOMAS.

**Thomas OF CELANO** was a native of Celano, in X.—A A

Abruzzo Ultra II. He is noted as having written the earliest biography of Francis of Assisi, and the hymn *Dies Ira* (q. v.). Neither the date of his birth nor of his death is known. It would appear from the preface to the biography that he was early associated with Francis, as many of the statements are given as based on personal observation or the authority of Francis himself. Caesar of Spire, the first provincial of the Order of Franciscans in Germany, appointed him to the office of *custos* over the Minorite convents of Cologne, Mayence, Worms, and Spire, as early at least as 1221. This statement is questioned by some, because the chronicle of the order compiled by Mark of Lisbon does not mention him among the twenty-five earlier and more important disciples of the saint, though more obscure names are found in that list. The biography ascribed to him is given, with notes, in the *Acta Sanctorum*, October, tom. ii. There is no proof either for or against his claim to the authorship, which is nowhere asserted by himself. Nor is the honor of having composed the *Dies Ira* secured to him by any better evidence. The Franciscans attribute its composition to him, the Dominicans to one of their own order, a Jesuit to an Augustinian monk, a Benedictine to Gregory the Great or to St. Bernard. Each of these statements is arbitrary, and some of them cannot be true. Bartholomew Albizzi of Pisa was the first to credit the hymn to Celano, in his *Liber Conformitatum* (1885); and his statement warrants the conclusions that the hymn was already at that date incorporated with the Missal, and therefore well known, and that Celano was generally held to be its author. Wadding, in *Scriptores Ordinis Minorum*, states that Celano composed two additional sequences, the *Fregit Victor Virtualis*, in honor of St. Francis, and the *Sanctitatis Nova Signa*. See Mohnike, *Kirchen- u. literar.-hist. Studien* (1825), i, 31; Hübler, *Dreifache Chronik d. dreifachen Franzisk.-Ordens* (Munich, 1886), p. 16; Wadding, *Annales Minor.* tom. ii, ad ann. 1222; Hase, *Franz v. Assisi*, etc. (Leips. 1856), p. 17, note 17; Tholuck, *Verm. Schriften*, i, 110; Daniel, *Thesaur. Hymnol.* i, 108-181.—Herzog, *Real-Encyclop.* s. v.

**Thomas OF VILLANOVA.** See VILLENEUVE.

**Thomas, Barnabas**, one of Wesley's early helpers, was a native of Cornwall, England. He was admitted on trial by the Conference in 1764 and preached in Wales, and was likewise stationed in Cork. He was named in the deed of declaration. He at length desisted from an itinerant life, and settled in Leeds, but sank into obscurity, and died of a violent fever while the Conference was in session in that city (1793). See Atmore, *Meth. Memorial*, s. v.

**Thomas, Benjamin Calley**, a Baptist missionary, was born in Massachusetts. He graduated at Brown University in the class of 1847, and at the Newton Theological Institution in the class of 1850. For eighteen years he was a missionary of the American Baptist Missionary Union, being stationed during this period at various places—three years at Tavoy, Bengal; three years at Henzadah, Burmah; and two years at Bassein, Bombay. At one time he had under his charge a school for the education of native teachers. Returning to the United States, he died in the city of New York, June 10, 1869. (J. C. S.)

**Thomas, Benjamin Franklin**, chancellor of Brown University, was born in Boston, Mass., Feb. 12, 1813, and was a graduate of Brown University in the class of 1830, having entered college at the early age of thirteen. He was admitted to the bar of Worcester in 1834. By degrees he rose to an extensive practice, and occupied a high position among the able lawyers with whom he was contemporary. For four years (1844-48) he was judge of probate for Worcester County. In 1853 he was appointed to a place made vacant on the bench of the Supreme Judicial Court of Massachusetts, and held the office for six years (1853-59). Having resigned his position on the bench, he removed to Boston,

where in his profession he achieved eminent success. He served one term (1861-63) as a representative in Congress from Boston. He was elected chancellor of Brown University in 1874. His death took place at Beverly, Mass., Sept. 27, 1878. (J. C. S.)

**Thomas, Christian**, a modern philosopher, was born at Leipsic in 1665, and graduated at the Leipsic University. Reading Puffendorf's *Apology for Rejecting the Scholastic Principles of Morals and Law*, he determined to renounce all implicit deference to ancient dogmas. Brucker gives the following brief specimen of his peculiar tenets: "Thought arises from images impressed upon the brain, and the action of thinking is performed in the whole brain. Brutes are destitute of sensation. Man is a corporeal substance, capable of thinking and moving, or endued with intellect and will. Man does not always think. Truth is the agreement of thought with the nature of things. The senses are not deceitful, but all fallacy is the effect of precipitation and prejudice. From perception arise ideas and their relations, and from these, reasonings. It is impossible to discover truth by the syllogistic art. . . . God is not perceived by the intellectual sense, but by the inclination of the will; for creatures affect the brain, but God the heart. All creatures are in God; nothing is exterior to him. Creation is extension produced from nothing by the divine power. Creatures are of two kinds, passive and active; the former is matter, the latter Spirit. . . . The human soul is a ray from the divine nature, whence it desires union with God, who is love," etc. Thomas died at Halle in 1728. He published, *An Introduction to Puffendorf* (1687):—*A Defence of the Sect of the Pietists*:—*An Introduction to Aulic Philosophy*, etc.:—*Introduction to Rational Philosophy*:—*A Logical Praxis*:—*Introduction to Moral Philosophy*:—*A Cure for Irregular Passions*:—*Essay on the Nature and Essence of Spirit*, etc.

**Thomas, Christopher**, a Methodist Episcopal minister, was born in Matthews County, Va., Oct. 31, 1797. He was converted in 1816, admitted on trial in the Virginia Conference in 1823, and appointed to the Sussex Circuit. In 1824 he still held the same circuit; in 1825, Yaddin; in 1826, Salisbury; in 1827, Iredell; in 1828, Williamsburgh; and in 1829, Newbern, N. C., all of which appointments he filled with ability and success. He died Nov. 14, 1829. He was a plain man, of strict integrity, consistent Christianity, and highly respectable abilities. See *Minutes of Annual Conferences*, 1830, p. 75.

**Thomas, David** (1), a minister of the Baptist denomination, was born at Loudon Tract, Pa., Aug. 16, 1732. In early life he enjoyed more than ordinary advantages for obtaining a good education. He studied for some time at the Academy in Hopewell, under the tuition of Rev. Isaac Eaton, and in 1769 received the honorary degree of A.M. from Brown University. When quite young he began to preach. He removed to Virginia in 1760, and spent about a year and a half in Berkeley County. He then visited Fauquier County, and under his ministry the Broad River Church was formed, of which, for a time, he was the pastor. Subsequently, from this church, five or six other churches were constituted. He travelled as an evangelist in different sections of the state, and his preaching was greatly blessed in the conversion of souls. He is said "to have been a minister of great distinction in the prime of his days. Besides the natural endowments of a vigorous mind, and the advantages of a classical and refined education, he had a melodious and piercing voice, a pathetic address, expressive action, and, above all, a heart filled with love to God and his fellow-men." Many persons in Virginia had been accustomed to hear but little evangelical preaching. They were attracted by the eloquence of so accomplished a minister as was Mr. Thomas, and not a few who occupied high social positions were led to the Saviour. Near the close of his life he re-

moved to Kentucky. He lived to a great age, and for some time before his death was nearly blind. The influence of this faithful servant of Christ was good and permanent. See *Lives of Virginia Baptist Ministers*, p. 51-53. (J. C. S.)

**Thomas, David** (2), a Welsh Congregational minister, was born at Cowbridge, May 19, 1783. He graduated at Wrexham Academy, studied theology with Dr. Jenkin Lewis, and itinerated through the hamlets and villages about Magor and Penywain. In 1815 he settled over the parish of Wolvasnewton, and in 1819 removed to Nebo. In 1824 he took the oversight of the Church at Llanvaches, and continued his missionary labors through many neighboring parishes. He died in November, 1864. His life was one calm, public, and unwavering testimony for truth and for God. See (Lond.) *Cong. Year-book*, 1866, p. 285.

**Thomas, David** (3), a Welsh Congregational minister, was born in 1793. He graduated at the Presbyterian College, Carmarthen, and was ordained in 1820 at Pembrokehire, and shortly afterwards settled at Wotton-under-Edge, and retained this charge until the close of his life. He died March 28, 1861. His preaching was earnest, faithful, and evangelical. See (Lond.) *Cong. Year-book*, 1862, p. 263.

**Thomas, David** (4), A.B. an English Congregational minister, was born at Merthyr-Tydvil, Aug. 16, 1811. He was educated at Highbury College and Glasgow University, where he took the first prize in logic. He was ordained in 1836, at Zion Chapel, Bedminster. In 1844 he settled at Highbury Chapel, Cotham, and commenced that career of spiritual power and ministerial prosperity which lasted thirty years, growing more and more bright and beautiful from year to year. Mr. Thomas had a vigorous intellect, highly cultivated, and marked by large intelligence and the purest taste. "His conversation on books, public men, and human affairs manifested a comprehensive grasp, a discriminating touch, and no small amount of genial humor." He died Nov. 7, 1875. See (Lond.) *Cong. Year-book*, 1876, p. 374.

**Thomas, Ebenezer**, D.D., LL.D., a Presbyterian minister, was born at Chelmsford, England, Dec. 23, 1812. His father was an Independent minister, educated at Hoxton College in London, and was ordained at Chelmsford in 1805, where he remained as pastor for a number of years. He removed to Cincinnati, O., when his son was but a child. He was engaged in preaching in Cincinnati and destitute neighborhoods for several years. With a view of supplying the destitute, he organized a Home Evangelization Society, and was its agent. He accepted a call to take charge of the Welsh Independent Church at Paddy's Run, O. Here he established a boarding-school, and some of the first men of the country were his patrons and pupils. Under his father's instruction, young Thomas was prepared for college. He entered the Miami University and graduated in 1834. He possessed powers of mind of the highest order, and his scholarly attainments were rarely equalled, never surpassed. Immediately after his graduation, he commenced teaching at Rising Sun, Ind., and afterwards at Franklin, O. When not engaged in teaching, he pursued the study of theology. He was licensed by the Presbytery of Oxford in 1836. Although he had not had the advantage of training in a theological seminary, there were few more thoroughly educated in every branch of theology. He was called to take charge of the Church at Harrison, and he was ordained and installed over the same in July, 1837. After remaining in Harrison over two years, he was called to the Hamilton Church, where he remained until 1849, when he was elected president of Hanover College. This position he occupied until 1854, when he resigned to accept the chair of Biblical literature and exegesis in the Theological Seminary at New Albany, Ind. Here he remained till the seminary was removed

to Chicago, when he resigned, but was re-elected by the new board at its first meeting. He accepted the appointment, but on account of controversy in the Church in regard to his views and those of his colleague, Professor McMasters, in regard to slavery, the seminary was not opened for two years. In the meantime he supplied the pulpit of the first Presbyterian Church in New Albany. In 1858 the synods in whose bounds the seminary was located voted to offer it to the General Assembly, and in 1859 it was accepted by the same. In the meantime the first Church of Dayton, O., gave Dr. Thomas a call, which he accepted. Here he was duly installed, and entered on his work, which he prosecuted with energy and success for twelve years, when he resigned to accept the chair of New-Test. Greek and exegesis in Lane Seminary, Walnut Hills, Cincinnati, O. He died there Feb. 2, 1875. Dr. Thomas was a general scholar. He carried his studies outside of the curriculum, and was at home in history, geology, botany, entomology, mineralogy, astronomy, and microscopy. He was a model teacher, his thorough knowledge of every department and his unrivalled colloquial powers combined to make him a great favorite in the class-room. As a theologian he was a sincere and sound Calvinist, and he was as rich in Christian experience as he was sound in the faith. As a preacher he was popular and successful in all the fields of his labor. In all that goes to make up excellences in writing and speaking, he was a prince. He was esteemed and honored by all. (W. P. S.)

**Thomas, Edward**, an Episcopal clergyman, was born in St. Stephen's Parish, S. C., Sept. 28, 1800, and received his early education at the grammar-school in Pineville. In 1817 he entered the sophomore class in the South Carolina College, Columbia, and graduated in 1819. He lived in Cambridge, Mass., in order to study at Harvard College; and, after a few months, transferred his residence to New Haven, prosecuting his studies at Yale. He entered the Theological Seminary, city of New York, in 1822; returned to his native state in the fall of 1824; and, in February, 1825, was ordained deacon by bishop Bowen, and became a missionary first to Fairfield District, and afterwards to Greenville. In April, 1826, he was admitted to priest's orders by bishop Bowen, and, after filling out his unexpired term at Greenville, became rector, February, 1827, of Trinity Church on Edisto Island. In 1834 he resigned his charge on account of ill-health, and went to reside at St. Augustine, Fla., where his health so improved that the rectorship of the Church there was offered to him. He declined, and after a further residence there returned to South Carolina, and in 1836 accepted a call to the parish of St. John's, Berkeley County. In the winter of 1837-38 the disease of which he died (an affection of the bowels) began to show itself, but he continued to labor on until May 24, 1840, when he gave up work entirely, dying July 11 of the same year. A volume of *Sermons* was published after his death, under the supervision of his widow. See Sprague, *Annals of the American Pulpit*, v, 664.

**Thomas, Eleazer**, D.D., a minister of the Methodist Episcopal Church, was born in the State of New York; received an academic education at Cazenovia; was converted when seventeen; and entered Genesee Conference as a probationer in 1839. He was transferred to California in 1852, and was pastor one year of the Powell Street Church, San Francisco. In 1856 he was elected editor of the *California Christian Advocate*; and re-elected in 1860 and 1864. He was chosen book-agent in 1868, and, at the end of his four years' term in 1872, was appointed presiding elder of the Petaluma District. In the spring of 1873 he was appointed a member of the Peace Commission, and sent to treat with the Modoc Indians. On April 11 the commissioners were decoyed into the Lava Beds, Southern Oregon, and Dr. Thomas and Gen. Canby were killed. Dr.

Thomas was a man of good presence, fine address, and great zeal and energy as a minister. See Simpson, *Cyclop. of Methodism*, s. v.

**Thomas, Enoch**, a Presbyterian minister, was born Dec. 31, 1805, at St. George's, Newcastle Co., Del. He was prepared for college at the Phillips Academy at Andover, Mass., under John Adams, principal, and was graduated from Amherst College in 1833. About this time he united with the Second Presbyterian Church of Wilmington, Del. He then engaged for six months as assistant teacher in a seminary at Newark, Del., after which he entered Princeton Seminary, N. J., and remained there until near the close of 1835, when he left because of feeble health. He was licensed by the Wilmington Presbytery Oct. 14, 1835, after which he began to labor as a missionary in Rockingham County, Va. He was ordained *sine tutela* by the Lexington Presbytery at High Bridge Church, Va., June 17, 1837. For about a year he preached at Union, Port Republic, and Shiloh, where his labors were blessed and large congregations attended his ministry. Having accepted a call to Shemariah Church, Augusta Co., Va., he was installed as pastor Dec. 1, 1838. His health having improved, and the community having provided an academy, Mr. Thomas also commenced a classical school, which became in a short time quite flourishing. But the united duties of pastor and teacher were too onerous, and he was, at his own request, released from his former charge, Oct. 12, 1843. This was his only pastoral charge. Thenceforth he resided about eighteen years at Beverly, Randolph Co., and labored as a missionary in that and several adjacent counties, ranging over a wide extent of wild and mountainous country, preaching in court-houses, jails, school-houses, barns, and private houses, wherever any would gather to hear the Word of God. There was no minister nearer on the west than Clarksburg, and on the south-west than Parkersburg. Much of the wide region he traversed was a mountain wilderness; often his only road was an obscure path; dangerous rivers were to be forded; and many of the best people were living in log-cabins, often in a single room. But he enjoyed the work, gladly breaking the bread of life to the hungry and the starving. The breaking-out of the Civil War, in 1861, stopped his work, and his mission field became a scene of strife. Having removed his family from Beverly to Craigsville, Augusta Co., he occasionally supplied, during the war, the churches of Windy Cove, Warm Springs, and Lebanon. After 1865 he preached as opportunity offered. He generally taught school in the winter season. For several of his last years he suffered severely from chronic throat-disease. He died at Craigsville, Jan. 25, 1879. (W. P. S.)

**Thomas, John** (1), LL.D., an English prelate, was born at Carlisle, Oct. 14, 1712; was educated at the grammar-school at Carlisle, and Queen's College, Oxford. After his graduation he became an assistant at a classical academy, Soho Square, London; then private tutor to the younger son of Sir William Clayton. He was ordained deacon March 27, 1737, and priest Sept. 25. In the same year he was presented by George II to the rectory of Blechingly, and was instituted Jan. 27, 1738. On Jan. 18, 1748, he was appointed chaplain in ordinary to the king; April 28, 1754, he was made prebendary of Westminster; and Dec. 12, 1760, was appointed chaplain to George III. In 1762 he was appointed sub-almoner to the archbishop of York; and in 1766 was instituted to the vicarage of St. Bride's, London. He succeeded Dr. Pearce as dean of Westminster, 1768; and in November, 1774, became bishop of Rochester. He died Aug. 22, 1793. A valuable collection of his *Sermons and Charges* was published by Rev. G. A. Thomas (1796, 2 vols. 8vo).

**Thomas, John** (2), a Welsh Congregational minister, was born at Carmarthen, April 13, 1811. He was

converted at the age of eighteen, and became an efficient teacher in the Sabbath-school; removed to Newcastle in 1844, and, at the request of the Welsh population, became pastor of their chapel. He accepted a call from Glynneath in 1855; but after two years of labor with that people, under medical advice, resigned his charge. He died Aug. 3, 1870. See (Lond.) *Cong. Year-book*, 1871, p. 353.

**Thomas, Joshua**, a Welsh Congregational minister, was born at Penmain, Aug. 2, 1808. At an early age he was the subject of deep religious impressions, and at the age of seventeen joined the Church. He graduated at Brecon College, and was ordained pastor of the Church at Adullam Chapel, Merthyr-Tydvil, where he labored with zeal and energy for eleven years. In 1843 Mr. Thomas removed to Carmarthenshire, to take charge of the united churches of Bethlehem and Cape Isaac, where he labored for six years with much acceptance and success. In 1849 he removed to Aberavon, and devoted himself with indefatigable zeal to the spiritual improvement of the people; and, in spite of many difficulties, succeeded in erecting a spacious chapel and gathering a numerous congregation. His last charge was at Aberdare, where he labored till his death, Sept. 2, 1875. See (Lond.) *Cong. Year-book*, 1876, p. 377.

**Thomas, Richard H., M.D.**, a minister of the Society of Friends, was born in Anne-Arundel County, Md., June, 1805. "Having received a liberal education and completed a course of medical studies, he settled in Baltimore, where he became eminent as a practitioner and teacher of medicine." In the work of the ministry he labored with great diligence. He held many meetings among other denominations, and preached with great acceptability. He was a man of pleasing address; and, possessing great vivacity and extraordinary talents, he gained ready access to the most cultivated society. He died at his residence, near Baltimore, Jan. 15, 1860. See *Annual Monitor*, 1860, p. 128.

**Thomas, Robert Jernain, A.B.**, a Welsh Congregational missionary, was born at Rhayadar, Sept. 7, 1840. He matriculated at the London University at the age of sixteen, and gained the Mills scholarship and took high honors at the university. He was ordained June 4, 1863, at Hanover Chapel, and sailed the following month for Shanghai, under the direction of the London Missionary Society. He was afterwards appointed to the Pekin Mission, and on his way thither he undertook an extensive missionary journey through the peninsula of Corea, telling the glorious truths of the Gospel of Christ and distributing copies of the Scriptures. In 1865 the French admiral prepared an expedition against the Coreans, and Mr. Thomas was persuaded to act as an interpreter for the expedition. He was put to death by the Coreans while reading the Bible, July, 1866. See (Lond.) *Cong. Year-book*, 1868, p. 296.

**Thomas, Samuel (1)**, a Methodist Episcopal minister, became a member of the society, in the early period of Methodism, in the State of New Jersey. He was an acceptable local preacher for a number of years, entered the itinerancy in 1796, and filled the following stations: In 1796-97, Flanders Circuit; 1798, Elizabethtown Circuit; 1799, Freehold; 1800-1, Newburg; 1802, Bethel; 1803, Elizabethtown; 1804-5, Freehold; 1806, supernumerary in Brooklyn; 1807, in New York; 1808, superannuated, in which relation he continued until he died, in 1812. Mr. Thomas was a man of much prayer and diligence in searching the Scriptures, strongly attached to the doctrines and discipline of the Methodist Episcopal Church, and ever considered as a strict disciplinarian. See *Minutes of Annual Conferences*, i, 208; Stevens, *Hist. of M. E. Church*, iv, 281.

**Thomas, Samuel (2)**, an Independent minister, was born in Jorat, Switzerland, in 1801. By his own in-

dustry he obtained an education at Lausanne Academy, and was ordained at Grancy in 1825. After four years of usefulness at the latter place, Mr. Thomas was elected president of the Training Institute at Lausanne, a post for which he was eminently fitted, both by his earnest piety and varied gifts and attainments. In 1836 he was called to the Church of the Oratory at Yverdon, where he spent nineteen years of useful labor, and in 1855 settled at Neuchâtel. He died Jan. 12, 1867. Mr. Thomas was a man of inflexible principles, yet of most gentle and tender disposition. He took a conspicuous part in the revival movement in Switzerland, and showed himself a wise and experienced counsellor. See (Lond.) *Cong. Year-book*, 1868, p. 297.

**Thomas, Samuel (3)**, an English Congregational minister, was born at Pontreych, Nov. 20, 1815. He graduated at Brecon College in 1843, and was ordained to the pastorate of Ebenezer Chapel, Newport. Under his personal superintendence a new chapel was erected, and the Church membership greatly increased. In 1860 he removed to Bethlehem, and labored with the Church there until his death, April 5, 1869. See (Lond.) *Cong. Year-book*, 1870, p. 322.

**Thomas, Thomas**, a Welsh Congregational minister, was born near Carmarthen in 1822, and was brought up under Unitarian influence and educated for the medical profession; but the love of evangelical truth induced him to enter the ministry. He graduated at Homerton College, and accepted the pastorate of Fetter Lane Chapel, London; and labored also at Wellingborough thirteen years. In 1858 he removed to Bethnal Green Chapel, London, and labored with them until his death, March 13, 1861. Mr. Thomas was a worker of the highest type, and his generous nature and vivid imagination endeared him to a large circle of friends. See (Lond.) *Cong. Year-book*, 1862, p. 263.

**Thomas, William (1)**, an English prelate, was born at Bristol, Feb. 2, 1613, and received his primary education in the school of Carmarthen, where his grandfather lived. He entered St. John's College, Oxford, in 1629, and removed, later, to Jesus College, of which he was afterwards chosen a fellow and appointed tutor. His ordination as deacon took place at Christ Church, June 4, 1637, and as priest in the year following. His first preferment was the vicarage of Penbryn, Cardiganshire. He became chaplain to the earl of Northumberland, who presented him to the vicarage of Laugharne, with the rectory of Llanadwrn annexed. In 1644 a party of Parliament horse came into town threatening to kill Mr. Thomas if they found him praying for the queen. They did interfere with the service, but were so struck with his composure and patience that they left him without further disturbance. Soon after, the Parliament committee deprived him of his living of Laugharne, from which time till the Restoration he endured great hardships, being obliged to teach a private school for his support. At the Restoration, Mr. Thomas was reinstated in his living, and by the king's letters-patent made chanter of St. David's. In 1661 he was presented to the rectory of Llanbedr in the Valley, Pembroke County, and made chaplain to the duke of York, through whose influence he was promoted to the deanery of Worcester, Nov. 25, 1665; and was presented to the rectory of Hampton Lovett in 1670. Here he removed his family, quitting the living of Laugharne. In 1677 he was promoted to the see of St. David's, and held the deanery of Worcester in commendam. Having been bishop of St. David's six years, he was translated to the see of Worcester, where he effected several reforms. He died June 25, 1688. Bishop Thomas published, *An Apology for the Church of England* (1678-79, 8vo);—*A sisee Sermon* (1657);—*The Mamon of Unrighteousness*, a sermon, *His Letter to the Clergy*, and an imperfect work, *Roman Oracles Silenced*, were published after his death. See Chalmers, *Biog. Dict.* s. v.

**Thomas, William** (2), an English clergyman and antiquarian, was grandson of the preceding, and was born in 1670. He was educated at Westminster school, whence he was elected to Trinity College, Cambridge, June 25, 1688. Here he took his master's degree, and soon went into orders, and had the living of Exhall, in Warwickshire, given him by the interest of lord Somers. Queen Anne was well disposed towards him, but he declined preferment or attendance at court. For the education of his family he removed to Worcester in 1721, and in 1723 was presented to the rectory of St. Nicholas in that city. He died July 26, 1738. Besides being skilled in the Greek and Latin languages, he also mastered the French, Italian, and Saxon. He published, *Antiquitates Prioratus Majoris Malvernensis* (1725):—an edition of *Dugdale's Warwickshire* (1730):—and *Survey of the Cathedral Church of Worcester* (1746). He intended to have published a history of Worcestershire; and, to gather material for this, visited every church in the county. To these labors Dr. Nash owns himself greatly indebted.

**Thomasin** of ZIRKLARIA (*Zerkläre*), in the Italian Tyrol, wrote a lengthy didactic poem between August, 1215, and May, 1216, entitled *Der wälsche Gast* (*The Foreign Guest*), by which production he began the extended series of ethical poems that distinguish the 13th century. Thomasin was a layman, and wrote for laymen, and with him begins the distinction between a religious morality for the people and a theological morality of the Church. His work is characterized by vivacity and gracefulness, by clearness of expression and warmth of feeling, though not by æsthetical and linguistic beauties. Independence of thought is also a leading quality, and is carried to such a degree as to defend the principle that conscience is superior to ecclesiastical institutions of every kind. Thomasin does not rage against the priesthood and the papacy, but rather esteems them very highly when they "bear the image of good doctrine;" but he does not, on the other hand, hesitate to utter in their ears the most cutting truths. His object, in brief, was to teach a practical morality; and his place is rather among the exponents of the religious and ethical tendencies of his time than among the poets. He teaches that *Stille*, an inward and settled affinity for the good and the right, is the centre of all virtues. This is not the *Constantia* of the stoical Seneca merely, but a positive energy which actually gives effect to the impulses of the heart. Evil is *Unstille*, or instability. Among particular virtues, humility is given the first place. The book existed in MS. form only until 1852, when it was issued by Rückert under the title *Der wälsche Gast des Thomasin von Zirklaria* (Quedlinburg and Leipzig), with notes. Comp. the extracts given in *Gesch. d. poet. Nationalliteratur*, by Gerwinus, and see Diestel, *Der wälsche Gast u. d. Moral des 13ten Jahrh.* in Kiel, *Allgem. Monatsschrift*, Aug. 1852, p. 687-714.—Herzog, *Real-Encyklop.* s. v.

**Thomasius, Gottfried**, a German Protestant divine, was born in the year 1802 at Egenhausen, in Franconia. In 1821 he graduated at the gymnasium in Ansbach, and prosecuted his theological studies at the universities of Erlangen, Halle, and Berlin. In 1829 he was preacher at the Church of the Holy Ghost in Nuremberg, and in 1830 religious instructor, also, at the gymnasium there. In 1842 he was called to Erlangen as professor of dogmatics and university preacher. For more than thirty years he filled that chair, and died as senior of the faculty, Jan. 24, 1875. He published, *Origenes: ein Beitrag zur Dogmengeschichte des 3ten Jahrh.* (Nuremb. 1837):—*De Controversia Hofmanniana Commentatio* (Erlangæ, 1844):—*Beiträge zur kirchlichen Christologie* (ibid. 1845):—*Dogmatia de Obedientia Christi Activa Historia et Progressione inde a Confessione Augustana ad Formulam usque Concordiæ* (ibid. 1846):—*Das Bekenntnis der evang.-luth. Kirche in der Consequenz seines Prinzipes* (Nuremb. 1848):—*Christi Person und Werk*:

*Darstellung der luther. Dogmatik vom Mittelpunkt der Christologie aus* (Erlang. 1853-61, 3 vols.; 2d ed. 1857):—*Das Bekenntnis der luther. Kirche von der Versöhnung und die Versöhnungslehre Dr. Chr. K. v. Hofmanns* (ibid. 1857). He also published several volumes of *Sermons*:—*a practical Commentary on Paul's Epistle to the Colossians* (Erlang. 1869), etc. See Zuchold, *Bibl. Theol.* ii, 1337 sq.; *Theologisches Universal-Lexikon*, s. v.; *Literarischer Handweiser für das kath. Deutschland*, 1868, p. 119; Herzog, *Real-Encyklop.* s. v. (B. P.)

**Thomassin, Louis** DE, a learned French divine, was born at Aix, in Provence, Aug. 28, 1619. At the age of fourteen he was admitted into the Congregation of the Oratory, where he remained as professor of moral philosophy until he was appointed to the chair of divinity at Saumur. He removed to Paris in 1654, to hold conferences in positive theology in the Seminary of Sainte-Magloire, which he continued till 1688. From that time he was engaged principally with his writings until his death, Dec. 25, 1695. His principal works are, *Ecclesiastical Discipline* (reprinted 1725, 3 vols. fol. in French):—*Theological Dogmas* (1680, 3 vols. fol. in Latin):—*Tracts on the Divine Office; on the Feasts; on the Fasts; on Truth and Falsehood; on Alms; on Trade and Usury* (all 8vo):—*Tr. Dogmatique des Moyens dont on s'est servi dans tous les Temps pour maintenir l'Unité de l'Eglise* (1703, 8 vols. 4to):—also *Directions for Studying and Teaching Philosophy in a Christian Manner* (8vo):—*A Universal Hebrew Glossary* (Louvre, 1697, fol.):—*Dissertations on the Councils*, in Latin (1667, 4to):—*Mémoires sur la Grâce* (1682, 4to). His life, by Bordes, is prefixed to his *Hebrew Glossary*. See Chalmers, *Biog. Dict.* s. v.; Hook, *Eccles. Biog.* s. v.; Herzog, *Real-Encyklop.* s. v.; Hoefler, *Nouv. Biog. Générale*, s. v.

**Thomists**, a name often given to the followers of Thomas Aquinas, who, besides adopting the Aristotelian philosophy, in opposition to Duns Scotus, who held the Platonic, also taught the doctrines of Augustine on the subject of original sin, free grace, etc. He condemned the dogma of the immaculate conception, in opposition to Scotus. The two sects were also divided on the question of the sacraments, as to whether grace was conferred by them physically or morally; the Thomists holding the former, the Scotists the latter. Dens, who was a Thomist, in his theology, explains what is meant by the view of his party. He says, "The sacraments possess a physical causality, as the instruments of divine omnipotence, and truly and properly concur towards the production of their effects on the mind by a supernatural virtue from the principal agent, communicated to and united with it in the manner of a transient action; and, moreover, such a causality is more conformable to the declarations of Scripture, and demonstrates more fully the dignity of the sacrament, and the efficacy of the divine omnipotence and of the merits of Christ. Besides, they say that this is also more conformable to the sentiments of councils and fathers, who, as they explain the causality of the sacraments, use various similitudes which undoubtedly designate a causality more than moral." On the contrary, the Scotists teach that "the sacraments do not cause grace physically, but morally; that is, they do not produce grace as physical causes do, but as moral causes; inasmuch as they efficaciously move God to produce the grace which they signify, and which God himself promises infallibly to give as often as they are rightly administered and worthily received," etc. The Thomists were Realists, while the Scotists were Nominalists; and although the Roman see naturally inclined to favor the doctrines of the Scotists, the prestige of Aquinas was so great that the Thomists ruled the theology of the Church up to the time of the controversy between the Molinists (q. v.) and the Jansenists, when the views of the Scotists substantially prevailed. See AQUINAS, THOMAS A.

**Thomlinson, Joseph Smith**, D.D., a minister of

the Methodist Episcopal Church, was born in Georgetown, Ky., March 15, 1802; and, after serving a time at the saddler's trade, entered Transylvania University, where he held a high rank as a scholar. When Lafayette visited the institution, Thomlinson was the person chosen to tender him the greetings of his fellow-students. He graduated in 1825, and became professor of mathematics and natural philosophy in Augusta College. In the same year he was admitted to the travelling connection, and in due time was ordained to the offices of deacon and elder. Having served as professor for some time, he was chosen president of the Augusta College, and held that office till 1849, when the institution was broken down by a withdrawal of the patronage of the Kentucky Conference, and the repeal of its charter by the legislature of the State. He was subsequently elected to a professorship of the Ohio Wesleyan University, Delaware, O., but declined to accept it, though he acted as agent for the institution for two years. He accepted an election as professor in the university at Athens, O., and, having served in this capacity for a year, was chosen president, which latter position he declined on account of ill-health. His mind was so affected by the sudden death of a favorite son that he never fully recovered; and although elected to the presidency of the Springfield High-school and of the State University of Indiana, he declined both. He died at Neville, O., June 4, 1853. See Sprague, *Annals of the Amer. Pulpit*, vii, 706.

**Thom'oi** (Θομοί, Vulg. *Cuesi*), a corrupt Greek form (1 Esdr. v, 32) of the Heb. name (Ezra ii, 53; Neh. vii, 55) TAMAH or THAMAH (q. v.).

**Thompson, Alexander Scroggs**, a Presbyterian minister, was born April 28, 1834, at Big Spring (Springfield), Cumberland Co., Pa. He received his early education at Newville Academy under Rev. Robert McCachren, and at Shippensburg Collegiate Institute under Prof. R. L. Sibbet. At an early age he joined the United Presbyterian Church of Big Spring, near Newville. He graduated from Jefferson College, Pa., in 1864, and soon after entered Princeton Theological Seminary, N. J. There he studied two years (1864-66), and afterwards spent a third year (1866-67) at the Western Seminary at Allegheny, Pa. He was licensed by New Brunswick Presbytery April 18, 1866, and supplied New Harmony Church in Donegal Presbytery during the summer of that year. He was ordained by the Presbytery of Allegheny at Worthington, Armstrong Co., Pa., Nov. 20, 1867, and on the same day installed pastor of Worthington Church. This relation continued until his death, which occurred suddenly, Dec. 4, 1878. He was retiring in his manners, true in his friendships, a very successful minister, and a model pastor. His remains were buried at Newville, Pa. (W.P.S.)

**Thompson, Amherst L.**, a young Congregational missionary, was born at Peru, Mass., in 1834. Converted at the age of fourteen, he resolved to prepare himself for the ministry. Trusting in Providence and his own arm, he went through the curriculum of Monson Academy and Amherst College, graduating in 1856. He studied theology partly at New York and partly at Andover, graduating at the latter place. He was ordained to the missionary work at Amherst Feb. 2, 1860, and on the 18th, in company with eight other missionaries, sailed from Boston for Urumiyah, Persia, where he arrived July 1. On Aug. 16 he was taken with a severe chill, which soon developed into a terrible fever, completing its fatal work on the 25th. He sleeps by the side of Stoddard in the little mission burying-ground in Mt. Seir, Urumiyah. Mr. Thompson had a vigorous and keen intellect, coolness and strong common-sense, and a brilliant imagination. As a man and a Christian he is represented as a model. At his graduation at Andover he delivered an essay on *Congregational Church Polity Adapted to Foreign Missionary Work*, which was published in the *Cong. Quarterly*, Jan. 1860. See *Cong. Quar. Rev.* 1861, p. 67.

**Thompson, Anthony, A.B.**, an English Congregational minister, was born at Alnwick in 1835. He graduated at Spring Hill College, and matriculated at the London University. In 1863 he accepted a call from Douglas, Isle of Man, and, full of zeal and hope, entered upon his labors. His pulpit ministrations were marked by many tokens of blessings. He had a deep consciousness of the responsibilities attending his position, and faithfully fulfilled the duties devolving upon him. He died April 5, 1866. See (Lond.) *Cong. Year-book*, 1867, p. 322.

**Thompson, Anthony F.**, a Methodist Episcopal minister, was born in Kentucky, Sept. 2, 1806. He became an exhorter in 1824, and was soon after licensed as a local preacher, received on trial in 1829, appointed to Terre Haute Circuit, Indiana Conference, in 1832, and died May 19, 1833. He was a young man of excellent talents. See *Minutes of Annual Conferences*, ii, 277.

**Thompson, Charles**, a Presbyterian minister, was born at Salem, N. Y., Nov. 26, 1831. He was converted in 1853; educated at Monmouth College and Theological Seminary, Monmouth, Ill.; licensed by Chicago Presbytery April 3, 1863; ordained by Monmouth Presbytery pastor of Olena and Oqnaka churches, Ill., June 17, 1863; and died Dec. 31, 1865. He was a good man, "walked with God," and preached in demonstration of the spirit, and with power. See Wilson, *Presb. Hist. Almanac*, 1867, p. 368.

**Thompson, Frederick Bordine**, a missionary of the Reformed Church in America to Borneo, was born in 1810, and united with the Church in New Brunswick, under Rev. Dr. James B. Hardenbergh, at the age of seventeen. His pastor having induced him to prepare for the ministry, he graduated at Rutgers College in 1831, and at the Theological Seminary in New Brunswick in 1834. After being settled as pastor of the Church at Upper Red Hook, N. Y., from 1834 till 1836, he determined to devote himself to foreign missionary work, and was sent by the American Board of Commissioners for Foreign Missions, and the Board of Foreign Missions of his own Church, with the devoted William J. Rohlman, to join the mission in Borneo. He reached Singapore Sept. 17, 1838, and labored at Karangan, one of the two stations occupied by the mission (the other being Sambas), for several years, with great industry and devotion to his work, among the Dyaks. His first wife, formerly a Miss Wyckoff, of New Brunswick, died in 1839. In 1840 he married a Swiss lady, Miss Combe, a teacher in the mission, who also died, in 1844. In 1847 a hemorrhage of the lungs compelled him to desist from labor; and, by medical advice, he sailed for Europe with his motherless daughter, to place her with her relatives in Switzerland, and to try the benefit of the change of climate for himself. At first he improved, but the disease returned, and he died Jan. 17, 1848. Thus ended the brief career of one whose piety, talents, and consecration bade fair to place him, if he had been spared, among the very first of modern evangelists to the heathen. He was a grave, quiet, devout, and intensely earnest man. His missionary trials and last illness were borne with patient submission to the will of God, and with clear views of his acceptance and peace with the Lord. His labors among the Dyaks, like those of the whole mission, seemed to be fruitless of immediate results; but his name lives in the Church as a power for missions, and perhaps in future ages Borneo will enshrine it among her first evangelists. See Corwin, *Manual of the Ref. Ch.* p. 489. (W. J. R. T.)

**Thompson, George C.**, a Methodist Episcopal minister, was born at Nanticoke, Luzerne Co., Pa., Jan. 15, 1817. He was converted in December, 1832, educated at Cazenovia Seminary, licensed to preach Aug. 6, 1836, received on trial in the Oneida Conference in 1840, and appointed to Dundaff Station; in 1841, to Montrose Circuit; in 1842, ordained elder and reappointed to the same circuit; in 1843 he became insane, and died Sept.

18, 1846, at the New York Lunatic Asylum in Utica. His talents as a minister were elevated. "In ministerial labors he was abundant, in mental application he was excessive." See *Minutes of Annual Conferences*, iv, 257.

**Thompson, George Washington, D.D.**, a Presbyterian divine, was born at New Providence, Essex Co., N. J., Oct. 10, 1819; converted in 1835; graduated at Rutgers College, New Brunswick, N. J., and at the Princeton Theological Seminary; was licensed by the Presbytery of New Brunswick; ordained pastor of the churches of Mifflinsburg and New Berlin, 1842; became pastor of the Church of Lower Tuscarora in 1847, and remained there seventeen years. He died Jan. 28, 1864. Dr. Thompson had an acute, ready, practical mind. As a scholar he was thorough and critical; his *Expository Lectures on Daniel and on the Romans* display a vast amount of patient research, deep thinking, critical analysis, and full knowledge of the teachings of the Bible. See Wilson, *Presb. Hist. Almanac*, 1865, p. 123.

**Thompson, John**, a Presbyterian minister, was born near Chambersburg, Franklin Co., Pa., Nov. 11, 1772. He received his literary training in the Kentucky Academy, Lexington, studied theology privately, was licensed by Transylvania Presbytery in 1799, and ordained by Washington Presbytery, O., in 1801. He was pastor of Glendale Church, O., 1801-33; then removed to Indiana, became a member of Crawfordsville Presbytery, and labored as an evangelist. He died Feb. 15, 1859. He was an earnest revival preacher, an eloquent and successful minister, and many persons were hopelessly converted under his labors. See Wilson, *Presb. Hist. Almanac*, 1860, p. 123.

**Thompson, Jonathan**, a Wesleyan Methodist preacher, was born at Torhouse, Haltwhistle, Northumberland, England. In his early life he resided for a time in Ayr, Scotland. He was converted under Cownley at Newcastle-upon-Tyne. In 1786 he returned to Ayr, where he officiated as a local preacher. In 1789 he came out to labor in connection with the British Conference, and was sent to the Inverness Circuit. He was soon cut down by a fever in Elgin, Morayshire. He was interred in the same tomb that had received the remains of the holy Joshua Keighley only a year before. Young Thompson was a man of holiness and much prayer. "His great zeal for God, united with the fervor and imprudence of youth, led him to excessive labor in the work of his great Master, which proved the cause of his death." See *Minutes of Wesleyan Conferences*, 1790; Atmore, *Meth. Memorial*, s. v.

**Thompson, Joseph Parrish, D.D., LL.D.**, an eminent Congregational divine, was born in Philadelphia, Aug. 7, 1819. He graduated at Yale College in 1838. Afterwards he pursued the study of theology at the Andover and New Haven Theological schools. In November, 1840, he was ordained pastor of the Chapel Street Congregational Church in New Haven. While occupying this position, Dr. Thompson assisted in establishing *The New-Englander*. He published also, while at New Haven, a *Memoir of Timothy Dwight*. In 1845 he was called to the pastoral charge of the Broadway Tabernacle Church in New York city, and was installed on the 15th of April of that year. For some years the Tabernacle continued to be a great centre of religious interest. The vast edifice was often thronged by a congregation composed of strangers, young men, and those who had no regular place of worship. The Tabernacle Church was the mother of several Congregational churches in New York and Brooklyn. The society determined to sell the Tabernacle in 1855, and the new church was built at the intersection of Broadway, Sixth Ave., and Thirty-fourth Street. This building was completed in 1859, and dedicated April 24 of that year. Under the ministry of Dr. Thompson the society flourished exceedingly. When the church was dedicated there was a debt upon it of \$65,000. No pews were sold, as

it was resolved that there should be no private ownership in the building. In 1863 the society paid off \$25,000 of this indebtedness; the remaining sum of \$40,000 was paid in March, 1864. Notwithstanding Dr. Thompson's immediate pastoral labors, he was always busy with his pen. In 1845 he printed a *Memoir of David Hale* (late editor of the *Journal of Commerce*), with *Selections from his Miscellaneous Writings*—a work which passed through various editions. In 1846 appeared his *Young Men Admonished*, afterwards, in subsequent editions, which were numerous, entitled *Lectures to Young Men*. *Hints to Employers* appeared in 1847, and another edition in 1851. *Stray Meditations* was published in 1852; and in 1857 there was a revised edition, entitled *The Believer's Refuge*. He was one of the first editors of the *Independent*, being associated in that service with the Rev. Dr. Storrs and the Rev. Dr. Bacon. In 1852 he originated the plan of the Albany Congregational Convention. He also served as a manager of the American Congregational Union and of the American Home Missionary Society. In 1852 he went abroad, visiting Palestine, Egypt, and other Eastern lands. This gave an Oriental cast to his subsequent studies and writings, and he became well known as an authority in Egyptology. Many of his writings upon this subject appeared in the *North American Review*, the *Bibliotheca Sacra*, the *Journal of the American Geographical and Statistical Society*, in Smith's *Dict. of the Bible*, and the revised edition of Kitto's *Cyclop. of Biblical Literature*. He published *Egypt, Past and Present*, in 1856. During the Civil War, Dr. Thompson occupied a warmly patriotic position. He did a great deal for the Christian Commission. Twice he went to the South; he visited the army; and he was a member of the Union League Club. His son was killed in the service of the country. Dr. Thompson published (1863) a souvenir of him entitled *The Sergeant's Memorial, by his Father*. When president Lincoln was assassinated, Dr. Thompson delivered a notable eulogy upon him before the Union League Club. In 1872 Dr. Thompson was compelled by ill-health to sever the relation which he had so long maintained with the society. One night, while working in his study, he imagined that he heard a terrible crash, as if the whole house were falling, and he remembered nothing more until he regained consciousness at three o'clock in the morning. When he resigned his pastoral charge of the Tabernacle Church, it made him a gift of \$30,000, and individuals gave him \$20,000 more. Having resolved upon going abroad, he took up his residence in Berlin, where he devoted himself to study, especially in Egyptology. During the controversy between Bismarck and the pope, at the request of the Prussian minister, he prepared and published a work on the relations of Church and State in America; and in the Centennial Year he delivered in different cities of Europe several addresses concerning the United States. His oration occasioned by the death of Mr. Bayard Taylor, the American minister, delivered in Berlin, was a beautiful and much-admired production. He had prepared an address to be delivered before the Evangelical Alliance at Basle, Switzerland, on the subject of the persecutions in Austria. When Mr. Taylor died, Dr. Thompson was spoken of as his successor. It is known that when the rumor reached his ears, he wrote that he could not accept the position, and considered himself unfitted for it. He spoke excellently both French and German, and he frequently had occasion to employ his accomplishments as a linguist in the public addresses which he delivered in Europe. Though always an invalid, Dr. Thompson's last illness was caused by an accident which had happened to him during his visit to London, when, while standing upon the doorstep of a friend's house, he was prostrated by vertigo, severely injuring his head. He died at Berlin, Sept. 20, 1879. Among his other productions may be noted *The College as a Religious Institution* (1859):—*Love and Penalty* (1860):—*Bryant Grey* (1863):—

*Christianity and Emancipation* (1863) :—*The Holy Comforter* (1866) :—*Man in Genesis and Geology* (1869) :—*and Life of Christ* (1875) :—with a great variety of pamphlets and of contributions to periodical literature. He was understood, at his death, to be preparing a work on *The Hebrews in Egypt*. See *N. Y. Tribune*, Sept. 22, 1879.

**Thompson, Joseph Russell**, a Presbyterian minister, was born Sept. 15, 1823. He received a good academical training, graduated at Jefferson College in 1848, and at the Associate Theological Seminary at Canonsburg, Pa., in 1851; was licensed by the Associate Presbytery of Chartiers in 1852, and ordained and installed pastor of the Mount Pleasant Church April 25, 1853. He died Dec. 16, 1861. Mr. Thompson was a popular preacher, a constant worker, and a tender and thoughtful pastor. See *Wilson, Presb. Hist. Almanac*, 1863, p. 365.

**Thompson, Lewis**, a Presbyterian minister, was born at Volney, N. Y., April 25, 1830. After receiving a classical education, he entered the Union Theological Seminary in 1854, and, completing the course, graduated in 1857. He was ordained and installed pastor of the Church in Whippany, N. J., June 9, 1857. He remained in this charge with great acceptability and usefulness until 1869, when he resigned to become editor of a religious paper in Bricksburg, N. J. He occupied this post for two years, and then removed to Brooklyn, N. Y., and became a classical teacher, in the occupancy of which position he died, April 19, 1878. (W. P. S.)

**Thompson, Otis**, a Congregational minister, was born in 1778, and was a graduate of Brown University in the class of 1798. After his graduation he was a tutor in the university for two years (1798-1800). Having pursued his theological studies with Dr. Emmons, of Franklin, Mass., he was settled for life as pastor of the Congregational Church in Rehoboth. For many years he received and instructed pupils who were looking forward to the ministry. He was everywhere regarded as a profound theologian, and a man of more than usual ability. He published several sermons and discourses, and for several years was the editor of a journal known as the *Hopkinsian Magazine*. He died at North Abington, Mass., June 26, 1859. (J. C. S.)

**Thompson, Robert Gordon**, a Presbyterian minister, was born Oct. 22, 1806, in Conemaugh township, Indiana Co., Pa. His education preparatory to the college was received in part from the Rev. Jesse Smith, pastor of the Ebenezer congregation in Indiana County, and in part in the preparatory department of Jefferson College at Canonsburg, Pa. He united, on profession of his faith, with the Chartiers Presbyterian Church, Washington Co., in 1827. He was graduated from Jefferson College in September, 1830, and passed from college immediately into Princeton Theological Seminary, N. J., where he spent two and a half years (1830-33) in study. He was licensed by the Presbytery of Philadelphia, April 19, 1833; and was ordained by the same presbytery, *sine tutela*, in the Great Valley Presbyterian Church, Oct. 7, 1833. Mr. Thompson spent the first two years of his ministry (from June 1, 1833, to June 1, 1835) as stated supply at Poundridge, Westchester Co., N. Y., where his labors were accompanied by a blessed revival. Having accepted a call to Yorktown, N. Y., he was installed as pastor of the Church at that place, May 18, 1836; and after a most successful pastorate of ten years, having accepted a call to Tariffville, Conn., was released Feb. 5, 1846, and installed pastor of the Presbyterian Church at Tariffville, March 17, 1846. There he labored with ability and fidelity six and a half years, when, his health becoming impaired, he was released by his presbytery, Sept. 30, 1852, and removed to Wisconsin. His next field was Roscoe, Ill., where he preached as stated supply from Oct. 24, 1852, to Oct. 8, 1854. From 1855 to 1862 he supplied, for longer or shorter periods, as his health permitted, the churches of Rockford, Roscoe,

Belvidere, and Willow Creek, Ill.; and Janesville and Brodhead, Wis. From July 1, 1862, he supplied Willow Creek Church for two years, when, having accepted a call from that Church, he was installed as pastor, July 6, 1864; and labored there very usefully until he was released, Nov. 16, 1868. He next preached as stated supply at Brodhead from Dec. 5, 1869, to Oct. 9, 1871. A few weeks after the latter date he removed to Greeley, Col., to take charge as pastor of a newly organized Presbyterian Church, but was never installed, although he continued as pastor elect to fill its pulpit until March 1, 1877. From this time he was without any charge, but continued to be, so far as his age and increasing physical infirmities would permit, active in laying the foundation both of the Church and of the State in that new region. He died at Greeley, March 19, 1879. Mr. Thompson's views of truth were clear and strong, and his voice gave no uncertain sound. As a preacher he was solid and able, at the same time earnest and affectionate; as a presbyter he was unsurpassed in Christian uprightness; as the head of a family he tenderly loved, and was beloved. (W. P. S.)

**Thompson, Samuel**, a Methodist Protestant minister, was born on the rocky shores of Maine, Oct. 5, 1782; he was converted in 1802, and at once began to preach. Three years later he was ordained deacon, and, after two more, elder. In 1812 he was located, and in 1816 removed to Wheeling Creek, W. Va., where he spent six and a half years, and then withdrew from the Methodist Episcopal Church, and united in the movement that eventually resulted in the Methodist Protestant Church. For fifteen years he labored to build up this new branch of the Methodist denomination, when from conscientious impulses he united others in raising an antislavery Church (the Wesleyan). In 1848 he removed to Iowa, and continued in connection with the Wesleyans until 1860, when, learning of the antislavery element in the Methodist Protestant Church, he reunited with them at Mount Pleasant, Ia., and continued to labor in their interest till his death, Oct. 24, 1867. See Bassett, *Hist. of the Meth. Prot. Church*, p. 348.

**Thompson, Samuel H.**, a Methodist Episcopal minister, was born in Westmoreland County, Pa., March 16, 1786, and carefully instructed in the principles of the Christian religion according to the views of the Presbyterian Church. In 1804 he joined the Methodist Episcopal Church; was received on trial in the Western Conference in 1809; and from that time until 1836, a period of twenty-seven years, his field of labor in successive years embraced large portions of the states of Ohio, Indiana, Kentucky, and the whole of the territories of Missouri and Illinois. In all this vast region he first assisted to plant the principles of the Gospel, and afterwards continued to cultivate them with the most assiduous labor. In 1836, his health failing, he was compelled to take a superannuated relation, and, as such, for the next four years he served the Church in the stations of Alton, Vandalia, Hillsborough, and Belleville. In 1840 he was again returned effective, and appointed to Belleville station, but died March 19 of that year. He was a minister of fine abilities, and everywhere he breathed the peaceful spirit of Christianity around him. See *Minutes of Annual Conferences*, iii, 346.

**Thompson, Thomas**, a Methodist Episcopal minister, was born in Beaver County, Pa.; awakened at a camp-meeting under the preaching of the Rev. William Swayze; admitted on trial in the Pittsburgh Conference in 1831, and appointed to Leesburg Circuit. He labored as follows: Centreville, Mercer, Newcastle, Richmond, Salem, Lumberport, and Grandview. In 1843 he became a supernumerary, and in 1848 a superannuate. He died Feb. 13, 1851. See *Minutes of Annual Conferences*, iv, 602.

**Thompson, William**, an eminent English Wesleyan preacher, was born in the county of Fermanagh,

Ireland, in 1733. He was converted young, and in 1757 he commenced his ministry among the Methodists. In 1758 he went to England, and soon learned what kind of a work it was which he had undertaken. On one occasion, when Mr. Thompson was preaching, a mob, instigated by a minister of the Church of England, arose and carried him and the principal Methodists on board a transport which was ready to sail with a war-fleet, England then being engaged in war on the Continent. Through the exertions of lady Huntingdon, however, the government ordered their release. In 1760 Thompson labored in Scotland, but with little success. After 1782 he travelled some of the principal circuits in England. His last was Manchester. He died at Birmingham, May 1, 1799, of a disease the seeds of which had been sown in 1764 by sleeping in a damp bed—an indiscretion which killed many of the early Methodist preachers. William Thompson was one of the men who piloted the bark of Methodism through the troublous waters after the death of the great helmsman, Wesley. He was a man of that calmness, sagacity, and statesmanlike cast of mind which were so much needed at that time, and which led to his election as president of the first Conference (1791) after Wesley's death. He was one of the committee appointed to converse with Kilham. With the endorsement of Benson, Bradburn, Hopper, and others, he sent out the *Halifax Circular*, which marked out a basis for the preservation and government of the infant Church. Mather and Pawson consulted him on the state of the connection. He arbitrated in regard to the settlement of the Bristol disputes in which Benson was embroiled; he approved Mather's *Letter to the Preachers*; and he gave to Methodism its district meetings and *Plan of Pacification*. He was one of the ablest speakers and closest reasoners in the British Conference. "Fewer traces," says Bunting (in his *Life* of his father, Jabez Bunting, ch. vi), "are to be found of him than of any of his eminent contemporaries. My father used to speak of the old man's gravity of speech, spirit, and demeanor, and of the advantages he himself derived from his example and ministry." See *Atmore, Meth. Memorial*, s. v.; *Minutes of Annual Conferences*, 1799; Stevens, *Hist. of Methodism*, iii, 25, 33, 140; *Memoir of Entwisle*, ch. iii; Smith, *Hist. of Wesl. Methodism*, vol. i, ii (see Index, vol. iii).

**Thompson, William J.**, a clergyman of the Reformed Church, and a classical teacher of high reputation, was born at Readington, N. J., March 8, 1812. He was the grandson of John Thompson, a Scotch immigrant who was killed by the Indians near Williamsport, Pa. After graduating at Rutgers College in 1834, he taught successfully at Millston, N. J., until 1838, when he began to pursue the usual course of instruction in the Theological Seminary of the Reformed Church. He entered the ministry in 1841, and was settled over the churches of Ponds and Wyckoff, N. J., for three years (1842-45), when he accepted the position of rector of the Grammar-school of Rutgers College. He held this important place eighteen years (1845-63), when he resigned and became principal of the Somerville Classical Institute. He died in 1867. He was a thorough student, scholar, and teacher. His standard of education was high; his drill incessant, exacting, and minute. He was never satisfied until his pupils had been made familiar with their subjects. He was also tutor in the classics in Rutgers College (1838-41), during his seminary course. Hundreds of his students have passed successfully into the learned professions and other honorable callings. A paralysis of the right side, which afflicted him at four years of age, and during his whole life, interfered materially with his pulpit efficiency, but did not affect his voice or mental powers. He was an enthusiastic teacher, sometimes stern and severe in discipline, but always conscientious, capable, and successful in dealing with intelligent scholars who wished to learn. His mind was clear and logically exact; his knowledge was always at command. His character was distinguished

for unyielding uprightness and an honorable spirit; his attainments in the sacred languages and theology were large and accurate. As a preacher, he was plain, without any ornamentation of style or force of delivery; but evangelical in doctrine and practical in his aims. See Corwin, *Manual of the Ref. Ch.* p. 492. (W. J. R. T.)

**Thomson, Andrew, D.D.**, a Scotch Presbyterian minister, was born at Sanquhar, Dumfriesshire, July 11, 1779, and educated at the University of Edinburgh. He was pastor of the Church at Sprouston, Roxburghshire, from 1802 till 1808; afterwards of the East Church of Perth till 1810; subsequently of the New Grey Friars' Church, Edinburgh; and finally of St. George's Church, until his death, Feb. 9, 1831. Dr. Thomson was a man of unconquerable zeal, untiring energy, and commanding eloquence. He attacked the British and Foreign Bible Society for circulating the Apocrypha with the Holy Scriptures. He opposed the abuses of lay patronage in the Church of Scotland, effectually denounced British colonial slavery and other evils, and did much to promote education, morality, and evangelical religion in Scotland. Dr. Chalmers says of him, "His was no ordinary championship; and although the weapons of our spiritual warfare are the same in every hand, we all know that there was none who wielded them more vigorously than he did, or who, with such an arm of might, and voice of resistless energy, carried, as if by storm, the convictions of his people." Among Dr. Thomson's works are, *Lectures, Expository and Practical, on Select Portions of Scripture* (Edinb. 1816, 2 vols. 8vo):—*Sermons on Infidelity* (1821, 18mo; 1824, cr. 8vo):—*Sermons on Hearing the Word* (1825, 18mo):—*The Scripture History* (Bristol, 1826, 12mo):—*The Scripture History of the New Testament* (Lond. 1827, 12mo):—*Sermons on Various Subjects* (Edinb. 1829, 8vo):—*Doctrine of Universal Pardon, being Sermons with Notes* (1830, 12mo). He also published a number of *Catechisms*, educational and religious works for children. He originated and edited the *Edinburgh Christian Instructor* (1810 sq.), and contributed to the *Edinburgh Encyclopaedia*. After his death appeared his *Sermons and Sacramental Exhortations*, with *Memoir* prefixed (1831, 8vo; Boston, 1832, 12mo). See Chambers and Thompson, *Biog. Dict. of Eminent Scotsmen*. (W. P. S.)

**Thomson, Edward, D.D.**, a bishop of the Methodist Episcopal Church, was born at Portsea, England, Oct. 12, 1810, and, with his father's family, came to America in 1818, settling, in 1820, in Wooster, O. He studied medicine at the University of Pennsylvania, receiving his diploma when nineteen years of age, and commenced his practice. In December, 1831, he was converted, and, although brought up a Baptist, entered the Methodist Episcopal Church, and was admitted into the Annual Conference in 1832. After filling appointments in Norwalk, Sandusky City, Cincinnati, and Wooster, he was transferred to the Michigan Conference, and stationed at Detroit. From 1838 to 1843 he had charge of the Norwalk Seminary; in 1844 he was elected editor of the *Ladies' Repository*; in 1846 president of the Ohio Wesleyan University, where he remained till 1860, when he was elected editor of the N. Y. *Christian Advocate and Journal*. In 1864 he was elected to the office of bishop, in which capacity he made his first official visit to India. He died of pneumonia at Wheeling, W. Va., March 22, 1870. His published works are, *Educational Essays* (new ed. by D. W. Clark, D.D., Cincinnati, 1856, 12mo):—*Letters from Europe*:—*Moral and Religious Essays*:—*Biographical and Incidental Sketches*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Simpson, *Cyclop. of Methodism*, s. v.

**Thondracians**, an Armenian sect, founded by Sembat about A.D. 840, and taking its name from Thondrac, where he established himself. A Paulician by birth and education, he formed the acquaintance of Medshusic, a Persian physician and astronomer, whose influence led him to attempt a combination of Parseeism

and Christianity. This sect, though meeting with no favor from the bishops, continually revived, and spread widely in Armenia. At one time in particular, about A.D. 1002, it made the most alarming progress, when it was joined by bishop Jacob, spiritual head of the province of Harkh. He was noted for the austerity of his life, and both he and his followers denounced the false confidence which was placed in masses, oblations, alms, and Church prayers; and he declared himself opposed to the animal sacrifice in the Armenian Church. He was taken by the catholics, branded with the heretical mark, proclaimed a heretic, thrown into a dungeon, from which he escaped, but was finally killed. Many of the reports respecting the doctrines and morals of the Thondracians, coming as they do from their enemies, are doubtless false, or at least exaggerated. See Neander, *Hist. of the Christ. Church*, iii, 588 sq.

**Thor**, the god of thunder, in Northern mythology, was, next to Odin, the highest and most feared of the gods. His parents were Odin and Frigga. His wives were the beautiful gold-haired Sif, by whom he had two sons, Lorde and Mode; and the Jotes maiden Jarnsaxa, a giantess of such beauty that Thor, although a sworn enemy of the Jotes, could not refrain from making her his wife. She bore him his favorite son Magni, who was most like his father in courage and strength. Terrible is the flight of Thor through the heavens, rolling, thundering behind the clouds. Still more terrible is he when he has buckled his girdle Megingjardar about him, which gives him double strength. Thus ready, grasping with his iron gloves the hammer Mjölir, he appears as an annihilator among the enemies of the gods. Thor's kingdom is called Thrudvangr; and the palace in his realm, Bilskirnir, is the largest that was ever built, and contains five hundred and forty halls. There is no one so wise as to be able to state all of Thor's deeds, and a day would be too short to mention them all. The most remarkable, however, are the following: In company with his two bucks and the evil Loki, he made a journey. Towards evening they came to a certain man whom they asked for a night's lodging. Here Thor killed his bucks and ordered them to be fried, and then invited his host and family to partake of the repast, warning them, however, not to devour the bones, but to place them on the spread-out hides of the bucks. Before starting farther on his journey the following morning, Thor bewitched the hides with his mighty hammer, and the bucks immediately came to life, fresh and young, with the exception that one of them limped, because Thialfi, the host's son, had broken the bone of his foot in order to get at the marrow. Now Thor, enraged, threatened to kill the whole family; but he allowed himself to be pacified, when the father offered him both his children, Thialfi and Röskva, as servants, whom Thor carried away on his journey. They lodged in the iron glove of the giant Utgartsloki, who accompanied Thor under the false name of Skirner, and sought to dissuade Thor from journeying towards his (Utgartsloki's) castle. This, however, was useless, and the trifling hindrances with which Utgartsloki sought to obstruct his path—for example, tying together his cloak-sack, in which the provisions were kept—made Thor the more zealous. Thor attempted, at three different times, to break the giant's forehead, but without success. Finally they separated, and Thor continued his journey with his bucks and servants. About noon he noticed, in a large plain, a castle which was so high that it was impossible for Thor to look over it. The travellers arrived at a garden gate; and as Thor found it locked and was unable to open it, they managed to get through the space between the bars. Inside they found a spacious hall, in which there were seated upon two benches a great number of giants. King Utgartsloki, distinguished by his height and dignity, sat in the centre, but he did not even seem to notice the strangers, who saluted him. He only remarked, "This small fellow, I think, is Aukathor. Perhaps you are greater than

you appear? What skilful things can you perform? In this place no one is permitted to remain who does not distinguish himself in some art or science." Loki answered him that he thought himself to be a great eater, and did not believe any one was able to cope with him. "We shall see immediately," said the king, and ordered one named Logi, who sat upon the bench, to try an eating-match with Loki. Thereupon a large trough filled with meat was placed on the ground. At one end of the trough sat Logi, at the other end Loki; and as the former had eaten nothing for quite a while, he devoured very much. But although Loki ate all the meat, Logi, besides having eaten his half, devoured the bones also. All were agreed that Loki had failed in the attempt. "What is that young man able to do?" the king inquired further. Thialfi answered he would try a walking-match with whomsoever Utgartsloki desired. The king went out and called a young man named Hugi to try a running-match, pointed out a track, and fixed the limit. But Hugi was ahead in three successive rounds. The king admitted, however, that of all previous racers, none could have beaten Thialfi. Then the king asked Thor what he was able to do, as he had a great name among the Asas. Thor answered that he would try his skill in drinking. Then the king brought a large horn, and said, "It requires great skill to empty this horn in one drink; some have accomplished it in two, yet none have been so unskilful as not to be able to empty it in three draughts." Thor put the horn to his lips three times; but when he looked into the horn, he saw that the water had hardly diminished in quantity. Thor gave it up, and said he did not wish to attempt it any longer. Thereupon the king said, "Now it is evident that your power and skill are not so great as we supposed, and you will receive very little praise should you, in other attempts, be again unsuccessful." Thor answered that he was willing to attempt something else, and it surprised him much that what he had done was looked upon as a small affair. Utgartsloki proposed that he should lift a cat from the ground, a feat which the smallest boy could perform, and the king added that he should never have proposed this to Thor were he not persuaded that Thor was by no means the mighty king he had been represented. A large gray cat was then brought forth, which Thor held around the body and attempted to lift from the ground. But the more he raised the cat from the ground, the more she would curve her back; and, after having exerted himself as much as possible, he found that only one of the cat's forepaws had been lifted from the ground. "Just as I expected," said the king; "the cat is large, and Thor is much behind those who have tried to lift her before." "If I am small," answered Thor, "I challenge each of you to a prize-fight, because now, as I am angry, I feel my entire strength has returned to me." Upon this, Utgartsloki said, "There is no one here who would not consider it child's play to fight with you; however, call in my old nurse, who has fought with more men before; she will probably be his match." The king's nurse, Elle, came, and, however much Thor exerted himself, he was not strong enough to move her one inch; and when she applied her strength, Thor fell on his knee, until the king separated them. After very hospitable treatment and a good night's rest, the strangers left the castle, much chagrined. But when they were outside the door, the king said, "Now you are out of the castle, to which, as long as I have strength, you shall never again be admitted, and into which you would not have entered had I known Thor's strength. Know now that all that has occurred was done through witchery. At first I met you in the forest under the name of Skirner; there I fastened your provision-bag with iron cords, so that you were unable to untie them; then you struck at me thrice with your hammer, and the force with which you struck at me may be seen in the valleys hewn out of the hard rocks which, unseen, I had

placed between you and me. When you subsequently came to my castle and made your attempts, I selected a man to eat who certainly could eat more than any other man, because Logi is a consuming fire that devours wood and bones and everything. Thialfi ran with no one but my thoughts, and it is easy to conceive how these reached the limit before him. But you have accomplished something supernatural, because the horn which you attempted to empty was at one end sunk in the ocean, and you took such immense draughts of water that the ocean for a great distance became dry, which is now called ebb. The eat which you lifted from the ground was the Midgard's Serpent, and you were so strong as to lift her so high from the earth that only her head and tail were visible. Finally, the old nurse with whom you wrestled was Old Age itself, and honor be to that man who flinches from decrepit old age no more than you. Now, farewell. Although I have numerous stratagems remaining to shield my castle, still I hold it advisable that you and I should meet no more." Thor, very wroth to see himself thus fooled, grasped his hammer to strike, but immediately Utgataloki and the castle became invisible, and afterwards they saw each other a great distance apart on the great plain. To seek revenge at least upon the Midgard's Serpent, Thor sailed shortly afterwards upon the ocean with the giant Ymer, and went out so far that the giant became afraid. Then he threw the head of a large ox, attached to a strong rope, into the water, which the Serpent seized upon. When she felt herself wounded, she started back with such force that Thor's hands, holding the line, struck against the ship. He then applied his entire strength, and placed his foot so firmly upon the bottom of the boat that it went through, and he stood upon the bottom of the ocean. The giant was very much frightened when Thor drew up the Serpent by the line, and gazed at her with his fiery eyes, as she aimed a stream of poison at him. Then Thor raised his hammer, but, before he could strike, Ymer had cut the line, and the Serpent fell back into the water. Thor then threw the giant head-foremost into the ocean, so that his feet appeared above the water. He then waded ashore. Another deed was done by Thor under Gejwöd and Hruginer. The Wends also worshipped Thor as one of the highest gods. They erected to him numerous monuments, cut from a willow-tree, which was to represent the face of the god without any form. A platform built about the monument was used as an altar to worship upon.

**Thorn** is the rendering, in many passages of the A. V., of eleven different Hebrew words and two (accurately only of one) Greek words; but, as we will see below, there are no less than twenty-two words in the original languages of the Bible variously translated "thorn," "thistle," "brier," etc., and signifying thorny and prickly plants. Some of these, however, are probably so interpreted only because they are unknown, and may merely denote insignificant shrubs. We have elsewhere treated most of these in detail, and we therefore briefly recapitulate them below alphabetically, though we can hardly hope to throw much additional light upon what has already baffled so many inquirers. The difficulty of identifying them does not arise from any deficiency of thorny plants to which the Biblical names might be applied, but from the want of good reasons for selecting one plant more than another; for, as Celsius has said, "Fuerunt in Judea haud pauca loca a spinis diversorum generum denominata, quod easet hac terra non tantum lacte et melle fluens, sed herbis quoque inutilibus, et spinis multifariis passim infestata." As examples, we may mention the genera of which some of the species are thorny, such as *Acacia*, *Astragalus*, *Acanthodium*, *Alhagi*, *Fagonia*, *Tribulus*, *Berberis*, *Prunus*, *Rubus*, *Cratægus*, *Solanum*, *Carduus*, *Cnicus*, *Onopordon*, *Eryngium*, *Rhamnus*, *Zizyphus*; and of species which are named from this characteristic, *Anabasis spinosissima*,

*Paliurus aculeatus*, *Ruscus aculeatus*, *Forskalea tenacissima*, *Aristida pungens*, *Salsola echinus*, *Echinops spinosus*, *Bunias spinosa*, *Lycium spinosum*, *Poterium spinosum*, *Atraphaxis spinosa*, *Prenanthes spinosa*, *Ononis spinosa*, *Smilax asper*, *Spartium spinosum*, *Zizyphus Spina Christi*. See BOTANY.

In the morphology of plants it is now recognised that thorns are abortive or undeveloped branches, and in many cases under cultivation thorns become true branches. A spine or thorn, of which we have examples in the hawthorn and the sloe, must be distinguished from the prickles (*aculei*) which belong to the integumentary system of the plant, and which are really hardened hairs. Of these last we have examples in the bramble and the rose, and in the animal economy we have something analogous in the spines of the hedgehog and the quills of the porcupine. "May we not see in the production of injurious thorns—an arrestment by the fiat of the Almighty in the formation of branches, and thus a blight passed on this part of creation—a standing memorial of the effects of sin on what was declared at first to be very good? It is remarkable to notice that when Christ became a curse for his people, the Jews mocked him by putting on him a crown of thorns, and thus what was an indication of the fall of man was used by them to insult the seed of the woman who came to bruise the head of the serpent. The removal of the curse from creation, which is now groaning and travelling in pain, is frequently set forth by illustrations taken from the disappearance of briars and thorns (Isa. lv, 13; Ezek. xxviii, 24)" (Balfour, *Bot. and Relig.* p. 110-115).

Dr. Thomson (*Lund and Book*, i, 81) illustrates Isa. xxxiii, 12, "The people shall be as the burning of lime, as thorns cut up shall they be burned in the fire," by the following observation: "Those people yonder are cutting up thorns with their mattocks and pruning-hooks, and gathering them into bundles to be burned in these burnings of lime. It is a curious fidelity to real life that when the thorns are merely to be destroyed they are never cut up, but set on fire where they grow. They are cut up only for the lime-kiln" (see also *ibid.* i, 527 sq. for other scriptural allusions).

1. **AKANTHA** (*ἀκανθα*) occurs in Matt. vii, 16; xiii, 7, 22; xxvii, 27; and also in the parallel passages of Mark and Luke, and as forming the crown of thorns, in John xix, 2, 5. The word is used in as general a sense as "thorn" is with us, and therefore it would be incorrect to confine it to any one species of plant in all the above passages, though, no doubt, some particular thorny plant indigenous in the neighborhood of Jerusalem would be selected for plaiting the crown of thorns. Hasselquist says of the *Nabca Paliurus Athenæi* of Alpinus, now *Zizyphus Spina Christi*, "In all probability, this is the tree which afforded the crown of thorns put upon the head of Christ. It is very common in the East. This plant is very fit for the purpose, for it has many small and sharp spines, which are well adapted to give pain: the crown might easily be made of these soft, round, and pliant branches; and what, in my opinion, seems to be the greater proof is that the leaves very much resemble those of ivy, as they are of a very deep glossy green. Perhaps the enemies of Christ would have a plant somewhat resembling that with which emperors and generals were crowned, that there might be a calumny even in the punishment." This plant is the *nebk* or *dhom* of the Arabs, which grows abundantly in Syria and Palestine, both in wet and dry places. Dr. Hooker noticed a specimen nearly forty feet high, spreading as widely as a good *Quercus ilex* in England. The *nebk* fringes the banks of the Jordan, and flourishes on the marshy banks of the Lake of Tiberias; it forms either a shrub or a tree, and, indeed, is quite common all over the country. It grows to the height of six feet or more, and yields a slightly acid fruit, about the size of the sloe, which is eaten by the Egyptians and Arabs. Like its cognate, *Paliurus*, it abounds in flexible twigs, which are armed with a profusion of sharp, strong

*Zizyphus Spina Christi*. (1. The full plant. 2. Details of stem, flower, and fruit.)

prickles, growing in pairs, the one straight, the other somewhat recurved (Tristram, *Nat. Hist. of the Bible*, p. 429). Some, however, have fixed upon *Paliurus aculeatus*, and others upon *Lycium horridum*, as the plant which furnished the thorny wreath in question. See CROWN OF THORNS.

2. ATĀD (אֲתָד; Sept. ἡ ῥάμνος; Vulg. *rhamnus*) occurs as a proper name in Gen. i, 10, 11: "the threshing-floor of *Atad*." See 'ATAD. In the fable in Judg. ix, 14, 15, the *atād*, or "bramble," is called to reign over the trees. From Psa. lviii, 9 it is evident that the *atād* was employed for fuel: "Before your pots can feel the thorns." *Atād* is so similar to the Arabic *ausuj* that it has generally been considered to mean the same plant, namely, a species of buckthorn. This is confirmed by *atadmi* being one of the synonyms of *rhamnus*, as given in the supplements to Dioscorides. A species of *rhamnus* is described both by Belon and by Rauwolf as being common in Palestine, and by the latter as found especially in the neighborhood of Jerusalem. It has been described by Alpinus as having an abundance of long branches, on which are found many long and very sharp thorns. So Rauwolf, "It puts forth long, slender, crooked switches, on which there are a great many long, strong, and acute thorns." This has been supposed by some to be the above-mentioned true Christ's thorn, *Rhamnus*, now *Zizyphus Spina Christi*; but by others the plant in question is supposed to be *Lycium Europæum*, or *L. afrum* (box-thorn), both of which species occur in Palestine (see Strand, *Flor. Palest.* No. 124, 125). Dioscorides (*Comm.* i, 119) thus speaks of the ῥάμνος: "The rhamnus, which some call *persephonion*, others *leucacantha*, the Romans white-thorn, or *cerbalis*, and the Carthaginians *atadin*, is a shrub which grows around hedges; it has erect branches with sharp spines, like the *oryzocantha* (hawthorn?), but with small, oblong, thick, soft leaves." Dioscorides mentions three kinds of rhamnus, two of which are identified by Sprengel, in his *Commentary*, with the two species of *Lycium* mentioned above. In his *Hist. Rei Herb.*, however, he refers the ῥάμνος to the *Zizyphus vulgaris*. See Belon, *Observations de Plus. Sing.* etc., II, lxxviii; Rauwolf, *Travels*, III, viii; Alpinus, *De Plant. Egypt.* p. 21; Celsius, *Hierob.* i, 199.

*Lycium Europæum* is a native of the south of Europe and the north of Africa; in the Grecian islands it is common in hedges (*English Cyclop.* s. v. "Lycium;" see also the passages in Belon and Rauwolf cited above).

*Lycium Europæum*.

3. BARKĀN (בָּרְקָן, only in the plur.; Sept. Βαρκανίμ) occurs in Judg. viii, 7, 16, where Gideon is described as saying, "Then I will tear your flesh with the thorns (*kozim*) of the wilderness, and with briers (*barkanim*)."<sup>1</sup> There is no reason for believing that briers, as applied to a rose or bramble, is the correct meaning; but there is nothing to lead us to select any one preferably from among the numerous thorny and prickly plants of Syria as the *barkanim* of Scripture. Rosenmüller, however, says that this word signifies "a flail," and has no reference to thorny plants. It probably denotes the sharp stones set in the bottom of the Oriental threshing-sledge. See BRIER.

4. BATOS (ἡ Βάρος; "bramble bush," Luke vi, 44; elsewhere simply "bush"). See *Seneh*, below.

5. BOSHĀH (בֹּשֶׁת, literally *stink-weed*, from בָּשַׁח, to stink; hence to be worthless; Sept. Βάρος; Vulg. *spina*, and so the Targ., Syr., and Arab.; A. V. "cockle") is the name of a plant or weed of a worthless or noxious kind (Job xxxi, 40). From the connection in which it is introduced, it is probable that some particular and well-known herb is intended; it answers to "thorns" (*chôäch*) in the parallel member. Fürst pronounces it a useless, noxious, and spinose herb of the cockle or damel species. Celsius (*Hierob.* ii, 201) makes it a poisonous plant, the *bish* of the Arabic writers, a species of *aconite*. Lee (*Lex. s. v.*) suggests *hemlock* as the probable synonym. Zunz gives *lolch*, and Renan (*Livre de Job*, ad loc.) *ivraie*. Tristram remarks (*Nat. Hist. of the Bible*, p. 439), "There is a shrub which attacks corn, and has a putrid smell (*Uredo fetida*). Some of the *arums* of the corn plains have an intolerably fetid stench, and may well suit the derivation of the word. The stinking *arums* are common in Galilee." See COCKLE.

6. CHARĀL (חַרְלָל, from an obsolete root חָרַל, which Gesenius thinks = חָרַר, to burn; but Fürst thinks = חָרַר, in the sense of pricking, and he compares the Phœnician חַרְלָן, χερδάν, Dioscor. iii, 21; also the vulgar Heb. חַרְחָל, mustard, from its smarting taste), a prickly shrub (A. V. "nettles," Job xxx, 7; Prov. xxiv,

*Acanthus spinosa.*

31; Zeph. ii, 9), perhaps a kind of thistle. Tristram remarks (*Nat. Hist. of the Bible*, p. 475), "The *charûl* would appear to be different from the ordinary *nettle*, since in Prov. xxiv, 31 it is mentioned along with it. It cannot be a shrub like the *Zizyphus* or the *Paliurus*, because it is evidently spoken of by Solomon as a plant of quick growth in the corn-fields. It must have been of some size, from the passage in Job, where the outcasts shelter under it. I am inclined to believe that it designates the prickly *acanthus* (*Acanthus spinosa*), a very common and troublesome weed in the plains of Palestine, and equally abundant among ruins. We have often seen it in the plain of Esdraelon choking the corn, and reaching to the height of six feet. Its sting is most irritating and unpleasant, and well supports the derivation of the Heb. word, 'that which burns.' See NETTLE.

7. CHÈDEK (חֶדֶק; Sept. *ἄκανθα*, σῆς ἐκτρώγων; Vulg. *spina*, *paliurus*) occurs in Prov. xv, 19, "The way of the slothful is as a hedge of *chêdek* (A. V. 'thorns')," and in Mic. vii, 4, where the A. V. has "brier." The Alexand. MS., in the former passage, interprets the meaning thus, "The ways of the slothful are strewed with thorns." Celsius (*Hierob.* ii, 35), referring the Heb. term to the Arabic *chadak*, is of opinion that some spinous species of the *solanum* is intended. The Arabic term clearly denotes some species of this genus, either the *S. melongela*, var. *esculentum*, or the *S. Sodomum* ("apple of Sodom"). See VINE OF SODOM. Both these kinds are beset with prickles, and some species of *solanum* grow to a considerable size. They are very common in dry arid situations. *S. sunotum*, the *S. spinosum* of others, is found in Palestine. Dr. Harris is of opinion that *chêdek* is the *Colutea spinosa* of Forskål, which is called *hedud* in Arabic, and of which there is an engraving in Russell's *Nat. Hist. of Aleppo*, tab. 5. See BRIER.

8. CHÔLACH (חֹלָח; Sept. *ἄκαν*, *ἄκανθα*, *ἀκχοῦχ*, *κνίδη*; Vulg. *paliurus*, *lappa*, *spina*, *tribulus*), a word of very uncertain meaning which occurs in the sense of some thorny plant, is rendered "thickets" in 1 Sam. xiii, 6; "brambles" in Isa. xxxiv, 13; but usually either "thistle," as in 2 Kings xiv, 9; 2 Chron. xxv, 18 (in both which passages it is spoken of as growing on Lebanon); Job xxi, 40 ("Let thistles grow instead of wheat," which shows that it was some rapidly maturing plant); or "thorns," as in 2 Chron. xxxiii, 11; Job

xli, 2 (which shows it had a hard spine); Prov. xxvi, 9; Cant. ii, 2; Hos. ix, 6. Celsius (*Hierob.* i, 477) believes, from the similarity of the Arabic *khosh*, that the blackthorn (*Prunus sylvestris*) is denoted; but this would not suit the passage in Job, as it is a slow-growing tree. Perhaps the term is used in a wide sense to signify any thorny plant of quick growth in some fields and meadows. There are two classes of thorny weeds which choke the corn-fields of Palestine, the thistles and the *centaureas* or knapweeds. These last are chiefly of two kinds, both commonly called star-thistle, namely, the *Centaurea calcitrapa*, which is the most frequent and troublesome intruder in both cultivated and neglected fields in Palestine, and the *C. verutum*, which is even more formidable. See THISTLE.

*Centaurea calcitrapa.*

9. DARDÁR (דַּרְדָּר) occurs in Gen. iii, 18, "Thorns also and *thistles* shall it bring forth to thee;" and again in Hos. x, 8, in both of which passages *dardár* is conjoined with *kôts*. The rabbins describe it as a thorny plant which they also call *accobita*. The *akkûb* of the Arabs is a thistle or wild artichoke. The Sept. and Vulg., however, render *dardár* by the word *τριβόλος*, *tribulus*, a caltrop, in both passages, and this will answer as well as any other thorny or prickly plant. See *Tri-bolos*, below.

10. KIMÔSH (קִמְשׁ) or *kimmôsh* (קִמְשׁ) occurs in Isa. xxxiv, 13; Hos. ix, 6, in both which passages it is spoken of as occupying deserted and ruined sites, and is translated "nettles." Another form of the word, *kimmashôn* (קִמְשׁוֹן), occurs in Prov. xxiv, 31, where it is used in connection with *charûl* as descriptive of the neglected field of the sluggard, and is translated "thorns." "All commentators agree that this is the sting-nettle (*urtica*), of which there are several varieties in Palestine. The most common is *Urtica pilulifera*, a tall and vigorous plant, often six feet high, the sting of which is much more severe and irritating than our common nettle. It particularly affects old ruins, as near Tell Hum, Beisan, and the ruined khan by the bridge over the Jordan, and forms a most annoying obstacle to the explorer who wishes to investigate old remains" (Tristram, *Nat. Hist. of the Bible*, p. 474). The ordinary nettle is a well-known wild plant, the leaves of which are armed with stings, connected with a small bag of poison; and when the leaves are slightly pressed by the hand, the stings penetrate the flesh, force in the poison, and pro-

duce a swelling with a sharp burning pain. The leaf, when wet or dead, does not possess this power. The presence of nettles betokens a waste and neglected soil. See NETTLE.

11. KÔTS (קִיץ) occurs in several passages of Scripture (Exod. xxii, 6; Judg. viii, 7, 16; 2 Sam. xxiii, 6; Psa. cxviii, 12; Isa. xxxii, 13; xxxiii, 12; Jer. iv, 3; xii, 13; Ezek. xxviii, 24; A. V. invariably "thorns"); in two (Gen. iii, 18; Hos. x, 8) it is mentioned along with *dardâr*, where the two words may be considered equivalent, respectively, to the English *thorns* and *thistles*. The Sept. translates it in all the passages by *ἀκανθα*, and it probably was used in a general sense to denote plants which were thorny, useless, and indicative of neglected culture or deserted habitations, growing naturally in desert situations, and useful only for fuel. But if any particular plant be meant, the *Ononis spinosa*, or "rest-harrow," mentioned by Hasselquist (p. 289), may be selected as fully characteristic: "Spinosissima et perniciosa planta, campos integros tegit Ægypti et Palestine. Non dubitandum quin hanc indicaverint in aliquo loco scriptores sacri."

*Ononis spinosa.*

12. NAATSÛTS (נֶאֱטָטִים) occurs only in two passages of Isaiah, in both of which it is translated "thorn" in the A. V. Thus (vii, 18, 19), "Jehovah shall hiss for the fly that is in the uttermost part of the rivers of Egypt, and for the bee that is in the land of Assyria; and they shall come, and shall rest all of them in the desolate valleys, and in the holes of the rocks, and upon all the thorns" (*naatsutim*; Sept. *παράς*; Vulg. *frutetum*). By some this has been translated *crevices*; but that it is a plant of some kind is evident from lv, 13: "Instead of the thorn (*naatsûts*; Sept. *στροβύ*; Vulg. *saliunca*) shall come up the fir-tree, and instead of the briar shall come up the myrtle-tree." Some have understood it generally as thorn, shrub, thorny shrub, small tree, or thicket. Others have attempted to define it specifically, rendering it bramble, white-thorn, etc. (Celsius, *Hierob.* ii, 190); but nothing certain has been determined respecting it. Celsius endeavors to trace it to the same origin as the Arabic *naaz*, which he states to be the name of a plant of which the bark is employed in tanning leather. The meaning of the term, he continues, in Chaldean, is *infigere*, *defigere*, "to stick into" or "fix," and it is therefore supposed to refer to a prickly or thorny plant. R. ben-Melech says that commenta-

tors explain *naatsûts* by the Arabic word *sîdr*, which is the name of a well-known thorny bush of Eastern countries, a species of *Zizyphus*. This, Sprengel says, is the *Z. vulgaris*, found in many parts of Palestine, as well as in many of the uncultivated tracts of other Eastern countries. Others suppose the species to be the *nubak* of the Arabs, which is the *Zizyphus lotus*, and considered to be the lotus of the ancients. But from the context it would appear that the plant, if a *zizyphus*, must have been a less highly esteemed variety or species. But in a wild state these are very abundant, bushy, prickly, and of little value. Belon says, "Les hayes, pour la plus part, sont de tamarisques, œnoplia (i. e. *zizyphi* species) et rhamnea." In Freytag's *Arabic Lexicon* the above Arabic word *naaz* is said to be the name of a thorny tree, common in the Hejaz, the bark of which is used in tanning hides, and from whose wood a dentifrice is prepared. This might be a species of *acacia*, of which many species are well known to be abundant in the dry and barren parts of Syria, Arabia, and Egypt.

13. SARĀB (סָרָב) occurs (in the plur.) only once (Ezek. ii, 6) as a synonym of *sallôn*, and is thought by many (the rabbins Castell, Fürst, etc.) to denote a thorny plant (A. V. "brier"), as cognate with *sîr*; but Celsius (*Hierob.* ii, 222) contends that it simply means *rebels* (from the Chald. סָרַב, to resist).

14. SĀK (שָׂק), literally a *thorn-hedge*, so called from the interlacing of the briars occurs only once (in the plur.) as a synonym of *tsin* for a prickly object in general (Numb. xxxiii, 55; Sept. *σκόλοπες*; Vulg. *clavi*; A. V. "pricks"). It occurs in the feminine plur. form *sukbôth* (שִׁבּוֹת) in Job xli, 7, where it is translated "barbed irons." Its resemblance to the Arabic *shôk*, *thorn*, sufficiently indicates the probability of its meaning something of the same kind.

15. SENĒH (סֵנֶה) occurs in the well-known passage of Exod. iii, 2, where the angel of the Lord appeared unto Moses in a flaming fire out of the midst of a "bush" (*senéh*), and the bush was not consumed. It occurs also in ver. 3 and 4, and in Deut. xxxiii, 16, but with reference to the same event. The Sept. translates *senéh* by *βάρος*, which usually signifies the *rubus*, or *bramble*; so in the New Test. *βάρος* is employed when referring to the above miracle of the burning bush. *Βάρος* is likewise used to denote the *senéh* by Josephus, Philo, Clemens, Eusebius, and others (see Celsius, *Hierob.* ii, 58). The monks of the monastery of St. Catherine on Mount Sinai have a species of *rubus* planted in their garden near their Chapel of the Burning Bush; but this cannot be considered as any proof of its identity with the *senéh* from the little attention which they have usually paid to correctness in such points. Bové says of it, "C'est une espèce de *Rubus*, qui est voisin de notre *R. fruticosus*." The species of *rubus* (our *blackberry*) are not common either in Syria or Arabia. *Rubus sanctus*, the holy bramble, is found in Palestine, and is mentioned by Dr. Russell as existing in the neighborhood of Aleppo, and Hasselquist found a *rubus* among the ruins of Scanderetta, and another in the neighborhood of Seide. It is also found among the ruins of Petra (?) (Calcott). Celsius and others quote Hebrew authors as stating that Mount Sinai obtained its name from the abundance of these bushes (*senéh*), "Dictus est mons Sinai de nomine ejus." But no species of *rubus* seems to have been discovered in a wild state on this mountain. This was observed by Pococke. He found, however, on Mount Horeb several hawthorn bushes, and says that the holy bush was more likely to have been a hawthorn than a bramble, and that this must have been the spot where the phenomenon was observed, being a sequestered place and affording excellent pasture, whereas near the Chapel of the Holy Bush not a single herb grows. Shaw states that the *Oryacantha Arabica* grows in many places on St. Catherine's Mountain. Bové says, on ascending Mount Sinai: "J'ai trouvé entre les re-

Acacia surrounded by a Brier Bush in Wady Saal, near Sinai. (From a photograph by the Editor.)

chers de granit un *mespilus* voisin de l'*oxyacantha*." Dr. Robinson mentions it as called *zarur*, but it is evident that we cannot have anything like proof in favor of either plant. Tristram remarks (*Nat. Hist. of the Bible*, p. 438), "The *senh* denotes some particular kind of bush, and appears to be equivalent to the Egyptian *senh*, the *Acacia Nilotica*, very like the *Acacia seyal*, or *shittah* tree, but smaller and closer in growth. The *A. Nilotica* is common in the Peninsula of Sinai, which mountain is by some conjectured to have derived its name from the *senh* bush." But as there is no etymological connection between the Arabic *sunt* (which is the same as *shittah* [q. v.]) and the *senh*, and as the latter is a distinctive term, the basis of the identification of the latter with the *acacia* entirely fails, especially as the Sept. so constantly understands the burning bush to have been a bramble-like plant; moreover, had it been the well-known tree that yielded the shittim wood, we can see no reason for the use of a peculiar or different term to designate it. It was evidently not a tree at all, but a low bush, probably one of the many species of annual thorny plants still abounding on the mountain, and which, growing in the rainy season, remain dry and bare during the summer. Hence the surprise of Moses that the highly combustible object was not consumed. The writer was struck with the habit of his native guide on Mount Sinai, who constantly set fire to these bushes as he met them. See *BUSH*.

16. SHAMIR (שִׁמְרִי) occurs in all the same passages as the next word, *shagih*, below, with the addition also of Isa. xxxii, 13: "Upon the land of my people shall come up thorns (*kotsim*) and briers" (*shamir*). It is variously rendered by the Sept., χήρος, χόρος, δέρις, ἀγρωσις, ἐρημία. According to Abu'lfaḍl, cited by Celsius (*Hierob.* ii, 188), "the *samūr* of the Arabs is a thorny tree; it is a species of *Sidra* which does not produce fruit." No thorny plants are more conspicuous in Palestine and the Bible lands than different kinds of *Rhamnaceæ*. The Arabs have the terms *Salam*, *Sidra*, *Dhāl*, *Nabka*, which appear to denote either varieties or different species of *Paliurus* and *Zizyphus*,

*Paliurus aculeatus*.

or different states, perhaps, of the same tree; but it is a difficult matter to assign to each its particular signification. Dr. Tristram states that "the Arabs of the Jordan valley confine the name *samūr* to the *Paliurus aculeatus*, or Christ's Thorn" (*Nat. Hist. of the Bible*, p. 428).

17. SHĀYITH (שָׁיִיט) occurs in several passages of Isaiah (v, 6; vii, 23, 24, 25; ix, 18; x, 17; xxvii, 4), in all of which it is associated with *shamir*, the two being translated *thorns* and *briers* in the A. V. From the context of all the passages, it is evident that some weed-like plants are intended, either of a thorny or prickly nature, or such as spring up in neglected cultures and are signs of desolation, and which are occasionally employed for fuel. Nothing has, however, been ascertained respecting the plant intended by *shāyith*, and consequently it has been variously translated in the several versions of the Scriptures. Gesenius thinks it is etymologically connected with the *shittah* tree (i. q. שִׁטָּה). See *SHITTAH*.

18. SILLŌN (סִלְלוֹן) occurs in Ezek. xxviii, 24: "And there shall be no more a pricking brier (*sillōn*) unto the house of Israel, nor any grieving thorn (*kōts*).". The Sept. here has σκίλοψ and the Vulg. *offendiculum*. So also SALLŌN (סָלְלוֹן) occurs (in the plur.) in Ezek. ii, 6: "Though briers (*sarabim*) and thorns (*sallōnim*) be with thee." The Sept. and Vulg. here render both words vaguely (παροιστρήσουσι καὶ ἐπιστῆθουσιν, *increduli et subversores*). Several Arabic words resemble it in sound; as *sil*, signifying a kind of wormwood; *silleh*, the plant *Zilla Myogrum*; *sillah*, the τράγος of the Greeks, supposed to be *Salsola kali* and *S. tragus*; *sulal* or *sulalon*, which signifies the thorn of the date-tree, while the Chaldee word *sillelā* signifies a thorn simply. It is probable, therefore, that *sillōn* has something of the same meaning, as also *sullōnim*; but neither the context nor the etymology affords us a clue to the particular plant. Tristram, however, states that "the Arabic word *sullān* is applied to the sharp points on the ends of the palm-leaf, and also to the butcher's-broom (*Ruscus aculeatus*), a plant common enough in many parts of Palestine" (*Nat. Hist. of the Bible*, p. 431).

Butcher's-broom (*Ruscus aculeatus*).

19. *Sifr* (סִיפֶר) occurs (in the plur.) in several passages, e. g. in Eccles. xii, 6, "as the crackling of thorns (*sirim*) under a pot," etc.; Isa. xxxiv, 14, "And thorns (*sirim*) shall come up in her palaces," etc.; Hos. xi, 6; Amos iv, 2; Nah. i, 10. The Sept. and other translations have employed words signifying thorns as conveying the meaning of *sirim*; but the etymology does not lead us to select one plant more than another.

20. *Sirpād* (סִרְפָּד) is mentioned only once as a desert shrub (Isa. lv, 13), "And instead of the brier (*sirpād*, Sept. *κονύζη*, Vulg. *urtica*) shall come up the myrtle." Though this has generally been considered a thorny and prickly plant, it does not follow from the context that such is necessarily meant. It would be sufficient for the sense that some useless or insignificant plant be understood, and there are many such in desert and uncultivated places. In addition to *Paliurus carduus*, *Urtica*, *Conyza*, species of *Polygonum*, of *Euphorbia*, etc., have been adduced; and also *Ruscus aculeatus*, or butcher's-broom. The etymology of the word is obscure.

21. *TRIBŪLOS* (τριβόλος), Lat. *tribulus*, is found in Matt. vii, 16, "Do men gather figs of thistles?" (*τριβόλων*); and again in Heb. vi, 8, "But that which beareth thorns and briers (*τριβόλοι*) is rejected." The name was applied by the Greeks to two or three plants, one of which was, no doubt, aquatic, *Trapa natans*. Of the two kinds of land *tribuli* mentioned by the Greeks (Diocorides, iv, 15; Theophrastus, *Hist. Plant.* vi, 7, 5), one is believed by Sprengel, Stackhouse, Royle, and others to refer to the *Tribulus terrestris*, Linn., the other is supposed to be the *Fagonia cretica*; but see Schnei-

der's commentary on Theophrastus, *loc. cit.*, and Du Molin (*Flore Poétique Ancienne*, p. 305), who identifies the *tribulus* of Virgil with the *Centaurea calcitrapa*, Linn. ("star-thistle"). Celsius (*Hierob.* ii, 128) argues in favor of the *Fagonia Arabica*, of which a figure is given in Shaw, *Travels* (Catal. Plant. No. 229); see also Forskål, *Flor. Arab.* p. 88. Both or nearly allied species are found in dry and barren places in the East; and, as both are prickly and spread over the surface of the ground, they are extremely hurtful to tread upon. The word *τριβόλος* is further interesting to us as being employed in the Sept. as the translation of *dardár* (above). The presence of species of *tribulus* indicates a dry and barren uncultivated soil, covered with prickly or thorny plants. The *Tribulus terrestris*, however, is not a spiny or thorny plant, but has spines on the fruit. The Greek word means literally *three-pronged*, and originally denoted the *caltrop*, or military crow-foot, an instrument composed of three radiating spikes, thrown upon the ground to hinder and annoy cavalry (Veget. iii, 24; Plutarch, *Moral.* ii, 76). See WEED.

22. *Tašēn* (תֶּשֶׁן) or *Tsen'īn* (תְּסֵנִי) occurs (only in the plur.) in several passages of Scripture, as in Numb. xxxiii, 55; Josh. xxiii, 13, where it is mentioned along with *sék* (*sikkim*); also in Job v, 5 and Prov. xxii, 5. Both are invariably rendered "thorns" in the A. V. The Sept. has *τριβόλος* in Prov. xxii, 5, and *βολίδες* in Numb. xxxiii, 55 and Josh. xxiii, 13. It has been supposed that *zinnim* might be the *Rhamnus paliurus*, but nothing more precise has been ascertained respecting it than of so many other of these thorny plants; and we may therefore, with Michaelis, say, "Nullum simile nomen habent reliquæ lingue Orientales; ergo fas est sapienti, Celsio quoque, fas sit et mihi, aliquid ignorare. Ignorantiæ professio via ad inveniendum verum, si quis in Oriente quæsierit." See also THORN-HERB.

THORN IN THE FLESH (σκόλοψ τῇ σαρκί), an infiction ("a messenger of Satan to buffet me") mentioned by Paul as an offset to his extraordinary revelations (2 Cor. xii, 7). The expression has called forth very many, and some very absurd, conjectures (see the commentators, *ad loc.*), which may be resolved into the following heads, the first two of which are, from the nature of the case, out of the question:

1. *Spiritual Temptations*.—Many have thought that the apostle refers to diabolical solicitations ("interjectiones Satanae"), such as blasphemous thoughts (so Gerson, Luther, Calovius), or remorse for his former life (Oslander, Mosheim, etc.), or—according to Romish interpreters who seek a precedent for monkish legends—incitements to lust (so Thomas Aquinas, Lyra, Bellarmine, Estius, Corn. à Lapide, etc.). These are all negatived, not only by their intrinsic improbability, but by the qualification "in the flesh."

2. *Personal Hostility*.—This we know Paul frequently experienced, especially from Judaizing sectaries, and hence this explanation has been seized upon by many ancient interpreters (e. g. Chrysostom, Theophylact, Eusebius, Theodoret), as well as later ones (Calvin, Beza, etc.) and moderns (Fritzsche, Schrader, etc.). But this, too, could hardly with propriety be called a "fleshly" affliction.

3. *Bodily Pain*.—This view has been

*Tribulus terrestris*.

adopted by very many, who differ, however, as to the particular ailment. The ancients (Chrysostom, Theophylact, Ecumenius, Jerome, on *Gal. iv*, 14) mention *headache*, but without assigning any special ground for the conjecture. Some have supposed hypochondriacal *melancholy*, which, however hardly answers the conditions of a *σκόλοψ*, whereby *acute* suffering seems to be implied. So of other speculations, for which see *Poli Synopsis*, ad loc.

On the whole (remarks Alford, *ad loc.*), putting together the figure here used, that of a *thorn* (or a pointed *stake*, for so *σκόλοψ* primarily signifies [see Xenoph. *Anab.* v, 2, 5]), occasioning pain, and the *κολαφισμός*, or *buffeting* (i. e. perhaps *putting to shame*), it seems quite necessary to infer that the apostle alludes to some distressing and tedious bodily malady, which at the same time caused him mortification before those among whom he exercised his ministry. Of such a kind *may* have been the disorder in his eyes, more or less indicated in several passages of his history (see Acts xiii, 9; xxiii, 1 sq.; *Gal. iv*, 14; vi, 11). But as affections of the eyes, however sad in their consequences, are not usually (certainly not to all appearance in the apostle's case) very painful or distressing in themselves, they hardly come up to the intense meaning of the phrase. Paul was therefore probably troubled with some internal disease of which the marks were evinced only in languor and physical anguish. There are few who do not thus "bear about in their body" some token of mortal frailty.

**Thorn, CONFERENCE OF**, also known as "the *Charitable Conference*" (*Colloquium Charitativum*), was one of those efforts to explain away the differences between the several bodies of Christians, with a view to religious reunion, of which the 17th century furnishes more than one example. It was appointed in the city of Thorn, in October, 1645, by Ladislaus IV, at the suggestion of the Reformed preacher at Dantzig, Bartholomew Nigrinus, who had become a Catholic, and persuaded the king that such a conference would be attended with good results. At this all religious parties were to appear and confer together on religion, and come to an agreement. On the side of the Lutherans, some Saxon divines of Wittenberg, especially, were invited from Germany; for they were regarded as standing at the head of all the German theologians. The Königsberg divines were accompanied and assisted by Calixtus of Brunswick, who had been invited by elector Frederick William. His conduct and the question of precedence between the Königsberg and the Dantzig divines occupied the entire time of the conference, which broke up without any result, Nov. 21, 1645. The official account of the proceedings of the conference are printed in Calovius, *Historia Syncretistica*. See also Schröckh, *Kirchengeschichte seit der Reformation*, iv, 509; Mosheim, *Eccl. Hist.* iii, 293, 359, 373, note.

**Thorn-dike, HERBERT**, a learned English divine, was educated in Trinity College, Cambridge, and became proctor of that university in 1638. In July, 1642, he was admitted to the rectory of Barley, Hertfordshire; and in September, 1643, was elected master of Sidney College, Cambridge, but was prevented from occupying that position, it being secured by a Mr. Minshull. Later he was ejected from his living of Barley. At the Restoration he was replaced in this living, but resigned it on being made a prebendary of Westminster. He died July, 1672. He assisted Dr. Walton in the edition of the Polyglot Bible, particularly in marking the variations in the Syriac version of the Old Test.; and wrote several treatises: *A Discourse concerning the Primitive Form of the Government of Churches* (Camb. 1641, 8vo); *A Discourse of Religious Assemblies and the Public Service of God* (ibid. 1642, 8vo); *A Discourse of the Rights of the Church in a Christian State*,

(Lond. 1649, 8vo); *Just Weights and Measures*, i. e. *the Present State of Religion weighed in the Balance*, etc. (ibid. 1662, 4to); *A Discourse of the Forbearance of the Penalties*, etc. (ibid. 1670, 8vo); *Origines Ecclesiae*, etc. (ibid. 1670);—also his famous book, *An Epilogue to the Tragedy of the Church of England* (ibid. 3 parts, 1670).

**Thorn-hedge** (תְּשׁוּבָה, *mesukáh*; for תְּשׁוּבָה, or perhaps simply from the *interlacing* of the briars; Sept. *καρών*; Vulg. *sepes*), a hedge-row of thorny plants (*Mic. vii*, 4). The formidable character of the thorny thickets in Palestine is noted by almost every traveller. Near Jericho Mr. Tristram records as the principal tree "the *Zizyphus spina Christi*, growing twenty or thirty feet high, with its subangular branches studded with long, pointed, and rather reflex thorns—a true wait-a-bit tree. No one can approach it with impunity unless clad in leather; and in three days the whole party were in rags from passing through the thickets" (*Land of Israel*, p. 202). In the same way Messrs. McCheyne and Bonar mention how Dr. Keith was baffled in his attempt to climb a verdant-looking hill by "strong briars and thorns," through which he found it impossible to force a passage. They add, "Some time after, when sailing up the Bosphorus, conversing with a gentleman whom we had met in Palestine, who appeared to be a man of the world, we asked him if he had climbed Mount Tabor to obtain the delightful view from its summit. His answer was, 'No; why should I climb Mount Tabor to see a country of thorns?' He was thus an unintentional witness of the truth of God's Word" (*Mission of Inquiry*, p. 119). Such predictions as Isa. vii, 23, 24; xxxii, 12-15; Hos. ix, 6, acquire additional force from the circumstance that it is so often in the midst of magnificent ruins—once pleasant "tabernacles"—or in regions which must formerly have been rich and fruitful fields, that these thorns and briars now maintain their undisputed and truculent empire. Thus, at Beth-nimrah, the traveller says, "The buildings may have been extensive, but the ruins are now shapeless, and generally choked by the prickly vegetation" (Tristram, *Land of Israel*, p. 522). Again, "We rode up the Ghôr, through a maze of *zizyphus* bush, which encumbers a soil of almost incredible richness; watered every mile by some perennial brook, but without trace of inhabitant or cultivation. Now and then we saw a clump of palm-trees, the ruined heap of some old village, or a piece of a broken water-course, to tell us that once the hand of civilization was here. Myriads of turtle-doves peopled these thickets. We put them up absolutely by scores from every bush. The nests of the marsh-sparrow bore down the branches by their weight, and the chirping was literally deafening. The bushes and weeds were laden with seeds" (*ibid.* p. 570). In his last words king David compares the sons of Belial to "thorns thrust away, because they cannot be taken with hands; but the man that shall touch them must be fenced with iron and the staff of a spear" (2 Sam. xxiii, 6, 7). A traveller tells how out of one of these bushes of *nubb* he tried to get a dove, which, when shot, had fallen into it; "but, though I had my gloves on, each attempt made my hand bleed and smart most painfully, as the thorns will not yield in the least. I failed in like manner when I tried to cut a stick" (Gadsby, *Wanderings*, ii, 60). When we remember that a single thorn is sometimes a couple of inches long, "as sharp as a pin and as hard as a bone," we can appreciate the force of the allusions in Numb. xxxiii, 55; Prov. xxvi, 9; Ezek. xxviii, 24; 2 Cor. xii, 7; and we can understand what a hopeless barrier was a "hedge of thorns" (Prov. xv, 19; Hos. ii, 6). The *nubb*, or *zizyphus*, is much used for fuel. Occurring everywhere, it is easily obtained; its slender twigs, intensely dry, flash up at once in a fierce, brilliant flame, and, although very different from the steady glow of *reteem* charcoal, "coals of juniper," a successive supply is sufficient to heat the kettle of the camping traveller. To its rapid ignition

The Nubk, or *dhôm* (*Zizyphus spina Christi*).

the psalmist alludes, "Before your pots can feel the thorns, he shall sweep them away as with a whirlwind" (Psa. lvi. 9); where "the brightness of the flame, the height to which it mounts in an instant, the fury with which it seems to rage on all sides of the vessel, give force and even sublimity to the image, though taken from one of the commonest occurrences of the lowest life—a cottager's wife boiling her pot" (Horsley, *ad loc.*). Exploding so quickly, they are as speedily quenched (Psa. cxviii, 12); and there is small result from their noisy crepitation (Eccles. vii, 6). "Ridicule is a faculty much prized by its possessors; yet, intrinsically, it is a small faculty. A scoffing man is in no lofty mood for the time; shows more of the imp than the angel. This, too, when his scoffing is what we call just and has some foundation in truth. While, again, the laughter of fools—that vain sound—said in Scripture to resemble 'the crackling of thorns under a pot' (which they cannot heat, but only soil and begrime), must be regarded in these later times as a very serious addition to the sum of human wretchedness" (Carlyle, *Miscellanies*, ii, 119). Dr. Tristram further remarks, "I have noticed dwarf bushes of the *zizyphus* growing outside the walls of Jerusalem in the Kedron valley; but it is in the low plains that it reaches its full size and changes its name to the *dhôm* tree. It is sometimes called the lotus-tree. The thorns are long, sharp, and recurved, and often create a festering wound. The leaves are a very bright green, oval, but not, as has been said, of the shape of the ivy. The boughs are crooked and irregular, the blossom small and white, and the fruit a bright-yellow berry, which the tree continues to bear in great profusion from December to June. It is the size of a small gooseberry, of a pleasant, subacid flavor, with a stone like the hawthorn, and, whether fresh or dried, forms an agreeable dish, which we often enjoyed, mixing the berries with *leben*, or sour milk. There is no fence more impervious than that formed of *nubk*; and the Bedawin contrive to form one round their little corn-plots with trifling labor. They simply cut down a few branches and lay them in line as soon as the barley is sown. No cattle, goats, or camels will attempt to force it, insignificant as it appears, not more than a yard high; and the twigs and recurved spines become so interwoven that it is in vain to attempt to pull the branches aside" (*Nat. Hist. of the Bible*, p. 429). See THORNTON.

The fences of prickly pear or Indian fig (*Opuntia vulgaris*), now so common in the lands of the Bible, were unknown in Bible times, the plant having only found its

way to the Old World after the discovery of America (Tristram, *Nat. Hist. of the Bible*, p. 432). At present, however, it forms the common hedge-thorn of Palestine, especially in the villages of the plain of Sharon. It grows to the size of a large shrub, the stem of which is as thick as a man's body. The leaf is studded with thorns, and is of oval shape, about ten inches long, six wide, and three fourths of an inch thick; the stem and branches are formed by the amalgamation of a certain number of those succulent leaves that grow together the year after their first appearance, when each is laden with fifteen or twenty yellow blossoms, which are rapidly matured into a sweet and refreshing fruit of the size and shape of a hen's egg. See HEDGE.

**Thornton, Thomas C., D.D.**, a minister of the Methodist Episcopal Church, South, was born in Dumfries, Va., Oct. 12, 1794; graduated in his native place, and began to preach when sixteen years old. In 1813 he entered the Baltimore Conference; and was transferred to the Mississippi Conference to take charge of Old Centenary College in 1841. From some misunderstanding, he left the Methodist and joined the Protestant Episcopal Church, but refused ordination, not accepting the doctrine of uninterrupted apostolical succession. In 1850 he returned to the Methodist Church, and was readmitted into the Mississippi Conference in 1853. He died March 22, 1860. He wrote *Theological Colloquies and Slavery as it is in the United States*, in reply to Dr. Channing. See Simpson, *Cyclop. of Methodism*, a. v.

**Thornton, William Lockwood, A.M.**, a Wesleyan minister, was born in Yorkshire, Jan. 27, 1811, and was a pupil of the venerable James Sigston, Leeds. He was accepted at the Conference in 1830, receiving as his first circuit an appointment to Glasgow, where he remained but a year, and in 1831 was stationed at Hull. After a three years' residence in that north-eastern seaport, he was removed to the First London Circuit in 1834, from thence to the Leeds East Circuit in 1837, and to Bath in 1838. After a three years' location at Bath, Mr. Thornton's itinerant career terminated, and in 1841 he became the resident classical tutor of the first theological institute established in Methodism, which, commencing at Hoxton, was afterwards divided between Richmond and Didsbury; and in 1842 he went to its northern branch, near Manchester. He remained there till 1849, when he was appointed editor of the Wesleyan periodicals. In 1864 Mr. Thornton represented the British Conference at the General Conference of the Methodist Episcopal Church; he then proceeded to Canada, and presided over that conference, and also over that in Eastern British America. On his return home, he was elected president of the British Conference, but died very suddenly, in his presidential year, March 5, 1865. Mr. Thornton was a man of fine talents and thorough culture. In early life he had given himself to hard and systematic study. As a preacher he was eloquent, his style finished and elegant; as an editor he was industrious and successful.

**Thornwell, James Henley, D.D., LL.D.**, an eminent Presbyterian divine, was born in Marlborough District, S. C., Dec. 9, 1812. He received a good common-school training; prepared for college at the Cheraw Academy, S. C.; graduated at South Carolina College in 1831; and subsequently studied at Harvard University and in Europe. After some attention to the law, he devoted himself to theology, was licensed by Bethel Presbytery, and in 1834 was ordained and installed pastor of the Church at Lancaster Court-house, S. C.; and soon after the churches of Waxhaw and Six Mile were added to his charge. This relation existed until 1837, when he was elected to the professorship of logic, belles-lettres, and criticism in the South Carolina College, to which metaphysics was soon added. In these departments he taught with uncommon ability and success. "In America he fully deserves the distinguished title which his

admirers have long bestowed upon him of 'the Logician.' In 1840 he resigned his professorship, and was installed pastor of the Presbyterian Church at Columbia, S. C.; in 1841 became professor of sacred literature and evidences of Christianity in South Carolina College; in 1851, pastor of the Glebe Street Church, Charleston, S. C.; in 1852 accepted the presidency of South Carolina College; in 1856 was elected professor of theology in the Theological Seminary, Columbia, and also pastor of the First Presbyterian Church of that place, in which labors he continued until his death, Aug. 1, 1862. Dr. Thornwell published, *The Arguments of Romanists from the Infallibility of the Church and Testimony of the Fathers on behalf of the Apocrypha, Discussed and Refuted*, etc. (N. Y. 1845). This is an answer to a series of letters by the Rev. Dr. (afterwards bishop) Lynch on the inspiration of the Apocrypha. "As a refutation, this work of Mr. Thornwell's is complete" (*Bibl. Rep. and Prince. Rev.* April, 1845, p. 268):—*Discourses on Truth* (1855, 12mo; 1869, 8vo), delivered in the chapel of the South Carolina College; a work highly commended. He also published single sermons, tracts, essays, etc., and papers in the *Southern Presbyterian Review*. Dr. Thornwell was endowed with genius of an exalted character; a clear, penetrating, logical mind, which was cultivated by profound study, and consecrated to the advancement of learning and religion. "As a pastor, kind, affectionate, and worthy of all reliance; as a pulpit orator, a model of glowing zeal and fervid eloquence; as a teacher, gifted," Rev. H. W. Beecher says concerning him, "By common fame, Dr. Thornwell was the most brilliant minister in the Old-school Presbyterian Church, and the most brilliant debater in its General Assembly. This reputation he early gained and never lost." See Wilson, *Presb. Hist. Almanac*, 1863, p. 209; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Duyckinck, *Cyclop. of Amer. Lit.* (1856), ii, 334; La Borde, *Hist. of South Carolina College*, 1859; *Presb. Mag.* vol. vii. (J. L. S.)

**Thorp, CONSTITUTIONS OF.** See YORK, COUNCIL OF, 1863.

**Thorwaldsen, ALBERT BERTEL**, the renowned Danish sculptor, was born at Copenhagen, Nov. 19, 1770, and was the son of Gottschalk Thorwaldsen, a native of Iceland. A tradition had long been preserved in his family that "the gods had promised Harold (king Harold Hildetand, who was killed in the battle of Bravalla, in 785) a descendant whose fame should spread from the extremities of the North even to the sunny regions of the South." He assisted his father (a carver in wood) at a very early age, and when eleven years old attended the free school of the Academy of Arts, Copenhagen, receiving when seventeen a silver medal from the academy for a bas-relief of *Cupid Reposing*, and at twenty the small gold medal for a sketch of *Heliodorus Driven from the Temple*. Two years later he drew the grand prize entitling him to the royal pension, but, this being then enjoyed by another, he was obliged to wait three years, during which time he continued his professional pursuits and engaged in general study. Thorwaldsen set out for Italy May 20, 1796, arrived at Naples in January, 1797, and reached Rome March 8. After struggling against many discouragements, success waited upon him; his fame spread far and wide; and Christian (then crown-prince) of Denmark wrote him a pressing invitation to return to Copenhagen, telling him of the discovery of a white marble quarry in Norway. In July, 1819, he started to make his first visit to his native land, and arrived at Copenhagen Oct. 3. He was entertained with public feasts and other expressions of gratitude for about a year, and then returned to Rome. There he remained until 1838, when he decided to return to Copenhagen, and the Danish government sent a frigate to convey him and his works to Denmark. In 1841, finding the climate to disagree with him, he felt compelled to re-

turn to Italy, but returned to Denmark in the following year. He died suddenly, March 24, 1844. The favorite style of Thorwaldsen was *basso-rilievo*, in which he was the greatest master of his age. His principal works are, *Christ and the Twelve Apostles*:—*Procession to Golgotha*:—*John the Baptist Preaching in the Wilderness*, in the Church of Notre Dame, Copenhagen:—*Entry into Jerusalem*:—*Rebecca at the Well*. See *English Cyclop. of Biog.* s. v.; Spooner, *Biog. Hist. of Fine Arts*, s. v.

**Thoth.** The Egyptian deity of written learning, the author of the mystical treatises on medicine and sacred literature, called by the Greeks the Hermetic books, and himself, as the author of them, *Hermes Trismegistus*, and, in his character of introducer of souls in Hades, *Hermes Psychopompos*. He had many names and occupations, which led to his identification with many of the chief divinities by virtue of a parity of offices. He was called on a statue in the Leyden Museum "He who is the good Saviour;" and on some of the funeral papyri he takes the place of Anubis, or even Horus, with respect to the souls of the deceased. In the Hall of the Two Truths it was the duty of Thoth to weigh the souls of the deceased, and to read from his tablets a record of their actions in the past life. Thoth was also the god of all writing, and founder of all the sciences. He brought to the gods a translation of all the sacred books, and he was called the "Scribe of the Gods," and the "Lord of the Divine Words." In another form the god Thoth was identified with the moon, when he would be represented with the head of an ibis, surmounted by the horns and lunar disk; but oftentimes he was figured with a human head, having that of the ibis as a *coiffure*, and wearing the *Atef* crown. As Thoth-Axah, or Thoth the Moon, he was generally entirely naked, and in the figure of an infant with thin bowed thighs, possibly to indicate the moon in its first quarter. At other times he was represented as an adult man, bearded, and wearing the short loin-cloth, or *shenti*, of the Egyptians; sometimes he carried in his hand the eye of Horus, the symbol of the full moon, the *Cucufa* or *Uas* sceptre, and the *crux ansata*. In his latter characteristics Thoth was regarded as one and the same with *Khonsu* of Thebes. The Cynocephalus ape was also sacred to the god Thoth, and hieroglyphically figured for him. It was Thoth who revealed to the initiated certain mysterious words and formulas, thus imparting a knowledge of divine things which was supposed to elevate man to the height of the gods. It was only necessary to pronounce these formulas in the name of the deceased over his mummy, and to place a copy of them by his side in the coffin, to insure for him the benefit of their influence in the dangers which he had to combat in the lower regions. Should any one take possession of the magic-book composed by the god Thoth before he has been initiated, supernatural catastrophes will assail him. He was also worshipped by the Phœnicians, Scythians, Germans, Gauls, and other ancient nations. His symbol was the ibis; and his festival was celebrated on the first day of the first moon in the year.—Cooper, *Archaic Dict.* s. v. See EGYPT.

Figure of Thoth.

At other times he was represented as an adult man, bearded, and wearing the short loin-cloth, or *shenti*, of the Egyptians; sometimes he carried in his hand the eye of Horus, the symbol of the full moon, the *Cucufa* or *Uas* sceptre, and the *crux ansata*. In his latter characteristics Thoth was regarded as one and the same with *Khonsu* of Thebes. The Cynocephalus ape was also sacred to the god Thoth, and hieroglyphically figured for him. It was Thoth who revealed to the initiated certain mysterious words and formulas, thus imparting a knowledge of divine things which was supposed to elevate man to the height of the gods. It was only necessary to pronounce these formulas in the name of the deceased over his mummy, and to place a copy of them by his side in the coffin, to insure for him the benefit of their influence in the dangers which he had to combat in the lower regions. Should any one take possession of the magic-book composed by the god Thoth before he has been initiated, supernatural catastrophes will assail him. He was also worshipped by the Phœnicians, Scythians, Germans, Gauls, and other ancient nations. His symbol was the ibis; and his festival was celebrated on the first day of the first moon in the year.—Cooper, *Archaic Dict.* s. v. See EGYPT.

**Thra'cia, or THRACE** (Θρᾴκη), occurs in the Bible in one passage of the Apocrypha only (2 Macc. xii, 35), where a Thracian horseman (τῶν ἱππέων Θρακῶν τις, "a horseman of Thracia") is incidentally mentioned,

apparently one of the body-guard of Gorgias, governor of Idumæa under Antiochus Epiphanes (comp. Josephus, *War*, ii, 16, 4; Appian, *Syr.* 1; *Civ.* iv, 88). Thrace at this period included the whole of the country within the boundary of the Strymon, the Danube, and the coasts of the Ægean, Propontis, and Euxine (Herod. iv, 99; Pliny, iv, 18); all the region, in fact, now comprehended in Bulgaria and Rumelia. Under the Romans, Mœsia Inferior was separated from it (Ptolemy, iii, 11, 1). In the early times it was inhabited by a number of tribes, each under its own chief, having a name of its own and preserving its own customs, although the same general character of ferocity and addiction to plunder prevailed throughout (Herod. v, 3). Thucydides (ii, 97) describes the limits of the country at the period of the Peloponnesian war, when Sitalces, king of the Odrysæ, who inhabited the valley of the Hebrus (Maritza), had acquired a predominant power in the country, and derived what was for those days a large revenue from it. This revenue, however, seems to have arisen mainly out of his relations with the Greek trading communities established on different points of his seaboard. Some of the clans, even within the limits of his dominion, still retained their independence; but after the establishment of a Macedonian dynasty under Lysimachus, the central authority became more powerful; and the wars on a large scale which followed the death of Alexander furnished employment for the martial tendencies of the Thracians, who found a demand for their services as mercenaries everywhere. Cavalry was the arm which they chiefly furnished (see Homer, *Odys.* ix, 49), the rich pastures of Rumelia abounding in horses. From that region came the greater part of Sitalces's cavalry, amounting to nearly fifty thousand (see Herod. i, 94; v, 3 sq.; Tacitus, *Annal.* iv, 35; Horace, *Sat.* i, 6; Pliny, *Hist. Nat.* xvii, 3, 5, 2; xviii, 12, 1; Justin. viii, 3; Mela, ii, 2; Cellarii *Notitia*, ii, 15; Mannert, *Geogr.* vii, 1 sq.; Gatterer, in the *Comment. Soc. Gotting.* iv and v [Germ. by Schlickehorst, Götting, 1800]; Smith, *Dict. of Class. Geog.* s. v.).

The only other passage, if any, containing an allusion to Thrace to be found in the Bible is Gen. x, 2, where—on the hypothesis that the sons of Japhet, who are enumerated, may be regarded as the eponymous representatives of different branches of the Japhetian family of nations—*Tiras* has by some been supposed to mean Thrace; but the only ground for this identification is a fancied similarity between the two names. A stronger likeness, however, might be urged between the name *Tiras* and that of the Tyrsi, or Tyrseni, the ancestors of the Italian Etruscans, whom, on the strength of a local tradition, Herodotus places in Lydia in the ante-historical times. Strabo brings forward several facts to show that in the early ages Thracians existed on the Asiatic as well as the European shore; but this circumstance furnishes very little help towards the identification referred to. See *TIRAS*.

**Thrase'as**, or rather **THRASÆ'US** (Θρασαῖος, Vulg. *Thrasæus*), the father of Apollonius (q. v.), Syrian governor of Coele-Syria and Phœnicia (2 Macc. iii, 5).

**Three** (THIRTY, etc.) (שָׁלוֹשׁ, שְׁלֹשָׁה, etc.) frequently occurs as a cardinal number; thus, שְׁלֹשָׁה שָׁנִים, *three years* (Lev. xix, 23); as an ordinal, בְּשָׁנָה שְׁלִישִׁי, *in the third year* (2 Kings xviii, 1); in combination with other numbers, שְׁלֹשָׁה עָשָׂר, *thirteen*; and it is also used in the plural as an ordinal for thirty, שְׁלֹשִׁים (1 Kings xvi, 23). For other forms and uses of the words, see the Hebrew lexicons.

The nouns שְׁלֹשָׁה, שְׁלִישִׁי, and שְׁלוֹשָׁה, literally, according to one derivation, a *third man*, are used in the sense of a commander or general, sometimes as connected with war-chariots or cavalry. Thus (Exod. xiv, 7), "Pharaoh took all the chariots of Egypt and captains (שְׁלֹשָׁה) *third men* over all this armament" (שָׁלַל בָּנָי, *not*, as in

our translation, "over every one of them;" Sept. *ῥησάρας ἐπὶ πάντων*, *tristata* over all; Vulg. *duces totius exercitus*. So it is said (xv, 4) that "the choice of all Pharaoh's captains" (שְׁלֹשָׁה), or third men, were drowned; Sept. *ἀναβάρας ῥησάρας*; Vulg. *principes*. The Septuagint word seems chosen upon the assumed analogy of its etymology to the Hebrew, *quasi ῥησάρας*, "one who stands third." According to Origen, *tristates* has this meaning, because there were three persons in each chariot, of whom the first fought, the second protected him with a shield, and the third guided the horses. Wilkinson, however, says, "There were seldom three persons in an Egyptian war-chariot, except in triumphal processions. In the field each one had his own car with a charioteer" (*Ancient Egyptians*, i, 335). Jerome, on *Ezekiel* xxiii, says, "Tristate, among the Greeks, is the name of the second rank after the royal dignity." But it is possible that the ideal meaning of the verb שָׁלַל may be to *rule* or *direct*, as appears from its share in such words as שְׁלֹשָׁה, "excellent things," or rather "rules and directions" (Prov. xxii, 20), and שָׁלַל, "a proverb," from שָׁלַל, "to rule," hence an *authoritative* precept. According to this sense, our translation renders the word שְׁלִישִׁי "lord:" "a lord on whose hand the king leaned" (2 Kings vii, 2; comp. v, 17, 19). If the latter derivation of the Hebrew word be admitted, it will cease to convey any allusion to the number three; of which allusion Gesenius speaks doubtingly of any instance, but which he decidedly pronounces to be unsuitable to the first passage, where the word evidently stands in connection with war-chariots (see Gesenius, s. v. שָׁלַל). See *CAPTAIN*.

**Three days and three nights.** "For as Jonas was three days and three nights in the whale's belly, so shall the Son of man be three days and three nights in the heart of the earth." The apparent difficulty in these words arises from the fact that our Lord continued in the grave only one day complete, together with a part of the day on which he was buried and of that on which he rose again. The Hebrews had no word expressly answering to the Greek word *νυχθήμερον*, or natural day of twenty-four hours, an idea which they expressed by the phrases *a night and a day* or *a day and a night*. Thus (Dan. viii, 14), "Unto two thousand and three hundred *evening mornings* (i. e. days, as it is in our translation), then shall the sanctuary be cleansed." Thus, also, what is called "forty days and forty nights" in Gen. vii, 12, is simply "forty days" in ver. 17; wherefore, as it is common in general computations to ascribe a whole day to what takes up only a part of it, when this was done in the Jewish language it was necessary to mention both *day* and *night*; hence a part of three days was called by them three days and three nights. We have another example in 1 Sam. xxx, 12, where the Egyptian whom David's men found in the field is said to have *eaten no bread, nor drunk any water, three days and three nights*. Nevertheless, in giving an account of himself, the Egyptian told them that his master had left him "because three days ago I fell sick;" in the Hebrew it is *I fell sick this third day*, that is, this is the third day since I fell sick. Indeed, among the Hebrews, things were said to be done *after three days* which were done on the third day (comp. 2 Chron. x, 5 with ver. 12; Deut. xiv, 28 with xxvi, 2). Agreeably to these forms of speech, the prophecy of our Lord's resurrection from the dead is sometimes represented as taking place *after three days*, sometimes on the *third day* (see Whitby, Macknight, Wakefield, Clarke, *ad loc.*).

The phrase "three and four," so often repeated (Amos i), means *abundance*, anything that goes on towards excess. It finds its parallel in Virgil's well-known words, *O terque quaterque beati* ("O three and four times happy," *Æn.* i, 94; see also *Odyssey*, v, 306).

Three has also been considered, both by Jews and

Christians, as a distinguished or *mystical* number, like "seven." Ainsworth, on *Gen. xxii*, 4, has collected many such instances, but they appear to be somewhat fanciful. A ternary or trinal arrangement of subjects, however, is very prevalent in the Bible (see an anonymous monograph on *The Triads of Scripture* [Lynchburg, 1866]). See NUMBER.

**Three Chapters** (*Tria Capiula*), the title of an edict published by the emperor Justinian. He having, in the year 542, been shocked by some of the writings of Origen, published an edict in which nine of the chief Origenist errors were set forth and condemned, Origen himself being also anathematized. Theodore, the Monophysite bishop of Cæsarea in Cappadocia, devised a plan by which to avenge the memory of Origen, and to strengthen the position of the Monophysites. He persuaded the emperor that the Acephali might be restored to the Church and reconciled to the decrees of Chalcedon, if the writings under three "heads" or "chapters" which he named were condemned, and so ceased to become stumbling-blocks to them by seeming to support the Nestorian heresy. These were (1) the Epistle of Theodoret against the twelve anathemas of St. Cyril, (2) the Epistle of Ibas of Edessa to Maris, and (3) the works of Theodore of Mopsuestia. All these writings having carried weight with them at the Council of Chalcedon, the condemnation of them by Justinian would be, to a certain extent, a repudiation of that council, and so a recognition of the Monophysites condemned by it. Attracted by the hope of reconciling the Acephali, and not seeing these consequences, the emperor published the edict of the Three Chapters, A.D. 544; giving a profession of his own faith, and anathematizing the three works above named. The edict was subscribed by the four Eastern patriarchs, and, after some hesitation, it was also assented to by Vigilius, bishop of Rome, with an added clause to the effect that in doing so he did not condemn the Council of Chalcedon. This assent he afterwards retracted when excommunicated by a council at Carthage, and in 550 declared the Eastern bishops separated from the communion of Rome. The condemnation of the Three Chapters, with a similar reservation respecting the Council of Chalcedon, was, however, confirmed by the fifth General Council, A.D. 553, the second Council of Constantinople. See *Mani, Concil.* ix, 61, 181, 487; *Natal. Alex.* v, 502.

**Three Denominations**, a name given to the Independents, the Baptists, and the Presbyterians at the time when these three sects represented the great body of English Dissenters. They were the Dissenters recognised by the Act of Toleration (1 William and Mary, c. 18), and had the privilege granted to them of presenting corporate addresses to the sovereign.—Blunt, *Dict. of Sects*, s. v.

**Three Taverns** (Τρεῖς Ταβερναί, Græcized from the Latin *Tres Tabernæ*), a station on the Appian Road, along which Paul travelled from Puteoli to Rome (Acts xxviii, 15). The Roman Christians went, in token of respect, to meet Paul at these places, having been probably apprised of his approach by letters or express from Puteoli (ver. 13–15)—one party of them resting at the Three Taverns, and the other going on to Appii Forum. When the apostle saw this unequivocal token of respect and zeal, he took fresh courage. There is no doubt that the Three Taverns was a frequent meeting-place of travellers. A good illustration of this kind of intercourse along the Appian Way is supplied by Josephus (*Ant.* xvii, 12, 1) in his account of the journey of the pretender Herod Alexander. He landed at Puteoli (Dicaearchia) to gain over the Jews that were there; and "when the report went about him that he was coming to Rome, the whole multitude of the Jews that were there went out to meet him, ascribing it to Divine Providence that he had so unexpectedly escaped." See PAUL.

The word ταβέρνα is plainly the Latin *taberna* in Greek letters, and denotes a house made with boards or planks, quasi *trabena*. Wooden houses, huts, etc., are called *tabernæ*. Thus Horace, "Pauperum tabernæ regumque turræ" (*Carm.* i, 14, 18). Hence the word also means *shops*, as distinguished from dwelling-houses. Horace uses it for a bookseller's shop (*Sat.* i, 4, 71), and for a wine-shop (*Ep.* i, 14, 24). The shops at Pompeii are booths, connected in almost every case with dwellings behind, as they were in London three centuries ago. When eatables or drinkables were sold in a Roman shop, it was called *taberna*, tavern, victualling-house. Grotius observes that there were many places in the Roman empire at this time which had the names of Forum and Tabernæ, the former from having *markets* of all kinds of commodities, the latter from furnishing wine and eatables. The place or village called "Three Taverns" probably, therefore, derived its name from three large inns, or eating-houses, for the refreshment of travellers passing to and from Rome. Zosimus calls it τρία καπηλεία (ii, 10). Appii Forum appears to have been such another place. Horace mentions the latter, in describing his journey from Rome to Brundisium, as "differtum nautis, cauponibus atque malignis"—stuffed with rank boatmen, and with vintners base (*Sat.* i, 5, 8). That the Three Taverns was nearer Rome than Appii Forum appears from the conclusion of one of Cicero's letters to Atticus (ii, 10), which, when he is travelling *south-eastwards* from Antium to his seat near Formiæ, he dates "Ab Appii Foro, hora quarta"—from Appii Forum, at the fourth hour; and adds, "Dederam aliam paulo ante, Tribus Tabernis" (I wrote you another, a little while ago, from the Three Taverns). Just at this point a road came in from Antium on the coast, as we learn from the same letter of Cicero (*Att.* ii, 12). The Itinerary of Antoninus places Appii Forum at forty-three Roman miles from Rome, and the Three Taverns at thirty-three; and, comparing this with what is observed still along the line of road, we have no difficulty in coming to the conclusion that the Three Taverns was near the modern *Cisterna* (see Smith, *Dict. of Greek and Rom. Geog.* ii, 1226 b, 1291 b). In the 4th century there was a bishop of Three Taverns, named Felix (Optatus, lib. i). It has been stated by some that the place still remains, and is called *Tre Tavernne*. Thus, in Evelyn's time (1645), the remains were "yet very faire" (*Diærie*, i, 134). But recent travellers have been unable to find more than a few unnamed remains on the spot indicated (Chaupy, *Maison d'Horace*, iii, 388; D'Anville, *Analyse de l'Italie*, p. 195; Westphal, *Röm. Kampagne*, p. 69; Fleck, *Wissenschaftl. Reise*, I, i, 375). See APPII FORUM.

**Threshing** (prop. תִּרְוֶה; but sometimes תִּרְוֶה, to tread out, ἀλάειν; and occasionally תִּרְבֵּה). The Hebrews made use of three different processes for separating the grain from the stalk (comp. Isa. xxviii, 27 sq.), an operation always carried on in the open air. See STRAW.

1. In the earliest period, and even later for small quantities, especially in the former part of the harvest season, and for the frailer kinds of grain, the seed was beaten out with sticks (תִּרְבֵּה, Sept. ῥαβδίζειν). This was a process applied to other agricultural products (Jerome, *ad Isa.* loc. cit.), as well as to field grain (Judg. vi, 11; Ruth ii, 17; Isa. xxviii, 27; comp. Columel. ii, 21; Strabo, iv, 201). It is a method still in use in the East (Robinson, ii, 650; iii, 233). See HARVEST.

2. Usually, however, horned cattle (Mishna, *Shebi'ith*, v, 8, as still in Egypt, Arabia, and Syria), seldom asses or (in modern times) horses (Shaw, p. 124; Buckingham, p. 288), were driven around, usually yoked in pairs or several abreast, and these, by means of their hoofs (Mic. iv, 13), cut up and separated the chaff and straw from the grain (Isa. xxviii, 28; Jer. i, 11; Hos. x, 11; comp. Varro, *De Re Rust.* i, 51; Homer, *Il.* xx, 495 sq.;

Pliny, xviii, 72). So also in ancient Egypt (Wilkinson, 2d ser. i, 87, 90). See THRESHING-FLOOR.

3. The most effectual method of threshing was by means of threshing-machines (מִדְרֵי [Arab. *no-ray*]), or simply מִדְרֵי, Isa. xxviii, 27; xli, 15; Job xli, 22; also מִדְרֵי, Judg. viii, 7, 16; see Gesen. *Thesaur.* p. 244; τριβόλον, *tribulum*, Pliny, xviii, 72; Talm. (מִדְרֵיבֶּל). These consisted sometimes of a wooden plank (*trahca*, or *traha*) set with sharp stones or iron points, which was dragged over the sheaves (Rashi, on Isa. xli, 15; comp. Varro, i, 52; Columel. ii, 21; Virgil, *Georg.* i, 164), sometimes of a sort of cart or wheeled sledge (*plastellum Phenicum*; comp. Jerome, *ad Isa.* xxv, 10, and xxviii, 27). Such a wagon is mentioned in Isa. xxviii, 27 sq. (מִדְרֵיבֶּל וְאוֹנֵי מִדְרֵיבֶּל). See THRESHING-INSTRUMENT.

Cattle were used for this vehicle, as usually still among the Arabians (Wellsted, i, 194); and the Mosaic law forbade the yoking-together of various kinds of beasts, as well as the muzzling of the animals (Deut. xxv, 4; Josephus, *Ant.* iv, 8, 21; 1 Cor. ix, 9; Talmud, *Kelim*, xvi, 7; comp. *Ælian*, *Anim.* iv, 25), a usage prevalent among the ancient Egyptians and other nations (Bochart, *Hieroz.* i, 401; comp. Michaelis, *Mos. Recht*, iii, 130). See MUZZLE.

Threshing is frequently employed by the Hebrew poets as a figure of the divine or providential chastisements, especially national invasion (Isa. xli, 15; Jer. li, 33; Mic. iv, 13; Hab. iii, 12). In one passage (Isa. xxi, 10), the bruised grain is made an image of the captive Jews. See generally Schöttgen, *Trituræ et Fulonica Antiquitates* (Tr. ad Rh. 1727; Lips. 1763); Paulsen, *Ackerbau*, p. 110 sq. See AGRICULTURE.

**Threshing-floor** (מִדְרֵי, *gôren*, ἄλυσ; Chald. מִדְרֵי, *iddâr*, Dan. ii, 85), a level and hard-beaten plot in the open air (Judg. vi, 37; 2 Sam. vi, 6), on which the sheaves of grain (Mic. iv, 12) were threshed (Isa. xxi, 10; Jer. li, 33; Matt. iii, 12; the Mishna remarks that

Oriental Threshing-floor.

the threshers wore gloves, *Kelim*, xvi, 6), so that the wind had free play (Hos. xiii, 3; Jer. iv, 41; comp. Varro, *De Re Rust.* i, 51, 1, "Aream esse oportet in agro sublimiore loco, quam perflare possit ventus"). The top of a rock is a favorite spot for this purpose. The sheaves were carried straight from the field, either in carts, or, as more commonly happens in the present day, on the backs of camels and asses, to the threshing-floor. On this open space the sheaves were spread out, and sometimes beaten with flails—a method practiced especially with the lighter kinds of grain, such as fitches or cummin (Isa. xxviii, 27)—but more generally by means of oxen. For this purpose the oxen were yoked side by side, and driven round

over the corn, by a man who superintended the operation, so as to subject the entire mass to a sufficient pressure; or the oxen were yoked to a sort of machine (what the Latins called *tribulum* or *trahca*) which consisted of a board or block of wood, with bits of stone or pieces of iron fastened into the lower surface to make it rough, and rendered heavy by some weight, such as the person of the driver, placed on it; this was dragged over the corn, and hastened the operation (ver. 27; xli, 15). The same practices are still followed, only mules and horses are occasionally employed instead of oxen, but very rarely. Dr. Robinson describes the operation as he witnessed it near Jericho: "Here there were no less than five floors, all trodden by oxen, cows, and younger cattle, arranged in each case five abreast, and driven round in a circle, or rather in all directions, over the floor. The sled, or sledge, is not here in use, though we afterwards met with it in the north of Palestine. By this process the straw is broken up and becomes chaff. It is occasionally turned with a large wooden fork having two prongs; and, when sufficiently trodden, is thrown up with the same fork against the wind, in order to separate the grain, which is then gathered up and winnowed. The whole process," he adds, "is exceedingly wasteful, from the transportation of the corn on the backs of animals to the treading-out upon the bare ground" (*Researches*, ii, 277). During this operation the Mohammedans, it seems, generally observe the ancient precept of not muzzling the oxen while treading out the corn; but the Greek Christians as commonly keep them tightly muzzled. See THRESHING.

As in the East there is no rain during the harvest season (Hesiod, *Opp.* 558), the threshing-floors were in the open field, and were carefully selected and managed (Virgil, *Georg.* i, 178 sq.; Pallad. vii, 1; Pliny, *Hist. Nat.* xii, 32; xv, 8; xvii, 14; xviii, 71, etc.). The farmers remained on the corn-floor all night in order to guard the product (Ruth iii, 4, 6, 14). The threshing-place was of considerable value, and is often named in connection with the wine-press (Deut. xvi, 13; 2 Kings vi, 27; Hos. ix, 2; Joel ii, 24), since wheat and wine and oil were the more important products of the land (*Mishna*, *Baba Bathra*, ii, 8). They often bore particular names, as that of Nachon (2 Sam. vi, 6) or Chidon (1 Chron. xiii, 9), of Atad (Gen. i, 10), of Ornan, or Araunah (2 Sam. xxiv, 18, 20; 1 Chron. xxi, 15; Josephus, *Ant.* vii, 13, 4). See Thomson, *Land and Book*, ii, 314; Hackett, *Illustr. of Script.* p. 160; Van Lennep, *Bible Lands*, p. 79; Conder, *Tent-Work in Palestine*, ii, 259. See AGRICULTURE.

**Threshing-instrument** was a sledge for driving over the sheaves and separating the grain. These sledges, called among the Hebrews by the general term מִדְרֵיבֶּל, *barkanim*, rendered "briers" in Judg. viii, 7, 16, were of two kinds, corresponding respectively with two words, the first of which alone is rendered as above in the A. V. See THRESHING.

1. *Morâg* (מִדְרֵיבֶּל), so called from *trituration*; 2 Sam.

Oriental Plain Threshing-sledge.

xxiv, 22; 1 Chron. xxi, 23; Isa. xli, 15; by ellipsis *charûts*, pointed, Job xli, 22; Isa. xxviii, 27; Amos i, 3) was a threshing-instrument still in use in the north of Palestine. Prof. Robinson, who frequently saw this rustic threshing-sledge, says, "It consists chiefly of two planks fastened together side by side, and bent upwards in front; precisely like the common stone-sledge of New England. Many holes are bored in the bottom underneath, and into these are fixed sharp fragments of hard stone. The machine is dragged by oxen as they are driven round upon the grain; sometimes a man or a boy sits upon it. The effect of it is to cut up the straw quite fine" (*Researches*, ii, 306).

2. *Agalâh* (אגל"ה), rendered "cart" or "wagon" was a threshing-sledge with wheels or rollers of wood, iron, or stone, made rough and joined together in the form of a sledge (Isa. xxviii, 27, 28). Mr. Lane found it still in use in Egypt, perhaps somewhat improved. He says,

Oriental Wheeled Threshing-sledges. A. Bottom; B. With seat.

"For the purpose of separating the grain of wheat or barley, etc., and cutting the straw, which serves as fodder, the Egyptians use a machine called *norag*, in the form of a chair, which moves upon small iron wheels, or circular plates, generally eleven, fixed to three thick axle-trees; four to the foremost, the same number to the hindmost, and three to the intermediate axle-tree. This machine is drawn in a circle, by a pair of cows or bulls, over the corn" (*Mod. Egyptians*, ii, 33).

**Threshold** is the rendering in the A. V. of three Heb. words.

1. *Saph* (ספ), so called perhaps from the *attrition* there, Judg. xix, 27; 1 Kings xiv, 17; Ezek. xl, 6, 7; xliii, 8; Zeph. ii, 14; elsewhere "door" or "door-post"), the *sill*, or bottom, of a door-way. See GATE.

2. *Miphtân* (מפתן), so called apparently from its *firmness* or *stretch*, obviously to be interpreted of the *sill*, or bottom beam, of a door (1 Sam. v, 4, 5; Zeph. i, 9; Ezek. xlvii, 1); but perhaps meaning sometimes, as the Targum explains it, a projecting beam, or corbel, at a higher point than the threshold properly so called (Ezek. ix, 3; x, 4, 18). See DOOR.

3. *Asôph* (אסוף), only in the plur. *Asuppim*, אסופים, collections; Sept. *συβαγγέιον*; Vulg. *vestibula*; Neh. xii, 25), a storehouse or depository ("Asuppim," 1 Chron. xxvi, 17), especially as connected with the western gates of the Temple, hence called *beth-Asuppim* (ver. 15). See ASUPPIM.

**Throne** (כִּסֵּא, *kissé*; *Spónos*, a *seat*, as often rendered; twice כִּסֵּה, *kissêh*, 1 Kings x, 19; Job xxvi, 9; Chald. כִּסְרֵא, *korsê*, Dan. v, 20; vii, 9, so called as being covered, i. e. either the seat itself or with a canopy) applies to any elevated seat occupied by a person in authority, whether a high-priest (1 Sam. i, 9), a judge (Psa. cxxii, 5), or a military chief (Jer. i, 15). In Neh. iii, 7 the term is applied to the official residence of the governor, which appears to have been either on or near to the city wall. In the holy of holies, between the cherubim, was the throne of Jehovah, the invisible king of the Hebrews (Exod. xxv, 22). See PAVILION.

The use of a chair in a country where the usual postures were squatting and reclining was at all times regarded as a symbol of dignity (2 Kings iv, 10; Prov. ix, 14). In order to specify a throne in our sense of the term, it was necessary to add to *kissé* the notion of royalty; hence the frequent occurrence of such expressions as "the throne of the kingdom" (Deut. xvii, 18; 1

Kings i, 46; 2 Chron. vii, 18). The characteristic feature in the royal throne was its elevation: Solomon's throne was approached by six steps (1 Kings x, 19; 2 Chron. ix, 18); and Jehovah's throne is described as "high and lifted up" (Isa. vi, 1; comp. Hom. *Odyss.* i, 130; iv, 136; Curtius, v, 2, 13). The materials and workmanship were costly: that of Solomon is described as a "throne of ivory" (i. e. inlaid with ivory), and overlaid with pure gold in all parts except where the ivory was apparent. It was furnished with arms or "stays," after the manner of an Assyrian chair of state (see Rawlinson, *Herod.* iv, 15). The steps were also lined with pairs of lions, the number of them being perhaps designed to correspond with that of the tribes of Israel. As to the form of the chair, we are only informed in 1 Kings x, 19 that "the top was round behind" (apparently meaning either that the back was rounded off at the top or that there was a circular canopy over it). In lieu of this particular, we are told in 2 Chron. ix, 18 that "there was a footstool of gold fastened to the throne," but the verbal agreement of the descriptions in other respects leads to the presumption that this variation arises out of a corrupted text (Thenius, *Comm. on 1 Kings*, loc. cit.)—a presumption which is favored by the fact that the terms כִּסֵּא and the Hophal form מִכְאֵל occur nowhere else. The king sat on his throne on state occasions, as when granting audiences (1 Kings ii, 19; xxii, 10; Esth. v, 1), receiving homage (2 Kings xi, 19), or administering justice (Prov. xx, 8). At such times he appeared in his royal robes (1 Kings xxii, 10; Jonah iii, 6; Acts xii, 21). Archelaus addressed the mul-

Assyrian Chair of State.

titude from "an elevated seat and a throne of gold" (Josephus, *War*, ii, 1, 1). A throne was generally placed upon a dais or platform, and under a canopy; and in the sublime description of the King of kings (Rev. iv), in the latter is compared to the emerald hue of the rainbow. In Rev. iv, 4; xi, 16 the elders who represent the Church as reigning with Christ are seated on thrones placed around his; and in ii, 13 Satan is represented as imitating the royal seat of Christ. For modern Oriental thrones, see Van Lennep, *Bible Lands*, p. 643.

Mr. Layard discovered in the mound at Nimrûd, among other extraordinary relics, the throne on which the Assyrian monarchs sat three thousand years ago. It is composed of metal and of ivory, the metal being richly wrought and the ivory beautifully carved. The throne seems to have been separated from the state apartments by means of a large curtain, the rings by which it was drawn and undrawn having been preserved (*Nim. and Bab.* p. 198). The chair represented on the earliest monuments is without a back, the legs are tastefully carved, and the seat is adorned with the heads of rams.

The cushion appears to have been of some rich stuff, embroidered or painted. The legs were strengthened by a cross-bar, and frequently ended in the feet of a lion or the hoofs of a bull, either of gold, silver, or bronze (*Nineveh*, ii, 235). The throne of the Egyptian monarchs is often exhibited on the ancient monuments. See CHAIR.

Ancient Egyptian Throne.

The throne was the symbol of supreme power and dignity (Gen. xli, 40), and hence was attributed to Jehovah both in respect to his heavenly abode (Psa. xi, 4; ciii, 19; Isa. lxvi, 1; Acts vii, 49; Rev. iv, 2) and to his earthly abode at Jerusalem (Jer. iii, 17), and more particularly in the Temple (xvii, 12; Ezek. xliii, 7). Similarly, "to sit upon the throne" implied the exercise of regal power (Deut. xvii, 18; 1 Kings xvi, 11; 2 Kings x, 30; Esth. i, 2), and "to sit upon the throne of another person" succession to the royal dignity (1 Kings i, 13). The term "throne" is sometimes equivalent to "kingdom" (2 Chron. ix, 8; Acts ii, 30; Heb. i, 8). So, also, "thrones" designates earthly potentates and celestial beings, archangels (Col. i, 16). See SEAT.

THRONE, EPISCOPAL, the official seat placed in the cathedral, or chief seat of a diocese, and occupied by the bishop on public occasions. This was the common honor and privilege of all bishops from very early times. Thus Eusebius calls the bishop of Jerusalem's seat *Spónos ápostolikós*, the apostolical throne, because James, bishop of Jerusalem, first sat in it. It was also called *βῆμα, rostrum*; and *Spónos ὑψηλός*, the high throne, because it was exalted somewhat higher than the seats of the presbyters, which were on each side of it, and were called the second thrones. It generally

Ecclesiastical Throne and its Accessories.

1. Episcopal throne; 2. Presbyters' seats; 3. Communion-table; 4. Ciborium; 5. Bema or chancel; 6. Chancel rail.

stood at the east end of the choir or sanctuary: that is, in churches which were built in the form of basilicas, and were apsidal. This is still the case at Milan and Augsburg. In mediæval times the bishop's seat was frequently the best and most exclusive stall on the south side, and almost invariably occupied by him dur-

ing the solemn recital of divine office. During mass, and on occasions when services took place at the altar, his throne was placed against the north wall within the sanctuary. Most of the English thrones are of wood, richly carved, while abroad they are frequently of stone. At St. Mark's, Venice, the Cathedral of Malta, and at the Cathedral of Verona the episcopal thrones are of marble. At Ravenna, Spalatro, and Torcello they are of alabaster; at St. Peter's, Rome, the throne is of bronze; and at Ravenna, St. Maximian's throne is of ivory. In Portugal and Spain the episcopal throne is commonly that one which in England is occupied by the dean, the first on the *decani* side. See Bingham, *Christ. Antiq.* bk. ii, ch. ix, § 7; Lee, *Gloss. of Liturg. Terms*, s. v.; Walcott, *Sacred Archaeol.* s. v.

**Thrupp**, FRANCIS JOSEPH, an English clergyman, was born in 1827, and educated at Winchester School and Trinity College, Cambridge, where he obtained a fellowship. He took orders in the Church of England, travelled in the East, and became vicar of Barrington, Cambridgeshire, where he died, Sept. 24, 1867. He was the author of *Ancient Jerusalem: a New Investigation into the History, Topography, and Plan of the City*, etc. (Camb. 1855, 8vo):—*Introduction to the Study and Use of the Psalms* (1860, 2 vols. 8vo):—*The Song of Songs: a New Translation, Commentary*, etc. (1862):—and *The Burden of Human Sin as Borne by Christ* (three sermons). He also furnished articles for Smith's *Dict. of the Bible*, and prepared part of the commentary on the Pentateuch for the *Speaker's Commentary*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Thrym**, in Norse mythology, was a giant king of great strength, who, being a born enemy of Thor, sought to deprive him of his weapons in order to make him less dreadful for the giants. He succeeded in robbing Thor of his frightful hammer, Mjölhnir, while Thor had fallen asleep. Loki discovered the thief and sought to negotiate with him. Thrym assured Loki that he did not intend to deliver up the hammer until the beautiful Freia was given him as his wife. When this was told secretly to Freia, the goddess of love, she became so angry that everything shook, and her golden necklace broke in twain. Then it seemed as if there were no remedy. Loki, however, who was always ready with advice, proposed that Thor should dress himself as the bride. Although this plan seemed too womanish for the mighty Thor, he nevertheless decided to try it; and went veiled, laden with riches, and accompanied by Loki as his chambermaid, to Thrym. There the tremendous appetite of the bride caused great astonishment; but Loki knew how to excuse the goddess by the pretence of an eight days' fast, to which he said she had subjected herself from longing for Thrym. So, also, her flaming eyes were excused from having been awake eight days. Thrym's sister, more cautious than the fat giant, was suspicious of the matter, and would probably have detected the deception, as she had demanded to see the ring of Freia; but no sooner had Thrym brought him the hammer of Thor, to dedicate with it the bride, than Thor, seeing his Mjölhnir, grasped it, and destroyed all the giants.

**Thugs** (Hindû, *thugna*, "to deceive"), a religious fraternity in India, professedly in honor of the goddess Kali, wife of Siva, who were addicted to the committal of murders, and lived chiefly upon the plunder obtained from their victims. They were also called *Phansigars*, or "stranglers," from the Hindûstani *phansi*, a "noose." The proceedings of the Thugs were generally these: banding together in gangs of from ten to fifty, and sometimes as high as three hundred, they assumed the appearance of ordinary traders; travelling, if able, on horseback with tents and other comforts; if not able to travel in this manner, they assumed more humble characters. Each gang had its *jemadar*, or leader; its *guru*, or teacher; its *sothas*, or entrappers; its *bhuttoes*, or stranglers; and its *laghues*, or grave-diggers.

Their mode of procedure was generally as follows: Some of the gang were employed to collect information respecting the movements of persons of means; and when they found one about to undertake a journey, endeavored to insinuate themselves into his confidence. They then proposed to him to travel in their company, under the plea of safety or for the sake of society, or else followed him, waiting for an opportunity to murder. This was generally accomplished by throwing a cloth around the neck of a victim, disabling him by strangulation, and then inflicting the fatal injury. After the murder was perpetrated, the body was mutilated and secretly buried, so as to make detection the more difficult. The mode of dividing the plunder seems to have been to appropriate one third to their goddess Kali, one third to the widows and orphans of the sect, and the remainder to the partners in the assassination.

The Thugs had for their patron goddess Devi or Kali, in whose name they exercised their profession, and to whom they ascribed their origin. Formerly they believed Kali assisted them by devouring the bodies of their victims; but through the curiosity of one of the profession who pried into the proceedings of the goddess, she became displeased, and condemned them in future to bury their victims. She, however, presented her worshippers with one of her teeth for a pickaxe, a rib for a knife, and the hem of her lower garment for a noose. The pickaxe was regarded with the highest reverence by the Thugs; it was made with the greatest care, consecrated by many and minutely regulated ceremonies; intrusted to one selected for this dignity on account of his shrewdness, caution, and sobriety; and was submitted to special purifications each time after it had been used in the preparation of a grave.

In honor of their guardian deity, there is a temple dedicated at Bindachul, near Mirzapur, to the north of Bengal. When about to go out upon a murdering expedition, the Thugs betook themselves to the temple of the goddess, presented their prayers, supplications, and offerings there, and vowed, in the event of success, to consecrate to her service a large proportion of the booty. So implicit was their trust in Kali that no amount of misfortune, even death, could make them waver in their faith in her. All the evil that befell them they attributed to a want of faithful observance of all the divinely appointed rules of their sanguinary craft. After every murder they performed a special solemnity called *Tapani*, the principal feature of which consisted in addressing a prayer to the goddess, and in making the murderers partake of *gaur*, or consecrated sugar, the effect of which was believed to be irresistible. Another feast observed by the Thugs throughout India is *Kurkhae Karna*, or *Kofe*. It is also in honor of Kali, and the requisites for its celebration are goats, rice, ghee (butter), spices, and spirits. The superstitions of the Thugs are all of Hindû origin; but they are also adopted by the Mohammedans, who, while stout adherents to the tenets of the Koran, yet pay divine honors to the Hindû goddess of destruction. This inconsistency they sometimes reconcile by identifying Kali, whose other name is Bhavâni, with Fatima, the daughter of Mohammed, and wife of Ali, and by saying that Fatima invented the use of the noose to strangle the great dæmon Rukubijlana.

At various periods steps have been taken by the native and English governments to suppress the Thugs, but it is only since 1831 that energetic measures have been adopted by the British authorities to counteract the evil. This has been successfully accomplished by captain (afterwards Sir William) Sleeman, who secured the arrest of every known Thug, or relative of a Thug, in India. They were colonized at Jubbulpore, where technical instruction was afforded them and their children. Their descendants are still under government supervision there, and the practice of Thuggee has become extinct. For a fuller account of the Thugs the reader is referred to Sleeman, *Ramaseema*, or a *Vocabulary of*

*the Peculiar Language used by the Thugs* (1836); Taylor, *The Confessions of a Thug* (Lond. 1858); Thornton, *Illustrations of the History and Practices of the Thugs* (ibid. 1837).

**Thumbstall**, in ecclesiastical nomenclature, is a ring, set with pearls and rubies, or a rich ornament worn by the bishop over that part of the thumb of his right hand which had been dipped in the chrism, or holy oil. This was worn out of respect to the holy oil, and to preserve his garments from stains. It was removed at that part of the service when he washed his hands. This ring was anciently called a "poucer."

**Thum'mim**. See URIM AND THUMMIM.

**Thunder** (prop. 𐤕𐤓𐤕, *raâm*, *Βρονή*; occasionally [Exod. ix, 28, 29, 33, 34; xix, 16; xx, 18; 1 Sam. vii, 10; xii, 17, 18; Job xxviii, 26; xxxviii, 25] קוֹל, *kôl*, voice, as an elliptical expression for *Jehovah's voice* [Psa. xxix, 3 sq., etc.]; so also in the plur. קוֹלִים, *thunders*, Exod. ix, 28, etc.; which is likewise elliptical for the full *voices of God* [ix, 28]; once [Job xxxix, 19 (23)] erroneously in the A. V. for רָעָם, *raamâh*, a *shuddering*, i. e. probably the *mane* of a horse as bristling and streaming in the wind). This sublimest of all the extraordinary phenomena of nature is *poetically* represented as the voice of God, which the waters obeyed at the Creation (Psa. civ, 7; comp. Gen. i, 9). For other instances see Job xxxvii, 4, 5; xl, 9; Psa. xviii, 13; and especially ch. xxix, which contains a magnificent description of a thunder-storm. Agreeably to the popular speech of ancient nations, the poet ascribes the effects of lightning to the thunder, "The voice of the Lord breaketh the cedars" (ver. 5; comp. 1 Sam. ii, 19). In Jer. x, 13 the production of rain by lightning is referred to: "When he uttereth his voice, there is a multitude of waters in the heavens, he maketh lightnings with (or for) rain." See RAIN. Thunder is also introduced into the poetical allusion to the passage of the Red Sea in Psa. lxxvii, 18. The plague of hail on the land of Egypt is very naturally represented as accompanied with "mighty thunders," which would be *literally* incidental to the immense agency of the electric fluid on that occasion (Exod. ix, 22-29, 33, 34). It accompanied the lightnings at the giving of the law (xix, 16; xx, 18). See also Psa. lxxxi, 7, which probably refers to the same occasion, "I answered thee in the secret place of thunder," literally, "in the covering of thunder," בְּסִטְרֵי רָעָם, i. e. the thunder-clouds. It was also one of the grandeurs attending the divine interposition described in 2 Sam. xxii, 14; comp. Psa. xviii, 13. The enemies of Jehovah are threatened with destruction by thunder; perhaps, however, lightning is included in the mention of the more impressive phenomenon (1 Sam. ii, 10). Such means are represented as used in the destruction of Sennacherib's army (Isa. xxix, 5-7; comp. xxx, 30-33). Bishop Lowth would understand the description as metaphorical, and intended, under a variety of expressive and sublime images, to illustrate the greatness, the suddenness, the horror of the event, rather than the manner by which it was effected (new transl., and notes *ad loc.*). Violent thunder was employed by Jehovah as a means of intimidating the Philistines in their attack upon the Israelites, while Samuel was offering the burnt-offering (1 Sam. vii, 10; Ecclus. xli, 17). Homer represents Jupiter as interposing in a battle with thunder and lightning (*Iliad*, viii, 75, etc.; xvii, 594; see also Spence, *Polymetis*, Dial. xiii, 211). The term thunder was transferred to the war-shout of a military leader (Job xxxix, 25), and hence Jehovah is described as "causing his voice to be heard" in the battle (Isa. xxx, 30). Thunder was miraculously sent at the request of Samuel (1 Sam. xii, 17, 18). It is referred to as a natural phenomenon subject to laws originally appointed by the Creator (Job xxviii, 26; xxxviii, 25; Ecclus. xlii,

17); and is introduced in *visions* (Rev. iv, 5; vi, 1; viii, 5; xi, 19; xiv, 2; xvi, 18; xix, 6; Esther [Apoc.] xi, 5). So in Rev. x, 3, 4, "seven thunders." See SEVEN. It is adopted as a *comparison*. Thus "as lightning is seen before the thunder is heard, so modesty in a person before he speaks recommends him to the favor of the auditors" (Ecclus. xxxii, 10; Rev. xix, 6, etc.). The sudden ruin of the unjust man is compared to the transitory noise of thunder (Ecclus. xl, 13); but see ARNALD, *ad loc.* One of the sublimest metaphors in the Scriptures occurs in Job xxvi, 14, "Lo, these are parts of his ways; but how little a portion is heard of him [רָשַׁף, a mere whisper]; but the *thunder* of his power, who can understand?" Here the whisper and the thunder are admirably opposed to each other. If the former be so wonderful and overwhelming, how immeasurably more so the latter? In the sublime description of the war-horse (Job xxxix), he is said to perceive the battle afar off "by the thunder of the captains, and the shouting" (ver. 25). That part of the description, however (ver. 19), "hast thou clothed his neck with thunder?" appears to be a mistranslation. To the class of mistranslations must be referred every instance of the word "thunderbolts" in our version, a word which corresponds to no reality in nature. See THUNDERBOLT.

It is related (John xii, 28) that Jesus said, "Father, glorify thy name. Then came there a voice from heaven, saying, I have both glorified it, and will glorify it again." Some of the people that stood by, but had not heard the words distinctly, said it had "thundered," for the voice came from heaven; others who had caught the words supposed that God had spoken to Jesus by an angel, conformably to the Jewish opinion that God had never spoken but by the ministry of angels. Perhaps, however, thunder attended the voice, either a little before or after; comp. Exod. xix, 16, 19; Rev. iv, 5; vi, 1. See BATH-KOL.

Thunder enters into the appellative or surname given by our Lord to James and John—Boanerges, ὁ ἰσχυρὸς υἱὸς βροντῆς, says Mark, "sons of thunder" (iii, 17). Schleusner here understands the thunder of eloquence as in Aristoph. (*Achar.* 530). Virgil applies a like figure to the two Scipios, "Duo fulmina belli" (*Æn.* vi, 842). Others understand the allusion to be to the energy and courage, etc., of the two apostles (Lardner, *Hist. of the Apostles and Evangelists*, ix, 1; Suicer, *Thesaurus*, s. v. βροντῆς). Theophylact says they were so called because they were great preachers and divines, ὡς μεγαλοκήρυκας καὶ θεολογικοτάτους. Others suppose the allusion to be to the proposal of these apostles to call fire from heaven on the inhospitable Samaritans (Luke ix, 53, 54). It is not certain when our Lord so surnamed them. See BOANERGES.

In a physical point of view, the most noticeable feature in connection with thunder is the extreme rarity of its occurrence during the summer months in Palestine and the adjacent countries. From the middle of April to the middle of September it is hardly ever heard. Robinson, indeed, mentions an instance of thunder in the early part of May (*Researches*, i, 430), and Russell in July (*Aleppo*, ii, 289); but in each case it is stated to be a most unusual event. Hence it was selected by Samuel as a striking expression of the Divine displeasure towards the Israelites: "Is it not wheat harvest to-day? I will call upon the Lord, and he shall send thunder and rain" (1 Sam. xii, 17). Rain in harvest was deemed as extraordinary as snow in summer (Prov. xxvi, 1), and Jerome asserts that he had never witnessed it in the latter part of June, or in July (*Comment. on Amos iv*, 7); the same observations apply equally to thunder, which is rarely unaccompanied with rain (Russell, i, 72; ii, 285). Lieutenant Lynch,

in the month of May, witnessed a thunder-storm in the mountains of Moab, near the Dead Sea. He says, "Before we had half ascended the pass, however, there came a shout of thunder from the dense cloud which had gathered at the summit of the gorge, followed by a rain, compared to which the gentle showers of our more favored clime are as dew-drops to the overflowing cistern. The black and threatening cloud soon enveloped the mountain-tops, the lightning playing across it in incessant flashes, while the loud thunder reverberated from side to side of the appalling chasm. Between the peals we soon heard a roaring and continuous sound. It was the torrent from the rain-cloud, sweeping in a long line of foam down the steep declivity, bearing along huge fragments of rock, which, striking against each other, sounded like mimic thunder" (*Expedition*, p. 353). See LIGHTNING.

**Thunderbolt** (רָשַׁף, *resheph*, a flame, or "coal," Cant. viii, 6; hence lightning; fig. for arrow, Psal. lxxvi, 8; or fever, Deut. xxxii, 24). In accordance with the popular notion, "hot thunderbolts" (Psal. lxxviii, 48, רָשַׁף, Sept. ῥῶ πυρὶ, Vulg. ignis) means "lightnings." "Then shall the right-aiming thunderbolts go abroad" (Wisd. v, 21), βολίδες ἀστραπῶν, "flashes" or "strokes of lightning." "Threw stones like thunderbolts" (2 Macc. i, 16), συνεκτραύνων. The word conveys an allusion to the mode in which lightning strikes the earth. See LIGHTNING.

**Thundering Legion.** See LEGION, THUNDERING.

**Thurarii**, a name given by Tertullian to those who sold frankincense to heathen temples, and whose business could not be free from the imputation of idolatry, because it furnished what was necessary to the worship of idols.

**Thurible**, a censer used in some of the services of the Roman Catholic Church, made of metal, usually in the form of a vase, with a cover perforated to allow the

scented fumes of the burning incense to escape. It is usually carried by three chains which are attached to points around the lower portion, while a fourth is sometimes connected with the above, being united to the ring or handle, and is used at intervals to raise the upper portion or covering of the censer and allow the incense to escape

Thuribles: 1. Silver-gilt; 2. Copper-gilt.

more freely. In the 8th century thuribles were commonly used and directions for their due adoption enjoined by the authority of the local synoda. At Rome there are thuribles of gold in the treasury of the Church of St. John Lateran, reputed to have been given by the emperor Constantine. There is an old silver censer at Louvain, more than twelve at Milan Cathedral, seven at Metz Cathedral, four of silver-gilt at Notre Dame, Paris, of the 14th century, and some remarkable specimens at Rheims and at Treves. There are a few examples still in use in England, and several at the South Kensington and the British Museum and in private collections. The thurible is used at high mass, at vespers, at the benediction with the blessed sacrament, at funerals, public thanksgivings, etc. It has often been used in the Church of England since the Reformation. See *Lee, Gloss. of Liturg. Terms*, s. v.; *Parker, Gloss. of Architect.* s. v.

**Thurifer** (*incense-bearer*), the ministering attendant in the Roman Catholic Church whose duty it is to carry the thurible or censer and swing it at the appointed time during service. He is ordinarily a chorister or acolyte, but on great occasions a subdeacon, deacon, or even a priest.

**Thurificāti, or Thurificatōres** (*incense-offerers*), names of those who, during the pagan persecutions, consented to offer frankincense on an altar dedicated to an idol, in order to escape torture or death. This act of apostasy severed them from the Christian Church; and it was not till, by long penance, they had given satisfactory proof of sorrow for their crime that they were readmitted. See LAPSED; LIBELLATICI.

**Thuringia, COUNCIL OF** (*Concilium Quintilianeburgense* or *Northusense*), was held in 1105 by the emperor Henry, who had lately succeeded in reuniting Saxony to the Roman obedience. The council was held in the palace. The decrees of the preceding councils were confirmed, and the heresy of the Nicolaitans (meaning the concubinage of the clergy) was condemned.

**Thuroferary** (*incense-bearer*), a priest who bears the censer during the services of the Greek Church. He also assists the officiating priest to put on his sacerdotal vestments, and, during the anthem, spreads a veil over the consecrated vessels.

**Thursday** (Anglo-Saxon *Thors-dæg*, i. e. Thor's Day), the *Dies Jovis* of the Roman calendar, and sacred, in the Northern mythology, to Thor. It is called in German *Donnerstag*, thunder day. In the early Church, Augustine complained that some of the Christians persisted in keeping Thursday as a holiday in honor of Jupiter.

**THURSDAY OF THE GREAT CANON**, an Eastern phrase for the Thursday after Trinity Sunday.

**Thurston, DAVID, D.D.**, a Congregational minister, was born in Georgetown, Mass., Feb. 6, 1779. He was the uncle of the Rev. R. B. Thurston and half-brother of the Rev. Stephen Thurston, D.D. He graduated at Dartmouth College in 1804, and was ordained at Winthrop, Me., in 1807, where he remained pastor until 1851, with no intermission except the year in which he was agent for the American Antislavery Society (1837), and the four months in 1850 when he attended the Peace

Congress in Frankfort, Germany. During the remainder of his life, he labored four years each at Vassalborough, Searsport, and Litchfield, Me. He died at the latter place, May 7, 1865. Dr. Thurston was a man of eminent piety, an earnest speaker, and no mean theologian. In 1819 he declined a professorship in Bangor Theological Seminary, and in 1853 wished to decline the degree of D.D. from Dartmouth College. He published twenty-two sermons, some in pamphlet form and some in periodicals:—*Growth in Grace*:—*History of Winthrop* (247 pp.):—*Letters of a Father to a Son*:—and newspaper articles without number. See *Cong. Quarterly*, 1867, p. 313-328.

**Thyati'ra** (*Θατιρα* [rā], Vulg. *civitas Thyatire-norum*), a city in Asia Minor, the seat of one of the seven Apocalyptic churches (Rev. i, 11; ii, 18). It was situated on the confines of Mysia and Ionia, a little to the south of the river Hyllus, and at the northern extremity of the valley between Mount Tmolus and the southern ridge of Temnus. It was founded by Seleucus Nicator, and was regarded as a Macedonian colony (Strabo, xiii, 928), from the strong Macedonian element in its population, it being one of the many Macedonian colonies established in Asia Minor, in the sequel of the destruction of the Persian empire by Alexander. The original inhabitants had probably been distributed in hamlets round about when Thyatira was founded. Two of these, the inhabitants of which are termed Areni and Nagdemi, are noticed in an inscription of the Roman times. According to Pliny, it was known in earlier times by the names *Pelopis* and *Euhippia* (*Hist. Nat.* v, 29). The Roman road from Pergamos to Sardis passed through it. The resources of the neighboring region may be inferred both from the name *Euhippia* and from the magnitude of the booty which was

Thyatira.

carried off in a foray, conducted jointly by Eumenes of Pergamos and a force detached by the Roman admiral from Canus, during the war against Antiochus. During the campaign of B.C. 190, Thyatira formed the base of the king's operations; and after his defeat, which took place only a few miles to the south of the city, it submitted, at the same time with its neighbor Magnesia-on-Sipylus, to the Romans, and was included in the territory made over by them to their ally the Pergamene sovereign.

During the continuance of the Attalic dynasty, Thyatira scarcely appears in history; and of the various inscriptions which have been found on the site, not one unequivocally belongs to earlier times than those of the Roman empire. The prosperity of the city seems to have received a new impulse under Vespasian, whose acquaintance with the East, previously to mounting

the imperial throne, may have directed his attention to the development of the resources of the Asiatic cities. A bilingual inscription, in Greek and Latin, belonging to the latter part of his reign, shows him to have restored the roads in the domain of Thyatira. From others, between this time and that of Caracalla, there is evidence of the existence of many corporate guilds in the city. Bakers, potters, tanners, weavers, robemakers, and dyers (οἱ βαφεῖς) are specially mentioned. Of these last there is a notice in no less than three inscriptions, so that dyeing apparently formed an important part of the industrial activity of Thyatira, as it did of that of Colossæ and Laodiceæ. With this guild there can be no doubt that Lydia, the seller of purple stuffs (πορφυρώλις), from whom Paul met with so favorable a reception at Philippi (Acts xvi, 14), was connected. The country around this city is fertile and well watered, abounding in oaks and acacias, and in its numberless streamlets are found the leeches used in medicine throughout Austria and the east of Europe in general. The mode of taking them is curious: a number of children are sent to walk barefooted among the brooks, and come back to their employers with their feet covered with leeches. The waters here are said to be so well adapted for dyeing that in no place can the scarlet cloth out of which fezzes are made be so brilliantly or so permanently dyed as here. The place still maintains its reputation for this manufacture, and large quantities of scarlet cloth are sent weekly to Smyrna.

Thyatira is at present a populous and flourishing town; its inhabitants amount to seventeen thousand, and they are on the increase. Its modern name is *Ak-hissar*, or "the white castle." The town consists of about two thousand houses, for which taxes are paid to the government, besides two or three hundred small huts; of the former, three hundred are inhabited by Greeks, thirty by Armenians, and the rest by Turks. The common language of all classes is the Turkish; but in writing it the Greeks use the Greek, and the Armenians the Armenian characters. There are nine mosques and one Greek church. It exhibits few remains of antiquity, save fragments built into the walls of houses. There is, indeed, an ancient building in a very ruinous condition at a little distance from the city, to which tradition has given the name of the Palace of the Cæsars; it is impossible to determine either its date or its purpose. But though there is little that can be identified, yet for miles around Thyatira are precious relics in the form of sarcophagi, capitals of columns, and similar fragments, used as troughs, coverings for wells, and such purposes.

Thyatira was never a place of paramount political importance, and hence her history is less interesting to the classical student than those of Ephesus, Sardis, and Pergamos, which were the capitals of great kingdoms. Her chief hold on our consideration is that at Thyatira was seated one of those churches to which the Spirit sent prophetic messages by the beloved apostle. The message itself is one of peculiar interest, but presenting at the same time a remarkable difficulty. After much commendation on the virtues and progress of the Church—or the elder, pastor, bishop, or angel—the epistle continues, "Notwithstanding I have a few things against thee, because thou sufferest that woman (or as the correct text has it, thy wife) Jezebel, which calleth herself a prophetess, to teach and to seduce my servants to commit fornication, and to eat things sacrificed unto idols" (Rev. ii, 20). This is followed by threats of judgment upon herself, her lovers, and her children. The question naturally arises, What party is represented by this Jezebel? To understand this message rightly, it will have to be borne in mind that Thyatira was very near Pergamos, and that the latter was by far the more important city, and probably possessed the more numerous Church; the influence and example of Pergamos would be likely to have a great influence on the smaller city and

Church. See PERGAMOS. Now, at Pergamos, the Baalamites, who taught precisely the doctrine here attributed to Jezebel, were numerous, as well as the Nicolaitans (q. v.). We are not, therefore, at all to be surprised at finding a party espousing and endeavoring to propagate similar sentiments in Thyatira; but it would be a miserable literalism, and contrary to the whole genius of the Apocalyptic imagery, to suppose the leader of this heretical sect to be a woman of the name of Jezebel. We can only understand by this a person holding substantially the same relation to the official head of the Church in Thyatira which Jezebel of old did to the king of Israel; that is, a party that ought to have been in subjection usurping it, for wicked purposes, over the proper ruler. For this the leader is severely rebuked, and the heaviest judgments threatened both against him and the usurping party unless they repent. There was still, however, a faithful portion who stood aloof from the licentious teaching which was propagated. To them the Lord turns with words of encouragement, and exhorts them to hold fast what they had received. There is a small error also in the text at the commencement of this address. It should be "But unto you I say, the rest in Thyatira;" those, namely, who resisted the pollution. The received text confuses the meaning by putting it, "But unto you I say, and to the rest," as if both parties were alike called to continue steadfast. See JEZEBEL.

The principal deity of the city was Apollo, worshipped as the sun-god under the surname *Tyrinnas*. He was no doubt introduced by the Macedonian colonists, for the name is Macedonian. One of the three mythical kings of Macedonia, whom the genealogists placed before Perdiccas—the first of the Temenidæ that Herodotus and Thucydides recognise—is so called; the other two being *Caranus* and *Cenus*, manifestly impersonations of the *chief* and the *tribe*. The inscriptions of Thyatira give Tyrinnas the titles of *πρόπολις* and *προπάτωρ θεός*; and a special priesthood was attached to his service. A priestess of Artemis is also mentioned, probably the administratrix of a cult derived from the earlier times of the city, and similar in its nature to that of the Ephesian Artemis. Another superstition of an extremely curious nature which existed at Thyatira, seems to have been brought thither by some of the corrupted Jews of the dispersed tribes. A fane stood outside the walls dedicated to *Sambatha*—the name of the sibyl who is sometimes called Chaldean, sometimes Jewish, sometimes Persian—in the midst of an enclosure designated "the Chaldean's court" (τοῦ Χαλδαίου περίβολος). This lends an additional illustration to the above passage (Rev. ii, 20, 21), which seems to imply a form of religion that had become condemnable from the admixture of foreign alloy, rather than one idolatrous *ab initio*. Now there is evidence to show that in Thyatira there was a great amalgamation of races. Latin inscriptions are frequent, indicating a considerable influx of Italian immigrants; and in some Greek inscriptions many Latin words are introduced. Latin and Greek names, too, are found accumulated on the same individuals, such as Titus Antonius Alfenus Arignotus and Julia Severina Stratonicis. But amalgamation of different races in pagan nations always went together with a syncretism of different religions, every relation of life having its religious sanction. If the sibyl Sambatha was really a Jewess, lending her aid to this proceeding, and not discountenanced by the authorities of the Judæo-Christian Church at Thyatira, both the censure and its qualification become easy of explanation. It seems also not improbable that the imagery of the description in Rev. ii, 18, ὁ ἔχων τοὺς ὀφθαλμοὺς αὐτοῦ ὡς φλόγα, καὶ οἱ πόδες αὐτοῦ ὅμοιοι χαλκοβιβάνῃ, may have been suggested by the current pagan representations of the tutelary deity of the city. See a parallel case at Smyrna (q. v.). Besides the cults which have been mentioned, there is

evidence of a deification of Rome, of Hadrian, and of the imperial family. Games were celebrated in honor of Tyrimnas, of Hercules, and of the reigning emperor. On the coins before the imperial times, the heads of Bacchus, of Athena, and of Cybele are also found; but the inscriptions only indicate a cult of the last of these.

Coin of Thyatira.

Thyatir.*, especially Nos. 3484-3499; Jablonski, *De Ecclesia Thyatirensi* (Francof. ad V. 1739); Stosch, *Antiq. Thyatiren.* (Zwoll. 1763); Hoffmann, *Griechenland*, ii, 1714; Srobo-da, *Seven Churches of Asia Minor*, p. 48 sq.; Barber, *Patmos and Seven Churches* (Bridgeport, 1851), p. 187 sq.; and the works cited under ASIA MINOR and REVELATION.

**Thy'ine Wood** (ξύλον θύινον; Vulg. *lignum thyinum*) occurs once in Rev. xviii, 12 (margin "sweet" [wood]), where it is mentioned as one of the valuable articles of commerce that should be found no more in Babylon (Rome), whose fall is there predicted by John. Symmachus and the Vulg. also understand it to be meant by the algum-trees of 1 Kings x, 11. There can be little doubt that the wood here spoken of is that of the *Thuja articulata*, Des Font., the *Callitris quadrivalvis* of present botanists. Most of our readers are

Thyine-tree (*Callitris quadrivalvis*).

familiar with the "arbor vitæ," *Thuja occidentalis*, so common in our shrubberies. Closely allied to this—in the same cypress-like division of the Conifere; indeed, until lately included in the genus *Thuja*—is the tree in question. This wood was in considerable demand by the Romans, being much employed by them in the or-

namental wood-work of their villas, and also for tables, bowls, and vessels of different kinds. It was also fragrant (*Ælian, Var. Hist.* v, 6). It is noticed by most ancient authors from the time of Theophrastus (*Plant.* v, 5; see *Ælian, Anim.* ii, 11; Strabo, iv, 202). It was the citron-wood of the Romans; thus Salmassius, "*Θύα Theophrasti est illa citrus, quæ citreas menus dabat Romanis inter lautissimas opera*" (Celsius, *Hierobot.* ii, 25). It was produced only in Africa, in the neighborhood of Mount Atlas, and in Granada, "*citrum, arborem Africæ peculiarem esse, nec alibi nasci*." It grew to a goodly size, "*quarum amplitudo ac radices æstimari possunt ex orbibus*" (Pliny, *Hist. Nat.* xiii, 15). Fabulous prices were given for tables and other ornamental furniture made of citrus-wood (see Pliny, *loc. cit.*).

This cedar or citron-wood (*Callitris quadrivalvis*, the *Thuja articulata* of Linnaeus) is a native of Mount Atlas and of other uncultivated hills on the coast of Africa. It grows to a height of from fifteen to twenty-five feet. In the kingdom of Morocco, according to Broussouel, this tree produces the Sandarach resin of commerce. Captain Cook, in his *Sketches in Spain* (vol. ii), brought to light the fact that the wood-work of the roof of the celebrated mosque now the Cathedral of Cordova, built in the 9th century, is of this wood; it had previously been thought to be that of the larch, from the resemblance of the Spanish word *alerce*, which is applied to the wood of *Callitris quadrivalvis* in Spain and Barbary, to the Latin word *larix*. "By a singular coincidence, the subject has been undergoing investigation about the same time in Africa. Mr. Hay, the British consul at Tangiers, had, by tracing the Arabic etymology of the word *alerce* (no doubt *al arz* or *eres*), by availing himself of the botanical researches of the Danish consul in Morocco, and by collating the accounts of the resident Moors, made out that the *alerce* was the *Thuja articulata* which grows on Mount Atlas. In corroboration of his views, a plank of its timber was sent to London. This plank, which is in possession of the Horticultural Society, is one foot eight inches in width. The Cordova wood is highly balsamic and odoriferous, the resin, no doubt, preventing the ravages of insects as well as the influence of the air" (Loudon, *Arboret.* iv, 2468). The wood is dark nut-brown, close-grained, and is very fragrant (Tristram, *Nat. Hist. of the Bible*, p. 402). Lady Calcott (*Script. Herbal*, p. 2) regards it as the algum (q. v.) of the Old Test. See BOTANY.

**Thym**, JOHANN FRIEDRICH WILHELM, a Protestant theologian of Germany, was born in Berlin, Sept. 5, 1768, and died there May 21, 1803. He wrote, *De Vita Mosis a Philone Conscripta* (Halle, 1796):—*Versuch einer historisch-kritischen Darstellung der jüd. Lehre von einer Fortdauer nach dem Tode* (Berlin, 1795):—*Theol. Encyklop. u. Methodologie* (Halle, 1797):—*Historisch-kritisches Lehrbuch der Homiletik* (ibid. 1800). See Furst, *Bibl. Jud.* iii, 430; Winer, *Handbuch der theol. Literatur*, i, 2, 474, 604; ii, 48, 59, 312, 802. (B. P.)

**Thyrōri** (θύρῳποι, door-keepers), a lower order of the clergy in the Greek Church, which was done away with from the time of the Council of Trullo, A.D. 692.—Bingham, *Christ. Antiq.* bk. iii, ch. vi, § 1.

**Thysiasterium** (Gr. θυσιαστήριον, altar-part), a word usually applied to the altar itself, or the Lord's table; yet, in some ancient canons, used to denote the whole sanctuary within the rails, where none but the clergy were allowed.—Bingham, *Christ. Antiq.* bk. viii, ch. vi, § 3.

**Tiamat** was, in Acadian mythology, the goddess who presided over the creation. She was a form, or rather another name, of the goddess Tihamtu (the Sea).

**Tiara**, the name of the pope's triple crown, which is the badge of his civil rank as the keys are of his eccle-

siastical functions. It is composed of a high cap of gold cloth, encircled by three coronets, with a mound (and cross) of gold on the top. The tiara was originally a round high cap, and was first used by pope Damasus II, A.D. 1048. Pope John XIII first girded it with a crown pope Boniface VIII added a second crown in 1295; and pope Benedict XIII added the third in 1885, although some ascribe the latter to Urban V (1362-70). The tiara, when used as an imperial portion of dress, had at the bottom of it one golden circle of a crown-like shape. See POPE.

Tiara.

**TĪbe'rias** (New Test. and Josephus Τιβεριάς, Talmud טִבְרִיָא), the most important city on the Lake of Galilee in the time of Christ, and the only one that has survived to modern times, still retaining the same name.

1. *Origin and Early Associations.*—The place is first mentioned in the New Test. (John vi, 1, 23, xxi, 1), and then by Josephus (*Ant.* xviii, 2, 3; *War*, ii, 9, 1), who states that it was built by Herod Antipas, and was named by him in honor of the emperor Tiberius. It was probably not a new town, but a restored or enlarged one merely; for *Rakkath* (Josh. xix, 35), which is said in the Talmud (Jerusalem *Megillah*, fol. 701; comp. *Otho, Lex. Rabb.* p. 755) to have occupied the same position, lay in the tribe of Naphtali (if we follow the boundaries as indicated by the clearest passages), and Tiberias appears to have been within the limits of the same tribe (Matt. iv, 13). If the graves mentioned by Josephus (*Ant. loc. cit.*) are any objection, they must militate against this assumption likewise (Lightfoot, *Chorog. Cent.* c. 72-74). The same remark may be made respecting Jerome's statement that Tiberias succeeded to the place of the earlier *Chinnereth* (*Onomasticon*, a. v.); but this latter town has been located by some farther north and by others farther south than the site of Tiberias. The tenacity with which its Roman name has adhered to the spot (see below) indicates its entire reconstruction; for, generally speaking, foreign names in the East applied to towns previously known under names derived from the native dialect—as, e. g., Epiphania for Hammath (Josh. xix, 35), Palmyra for Tadmor (2 Chron. viii, 4), Ptolemais for Akko (Acts xxi, 7)—lost their foothold as soon as the foreign power passed away which had imposed them, and gave place again to the original appellations.

Tiberias was the capital of Galilee from the time of its origin until the reign of Herod Agrippa II, who changed the seat of power back again to Sepphoris, where it had been before the founding of the new city. Many of the inhabitants were Greeks and Romans, and foreign customs prevailed there to such an extent as to give offence to the stricter Jews. See HERODIAN. Herod, the founder of Tiberias, had passed most of his early life in Italy, and had brought with him thence a taste for the amusements and magnificent buildings with which he had been familiar in that country. He built a stadium there, like that in which the Roman youth trained themselves for feats of rivalry and war. He erected a palace, which he adorned with figures of animals, "contrary," as Josephus says (*Life*, § 12, 13, 64), "to the law of our countrymen." The place was so much the less attractive to the Jews, because, as the

same authority states (*Ant.* xviii, 2, 3), it stood on the site of an ancient burial-ground, and was viewed, therefore, by the more scrupulous among them almost as a polluted and forbidden locality. Tiberias was one of the four cities which Nero added to the kingdom of Agrippa (Josephus, *War*, xx, 13, 2). Coins of the city of Tiberias are still extant, which are referred to the times of Tiberius, Trajan, and Hadrian.

Herodian Coin of Tiberias.

*Obverse*—Legend in Greek "of Herod the Tetrarch;" palm-branch and the date 33 (A.D. 29). *Reverse*—Wreath with legend "Tiberias."

2. *Scriptural Mention.*—It is remarkable that the Gospels give us no information that the Saviour, who spent so much of his public life in Galilee, ever visited Tiberias. The surer meaning of the expression, "He went away beyond the sea of Galilee of Tiberias," in John vi, 1 (*πέραν τῆς θαλάσσης τῆς Γαλιλαίας τῆς Τιβεριάδος*), is not that Jesus embarked from Tiberias, but, as Meyer remarks, that he crossed from the west side of the *Galilean sea* of Tiberias to the opposite side. A reason has been assigned for this singular fact, which may or may not account for it. As Herod, the murderer of John the Baptist, resided most of the time in this city, the Saviour may have kept purposely away from it, on account of the sanguinary and artful (Luke xiii, 32) character of that ruler. It is certain, from Luke xxiii, 8, that though Herod had heard of the fame of Christ, he never saw him in person until they met at Jerusalem, and never witnessed any of his miracles. It is possible that the character of the place, so much like that of a Roman colony, may have been a reason why he who was sent to the lost sheep of the house of Israel performed so little labor in its vicinity. The head of the lake, and especially the Plain of Gennesaret, where the population was more dense and so thoroughly Jewish, formed the central point of his Galilean ministry. The feast of Herod and his courtiers, before whom the daughter of Herodias danced, and, in fulfilment of the tetrarch's rash oath, demanded the head of the dauntless reformer, was held in all probability at Tiberias, the capital of the province. If, as Josephus mentions (*Ant.* xviii, 5, 2), the Baptist was imprisoned at the time in the castle of Machærus beyond the Jordan, the order for his execution could have been sent thither, and the bloody trophy forwarded to the implacable Herodias at the palace where she usually resided. Gams (*Johannes der Täufer im Gefängnis*, p. 47, etc.) suggests that John, instead of being kept all the time in the same castle, may have been confined in different places at different times. The three passages already referred to are the only ones in the New Test. which mention Tiberias by name, viz. John vi, 1; xxi, 1 (in both instances designating the lake on which the town was situated), and vi, 23, where boats are said to have come from Tiberias near to the place at which Jesus had miraculously supplied the wants of the multitude. Thus the lake in the time of Christ, among its other appellations, bore also that of the principal city in the neighborhood; and in like manner, at the present day, *Bahr Tübarieh*, "Sea of Tiberias," is almost the only name under which it is known among the inhabitants of the country.

3. *Later Jewish Importance.*—Tiberias has an interesting history, apart from its strictly Biblical associations. It bore a conspicuous part in the wars between the Jews and the Romans, as its fortifications were an important military station (Josephus, *War*, ii, 20, 6; iii,

10, 1; *Life*, § 8 sq.). The Sanhedrim, subsequently to the fall of Jerusalem, after a temporary sojourn at Jamnia and Sepphoris, became fixed there about the middle of the 2d century. Celebrated schools of Jewish learning flourished there through a succession of several centuries. The Mishna was compiled at this place by the great rabbi Judah hak-Kodesh (A.D. 190). The Masorah, or body of traditions, which has transmitted the readings of the Hebrew text of the Old Test., and preserved, by means of the vowel system, the pronunciation of the Hebrew, originated, in a great measure, at Tiberias. The place passed, under Constantine, into the power of the Christians; and during the period of the Crusades it was lost and won repeatedly by the different combatants. Since that time it has been possessed successively by Persians, Arabs, and Turks; and it contains now, under the Turkish rule, a mixed population of Mohammedans, Jews, and Christians, variously estimated at from two to four thousand. The Jews constitute, perhaps, one fourth of the entire number. They regard Tiberias as one of the four holy places (Jerusalem, Hebron, Safed, are the others), in which, as they say, prayer must be offered without ceasing, or the world would fall back instantly into chaos. One of their singular opinions is that the Messiah, when he appears, will emerge from the waters of the lake, and landing at Tiberias, proceed to Safed, and there establish his throne on the highest

original site, except that it is confined to narrower limits than those of the original city. According to Josephus (*Life*, § 65), Tiberias was 30 stadia from Hippo, 60 from Gadara, and 120 from Scythopolis; according to the Talmud, it was 13 Roman miles from Sepphoris. The place is four and a half hours from Nazareth, one hour from Mejdel, possibly the ancient Magdala, and thirteen hours, by the shortest route, from Bānias or Cæsarea Philippi. Near Tübarieh, about a mile farther south along the shore, are the celebrated warm baths, which the Roman naturalists (Pliny, *Hist. Nat.* v, 15) reckoned among the greatest known curiosities of the world. The intermediate space between these baths and the town abounds with the traces of ruins, such as the foundations of walls, heaps of stone, blocks of granite, and the like; and it cannot be doubted, therefore, that the Ancient Tiberias occupied also this ground, and was much more extensive than its modern successor. From such indications, and from the explicit testimony of Josephus, who says (*Ant.* xviii, 2, 3) that Tiberias was near Ammaus (*Ἀμμαῖος*), or the Warm Baths, there can be no uncertainty respecting the identification of the site of this important city. (See also the Mishna, *Shabb.* iii, 4; and other Talmudical passages in Lightfoot's *Horæ Heb.* p. 133 sq. Comp. Wichmannshausen, *De Thermis Tiberiensibus*, in Ugolino, *Thesaur.* tom. vii.) These springs contain sulphur, salt, and iron;

Town and Lake of Tiberias, from the South-west.

summit in Galilee. In addition to the language of the particular country, as Poland, Germany, Spain, from which they or their families emigrated, most of the Jews here speak also the Rabbinic Hebrew and modern Arabic. They occupy a quarter in the middle of the town, adjacent to the lake; just north of which, near the shore, is a Latin convent and church, occupied by a solitary Italian monk. There is a place of interment near Tiberias, in which a distinguished rabbi is said to be buried with 14,000 of his disciples around him. The grave of the Arabian philosopher Lokman, as Burckhardt states, was pointed out here in the 14th century.

4. *Position and Present Condition.*—As above intimated, the ancient name has survived in that of the modern Tübarieh, which occupies unquestionably the

and were employed for medicinal purposes. See HAMMATH.

It stood anciently, as now, on the western shore, about two thirds of the way between the northern and southern end of the Sea of Galilee. There is a margin or strip of land there between the water and the steep hills (which elsewhere in that quarter come down so boldly to the edge of the lake), about two miles long and a quarter of a mile broad. The tract in question is somewhat undulating, but approximates to the character of a plain. Tübarieh, the modern town, occupies the northern end of this parallelogram, and the Warm Baths the southern extremity; so that the more extended city of the Roman age must have covered all, or nearly all, of the peculiar ground whose limits are thus clearly defined.

The present Tübarleh has a rectangular form, is guarded by a strong wall on the land side, but is left entirely open towards the sea. A few palm-trees still remain as witnesses of the luxuriant vegetation which once adorned this garden of the Promised Land, but they are greatly inferior in size and beauty to those seen in Egypt. The oleander grows profusely here, almost rivalling that flower so much admired as found on the neighboring Plain of Gennesaret. The people, as of old, draw their subsistence in part from the adjacent lake. The spectator from his position here commands a view of almost the entire expanse of the sea, except the southern part, which is cut off by a slight projection of the coast. The precipices on the opposite side appear almost to overhang the water, but, on being approached, are found to stand back at some distance, so as to allow travellers to pass between them and the water. The lofty Hermon, the modern Jebel eah-Sheikh, with its glistening snow-heaps, forms a conspicuous object of the landscape in the north-east. Many rock-tombs exist in the sides of the hills, behind the town, some of them, no doubt, of great antiquity, and constructed in the best style of such monuments. The climate here in the warm season is very hot and unhealthy; but most of the tropical fruits, as in other parts of the valley of the Jordan, become ripe very early, and, with industry, might be cultivated in great abundance and perfection.

This place, in common with many others in Galilee, suffered greatly by an earthquake on New-year's-day, 1837. Almost every building, with the exception of the walls and some parts of the castle, was levelled to the ground. The inhabitants were obliged to live for some time in wooden booths. It is supposed that at least seven hundred of the inhabitants were destroyed at that time. The place has even yet not fully recovered from the disaster.

Tiberias is fully described in Raumer's *Palästina*, p. 125; Robinson's *Biblical Researches*, ii, 380 sq.; Porter's *Handbook*, p. 421 sq.; Thomson's *Land and Book*, ii, 71 sq.; and most books of travel in Palestine.

**TIBERIAS, THE SEA OF** (ἡ θάλασσα τῆς Τιβερίας; Vulg. *mare Tiberiadis*). This term is found only in John xxi, 1, the other passage in which it occurs in the A. V. (vi, 1) being, if the original is accurately rendered, "the sea of Galilee, of Tiberias." John probably uses the name as more familiar to non-residents in Palestine than the indigenous name of the "sea of Galilee," or "sea of Gennesaret," actuated, no doubt, by the same motive which has induced him so constantly to translate the Hebrew names and terms which he uses (such as Rabbi, Rabboni, Messiah, Cephas, Siloam, etc.) into the language of the Gentiles. See GALILEE, SEA OF.

**Tiberius** (Τιβέριος), in full, **TIBERIUS CLAUDIUS NERO CÆSAR**, the Roman emperor, successor of Augustus, who began to reign A.D. 14, and reigned until 37. He was the son of Tiberius Claudius Nero and Livia, and hence a stepson of Augustus. He was born at Rome Nov. 16, B.C. 45. He became emperor in his fifty-fifth year, after having distinguished himself as a commander in various wars, and having evinced talents of a high order as an orator and an administrator of civil affairs. His military exploits and those of Drusus, his brother, were sung by Horace (*Carm.* iv, 4, 14). He even gained the reputation of possessing the sterner virtues of the Roman character, and was regarded as entirely worthy of the imperial honors to which his birth and supposed personal merits at length opened the way. Yet on being raised to the supreme power, he suddenly became, or showed himself to be, a very different man. His subsequent life was one of inactivity, sloth, and self-indulgence. He was despotic in his government, cruel and vindictive in his disposition. He gave up the affairs of the State to the vilest favorites, while he himself wallowed in the very kennel of all that was low and de-

basing. The only palliation of his monstrous crimes and vices which can be offered is that his disgust of life, occasioned by his early domestic troubles, may have driven him at last to despair and insanity. Tiberius died at the age of seventy-eight, after a reign of twenty-three years. The ancient writers who supply most of our knowledge respecting him are Suetonius, Tacitus (who describes his character as one of studied dissimulation and hypocrisy from the beginning), *Annal.* ch. i-vi; Vell. Paterc. ii, 94, etc.; and Dion Cass. ch. xlv-xlviii. See Smith, *Dict. of Gr. and Rom. Biog.* s. v.; and the monographs on Tiberius in German by Freytag (Berl. 1870) and Stahr (ibid. 1873), and in English by Beesley (Lond. 1878).

It will be seen that the Saviour's public life, and some of the introductory events of the apostolic age, must have fallen within the limits of his administration. The memorable passage in Tacitus (*Annal.* xv, 44) respecting the origin of the Christian sect places the crucifixion of the Redeemer under Tiberius: "Ergo abolendo rumor (that of his having set fire to Rome) Nero subdidit reos, et quæsitissimis pœnis affecit, quos per flagitia invisos vulgus Christianos appellabat. Auctor nominis ejus Christus Tiberio imperitante per procuratorem Pontium Pilatum supplicio affectus erat" (see the monographs cited by Volbeding, *Index Programmatum*, p. 95; see also CHRESTUS). In Luke iii, 1 he is termed Tiberius Cæsar; John the Baptist, it is there said, began his ministry in the *fifteenth year* of his reign (ἡγεμονία). This chronological notation is an important one in determining the year of Christ's birth and entrance on his public work. See JESUS CHRIST. Augustus admitted Tiberius to a share in the empire two or three years before his own death; and it is a question, therefore, whether the *fifteenth year* of which Luke speaks should be reckoned from the time of the copartnership or from that when Tiberius began to reign alone. The former is the computation justified by other data. See CHRO-

Coin of Antioch with the Head of Tiberius.

NOLOGY. The other passages in which he is mentioned under the title of Cæsar offer no points of personal allusion, and refer to him simply as the emperor (Matt. xxii, 17 sq.; Mark xii, 14 sq.; Luke xx, 22 sq.; xxiii, 2 sq.; John xix, 12 sq.). See CÆSAR.

**Tib'hath** (Heb. *Tibchath*; תִּבְחַת, slaughter or [Furst] extension; Sept. [repeating the preposition], *Μαραθῖθ*; Vulg. *Thebath*), a city of Hadadezer, king of Zobah (1 Chron. xviii, 8), which in 2 Sam. viii, 8 is called ΒΕΤΑΗ, probably by an accidental transposition of the first two letters. If Aram-Zobah be the country between the Euphrates and Coele-Syria, we must look for Tibhath on the eastern skirts of the Antilibanus, or of its continuation, the Jebel Shahshabu and the Jebel Rieha. But Furst (*Heb. Lex.* s. v.) thinks that "the city *Thebata*, in the north-west of Mesopotamia (Pliny, *Hist. Nat.* vi, 30), or the place *Θεβηδα* of Arrian (in Steph. Byz.), which lay, according to the *Pentinger Tables* (xi, e), south of Nisibis, may refer to this name."

**Tib'ni** (Heb. *Tibni*; תִּבְנִי, perhaps intelligent; Sept. *Θαυνί*; Josephus, *Θαβναίος*, *Ant.* viii, 12, 5; Vulg.

*Thelms*), the sixth king of Israel, B.C. 926-922. After Zimri had burned himself in his palace, there was a division in the northern kingdom, half of the people following Tibni the son of Ginath, and half following Omri (1 Kings xvi, 21, 22). Omri was the choice of the army. Tibni was probably put forward by the people of Tirzah, which was then besieged by Omri and his host. The struggle between the contending factions lasted four years (comp. ver. 15, 23); but the only record of it is given in the few words of the historian: "The people that followed Omri prevailed against the people that followed Tibni the son of Ginath; so Tibni died, and Omri reigned." The Sept. adds that Tibni was bravely seconded by his brother Joram. But Josephus knows nothing of this apocryphal addition. See ISRAEL, KINGDOM OF.

**Tickets of Membership** (English Wesleyan). The possession of a "ticket" is one of the evidences of membership in the Methodist society. Wesley decided, in 1743, to meet and talk with every member once in three months. If considered fit and proper, every member received a ticket. This quarterly ticket, with the member's name written upon it, and signed by the minister, enables such a one to obtain everywhere the privilege of membership. When a member of the society removes from one circuit to another, a "note of removal," signed by the minister, introduces him or her to the minister of the circuit to which either goes. Ministers must not give tickets to those who have ceased to meet in class. All the financial questions are explained to those who are seeking to join the society, and notes of admission on trial, with a copy of the "rules," are given. If any member has walked disorderly, the minister has power to withhold his ticket until he has conversed privately with the offender; if not satisfied, he must inform the party that he may appeal to the leaders' meeting. But he must report the case first to the next weekly meeting of ministers in the circuit, and then to the leaders' meeting. See Simpson, *Cyclop. of Methodism*, s. v.

**Ti'dal** (Heb. *Tidal*, תִּדְאֵל, if Shemitic=fear [Gesenius] or *removal* [Fürst]); but, according to Lenormant, Accadian=*great son*; Sept. *Θαργάλ* v. r. *θαργά*; Josephus, *Θάδαλος*, Ant. i, 9, 1; Vulg. *Thadal*), the last named (Gen. xiv, 1, 9) of the three subordinate "kings" who, in confederation with Chedorlaomer, attacked and defeated the rebellious princes of the Sodomitic pentarchy in the days of Abraham, B.C. cir. 2070. He is called "king of nations" (נִינְוֵי, *goyim*), which Symmachus interprets *Scythians*, and others *Galilee*, both on very slender, if not inaccurate, grounds. Rawlinson suggests, for equally precarious reasons (*Ancient Monarchies*, i, 55, note), that the name is probably Turanian; but he justly remarks that, from the title given to Tidal, "it is reasonable to understand that he was a chief over various nomadic tribes to whom no special tract of country could be assigned, since at different times of the year they inhabited different portions of Lower Mesopotamia. This is the case with the Arabs of these parts at the present day." See CHEDORLAOMER.

**Tidhar**. See PINE.

**Tiedebaik**, in Chinese and Japanese mythology, was one of the head deities, who is said to be in the temple of Osaka. It is unknown what this deity represented, unless the description of the image permits a conjecture. Tiedebaik, a powerful four-armed giant, with a crown upon his head, stands in splendidly ornamented dress upon a figure whose horned head and dragon tail characterize it as an evil deity.

**Tierce**, the service for the third hour, or nine o'clock in the morning, in the early Church. See MATIN; NONES; VESPER.

**Tiercilita**, the name given to the third order of Winims (q. v.).

X.—C c

**Tiffin**, EDWARD, M.D., a local preacher in the Methodist Episcopal Church, was born in Carlisle, England, June 19, 1766. At an early age he commenced the study of medicine; removed to the United States in 1784, and settled in Charlestown, Jefferson Co., Va., where he became a practitioner. In 1790 he entered the Methodist Episcopal Church, and was ordained deacon by bishop Asbury, Nov. 19, 1792. In 1796 Dr. Tiffin took up his residence in Chillicothe, in the territory north-west of the Ohio River, where he continued the practice of medicine, and preached regularly on Sundays. In the autumn of 1799, Dr. Tiffin was elected a member of the territorial legislature; in 1802 he was chosen a delegate from Ross County to the convention which adopted the first constitution and formed a state government for Ohio, of which convention he was elected president. In 1803 he was elected the first governor. At the session of the legislature in 1806-7, governor Tiffin was chosen United States senator, but resigned March 3, 1809, on account of the death of his wife. The same year he was elected to the legislature and chosen speaker of the House. The next year (1810) he was returned to the House of Representatives and elected speaker. He was selected by president Madison a commissioner of the General Land Office; but, not enjoying the society of Washington, he exchanged offices with Josiah Meigs, surveyor-general of public lands. He took up his residence in Chillicothe, still attending to ministerial duties. He held the office of surveyor-general for nearly fifteen years, when he obtained leave to retire, July 1, 1829. He died Aug. 9 of the same year. Three of his *Sermons*, preached in 1817, were published in the *Ohio Conference Offering*, (1851). See Sprague, *Annals of the Amer. Pulpit*, vii, 205.

**Tig'lath-pile'ser** (Heb. *Tiglat'h Pile'ser*, תִּגְלַת פִּלְעֶסֶר, 2 Kings xv, 29; xvi, 10; or briefly *Tiglat'h Pile'ser*, תִּגְלַת פִּלְעֶסֶר, ver. 7), or (less correctly) *Til'-gath-pilne'ser* (Heb. *Tilgath' Pilne'ser*, תִּלְגַּת פִּלְנֶסֶר, 1 Chron. v, 6; 2 Chron. xxviii, 20; or briefly *Tilgath' Pilne'ser*, תִּלְגַּת פִּלְנֶסֶר, 1 Chron. v, 26), an Assyrian king. The Sept. Græcizes the name *Θαλασφελλα-sar* (v. r. *Θαλασφελλα-sar*, *Ἀλασφελλα-sar*, *Ἀγλαδ Φαλα-sar*), Josephus, *Θεγλαφαλα-sar* (Ant. ix, 12, 3), and the Vulg. *Theglath-Phalasar*. The monumental name is, according to Rawlinson, *Tukulti-pal-zira*; according to Oppert, *Tuklat-pal-asar* (i. e. *-assar*); according to Hincks, *Tiklat-pal-tsiri*; according to others, *Tigulti-pal-tsira*. The signification of the name is somewhat doubtful. M. Oppert renders it, "Adoratio [sit] filio Zodiaci," and explains "the son of the Zodi-ac" as *Nin*, or Hercules (*Expédition Scientifique en Mésopotamie*, ii, 352). It would seem to signify "worship of the son of Assur," perhaps as a royal sobriquet. The Assyrian king of this name mentioned in Scripture is Tiglath-pileser II, an earlier king of the same name having ascended the Assyrian throne about B.C. 1130; of whose reign, or a portion of it, two cylinders are preserved in the British Museum (Rawlinson, *Ancient Monarchies*, ii, 62-79). We here condense all the information accessible, from whatever source, concerning the later monarch of this name.

1. *Biblical Statements*.—Tiglath-pileser is the second Assyrian king mentioned in Scripture as having come into contact with the Israelites, the first being Pul (q. v.). He attacked Samaria in the reign of Pekah (B.C. 756-736), on what ground we are not told, but probably because Pekah had withheld his tribute, and, having entered his territories, "took Ijon, and Abel-beth-maachah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, and all the land of Naphtali, and carried them captive to Assyria" (2 Kings xv, 29): thus "lightly afflicting the land of Zebulun and the land of Naphtali" (Isa. ix, 1)—the most northern, and so the most exposed, portion of the country. The date of this

invasion cannot at present be fixed; but it was apparently many years afterwards that Tiglath-pileser made a second expedition into these parts, which had more important results than his former one. It appears that after the date of his first expedition a close league was formed between Rezin, king of Syria, and Pekah, having for its special object the humiliation of Judæa, and intended to further generally the interests of the two allies. At first great successes were gained by Pekah and his confederate (2 Kings xv, 37; 2 Chron. xxviii, 6-8); but on their proceeding to attack Jerusalem itself, and to threaten Ahaz, who was then king, with deposition from his throne, which they were about to give to a pretender, "the son of Tabeal" (Isa. vii, 6), the Jewish monarch applied to Assyria for assistance, and Tiglath-pileser, consenting to aid him, again appeared at the head of an army in these regions. He first marched, naturally, against Damascus, which he took (2 Kings xvi, 9), razing it (according to his own statement) to the ground, and killing Rezin, the Damascus monarch. After this, probably, he proceeded to chastise Pekah, whose country he entered on the north-east, where it bordered upon "Syria of Damascus." Here he overran the whole district to the east of Jordan, no longer "lightly afflicting" Samaria, but injuring her far "more grievously, by the way of the sea, in Galilee of the Gentiles" (Isa. ix, 1), carrying into captivity "the Reubenites, the Gadites, and the half tribe of Manasseh" (1 Chron. v, 26), who had previously held this country, and placing them in Upper Mesopotamia from Harran to about Nisibis (*ibid.*). Thus the result of this expedition was the absorption of the kingdom of Damascus, and of an important portion of Samaria, into the Assyrian empire; and it further brought the kingdom of Judah into the condition of a mere tributary and vassal of the Assyrian monarch.

Before returning into his own land, Tiglath-pileser had an interview with Ahaz at Damascus (2 Kings xvi, 10). Here, doubtless, was settled the amount of tribute which Judæa was to pay annually; and it may be suspected that here, too, it was explained to Ahaz by his suzerain that a certain deference to the Assyrian gods was due on the part of all tributaries, who were usually required to set up in their capital "the laws of Asshur," or "altars to the great gods." The "altar" which Ahaz "saw at Damascus," and of which he sent the pattern to Urijah the priest (ver. 10, 11), has been conjectured to have been such a badge of subjection; but it seems to have been adopted only out of love for a prevalent fashion.

This is all that Scripture tells us of Tiglath-pileser. He appears to have succeeded Pul, and to have been succeeded by Shalmaneser; to have been contemporary with Rezin, Pekah, and Ahaz; and therefore to have ruled Assyria during the latter half of the 8th century before our æra. See ASSYRIA.

2. *Monumental Records.*—From his own inscriptions we learn that his reign lasted at least seventeen years; that, besides warring in Syria and Samaria, he attacked Babylonia, Media, Armenia, and the independent tribes in the upper regions of Mesopotamia, thus, like the other great Assyrian monarchs, warring along the whole frontier of the empire; and, finally, that he was (probably) not a legitimate prince, but a usurper and the founder of a dynasty. This last fact is gathered from the circumstance that, whereas the Assyrian kings generally glory in their ancestry, Tiglath-pileser omits all mention of his, not even recording his father's name upon his monuments. It accords remarkably with the statements of Berosus (in Euseb. *Chron. Can.* i, 4) and Herodotus (i, 95), that about this time, i. e. in the latter half of the 8th century B.C., there was a change of dynasty in Assyria, the old family, which had ruled for 520 (526) years, being superseded by another not long before the accession of Sennacherib. The authority of these two writers, combined with the monumental indications,

justifies us in concluding that the founder of the lower dynasty or empire, the first monarch of the new kingdom, was the Tiglath-pileser of Scripture, whose date must certainly be about this time, and whose monuments show him to have been a self-raised sovereign. The exact date of the change cannot be positively fixed; but it is probably marked by the æra of Nabonassar in Babylon, which synchronizes with B.C. 747. According to this view, Tiglath-pileser reigned certainly from B.C. 747 to 730, and possibly a few years longer, being succeeded by Shalmaneser at least as early as 725. In the *Assyrian Chronological Canon*, of which there are four copies in the British Museum, all more or less fragmentary, the reign of Tiglath-pileser seems to be reckoned at either sixteen or seventeen years (see *Athenæum*, No. 1812, p. 84). Rawlinson's latest computation places his accession in 744 (*ibid.* Aug. 23, 1863). See SHALMANESER.

The circumstances under which Tiglath-pileser obtained the crown have not come down to us from any good authority; but there is a tradition on the subject which seems to deserve mention. Alexander Polyhistor, the friend of Sylla, who had access to the writings of Berosus, related that the first Assyrian dynasty continued from Ninus, its founder, to a certain Belêds (Pul), and that he was succeeded by Belêtaras, a man of low rank, a mere vine-dresser (*φωρυργός*), who had the charge of the gardens attached to the royal palace. Belêtaras, he said, having acquired the sovereignty in an extraordinary way, fixed it in his own family, in which it continued to the time of the destruction of Nineveh (*Fr. Hist. Gr.* iii, 210). It can scarcely be doubted that Belêtaras here is intended to represent Tiglath-pileser, Belêtar being, in fact, another mode of expressing the native *Pal-tair* or *Palli-tair* (Oppert), which the Hebrews represented by Pileser. Whether there is any truth in the tradition may, perhaps, be doubted. It bears too near a resemblance to the Oriental stories of Cyrus, Gyges, Amasis, and others, to have in itself much claim to our acceptance. On the other hand, as above mentioned, it harmonizes with the remarkable fact—unparalleled in the rest of the Assyrian records—that Tiglath-pileser is absolutely silent on the subject of his ancestry, neither mentioning his father's name nor making any allusion whatever to his birth, descent, or parentage.

Tiglath-pileser's wars do not generally appear to have been of much importance. In Armenia he reduced the rebel princes, and afterwards conquered the city of Arpad after a year's resistance. In Babylonia he took Sippara (Sepharvaim) and several places of less note in the northern portion of the country; but he does not seem to have penetrated far, or to have come into contact with Nabonassar, who reigned from B.C. 747 to 733 at Babylon. In Media and Upper Mesopotamia he obtained certain successes, but made no permanent conquests. It was on his western frontier only that his victories advanced the limits of the empire. Among the conquered cities appear to be reckoned Megiddo (Magidu) and Dor (Duru), both connected with Manasseh (Manatsuah). Before he left Syria, Tiglath-pileser received submission, not only from Ahaz, but from the kings of the neighboring countries. He records his taking tribute from a king of Judah called Yahu-khazi—a name which might represent Jehoahaz; but, as shown by the chronology, it probably stands for Ahaz, whose name may have been changed by his Assyrian suzerain, as happened afterwards to Eliakim and Zedekiah (2 Kings xxiii, 34; xxiv, 17). The destruction of Damascus, the absorption of Syria, and the extension of Assyrian influence over Judæa are the chief events of Tiglath-pileser's reign, which seems to have had fewer external triumphs than those of most Assyrian monarchs. Probably his usurpation was not endured quite patiently, and domestic troubles or dangers acted as a check upon his expeditions against foreign countries.

No palace or great building can be ascribed to this king. His slabs, which are tolerably numerous, show that he must have built or adorned a residence at Calah (? Nimrûd), where they were found; but, as they were not discovered *in situ*, we cannot say anything of the edifice to which they originally belonged. They bear marks of wanton defacement; and it is plain that the later kings purposely injured them; for, not only is the writing often erased, but the slabs have been torn down, broken, and used as building materials by Esar-haddon in the great palace which he erected at Calah, the southern capital. The dynasty of Sargon was hostile to the first two princes of the Lower Kingdom, and the result of their hostility is that we have far less monumental knowledge of Shalmaneser and Tiglath-pileser than of various kings of the Upper Empire. See NINEVEH.

See Rawlinson, *Ancient Monarchies*, ii, 127-182; Smith, *Assyria from the Monuments*, p. 77 sq. (Am. ed.); *Journ. Sac. Lit.* April, 1854, p. 253. See ISRAEL, KINGDOM OF.

**Tigré Version.** Tigré is a language spoken throughout Eastern Abyssinia, from the eastern banks of the River Tacazze to the Shoho country, which separates Abyssinia from the Red Sea. Consequently, the Tigré is spoken throughout five degrees of latitude, beginning three days' journey from the Red Sea, and by a population amounting to about three millions. The characters of the Tigré alphabet are, like the Amharic, of Ethiopic origin, and the Tigré language itself is more closely related to the Ethiopic than the Amharic or any other dialect of Abyssinia. The first attempt to translate the New Test. into that language was made by an Englishman named Nathanael Pearce about the year 1819. He had acquired varied and extensive information by constant wanderings through various countries, and had resided for fourteen years in Abyssinia. He translated Mark and John; but as, owing to his restless habits, he had never acquired skill in forming the Ethiopic characters, he was obliged to write his translation in Roman characters. His MS. is in the possession of the British and Foreign Bible Society; it has never been published, and its comparative value is still unascertained. In 1831 part of Luke was translated by Mr. Kugler, a missionary of the Church Missionary Society; and after his death the work was continued by Mr. Isenberg, of the same society, who, at his death, in 1863, left a revised manuscript copy of the four gospels. This MS. having been put into the hands of the Rev. Dr. Krapf, the colleague of the deceased in Abyssinia, an application was made at once to the committee of the British and Foreign Bible Society to have this translation printed. Dr. Krapf, who is well versed in the African languages, accompanied his application with a commendation of the character of Mr. Isenberg's translation. The committee consented to meet the expense of an edition of the four gospels, and thus for the first time a portion of the word of God was published in this vernacular in 1865. Since that time nothing further has been done towards completing the New Test. See *Bible of Every Land*, p. 60. (B. P.)

**T'igris** (Τίγρις; Vulg. *Tygris*, *Tigris*) is used in the Sept. as the Greek equivalent of the Hebrew *Chiddêkel* (חִדְדֵּקֶל) among the rivers of Eden (Gen. ii, 14), and is there described (so some render) as "running eastward to Assyria." After this we hear no more of it, if we except one doubtful allusion in Nahum (ii, 6), until the Captivity, when it becomes well known to the prophet Daniel, who had to cross it in his journeys to and from Susa (Shushan). With Daniel it is "the Great River" — חֲזָקִיָּהּ הַגָּדוֹל — an expression commonly applied to the Euphrates; and by its side he sees some of his most important visions (Dan. x-xii). No other mention of the Tigris seems to occur except in the Apocryphal books, and there it is unconnected with any real

history, as in Tobit (vi, 1), Judith (i, 6), and Ecclesiasticus (xxiv, 26). The meaning and various forms of the word have been considered under HIDEKEL (q. v.). It only remains, therefore, in the present article, to describe more particularly the course, character, and historical relations of the stream.

1. The Tigris, like the Euphrates, rises from two principal sources. The most distant, and therefore the true, source is the western one, which is in lat. 38° 10', long. 39° 20' nearly, a little to the south of the high mountain lake called Göljik, or Göljenik, in the peninsula formed by the Euphrates, where it sweeps round between Palou and Telek. The Tigris's source is near the south-western angle of the lake, and cannot be more than two or three miles from the channel of the Euphrates. The course of the Tigris is somewhat north of east, but, after pursuing this direction for about twenty-five miles, it makes a sweep round to the south and descends by Arghani Maden upon Diarbekr. Here it is already a river of considerable size, and is crossed by a bridge of ten arches a little below that city (Niebuhr, *Voyage en Arabie*, p. 326). It then turns suddenly to the east and flows in this direction past Osman Kieui to Til, where it once more alters its course and takes that south-easterly direction which it pursues, with certain slight variations, to its final junction with the Euphrates. At Osman Kieui it receives the second, or Eastern, Tigris which descends from Niphates (the modern Ala-Tagh) with a course almost due south, and, collecting on its way the waters of a large number of streams, unites with the Tigris half-way between Diarbekr and Til, in long. 41° nearly. The courses of the two streams to the point of junction are respectively 150 and 100 miles. A little below the junction, and before any other tributary of importance is received, the Tigris is 150 yards wide and from three to four feet deep. Near Til a large stream flows into it from the north-east, bringing almost as much water as the main channel ordinarily holds (Layard, *Nineveh and Babylon*, p. 49). This branch rises near Billi, in northern Kurdistan, and runs at first to the north-east, but presently sweeps round to the north and proceeds through the districts of Shattak and Boktan with a general westerly course, crossing and recrossing the line of the 38th parallel, nearly to Sert, whence it flows south-west and south to Til. From Til the Tigris runs southward for 20 miles through a long, narrow, and deep gorge, at the end of which it emerges upon the comparatively low, but still hilly, country of Mesopotamia, near Jezireh. Through this it flows with a course which is south-southeast to Mosul, thence nearly south to Kileh-Sherghat, and again south-southeast to Samara, where the hills end and the river enters on the great alluvium. The course is now more irregular. Between Samara and Baghdad a considerable bend is made to the east; and, after the Shat el-Hie is thrown off in lat. 32° 30', a second bend is made to the north, the regular south-easterly course being only resumed a little above the 32d parallel, from which point the Tigris runs in a tolerably direct line to its junction with the Euphrates at Kurnah. The length of the whole stream, exclusive of meanders, is reckoned at 1146 miles. It can be descended on rafts during the flood season from Diarbekr, which is only 150 miles from its source; and it has been navigated by steamers of small draught nearly up to Mosul. From Diarbekr to Samara the navigation is much impeded by rapids, rocks, and shallows, as well as by artificial *bunds*, or dams, which in ancient times were thrown across the stream, probably for purposes of irrigation. Below Samara there are no obstructions; the river is deep, with a bottom of soft mud, the stream moderate, and the course very meandering. The average width of the Tigris in this part of its course is 200 yards, while its depth is very considerable.

Besides the three head-streams of the Tigris which have already been described, the river receives, along

its middle and lower course, no fewer than five important tributaries. These are, the river of Zakko, or Eastern Khabûr, the Great Zab (Zab Ala), the Lesser Zab (Zab Asfal), the Adhem, and the Diyaleh, or ancient Gyndes. All these rivers flow from the high range of Zagros, which shuts in the Mesopotamian valley on the east, and is able to sustain so large a number of great streams from its inexhaustible springs and abundant snows. From the west the Tigris obtains no tributary of the slightest importance, for the Tharthar, which is said to have once reached it, now ends in a salt lake a little below Tekrit. Its volume, however, is continually increasing as it descends in consequence of the great bulk of water brought into it from the east, particularly by the Great Zab and the Diyaleh; and in its lower course it is said to be a larger stream and to carry a greater body than the Euphrates (Chesney, *Euphrates Expedition*, i, 62).

2. The Tigris, like the Euphrates, has a flood season. Early in the month of March, in consequence of the melting of the snows on the southern flank of Niphates, the river rises rapidly. Its breadth gradually increases at Diarbekr from 100 or 120 to 250 yards. The stream is swift and turbid. The rise continues through March and April, reaching its full height generally in the first or second week of May. At this time the country about Baghdad is often extensively flooded, not, however, so much from the Tigris as from the overflow of the Euphrates, which is here poured into the eastern stream through a canal. Farther down the river, in the territory of the Beni-Lam Arabs, between the 32d and 31st parallels, there is a great annual inundation on both banks. About the middle of May the Tigris begins to fall, and by midsummer it has reached its natural level. In October and November there is another rise and fall in consequence of the autumnal rains; but, compared with the spring flood, that of autumn is insignificant.

The water of the Tigris, in its lower course, is yellowish, and is regarded as unwholesome. The stream abounds with fish of many kinds, which are often of a large size (see Tobit vi, 11, and comp. Strabo, xi, 14, 8). Abundant water-fowl float on the waters. The banks are fringed with palm-trees and pomegranates, or clothed with jungle and reeds, the haunt of the wild boar and the lion.

3. The Tigris, in its upper course, anciently ran through Armenia and Assyria. Lower down, from about the point where it enters on the alluvial plain, it separated Babylonia from Susiana. In the wars between the Romans and the Parthians we find it constituting for a short time (from A.D. 114 to 117) the boundary-line between these two empires. Otherwise it has scarcely been of any political importance. The great chain of Zagros is the main natural boundary between Western and Central Asia; and beyond this the next defensible line is the Euphrates. Historically it is found that either the central power pushes itself westward to that river; or the power ruling the west advances eastward to the mountain barrier.

The Tigris is at present better fitted for purposes of traffic than the Euphrates (Layard, *Nineveh and Babylon*, p. 475); but in ancient times it does not seem to have been much used as a line of trade. The Assyrians probably floated down it the timber which they were in the habit of cutting in Amanus and Lebanon to be used for building purposes in their capital; but the general line of communication between the Mediterranean and the Persian Gulf was by the Euphrates. According to the historians of Alexander (Arrian, *Exp. Alex.* vii, 7; comp. Strabo, xv, 8, 4), the Persians purposely obstructed the navigation of the Lower Tigris by a series of dams which they threw across from bank to bank between the embouchure and the city of Opis, and such trade as there was along its course proceeded by land (Strabo, *ibid.*). It is probable that the dams were in reality made for another purpose, namely, to raise

the level of the waters for the sake of irrigation; but they would undoubtedly have also the effect ascribed to them, unless in the spring flood-time, when they might have been shot by boats descending the river. Thus there may always have been a certain amount of traffic down the stream; but up it trade would scarcely have been practicable at any time farther than Samara or Tekrit, on account of the natural obstructions and of the great force of the stream. The lower part of the course was opened by Alexander (Arrian, vii, 7); and Opis, near the mouth of the Diyaleh, became thenceforth known as a mart (*μυρῶν*), from which the neighboring districts drew the merchandise of India and Arabia (Strabo, xvi, 1, 9). Seleucia, too, which grew up soon after Alexander, derived, no doubt, a portion of its prosperity from the facilities for trade offered by this great stream.

4. The most important notices of the Tigris to be found in the classical writers are the following: Strabo, xi, 14, 8, and xvi, 1, 9-13; Arrian, *Exp. Alex.* vii, 7; Pliny, *Hist. Nat.* vi, 27. See also Smith, *Dict. of Gr. and Rom. Geog.* s. v. Among modern writers may be mentioned Layard, *Nineveh and Babylon*, p. 49-51, 464-476; Loftus, *Chaldea and Susiana*, p. 8-8; Jones, in *Transactions of the Geog. Soc. of Bombay*, vol. ix; Lynch, in *Journ. of Geog. Soc.* vol. ix; Rawlinson, *Herodotus*, i, 552, 553. See EUPHRATES.

**Tikkûn Sopherim** (תיקון סופרים), or *Emendations of the Scribes*, refer to eighteen alterations which the scribes decreed should be introduced into the text, in order to remove anthropomorphisms and other indelicate expressions. These eighteen emendations, or "ח" כלין, are as follows, according to the order of the Hebrew Bible:

1. Gen. xviii, 22, where, for the original reading, ייחורו, "and Jehovah still stood before Abraham," is now substituted, by the decree of the scribes = *Tikkun Sopherim*, ייחורו לפני יהוה, "and Abraham still stood before Jehovah," because it appeared offensive to say that the Deity stood before Abraham.

2. Numb. xi, 15, where Moses addresses God, "Kill me, I pray thee . . . that I may not see thy evil" (ברצחך), i. e. the punishment wherewith thou visitest Israel, is altered to "that I may not see my evil" (ברצחתי), because it might seem as if evil were ascribed to the Deity.

3. 4. Numb. xii, 13, where the original reading, "Let her not be as one dead who proceeded from the womb of our mother (אמנו), and half of our flesh (בשרנו) be consumed," is changed to "Let her not be as one dead-born, which when it proceeds from the womb of its mother (אמו) has half of its flesh (בשרו) consumed."

5. 1 Sam. iii, 13, where the original, "for his sons cursed God" (אלהים)—the Sept. has it still *θεός*—is altered to "for his sons cursed themselves" (לכם), because it was too offensive to say that Eli's sons cursed God without being reprimanded by their father.

6. 2 Sam. xvi, 13, where "will God see with his eye" (בעיניו) is made to read "will God look at my affliction" (בעיני). The Seventy probably read *בעיניו*, for they translate *οὐ θεὸς ταπεινῶσθαι μου*.

7. 1 Kings xii, 16, where "to his God (אלהיו), O Israel . . . and Israel went to their God" (לאלהיו) is given "to your tents (למחלליהם) . . . to their tents" (למחלליהם), because the separation of Israel from the house of David was regarded as a necessary transition to idolatry; it was looked upon as leaving God and the sanctuary for the worship of idolatry in tents.

8. 2 Chron. x, 16 concerns the parallel passage, which is similarly altered for the same reason.

9. Jer. ii, 11, where "my glory" (כבודי) reads "their glory" (לכבודי), because it was too offensive to say that God's glory was changed for an idol.

10. Ezek. viii, 17, where "my nose" (אפי) is changed into "their nose" (אפיהם).

11. Hos. iv, 7, where the same change is made as in 9.  
 12. Hab. i, 12, where "thou diest not" (לֹא חָמוּרָה) is converted into "we shall not die" (לֹא נָמוּרָה).

13. Zech. ii, 12, where "mine eye" (עֵינִי) is varied by "his eye" (עֵינָיו), to avoid too gross an anthropomorphism.

14. Mal. i, 13, where "you make me" (אַתָּה עוֹשֶׂה לִּי) is changed to "you make it" (אַתָּה עוֹשֶׂה לוֹ); reason as in 13.

15. Psa. cvi, 20, where the same alteration is made as in 9 and 11.

16. Job vii, 20, where "a burden to thee" (עֲלִידָךְ) is changed to "to myself" (עָלַי). That עֲלִידָךְ was the original reading we see also from the Sept. *ἐπι δὲ ἐνὶ σοὶ φορτίον*.

17. Job xxxii, 8, where "they condemned God" (אָרְרוּ אֱלֹהִים) is altered to they "condemned Job" (אָרְרוּ אִיּוֹב).

18. Lam. iii, 19, where "and thy soul will mourn over me" (וְרוּחִי עָלַי נִשְׁשָׁה) reads "and my soul is humbled within me" (וְרוּחִי עָלַי נִשְׁשָׁה), because of the remark that God will mourn.

These eighteen decrees of the *Sopherim* are enumerated in the *Massora Magna* on Numb. i, 1, and on Psa. cvi, 20; they are also given in the book *Ochlah ve-Ochlah*, p. 37, 113 (ed. Frensdorff, Hanover, 1864). The whole question on these *Tikkun Sopherim* is discussed by Pinsker in *Kherem Chemed*, ix, 53 sq. (Berlin, 1856); Geiger, *Urschrift und Uebersetzungen der Bibel*, p. 308 sq. (Breslau, 1857); Wedell, *De Emendationibus a Sopherim in Libris Sacris Veteris Testamenti Propositis* (Vratislaviae, 1869). See OCLAH. (B. P.)

**Tik'vah** (Heb. *Tikkah*'), תִּקְוָה, a cord [as in Josh. ii, 18, 21], or hope [as often], the name of two Israelites.

1. (Sept. *Θεκκούε* v. r. *Θεκούαν*; Vulg. *Thecua*.) The son of Harhas and father of Shallum, which last was the husband of the prophetess Huldah (2 Kings xxii, 14). B.C. ante 632. He is elsewhere (2 Chron. xxxiv, 22) called TIKVATH (q. v.).

2. (Sept. *Θεκκούε* v. r. *Θεκώε*; Vulg. *Thecua*.) The father of Jahaziah, which latter was one of the "rulers" appointed to carry out the divorce of the Gentile wives after the Captivity (Ezra x, 15). B.C. 458.

**Tik'vath** (Heb. text *Toka'hath*, תִּקְוָתָה, marg. *Tokkath*, תִּקְוָתָה, *assemblage* [Gesén.], or *firmness* [Fürst]; Sept. *Θεκκούας* v. r. *Θεκώε* and *Καθούας*; Vulg. *Thecuath*), the father of Shallum (2 Chron. xxxiv, 22); elsewhere (2 Kings xxii, 14) called TIKVAH (q. v.).

**TIL.** See VAN TIL.

**Tile** (לֵבְנִית, *lebenâh*, so called from the *whitish* clay), a brick (Ezek. iv, 1), as elsewhere rendered. See BRICK; TILING. The above passage illustrates the use of baked clay for the delineation of figures and written characters among the ancient nations, especially the Egyptians, Assyrians, and Babylonians. Not only were ordinary building bricks stamped with the name of the founder of the edifice, as well as with other devices, but clay (or

stone) "cylinders," as they are now called, covered with the most minute writing, were deposited in the corners of Assyrian and Babylonian buildings, giving the history of the kings who erected the palaces. See NINEVEH. But the most striking illustration of the prophet's delineatures is afforded by the recent discovery of whole libraries of Assyrian literature in the form of small inscribed tablets of clay, which contain writing and pictorial representations of the most interesting character. When the clay was in a soft, moist

Assyrian Clay Tablet.

state, in its mould or frame, the characters were put upon it, perhaps in some instances by a stamp, but usually by means of a sharp-edged bronze style about a foot long, each character being traced separately by hand, as we use a pen. After the completion of the writing or pictures, the clay was baked, and such was the perfection of the manufacture that many of these articles have been preserved from decay for three thousand years. They vary in color, owing, as some suppose, to the varying length of time they were in the kiln, while others think that some coloring matter must have been mixed with the clay. They are bright brown, pale yellow, pink, red, and a very dark tint nearly black. Usually the cylinders found are of a pale yellow, and the tablets a light red or pink. Some of them are unglazed, and others are coated with a hard white enamel. It is from these long-lost records that such details are in process of decipherment as are given in Smith's *Chaldean Account of Genesis*, and other works of recent Assyriology.

**TILE**, IN ARCHITECTURE, is a thin plate of baked clay used to cover roofs. In England there are but two kinds of tiles in ordinary use, plain tiles and pan-tiles. The former of these, which are by far the commonest, are perfectly flat; the latter are curved, so that when laid upon a roof each tile overlaps the edge of the next to it and protects the joint from the wet.

Pan-tiles.

The Romans used flat tiles turned up at the edges, with a row of inverted, semi-cylindrical ones over the joint to keep out the wet. In the Middle Ages tiles were extensively employed in England for covering buildings, though they seem always to have been considered an inferior material to lead. It does not appear that any but flat, plain tiles, with such others as were requisite for the ridges, hips, and valleys, were used. The ridge-tiles, or crest, formerly also called *roof-tiles*, were sometimes made ornamental. It is not unusual to find the backs of fireplaces formed of tiles, and in such situations they are sometimes laid in herring-bone courses, as in the great hall, Kenilworth; most of the fireplaces in Bodiam Castle, Sussex, are constructed

Ancient Bricks. (From the British Museum.)

1. Egyptian brick of sun-dried clay and straw, stamped with the papyrus of Thothmes III, eighteenth dynasty. 2. Babylonian inscribed brick, unbaked.

Roman Tiles, Wheatley, Oxfordshire.

in this manner, and the oven by the side of the larger fireplace in the hall is also built of tiles.

Glazed decorative tiles were anciently much used for paving sacred edifices. They are sometimes called Norman tiles, possibly from the supposition that they were originally made in Normandy; and, considering the age and variety of specimens that exist in Northern France, this idea may not be wholly erroneous. It is doubtful, however, whether any tiles have been discovered in England that present the features of the Norman style of architectural decoration, the most ancient being apparently of the 13th century. The name of *encaustic* has also been given to these tiles, and it would not be inappropriate were it not applied already to denote an antique process of art of a perfectly different nature; whereas a method wholly distinct, and peculiar to the glazed tiles of the Middle Ages, was commonly adopted in Northern Europe. The process of manufacture which, as it is supposed, was most commonly employed may be thus described: The thin squares of well-compacted clay having been fashioned, and probably dried in the sun to the requisite degree, their ordinary dimension being from four to six inches, with a thickness of one inch, a stamp which bore a design in relief was impressed upon them, so as to leave the ornamental pattern in *cavetto*. Into the hollows thus left on the face of the tile clay of another color, most commonly white, or pipe-clay, was then inlaid or impressed. Nothing remained except to give a richer effect, and, at the same time, insure the permanence of the work by covering the whole in the furnace

Westleigh, Devon.

with a thin surface of metallic glaze, which, being of a slightly yellow color, tinged the white clay beneath it, and imparted to the red a more full and rich tone of color. In the success of this simple operation much depended upon this, that the quality of the two kinds of clay that were used should be as nearly similar as possible, or else, if the white was liable to shrink in the furnace more than the red, the whole work would be full of cracks; in the other case, the design would bulge and be thrown upward—imperfections, of which examples are not wanting. To facilitate the equal drying of the tile, deep scorings or hollows were sometimes made on the reverse, and by this means, when laid in cement, the pavement was more firmly held together. Occasionally, either from the deficiency of white clay of good quality, or perhaps for the sake of variety, glazed tiles occur which have the design left hollow, and not filled in, according to the usual process, with clay of a different color. A careful examination, however, of the disposition of the ornament will frequently show that the original intention was to fill these cavities, as in other specimens; but instances also present themselves where the ornamental design evidently was intended to remain in relief, the field, and not the pattern, being found in *cavetto*. It must be observed that instances are very frequent where, the protecting glaze having

been worn away, the white clay, which is of a less compact quality than the red, has fallen out and left the design hollow, so that an impression or rubbing may readily be taken. It appears probable that the origin of the fabrication of decorative pavements by the process which has been described is to be sought in the mediæval imitations of the Roman mosaic-work by means of colored substances inlaid upon stone or marble. Of this kind of mar-

quetry in stone, few examples have escaped the injuries of time; specimens may be seen on the eastern side of the altar-screen in Canterbury Cathedral, and at the abbey church of St. Denis and the cathedral of St. Omer.

Canterbury Cathedral.

Among the earliest specimens of glazed tiles may be mentioned the pavement discovered in the ruined priory church at Castle Acre, Norfolk, a portion of which is in the British Museum. These tiles are ornamented with scutcheons of arms, and on some appears the name "Thomas:" they are coarsely executed, the cavities are left, and not filled in with any clay of different color.

A profusion of good examples still exists of single tiles, and sets of four, nine, sixteen, or a greater number of tiles, forming by their combination a complete design, and presenting, for the most part the characteristic style of ornament which was in vogue at each successive period, but examples of general arrangement are very rare and imperfect. To this deficiency of authorities it seems to be due that modern imitations of these ancient pavements have generally proved unsatisfactory in the resemblance which they present to

Pavement from St. Paul's in Worms.

Tiles from the Choir of Thame Church, Oxfordshire.

oil-cloth or carpeting; and the intention of producing richness of effect by carrying the ornamental design throughout the pavement without any intervening spaces has been wholly frustrated. Sufficient care has not been given to ascertain the ancient system of arrangement: it is, however, certain that a large proportion of plain tiles, black, white, or red, were introduced, and served to divide the various portions which composed the general design. Plain diagonal bands, for instance, arranged fretwise intervened between the compartments, or panels, of tiles ornamented with designs; the plain and the decorated quarries were laid alternately, or in some instances longitudinal bands were introduced in order to break that continuity of ornament which, being uniformly spread over a large surface, as in some modern pavements, produces a confused rather than a rich effect. It has been supposed, with much probability, that the more elaborate pavements were reserved for the decoration of the choir, the chancel, or immediate vicinity of an altar, while in the

Woodperry, Oxfordshire.

aisles or other parts of the church more simple pavements of plain tiles, black, white, or red, were usually employed. It may also deserve notice that in almost every instance when the ornamented tiles have been accidentally discovered or dug up on the site of a castle or mansion there has been reason to suppose a consecrated fabric had there existed, or that the tiles had

belonged to that portion of the structure which had been devoted to religious services. We often meet with the item "Flanders tiles" in building-accounts of castles, but these were for the fireplace only. The lower rooms were usually "earthed," the upper rooms boarded.—Parker, *Gloss. of Architect.* s. v.

Most of the tiles in England were made in the county of Worcester. Examples may be found in almost every parish church. Occasionally the patterns were alternately raised and sunk, so that the surface of the tiles was irregular. Examples of this sort were found at St. Alban's Abbey, and have been recently reproduced, and laid before the high-altar. From the 13th century to the 16th encaustic tiles were commonly used for the floors of churches and religious houses. Tiles have been used for wall-decoration, and for the

adornment of tombs on the Continent; and this custom has likewise been restored in England. Since the manufacture of tiles has been carried out so efficiently in Worcestershire, their use has been common for all restored churches in that county. Modern specimens in some cases are remarkably fine, though sometimes wanting in that grace and character which were so remarkable in the old examples.—Lee, *Gloss. of Liturg. Terms*, s. v.; Walcott, *Sac. Archaeol.* s. v.

**Tilenus**, DANIEL, a learned French divine, was born at Goldberg, in Silesia, Feb. 4, 1563, and, going to France about 1590, was naturalized by Henry IV. First distinguishing himself as an opponent of the tenets of Arminianism, he afterwards enlisted on the side of the Remonstrants. His principal controversy was with Peter Du Moulin, which was carried on with so much zeal that their friends, among whom was James I of England, interposed to reconcile them. Tilenus had, before this, been appointed by Maréchal de Bouillon professor at the College of Sedan, but, about 1619 or 1620, was obliged to resign on account of his sentiments. He removed to Paris, where he lived on his property. He afterwards had a personal controversy with John Cameron, divinity professor at Saumur, concerning grace and free-will, which lasted five days. An account of this was published under the title of *Collatio inter Tilenum et Cameronem*, etc. Some time after, Tilenus addressed a letter to the Scotch nation, disapproving of the Presbyterian and commending the Episcopal form of the Reformed Church as established in England. This greatly pleased king James, who invited Tilenus to England, and offered him a pension. Tilenus accepted the offer, and returned to France in order to settle his affairs, but, becoming obnoxious to the people of Great Britain, he never returned. He died in Paris, Aug. 1, 1633. His latter days were spent in defending the Reformed Church of France, and he wrote several books, the titles of which are given in Brandt's *Hist. of the Reformation* and Quick's *Synodicon*. See Chalmers, *Biog. Dict.* s. v.; Hoefler, *Nour. Biog. Générale*, s. v.

**Til'gath-pilne'ser** (1 Chron. v, 6, 26; 2 Chron. xxviii, 20). See TIGLATH-PILESER.

**Tiling** (κίραρος, pottery-ware, hence a roof tile; comp. Xenoph. *Mem.* iii, 1, 7). The rendering of the A. V. at Luke v, 19, "through the tiling" (διὰ τῶν κεραμῶν), occasions difficulty when we remember that houses in Palestine are not covered with tiles, as they frequently are in Asia Minor and in Western countries. Hence many have suggested that Luke, being a native probably of Antioch, used the word "tile" in the general sense of roof-material (Eusebius, *Hist. Eccles.* iii, 4; Jerome, *Prolog. to Com. on St. Matthew*, vii, 4; Conybeare and Howson, *St. Paul*, i, 367). As to the particular part or substance thus "broken up," most interpreters have thought that it was the layer of sticks, brush, and hard-rolled clay which constitutes the ordinary flat roof of an Oriental house (Arundell, *Trav. in Asia Minor*, i, 171; Russell, *Aleppo*, i, 35), which Dr. Thomson says he has often seen thus removed for letting down grain, straw, or other articles (*Land and Book*, ii, 7). But this operation would have raised an intolerable dust, such as to drive the audience entirely away. Some suppose, therefore, that it was merely the scuttle through which the paralytic was lowered (Lightfoot, *Hora Hebraica*, ad loc.), an explanation that scarcely meets the terms of the narrative. It probably was the awning (Shaw, *Travels*, p. 211) or rather board or leafy screen over the gallery or interior veranda (Kitto, *Daily Bible Illustr.* ad loc.), which was easily removed and as easily replaced. See HOUSE.

**Tillage** (prop. עֲבֹדָה, *abodâh*, 1 Chron. xxvii, 26; Neh. x, 37, *work*, i. e. "service" or "bondage," as elsewhere rendered; so occasionally עָבַד, to "till," "till-eth," "tiller," etc., lit. *worker*; but נָיַר, *nîr*, Prov. xiii, 23, means *fallow ground*, as elsewhere rendered). See AGRICULTURE.

**Tillemont, Louis Sébastien LE NAIN DE**, a French divine and scholar, was born in Paris, Nov. 30, 1657, and at the age of ten years entered the famous seminary of Port-Royal. He soon manifested great proficiency in the study of history, and at the age of eighteen began to read the fathers, the lives of the apostles, and their successors in the primitive Church, and drew up for himself an account of early ecclesiastical history, in the manner of Usher's *Annals*. When twenty-three, he entered the Episcopal seminary at Beauvais, where he remained three or four years, and then went to reside with Godefroi Hermant, a canon of the Cathedral of Beauvais, with whom he remained five or six years. He then returned to Paris, and, after receiving the other orders of the Church, was ordained priest in 1676, and settled at Tillemont, whence he took his name. About this time he was employed, along with M. de Sacy, on a *Life of St. Louis*, and two years after travelled in Flanders and Holland. Returning, he continued his studies, and in 1690 began to publish his *History of the Emperors*. To a complete knowledge of ecclesiastical history he joined an exemplary humility and regularity of conduct; and, regardless of dignities, wished for nothing but retirement. The practicing of watchings and austerities brought upon him a disease, of which he died Jan. 10, 1698. He published, *Lives of the Emperors* (1690-1701, 5 vols. 4to):—*Mémoires pour servir à l'Histoire Ecclésiastique des six premiers Siècles*, etc. (1693, 16 vols. 4to):—and supplied materials for several works published by others: *Life of St. Louis*, begun by De Sacy and finished and published by La Chaise; *Lives of St. Athanasius and St. Basil*, by G. Hermant; *Lives of Tertullian and Origen*, by Forse, under the name of La Mothe. He left in MS. a *Memoir concerning William de Saint-Amour, and the Disputes between the Dominicans and the University*:—*Life of Isabella*, sister of St. Louis:—*Remarks on the Breviaries of Mans and Paris*:—*A Legend for the Breviary of Evreux*:—and *History of the Sicilian Kings of Anjou*.

**Tillemont, Pierre LE NAIN DE**, brother of the preceding, was born in Paris, March 25, 1640. Having chosen the ecclesiastical profession, he entered at St. Victor, Paris; but retired to La Trappe in 1668, being enamoured with the austerities of that order. He was for a long time subprior, and died there in 1713. His works are, *Essai de l'Histoire de l'Ordre de Cîteaux* (9 vols. 12mo):—*Homilies sur Jérémie* (2 vols. 8vo), a French translation of St. Dorotheus:—*Relation de la Vie et de la Mort de Plusieurs Religieux de la Trappe* (6 vols. 12mo), etc.

**Tillet, JEAN DU**, a French prelate, was born in Paris about the beginning of the 16th century; and by the influence of his brother, the earl of Brussiaire (himself a learned historiographer), he became protonotary of the cardinal of Lorraine, who rewarded him with the bishopric of Saint-Brieuc in 1553. The following year he exchanged this see for that of Meaux. He died at Paris, Nov. 19, 1570. He was the author of many works on French Church history, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

**Tillinghast, NICHOLAS POWER**, an Episcopal clergyman, was born in Providence, R. I., March 3, 1817. He was fitted for college chiefly by Mr. (afterwards Prof.) G. W. Keely, of Waterville College, and was graduated from Brown University in the class of 1837. On leaving college, he went to Society Hill, S. C., where he spent two years in superintending the education of a nephew (1837-39). The next three years (1839-42), he pursued his theological studies at the Theological Seminary at Alexandria, Va., and was ordained deacon and presbyter in the same year (1842) by bishop Meade, and became assistant minister of the Monumental Church, in Richmond, Va. He remained here but a short time, being called to the rectorship of the Episcopal Church at Society Hill, where he continued his most acceptable services for two years. Failing health led him to resign, and he went abroad, spending eighteen months in Europe. After his return, he did not settle for two or three years, but supplied pulpits in Washington, Marblehead (Mass.), and in Philadelphia, and in 1848 became rector of St. John's Church, in Georgetown, D. C., where he had a happy and useful ministry for nearly twenty years (1848-67). A severe injury which he sustained in Groton, Conn., which made necessary the amputation of a limb, so affected his health that he was unable again to settle as a minister, although he officiated as a temporary supply as occasion offered. In the seclusion of his study he spent much time engaged in congenial studies. He made a translation of a large part of Cicero's *De Officiis*, and also translated from the German some things in which he was interested. He died near Philadelphia, Aug. 7, 1869. (J. C. S.)

**Tillotson, JOHN**, archbishop of Canterbury, was born at Sowerby, Yorkshire, in October, 1630. He entered Clare Hall, Cambridge, April 23, 1647, and, graduating in 1650, was made a fellow in 1651. He left college in 1656, and became tutor to the son of Edmund Prideaux, Cromwell's attorney-general. Receiving his first impression among the Puritans, he was led to conformity by the works of Chillingworth and the influence of scholars with whom he had become intimate. He submitted to the Act of Uniformity in 1662, and became curate of Cheshunt, in Hertfordshire. He was chosen (Dec. 16) minister of St. Mary's, Aldermanbury; but, declining this, was presented, in June, 1663, to the rectory of Kiddington, Suffolk. His residence there was short, he being made preacher of the Society of Lincoln's Inn on the 26th of the same month. In 1664 he was appointed Tuesday lecturer at St. Lawrence's, in the Jewry, and was now recognised as a distinguished preacher. He received his degree of D.D. in 1666, and in 1668 preached the sermon at the consecration of Wilkins to the bishopric of Chester. In 1670 he was made a prebendary of Canterbury, in 1672 was advanced to a deanery of that Church, and in 1673 was preferred to a prebend in the Church of St. Paul. When a declaration of liberty of

conscience was published in 1672, with a view to indulge the papists, Tillotson and the clergy were directed by their bishops to preach against popery; and when archbishop Sheldon advised with the clergy as to what reply he should make to the king if his majesty should disapprove their course, Dr. Tillotson suggested this answer: "Since his majesty professed the Protestant religion, it would be a thing without precedent that he should forbid his clergy preaching in defence of it." On April 2, 1680, he preached before the king, at Whitehall, a sermon on Josh. xxiv, 15, in which he expressed a sentiment of intolerance that exposed him to heavy censure. He was afterwards admitted into a high degree of confidence with king William and queen Mary; was appointed clerk of the closet to the king, March 27, 1689; and was authorized, in August, by the chapter of his cathedral, to exercise archiepiscopal jurisdiction over the province of Canterbury, Sancroft having been suspended for refusing the new oath. His ambition had never extended further than to desire the exchange of his deanery of Canterbury for that of St. Paul's, which was granted him in September. The king, however, nominated him to the archbishopric of Canterbury, April 23, 1691, and he was consecrated (May 31) in Bow Church. The rest of his life was spent in laboring for the good of the Church and the reformation of all abuses among the clergy. He died Nov. 24, 1694. He published, *The Rule of Faith* (1666, 8vo), and several volumes of *Sermons*. A collective edition of his works, 254 *Sermons, Rule of Faith*, and *Prayers*, composed for his use, etc., was published in 1707 (3 vols. fol.). There have been later editions both of his complete works and of selections therefrom. His *Works*, with *Life* by Thomas Birch, D.D., were published by Ravenet (1752, 3 vols. fol.). See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tílon** (Heb. marg. *Tílon*, תִּילֹן; text, *Tulon*, תִּילֹן, *qíṭ* [Simonia] or *scorn* [Gesenius]; Sept. *Θιάνων* v. r. *Ἰών*; Vulg. *Thilon*), the last named of the four "sons" of Shimon, a descendant of Judah (1 Chron. iv, 20). B.C. perhaps cir. 1618.

**Tilton, Albert Freeman**, a Baptist minister, was born in Deerfield, N. H., Oct. 15, 1809. He was a graduate of Waterville College in the class of 1835. He taught the next two years, first, in Townshend, Vt., where he was the principal of an academy in that place, and then in Boone County, Ky. For four years (1837-41) he was the principal of a Baptist institution in Franklin, Ind., which became Franklin College in 1844. In 1841 he was ordained as an evangelist at Franklin, and preached in two or three places in Indiana. He was pastor of the Baptist Church in West Waterville for two years (1844-46), and for the next three years he supplied two or three churches. In 1849 he returned to Franklin, Ind., where he died Sept. 26, 1850. (J. C. S.)

**Tilton, David**, a Congregational minister, was born at Gilmanton, N. H., July 6, 1806. He studied theology one year in private, and one year at the Andover Theological Seminary, and was ordained, Oct. 14, 1855, over the Congregational Church in Edgartown (Martha's Vineyard), Mass., where he remained three years. He was installed, Aug. 12, 1840, pastor of the Congregational Church in Lanesville, Gloucester, Mass., but in the spring of 1850 he removed to North Chelsea, Mass., and was employed as a canvassing agent for the *Congregationalist*, and for various publishing houses. In 1862 he removed to Woburn, Mass., where he died, Feb. 10, 1869. See *Obituary Record, Yale College*, 1869.

**Tilton, Nathan**, a Unitarian minister, was a graduate of Harvard College in 1796. He was ordained as pastor of the Church in Scarborough, Me., December, 1800, and died in 1851. See Sprague, *Annals of the American Pulpit*, viii, 209.

**Timæ'us** (Τιμαῖος), father of the blind beggar

cured by Christ (Mark x, 46), the son being thence called Bartimæus (q. v.). B.C. ante 29.

**Timberlake**, JOHN W., a minister in the Methodist Episcopal Church, South, was transferred from the Tennessee to the Florida Conference in 1857, and was sent to Jacksonville; in 1858-59 to Tampa; in 1860 to Fernandina. In 1861 he was appointed Sunday-school agent; but, on the breaking out of the war, he was appointed chaplain to the Second Florida Regiment, in which capacity he labored till his death, at West Point, Va., March 3, 1862. See *Minutes of Annual Conferences of the M. E. Church, South*, 1862, p. 410.

**Timbrel** (תִּמְרֵל, *tóph*, Exod. xv, 20; Judg. xi, 34; 2 Sam. vi, 5; 1 Chron. xiii, 8; Job xxi, 12; Psa. lxxxi, 2; cxlix, 3; cl, 4; elsewhere rendered "tabret;" also the cognate verb תִּמְרֵל, *tapháph*, Psa. lxxviii, 25; rendered "tabor," Neh. ii, 7; *τίμπανον*, Jud. iii, 7). The Heb. word is an imitative one occurring in many languages not immediately connected with each other. It is the same as the Arabic and Persian *duf*, which in the Spanish becomes *adufe*, a tambourine. The root, which signifies to beat or strike, is found in the Greek *τίμπανον* or *τίμπανον*, Lat. *tympanum*, Ital. *tamburo*, Span. *tambor*, Fr. *tambour*, Prov. *tabor*, Engl. *tabor*, *tabouret*, *timbrel*, *tambourine*, A. S. *dubban*, to strike, Engl. *tap*, and many others. It is usual for etymologists to quote likewise the Arab. *tunbūr* as the original of *tambour* and *tabor*; but, unfortunately, the *tunbūr* is a guitar, and not a drum (Russell, *Aleppo* [2d ed.], i, 152). The parallel Arabic word is *tabl*, which denotes a kind of drum, and is the same with the Rabb. Heb. *tablá* and Span. *atabal*, a kettle-drum. The instrument and the word may have come to us through the Saracens. In old English *tabor* was used for any drum. Thus Rob. of Gloucester (ed. Hearne, 1810), p. 396:

"Vor of trompes and of *tabors* the Saracens made there  
So gret noyse that Cristenmen al distourbed were."

In Shakespeare's time it seems to have become an instrument of peace, and is thus contrasted with the drum: "I have known when there was no music with him but the drum and fife; and now had he rather hear the *tabor* and the pipe" (*Much Ado about Nothing*, act ii, sc. 3). *Tabouret* and *tambourine* are diminutives of *tabor*, and denote the instrument now known as the *tambourine*:

"Or Minnie's whistling to his *tabouret*,  
Selling a laughter for a cold meal's meat"  
(Hall, *Sat.* iv, 1, 78).

*Tabret* is a contraction of *tabouret*. The word is retained in the A. V. from Coverdale's translation in all passages except Isa. xxx, 32, where it is omitted in Coverdale, and Ezek. xxviii, 13, where it is rendered "beauty."

The Heb. *tóph* is undoubtedly the instrument described by travellers as the *duf* or *dif* of the Arabs. It was used in very early times by the Syrians of Padan-aram at their merry-makings (Gen. xxxi, 27). It was played principally by women (Exod. xv, 20; Judg. xi, 34; 1 Sam. xviii, 6; Psa. lxxviii, 25 [26]) as an accompaniment to the song and dance (comp. Jud. iii, 7), and appears to have been worn by them as an ornament (Jer. xxxi, 4). The *tóph* was one of the instruments played by the young prophets whom Saul met on his return from Samuel (1 Sam. x, 5), and by the Levites in the Temple-band (2 Sam. vi, 5; 1 Chron. xiii, 8). It accompanied the merriment of feasts (Isa. v, 12; xxiv, 8), and the joy of triumphal processions (Judg. xi, 34; 1 Sam. xviii, 6), when the women came out to meet the warriors returning from victory, and is everywhere a sign of happiness and peace (Job xxi, 12; Isa. xxx, 32; Jer. xxxi, 4). So in the grand triumphal entry of God into his Temple, described in strong figures in Psa. lxxviii, the procession is made up by the singers who marched in front, and the players on stringed instruments who brought up the rear, while on either side danced the young maidens with their timbrels (ver. 25 [26]).

The passage of Ezekiel, xxviii, 13, is obscure, and appears to have been early corrupted. Instead of תִּמְבֵּל, "thy tabreta," the Vulg. and Targ. read תִּמְבֵּל, "thy beauty," which is the rendering adopted in Coverdale's and Cranmer's Bible. The Sept. seems to have read תִּמְבֵּל, as in ver. 16. If the ordinary text be adopted, there is no reason for taking *tôph*, as Jerome suggests, in the sense of the setting of a gem, "pala qua gemma continetur." See TABRET.

The *tympanum* was used in the feasts of Cybele (Herod. iv, 76), and is said to have been the invention of Dionysus and Rhea (Enrip. *Bacch.* 59). It was played by women, who beat it with

Ancient Oriental Tympanum, or Tambourine.

the palms of their hands (Ovid, *Met.* iv, 29), and Juvenal (*Sat.* iii, 64) attributes to it a Syrian origin:

"Jam pridem Syrus in Tiberim defluxit Orontes  
Et linguam, et mores et cum tibicinis chordas  
Obliquas, necnon gentilitia tympana secum  
Vexit."

In the same way the *tabor* is said to have been introduced into Europe by the Crusaders, who adopted it from the Saracens, to whom it was peculiar (see Du Cange's note on De Joinville's *Hist. du Roi Saint Louis*, p. 61).

The author of *Shille Haggibborim* (c. 2) gives the Greek κύμβαλον as the equivalent of *tôph*, and says it was a hollow basin of metal, beaten with a stick of brass or iron.

The *dif* of the Arabs is described by Russell (*Aleppo* [1st ed.], p. 94) as "a hoop (sometimes with pieces of brass fixed in it to make a jingling) over which a piece of parchment is distended. It is beaten with the fingers, and is the true tympanum of the ancients, as appears from its figure in several reliefs, representing the orgies of Bacchus and rites of Cybele." The same instrument was used by the Egyptian dancing-women whom Hasselquist saw (*Travels* [ed. 1766], p. 59). In Barbary it is called *tar*, and "is made like a sieve, consisting (as Isidore [*Orig.* iii, 31] describes the tympanum) of a rim or thin hoop of wood with a skin of parchment stretched over the top of it. This serves for the *bass* in all their concerts, which they accordingly touch very artfully with their fingers, or with the knuckles or palms of their hands, as the time and measure require, or as force and softness are to be communicated to the several parts of the performance" (Shaw, *Travels*, p. 202). See MUSICAL INSTRUMENTS.

The Tar, or Modern Egyptian Tambourine.

**Time** (the proper and usual rendering of זֶמַן, *zēman*), a general word, Gr. χρόνος, *space* of duration; while מוֹעֵד, *mo'ed*, *καρπός*, signifies a *fixed* time, either by human or divine appointment, or the natural seasons). A peculiar use of the term occurs in the phrase "a time, times, and a half" (Heb. מוֹעֵד מוֹעֵדִים וְחֵצִי, Dan. xii, 7; Chald. עֶדְנָן וְעֶדְנָנִין וְחֵצֵלָה, vii, 25; Gr. *καρπός και καρποι και ἡμισυς*, Rev. xii, 14), in the conventional sense of *three years and a half* (see Josephus, *War*, i, 1, 1). The following are the regular divisions of time among the Hebrews, each of which invariably preserves its strict literal sense, except where explicitly modified by the immediate context. We here treat them severally but together, in the order of their extension, and refer to the several articles for more detailed information. See CHRONOLOGY.

1. **Year** (שָׁנָה), so called from the *change* of the seasons). The years of the Israelites, like those of the modern Jews, were *lunar* (Rabbinical חֲשֵׁבֵנִי חֲשֵׁבֵנִי, of 354 d. 8 h. 48 min. 38 sec., consisting of twelve (unequal) lunar months; and as this falls short of the true year (an astronomical month having 29 d. 12 h. 44 min. 2.84 sec.), they were obliged, in order to preserve the regularity of harvest and vintage (Exod. xxiii, 16), to add a month occasionally, so as to make it on the average coincide with the solar year (Rabbinical חֲשֵׁבֵנִי חֲשֵׁבֵנִי, which has 365 d. 5 h. 48 min. 45 sec. The method of doing this among the very ancient Hebrews is entirely unknown (see a conjecture in Ideler, *Chronol.* i, 490; another in Credner, *Joel*, p. 218). The Talmudists find mention of an intercalation under Hezekiah (2 Chron. xxx, ii; see Mishna, *Pesach.* iv, 9), but without foundation (see, however, on the reconciliation of the lunar with the solar year, Galen, *Comment.* i, in Hippoc. *Epidem.* [Opp. ed. Kühn. xiii, 28]). Among the later Jews (who called an intercalated year שְׁנָה מְעִיבֵרָה, in distinction from a common year, or שְׁנָה מְשֻׁבָּרָה), an intercalary month was inserted after Adar, and was hence called Ve-dar (וֵאֵדָר), or second Adar (אֵדָר שֵׁנִי) (Mishna, *Eduyoth*, vii, 7; see the distinctions of the Gemarists in Reland, *Antiq. Sacr.* iv, 1; comp. Ben-David, *Zur Berechn. u. Gesch. d. jüd. Kalend.* [Berl. 1817]; Ideler, *ut sup.* p. 587 sq.; Anger, *De Temp. in Act. Ap. Ratione*, i, 31 sq.). The intercalation (מְעִיבָה) was regularly decreed by the Sanhedrim, which observed the rule never to add a month to the sabbatical year. It usually was obliged to intercalate every third year, but occasionally had to do so in two consecutive years.

The Israelitish year began, as the usual enumeration of the months shows (Lev. xxiii, 34; xxv, 9; Numb. ix, 11; 2 Kings xxv, 8; Jer. xxxix, 2; comp. 1 Macc. iv, 52; x, 21), with Abib or Nisan (see Esth. iii, 7), subsequent to and in accordance with the Mosaic arrangement (Exod. xii, 2), which had a retrospective reference to the departure out of Egypt (ix, 31; see Bähr, *Symbolik*, ii, 639). Yet as we constantly find this arrangement spoken of as a *festal* calendar, most Rabbinical and many Christian scholars understand that the *civil* year began, as with the modern Jews, with Tisri (October), but the *ecclesiastical* year with Nisan (Mishna, *Rosh Hash-shanah*, i, 1; comp. Josephus, *Ant.* i, 3, 3. See also Rosenmüller, on Exod. xii, 2; Hitzig, *Jesa.* p. 335; Seyffarth, *Chronol. Sacra*, p. 34 sq.). But this distinction is probably a post-exilian reckoning (Hävernick argues against its inference from Ezek. xl, 1), which was an accommodation to the time of the arrival of returned exiles in Palestine (Ezra iii, 1 sq.; Neh. vii, 73; viii, 1 sq.), and later fell into harmony with the Seleucid æra, which dated from October (see Benfey, *Monatnam.* p. 217; and comp. 1 Macc. iv, 52; x, 21; 2 Macc. xv, 37). Yet this has little countenance from the enactment of the festival of the seventh new moon (Lev. xxiii, 24; Numb. xxix, 1-6), which has in the

Mosaic legislation certainly a different import from the Rabbinical ordinance (see Vriemoot, *Observ. Misc.* p. 284 sq.; Gerdes, *De Feste Clangoris* [Duib. 1700; also in his *Exercit. Acad.*]). See NEW MOON. Nor does the expression "in the end of the year" (בְּאַחֲרֵית הַשָּׁנָה), with reference to the Feast of Tabernacles (Exod. xxiii, 16), favor this assumption (see Ideler, p. 498). Other passages adduced (Job xxix, 4; Joel ii, 25), as well as the custom of many other nations (Oredner, *ut sup.* p. 209 sq.), are a very precarious argument. Nevertheless, it is clear that even in the pre-exilian period of the theocracy, the autumn, as being the close of the year's labor, was often regarded among the agrarian population as a terminal date (Ideler, *Chronol.* i, 493 sq.; see Dresde, *Annus Jud. ex Antiq. Illust.* [Lips. 1766; merely Rabbinic]; Selden, *De Anno Civilis Vett. Hebr.* [Lond. 1644; also in Ugolino, *Theaur.* xvii]; Nagel, *De Calendario Vett. Ebr.* [Aldorf, 1746]). Seyffarth maintains that even prior to the destruction of Jerusalem the Israelites reckoned by lunar months (*Zeitschr. d. deutsch. morgenl. Gesellsch.* ii, 844 sq.). The prevailing belief, however, that they had from the first such a year has been of late combated by Böttcher (*Prob. alt-test. Schrifterklär.* p. 283; *De Inferis*, i, 125) and Credner (*Joel*, p. 210 sq.), and most stoutly by Seyffarth (*Chronol. Sacra*, p. 26 sq.). Credner holds that the Israelites originally had a solar year of thirty-day months, and that this was exchanged for the lunar year when the three great festivals were accurately determined, i. e. about the time of king Hezekiah and Josiah (on the contrary, see Von Bohlen, *Genes.* p. 105 sq.; Benfey and Stern, *Ueber die Monatsnamen*, p. 5 sq.). Seyffarth, however, ascribes the solar year to the Jews down to about 200 B.C.

A well-defined and universal æra was unknown among the ancient Hebrews. National events are sometimes dated from the departure out of Egypt (Exod. xix, 1; Numb. xxxiii, 38; 1 Kings vi, 1), usually from the accession of the kings (as in Kings, Chron., and Jer.), later from the beginning of the exile (Ezek. xxxiii, 21; xl, 1). Jeremiah reckons the Captivity according to the years of Nebuchadnezzar (xxv, 1; lii, 12, 28 sq.), but Ezekiel (i, 1) otherwise. The post-exilian books date according to the reign years of the Persian masters of Palestine (Ezra iv, 26; vi, 15; vii, 7 sq.; Neh. ii, 1; v, 4; xiii, 6; Hag. i, 1, 2, 11; Zech. vii, 1). But as Syrian vassals the Jews adopted the Greek (1 Macc. i, 10) or Seleucid æra (בִּנְיָן שְׁבַדְרִיָּה, *æra contractum*, since it was used in contracts generally, Arab. *karyakh dhu-lkerfin*), which dated from the overthrow of Babylon by Seleucus Nicator I (Olymp. cxvii, 1), and began with the autumn of B.C. 312 (see Ideler, *Handb. d. Chronol.* i, 448). This reckoning is employed in the books of the Maccabees, which, however, singularly differ by one year between themselves, the second book being about one year behind the first in its dates (comp. 1 Macc. vi, 16 with 2 Macc. xi, 21; 1 Macc. vi, 20 with 2 Macc. xiii, 1); from which it would seem that the author of 2 Macc. had a different epoch for the ær. Seleuc. from the author of 1 Macc., with the latter of whom Josephus agrees in his chronology. Inasmuch as 1 Macc. always counts by Jewish months in the Seleucid æra (i, 57; iv, 52, 59; vii, 43; xiv, 27; xvi, 14), and these are computed from Nisan (x, 21; xvi, 14)—the second book likewise counts by Jewish months (i, 18; x, 5; xv, 37; on the contrary xi, 21)—we might suppose that the former begins the Seleucid æra with the spring of B.C. 312, while the latter begins it with the autumn of the same year (Petav. *Rationar.* x, 45; Prideaux, ii, 267, etc.), a conclusion to which other circumstances likewise point (Ideler, *ut sup.* p. 531 sq.; Wieseler, *Chronol. Synopsis*, p. 451 sq.). What Wernsdorff objects (*De Fide Maccab.* p. 19 sq.) is not of much importance; but we cannot thence infer that the Babylonians began the Seleucid æra with the autumn of 311 (Seyffarth, *Chronol. Sacra*, p. 20). See

Hosmann, *De Æra Seleucid. et Regum Syria Successione* (Kil. 1752). Still another national reckoning is given in 1 Macc. xiii, 41 sq., namely, from the year of the deliverance of the Jews from the Syrian yoke, i. e. seventeen ær. Seleuc., or from the autumn of B.C. 143 (Josephus, *Ant.* xiii, 8, 6), and this æra appears upon Samaritan coins (Eckhel, *Doctrina Numor. Vett.* i, iii, 463 sq.). On other Jewish æras see the Mishna (*Gittin*, viii, 5). See YEAR.

2. *Month* (חֹדֶשׁ, lit. new, sc. moon; seldom and more Aramaic מְרִי, the moon). The months of the Hebrews, as stated above, were lunar (as appears from the foregoing names), and began from the new moon as ocularily observed (the [synodic] lunar month has 26 d. 12 h. 44 min. 3 [strictly 2.82] sec. [Ideler, *Chronol.* i, 48]). This is certain from the post-exilian period (Mishna, *Rosh Hash-shanah*, i, 5 sq.), but for pre-exilian times various conjectures have been hazarded (see above). The length of the lunar month in the later period depended upon the day when the appearance of the new moon was announced by the Sanhedrim (see a similar reckoning in Macrobi. *Sat.* i, 15, p. 273 ed. Bip.), which thus made the month either twenty-nine days (חֹדֶשׁ חֲסָר, i. e. short) or thirty days (חֹדֶשׁ מָלֵא, i. e. full), according as the day was included in the following or the preceding month. The general rule was that in one year not less than four nor more than eight full months could occur (Mishna, *Arach.* ii, 2). The final adjustment of the lunar to the solar year was by intercalation (פְּרִיבּוּר), so that whenever in the last month, Adar, it became evident that the Passover, which must be held in the following month, Nisan, would occur before harvest, i. e. not at the time when the sun would be in Aries (Josephus, *Ant.* iii, 10, 5), an entire month (Vadar) was interjected between Adar and Nisan, constituting an intercalary year (שָׁנָה מְעֻבֶּרֶת), which, however, according to the Gemara, did not take place in a sabbatic year, but always in that which preceded it; nor in two successive years, nor yet more than three years apart). See Anger, *De Temp. in Act. Ap. Ratione*, p. 30 sq.

Prior to the exile the individual months were usually designated by numbers (the twelfth month occurs in 2 Kings xxv, 27; Jer. lii, 31; Ezek. xxix, 1; comp. 1 Kings iv, 7); yet we find also the following names: *Ear-month* (חֹדֶשׁ הָאָזְנוֹ, Exod. xiii, 4; xxxiii, 15; Deut. xvi, 1, etc.), corresponding to the later Nisan; *Bloom-month* (חֹדֶשׁ [or יָרֵךְ] 1 Kings vi, 1, 37), the second month; *Rain-month* (יָרֵךְ בֹּשֶׁל, vi, 38), the eighth (connected by Benfey, p. 182, with the word בֶּל, בֶּלֶל; see the Talmudic interpretation cited by him, p. 16); *Freshet-month* (חֹדֶשׁ הָאֶתְנֵי, viii, 2), the seventh; all of which seem to be mere appellatives (see Benfey and Stern, *Ueber die Monatsnamen einiger alten Völker* [Berl. 1836], p. 2). After the exile the months received the following names (Gemara, *Pesach*, xciv, 2; Targ. *Sheni* on Esth. iii, 7 sq.; comp. Mishna, *Shekal.* iii, 1): 1. *Nisan* (נִסָּן, Neh. ii, 1; Esth. iii, 7), the first month, in which the Passover (q.v.) was held (and in which the vernal equinox fell, Josephus, *Ant.* iii, 10, 5), corresponding, in general, to our April (Ideler, *Chronol.* i, 491), and answering (Josephus, *Ant.* iii, 10, 5; *War.* v, 3, 1) to the Macedonico-Syrian *Xanthicus*, also (*Ant.* ii, 14, 6) to the Egyptian month *Pharmuthi*, which last, however, was March 27–April 25 of the Julian calendar (Ideler, *ut sup.* i, 143); 2. *Iyar* (אֵיָר, Targ. on 2 Chron. xxx, 2); 3. *Sivan* (סִיָּן, Esth. viii, 9; *Σειβάδ*, Bar. i, 8); 4. *Tammuz* (תַּמְּזָר, 5. *Ab* (אָב), 6. *Elul* (אֱלוּל, Neh. vi, 15; *Ἐλουλ*, 1 Macc. xiv, 27), the last month of the civil year in the post-exilian age (Mishna, *Shebi'uth*, x, 2; *Erubin*, iii, 7); 7. *Tishri* (תִּשְׁרִי), in which the festivals of Atonement and Tabernacles fell

(also the autumnal equinox); 8. *Marcheshván* (מַרְחֶשְׁוָן, *Μαρχησών* or *Μαρσών*, Josephus, *Ant.* i, 3, 8); 9. *Kislev* (כִּסְלֵי, Neh. i, 1; Zech. vii, 1; *Χασλεύ*, 1 Macc. i, 54); 10. *Tebéth* (טֵבֶת, Esth. ii, 16); 11. *Shebat* (שֶׁבַט, Zech. i, 7; *Σαβάρ*, 1 Macc. xvi, 14); 12. *Adár* (אֲדָר, Esth. iii, 7; viii, 12; *Ἀδάρ*, 2 Macc. xv, 37); 13. *Ve-Adár* (וְאֲדָר, strictly *Va-Adár*, וְאֲדָר), or *second Adar* (אֲדָרִי שֵׁנִי or בְּרִיאָה). Occasionally, however, the months were newly numbered in the post-exilic period likewise (Hag. i, 1; ii, 1 sq.; Zech. i, 1; viii, 19; Neh. vii, 73; viii, 3, 14; Dan. x, 4; 1 Macc. ix, 3, 54; x, 21; xiii, 51). On the origin and signification of those names, see Benfey, *op. cit.* p. 24 sq.; Gesenius, *Thesaur.* p. 702, 947. From the fact that the second book of Maccabees and Josephus reckon according to the Syro-Macedonian months (*Dioscurus*, *Xanthicus*, etc.) it does not follow that the Jews adopted this calendar in the Seleucid æra. In 2 Macc. the Egyptian months (*Epiphi*, *Pachon*) are named. See Pott, in the *Hall. Lit.-Zeit.* 1839, No. 46-50; Carpzov, *Appar.* p. 356 sq.; Michaelis, *Comment.* 1763-68, *Oblat.* p. 16 sq.; Langhaußen, *De Mense Vett. Hebr. Lunari* (Jen. 1713; also in Ugolino, *Thesaur.* xvii); Ideler, *Chronol.* i, 448 sq., 509 sq. See MONTH.

8. *Week* (שָׁבִיעַ, lit. *sevened*). This division of the synodal lunar month into seven days (whence the Heb. name) early prevailed among the Israelites, as among other Semitic people and the Egyptians (Ideler, *Chronol.* i, 178; ii, 473); but only among the Israelites was this arrangement associated with cosmogony, with law, and with religion itself, so as to enter into real civil life and form the basis of the whole cycle of festivals. See SABBATH. But ordinarily, days rather than weeks (as also among the Greeks and Romans) constituted the conventional mode of computing time (but see Lev. xii, 5; Dan. x, 2 sq.). In the post-exilic period the reckoning by weeks became more customary, and at length special names for particular week-days came into use, enumerated after the formula *יָמֵינוּ מִיּוֹם הַשַּׁבָּת*, or *σαββάτων*, etc. (Mark xvi, 2, 9; Luke xxiv, 1; Acts xx, 7; 1 Cor. xvi, 2; see Epiphanius, *Her.* lxx, 12; so also in Chald. with *שַׁבְּתָא* or *שַׁבְּתָא*; see Otho, *Lex. Rabb.* p. 273. The word *ἑβδομάς* does not occur in the New Test.; see also Ideler, *Chronol.* i, 481). The astronomical derivation of the week naturally grows out of the obvious fact (*Chronol.* i, 60) that the moon changes about every seven (properly seven and three eighths) days, so that the lunar month divides itself into four quarters. Hence nations which have no historical relation in this respect nevertheless agree in the observance (*Chronol.* i, 88). The days of the week were named long before the Christian æra on regular astrological principles from the seven planets (Lobeck, *Aglaupham.* p. 933 sq.), which (according to Dion Cass. xxxvii, 18) was an Egyptian invention. They began with Saturn's day (Saturday), inasmuch as Saturn was the outermost planet; but among the Jews this day (the Sabbath) was the last of the week, and so the Jewish (and Christian) week commences with Sunday. But these heathenish names were never in general use among the Jews (see Bähr, *Symbol.* ii, 585 sq.). Weeks or heptads of years belong, among the Jews, to prophetic poetry; but in one instance they occur in a literal sense in prose (Dan. vii, 24-27), as also among the Romans such *annorum hebdomades* were known (Gell. iii, 10; Censorin. *De Die Nat.* xiv). See WEEK.

4. *Day* (יוֹם, so called from its heat; *ἡμέρα*). The civil day (*ἡμέρα*, 2 Cor. xi, 25) was reckoned by the Hebrews from sundown to sundown (Lev. xxiii, 32); most other ancient nations computed time according to the moon's course (Pliny, ii, 79; Tacit. *Germ.* c. xi; Cæsar, *Bell. Gall.* vi, 18; Isidore, *Orig.* v, 30; Censorin. *De Die Nat.* xxiii); but before the exile they seem not to have divided the day into special or well-defined portions beyond the natural divisions of morning (בֹּקֶר;

see the definition for the Temple-service in the Mishna, *Tamid*, iii, 2), noon (צִהְרֵי, Gen. xliii, 16; Deut. xxviii, 29; comp. חֹדֶם חַיִּים, Gen. xviii, 1; 1 Sam. xi, 11; and also חַיִּים, Prov. iv, 18), and evening (עֶרֶב; comp. also עֶרֶב, the morning and evening breeze), which were in general use, as among the modern Arabs (Niebuhr, *Bedouin*, p. 108 sq.). During the exile the Jews appear to have adopted the division into regular hours (Chald. שָׁעָה) (Dan. iv, 16; v, 5; 2 Esdr. vi, 24), as (according to Herod. ii, 109) the twelve hours of the day originated among the Babylonians; and in the New Test. the hours are frequently enumerated. As, however, every natural day of the year was divided into twelve hours (John xi, 9; see Ideler, *Chronol.* i, 84 sq.), they must have been unequal at different seasons of the year, since in the latitude of Palestine the longest summer day lasts from about four A. M. to eight P. M. (Mayr, *Reis.* iii, 15), being about four hours longer than the shortest. The hours of the day (for those of the night, see NIGHT-WATCH) were naturally counted from sunrise (cock-crowing, חֲרִירָא דְהַבִּיר, was a designation of time observed in the Temple, Mishna, *Tamid*, i, 2); whence the *third* hour (Matt. xx, 3; Acts ii, 15) corresponds about to our nine o'clock A. M. (the time when the market-place was full of men, *πλήθους ἀγορά*; see Kypke, *Observat.* i, 101 sq.; also the first hour of prayer, Acts ii, 15); the end of the *sixth* hour (Matt. xx, 5; John xix, 14) to midday; with the *eleventh* hour (Matt. xx, 6; Mark xv, 34) the day inclined to a close and labor ceased (see also John i, 40; iv, 52; Acts iii, 1; x, 3). There were three daily hours of prayer—morning, noon, and night; besides, there is occasionally mention of prayer four times a day (Neh. ix, 8); but a quarterly division of the day (as inferred by Lücke, *Joh.* ii, 756) is not certain in the New Test. Yet it is somewhat doubtful whether the evangelists, John at least, always reckon according to the Jewish hours (Clericus, *Ad Joan.* xix, 14; Michaelis, in the *Hamb. verm. Bibliothek*, iii, 338 sq.; Rettig, in the *Stud. u. Krit.* 1830, i, 101 sq.; Hug, in the *Freiburger Zeitschr.* v, 90 sq.). See DAY.

5. *Hour* (Chald. שָׁעָה; Gr. ὥρα). The Oriental Asiatics, especially the Babylonians (Herod. ii, 109; Vitruv. ix, 9), had from early times sundials (*horologia solaria*) or shadow-measures (Pliny, xxxvi, 15); and hence, from the intercourse with Babylon, this useful contrivance may have been introduced into Palestine even before the exile. At all events, something of the kind seems to be meant by the "degrees of Ahaz" (מַעְדָּן הַמֶּלֶךְ, Isa. xxxviii, 8; comp. 2 Kings xx, 9), either an obelisk which cast its shade upon the steps of the palace, or perhaps a regular gnomon with degrees marked on it (Targ. Jonath. שִׁנְיָא שִׁנְיָא, Symmachus, *ὥρολόγιον*; Jerome, *horologium*; see Salmas. *Ad Solin.* p. 447 sq.; Martini, *Abhandl. v. d. Sonnenuhren der Alten* [Leips. 1777]; also *De Horologiis Vett. Sciothericis* [Amst. 1797]). The Romans after U. C. 595 used water-clocks (*clepsydræ*, Vitruv. ix, 9; Pliny, vii, 60) for the watch-room of post-courses (Veget. *Mil.* iii, 8) and for regulating the continuance of speaking (Philo, *Opp.* ii, 597; Becker, *Gallus*, i, 187). Whether this practice prevailed among the Jews in the time of Christ, we know not (Zeltner, *De Horologio Caiaphæ* [Altdorf. 1721], does not touch the point); but they could not have been ignorant of some means of measuring time, whether dials or water-clocks, since the latter are in frequent use in the modern East (Niebuhr, *Reis.* ii, 74). For a peculiar device for dividing the hours mentioned by the Talmudists, see Otho, *Lex. Rabb.* p. 282; see also Ideler, *Chronol.* i, 230 sq. See HOUR.

See, generally, Ulmer, *De Calendario Vett. Ebræor.* (Altdorf. 1846); Walch, *Calendarium Palæstinæ (Economicum* (Gott. 1786); Hincks, *Ancient Egyptian Years and Months* (Lond. 1865); id. *Assyro-Babylonian Measures of Time* (ibid. eod.). See CALENDAR.

**Times, REGARDER OF.** See OBSERVER OF TIMES.

**Tim'na** (Heb. *Timná*, תִּמְנָה, *restrain*), the name of a woman and also of a man.

1. (Sept. *Θαμνά*.) A concubine of Eliphaz, son of Esau, and by him mother of Amalek (Gen. xxxvi, 12; named [apparently only] in 1 Chron. i, 36 [by an ellipsis] as a son of Eliphaz); probably the same as the sister of Lotan, and daughter of Seir the Horite (Gen. xxxvi, 22; 1 Chron. i, 39). B.C. considerably post 1963.

2. (Sept. *Θαμνά* v. r. *Θαμάν*; A. V. "Timnah.") The first named of the Esauite "dukes" or sheiks in Mount Seir (Gen. xxxvi, 40; 1 Chron. i, 51). B.C. long post 1963.

**Tim'nah** (Heb. *Timnah*, תִּמְנָה, *portion*), the name of several places in Palestine, which appears in the original, either simple or compounded, in several forms, not always accurately represented in the A. V. We treat under this head only the simple name, reserving the compounds for a separate article. See also TIMNA.

1. The place near which Tamar entrapped Judah into intercourse with her (Gen. xxxviii, 12, 13, 14; Heb. with ת directive, *Timnathah*, תִּמְנָתָה; Sept. *Θαμνά*; Vulg. *Thamnatha*; A. V. "to Timnath"). It had a road leading to it (ver. 14), and as it lay on high ground (ver. 12), it probably was the same with the Timnah in the mountain district of the tribe of Judah (Josh. xv, 57; Sept. *Θαμνά* v. r. *Θαμναθά*; Vulg. *Thamna*). As it lay in the same group with Maon, Ziph, and Carmel, south-east of Hebron (Keil, *Comment.* ad loc.), it may perhaps be identical with a ruined site upon a low hill on the west of the road between Ziph and Carmel, "called *Um el-Amud* ('mother of the pillar'). Foundations and heaps of stones, with some cisterns, cover a small tract of ground, while two or three coarse columns mark the site probably of a village church, and give occasion for the name" (Robinson, *Bibl. Res.* ii, 192; comp. p. 629).

2. A town near the north-west border of Judah, between Beth-shemesh and Ekron (Josh. xv, 10; Sept. *Διψ* v. r. *Nóroc*; Vulg. *Thamna*). It is doubtless the same with the place of the same name in Dan (Josh. xix, 43, Heb. with ת paragogic, *Timnathah*, תִּמְנָתָה; Sept. *Θαμνά*; Vulg. *Thamna*; A. V. "Thimnathah"), which lay in the vicinity of Ekron; and likewise with the residence of Samson's first wife (Judg. xiv, 1, 2, 5; Heb. likewise with ת appended; Sept. *Θαμναθά*; Vulg. *Thamnatha*; A. V. "Timnath;" Josephus, *Θαμνά*, *Ant.* v, 8, 5), which lay on the Philistine edge of the Shephelah (Judg. xiv, 1); and both are therefore the same place that was invaded by the Philistines in the time of Abaz (2 Chron. xxviii, 18; Sept. *Θαμνά*; Vulg. *Thamnan*). At this last date it had suburbs adjoining ("villages"); and in Samson's day it contained vineyards, haunted, however, by such savage animals as indicate that the population was but sparse. It was on higher ground than Ashkelon (Judg. xiv, 19), but lower than Zorah, which we may presume was Samson's starting-point (xiii, 25). After the Danites had deserted their original allotment for the north, their towns would naturally fall into the hands of Judah, or of the Philistines, as the continual struggle between them might happen to fluctuate. In the later history of the Jews, Timnah must have been a conspicuous place. It was fortified by Bacchides as one of the most important military posts of Judaea (*Θαμναθα*, 1 Macc. ix, 50), and it became the head of a district or toparchy, which was called after its name, and was reckoned the fourth in order of importance among the fourteen into which the whole country was divided at the time of Vespasian's invasion (*Θαμνά*, Josephus, *War*, iii, 3, 5; see Pliny, v, 14). Eusebius and Jerome (*Onomast.* s. v. *Θαμνά*, "Thamna") confound it with the Timnah of Judah's adventure with Tamar, but say that it still existed as a large village near Diospolis on the road to Jerusalem.

According to Schwarz (*Palest.* p. 106), it is likewise mentioned in the Talmud (*Sotah*, fol. 10 b). The modern representative of all these various forms of the same name is probably *Tibneh*, a deserted village about two miles west of Ain Shems (Beth-shemesh), among the broken undulating country by which the central mountains of this part of Palestine descend to the maritime plain (Robinson, *Bibl. Res.* ii, 342; Thomson, *Land and Book*, ii, 361).

**Tim'nath-he'eres** (Heb. *Timnath Cheres*, תִּמְנַת חֶרֶס, *Timnah of Heres*; Sept. *Θαμναθῆρες* v. r. *Θαμναθῆρως*; Vulg. *Thamnathare*; Judg. ii, 9), or **Tim'nath-se'rah** (Heb. *Timnath-Serach*, תִּמְנַת סֶרַח, *Timnah of Serah*; Sept. *Θαμναθσαρά* and *Θαμναθσαράς*, v. r. *Θαμναθσαρά* and *Θαμναθσαράς* or *Θαμναθσαρά*; Vulg. *Thamnath Saraa* and *Thamnath Sare*; Josh. xix, 5; xxiv, 30; Josephus, *Θαμνά*, *Ant.* v, 1, 29), the name (varied only by the transposition of the last two consonants of the latter part) by which the city and burial-place of Joshua was known. The Jews adopt *Heres* as the real name; interpret it to mean "the sun;" and see in it a reference to the act of making the sun stand still, which is to them the greatest exploit of Joshua's life, as they state that the figure of the sun (*temunath ha-cheres*) was carved upon the sepulchre (Rashi, *Comment.* ad loc.). Others (as Fürst, i, 442), while accepting *Heres* as the original form, interpret that word as "clay," and as originating in the character of the soil. Others, again, like Ewald (*Gesch.* ii, 347, 8) and Bertheau (*On Judges*), take *Serach* to be the original form, and *Heres* an ancient but unintentional error. It was the spot which at his own request was presented to Joshua after the partition of the country was completed (Josh. xix, 50), and in "the border" of which he was buried (xxiv, 30). It is specified as "in Mount Ephraim on the north side of Mount Gaash." Timnath-serah and the tomb of its illustrious owner were shown in the time of Jerome, who mentions them in the *Epitaphium Paulæ* (§ 13). Beyond its being south of Shechem, he gives no indication of its position, but he dismisses it with the following characteristic remark, a fitting tribute to the simple self-denial of the great soldier of Israel: "Satisque mirata est, quod distributor possessionum sibi montana et aspera delegisset." Hebrew tradition, in accordance with the above Rabbinical interpretation, identifies the place with *Kefar Cheres*, which is said by rabbi Jacob (Carmoly, *Itinéraires*, etc. p. 186), Hap-Parchi (Asher, *Benj. of Tudela*, p. 434), and other Jewish travellers down to Schwarz in our own day (*Palest.* p. 151), to be about five miles south of Shechem (Nablûs). This is doubtless the present *Kefr-Harit*, or *Kefr-Haria*, which, however, is more nearly double that distance S.S.W. of Nablûs. The modern village has three sacred places—one of Nebi Nûn, i. e. the tomb of Nun; the second, Nebi Lusha, i. e. the tomb of Joshua; and the third, Nebi Kif, i. e. the tomb of the "division by lot" (Conder, *Tent-Work in Palest.*, i, 78). Another and more promising identification has, however, been suggested in our own day by Dr. Smith (*Bibl. Sacra* [1843], p. 478 sq.). In his journey from Jifna to Mejd-el-Yaba, about six miles from the former, he discovered the ruins of a considerable town by the name of *Tibneh* on a gentle hill on the left (south) of the road. Opposite the town (apparently to the south) was a much higher hill, in the north side of which are several excavated sepulchres, which in size and in the richness and character of their decorations resemble the so-called "Tombs of the Kings" at Jerusalem. The mound or tell stands on the south bank of a deep valley, surrounded by desolate mountains; by it a clear spring issues from a cave; to the south-west is a beautiful and immense oak-tree, called by the natives Sheikh et Teim, "the chief, the servant of God." South of the tell the hillside is hollowed out with many tombs, most of which are choked up. One of these has a porch with two rude pilasters, and along the façade are over two hundred

niches for lamps; the trailing boughs of the bushes above hang down picturesquely, and half cover the entrance. Within are three *kokin*, or cells, and through the central one it is possible to creep into a second chamber with only a single grave. Other tombs exist farther east, one having a sculptured façade; but the tomb described is the one popularly supposed to be that of Joshua (Conder, *ut sup.* p. 228). See JOSHUA.

**Tim'nite** (Heb. *Timni'*, תִּמְנִי; Sept. *Θαμναδαϊος* v. r. *Θαμνι*), a designation of Samson's son's father-in-law, from his residence in Timnah (Judg. xv, 6).

**Tim'on** (*Tímon*, a common Greek name), the fourth named of the seven, commonly called "deacons" [see DEACON], who were appointed to act as almoners on the occasion of complaints of partiality being raised by the Hellenistic Jews at Jerusalem (Acts vi, 5). A.D. 29. Like his colleagues, Timon bears a Greek name, from which, taken together with the occasion of their appointment, it has been inferred with much probability that the seven were themselves Hellenists. Nothing further is known of him with certainty; but in the *Synopsis de Vita et Morte Prophetarum, Apostolorum, et Discipulorum Domini*, ascribed to Dorotheus of Tyre (*Bibl. Maz. Patrum*, iii, 149), we are informed that he was one of the "seventy-two" disciples (the catalogue of whom is a mere congeries of New-Test. names), and that he afterwards became bishop of Bostra (? "Bostra Arabum"), where he suffered martyrdom by fire.

**Timotheans**, a section of the Alexandrian Monophysites (q. v.), so named from Timotheus Ælurus, a bitter opponent of the canons of Chalcedon. During the patriarchate of Proterius, Timotheus established schismatical assemblies in Alexandria, having persuaded a few bishops and monks to join him in his secession from the communion of the patriarch. On the death of the emperor Marcian, he succeeded in obtaining consecration from two heretical and exiled bishops, and Proterius was murdered by the partisans of the usurping patriarch on Good-Friday, A.D. 457. After maintaining his position for three years, he was banished to the ancient Cherson, near Sebastopol, but was recalled by the emperor Basiliscus, and took possession of the patriarchal throne of Alexandria in 470. The opinions of Timotheus and his party went the full length of extreme Eutychianism. In some fragments of a work of his which still exist (*Mai, Nova Collect.* vii, 35, 277, 304, 305), he is found saying that the nature of Christ is one only—that is, divine; that in the first starting-point of conception by his mother he had one substance with human nature, but that he was not born of the Blessed Virgin in the ordinary way of birth, or her virginity could not have been preserved. This form of Eutychianism thus repudiated the reality of Christ's human nature, and was practically identical with the opinion of the Docetæ.

**Timoth'etus** (*Τιμόθεος*, honoring God, a frequent name in Greek and Roman history; see Athen. x, 419; xiv, 626; Livy, xlii, 67; Pliny, vii, 57; xxxiv, 19, 34; xxxvi, 4, 9), the name of three Jews (such, at least, by association).

1. A "captain of the Ammonites" (1 Macc. v, 6), who was defeated on several occasions by Judas Maccabæus (ver. 6, 11, 34-44). B.C. 164. He was probably a Greek adventurer (comp. Josephus, *Ant.* xii, 8, 1) who had gained the leadership of the tribe. Thus Josephus (*ibid.* xiii, 8, 1, quoted by Grimm, *On 1 Macc.* v, 6) mentions one "Zeno, surnamed Cotylas, who was despot of Rabbah" in the time of Johannes Hyrcanus.

2. In 2 Macc. a leader named Timotheus is mentioned as having taken part in the invasion of Nicanor (viii, 30; ix, 3). B.C. 166. At a later time he made great preparations for a second attack on Judas, but was driven to a stronghold, Gazara, which was stormed by Judas, and there Timotheus was taken and slain (x,

24-37). It has been supposed that the events recorded in this latter narrative are identical with those in 1 Macc. v, 6-8, an idea rendered more plausible by the similarity of the names Jazer and Gazara (in Lat. *Gazer*, *Jazare*, *Gazara*). But the name Timotheus was very common, and it is evident that Timotheus the Ammonitish leader was not slain at Jazer (1 Macc. v, 34); and Jazer was on the east side of Jordan, while Gazara was almost certainly the same as Gezer. See GAZARA; JAAZER. It may be urged further, in support of the substantial accuracy of 2 Macc., that the second campaign of Judas against the first-named Timotheus (1 Macc. v, 27-44) is given in 2 Macc. xii, 2-24 after the account of the capture of Gazara and the death of the second-named Timotheus there. Wernsdorf assumes that all the differences in the narratives are blunders in 2 Macc. (*De Fide Libr. Macc.* § lxx), and in this he is followed by Grimm (*On 2 Macc.* x, 24, 32). But, if any reliance is to be placed on 2 Macc., the differences of place and circumstances are rightly taken by Patricius to mark different events (*De Libr. Macc.* § xxxii, p. 259).

3. The Greek form of the name of TIMOTHY (q. v.), the special follower of Paul (Acts xvi, 1; xvii, 14, etc.). He is called by this name in the A. V. in every case except 2 Cor. i, 1; Phil. i, 1; Heb. xiii, 23, and the epistles addressed to him (1 Tim. i, 2, 18; vi, 20; 2 Tim. i, 2).

**Tim'othy** (*Τιμόθεος*, i. e. *Timotheus* [q. v.], as the name is given in the A. V. Acts xvi, 1; xvii, 14, 15; xviii, 5; xix, 22; xx, 4; Rom. xvi, 21; 1 Cor. iv, 17; xvi, 10; 2 Cor. i, 19; Phil. i, 1; ii, 19; Col. i, 1; 1 Thess. i, 1; iii, 2, 6; 2 Thess. i, 1), one of the most interesting of Paul's converts of whom we have an account in the New Test. Fortunately we have tolerably copious details of his history and relations in the frequent references to him in that apostle's letters to the various churches, as well as in those addressed to him personally.

1. *His Early Life.*—The disciple thus named was the son of one of those mixed marriages which, though condemned by stricter Jewish opinion, and placing their offspring on all but the lowest step in the Jewish scale of precedence, were yet not uncommon in the later periods of Jewish history. The children of these marriages were known as *mamzerim* ("bastards"), and stood just above the Nethinim. This was, however, *ceteris paribus*. A bastard who was a wise student of the law was, in theory, above an ignorant high-priest (Gem. Hieros. *Horayoth*, fol. 84, in Lightfoot, *Hor. Heb.* in Matt. xxiii, 14); and the education of Timothy (2 Tim. iii, 15) may therefore have helped to overcome the prejudice which the Jews would naturally have against him on this ground. The mother was a Jewess, but the father's name is unknown; he was a Greek, i. e. a Gentile, by descent (Acts xvi, 1, 3). If in any sense a proselyte, the fact that the issue of the marriage did not receive the sign of the covenant would render it probable that he belonged to the class of half-converts, the so-called Proselytes of the Gate, not those of Righteousness, if such a class as the former existed. See PROSELYTE. The absence of any personal allusion to the father in the Acts or Epistles suggests the inference that he must have died or disappeared during his son's infancy. The care of the boy thus devolved upon his mother, Eunice, and her mother, Lois, who are both mentioned as sincere believers (2 Tim. i, 5). Under their training his education was emphatically Jewish. "From a child" he learned (probably in the Sept. version) to "know the Holy Scriptures" daily. The language of the Acts leaves it uncertain whether Lystra or Derbe was the residence of the devout family. The latter has been inferred, but without much likelihood, from a possible construction of Acts xx, 4, the former from xvi, 1, 2 (see Neander, *Pflanz. und Lekt.* i, 288; Alford and Huther, *ad loc.*). In either case the absence of any indication of the existence of a synagogue makes this devout consistency more noticeable. We may

think here, as at Philippi, of the few devout women going forth to their daily worship at some river-side oratory (Conybeare and Howson, i, 211). The reading *παρὰ ῥίον* in 2 Tim. iii, 14, adopted by Lachmann and Tischendorf, indicates that it was from them as well as from the apostle that the young disciple received his first impression of Christian truth. It would be natural that a character thus fashioned should retain throughout something of a feminine piety. A constitution far from robust (1 Tim. v, 23), a morbid shrinking from opposition and responsibility (iv, 12-16; v, 20, 21; vi, 11-14; 2 Tim. ii, 1-7), a sensitiveness even to tears (i, 4), a tendency to an ascetic rigor which he had not strength to bear (1 Tim. v, 23), united, as it often is, with a temperament exposed to some risk (see the elaborate dissertation *De Νεωτερεῶν Ἐπιστολαῖς*, by Bosius, in Hase, *Thesaurus*, vol. ii) from "youthful lusts" (2 Tim. ii, 22) and the softer emotions (1 Tim. v, 2)—these we may well think of as characterizing the youth as they afterwards characterized the man.

2. *His Conversion and Ordination.*—The arrival of Paul and Barnabas in Lycaonia (Acts xiv, 6) brought the message of glad tidings to Timothy and his mother, and they received it with "unfeigned faith" (2 Tim. i, 5). A.D. 44. If at Lystra, as seems probable from 2 Tim. iii, 11, he may have witnessed the half-completed sacrifice, the half-finished martyrdom of Paul (Acts xiv, 19). The preaching of the apostle on his return from his short circuit prepared him for a life of suffering (ver. 22). From that time his life and education must have been under the direct superintendence of the body of elders (ver. 23). During the interval of three years between the apostle's first and second journeys, the youth had greatly matured. His zeal, probably his asceticism, became known both at Lystra and Iconium. The mention of the two churches as united in testifying to his character (xvi, 2) leads us to believe that the early work was prophetic of the later, that he had already been employed in what was afterwards to be the great labor of his life, as "the messenger of the churches," and that it was his tried fitness for that office which determined Paul's choice. Those who had the deepest insight into character and spoke with a prophetic utterance pointed to him (1 Tim. i, 18; iv, 14), as others had pointed before to Paul and Barnabas (Acts xiii, 2), as specially fit for the missionary work in which the apostle was engaged. Personal feeling led Paul to the same conclusion (xvi, 3), and he was solemnly set apart (the whole assembly of the elders laying their hands on him, as did the apostle himself) to do the work, and possibly to bear the title, of evangelist (1 Tim. iv, 14; 2 Tim. i, 6; iv, 5). Iconium has been suggested by Conybeare and Howson (i, 289) as the probable scene of the ordination.

A great obstacle, however, presented itself. Timothy, though inheriting, as it were, from the nobler side (Wettstein, *ad loc.*), and therefore reckoned as one of the seed of Abraham, had been allowed to grow up to the age of manhood without the sign of circumcision, and in this point he might seem to be disclaiming the Jewish blood that was in him and choosing to take up his position as a heathen. Had that been his real position, it would have been utterly inconsistent with Paul's principle of action to urge on him the necessity of circumcision (1 Cor. vii, 18; Gal. ii, 3; v, 2). As it was, his condition was that of a negligent, almost of an apostate, Israelite; and, though circumcision was nothing, and uncircumcision was nothing, it was a serious question whether the scandal of such a position should be allowed to frustrate all his efforts as an evangelist. The fact that no offence seems to have been felt hitherto is explained by the predominance of the Gentile element in the churches of Lycaonia (Acts xiv, 27). But his wider work would bring him into contact with the Jews, who had already shown themselves so ready to attack, and then the scandal would come out. They might tolerate a heathen, as such, in the synagogue or

the church, but an uncircumcised Israelite would be to them a horror and a portent. With a special view to their feelings, making no sacrifice of principle, the apostle, who had refused to permit the circumcision of Titus, "took and circumcised" Timothy (xvi, 3); and then, as conscious of no inconsistency, went on his way distributing the decrees of the council of Jerusalem, the great charter of the freedom of the Gentiles (ver. 4).

Henceforth Timothy was one of his most constant companions. Not since he parted from Barnabas had he found one whose heart so answered to his own. If Barnabas had been as the brother and friend of early days, he had now found one whom he could claim as his own by a spiritual parentage (2 Tim. i, 2). He calls him "son Timothy" (1 Tim. i, 18); "my own son in the faith" (ver. 2); "my beloved son" (1 Cor. iv, 17); "my workfellow" (Rom. xvi, 21); "my brother" (which is probably the sense of *Τιμόθεος ὁ ἀδελφός* in 2 Cor. i, 1).

3. *His Evangelistic Labors and Journeys.*—Continuing his second missionary tour, Paul now took Timothy with him, and, accompanied by Silvanus, and probably Luke also, journeyed at length to Philippi (Acts xvi, 12), where the young evangelist became conspicuous at once for his filial devotion and his zeal (Phil. ii, 22). His name does not appear in the account of Paul's work at Thessalonica, and it is possible that he remained some time at Philippi, and then acted as the messenger by whom the members of that Church sent what they were able to give for the apostle's wants (iv, 15). He appears, however, at Berea, and remains there when Paul and Silas are obliged to leave (Acts xvii, 14), going on afterwards to join his master in Greece (1 Thess. iii, 2). Meanwhile he is sent back to Thessalonica (*ibid.*), as having special gifts for comforting and teaching. He returns from Thessalonica, not to Athens, but to Corinth, and his name appears united with Paul's in the opening words of both the letters written from that city to the Thessalonians (1 Thess. i, 1; 2 Thess. i, 1). Dr. Wordsworth infers from 2 Cor. ix, 11 and Acts xviii, 5 that Timothy brought contributions to the support of the apostle from the Macedonian churches, and thus released him from his continuous labor as a tent-maker. Here, also, he was apparently active as an evangelist (2 Cor. i, 19), and on him, probably, with some exceptions, devolved the duty of baptizing the new converts (1 Cor. i, 14). Of the next four or five years of his life we have no record, and can infer nothing beyond a continuance of his active service as Paul's companion. When we again meet with him, it is as being sent on in advance while the apostle was contemplating the long journey which was to include Macedonia, Achaia, Jerusalem, and Rome (Acts xix, 22). A.D. 54. He was sent to "bring" the churches "into remembrance of the ways" of the apostle (1 Cor. iv, 17). We trace in the words of the "father" an anxious desire to guard the son from the perils which, to his eager but sensitive temperament, would be most trying (xvi, 10). His route would take him through the churches which he had been instrumental in founding, and this would give him scope for exercising the gifts which were afterwards to be displayed in a still more responsible office. It is probable, from the passages already referred to, that, after accomplishing the special work assigned to him, he returned by the same route and met Paul according to a previous arrangement (ver. 11), and was thus with him when the second epistle was written to the Church of Corinth (2 Cor. i, 1). He returns with the apostle to that city, and joins in messages of greeting to the disciples whom he had known personally at Corinth and who had since found their way to Rome (Rom. xvi, 21). He forms one of the company of friends who go with Paul to Philippi and then sail by themselves, waiting for his arrival by a different ship (Acts xx, 3-6). Whether he continued his journey to Jerusalem, and what became of him during Paul's imprisonment at Caesarea, are points on which we must remain uncertain. The language of Paul's address to the

elders of Ephesus (ver. 17-35) renders it unlikely that he was then left there with authority. The absence of his name from ch. xxvii in like manner leads to the conclusion that he did not share in the perilous voyage to Italy. He must have joined him, however, apparently, soon after his arrival in Rome, and was with him when the epistles to the Philippians, to the Colossians, and to Philemon were written (Phil. i, 1; ii, 19; Col. i, 1; Philem. 1). All the indications of this period point to incessant missionary activity. As before, so now, he is to precede the personal coming of the apostle, inspecting, advising, reporting (Phil. ii, 19-23), caring especially for the Macedonian churches as no one else could care. The special messages of greeting sent to him at a later date (2 Tim. iv, 21) show that at Rome also, as elsewhere, he had gained the warm affection of those among whom he ministered. Among those most eager to be thus remembered to him we find, according to a fairly supported hypothesis, the names of a Roman noble, Pudens (q. v.), of a future bishop of Rome, Linus (q. v.), and of the daughter of a British king, Claudia (Williams, *Claudia and Pudens*; Conybeare and Howson, ii, 501; Alford, *Excursus in Greek Test.* iii, 104). It is interesting to think of the young evangelist as having been the instrument by which one who was surrounded by the fathomless impurity of the Roman world was called to a higher life, and the names which would otherwise have appeared only in the foul epigrams of Martial (i, 32; iv, 18; v, 48; xi, 53) raised to a perpetual honor in the salutations of an apostolic epistle. An article (*They of Caesar's Household*) in *Journ. of Class. and Sacred Philology*, No. x, questions this hypothesis, on the ground that the epigrams are later than the epistles, and that they connect the name of Pudens with heathen customs and vices. On the other hand, it may be urged that the bantering tone of the epigrams forbids us to take them as evidences of character. Pudens tells Martial that he does not "like his poems." "Oh, that is because you read too many at a time" (iv, 29). He begs him to correct their blemishes. "You want an autograph copy, then, do you?" (vii, 11). The slave En- or Eucolpos (the name is possibly a wilful distortion of Eubulus) does what *might* be the fulfilment of a Christian vow (Acts xviii, 18), and this is the occasion of the suggestion which seems most damnable (Martial, v, 48). With this there mingles, however, as in iv, 13; vi, 58, the language of a more real esteem than is common in Martial (comp. some good remarks in Galloway, *A Clergyman's Holidays*, p. 35-49).

To the close of this period of Timothy's life we may probably refer the imprisonment of Heb. xiii, 23, and the trial at which he "witnessed the good confession" not unworthy to be likened to that of the Great Confessor before Pilate (1 Tim. vi, 13). Assuming the genuineness and the later date of the two epistles addressed to him (see below), we are able to put together a few notices as to his later life. It follows from 1 Tim. i, 3 that he and his master, after the release of the latter from his imprisonment, revisited the proconsular Asia; that the apostle then continued his journey to Macedonia, while the disciple remained, half reluctantly, even weeping at the separation (2 Tim. i, 4), at Ephesus to check, if possible, the outgrowth of heresy and licentiousness which had sprung up there. The time during which he was thus to exercise authority as the delegate of an apostle—a vicar apostolic rather than a bishop—was of uncertain duration (1 Tim. iii, 14). The position in which he found himself might well make him anxious. He had to rule presbyters, most of whom were older than himself (iv, 12), to assign to each a stipend in proportion to his work (v, 17), to receive and decide on charges that might be brought against them (ver. 1, 19, 20), to regulate the almsgiving and the sisterhoods of the Church (ver. 3-10), to ordain presbyters and deacons (iii, 1-13). There was the risk of being entangled in the disputes, prejudices, covetousness, sensuality, of a great city. There was the risk of injuring health and

strength by an overstrained asceticism (iv, 4; v, 23). Leaders of rival sects were there—Hymenæus, Philetus, Alexander—to oppose and thwart him (i, 20; 2 Tim. ii, 17; iv, 14, 15). The name of his beloved teacher was no longer honored as it had been; the strong affection of former days had vanished, and "Paul the aged" had become unpopular, the object of suspicion and dislike (comp. Acts xx, 87; 2 Tim. i, 15). Only in the narrow circle of the faithful few—Aquila, Priscilla, Mark, and others—who were still with him was he likely to find sympathy or support (iv, 19). We cannot wonder that the apostle, knowing these trials, and, with his marvellous power of bearing another's burdens, making them his own, should be full of anxiety and fear for his disciple's steadfastness; that admonitions, appeals, warnings, should follow each other in rapid and vehement succession (1 Tim. i, 18; iii, 15; iv, 14; v, 21; vi, 11). In the second epistle to him this deep personal feeling utters itself yet more fully. The friendship of twenty years was drawing to a close, and all memories connected with it throng upon the mind of the old man, now ready to be offered: the blameless youth (2 Tim. iii, 15), the holy household (i, 5), the solemn ordination (ver. 6), the tears at parting (ver. 4). The last recorded words of the apostle express the earnest hope, repeated yet more earnestly, that he might see him once again (iv, 9, 21). Timothy is to come before winter, to bring with him the cloak for which in that winter there would be need (ver. 13). We may hazard the conjecture that he reached him in time, and that the last hours of the teacher were soothed by the presence of the disciple whom he loved so truly. Some writers have even seen in Heb. xiii, 23 an indication that he shared Paul's imprisonment, and was released from it by the death of Nero (Conybeare and Howson, ii, 502; Neander, *Pfanz. und Leit.* i, 552). Beyond this all is apocryphal and uncertain.

4. *Legendary Notices.*—Timothy continued, according to the old traditions, to act as bishop of Ephesus (Euseb. *Hist. Eccles.* iii, 4, 2; *Const. Apost.* vii, 46; see Lange, *De Tim. Episcopo Ephes.* [Lips. 1755]), and died a martyr's death under Domitian or Nerva (Niceph. *Hist. Eccles.* iii, 11; Photius, *Cod.* 254). The great festival of Artemis (the *karayáyon* of that goddess) led him to protest against the license and frenzy which accompanied it. The mob were roused to fury, and put him to death with clubs (comp. Polycrates and Simeon Metaphr. in Henschen's *Acta Sanctorum*, Jan. 24). Some later critics—Schleiermacher, Mayerhoff—have seen in him the author of the whole or part of the Acts (Olshausen, *Commentar.* ii, 612).

A somewhat startling theory as to the intervening period of his life has found favor with Calmet (a. v. "Timothée"), Tillemont (ii, 147), and others. If he continued, according to the received tradition, to be bishop of Ephesus, then he, and no other, must have been the "angel" of that Church to whom the message of Rev. ii, 1-7 was addressed. It may be urged, as in some degree confirming this view, that both the praise and the blame of that message are such as harmonize with the impressions as to the character of Timothy derived from the Acts and the Epistles. The refusal to acknowledge the self-styled apostles, the abhorrence of the deeds of the Nicolaitans, the unwearied labor, all this belongs to "the man of God" of the Pastoral Epistles. Nor is the faultless characteristic. The strong language of Paul's entreaty would lead us to expect that the temptation of such a man would be to fall away from the glow of his "first love," the zeal of his first faith. The promise of the Lord of the churches is in substance the same as that implied in the language of the apostle (2 Tim. ii, 4-6). This conjecture, it should be added, has been passed over unnoticed by most of the recent commentators on the Apocalypse (comp. Alford and Wordsworth, *ad loc.*). Trench (*Seren Churches of Asia*, p. 64) contrasts the "angel" of Rev. ii with Timothy as an "earlier angel" who, with the generation to which he be-

longed, had passed away when the Apocalypse was written. It must be remembered, however, that, at the time of Paul's death, Timothy was still "young," probably not more than thirty-five; that he might, therefore, well be living, even on the assumption of the later date of the Apocalypse, and that the traditions (*valeant quantum*) place his death after that date. Bengel admits this, but urges the objection that he was not the bishop of any single diocese, but the superintendent of many churches. This, however, may in its turn be traversed by the answer that the death of Paul may have made a great difference in the work of one who had hitherto been employed in travelling as his representative. The special charge committed to him in the Pastoral Epistles might not unnaturally give fixity to a life which had previously been wandering.

An additional fact connected with the name of Timothy is that two of the treatises of the Pseudo-Dionysius the Areopagite are addressed to him (*De Hierarch. Cæl. i. 1*; comp. *Le Nourry, Dissert. c. ix*, and *Halloix, Quæst. iv* in Migne's edition).

5. *Literature*.—In addition to the works above cited, see Klaufing, *De Tim. Magrup.* (Vitemb. 1718); Seelen, *De Tim. Confessore* (Lubec. 1738); Hausdorf, *De Ordinatione Tim.* (Vitemb. 1754); Witsius, *Miscell. Sacr. ii. 438*; also his *Exercit. Acad. p. 316 sq.*; Mosheim, *Einleit. in den 1. Br. an Tim.* (Hamb. 1754), p. 4 sq.; Bertholdt, *Einleit. vi. 349 sq.*; Heydenreich, *Leben d. Timotheus*, in *Tzschirner's Memorab. VIII. ii. 19-76*; Evans, *Script. Biog.* vol. i; Lewin, *St. Paul* (see Index); Plumptre, *Bible Educator* (see Index); and especially Howson, *Companions of St. Paul* (Lond. 1871), ch. xii. See PAUL.

TIMOTHY, FIRST EPISTLE TO. This is the first of the so-called *Pastoral Epistles* of Paul, and therefore in treating it we shall adduce many points, especially those relating to its authenticity, etc., which are applicable to two, and indeed to all three, of them. See PAUL.

1. *Authorship*.—The question whether these epistles were written by Paul was one to which, till within the last half-century, hardly any answer but an affirmative one was thought possible. They are found ascribed to Paul in the Peshito version (2d century), in the Muratorian fragment, and in the catalogue of Eusebius, who places them among the *ὁμολογούμενα*. The catalogues of Athanasius, of the Laodicean Council (364), of Cyril, of Epiphanius, and of Jerome contain them, and ascribe them to the apostle. Reminiscences of 1 Tim. occur in Clem. Rom. (*Epist. 1 Cor. xix*): "Let us draw nigh to him; . . . lifting up pure and undefiled hands" (comp. 1 Tim. ii. 8); in Polycarp (*Ad Philippen. c. 4*): "The root of all evils is covetousness. Knowing that we brought nothing into this world, and can carry nothing out, let us put on the armor of righteousness" (comp. 1 Tim. vi. 7, 10); and in the letter of the Church at Vienna and Lyons: "But the fury of the enemy chiefly fell on Attalus, a 'pillar and ground' of our Church" (Eusebius, *Hist. Eccles. v. 1*; comp. 1 Tim. iii. 15). To 2 Tim. Ignatius seems to allude when he writes to Polycarp (c. 6), "Please him whose soldiers ye are, and from whom you receive pay" (comp. 2 Tim. ii. 4); and Polycarp (*Ad Philippen. c. 5*): "He has promised us that if we walk worthily of him, we shall reign with him" (comp. 2 Tim. ii. 11, 12). To the epistle to Titus Ignatius alludes (*Ad Trall. c. 8*): "Whose behavior is itself a great lesson of instruction." (The word for "behavior," *καταρτηρία*, occurs in the New Test. only in Tit. ii. 8). Likewise Clem. Rom. (*Ep. i. 2*): "Ye were ready for every good work" (comp. Tit. iii. 1). To 1 Tim. we have direct testimony in Irenæus (*Adv. Hær. i. 1, 1*): "They introduce vain genealogies, which, as the apostle says, 'minister' questions, rather than godly edifying, which is in faith" (comp. 1 Tim. i. 4); in Clem. Alex. (*Strom. ii. 383*): "Concerning which the apostle writing says, 'O Timothy, keep that which is committed to thee'" (comp. 1 Tim. vi. 20, 21); and in Tertull. (*De Præscrip. Hæret. c. 25*): "And this word Paul has used to Timothy, 'O Timothy, keep the deposit'" (comp.

*ibid.*). To 2 Tim. in Irenæus (*Adv. Hær. iii. 8, 3*): "The apostles delivered the episcopate to Linus; . . . of which Linus Paul makes mention in those epistles which he wrote to Timothy" (comp. 2 Tim. iv. 21); and in Tertull. (*Scorp. c. 18*): "Exulting (i. e. Paul) in the prospect of it, he writes to Timothy, 'I am poured out as a drink-offering; and the time of my departure is at hand'" (comp. 2 Tim. iv. 6). To the epistle to Titus in Irenæus (*Adv. Hær. iii. 3, 4*): "The apostles would not even in word communicate with those who adulterated the truth, as Paul says, 'A heretic after the first admonition reject, knowing that such a one is perverse'" etc. (comp. Tit. iii. 10, 11); in Clem. Alex. (*Admon. ad Gent. p. 6*): "For as that divine apostle of the Lord says, 'The saving grace of God hath appeared unto all men,'" etc. (comp. Tit. ii. 11-13); and in Tertull. (*De Præsc. c. 6*): "Paul, . . . who suggests that 'a heretic after the first admonition is to be rejected as perverse'" (comp. Tit. iii. 10). See also Tertull. (*Ad Uxorem. i. 7*), Irenæus (*Adv. Hær. iv. 16, 3*; ii. 14, 8). Parallelisms, implying quotation, in some cases with close verbal agreement, are found likewise in Ignatius, *Ad Magn. c. 8* (1 Tim. i. 4); Polycarp, c. 4 (comp. 1 Tim. vi. 7, 8); Theophilus of Antioch, *Ad Autol. iii. 126* (comp. 1 Tim. ii. 1, 2). Later testimony is so abundant that it is needless to adduce it. Thus the external testimony, indirect and direct, to the three epistles is, so far as the Church is concerned, as strong as to any portion of Scripture. It must not be concealed that they were rejected by some of the Gnostic heretics, as Marcion and Basilides (see Tertull. *Adv. Mar. v. 21*; Jerome, *Prolog. ad Tit.*). Tatian accepted the Epistle to Titus, but rejected those to Timothy. The contents of the epistles sufficiently account for the repugnance of the Gnostic teachers to admit their genuineness. Origen mentions (*Comment. in Matt. p. 117*) some who rejected 2 Tim. on account of the allusion to the apocryphal story of Jannes and Jambres (iii. 8), which they considered unworthy of an apostle.

The Pastoral Epistles have, however, been subjected to a more elaborate scrutiny by the criticism of Germany. The first doubts were uttered by J. C. Schmidt. These were followed by the *Sendschreiben* of Schleiermacher, who, assuming the genuineness of 2 Tim. and Titus, undertook, on that hypothesis, to prove the spuriousness of 1 Tim. Bolder critics saw that the position thus taken was untenable, that the three epistles must stand or fall together. Eichhorn (*Einleit. iii*) and De Wette (*Einleit.*) denied the Pauline authorship of all three. There was still, however, an attempt to maintain their authority as embodying the substance of the apostle's teaching, or of letters written by him, on the hypothesis that they had been sent forth after his death by some over-zealous disciple, who wished, under the shadow of his name, to attack the prevailing errors of the time (Eichhorn, *ibid.*). One writer (Schott, *Isagoge Hist.-crit. p. 324*) ventures on the hypothesis that Luke was the writer. Baur (*Die sogenannten Pastoral-Briefe*), here as elsewhere more daring than others, assigns them to no earlier period than the latter half of the 2d century, after the death of Polycarp in A.D. 167 (p. 188). On this hypothesis 2 Tim. was the earliest, 1 Tim. the latest of the three, each probably by a different writer (p. 72-76). They grew out of the state of parties in the Church of Rome, and, like the Gospel of Luke and the Acts, were intended to mediate between the extreme Pauline and the extreme Petrine sections of the Church (p. 58). Starting from the data supplied by the Epistle to the Philippians, the writers, first of 2 Tim., then of Titus, and lastly of 1 Tim., aimed, by the insertion of personal incidents, messages, and the like, at giving to their compilations an air of verisimilitude (p. 70). It will be seen from the above statement that the question of authorship is here more than usually important. There can be no solution as regards these epistles like that of an obviously dramatic and therefore legitimate personation of character, such as is possible in rela-

tion to the authorship of Ecclesiastes. If the Pastoral Epistles are not Pauline, the writer clearly meant them to pass as such, and the *animus decipiendi* would be there in its most flagrant form. They would have to take their place with the Pseudo-Clementine Homilies, or the Pseudo-Ignatian Epistles. Where we now see the traces, full of life and interest, of the character of "Paul the aged," firm, tender, zealous, loving, we should have to recognise only the tricks, sometimes skillful, sometimes clumsy, of some unknown and dishonest controversialist. Consequences such as these ought not, it is true, to lead us to suppress or distort one iota of evidence. They may well make us cautious, however, in examining the evidence, not to admit conclusions that are wider than the premises, nor to take the premises themselves for granted. The task of examining is rendered in some measure easier by the fact that, in the judgment of most critics, hostile as well as friendly, the three Pastoral Epistles stand on the same ground. The intermediate hypotheses of Schleiermacher (*supra*) and Credner (*Einleit. ins N. T.*), who looks on Titus as genuine, 2 Tim. as made up out of two genuine letters, and 1 Tim. as altogether spurious, may be dismissed as individual eccentricities, hardly requiring a separate notice. In dealing with objections which take a wider range, we are meeting those also which are confined to one or two out of the three epistles.

(1.) *Objections to these Epistles in General.*—The chief elements of the alleged evidence of spuriousness in the three Pastoral Epistles may be arranged as follows:

1. *Language.*—The style, it is urged, is different from that of the acknowledged Pauline Epistles. There is less logical continuity, a want of order and plan, subjects brought up, one after the other, abruptly (Schleiermacher). Not less than fifty words, most of them striking and characteristic, are found in these epistles which are not found in Paul's writings (see the list in Conybeare and Howson, App. I, and Huther, *Einleit.*). The formula of salutation (*χρῆς, ἔλεος, εἰρήνη*), half-technical words and phrases like *ἐνδοξία* and its cognates (1 Tim. ii, 2; iii, 16; vi, 6 *et al.*), *παρκαταθήκη* (i, 18; vi, 20; 2 Tim. i, 12, 14; ii, 2), the frequently recurring *παρὸς ὁ λόγος* (1 Tim. i, 15; iii, 1; iv, 9; 2 Tim. ii, 11), the use of *ὀφθαλμοὺς* as the distinctive epithet of a true teaching—these and others like them appear here for the first time (Schleiermacher and Baur). Some of these words, it is urged, *φανερῶν, ἐπιφάνεια, σωτήρ, φῶς ἀπρόσβον*, belong to the Gnostic terminology of the 2d century.

On the other side it may be said (1) that there is no test so uncertain as that of language and style thus applied; how uncertain we may judge from the fact that Schleiermacher and Neander find no stumbling-blocks in 2 Tim. and Titus, while they detect an un-Pauline character in 1 Tim. A difference like that which marks the speech of men divided from each other by a century may be conclusive against the identity of authorship; but, short of that, there is hardly any conceivable divergence which may not coexist with it. The style of one man is stereotyped, formed early, and enduring long. The sentences move after an unvarying rhythm; the same words recur. That of another changes, more or less, from year to year. As his thoughts expand, they call for a new vocabulary. The last works of such a writer, as those of Bacon and of Burke, may be florid, redundant, figurative, while the earlier were almost meagre in their simplicity. In proportion as the man is a solitary thinker, or a strong assertor of his own will, will he tend to the former state. In proportion to his power of receiving impressions from without, of sympathizing with others, will be his tendency to the latter. Apart from all knowledge of Paul's character, the alleged peculiarities are but of little weight in the adverse scale. With that knowledge we may see in them the natural result of the intercourse with men in many lands, of that readiness to become all things to all men, which could hardly fail to show itself in speech as well as in

action. Each group of his epistles has, in like manner, its characteristic words and phrases. (2.) If this is true generally, it is so yet more emphatically when the circumstances of authorship are different. The language of a bishop's charge is not that of his letters to his private friends. The epistles which Paul wrote to the churches as societies might well differ from those which he wrote, in the full freedom of open speech, to a familiar friend, to his own "true son." It is not strange that we should find in the latter a Luther-like vehemence of expression (e. g. *κεκαυσθησμένων, 1 Tim. iv, 2; διαπατριβαί διεφθαρμένων ἀνθρώπων τὸν νοῦν, vi, 5; σεσωρευμένα ἁμαρτίας, 2 Tim. iii, 6*), mixed sometimes with words that imply that which few great men have been without, a keen sense of humor, and the capacity, at least, for satire (e. g. *γραῶδες μύθους, 1 Tim. iv, 7; φλύαροι καὶ περίεργοι, v, 13; τετάρτοι, vi, 4; γαστέρες ἀργαί, Tit. i, 12*). (3.) Other letters, again, were dictated to an amanuensis. These have every appearance of having been written with his own hand, and this can hardly have been without its influence on their style, rendering it less diffuse, the transitions more abrupt, the treatment of each subject more concise. In this respect it may be compared with the other two autograph epistles, those to the Galatians and Philemon. A list of words given by Alford (vol. iii, *Proleg.* ch. vii) shows a considerable resemblance between the first of these two and the Pastoral Epistles. (4.) It may be added that to whatever extent a forger of spurious epistles would be likely to form his style after the pattern of the recognised ones, so that men might not be able to distinguish the counterfeit from the true, to that extent the diversity which has been dwelt on is, within the limits that have been above stated, not against, but for, the genuineness of these epistles. (5.) Lastly, there is the positive argument that there is a large common element, both of thoughts and words, shared by these epistles and the others. The grounds of faith, the law of life, the tendency to digress and go off at a word, the personal, individualizing affection, the free reference to his own sufferings for the truth, all these are in both, and by them we recognise the identity of the writer. The evidence can hardly be given within the limits of this article, but its weight will be felt by any careful student. The coincidences are precisely those, in most instances, which the forger of a document would have been unlikely to think of, and give but scanty support to the perverse ingenuity which sees in these resemblances a proof of compilation, and therefore of spuriousness.

2. *Chronism.*—It has been urged (chiefly by Eichhorn, *Einleit.* p. 315) against the reception of the Pastoral Epistles that they cannot be fitted into the records of Paul's life in the Acts. To this there is a threefold answer. (1.) The difficulty has been enormously exaggerated. If the dates assigned to them must, to some extent, be conjectural, there are, at least, two hypotheses in each case (*infra*) which rest on reasonably good grounds. (2.) If the difficulty were as great as it is said to be, the mere fact that we cannot fix the precise date of three letters in the life of one of whose ceaseless labors and journeyings we have, after all, but fragmentary records, ought not to be a stumbling-block. The hypothesis of a release from the imprisonment with which the history of the Acts ends removes all difficulties; and if this be rejected (Baur, p. 67), as itself not resting on sufficient evidence, there is, in any case, a wide gap of which we know nothing. It may at least claim to be a theory which explains phenomena. (3.) Here, as before, the reply is obvious, that a man composing counterfeit epistles would have been likely to make them square with the acknowledged records of the life.

3. *Ecclesiasticism.*—The three epistles present, it is said, a more developed state of Church organization and doctrine than that belonging to the lifetime of Paul. (1.) The rule that the bishop is to be "the husband of

one wife" (1 Tim. iii, 2; Tit. i, 6) indicates the strong opposition to second marriages which characterized the 2d century (Baur, p. 113-120). (2.) The "younger widows" of 1 Tim. v, 11 cannot possibly be literally widows. If they were, Paul, in advising them to marry, would be excluding them, according to the rule of 1 Tim. v, 9, from all chance of sharing in the Church's bounty. It follows, therefore, that the word *χήραι* is used, as it was in the 2d century, in a wider sense, as denoting a consecrated life (Baur, p. 42-49). (3.) The rules affecting the relation of the bishops and elders indicate a hierarchic development characteristic of the Petrine element, which became dominant in the Church of Rome in the post-apostolic period, but foreign altogether to the genuine epistles of Paul (Baur, p. 80-89). (4.) The term *αἰρετικός* is used in its later sense, and a formal procedure against the heretic is recognised, which belongs to the 2d century rather than the first. (5.) The upward progress from the office of deacon to that of presbyter, implied in 1 Tim. iii, 13, belongs to a later period (Baur, *loc. cit.*). (6.) On 2 Tim. i, 6; ii, 2, see below.

It is not difficult to meet objections which contain so large an element of mere arbitrary assumption. (1.) Admitting Baur's interpretation of 1 Tim. iii, 2 to be the right one, the rule which makes monogamy a condition of the episcopal office is very far removed from the harsh, sweeping censures of all second marriages which we find in Athenagoras and Tertullian. (2.) There is not a shadow of proof that the "younger widows" were not literally such. The *χήραι* of the Pastoral Epistles are, like those of Acts vi, 1; ix, 39, women dependent on the alms of the Church, not necessarily deaconesses, or engaged in active labors. The rule fixing the age of sixty for admission is all but conclusive against Baur's hypothesis. (3.) The use of *ἐπίσκοποι* and *πρεσβύτεροι* in the Pastoral Epistles as equivalent (Tit. i, 5, 7), and the absence of any intermediate order between the bishops and deacons (1 Tim. iii, 1-8), are quite unlike what we find in the Ignatian Epistles and other writings of the 2d century. They are in entire agreement with the language of Paul (Acts xx, 17, 28; Phil. i, 1). Few features of these epistles are more striking than the absence of any high hierarchic system. (4.) The word *αἰρετικός* has its counterpart in the *αἰρέσεις* of 1 Cor. xi, 19. The sentence upon Hymeneus and Alexander (1 Tim. i, 20) has a precedent in that of 1 Cor. v, 5. (5.) The best interpreters do not see in 1 Tim. iii, 13 the transition from one office to another (comp. Ellicott, *ad loc.*, and see DEACON). If it is there, the assumption that such a change is foreign to the apostolic age is entirely an arbitrary one.

4. *Heresiology*.—Still greater stress is laid on the indications of a later date in the descriptions of the false teachers noticed in the Pastoral Epistles. These point, it is said, unmistakably to Marcion and his followers. In the *ἀντιθέσεις τῆς ψευδωνύμου γνώσεως* (1 Tim. vi, 20) there is a direct reference to the treatise which he wrote under the title of *Ἀντιθέσεις*, setting forth the contradiction between the Old and New Test. (Baur, p. 26). The "genealogies" of 1 Tim. i, 4; Tit. iii, 9 in like manner point to the sons of the Valentinians and Ophites (*ibid.* p. 12). The "forbidding to marry, and commanding to abstain from meats," fits in to Marcion's system, not to that of the Judaizing teachers of Paul's time (*ibid.* p. 24). The assertion that "the law is good" (1 Tim. i, 8) implies a denial, like that of Marcion, of its divine authority. The doctrine that the "resurrection was past already" (2 Tim. ii, 18) was thoroughly Gnostic in its character. In his eagerness to find tokens of a later date everywhere, Baur sees in the writer of these epistles not merely an opponent of Gnosticism, but one in part infected with their teaching, and appeals to the doxologies of 1 Tim. i, 17; vi, 15, and their Christology throughout, as having a Gnostic stamp on them (p. 28-33).

Carefully elaborated as this part of Baur's attack has been, it is, perhaps, the weakest and most capricious of

all. The false teachers of the Pastoral Epistles are predominantly Jewish, *νομοδιδάσκαλοι* (1 Tim. i, 7), belonging altogether to a different school from that of Marcion, giving heed to "Jewish fables" (Tit. i, 4) and "disputes connected with the law" (iii, 9). Of all monstrosities of exegesis few are more wilful and fantastic than that which finds in *νομοδιδάσκαλοι* Antinomian teachers, and in *μαχαί νομikai* Antinomian doctrine (Baur, p. 17). The natural suggestion that in Acts xx, 30, 31 Paul contemplates the rise and progress of a like perverse teaching; that in Col. ii, 8-23 we have the same combination of Judaism and a self-styled *γνώσις* (1 Tim. vi, 20) or *φιλοσοφία* (Col. ii, 8), leading to a like false asceticism, is set aside summarily by the rejection both of the speech and the epistle as spurious. Even the denial of the resurrection, we may remark, belongs as naturally to the mingling of a Sadducean element with an Eastern mysticism as to the teaching of Marcion. The self-contradictory hypothesis that the writer of 1 Tim. is at once the strongest opponent of the Gnostics, and that he adopts their language, need hardly be refuted. The whole line of argument, indeed, first misrepresents the language of Paul in these epistles and elsewhere, and then assumes the entire absence from the 1st century of even the germs of the teaching which characterized the 2d (comp. Neander, *Pfanz. und Leit.* i, 401; Heydenreich, p. 64).

(II.) *Special Objections to the First Epistle*.—The most prominent of these are the following: 1. That it presents Timothy in a light in which it is inconsistent with other notices of him in Paul's epistles to regard him. Here he appears as little better than a novice, needing instruction as to the simplest affairs of ecclesiastical order; whereas in the First Epistle to the Corinthians, written earlier than this, we find him (iv, 17) described by Paul as "My beloved son, and faithful in the Lord, who shall bring you into remembrance of my ways which be in Christ, as I teach everywhere in every Church;" and in 1 Thess. i, 1-3 we are told that the apostle had sent him to Thessalonica to establish the believers there, and to comfort them concerning their faith. If Timothy was so well able to regulate the churches at Corinth and Thessalonica, how, it is asked, can it be supposed that a short while afterwards he should require such minute instructions for his conduct as this epistle contains? To this it may be replied, (1) that in visiting Corinth and Thessalonica Timothy acted as the apostle's delegate, and had, doubtless, received from him minute instructions as to how he should proceed among those to whom he was sent; so that the alleged difference in the circumstances of Timothy when sent to Corinth and when left in Ephesus disappears; (2) that it does not necessarily follow from the injunctions given to Timothy in this epistle that the writer regarded him as a novice, for they rather respect the application of general principles to peculiar local circumstances than set forth instructions such as a novice would require; and (3) it is not to be forgotten that the apostle designed through Timothy to present to the Church at large a body of instruction which should be useful to it in all ages of its existence.

2. It is objected that after the Church at Ephesus had enjoyed the apostle's instructions and presidency for three years it could not have been, at the time this epistle is supposed to have been written by Paul, in such ignorance of ecclesiastical arrangements as the injunctions here given would lead us to suppose. But what is there in the epistle that necessitates such a supposition? It contains many directions to Timothy how he should conduct himself in a church, some of which are certainly of an elementary character, but there is nothing that leads to the conclusion that they were *all* intended for the benefit of the Church at Ephesus, or that the state of that Church was such as to require that injunctions of this kind should be given for its sake alone. Timothy's sphere of evangelistic effort extended greatly beyond Ephesus; and this epistle was

designed at once to guide him as to what he was to do in the churches which he might be called to regulate, and to supply his authority for so doing. Besides, does it not naturally occur that such minute injunctions are just such as a person forging this epistle at a later period in Paul's name would be most likely to avoid?

3. The absence of allusions to events in Timothy's history has been alleged against the Pauline origin of this epistle. A strange objection—and as untenable as strange! This may be seen by a reference to the following passages: i, 18; iv, 14; v, 23; vi, 12.

4. It is alleged that the writer of this epistle has made such a mistake as Paul could not have made when he classes Alexander with Hymeneus (1 Tim. i, 20) as a false Christian, whereas we know from 2 Tim. iv, 14 that he was not a Christian at all. But where is the shadow of evidence that the Alexander mentioned in 1 Tim. i, 20 is the same person with the Alexander mentioned in 2 Tim. iv, 14? Was this name so uncommon in Ephesus that we must needs suppose a blunder where a writer speaks of one so called as a heretic simply because, in other passages, mention is made of one so called who was not a heretic? Nothing can be more obvious than that there were two Alexanders, just as there might have been twenty, known to the apostle and Timothy; and that of these two one was a heretic and troubler of the Church at Ephesus, and the other probably a heathen and an enemy of the apostle.

5. In 1 Tim. i, 20 mention is made of Hymeneus as a heretic whom the writer makes Paul say he had excommunicated; but this is a mistake, for in 2 Tim. ii, 17 we find Hymeneus still a member of the Church at Ephesus, and such a mistake could not have been made by Paul. Here, however, it is assumed without proof (1) that the Hymeneus of the one epistle is the same as the Hymeneus of the other; (2) that, being the same, he was still a member of the same Church; and (3) that it was impossible for him, though excommunicated, to have returned as a penitent to the Church and again to have become a plague to it. Here are three hypotheses on which we may account for the fact referred to, and, until they be all excluded, it will not follow that any blunder is chargeable upon the writer of this epistle.

6. In 1 Tim. vi, 13 the writer refers to our Lord's good confession before Pontius Pilate. Now of this we have a record in John's Gospel; but, as this was not written in Paul's time, it is urged that this epistle must be ascribed to a later writer. It is easy to obviate any force that may appear to be in this remark by the consideration that all the prominent facts of our Lord's life, and especially the circumstances of his death, were familiarly known by oral communication to all the Christians before the gospels were written. Though, then, John's gospel was not extant in Paul's time, the facts recorded by John were well known, and might therefore be very naturally referred to in an epistle from one Christian to another. Of our Lord's confession before Pilate we may readily suppose that Paul, the great advocate of the spirituality of the Messiah's kingdom, was especially fond of making use.

7. The writer of this epistle, it is affirmed, utters sentiments in favor of the law which are not Pauline, and teaches the efficacy of good works in such a way as to be incompatible with Paul's doctrine of salvation by grace. This assertion we may safely meet with a pointed denial. The doctrine of this epistle concerning the law is that it is good if it be used *νομίμως*, as a law, for the purposes which a moral law is designed to serve; and what is this but the doctrine of the epistles to the Romans and Galatians, where the apostle maintains that in itself and for its own ends the divine law is holy, just, and good, and becomes evil only when put out of its proper place and used for purposes it was never designed to serve (Rom. vii, 7-12; Gal. iii, 21, etc.). What the writer here teaches concerning good works

is also in full harmony with the apostle Paul's teaching in his acknowledged epistles (comp. Rom. xii; Eph. v and vi, etc.); and if in this epistle there is no formal exposition of the Gospel scheme, but rather a dwelling upon practical duties, the reason may easily be found in the peculiar character of this as a pastoral epistle—an epistle of official councils and exhortations to a minister of Christianity.

8. De Wette asserts that 1 Tim. iii, 16 bears marks of being a quotation from a confession or symbol of the Church, of which there were none in Paul's day. But what marks of this does the passage present? The answer is, the use of the word *ὁμολογουμένως*, a technical word, and the word used by the ecclesiastical writers to designate something in accordance with orthodox doctrine. This is true; but, as technical words are first used in their proper sense, and as the proper sense of *ὁμολογουμένως* perfectly suits the passage in question, there is no reason for supposing any such later usage as De Wette suggests. Besides, his argument tells both ways, for one may as well assert that the ecclesiastical usage arose from the terms of this passage as affirm that the terms of this passage were borrowed from ecclesiastical usage.

9. The writer of this epistle quotes as a part of Scripture a passage which occurs only in Luke x, 7; but as Luke had not written his gospel at the time Paul is supposed to have written this epistle, and as it is not the habit of the New-Test. writers to quote from each other in the way they quote from the Old Test., we are bound to suppose that this epistle is the production of a later writer. But does this writer quote Luke x, 7 in the manner alleged? The passage referred to is in v, 18, where we have first a citation from Deut. xxv, 4, introduced by the usual formula, "The Scripture saith;" and then the writer adds, as further confirmatory of his position, the saying of our Lord which is supposed to be quoted from Luke's gospel. Now we are not bound to conclude that this latter was adduced by the writer as a part of Scripture. It may be regarded as a remark of his own, or as some proverbial expression, or as a well-known saying of Christ's, by which he confirms the doctrine he is establishing. We are under no necessity to extend the formula with which the verse is commenced so as to include in it all that the verse contains. The *καί* by itself will not justify this; indeed, we may go further, and affirm that the use of *καί* alone rather leads to an opposite conclusion, for had the writer intended the latter clause to be regarded as a quotation from Scripture as well as the former, he would probably have used some such formula as *καί παλιν* (comp. Heb. ii, 13).

10. De Wette maintains that the injunction in v, 23 is so much beneath the dignity of an apostle that we cannot suppose it to have proceeded from such a writer as Paul. But what is there in such an injunction less dignified than in many injunctions of an equally familiar nature scattered through Paul's epistles? And in what is it incompatible with the apostolic character that one sustaining it should enjoin upon a young, zealous, and active preacher, whom he esteemed as his own son, a careful regard to his health; the more especially when, by acting as is here enjoined, he would vindicate Christian liberty from those ascetic restraints by which the false teachers sought to bind it?

(III.) *Special Objections to the Second Epistle.*—Of these the most weighty are founded on the assumption that this epistle must be viewed as written during the apostle's first imprisonment at Rome; and as, for reasons to be subsequently stated, we do not regard this assumption as tenable, it will not be necessary to occupy space with any remarks upon them. We may leave unnoticed also those objections to this epistle which are mere repetitions of those urged against the first, and which admit of similar replies.

1. In iii, 11, the writer enumerates a series of persecutions and afflictions which befell him at Antioch

Iconium, and Lystra, of which he says Timothy knew. Would Paul, it is asked, in making such an enumeration, have committed the mistake of referring to persecutions which he had endured *before* his connection with Timothy, and have said nothing of those which he endured *subsequently*, and of which Timothy *must* have known, while of the former he *might* be ignorant? But there is no mistake in the matter. Paul has occasion to refer to the knowledge Timothy had of his sufferings for the Gospel. Of these some had occurred before Timothy's connection with him, while others had occurred while Timothy was his companion and fellow-sufferer. Of the latter, therefore, Paul makes no specific mention, feeling that to be unnecessary; but of the former, of which Timothy could know only by hearsay, but of which he no doubt did know, for we cannot conceive that any interesting point in Paul's previous history would be unknown to his "dear son in the faith," he makes specific enumeration. This fully accounts for his stopping short at the point where Timothy's personal experience could amply supply the remainder.

2. The declaration in iv, 7, etc., is incompatible with what Paul says of himself in Phil. iii, 12, etc. But respect must be had to the very different circumstances in which the apostle was when he wrote these two passages. In the one case he viewed himself as still engaged in active work, and having the prospect of service before him; in the other he regards himself as very near to death, and shortly about to enter into the presence of his master. Surely the same individual might in the former of these cases speak of work yet to do, and in the latter of his work as done, without any contradiction.

3. In i, 6 and ii, 2 there are pointed allusions to ecclesiastical ceremonies which betray a later age than that of Paul. This is said without reason. The laying-on of hands in the conferring of a *χρίσμα* was altogether an apostolic usage; and the hearing of Paul's doctrines was what Timothy, as his companion in travel, could easily enjoy, without our needing to suppose that the apostle is here represented as acting the part of professor in a school of theology.

Full particulars on this discussion will be found in the introductions of Alford, Wordsworth, Huther, Davidson, Wiesinger, and Hug. Conybeare and Howson (App. I) give a good tabular summary both of the objections to the genuineness of the epistles and of the answers to them, and a clear statement in favor of the later date. The most elaborate argument in favor of the earlier is to be found in Lardner, *History of Apost. and Evang. (Works, vi, 315-375)*. See also the introductions of Hänlein, Michaelis, Eichhorn, De Wette, Bertholdt, Guericke, Schott, etc.; Schleiermacher, *Ueber den sogenannten ersten Brief des Paulus an den Timotheos, ein kritisches Sendschreiben an J. C. Gass* (Berl. 1807, 12mo); Planck, *Bemerkungen über d. ersten Paulin. Brief an d. Tim.* (Gött. 1808, 8vo); Beckhaus, *Specimen Obs. Crit.-exeget. de Vocabulis ἱππάζ λεγομένων in I. ad Tim. Ep. Paulinā obviis, Authentici ejus nihil detrahentibus* (Lingæ, 1810, 8vo); Curtius, *De Tempore quo prior Pauli ad Tim. Epist. exarata sit* (Berol. 1828, 8vo); Otto, *Die geschichtl. Verhältnisse der Past.-Briefe* (Leips. 1860, 8vo).

II. *Date*.—The direct evidence on this point is very slight. (a.) i, 3 implies a journey of Paul from Ephesus to Macedonia, Timothy remaining behind. (b.) The age of Timothy is described as *νεότης* (iv, 12). (c.) The general resemblance between the two epistles indicates that they were written at or about the same time. Three hypotheses have been maintained as fulfilling these conditions.

1. *The journey in question has been looked upon as an unrecorded episode in the two years' work at Ephesus* (Acts xix, 10). This conjecture has the merit of bringing the epistle within the limit of the authentic records of Paul's life, but it has scarcely any other. Against it we may urge that a journey to Macedonia would

hardly have been passed over in silence either by Luke in the Acts, or by Paul himself in writing to the Corinthians. Indeed, the theory of unrecorded travels of this kind is altogether gratuitous. There is no period after the formal appointment of Paul as a missionary during which it was possible, so fully have we the itinerary of the apostle; unless, indeed, it be the long residence in Ephesus, that favorite resort of theorists as to imaginary journeys; and so entirely was Paul occupied with local labors there that it is wholly excluded even at that time.

2. *This journey has been identified with the journey after the tumult at Ephesus* (Acts xx, 1). Against this conjecture is the palpable fact that Timothy, instead of remaining at Ephesus when the apostle left, had gone on into Macedonia before him (xix, 22). The hypothesis of a possible return is traversed by the fact that he was with Paul in Macedonia at the time when 2 Cor. was written and sent off. To obviate this objection, it has been suggested that Paul might have written this epistle immediately after leaving Ephesus, and the second to the Corinthians not before the concluding period of his stay in Macedonia; so that Timothy might have visited him in the interval. This appears to remove the difficulty, but it does so by suggesting a new one; for how, on this supposition, are we to account for the apostle's delaying so long to write to the Corinthians after the arrival of Titus, by whose intelligence, concerning the state of the Corinthian Church, Paul was led to address them? It may be asked, also, if it be likely that Timothy, after receiving such a charge as Paul gives him in this epistle, would so soon have left Ephesus and followed the apostle.

An attempt has been made by Otto (*Die geschichtl. Verhält.* p. 28 sq.) to avoid the difficulty in 1 Tim. i by translating it thus, "As I in Ephesus exhorted thee to stand fast, so do thou, as thou goest to Macedonia, enjoin on some not to adhere to strange doctrines," etc. The passage is thus made to refer to Timothy's going to Macedonia, not to the apostle's, and the occasion of his going is referred to the journey mentioned (Acts xix, 21, 22), with which the visit to Corinth mentioned (1 Cor. iv, 17; xvi, 10), is made to synchronize. The date of 1 Tim. is thus placed *before* that of 1 Cor. All this, however, rests on a rendering of 1 Tim. i, 3 which, in spite of much learned disquisition, its author has failed to vindicate.

3. *The journey in question has been placed in the interval between Paul's first and second imprisonments at Rome*. In favor of this conjecture as compared with the preceding is the internal evidence of the contents of the epistle. The errors against which Timothy is warned are present, dangerous, portentous. At the time of Paul's visit to Miletus in Acts xx, i. e., according to those hypotheses, subsequent to the epistle, they are still only looming in the distance (ver. 30). All the circumstances referred to, moreover, imply the prolonged absence of the apostle. Discipline had become lax, heresies rife, the economy of the Church disordered. It was necessary to check the chief offenders by the sharp sentence of excommunication (1 Tim. i, 20). Other churches called for his counsel and directions, or a sharp necessity took him away, and he hastens on, leaving behind him, with full delegated authority, the disciple in whom he most confided. The language of the epistle also has a bearing on the date. According to the two preceding hypotheses, it belongs to the same periods as 1 and 2 Cor. and the Epistle to the Romans, or, at the latest, to the same group as Philippians and Ephesians; and in this case the differences of style and language are somewhat difficult to explain. Assume a later date, and then there is room for the changes in thought and expression which, in a character like Paul's, were to be expected as the years went by.

The objections to the position thus assigned are the following: (1.) The second imprisonment itself is not a matter of history. We have elsewhere, however,

adduced the evidence as being entirely satisfactory. See PAUL. (2.) As the evidence that the apostle took such a journey between his first and second imprisonment is purely hypothetical and inferential, it must be admitted that the hypothesis built upon it as to the date of this epistle rests at the best on somewhat precarious grounds. On the other hand, we know that the apostle did purpose extended tours on his contemplated release from the first imprisonment (Rom. xv, 23, 24), and that these embraced Asia Minor (Philem. 22), as well as Crete (Tit. i, 5). (3.) This hypothesis is directly opposed to the solemn declaration of Paul to the elders of the Church at Ephesus when he met them at Mile-tum, "I know that ye all shall see my face no more" (Acts xx, 25), for it assumes that he did see them again and preached to them. But Paul was not infallible in his anticipations, and we have positive evidence that he did revisit Ephesus (2 Tim. iv, 12; comp. 13, 20). (4.) It is opposed by what Paul says (ver. 12), from which we learn that at the time this epistle was written Timothy was in danger of being despised as a youth; but this could hardly be said of him after Paul's first imprisonment, when he must, on the lowest computation, have been thirty years of age. In reply to this, it is sufficient to say that this was young enough for one who was to exercise authority over a whole body of bishop-presbyters, many of them older than himself (v, 1). (5.) This hypothesis seems to assume the possibility of churches remaining in and around Ephesus in a state of defective arrangement and order for a greater length of time than we can believe to have been the case. But arguments of this kind are highly insecure, and cannot weigh against historical statements and inferences. On the whole, therefore, we decidedly incline to this position for the journey in question.

The precise date of the first epistle we have, nevertheless, no means of fixing. In Phil. ii, 24 the apostle expresses a hope of visiting that Church shortly. Carrying out this intention, he would, after his liberation, proceed to Macedonia, whence we must suppose him passing into Asia, and visiting Ephesus (A.D. 60). Thence he may have taken his proposed journey to Spain (Rom. xv, 24, 28), unless he took advantage of his proximity to the West to do so direct from Rome. After this, and not long before his martyrdom (A.D. 64), this epistle seems to have been written.

III. *Place*.—In this respect, as in regard to time, 1 Tim. leaves much to conjecture. The absence of any local reference but that in i, 3 suggests Macedonia or some neighboring district. In A and other MSS. in the Peshito, Ethiopic, and other versions, Laodicea is named in the inscription as the place whence it was sent; but this appears to have grown out of a traditional belief resting on very insufficient grounds (and incompatible with the conclusion which has been adopted above) that this is the epistle referred to in Col. iv, 16 as that from Laodicea (Theophyl. *ad loc.*). The Coptic version, with as little likelihood, states that it was written from Athens (Huther, *Einleit.*).

IV. *Object and Contents*.—The design of the first epistle is partly to instruct Timothy in the duties of that office with which he had been intrusted, partly to supply him with credentials to the churches which he might visit, and partly to furnish through him guidance to the churches themselves.

It may be divided into three parts, exclusive of the introduction (i, 1, 2) and the conclusion (vi, 20, 21). In the first of these parts (i, 3–20) the apostle reminds Timothy generally of his functions, and especially of the duties he had to discharge in reference to certain false teachers, who were anxious to bring the believers under the yoke of the law. In the second (ii–vi, 2) he gives Timothy particular instructions concerning the orderly conducting of divine worship, the qualifications of bishops and deacons, and the proper mode of behaving himself in a church. In the third (vi, 3–19) the apostle discourses against some vices to which the Christians at Ephesus seem to have been prone.

V. *Structure and Characteristics*.—The peculiarities of language, so far as they affect the question of authorship, have already been noticed. Assuming the genuineness of the epistles, some characteristic features common to them both remain to be noticed.

1. The ever-deepening sense in Paul's heart of the Divine Mercy, of which he was the object, as shown in the insertion of *ἀλως* in the salutations of both epistles, and in the *ἡλεῖσθην* of 1 Tim. i, 13.

2. The greater abruptness of the second epistle. From first to last there is no plan, no treatment of subjects carefully thought out. All speaks of strong overflowing emotion, memories of the past, anxieties about the future.

3. The absence, as compared with Paul's other epistles, of Old-Test. references. This may connect itself with the fact just noticed, that these epistles are not argumentative, possibly also with the request for the "books and parchments" which had been left behind (2 Tim. iv, 13). He may have been separated for a time from the *ἱερὰ γράμματα*, which were commonly his companions.

4. The conspicuous position of the "faithful sayings" as taking the place occupied in other epistles by the Old-Test. Scriptures. The way in which these are cited as authoritative, the variety of subjects which they cover, suggest the thought that in them we have specimens of the prophecies of the Apostolic Church which had most impressed themselves on the mind of the apostle, and of the disciples generally. 1 Cor. xiv shows how deep a reverence he was likely to feel for such spiritual utterances. In 1 Tim. iv, 1 we have a distinct reference to them.

5. The tendency of the apostle's mind to dwell more on the universality of the redemptive work of Christ (1 Tim. ii, 3–6; iv, 10); his strong desire that all the teaching of his disciples should be "sound" (*ὀρθαίνουσα*), commending itself to minds in a healthy state; his fear of the corruption of that teaching by morbid subtleties.

6. The importance attached by him to the practical details of administration. The gathered experience of a long life had taught him that the life and well-being of the Church required these for its safeguards.

7. The recurrence of doxologies (1 Tim. i, 17; vi, 15, 16; 2 Tim. iv, 18), as from one living perpetually in the presence of God, to whom the language of adoration was as his natural speech.

VI. *Commentaries*.—The following are the exegetical helps on both epistles to Timothy exclusively; to a few of the most important of which we prefix an asterisk: Megander, *Expositio* [includ. Tit.] (Basil. 1536, 8vo); Wittich, *Expositio* (Argent. 1542, 8vo); Artopæus, *Scholæ* (Stuttg. 1545; Basil. 1546, 8vo); Calvin, *Commentarius* (Genev. 1548, 4to; in French, *ibid.* 1563, fol.; in English by Tomson, Lond. 1579, 4to; by Pringle, Edinb. 1856, 8vo); Alesius, *Disputatio* (Lips. 1550–51, 2 vols. 8vo); D'Espence [Rom. Cath.], *Commentarii* (1st Ep. Lutet. 1561, fol.; 1568, 8vo; 2d Ep. Par. 1564, fol.); Major, *Enarrationes* (Vitemb. 1563–64, 2 vols. 8vo); Hyper, *Commentarii* [includ. Tit. and Philem.] (Tigur. 1582, fol.); Magalian [R. C.], *Commentarii* [includ. Tit.] (Lugd. 1609, 4to); Sotto [R. C.], *Commentarius* (includ. Tit.) (Par. 1610, fol.); Stewart [R. C.], *Commentarius* (Ingolst. 1610–11, 2 vols. 4to); Weinrich, *Commentarius* (Lips. 1618, 4to); Scultetus, *Observationes* [includ. Tit. and Philem.] (Francof. 1624; Vitemb. 1630, 4to); Gerhard, *Annotationes* (Jen. 1643, 1666; Lips. 1712, 4to); Nethen, *Disputatio* (Ultrap. 1655, 4to); Habert [R. C.], *Expositio* [includ. Tit. and Philem.] (Par. 1656, 8vo); Daillé, *Exposition* [French] (Genev. 1659–61, 3 vols. 8vo); Cocceius, *Commentarius* (L. B. 1667, 4to); Gargon, *Oopeninge* (Leyd. 1706, 1719, 4to); Hulse, *Oopeninge* (Rotterd. 1727, 4to); \*Mosheim, *Erklärung* (Hamb. 1755, 4to); Zacharia, *Erklär.* (Leips. 1755, 8vo); Hesse, *Er-läut.* (Gött. 1796, 8vo); \*Heydenreich, *Er-läut.* [includ. Tit.] (Hadam. 1826–28, 2 vols. 8vo); Flatt, *Vorles.* [includ. Tit.] (Tüb. 1831, 8vo); Baumgarten, *Aechtheit*,

etc. (Berl. 1837, 8vo); Leo, *Commentarius* (Lips. 1837-49, 2 vols. 8vo); Matthies, *Erklär.* [includ. Tit.] (Greifsw. 1840, 8vo); Mack [R. C.], *Commentar* [includ. Tit.] (Tüb. 1841, 8vo); \*Scharling, *Untersuch.* etc. (from the Danish, Jen. 1846, 8vo); Paterson, *Commentary* [includ. Tit.] (Lond. 1848, 18mo); Rudow, *De Origine*, etc. (Götting. 1852, 8vo); \*Elliott, *Commentary* [includ. Tit.] (Lond. 1856; Bost. 1866, 8vo); Mangold, *Die Irrlehrer*, etc. (Marb. 1856, 8vo); Vinke, *Ammerkungen* (Utr. 1859, 8vo); \*Otto, *Die Verhältnisse*, etc. (Leips. 1860, 8vo); Beck, *Erklär.* (Leips. 1879, 8vo).

On the first epistle alone there are the following: Cruciger, *Commentarius* (Argent. 1540, 8vo); Phygio, *Explanatio* [includ. Levit.] (Basil. 1543, 4to; 1596, 8vo); Venator, *Distributiones* (ibid. 1553; Lips. 1618, 8vo); Melancthon, *Enarratio* [includ. 2 Tim. i and ii] (Wittemb. 1561, 8vo); Hessels [R. C.], *Commentarius* (Lovan. 1568, 8vo); Chytræus, *Enarratio* (Francof. 1569, 8vo); Daneus, *Commentarius* (Genev. 1578, 8vo); Di-buad, *Commentarius* (Hanov. 1598, 8vo); Meelführer, *Commentarius* [includ. Eph. and Phil.] (Norib. 1628, 4to); Schmid, *Paraphrasis* (Hamb. 1691, 1694, 4to); Fleischmann, *Commentarius* (Tüb. 1795, 8vo); Paulus, *De Tempore*, etc. (Jen. 1799, 4to); Schleiermacher, *Sendschr.* etc. (Berl. 1807, 8vo); Planck, *Bemerk.* etc. (Gött. 1808, 8vo); Beckhaus, *De ἀπαξ λεγόμεν.* etc. (Ling. 1810, 8vo); Wegscheider, *Erklär.* (Gött. 1810, 8vo); Curtius, *De Tempore*, etc. (Berol. 1828, 8vo). See EPISTLE.

**TIMOTHY, SECOND EPISTLE TO.** This follows immediately the first in the New Test. The questions of genuineness and style have already been considered there. As in the case of the first epistle, the chronological questions are the most difficult to answer satisfactorily.

**I. Date.**—It is certain that the second epistle was written while the author was a prisoner (i, 8, 16, 17; ii, 9; iv, 21), at Rome, we may (for the present) assume; but the question arises, was it during his first or his second imprisonment that this took place?

1. In favor of the first, the most weighty consideration arises out of the fact that the apostle appears to have had the same individuals as his companions when he wrote this epistle as he had when he wrote the epistles to the Ephesians, Philippians, and Colossians, and that to Philemon, which we know were written during his first imprisonment at Rome. "At the beginning of the imprisonment," says Hug, who has very forcibly stated this argument in favor of the earlier hypothesis, "when the Epistle to the Ephesians was written, Timothy, who was not one of Paul's companions on the voyage to Italy (Acts xxvii, 2), was not with him at Rome; for Paul does not add his name in the address with which the epistle commences, as he always did when Timothy was at his side. Timothy afterwards arrived; and, accordingly, at the outset of the epistles to the Colossians and Philemon, his name appears with the apostle's (Col. i, 1; Philem. 1); secondly, Luke was in Paul's company (Col. iv, 14; Philem. 24); thirdly, Mark was likewise with him (Col. iv, 10; Philem. 24); fourthly, Tychicus was then Paul's δάκρυον and letter-bearer, and, in particular, was sent to Asia (Eph. iv, 21; Col. iv, 7, 8). All these circumstances are presented to view in the Second Epistle to Timothy. (1) Timothy was not with Paul at first, but was summoned to his side (2 Tim. iv, 9, 21); (2) Luke was with him (ver. 11); (3) he wishes Mark to come with Timothy, so that he must have been with him in the course of his imprisonment (ver. 11); (4) Tychicus was with him in the capacity of letter-bearer, and, in particular, was sent to Asia (ver. 12). Now, in order to suppose that Paul wrote this epistle to Timothy during a second imprisonment at Rome, we must assume that the circumstances of both were exactly the same, etc. We must also assume that Paul at both times, even in the latter part of Nero's reign, was permitted to receive friends during his confinement, to write letters, despatch mes-

sengers, and, in general, to have free intercourse with everybody" (*Introduction* [Fosdick's transl.], p. 556, etc.).

2. On the other hand, the difficulties lying in the way of this seem insuperable. Hug's reasoning assumes that the epistle must have been written in the early part of the apostle's imprisonment, else Timothy could not have been absent at the time of its composition. But that this is utterly inadmissible the following considerations show: (1.) When Paul wrote to the Colossians, the Philippians, and Philemon, Demas was with him; when he wrote this epistle to Timothy, Demas had forsaken him, having loved this present world and gone to Thessalonica (iv, 10). (2.) When Paul wrote to the Ephesians, Colossians, Philippians, and Philemon, he was in good hopes of a speedy liberation from his imprisonment; when he wrote this epistle to Timothy he had lost all these hopes, and was anticipating death as near at hand (ver. 6-8). (3.) At the time this epistle was written Paul had been, if not oftener, at least once, before the bar of the emperor, when he had offered his apology (ver. 16). (4.) Tychicus, the bearer of the letters to the Colossians, had been despatched from Rome before this epistle to Timothy was written (ver. 12). (5.) At the time the epistles to the Colossians and Philemon were written, Aristarchus was with Paul; by the time this was written, Aristarchus had left Paul (ver. 11). All these circumstances forbid our supposing that this Second Epistle to Timothy was written before the epistles above named; that is, in the early part of Paul's first imprisonment at Rome.

Shall we, then, assign the epistle to a later period of that same imprisonment? Against this also lie difficulties. Before we can admit it, we must suppose that Timothy and Mark, who did not accompany Paul to Rome, had shortly after followed him thither, and, after remaining awhile, left Paul, and were again requested by him in this epistle to return; that during the interval of their absence from Rome, Paul's first trial had occurred; and that, yet even before he had so much as appeared before his judges, he had written to his friends in terms intimating his full confidence of a speedy release (Phil. i, 25; ii, 24; Philem. 22). These circumstances may perhaps admit of explanation; but there are others which seem to present insuperable difficulties in the way of the supposition that this epistle was written at any period of Paul's first imprisonment at Rome. (1.) Paul's imprisonment, of which we have an account in the Acts, was of a much milder kind than that in which he was at the time he wrote this epistle. In the former case, he was permitted to lodge in his own hired house, and to receive all who came to him, being guarded only by a single soldier; in the latter, he was in such close confinement that Onesiphorus had no small difficulty in finding him; he was chained, he suffered evil even unto bonds as a malefactor, his friends had mostly deserted him, and he had narrowly escaped destruction from the Roman tyrant (i, 16-18; ii, 9; iv, 6, 7, 8, 18). (2.) In iv, 13 he requests Timothy to bring with him from Troas some books, parchments, etc. which he had left at that place. If we suppose the visit here referred to the same as that mentioned in Acts xx, 5-7, we must conclude that these documents had been allowed by the apostle to lie at Troas for a space of at least years, as that length of time elapsed between the visit to Troas, mentioned by Luke, and Paul's first imprisonment at Rome. This is surely very unlikely, as the documents were plainly of value to the apostle; and if by *παλόνης*, in this passage, he meant a *cloak* or *mantle*, the leaving of it for so long a time unused when it might have been of service, and the sending so anxiously for it when it could be of little or none, as the apostle's time of departure was at hand, must be allowed to be not a little improbable. (3.) In iv, 20 Paul speaks of having left Trophimus sick at Miletus. Now this could not have been on the occasion referred to in Acts xx, 15; for subsequent to that Trophimus was with

Paul at Jerusalem (Acts xxi, 29). It follows that Paul must have visited Miletus at a subsequent period; but he did not visit it on his way from Jerusalem to Rome on the occasion of his first imprisonment, and this, therefore, strongly favors the hypothesis of a journey subsequent to that event, and immediately antecedent to the writing of this epistle. The attempt to enfeeble the force of this by translating ἀπέλιπον, "they left," etc., and understanding it of messengers from Ephesus coming to visit Paul, is ingenious, but can hardly be admitted, as no sound interpreter would forcibly supply a subject to a verb where the context itself naturally supplies one. (4.) In iv, 20, the apostle says "Erastus abode in Corinth." Such language implies that shortly before writing this epistle the apostle had been at Corinth, where he left Erastus. But before his first imprisonment Paul had not been at Corinth for several years, and during the interval Timothy had been with him, so that he did not need to write to him at a later period about that visit (Acts xx, 4). Hug contends that ἐμειβε simply expresses the fact that Erastus was then residing at Corinth, without necessarily implying that Paul had left him there; but would the apostle in this case have used the aorist?

3. It thus appears that the number of special names and incidents in the second epistle make the chronological data more numerous. We propose here, by way of summary, and in part recapitulation, to bring them, as far as possible, together, noticing briefly with what other facts each connects itself, and to what conclusion it leads as to the conflicting theories of an earlier and later date, (A) during the imprisonment of Acts xxviii, 30, and (B) during the second imprisonment already spoken of.

(1.) A parting apparently recent, under circumstances of special sorrow (i, 4)—not decisive. The scene at Miletus (Acts xx, 37) suggests itself, if we assume A. The parting referred to in I Tim. i, 3 might meet B.

(2.) A general desertion of the apostle even by the disciples of Asia (i, 15). Nothing in the Acts indicates anything like this before the imprisonment of Acts xxviii, 30. Everything in Acts xix and xx, and not less the language of the Epistle to the Ephesians, speaks of general and strong affection. This, therefore, so far as it goes, must be placed on the side of B.

(3.) The position of Paul as suffering (i, 12), in bonds (ii, 9), expecting "the time of his departure" (iv, 6), forsaken by almost all (ver. 16)—not quite decisive, but tending to B rather than A. The language of the epistles belonging to the first imprisonment imply, it is true, bonds (Phil. i, 13, 16; Eph. iii, 1; vi, 20), but in all of them the apostle is surrounded by many friends, and is hopeful and confident of release (Phil. i, 25; Philem. 22).

(4.) The mention of Onesiphorus, and of services rendered by him both at Rome and Ephesus (i, 16-18)—not decisive again, but the tone is rather that of a man looking back on a past period of his life, and the order of the names suggests the thought of the ministrations at Ephesus being subsequent to those at Rome. Possibly, too, the mention of "the household," instead of Onesiphorus himself, may imply his death in the interval. This, therefore, tends to B rather than A.

(5.) The abandonment of Paul by Demas (iv, 10)—strongly in favor of B. Demas was with the apostle when the epistles to the Colossians (iv, 14) and Philemon (24) were written. 2 Tim. must therefore, in all probability, have been written after them; but if we place it anywhere in the first imprisonment, we are all but compelled, by the mention of Mark, for whose coming the apostle asks in 2 Tim. iv, 11, and who is with him in Col. iv, 10, to place it at an earlier age. The above qualifying words ("all but") might have been omitted but for the fact that it has been suggested that Demas, having forsaken Paul, repented and returned (Lardner, vi, 368).

(6.) The presence of Luke (iv, 11) agrees well enough with A (Col. iv, 14), but is perfectly compatible with B.

(7.) The request that Timothy should bring Mark (iv, 11) seems at first, compared as above with Col. iv, 14, to support A, but, in connection with the mention of Demas, tends decidedly to B.

(8.) Mention of Tychicus as sent to Ephesus (iv, 12) appears, as connected with Eph. vi, 21, 22; Col. iv, 7, in favor of A, yet, as Tychicus was continually employed on special missions of this kind, may just as well fit in with B.

(9.) The request that Timothy should bring the cloak and books left at Troas (iv, 13). On the assumption of A, the last visit of Paul to Troas would have been at least four or five years before, during which there would probably have been opportunities enough for his regaining what he had left. In that case, too, the circumstances of

the journey present no trace of the haste and suddenness which the request more than half implies. On the whole, then, this must be reckoned as in favor of B.

(10.) "Alexander the coppersmith did me much evil," "greatly withstood our words" (iv, 14, 15). The part taken by a Jew of this name in the uproar of Acts xix, and the natural connection of the χαλκεύς with the artisans represented by Demetrius, suggest a reference to that event as something recent, and so far support A. On the other hand, the name Alexander was too common to make us certain as to the identity; and if it were the same, the hypothesis of a later date only requires us to assume what was probable enough, a renewed hostility.

(11.) The abandonment of the apostle in his first defence (ἀπολογία), and his deliverance "from the mouth of the lion" (iv, 16, 17) fits in as a possible contingency with either hypothesis, but, like the mention of Demas in (5), must belong, at any rate, to a time much later than any of the other epistles written from Rome.

(12.) "Erastus abode at Corinth, but Trophimus I left at Miletus sick" (iv, 20)—language, as in (9), implying a comparatively recent visit to both places. If, however, the letter were written during the first imprisonment, then Trophimus had not been left at Miletus, but had gone on with Paul to Jerusalem (Acts xxi, 29), and the mention of Erastus as remaining at Corinth would have been superfluous to one who had left that city at the same time as the apostle (ibid. xx, 4). The conjecture that the "leaving" referred to took place during the voyage of Acts xxvii is purely arbitrary, and at variance with ver. 5 and 6 of that chapter.

(13.) "Hasten to come before winter." Assuming A, the presence of Timothy in Phil. i, 1; Col. i, 1; Philem. 1 might be regarded as the consequence of this; but then, as shown in (5) and (6), there are almost insuperable difficulties in supposing this epistle to have been written before those three.

(14.) The salutations from Eubulus, Pudens, Linus, and Claudia. Without laying much stress on this, it may be said that the absence of these names from all the epistles which, according to A, belong to the same period, would be difficult to explain. Beaves it open to conjecture that they were converts of more recent date. They are mentioned, too, as knowing Timothy, and this implies, as at least probable, that he had already been at Rome, and that this letter to him was consequently later than those to the Philippians and Colossians.

On the whole, it is believed that the evidence preponderates strongly in favor of the later date, and that the epistle, if we admit its genuineness, is therefore a strong argument for believing that the imprisonment of Acts xxviii was followed by a period, first of renewed activity, and then of suffering.

II. *Place*.—On this point the second epistle is free from the conflict of conjectures. With the solitary exception of Böttger, who suggests Cæsarea, there is a *consensus* in favor of Rome, and everything in the circumstances and names of the epistle leads to the same conclusion. We may suppose that Paul was apprehended at Nicopolis (1 Tim. iii, 12), and thence conveyed to Rome, where this epistle was written, shortly before his death. Where Timothy was at the time it is impossible to say; most probably at Ephesus.

III. *Object and Contents*.—The design of the second epistle is partly to inform Timothy of the apostle's trying circumstances at Rome, and partly to utter a last warning voice against the errors and delusions which were corrupting and disturbing the churches.

It consists of an inscription (i, 1-5); of a series of exhortations to Timothy, to be faithful in his zeal for sound doctrine, patient under affliction and persecution, careful to maintain a deportment becoming his office, and diligent in his endeavors to counteract the unhallored efforts of the false teachers (i, 6; iv, 8); and a conclusion in which Paul requests Timothy to visit him, and sends the salutations of certain Christians at Rome to Timothy, and those of the apostle himself to some believers in Asia Minor.

IV. *Commentaries*.—The following are the special exegetical helps on the whole of the second epistle exclusively: Barlow, *Exposition* (Lond. 1624, 4to; 1632, fol.); Hall, *Commentary* [on ch. iii and iv] (ibid. 1638, fol.); Feufking, *Illustratio* [includ. 2 and 3 John] (Vitemb. 1705, fol.); Brückner, *Commentarius* (Hafn. 1829, 8vo). See EPISTLE.

TIN בְּרִיל, *bedil*, from בָּרַל, *to divide*; so called apparently from its separation as an alloy [Isa. i, 25]; Sept.

κασίτερος; Vulg. *stannum*). Among the various metals found among the spoils of the Midianites, tin is enumerated (Numb. xxxi, 22). It was known to the Hebrew metal-workers as an alloy of other metals (Isa. i, 25; Ezek. xxii, 18, 20). The markets of Tyre were supplied with it by the ships of Tarshish (Ezek. xxvii, 12). It was used for plummets (Zech. iv, 10, marg. "stone of tin," as the Heb. is), and was so plentiful as to furnish the writer of Ecclesiasticus (xlvii, 18) with a figure by which to express the wealth of Solomon, whom he apostrophizes thus: "Thou didst gather gold as tin, and didst multiply silver as lead."

In the Homeric times the Greeks were familiar with it. Twenty layers of tin were in Agamemnon's cuirass given him by Cinyres (Homer, *Il.* xi, 25), and twenty bosses of tin were upon his shield (*ibid.* xi, 34). Copper, tin, and gold were used by Hephaestus in welding the famous shield of Achilles (*ibid.* xviii, 474). The fence round the vineyard in the device upon it was of tin (*ibid.* 564), and the oxen were wrought of tin and gold (*ibid.* 574). The greaves of Achilles, made by Hephaestus, were of tin beaten fine, close-fitting to the limb (*ibid.* 612; xxi, 592). His shield had two folds, or layers, of tin between two outer layers of bronze and an inner layer of gold (*ibid.* xx, 271). Tin was used in ornamenting chariots (*ibid.* xxiii, 608), and a cuirass of bronze overlaid with tin is mentioned (*ibid.* 561). No allusion to it is found in the *Odyssey*. The melting of tin in a smelting-pot is mentioned by Hesiod (*Theog.* 862).

Tin is not found in Palestine (Kitto, *Phys. Hist. of Palest.* ch. iii, p. lxxiii). Whence, then, did the ancient Hebrews obtain their supply? "Only three countries are known to contain any considerable quantity of it: Spain and Portugal, Cornwall and the adjacent parts of Devonshire, and the islands of Junk, Ceylon, and Banca, in the Straits of Malacca" (Kenrick, *Phœnicia*, p. 212). According to Diodorus Siculus (v, 46), there were tin-mines in the island of Panchaia, off the east coast of Arabia, but the metal was not exported. There can be little doubt that the mines of Britain were the chief source of supply to the ancient world. Mr. Cooley, indeed, writes very positively (*Maritime and Inland Discovery*, i, 181), "There can be no difficulty in determining the country from which tin first arrived in Egypt. That metal has been in all ages a principal export of India: it is enumerated as such by Arrian, who found it abundant in the ports of Arabia at a time when the supplies of Rome flowed chiefly through that channel. The tin-mines of Banca are probably the richest in the world; but tin was unquestionably brought from the West at a later period." But it has been shown conclusively by Dr. George Smith (*The Cassiterides*, Lond. 1863) that, so far from such a statement being justified by the authority of Arrian, the facts are all the other way. After examining the commerce of the ports of Abyssinia, Arabia, and India, it is abundantly evident that, "instead of its coming from the East to Egypt, it has invariably been exported from Egypt to the East" (p. 23). With regard to the tin obtained from Spain, although the metal was found there, it does not appear to have been produced in sufficient quantities to supply the Phœnician markets. Posidonius (in Strabo, iii, 147) relates that in the country of the Artabri, in the extreme north-west of the peninsula, the ground was bright with silver, tin, and white gold (mixed with silver), which were brought down by the rivers; but the quantity thus obtained could not have been adequate to the demand. At the present day the whole surface bored for mining in Spain is little more than a square mile (Smith, *Cassiterides*, p. 46). We are therefore driven to conclude that it was from the Cassiterides, or tin districts of Britain, that the Phœnicians obtained the great bulk of this commodity (Lewis, *Hist. Survey of the Astr. of the Anc.* p. 451), and that this was done by the direct voyage from Gades. It is true that at a later period (Strabo, iii, 147) tin was conveyed over-

land to Marseilles by a thirty days' journey (Diod. Sic. v, 2); but Strabo (iii, 175) tells us that the Phœnicians alone carried on this traffic in former times from Gades, concealing the passage from every one; and that on one occasion, when the Romans followed one of their vessels in order to discover the source of supply, the master of the ship ran upon a shoal, leading those who followed him to destruction. In course of time, however, the Romans discovered the passage. In Ezekiel, "the trade in tin is attributed to Tarshish, as 'the merchant' for the commodity, without any mention of the place whence it was procured" (*Cassiterides*, p. 74); and it is after the time of Julius Cæsar that we first hear of the overland traffic by Marseilles.

Pliny (vi, 36) identifies the *cassiteros* of the Greeks with the *plumbum album* or *candidum* of the Romans, which is our tin. *Stannum*, he says, is obtained from an ore containing lead and silver, and is the first to become melted in the furnace. The etymology of *cassiteros* is uncertain; but it is doubtless the same as the Arabic term *kasdir*. From the fact that in Sanscrit *kastira* signifies "tin," an argument has been derived in favor of India being the source of the ancient supply of this metal, but too much stress must not be laid upon it. See LEAD. The name of some metal has been read in the Egyptian sculptures as *khasit*, which may refer to "tin." The Hebrew word refers to its principal use in making bronze, which was the case at a very remote period of Egyptian history. A bronze, apparently cast, has been found bearing the name of Pharaoh Pepi of the sixth dynasty, who reigned certainly five centuries before the Exode. In Egypt and Assyria bronze was generally made of ten or twenty parts of tin to eighty or ninety of copper, and there appear to have been the same proportions in Grecian and Roman manufactures of a later age. Wilkinson supposes that the beautiful articles of workmanship frequently found in England, which have neither a Greek nor a Roman type, were probably first introduced by this trade. One specimen of manufactured tin, now in the Truro Museum, has been discovered in England, which, as it differs from those made by the Romans, is supposed to be of Phœnician origin. It is nearly three feet long by one broad, and three inches high (*Anc. Egyptians*, ii, 184 sq.). See METAL.

**Tinction**, a name applied, in the early Church, to the rite of baptism.

**Tindal**(1), **Matthew**, one of the successors of Toland and Shaftesbury in the school of English deists or freethinkers, was born at Beer-Ferrers, in Devonshire, about 1657. He was educated at Lincoln and Exeter colleges, Oxford; took his A.B. in 1676; shortly after was elected fellow of All-Souls', and was admitted doctor of laws at Oxford in 1685. He retained his fellowship during the reign of James II by professing the Roman Catholic faith; he afterwards recanted, however, and, adopting revolutionary principles, went to the other extreme, and wrote against the nonjurors. He now became an advocate, and sat as judge in the court of delegates, with a pension from the crown of £200 per annum. Some time afterwards, considerable attention was drawn to him by his work entitled *The Rights of the Christian Church* (1706-7, 8vo), and the ensuing controversy; but the production which has rendered his name a memorable one was his *Christianity as Old as the Creation* (1730), which provoked replies from Dr. Warburton, Leland, Foster, and Conybeare. Dr. Middleton endeavored to take a middle course in this controversy, as may be seen in that article, but the most effective answer, though its very existence seems to have been forgotten, was that embodied in the *Appeal* of William Law, published in 1740. Tindal's line of argument was mainly coincident with Shaftesbury's, that the immutable principles of faith and duty must be found within the breast, and that no external revelation can have any authority equal to the internal: this he supported

by much learning and show of argument, to which Warburton thought he had replied by the mass of learned evidence contained in his *Legation*. William Law, making no account of literary evidence, replied by his masterly development of the philosophy of the fall and final recovery of mankind; a book remarkable for close argument and for its many fine illustrations, but now obsolete in certain fundamental principles. Tindal died in London, Aug. 16, 1733, and was interred in Clerkenwell Church. Mr. Tindal also wrote, *An Essay concerning the Power of the Magistrate and the Rights of Mankind in Matters of Religion* (Lond. 1697, 8vo):—*A Defence of the Rights of the Christian Church* (ibid. 1709, 2 pts. 8vo):—*The Nation Vindicated* (ibid. 1711; pt. ii, 1712):—*War with Priestcraft, or the Freethinker's Iliad* (ibid. 1732, 8vo), a burlesque poem.

**Tindal(I), Nicholas**, nephew of the preceding, was born in Devonshire in 1687; graduated A.M. from Exeter College in 1713, and was chosen fellow of Trinity College. He entered holy orders and became vicar of Great Waltham, Essex, and rector of Alverstoke, Hampshire. In 1740 he obtained the living of Colbourne, Isle of Wight, and soon after became chaplain of Greenwich Hospital. He died in 1744. Among his works are, *A Guide to Classical Learning* (Lond. 1765, 12mo):—a translation of Rapin's *History of England*, with a *Continuation from 1688 to the Accession of George II* (1744-47, in weekly Nos.):—*Antiquities, Sacred and Profane* (Lond. 1727, 4to; in Nos., never completed), vol. i. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.*, s. v.

**Tindale, William**. See TYNDALE, WILLIAM.

**Tingstād, Johan Adolf**, a Protestant divine, doctor of theology, and bishop of Strengnäs, in Sweden, where he died Dec. 10, 1827, is the author of *De Ortu et Cognitione Linguarum Orientalium* (Greifswalde, 1768):—*Animadversiones Philologicae et Criticae ad Vaticanum Habacuci* (Upsala, 1795):—*Supplementorum ad Lexicam Hebr. Specimina Academica* (ibid. 1808):—*De tolfemärre Skriften af gamla Testamentets Propheter* (Strengnäs, 1813):—*Klugsånger af Prophet Jeremia* (ibid. 1820):—*Psaltaren Profvsversätt.* (3d ed. ibid. 1813):—*Philol. Anmärkningar öfver strödda Ställen i gamla Test. Grundspråk* (ibid. 1824). See Winer, *Handbuch der theol. Literatur*, i, 123, 229; ii, 804; Fürst, *Bibl. Jud.* iii, 432; Steinschneider, *Bibliograph. Handbuch*, No. 2011 (Leips. 1859). (B. P.)

**Tinker, Reuben**, a missionary of the Presbyterian Church, was born at Chester, Mass., Aug. 6, 1799. He received a good preparatory education; graduated at Amherst College in 1827, and at the Auburn Theological Seminary in 1830; and in November of the same year was ordained by the Mountain Association, with a view to his becoming a missionary of the American Board at the Sandwich Islands. He reached the islands at a somewhat critical period, but, in spite of all existing difficulties, the cause of the Gospel was rapidly advancing. In 1834 it was resolved to publish, in the native language, a semi-monthly newspaper devoted to the interests of religion, and he was appointed to conduct it. In 1838 he dissolved his relations with the board, and established himself, with the approval of his brethren, at Koloa, on the island of Kani, where he labored until he departed for his own country in 1840. In September, 1845, he was installed pastor of the First Presbyterian Church in Westfield, Chautauqua Co., N. Y., where he continued to labor till near the close of his life. He died Oct. 26, 1854. Mr. Tinker was an eloquent preacher, a self-sacrificing missionary, and a fast and firm friend. After his death appeared *Sermons by Rev. Reuben Tinker, Missionary at the Sandwich Islands*; with a Biographical Sketch by M. L. P. Thompson, D.D. (Buffalo, 1856, 12mo). See Sprague, *Annals of the Amer. Pulpit*, iv, 770; Allibone, *Dict. of Brit. and Amer. Authors*, s. v. (J. L. S.)

**Tinne (or Chippewayan) Version**. This language is quite different from that which is called Chippeway or Ojibbeway; it is spoken in the Hudson's Bay Territory, near Fort Simpson, and over a vast tract of country eastward of the Rocky Mountains. The Rev. W. W. Kirkby, of the Church Missionary Society, has translated the gospels according to Mark and John, which have been printed in the syllabic character, and circulated among those for whom they were designed since 1870. (B. P.)

**Tinahemeth**. See MOLE; SWAN.

**Tintoretto, Il**, or GIACOMO ROBUSTI, a distinguished Italian painter, was born at Venice, according to Ridolfi, in 1512. After being instructed in the rudiments of design, he became a pupil of Titian, with whom he studied for a short time only; it being generally stated that Titian dismissed him, being jealous of his talents and progress. He was not discouraged, but resolved to become the head of a new school. Over his door he wrote, "Michael Angelo's design, and the coloring of Titian." He made a special study of light and shade, and of the human form both by living models and by anatomy. Though he possessed many excellences, his sovereign merit consisted in the animation of his figures. He flourished for a long period, and retained his powers to a great age, dying at Venice in 1594. His three greatest pictures, according to his own estimate and that of others, are, *The Crucifixion*, in the College of San Rocco; *The Last Supper*, now in the Church of Santa Maria della Salute; and *Il Servo*, or the Venetian Slave, condemned to martyrdom by the Turks, invoking the protection of St. Mark. Some of his works are of enormous size, the *Crucifixion* being forty feet long, the *Israelites worshipping the Golden Calf* and the *Last Judgment* each about sixty feet high. One of his last productions was his *Paradiso*, in the hall of the great council-chamber of San Marco. Tintoretto wrought so fast, and at so low a price, that few of the other painters in Venice could secure employment. The churches and halls of the different communities are overladen with his productions. See Spooner, *Biog. Dict. of the Fine Arts*, s. v.

**Tiph'sah** (Heb. *Tiph'sach'*, תִּפְסַח, from תִּפַּח, to ford, this being the usual crossing-place of the Euphrates [Strabo, xvi, 1, 21]; Sept. *Θαψά* v. r. *Θεσά*; Vulg. *Thapsa*, *Thapsa*) is mentioned in 1 Kings iv, 24 as the limit of Solomon's empire towards the Euphrates, and in 2 Kings xv, 16 it is said to have been attacked by Menahem, king of Israel, who "smote Tiph'sah and all that were therein, and all the coasts thereof." It is generally admitted that the town intended, at any rate in the former passage, is that which the Greeks and Romans knew under the name of *Thapsacus* (Θάψακος), situated in Northern Syria, on the western bank of the Euphrates, not far above Carchemish. Thapsacus was a town of considerable importance in the ancient world. Xenophon, who saw it in the time of Cyrus the younger, calls it "great and prosperous" (*μεγάλη καὶ εὐδαίμων*, *Anab.* i, 4, 11). It must have been a place of considerable trade, the land traffic between East and West passing through it, first on account of its ford-way (which was the lowest upon the Euphrates), and then on account of its bridge (Strabo, xvi, 1, 23); while it was likewise the point where goods were both embarked for transport down the stream (Q. Curt. x, 1), and also disembarked from boats which had come up it, to be conveyed on to their final destination by land (Strabo, xvi, 3, 4). It is a fair conjecture that Solomon's occupation of the place was connected with his efforts to establish a line of trade with Central Asia directly across the continent, and that Tadmor was intended as a resting-place on the journey to Thapsacus. Thapsacus was the place at which armies marching east or west usually crossed the "Great River." It was there that the Ten Thousand first learned the real intentions of Cyrus, and, consent-

ing to aid him in his enterprise, passed the stream (Xenoph. *Anab.* i, 4, 11). There, too, Darius Codomannus crossed on his flight from Issus (Arrian, *Exp.* *Al.* ii, 13); and Alexander, following at his leisure, made his passage at the same point (*ibid.* iii, 7). A bridge of boats was usually maintained at the place by the Persian kings, which of course was broken up when danger threatened. Even then, however, the stream could in general be forded, unless in the flood season. This is clear from the very name of the place, and is confirmed by modern researches. When the natives told Cyrus that the stream had acknowledged him as its king, having never been forded until his army waded through it, they calculated on his ignorance, or thought he would not examine too strictly into the groundwork of a compliment (see Xenoph. *Anab.* i, 4, 11). When Greek ascendancy and enterprise succeeded to Persian rule, Thapsacus rose into still greater importance, and embraced both sides of the river—whence it received the name of *Amphipolis* (Pliny, v, 21).

It has generally been supposed that the site of Thapsacus was the modern *Deir* (D'Anville, Rennell, Vaux, etc.). But the Euphrates expedition proved that there is no ford at *Deir*, and, indeed, showed that the only ford in this part of the course of the Euphrates is at *Suriyeh*, 45 miles below *Balis*, and 165 above *Deir* (Ainsworth, *Travels in the Track of the Ten Thousand*, p. 70). This, then, must have been the position of Thapsacus. Here the river is exactly of the width mentioned by Xenophon (four stades, or eight hundred yards), and here for four months in the winter of 1841-42 the river had but twenty inches of water (*ibid.* p. 72). "The Euphrates is at this spot full of beauty and majesty. Its stream is wide and its waters generally clear and blue. Its banks are low and level to the left, but undulate gently to the right. Previous to arriving at this point, the course of the river is southerly, but here it turns to the east, expanding more like an inland lake than a river, and quitting (as Pliny has described it) the Palmyrean solitudes for the fertile Mygdonia" (*ibid.*). A paved causeway is visible on either side of the Euphrates at *Suriyeh*, and a long line of mounds may be traced, disposed, something like those of *Ninveh*, in the form of an irregular parallelogram. These mounds probably mark the site of the ancient city.

**Tippelskirch**, FRIEDRICH VON, a Protestant theologian, was born at Königsberg, March 5, 1802. For a number of years he acted as chaplain to the Prussian ambassador in Rome, was in 1837 called to Giebichenstein, near Halle, and died in the year 1866. He published sermons and other writings, for which see Zuchold, *Biblioth. theol.* ii, 1341; Winer, *Handbuch der theol. Literatur*, ii, 106, 304; Hauck, *Theolog. Jahresbericht*, iii, 602. (B. P.)

**Tippet** (Lat. *Liripipium*), a narrow garment or covering for the neck and shoulders; a kind of hood worn over the shoulders, which was fastened round the neck by a long pendent appendage called the *liripoop*. This latter portion was generally dropped during the 16th century, and only the hood was worn. The *liripoop* lingers in the hat-band, and is used at funerals. The *tippet* of the almuce had rounded ends, to distinguish it from the squared terminations of the stole; they were worn hanging down in front by canons, but by monks behind, by way of distinction. The *tippets* disappeared from the hood in the time of Henry VII. The manner of wearing the modern hood or the literate's *tippet* over the back, depending from the neck by a ribbon, is a corruption, and a practice eminently unmeaning. See Lee, *Gloss. of Liturg. Terms*, s. v.; Walcott, *Sacred Archaeol.* s. v.

**Tipstaff**, an officer of the Court of Queen's Bench, attending the judges, with a wand or *staff* of office *tipped* with silver, to take prisoners into custody. A similar officer was attached to the ancient Star-chamber Court.

**Tira** is the name for a Buddhist temple in Japan. It is usually built on rising ground, constructed of the best cedars and firs, and adorned within with many carved images. In the middle of the temple stands an altar with one or more gilt idols upon it, and a beautiful candlestick with perfumed candles burning before it. Kämpfer says, "The whole empire is full of these temples, and their priests are without number. In and about *Miako* alone there are 8893 temples, and 37,093 *siakku*, or priests."

**Tiras** (Heb. *Tiras*, תִּירָס, Sept. Θείρας; Vulg. *Thiras*), the youngest son of Japheth (Gen. x, 2). B.C. 2514. As the name occurs only in the ethnological table, we have no clue, so far as the Bible is concerned, to guide us as to the identification of it with any particular people. Ancient authorities generally fixed on the *Thracians*, as presenting the closest verbal approximation to the name (Josephus, *Ant.* i, 6, 1; Jerome, in *Gen.* x, 2; Targums Pseudo-Jon. and Jerus. on *Gen.* loc. cit.; Targ. on 1 *Chron.* i, 5); the occasional rendering *Persia* probably originated in a corruption of the original text. The correspondence between *Thrace* and *Tiras* is not so complete as to be convincing; the gentile form Θράξ, however, brings them nearer together. No objection arises on ethnological grounds to placing the Thracians among the Japhetic races (Bochart, *Phaleg*, iii, 2; Michaelis, *Spicileg.* i, 55 sq.). Their precise ethnic position is, indeed, involved in great uncertainty; but all authorities agree in their general Indo-European character. The evidence of this is circumstantial rather than direct. The language has disappeared, with the exception of the ancient names and the single word *bria*, which forms the termination of *Meembria*, *Selymbria*, etc., and is said to signify "town" (Strabo, vii, 319). The Thracian stock was represented in later times by the *Getæ*, and these, again, still later, by the *Daci*, each of whom inherited the old Thracian tongue (*ibid.* 308). But this circumstance throws little light on the subject; for the *Dacian* language has also disappeared, though fragments of its vocabulary may possibly exist either in Wallachian dialects or perhaps in the Albanian language (Diefenbach, *Or. Eur.* p. 68). If Grimm's identification of the *Getæ* with the *Goths* were established, the Teutonic affinities of the Thracians would be placed beyond question (*Gesch. d. deutsch. Spr.* i, 178); but this view does not meet with general acceptance. The Thracians are associated in ancient history with the *Pelasgians* (Strabo, ix, 401), and the *Trojans*, with whom they had many names in common (*ibid.* xiii, 690); in *Asia Minor* they were represented by the *Bithynians* (Herod. i, 28; vii, 75). These circumstances lead to the conclusion that they belonged to the Indo-European family, but do not warrant us in assigning them to any particular branch of it. Other explanations have been offered of the name *Tiras*, of which we may notice the *Agathyræ*, the first part of the name (*Agā*) being treated as a prefix (Knoel, *Völkertafel*, p. 129); *Taurus* and the various tribes occupying that range (Kalisch, *Comm.* p. 246); the river *Tyras* (Dniester), with its cognominous inhabitants the *Tyritæ* (Hävernick, *Einleit.* ii, 231; Schulthess, *Parad.* p. 194); and, lastly, the maritime *Tyrrhæni* (Tuch, in *Gen.* loc. cit.). See ETHNOGRAPHY.

**Tirathite** (Heb. *Tirati*, תִּירָתִי, patril from some unknown תִּירָה, *Tirāh* [a gate (Gesenius) or fissure (Fürst)]; Sept. Ἀργασιῦν v. ὁπαγασιῦν and Ταθειν; Vulg. *canentes*), the designation of one of the three families of Scribes residing at *Jabez* (1 *Chron.* ii, 55), the others being the *Shimeathites* and *Suchathites*. The passage is hopelessly obscure, and it is perhaps impossible to discover whence these three families derived their names. The Jewish commentators, playing with the names in true Shemitic fashion, interpret them thus, "They called them *Tirathim*, because their voices when they sang resounded loud (תִּירָה); and *Shimeathites*

because they made themselves heard (פָּרַשׁ) in reading the law."

**Tire** (an old English word for dressing the head, see Plumptre, *Bible Educator*, iv, 211) is used (both as a verb and a noun) to translate, in the A. V., three Hebrew words and one Greek: **תֵּטֵב** (in Hiph.), to make good, i. e. ornament, sc. the head (2 Kings ix, 30); **פֶּאֶר**, *peér* (Ezek. xxiv, 23), a turban ("bonnet," etc.); **שָׁהָרֹן**, *saharón* (Isa. iii, 18), *crests* ("ornament," Judg. vii, 21, 26); *mitra* (Jud. x, 8; xvi, 8), a *mitre* or head-band. See **HEAD-DRESS**. The third of these terms probably represents a pendent disk, worn by women on the head, and similar articles are still hung

Modern Egyptian Ornamental Appendage to a Lady's Head-dress in Front.

on camels' necks among the Arabs. "The *kamaraḥ* (moon) is an ornament formed of a thin plate of gold, embossed with fanciful work or Arabic words, and having about seven little flat pieces of gold called *bark* attached to the lower part; or it is composed of gold with diamonds, rubies," etc. (Lane, *Mod. Egypt*, ii, 401). Lieut. Couder thinks that the "round tires like the moon" of Isaiah were like the strings of coin which form part of the head-dress of the modern Samaritan women (*Tent-Work in Palest.*, ii, 244). See **ORNAMENT**.

**Tirha'kah** [many *Tir'hakah*] (Heb. *Tir'ha'kah*, תִּרְחָקָה, of Ethiopic derivation; Sept. *Θαρακά* v. r. *Θαρακά* and *Θαρά*; Vulg. *Tharaca*), a king of Cush (Sept. βασιλεὺς Αἰθιοπῶν, A.V. "king of Ethiopia"), the opponent of Sennacherib (2 Kings xix, 9; Isa. xxxvii, 9). While the king of Assyria was "warring against Libnah," in the south of Palestine, he heard of Tirhakah's advance to fight him, and sent a second time to demand the surrender of Jerusalem. This was near the close of B.C. 713, unless we suppose that the expedition took place in the twenty-fourth instead of the fourteenth year of Hezekiah, which would bring it to B.C. 708. If it were an expedition later than that of which the date is mentioned, it must have been before B.C. 697, Hezekiah's last year. But, if the reign of Manasseh is reduced to thirty-five years, these dates would be respectively B.C. cir. 693, 688, and 678, and these numbers might have to be slightly modified if the fixed date of the capture of Samaria, B.C. 720, be abandoned. See **HEZEKIAH**. Wilkinson supposes (i, 138) that Tirhakah occupied the throne of Egypt from B.C. 710 to 689. Rawlinson gives the date B.C. 690 (*Herod.* i, 392). Dr. Hincks, in an elaborate article, argues for this latter date, and supposes Tirhakah, after a reign over Egypt of twenty-six years, to have retired to Ethiopia B.C. 664 (*Journ. of Sac. Lit.* Jan. 1864). See **CHRONOLOGY**.

According to Manetho's epitomists, *Tarakos* (*Ταρακος*), or *Tarkos* (*Ταρκος*), was the third and last king of the XXVth dynasty, which was of Ethiopians, and reigned eighteen (Afr.) or twenty (Eus.) years. From one of the Apis-Tablets we learn that a bull Apis was born in his twenty-sixth year and died at the end of the twentieth of Psammetichus I of the XXVth dynasty. Its life exceeded twenty years, and no Apis is stated to have lived longer than twenty-six. Taking that sum as the most probable, we should date Tirhakah's accession B.C. cir. 695, and assign him a reign of twenty-six years. In this case we should be obliged to take the later reckoning of the Biblical events, were

it not for the possibility that Tirhakah ruled over Ethiopia before becoming king of Egypt. In connection with this theory it must be observed that an earlier Ethiopian of the same dynasty is called in the Bible "So, king of Egypt," while this ruler is called "Tirhakah, king of Ethiopia," and that a Pharaoh is spoken of in Scripture at the period of the latter, and also that Herodotus (iii, 141) represents the Egyptian opponent of Sennacherib as Sethos, a native king, who may, however, have been a vassal under the Ethiopian. See So. It is deserving of remark, and strongly favors the view of those writers who maintain that during considerable periods Ethiopian dynasties ruled in Egypt, that from the time of Shishak to that of Tirhakah it is of Ethiopians that we read in Scripture as having mainly furnished the hosts which marched to battle out of Egypt. While Shishak is called king of Egypt, his army is declared to have been composed, not of Egyptians, but of Lubims and Sukkims and Ethiopians (2 Chron. xii, 3). We subsequently read of Zerah the Ethiopian leading an army of Ethiopians and Lubims against Asa (xvi, 8). We now find that while Pharaoh of Egypt may have made great promises, it is the Ethiopian king Tirhakah who alone brings an army into the field. In the reign of Pharaoh-necho, the Egyptian army seems to have been mainly composed of Ethiopians and Libyans (Jer. xli, 9). The natural inference is that, during this long period, the military power of Egypt was at a low ebb. At the time we are now speaking of, Rawlinson supposes Egypt to have been subject to Ethiopia (*Herod.* i, 891). In this he is not quite correct, however. Egypt may have been inferior to it in strength and spirit, but it was, at least, nominally independent at this time, though it may have fallen soon after under the power of the Ethiopian king. That Tirhakah was actually king of Egypt at some time is strongly maintained. There is nothing in Scripture to prevent our supposing that he became so subsequent to the period when it speaks of him. Indeed, in the position in which it places him, at the head of a large army in Egypt, with no Assyrian enemy to dread, it pictures a situation which would tempt an ambitious soldier to extend his power by dethroning an effeminate or irresolute monarch, such as the Pharaoh of his time would seem to have been. Wilkinson (i, 138-142) supposes that he at first ruled over Upper Egypt, while Sethos held the sovereignty of the lower country; that he came to the Egyptian throne rather by legal succession than by usurpation; and that he did actually fight against the army of Sennacherib, and overthrow it in battle. Scripture, however, expressly ascribes the overthrow of the Assyrian to the supernatural interposition of God (2 Kings xix, 35). Herodotus (ii, 141) does not mention Tirhakah at all, but only speaks of the king of Egypt, and mentions the overthrow of the Assyrian army very much in the way that crafty priests might pervert the actual occurrence as recorded in Scripture. It is quite possible that Tirhakah may have led his army in pursuit of the Assyrians after their mysterious midnight overthrow; may have captured prisoners and treasure; and this would be quite sufficient ground for any successes ascribed to him on the Theban sculptures. If, as is probable, he became king of all Egypt, there seems strong reason for agreeing with much, at least, of Strabo's account of him (lib. xv) as having extended his conquests into Europe. The Assyrian power was effectually checked by the ruin of its army and the divisions of its reigning family. At the head of a great army which had come forth to fight the Assyrians, and now found itself without a foe, there is every reason why Tirhakah may have extended the Egyptian power as far as any Egyptian king before him. If Tirhakah did come into actual collision with the Assyrians at or near Pelusium in Egypt, as many writers maintain, it must have been upon another occasion than that mentioned in Scripture (see Josephus, *Ant.* x, 1, 4). It is, however, more

probable that Scripture has sketched in a few words the entire matter, and that the variations from it are the effect of ignorance or design. The invasion of Assyria had probably Egypt and Ethiopia as its ultimate object, but in the account of Scripture the Assyrian host plainly was only on its way to the accomplishment of its purpose. See SENNACHERIB.

The name of Tirhakah is written in hieroglyphics *Teharka* (or Coptic *Tarkha*). His successful opposition to the power of Assyria is recorded on the walls of a Theban temple, for at Medinet Habu are the figure and the name of this king and the captives he took (Trevor, *Egypt*, p. 71). At Jebel Berkel, or Napata, he constructed one temple and part of another. Of the events of his reign little else is known, and the account of Megasthenes (*ap. Strabo*, xv, 686, where he is called "Tearkon the Ethiopian," Τεάρκων ὁ Αἰθίοψ), that he rivalled Sesostris as a warrior and reached the Pillars of Hercules, is not supported by other evidence. It is probable that at the close of his reign he found the Assyrians too powerful, and retired to his Ethiopian dominions.

Hieroglyphic See Wilkinson, *Anc. Egypt*, i, 140 sq.; Cartouch of Tirhakah. Brugsch, *Hist. of Egypt*, ii, 256 sq. See ETHIOPIA.

**Tirha'nah** [many *Tir'hanah*] (Heb. *Tirchanah'*, תִּרְחָנָה, *fuor*; Sept. *Θαρχανά* v. r. *Θαράμ*; Vulg. *Tharana*), second named of the four sons of Caleb the Hezronite by his concubine Maachah (1 Chron. ii, 48). B.C. apparently cir. 1618.

**Tir'ia** (Heb. *Tireya'*, תִּירְיָא, *fear*; Sept. *Τιτιά* v. r. *Θητιά*; Vulg. *Thiria*), third named of the four sons of Jehaleleel of the tribe of Judah (1 Chron. iv, 16). B.C. apparently cir. 1618.

**Tirinus**, JACOB, a Jesuit, was born at Antwerp in the year 1580. In 1600 he entered the Order of the Jesuits, was appointed professor of exegesis, superior of the Dutch Mission, and died July 14, 1636. He published, *Biblia Magna, cum Commentariis Gagneri, Estii, Menochii, et Tirini* (Paris, 1643, 5 vols. fol.) :—*Commentarius in Sacram Scripturam, cum Chronico Sacro ac Prolegomenis de Antiquis Ponderibus et Monetis ac de Mensuris deque Chorographia Terrarum Sanctarum* (Antw. 1632, 3 vols. fol.; 1645, fol.; Lyons, 1664; Venice, 1688; Augsburg, 1704). See Winer, *Handb. der theol. Literatur*, i, 186, 188; ii, 804; Firsi, *Bibl. Jud.* iii, 482; *Theol. Universal-Lex.* s. v. (B. P.)

**Tirōnēs** (*newly levied recruits*), a name sometimes given to *catechumens* (q. v.).

**Tironesians**, or CONGREGATION OF TIRON. This order of monks was founded at Tiron, near Poitiers, in 1109, by Bernard d'Abbeville. See BERNARD OF TIRON. The first monastery was abandoned in 1114, and another built on the river Tiron. It was soon filled with monks, and before long the order had under its control sixty-five abbeys and priories and eleven parishes. Bernard required the strictest observance of the Benedictine rule; and so great was the self-denial of the monks that at times they were hardly supplied with the necessities of life, one loaf of bread being deemed sufficient for the daily portion of four men. Notwithstanding these austerities, the number increased in three years to five hundred, and the fame of Bernard's sanctity had spread to foreign countries. Henry I of England sent the monastery an annuity of fifteen marks of silver in perpetuity, besides 560 marks yearly during his life, and built a magnificent dormitory. The king of France gave to it all the territory of Savigny. Thibaud de Blois presented it with two priories, and built for it an infirmary. Money and other valuable gifts were offered at its shrine, and at the death of its founder, in 1116, it was in a most flourishing condition. At the time of its greatest prosperity there were under its control eleven abbeys, forty-four priories, and twenty-nine parishes,

scattered over France, England, and Scotland. In 1629 the Abbey of Tiron was added to the possessions of the Congregation of St. Maur, and from that time the Tironesians ceased to exist as a separate organization. See Helyot, *Ordres Religieux*, iii, 674.

**Tirosh.** See WINE.

**Tirsch**, LEOPOLD, a German scholar, apparently of Jewish extraction, who lived in the 18th century, is the author of *Disertatio de Characterum Antiquarum apud Hebræos ante Esdram Usu* (Prague, 1759) :—*Fundamenta Linguae Sanctæ* (ibid. 1766) :—*Hand-Lezikon der jüdisch-teutschen Sprache*, etc. (ibid. 1773) :—*Disertatio de Tabernaculorum Feriis, prout olim a Judæis gesta sunt, hodieque aguntur* (ibid. 1773) :—*Disertatio an Lingua Hebraica Omnium Antiquissima Primæque Habenda*, etc. (ibid. 1773) :—*Grammatica Hebræa; accedunt Syllabus Vocum Irregul. S. S. Ordine Alphab.* (ibid. 1784). See Firsi, *Bibl. Jud.* iii, 432; Steinschneider, *Bibliogr. Handb.* s. v. (B. P.)

**Tirsha'tha** [most *Tir'shatha*] (Heb. always with the article, *ha-Tirshatha'*, תִּרְשָׁתָּהּ; hence the Sept. gives the word Ἀρσασαθᾶ [v. r. Ἀρσασαθᾶ], Ezra ii, 63; Neh. vii, 65, and Ἀραρσασαθᾶ, Neh. x, 1; Vulg. *Athersatha*), the title of the governor of Judæa under the Persians, derived by Gesenius from the Persian root *tors*, signifying "stern," "severe." He compares the title *Gestrenger Herr*, formerly given to the magistrates of the free and imperial cities of Germany (comp. also our expression, "most dread sovereign"). It is added as a title after the name of Nehemiah (viii, 9; x, 1 [Heb. 2]); and occurs also in three other places (Ezra ii, 63, and the repetition of that account in Neh. vii, 65-70), where probably it is intended to denote Zerubbabel, who had held the office before Nehemiah. In the margin of the A. V. (Ezra ii, 63; Neh. vii, 65; x, 1) it is rendered "governor;" an explanation justified by Neh. xii, 26, where "Nehemiah the governor," תִּרְשָׁתָּהּ (*Pechâh*), probably from the same root as the word we write *pacha*, or *pasha*, occurs instead of the more usual expression "Nehemiah the Tirshatha." This word, תִּרְשָׁתָּהּ, is twice applied by Nehemiah to himself (v, 14, 18), and by the prophet Haggai (i, 1; ii, 2, 21) to Zerubbabel. According to Gesenius, it denotes the præfect or governor of a province of less extent than a satrapy. The word is used of officers and governors under the Assyrian (2 Kings xviii, 24; Isa. xxxvi, 9), Babylonian (Jer. li, 57; Ezek. xxiii, 6, 23; see also Ezra v, 3, 14; vi, 7; Dan. iii, 2, 3, 27; vi, 7 [Heb. 8]), Median (Jer. vii, 28), and Persian (Ezra. viii, 9; ix, 3) monarchies. Under this last we find it applied to the rulers of the provinces bordered by the Euphrates (Ezra viii, 36; Neh. ii, 7, 9; iii, 7), and to the governors of Judæa, Zerubbabel and Nehemiah (comp. Mal. i, 8). It is found also at an earlier period in the times of Solomon (1 Kings x, 15; 2 Chron. ix, 14) and Benhadad king of Syria (1 Kings xx, 24), from which last place, compared with others (2 Kings xviii, 24; Isa. xxxvi, 9), we find that military commands were often held by these governors; the word, indeed, is often rendered by the A. V., either in the text or the margin, "captain." By thus briefly examining the sense of *Pechâh*, which (though of course a much more general and less distinctive word) is given as an equivalent to *Tirshatha*, we have no difficulty in forming an opinion as to the general notion implied in it. We have, however, no sufficient information to enable us to explain in detail in what consisted the special peculiarities in honor or functions that distinguished the Tirshatha from others of the same class, governors, captains, princes, rulers of provinces. See GOVERNOR.

**Tir'sah** (Heb. *Tirsaah'*, תִּרְצָה, *delight*; Sept. Ἀρσασᾶ v. r. [in the case of No. 2] Ἀρσασᾶ and Ἀρσασᾶ; Vulg. *Thersa*), the name of a woman and also of a place. See also CYPRESS; TIZITE.

1. The last named of the five daughters of Zelophead, of the tribe of Manasseh, whose case originated the

law that in the event of a man dying without male issue his property should pass to his daughters (Numb. xxvi, 33; xxvii, 1; xxxvi, 11 [where she is named second]; Josh. xvii, 3). See ZELOPHEHAD.

2. An ancient Canaanitish city, whose king is enumerated among the twenty-one overthrown in the conquest of the country (Josh. xii, 24). From that time nothing is heard of it till after the disruption of Israel and Judah. It then reappears as a royal city—the residence of Jeroboam (1 Kings xiv, 17; Sept. *Σαριφά*, i. e. ? *Zareda*), and of his successors, Baasha (xv, 21, 33), Elah (xvi, 8, 9), and Zimri (ver. 15). It contained the royal sepulchres of one (ver. 6), and probably all the first four kings of the northern kingdom. Zimri was besieged there by Omri, and perished in the flames of his palace (ver. 18). The new king continued to reside there at first, but after six years he left it to his son Ahab (q. v.), at that time raised to the viceroyship; and removed to a new city which he built and named Shomron (Samaria), and which continued to be the capital of the northern kingdom till its fall. Once, and once only, does Tirzah reappear, as the seat of the conspiracy of Menahem ben-Gaddi against the wretched Shallum (2 Kings xv, 14, 16); but as soon as his revolt had proved successful, Menahem removed the seat of his government to Samaria, and Tirzah was again left in obscurity. Its reputation for beauty throughout the country must have been wide-spread. It is in this sense that it is mentioned in the Song of Solomon, where the juxtaposition of Jerusalem is sufficient proof of the estimation in which it was held—"Beautiful as Tirzah, comely as Jerusalem" (Cant. vi, 4). The Sept. (*εὐδokia*) and Vulg. (*suavis*) do not, however, take *tirtzah* as a proper name in this passage. Its occurrence here on a level with Jerusalem has been held to indicate that the Song of Songs was the work of a writer belonging to the northern kingdom. But surely a poet, and so ardent a poet as the author of the Song of Songs, may have been sufficiently independent of political considerations to go out of his own country—if Tirzah can be said to be out of the country of a native of Judah—for a metaphor. See CANTICLES.

Eusebius (*Onomast.* s. v. *Θαριλά*) mentions it in connection with Menahem, and identifies it with a "village of Samaritans in Batanea." There is, however, nothing in the Bible to lead to the inference that the Tirzah of the Israelitish monarchs was on the east of Jordan. Josephus merely mentions it (*Θαριή*, *Ant.* viii, 12, 5). It is nowhere stated to what tribe this town belonged; but Adrichomius (*Theat. T. S.* p. 74) and others place it in Manasseh. Lightfoot (*Chorograph. Cent.* c. 88) seems to suspect that Tirzah and Shechem were the same; for he says that "if Shechem and Tirzah were not one and the same town," it would appear that Jeroboam had removed when his son died from where he was when he first erected his idols (comp. 1 Kings xii, 25; xiv, 17). It does not appear to be mentioned by the Jewish topographers, or any of the Christian travellers of the Middle Ages, except Brocardus, who places "Thersa on a high mountain, three leagues (*leuce*) from Samaria to the east" (*Descriptio Terræ Sanctæ*, vii, 13). This is exactly the direction, and very nearly the distance, of *Tellizah*, a place in the mountains north of Nablûs, which was visited by Robinson (*Bibl. Res.* iii, 302) and Van de Velde in 1852 (*Syr. and Pal.* iii, 334). The town is on an eminence, which towards the east is exceedingly lofty, though, being at the edge of the central highlands, it is more approachable from the west. The place is large and thriving, but without any obvious marks of antiquity (Robinson, *Later Res.* p. 302). Lieut. Conder, however, suggests the identity of Tirzah with a "mud hamlet" called *Teidâr*, twelve miles east of Jeba, which he found to have been once a place of importance, judging from the numerous rock-cut sepulchres burrowing under the houses, the fertile lands and fine olives around, and the monument of good masonry, apparently a Roman tomb. The position is beautiful,

and the old main road leads to the place from Shechem (*Tent-Work in Palest.* i, 108).

**Tischendorf**, LOBEGOTT FRIEDRICH CONSTANTIN VON, the most prominent scholar in the department of New-Test. palæography, was born Jan. 18, 1815, at Lengenfeld, in Saxony. Having been prepared at the gymnasium at Plauen for the university, he entered, at Easter, 1834, aged nineteen, the halls of Leipsic. Here Gottfried Hermann and Georg Benedict Winer were among his teachers. At the close of 1836 he received a prize medal for an essay on *Doctrina Pauli Apostoli de Vi Mortis Christi Satisfactoria*, which he published at Leipsic in 1837. A second prize was awarded to him in the year 1838 on *Disputatio de Christo, Pate Vitas, sive de Loco Evang. Joann. c. vi, vv. 51-59, Cæna Sacra Potissimum Ratione habita* (ibid. 1839). At the same time, he took his degree of doctor of philosophy. In 1840 he published *Dissertatio Critica et Exegetica de Ev. Matt. c. xiz, 16 sq.*, and was promoted as licentiate of theology; in the same year he qualified as privat-docent of theology by publishing *De Recensio-nibus quas dicunt Novi Testamenti Ratione Potissimum habita Scholzi* (ibid.; reprinted in the Prolegomena to the Greek Testament published in 1841). In this essay, as Kahnis rightly remarked, he gave to the world the programme of his theological future. In October, 1839, he began to prepare a critical hand-edition of the Greek New Test., which was published in 1841 under the title *Novum Testamentum Græce: Textum ad Fidem Antiquorum Testium Recens. Brevem Apparatum Crit. una cum Variis Lectionibus Elzer., Knappii, Scholzii, Luchmanni subjunxit*, etc. (ibid.). In 1840 Tischendorf went to Paris. The library there contained a celebrated palimpsest. A manuscript of the Bible from early in the 5th century had been cleaned off in the 12th century, and used for writings of Ephraem Syrus. What no mortal had been able to do before, Tischendorf did, and with the aid of chemical reagents he completely restored the original text. The University of Breslau acknowledged his merit by bestowing on him the title of doctor of theology. Meanwhile he also collated the Paris manuscripts of Philo for Prof. Grossmann at Leipsic, and the only remaining manuscript of the 60th book of the Basilicas for Dr. Heimbach at Jena. F. Didot, the publisher, bargained with Tischendorf for a reissue of his Leipsic edition, which appeared at Paris in 1842; and then abbé Jager, a professor in the Sorbonne, begged him to edit a Greek text that should conform as nearly as possible to the Vulgate, which was also published in the same year. In 1841 and 1842 he visited the libraries in Holland, London, Cambridge, and Oxford. Early in 1843 he left Paris for Rome, on the way working four weeks on the Codex E of the gospels at Basle. In Italy he stayed more than a year, and used his time in the best possible manner. When his Italian researches were completed, he prepared to start for his first Eastern journey in 1844, which he repeated again in 1853 and 1859. On his third journey, in 1859, he discovered the famous *Codex Sinaiticus*. After his return he was made ordinary professor of the Leipsic University, and a special chair of sacred palæography was made for him. From this time on, he spent the remainder of his life in publishing the results of his amassed materials, collected on his different journeys, of which we shall speak further on. On May 5, 1873, he was seized with apoplexy; he recovered somewhat from the attack, but in November, 1874, the malady grew worse, and on Dec. 7, 1874, he passed away. His funeral took place on the 10th, at which Drs. Ahlfeld, Kahnis, Luthardt, and others made addresses.

Probably no theologian ever received so varied and so many signs of distinction, academic and civil. He was made a Russian noble, a Saxon privy-councillor, knight of many orders, doctor of all academic degrees, and member of an indefinite number of societies. When, in 1855, king Friedrich Wilhelm IV of Prussia (brother of the present emperor of Germany) said to him, "You

are predestined to discoveries; wherever they are possible, there you are to make them," he only proved himself a true prophet; and only a man of such uncommon quickness, keenness, energy, and ambition as Tischendorf could achieve what he brought about. "What Wettstein and Bengel began," said his colleague Luthardt, "what Hug and Lachmann carried on, he brought nearly to completion in a way which leaves the labors of his predecessors far behind." And "whoever," said Kahnis, "in the future outstrips him will do it only on the road which Tischendorf marked out; whoever overcomes him will do so only by the weapons which he himself has furnished." Complaint has been made of his changes of opinion, a reading not unfrequently being confidently adopted in one issue and as confidently rejected in the next, or *vice versa*. But how could it be otherwise, when the evidences in the case were constantly increasing in number and clearness? As the illustrious scholar said in his last will, "I have sought no other aim than truth; to her I have always unconditionally bowed the knee." No pride of opinion, no zeal for consistency, was allowed to stand in the way. He was, doubtless, unconsciously biased in favor of the authorities he himself had brought to light; but his purpose was to set forth the exact text of the original without regard to dogmatic or personal considerations.

As to his publications, they are very numerous. We must here pass over his essays, reviews, etc., and shall confine ourselves to his most important works. Besides those already mentioned, they are, in chronological order, *Codex Ephraemi Syri Rescriptus* (Lips. 1843-45, 2 vols.):—*Monumenta Sacra Inedita sive Reliquiae Antiquissimae Textus Novi Testam. Graeci*, etc. (ibid. 1846):—*De Israelitarum per Mare Rubrum Transitu* (ibid. 1847):—*Evangelicum Palatinum Ineditum sive Reliquiae Textus Evangeliorum Latini ante Hieron. versi ex Cod. Palatino Purpureo in vel. v. p. Chr. Saeculi* (ibid. 1847):—*Novum Test. Graec.* (ibid. 1850; 2d ed. 1862, and often):—*Vetus Test. Graece juxta LXX Interpretes: Textum Vat. Romanum emendatius editum*, etc. (ibid. 1850, 2 vols.; 2d ed. 1856; 3d ed. 1860; 4th ed. 1869; 6th ed. 1880):—*Codex Amiatinus sive N. T. Latine Interprete Hieronymo* (ibid. 1850; 2d ed. 1854):—*De Evangeliorum Apocryphorum Origine et Usu*, etc. (Hagae, 1851):—*Acta Apostolorum Apocrypha* (Lips. 1851):—*Synopsis Evangelica* (ibid. 1851; 2d ed. 1854; ed. ii emend. 1864; ed. iii emend. 1871; transl. into Tamil by H. Schanz, Tranquebar, 1868):—*Codex Claromontanus sive Epistulae Pauli Omnes Gr. et Lat. ex Cod. Paris. Celebrerrimo*, etc. (ibid. 1852):—*Evangelia Apocrypha* (ibid. 1853):—*N. T. Trilogium, Gr. Lat. Germanice*, etc. (ibid. 1854; 2d ed. 1865):—*N. T. Graece: Editio Academica* (ibid. 1855, and often):—*Monumenta Sacra Inedita: Nova Collectio* (1855-70, 7 vols.):—*Pilati circa Christum Judicio quid Lucis Afferatur ex Actis Pilati* (ibid. 1855):—*Anecdota Sacra et Profana ex Oriente et Occidente Allata*, etc. (ibid. 1855; 2d ed. 1861):—*Hermæ Pastor Graece*. (ibid. 1856):—*N. T. Gr. et Lat., ex Trilogitis* (ibid. 1858):—*N. T. Graec.: Editio Septima Critica Major* (ibid. 1859), and *Editio Septima Critica Minor* (ibid.):—*Notitia Editionis Codicis Bibliorum Sinaitici Auspiciis Imperatoris Alexandri II Suscepta* (ibid. 1860):—*Bibliorum Codex Sinaiticus Petropolitianus*, etc. (Petropoli, 1862, 4 vols. fol.):—*N. T. Sinaiticum sive N. T. cum Epistula Barnabæ et Fragmentis Pastoris* (Lips. 1863):—*N. T. Graece et Germanice, ex Trilogitis* (ibid. 1864):—*N. T. Latine: Textum Hieronymi Notata Clementina Lectione*, etc. (ibid. 1864):—*N. T. Gr., ex Sinaitico Codice Omnium Antiquissimo Vaticana itemque Elzeviriana Lectione Notata* (ibid. 1865):—*Wann wurden unsere Evangelien verfasst?* (ibid. 1865, and often). Of this little book there are three French, English, and American translations, two Swedish, and one each of Danish, Dutch, Italian, Russian, and Turkish:—*Apocalypses Apocryphae Moysi, Esdrae, Pauli, Johannis*, etc. (ibid. 1866):—*N. T. Vaticanum, post Angelî Mai aliorumque Imperfectos Codices ex ipso Codice editum* (ibid. 1867):—*Appendix Librorum Celebrerrimorum Sinaitici*

*Vaticani Alexandrini* (ibid. 1867):—*Philonea Inedita Altera*, etc. (ibid. 1868):—*N. T. Gr., ad Antiquiss. Testes denuo Rec. Apparatum Criticum Omni Studio Perfectum* (ibid. 1869-72, 2 vols.); the third vol., containing *Prolegomena*, is now in preparation by Dr. Oscar Gebhardt:—*The New Testament: the Authorized English Version, with Introductions and Various Readings from the three most Celebrated Manuscripts of the Original Greek Text* (ibid. 1869); 45,000 copies were sold in the first year:—*Appendix Novi Testam. Vaticani*, etc. (ibid. 1869):—*Conlatio Critica Cod. Sin. cum Textu Elzeviriano Vatic.* etc. (ibid. 1869):—*Responsa ad Calumnias Romanas* (ibid. 1870):—*Die Sinaiibibel*, etc. (ibid. 1871):—*N. T. Graece, ad Antiquissimos Testes denuo recensuit: Editio Critica Minor ed. viii Majore Desumpta* (1872), vol. i:—*Clementis Romani Epistulae* (ibid. 1873):—*Biblia Sacra Latina Veteris Testam. Hieronymo Interprete*, etc. Editionem instituit suatore Chr. Car. Jos. de Bunsen, Th. Heyse, ad finem perduxit C. de T. (ibid. 1873):—*N. T. Gr., ad Editionem suam viii Crit. Majorem conformavit, Lectionibusque Sinaiticis et Vaticanis item Elzevirianis instruit* (ibid. 1873):—*Liber Psalmorum Hebr. atque Lat. ab Hieronymo ex Hebraeo Conversus*. Consociata Opera edd. C. de T., S. Bär, Fr. Delitzsch (ibid. 1874). From the rich material left behind, we may expect still other works. Besides these works, we must mention his *Reise in den Orient* (Leips. 1846, 2 vols.; Engl. transl. by W. L. Shuckard, *Travels in the East* [Lond. 1847]):—*Aus dem heiligen Lande* (ibid. 1862; transl. into French and Swedish):—*Rechenchaft über meine handschriftlichen Studien auf meiner wissenschaftlichen Reise*, published in the *Jahrbücher der Literatur*:—and papers in the *Anzeige-Blatt*. The *Leipziger Repertorium der deutschen und ausländischen Literatur*, the *Augsburger Allgemeine Zeitung*, the *Serapeum*, and *Studien und Kritiken* also contain a vast amount of information from his pen, as may be seen from the list of Tischendorf's writings furnished by Mr. Gregory for the *Bibliotheca Sacra*, 1876, p. 183 sq.

See Volbeding, *Constantin Tischendorf in seiner 25-jährigen wissenschaftlichen Wirksamkeit: Literar.-histor. Skizze* (Leips. 1862); *Beilage zur allgemeinen evangelisch-lutherischen Kirchenzeitung*, 1874, No. 50 (ibid.); *Am Sarge und Grabe des Dr. Theol. Constantin Tischendorf: Fünf Reden und Ansprachen, nebst einem Rückblick auf das Leben und einem Verzeichniss sämtlicher Druckwerke des Verstorbenen* (ibid. 1875); Abbot, *The late Professor Tischendorf* (reprinted from the *Unitarian Review and Religious Magazine* for March, 1875); Gregory, *Tischendorf*, in *Biblioth. Sacra* (Andover, 1876), p. 153 sq.; *Theologisches Universal-Lex.* s. v.; *Literarischer Handweiser für das katholische Deutschland*, 1875, p. 417 sq.; Zuchold, *Biblioth. Theolog.* ii, 1341 sq. (B. P.)

**Tischer**, JOHANN FRIEDRICH WILHELM, a German Protestant divine, was born at Tautschen, near Torgau, in the year 1767. In 1792 he was called to the pastorate of his native city; in 1794 he was appointed superintendent at Jüterbogk; four years later he was called to Plauen, and in 1823 to Pirna, having in the meantime received the degree of doctor of theology. He died in the latter place in 1842. He published, *Scholia in Loc. Gal. iii.* 1-20 (Wittenb. 1802):—*Psychologische Predigtentwürfe* (Leips. 1795):—*Die Hauptstücke der christlichen Religion* (33d ed. ibid. 1852):—*Das Christenthum in den Hauptstücken unserer Kirche* (2d ed. ibid. 1837):—*Ueber das menschliche Herz und seine Eigenheiten* (ibid. 1829-43, 4 vols.), sermons:—*Die Pflicht der Kirchlichkeit aus den Gesetzen der Seelenlehre bewiesen* (ibid. 1836):—and a number of other sermons and essays. See Zuchold, *Bibl. Theolog.* ii, 1343; Winer, *Handbuch der theol. Literatur*, i, 262; ii, 161, 197, 228, 314, 321, 334. (B. P.)

**Tish'bite** (Heb. *Tishbi'*, תִּשְׁבִּי, apparently a gentile adj.; Sept. *ῥεσβίτης*; Vulg. *Thesbites*), the constant designation of the prophet Elijah (1 Kings xvii, 1; xxi,

17, 28; 2 Kings i, 3, 8; ix, 36). The following explanations have been given of this obscure epithet:

1. The name naturally points to a place called *Tishbah*, *Tishbeh*, *Tishbi*, or rather perhaps *Teshbe*, as the residence of the prophet. Indeed, the word תִּשְׁבִּי, which follows it in 1 Kings xvii, 1, and which in the received Hebrew text is so pointed as to mean "from the residents," may, without violence or grammatical impropriety, be pointed to read "from Tishbi." This latter reading appears to have been followed by the Sept. (Vat. ὁ Θεσβεῖτης ὁ ἐκ Θεσβῶν), Josephus (*Ant.* viii, 13, 2, πῶλεως Θεσβώνης), and the Targ. (רַבִּי תִּשְׁבִּי, "from out of Toshab"); and it has the support of Ewald (*Gesch.* iii, 468, note). It is also supported by the fact, which seems to have escaped notice, that the word does not in this passage contain the *ṭ* which is present in each one of the places where תִּשְׁבִּי is used as a mere appellative noun. Had the *ṭ* been present in 1 Kings xvii, 1, the interpretation "from Tishbi" could never have been proposed.

Assuming, however, that a town is alluded to as Elijah's native place, it is not necessary to infer that it was itself in Gilead, as Epiphanius, Adrichomius, Castell, and others have imagined; for the word תִּשְׁבִּי, which in the A. V. is rendered by the general term "inhabitant," has really the special force of "resident" or even "stranger." This and the fact that a place with a similar name is not elsewhere mentioned have induced the commentators, geographers, and lexicographers, with few exceptions, to adopt the name "Tishbite" as referring to the place תִּישְׁבֵּז (תִּישְׁבֵּז) in Naphtali, which is found in the Sept. text of Tobit i, 2. The difficulty in the way of this is the great uncertainty in which the text of that passage is involved—an uncertainty quite sufficient to destroy any dependence upon it as a topographical record, although it bears the traces of having originally been extremely minute. Bunsen (*Bibelwerk*, note to 1 Kings xvii, 1) suggests in support of the reading "the Tishbite from Tishbi of Gilead" (which, however, he does not adopt in his text) that the place may have been purposely so described, in order to distinguish it from the town of the same name in Galilee.

2. But תִּשְׁבִּי has not always been read as a proper name, referring to a place. Like מִיִּשְׁבִּי, though exactly in reverse, it has been pointed so as to make it mean "the stranger." This is done by Michaelis in the text of his interesting *Bibel für Ungelehrten*—"Der Fremdling Elia, einer von den Fremden, die in Gilead wohnhaft waren;" and it throws a new and impressive air around the prophet, who was so emphatically the champion of the God of Israel. But this suggestion does not appear to have been adopted by any other interpreter, ancient or modern.

The numerical value of the letters תִּשְׁבִּי is 712, on which account, and also doubtless with a view to its correspondence with his own name, Elias Levita entitled his work, in which 712 words are explained, *Sepher Tishbi* (Bartolocci, i, 140 b). See ELIAH.

**Tisio** (or **Tisi**), **BENVENUTO**, called *Il Garofalo*, an eminent painter of the Ferrarese school, was born in 1481, received his first education under Domenico Panetti, then studied with Niccolò Soriani at Cremona, and next under Boccaccio Boccaccino. He went to Rome in 1499, where he remained fifteen months, and then travelled through various Italian cities, intending to settle down at Rome. Persuaded, however, by the solicitations of Panetti and by the commissions of duke Alphonso, he remained in his native place, Ferrara. His death took place in 1559. The works of Tisio are extremely valuable, and scarcely to be found outside of Italy. Among them we note, *Murder of the Innocents*, *Resurrection of Lazarus*, and *Taking of Christ*, in the Church of St. Francis at Ferrara; *St. Peter Martyr*, in the Church of the Dominicans; *Visitation of the Virgin*,

in the Palazzo Doria. See Spooner, *Biog. Dict. of the Fine Arts*, s. v.

**Tisri**, or rather **TISHRI** (תִּשְׁרִי, from תִּשְׂרָא, to begin), was the Rabbinical name of the first month of the civil and the seventh month of the ecclesiastical year, in which fell the festival of Atonement and that of Tabernacles. In 1 Kings viii, 2 it is termed the month of *Ethanim*, that is, the month of streaming rivers, which are filled during this month by the autumnal rains. It corresponds with our September–October. Tisri is one of the six names of months found in Palmyrene inscriptions, which, with other evidence, renders it very probable that the Jewish names of months form a member in a great series, which were extensively in use in the eastern parts of the world (see Benfey and Stern, *Ueber die Monatsnamen einiger alten Völker* [Berlin, 1836]). See MONTH.

**Ti'tan** (*Ti'tan*, usually in the plur. *Ti'tānes*, of uncertain derivation). These children of Uranus (Heaven) and Gaia (Earth) were [see **TITANES**], according to the earliest Greek legends, the vanquished predecessors of the Olympian gods, condemned by Zeus to dwell in Tartarus, yet not without retaining many relics of their ancient dignity (*Æsch. Prom. Vincet.* passim). By later (Latin) poets they were confounded with the kindred *Gigantes* (Horace, *Odes*, iii, 4, 42, etc.), as the traditions of the primitive Greek faith died away; and both terms were transferred by the Sept. to the Rephaim of ancient Palestine. See **GIANT**. The usual Greek rendering of *Rephaim* is indeed *Γιγάντες* (Gen. xiv, 5; Josh. xii, 4, etc.), or, with a yet clearer reference to Greek mythology, *γυγινεῖς* (Prov. ii, 18; ix, 18) and *Σεομάχοι* (Symmach.; Prov. ix, 18; xxi, 16; Job xxvi, 5). But in 2 Sam. v, 18, 22 "the valley of Rephaim" is represented by ἡ κοιλὰς τῶν τιτάνων instead of ἡ κοιλὰς τῶν γιγάντων (1 Chron. xi, 15; xiv, 9, 13); and the same rendering occurs in a Hexapl. text in 2 Sam. xxiii, 13. Thus Ambrose defends his use of a classical allusion by a reference to the old Latin version of 2 Sam. v, which preserved the Sept. rendering (*De Fide*, iii, 1, 4, "Nam et gigantes et vallem Titānum prophetici sermonis series non refugit. Et Essias Sirenas . . . dixit"). It can therefore occasion no surprise that in the Greek version of the triumphal hymn of Judith (xvi, 7) "the sons of the Titans" (*vioi Ti'tānwn*; Vulg. *filii Ti'tan*; old Lat. *filii Dathan*; *f. Tela*; *f. bellatorum*) stands parallel with "high giants," ὑψηλοὶ Γιγάντες, where the original text probably had יַעֲשָׂאִים וְיִבְרִיִּים. The word has yet another interesting point of connection with the Bible; for it may have been from some vague sense of the struggle of the infernal and celestial powers, dimly shadowed forth in the classical myth of the Titans, that several Christian fathers inclined to the belief that *Ti'tān* was the mystic name of "the beast" indicated in Rev. xiii, 18 (Irenæus, v, 80, 8, "Divinum putatur apud multos esse hoc nomen . . . et ostentationem quandam continet ultionis . . . et alias autem et antiquum, et fide dignum, et regale, magis autem et tyrannicum nomen . . . ut ex multis colligatur non forte *Ti'tan* vocetur qui veniet").

**Titānes**, in Greek mythology, were the children of Uranus and Gaia. There were twenty-two of them—namely, Oceanus, Ostasus, Adamus, Ophion, Anytus, Coeus, Andes, Hyperion, Crius, Olymbrus, Japetus, Ægaon, and Kronus (Saturn); Tethys, Rhea, Themis, Mnemosyne, Phoebe, Dione, Thia, Thrace, Euryphaessa. They represented the powers of nature as anciently and still engaged in wild combat. Uranus had thrown his first sons, the Hecatonchires (the fifty-armed), Briareus, Cottus, and Gyas (also Gyges), and the Cyclops Arges, Steropes, and Brontes, into Tartarus. Gaia became angry on this account, and incited the Titanes to rebel against their father, and for this purpose gave to Kronus a hook, with which he emasculated him (Uranus). All save Oceanus participated in the rebellion. Uranus

was dethroned, those pining in Tartarus liberated, and Kronus acknowledged as ruler, who, however, subjected again those who had been liberated to the tortures of Tartarus, with the Hecatonchires as their guards. Titanes was also the name of the divine beings descended from the Titanes, sometimes called Titanides, as Prometheus, Hecate, Latona, Pyrrha, Helios, and Selene. The name Titan has become very common to designate the god of the sun. A peculiar saying was that Bacchus was torn asunder by the Titanes. Bacchus is here represented to be the power of vegetation, which is broken by the satanic powers of the infernal region.

**Tithe** (מַעֲשֵׂה, *maaser*; Sept. and New Test. δέκαρη, occasionally δέκαρον or ἐπιδέκαρον; Vulg. *decimæ*; plur. מַעֲשֵׂרוֹת; *ai dikarai*; *decimæ*; from מַעֲשֵׂה, "ten;" Targum מַעֲשֵׂה עֶסְרָה, (תֵּן מִן עֶסְרָה), the tenth part both of the produce of the land and of the increase of the flock, enjoined in the Mosaic law to be devoted by every Israelite to the servants of the sanctuary, and to the hospitable meals provided on the festivals for the poor and needy (Lev. xxvii, 30-33; Numb. xviii, 21-32; Deut. xii, 5-18; xiv, 22-29; xxvi, 12-14). (The following treatment of the subject relates to Jewish tithes from Biblical and Rabbinical sources.

1. *The Mosaic Law respecting Tithes.*—The first enactment respecting tithes ordains that the tenth of all produce and of all animals is to be devoted to the Lord; that the predial or vegetable tithe may be redeemed if one fifth is added to its value; and that the mixed or animal tithe, which is unredeemable, is to be taken as it comes, without any selection, and without attempting to effect any change, else the original animal and the one substituted for it are both forfeited to the sanctuary (Lev. xxvii, 30-33). In the second mention of the tithe it is enacted that it is to be given to the Levites of the respective districts as a remuneration for their services in the sanctuary, since they were excluded from sharing in the division of the land of Canaan; that they are allowed to consume the tithe wherever they please (בְּכָל-מְקוֹם), and that from the tithe thus received they are to give a tenth to the Aaronites or priests (Numb. xviii, 21-32). In the third legislation on this point it is further commanded that the Israelites are to tithe the produce of the soil every year; that this vegetable tithe, together with the firstlings of the flock and herd, is to constitute the social and festive repast in the place of the sanctuary; that in case the sanctuary is too far off, the tithal produce is to be converted into money, which is to be taken to the metropolis, and there laid out in food for this entertainment, and that the Levite is to share with the family in this social meal. It is, moreover, ordained that at the end of every third year this vegetable tithe (מַעֲשֵׂה תְּבִיאָה) is not to be taken to the metropolis, but is to constitute hospitable and charitable meals at home, to which the Levite, the stranger, the fatherless, and the widow are to be invited (Deut. xii, 5-7, 17; xiv, 22-29). The triennial conversion of the second or vegetable tithe into entertainments for the poor is again enjoined in xxvi, 12-15, where it is also ordered that every Israelite shall make an exculpatory declaration that he has conscientiously performed the tithal command.

It will be seen that the book of Deuteronomy only mentions the second or vegetable tithe as well as its triennial conversion into the poor tithe, omitting altogether the first or Levitical tithe; while the books of Leviticus and Numbers, which discuss the Levitical tithe, pass over in silence the second or feast tithe. This has given rise to various theories among modern critics. Thus Ewald will have it that the Deuteronomist, writing during the period of the Jewish monarchy, when the Levitical tithe, as enacted in Leviticus and Numbers, could no longer be continued as a regular rate in consequence of the new taxes imposed by the

X.—E e

sovereigns, endeavored to bring the tithe back to its original form of a voluntary offering (*Die Aelterthümer des Volkes Israel*, p. 346). Knobel (*Comment. on Lev.* p. 419, 590) regards Deut. xii, 6, 11; xiv, 22-29; xxvi, 12, as proceeding from the later Jehovistic legislator who lived towards the end of the kingdom of Judah, and who substituted for the older Elohist annual vegetable and animal tithe, which was no longer practicable, the triennial vegetable tithe which was to be devoted to the hospitable meals whereunto the Levites, together with the stranger, widow, orphans, and poor, were to be invited. Bishop Colenso (*The Pentateuch and the Book of Joshua Critically Examined*, iii, 476), who also regards the enactments in Leviticus, Numbers, and Deuteronomy as referring to one and the same tithe, finds "the most complete contradiction between the two sets of laws." Against these theories, however, is to be urged that—*a.* The tithal enactment in Deuteronomy has nothing whatever to do with the one in Leviticus and Numbers, and is therefore neither intended to contravene nor supersede it. *b.* The Deuteronomist presupposes the existence and force of the Levitical tithe as the fixed income of the ministers of the sanctuary, and designs the second tithe to be in force by its side. This is evident from the fact that the book of Deuteronomy (x, 9; xii, 19; xiv, 27, 29), like the books of Leviticus and Numbers, legislates upon the basis of Levitical poverty, and frequently refers to the care to be taken of the Levites. Now if, according to the above-named hypothesis, we are to regard the triennial tithe as substituted in the place of the original Levitical tithe, we are shut up to the preposterous conclusion that the only provision made by the Deuteronomist for the Levites is an ample meal once in three years. *c.* The mention of the second tithe by the Deuteronomist alone is owing to the fact that it is connected with the fixing of the central sanctuary, the rites and regulations of which he alone discusses. *d.* The post-exilic practice of the Jews shows beyond the shadow of a doubt that the nation for whom these tithal laws were passed understood the enactment in Deuteronomy to mean a second tithe as in force side by side with the first or Levitical tithe enjoined in Leviticus and Numbers (Tobit i, 7; Josephus, *Ant.* iv, 8, 22; Mishna, *Maaser Shen*). This also sets aside the objection urged by some that a double tithe would be too heavy and unbearable a tax. For if the Jews did not find it so in later times, when under the rule of foreign sovereigns, and paying heavy rates to them, surely they could not have found the double tithe too grinding an oppression during the independence of the State, especially when it is remembered that the second tithe was devoted to festive repasts of the respective families at which the Levites, the strangers, the widows, orphans, etc., were simply guests.

From all this we gather: 1. That one tenth of the whole produce of the soil was to be assigned for the maintenance of the Levites. 2. That out of this the Levites were to dedicate a tenth to God for the use of the high-priest. 3. That a tithe, in all probability a second tithe, was to be applied to festival purposes. 4. That in every third year either this festival tithe or a third tenth was to be eaten in company with the poor and the Levites. The question thus arises, were there three tithes taken in this third year, or is the third tithe only the second under a different description? That there were two yearly tithes seems clear, both from the general tenor of the directions and from the Sept. rendering of Deut. xxvi, 12. But it must be allowed that the third tithe is not without support. *a.* Josephus distinctly says that one tenth was to be given to the priests and Levites, one tenth was to be applied to feasts in the metropolis, and that a tenth besides these (τρίτην πρὸς αὐταῖς) was every third year to be given to the poor (*Ant.* iv, 8, 22). *b.* Tobit says he gave one tenth to the priests, one tenth he sold and spent at Jerusalem, i. e. commuted according

to Deut. xiv, 24, 25, and another tenth he gave away (Tobit i, 7, 8). c. Jerome says one tenth was given to the Levites, out of which they gave one tenth to the priests (δευτεροδικία); a second tithe was applied to festival purposes, and a third was given to the poor (πρωδοδικία) (Com. on Ezek. xlv, i, 565). Spencer thinks there were three tithes. Jennings, with Mede, thinks there were only two complete tithes, but that in the third year an addition of some sort was made (Spencer, *De Leg. Hebr.* p. 727; Jennings, *Jewish Ant.* p. 183).

On the other hand, Maimonides says the third and sixth years' second tithe was shared between the poor and the Levites, i. e. that there was no third tithe (*De Jur. Paup.* vi, 4). Selden and Michaelis remark that the burden of three tithes, besides the first-fruits, would be excessive. Selden thinks that the third year's tithe denotes only a different application of the second, or festival, tithe, and Michaelis that it meant a surplus after the consumption of the festival tithe (Selden, *On Tithes*, ii, 13; Michaelis, *Laws of Moses*, § 192, iii, 143, ed. Smith). Against a third tithe may be added Reland, *Ant. Hebr.* p. 359; Jahn, *Ant.* § 389; Godwyn, *Moses and Aaron*, p. 136, and Carpzov, p. 621, 622; Keil, *Bibl. Arch.* § 71, i, 337; Saalschütz, *Hebr. Arch.* i, 70; Winer, *Realwörterb.* s. v. "Zehute."

Of these opinions, that which maintains three separate and complete tithings seems improbable as imposing an excessive burden on the land, and not easily reconcilable with the other directions; yet there seems no reason for rejecting the notion of two yearly tithes when we recollect the especial promise of fertility to the soil conditional on observance of the commands of the law (Deut. xxviii). There would thus be, (1) a yearly tithe for the Levites; (2) a second tithe for the festivals, which last would, every third year, be shared by the Levites with the poor. It is this poor man's tithe which Michaelis thinks is spoken of as likely to be converted to the king's use under the regal dynasty (1 Sam. viii, 15, 17; Michaelis, *Laws of Moses*, i, 299). Ewald thinks that under the kings the ecclesiastical tithe system reverted to what he supposes to have been its original free-will character.

II. *Classification of and Later Legislation upon the Tithes.*—It will be seen from the above description that the tithes are divisible into four classes. As the anxiety to pay them properly called forth more minute definitions and further expansions of the Pentateuchal enactments, we shall give the most important practices which obtained during the second Temple in connection with each of these four classes of tithes.

1. *The Levitical, or first, tithe* (מַעֲשֵׂר ראשון). This tithe was paid after both the first-fruit (פְּרִיָּה) and the priestly heave-offering (תְּרוּמָה) had been separated, the amount of which, though not fixed in the Mosaic law, was generally one fiftieth of the produce (comp. Exod. xxiii, 19; Deut. xxvi, 1, etc., with Mishna, *Bikkurim*; Numb. xviii, 8; Deut. xviii, 4, with Mishna, *Terumoth*, iii, 7; iv, 3; Maimonides, *Iud Ha-Chesaku*, *Hilchoth Mathanuth Anjim*, vi, 2). As the Mosaic law does not define what things are subject to this tithe, but simply says that it is to consist of both vegetables and animals (Lev. xxvii, 30 sq.), the Jewish canons enacted that as to the produce of the land "whatsoever is esculent, though still kept in the field, and derives its growth from the soil, is tithable; or whatsoever may be eaten from the commencement to the completion of its growth, though left in the field to increase in size, is tithable, whether small or great; and whatsoever cannot be eaten at the beginning, but can only be eaten at the end of its growth, is not tithable till it is ripe for food" (Mishna, *Maasereth*, i, 1). It will be seen that this definition embraces even the smallest kitchen herbs and aromatic plants; and that it explains the remark of our Saviour that tithe was paid of mint, dill, and cummin, which he, however, did

not condemn, but, on the contrary, said, "These ought ye to have done" (Matt. xxiii, 23; Luke xi, 42; comp. Mishna, *Maasereth*, i, 2-8). The animals subject to this Levitical tithe are still more indefinitely described in the Pentateuchal statute, which simply says, "As to all the tithe of herds and flocks, whatsoever passeth under the rod, the tenth shall be holy unto the Lord" (Lev. xxvii, 32). It will be seen that this law does not say whether the tenth is to be paid of the newly born animals, whether it includes those newly purchased or exchanged, whether it is payable if a man has less than ten cattle, or at what age of the animals the tithe becomes due. The spiritual heads of the people had therefore most minutely to define these points so as to make the tithal law practicable. Hence the following canons obtained: All animals are tithable except those which are born of heterogeneous copulation (comp. Deut. xxii, 9), which are damaged, which have come into the world irregularly, or which are bereaved of their mother; which have been purchased or received as presents. They are only tithable when there are ten newly born of the same kind, so that the offspring of oxen and small cattle must not be put together to make up the requisite number, nor are even those to be put together which are born in different years, though they belong to the same kind. Sheep and goats may be tithed together, provided they have all been born in the same season (Mishna, *Bekoroth*, ix, 3, 4). The tithing is to take place three times in the year, about fifteen days before each of the three great festivals—viz. (a) on the first of Nisan, being fifteen days before Passover; (b) on the first of Sivan, being only five days before Pentecost, because the small number of animals born between these two festivals could not suffice for the celebration of Pentecost if the second tithe term were to be fifteen days before this festival; and (c) on the twenty-ninth of Elul instead of the first of Tisri, which is, properly speaking, fifteen days before Tabernacles, because the first of Tisri is the Feast of Trumpets, or New Year. See FESTIVAL. Those which were born in the month of Elul were tithed by themselves (ibid. *Rosh hash-Shamah*, i, 1, with *Bekoroth*, ix, 5, 6). On each of the three occasions the herds of every owner extending over a pasture-ground not exceeding sixteen Roman miles were collected together into one fold, while those beyond the prescribed limits formed a separate lot. In the pen wherein the herd was thus gathered a small door was made which only admitted of one animal going out at a time, and the owner placed himself at this narrow opening, holding a rod or staff in his hand wherewith he counted each animal as it made its exit from the fold till he came to the tenth, which he marked with red color, saying, "This is the tithe" (ibid. *Bekoroth*, x, 7). The command "whatsoever passeth under the rod" (Lev. xxvii, 32) was thus literally carried out.

2. *The priestly tithe*, also called *tithe of the tithe* (מַעֲשֵׂר מִן הַמַּעֲשֵׂר, Numb. xviii, 26), the heave-offering of the tithe (תְּרוּמַת הַמַּעֲשֵׂר, ἀποσπῆξις ἀπ'αρχῆς (Philo, *De Nom. Mut.*), or δευτεροδικία (Jerome, on Ezek. xlv). This tithe had to be separated by the Levite from the tenth he had received from the Israelite. It had to be given to the priests in Jerusalem (Neh. x, 38) before the Levite could use the rate paid to him. It had, moreover, to be a tenth part of the very tithe which the Levites received, and was therefore subject to the same laws and regulations to which the Levitical tithe was subject. After the Babylonian captivity, when the Levitical tithe was divided (see below), this so-called *tithe of tithes* necessarily ceased. Hence the priests, instead of receiving a tenth of the Levitical tithe as heretofore, took their share directly from the people (Heb. vii, 5). See SCRIBE.

3. *The second tithe* (מַעֲשֵׂר שֵׁנִי, δευτεροδικία). This festival tithe could not be sold, nor given or received as a pledge, nor used as weight, nor exchanged,

but might be given away as a present (Mishna, *Maaser Sheni*, i, 1). If the distance to the national sanctuary was so great as to preclude the possibility of conveying it in kind, it might be converted into specie, and the money could only be expended in the metropolis in ordinary articles of food, drink, and ointment for the festival meals or festival sacrifices which were eaten at these social repasts (שְׁלֵמִים וְזֶבַח, *ibid.* i, 7; iii, 2; *Chagigah*, i, 3). There were storehouses (אֶצְרוֹת, *ibid.* i, 3) in one part of the Temple, under the superintendence of priests and Levites, in which the tithe was kept (2 Chron. xxxi, 11-14; Neh. x, 38, 39; xii, 44; xiii, 12; Josephus, *Ant.* x, 8).

4. *The triennial, or poor, tithe* (שְׁנֵי שָׁנִים, *πρωτοδεκάρα*), also called the *third tithe* (שְׁלִישִׁי שָׁנָה, ἡ *τριτη δεκάρα*, Tobit i, 7; Josephus, *Ant.* iv, 8, 22), and the *second tithe* (δευτερον δεκάρα, Sept., Deut. xxvi, 12), because it was properly the second tithe converted into the poor tithe, to be given to and consumed by the poor at home, instead of conveying it to the metropolis to be eaten by the owner. As every seventh year was a fallow year not yielding a regular harvest, it was enacted that the second tithe should be eaten in Jerusalem by the owner thereof and his guests in the first, second, fourth, and fifth years of the septennial cycle, and be given to the poor in the third and seventh years. It will thus be seen that the whole series of taxes reached its completion at the end of every third and seventh year, or on the eve of Passover of the fourth and seventh years. Hence it is that the third year is denominated the *year of tithe* (שָׁנָה הַפְּסֻקָה)—i. e. when all the tithes had taken their rounds (Deut. xxvi, 12), and not because, as some critics will have it, the annual tithe of the earlier legislator was afterwards changed by the Deuteronomist into a triennial tithe. Hence, too, the spiritual heads of the Jewish people in and before the time of Christ constituted and denominated the Preparation Day of Passover of the fourth and seventh years a day of searching and removal (בְּצִירָה) in accordance with Deut. xxvi, 12 (Mishna, *Maaser Sheni*, v, 6), when every Israelite had to separate all the tithes which he ought to have paid in the course of the three years, but which, either through negligence or through some untoward circumstances, he had failed to do. At the evening sacrifice on the last day of Passover, every pilgrim, before preparing to return home, had to offer a prayer of confession, in accordance with ver. 13. As this confession (יְרִיבָה) is an expansion and traditional exposition of ver. 13-15, which accounts for the Chaldee and other versions of the passage in question, we give it entire: "I have removed the hallowed things from the house" (i. e. the second tithe and the quadrennial fruit [Lev. xix, 23, etc.]); "have given it to the Levite" (i. e. the Levitical tithe); "and also given it" (i. e. the priestly offering and the priestly tithe) "to the stranger, to the fatherless, and to the widow" (i. e. the poor tithe). . . "from the house" (i. e. from the dough [comp. Numb. xv, 17, etc.]) "according to all thy commandments which thou hast commanded me" (i. e. not given the second tithe before the first). "I have not transgressed thy commandments" (i. e. not paid one kind for the other, the cut for the standing, the standing for the cut, the new for the old, nor the old for the new). "I have not forgotten" (i. e. to thank thee and to remember thy name thereby). "I have not eaten thereof in my mourning. . . I have not given thereof to the dead" (i. e. for coffins, shrouds, or mourners). "I have hearkened to the voice of the Lord my God" (i. e. have taken it to the chosen sanctuary). "I have done all that thou hast commanded me" (i. e. have rejoiced and caused others to rejoice therewith), etc. (Mishna, *Maaser Sheni*, v, 10-13). In the two years of the septennial cycle, when the second tithe was converted into the poor tithe, there was no additional second tithe, in-

asmuch as the poor tithe took its place (Maimonides, *Iad Ha-Chezaka, Hilchoth Mathanuth Anjim*, vi, 4). The poor could go into a field where the poor tithe was lying and demand of the owner to satisfy their wants. The minimum quantity to be given to them was defined as follows: If the tithe be of wheat,  $\frac{1}{2}$  cab; barley, 1 cab; spelt, 1 cab; lenten-figs, 1 cab; cake-figs, the weight of 25 sici; wine,  $\frac{1}{2}$  log; oil,  $\frac{1}{2}$  log; rice,  $\frac{1}{2}$  cab; olives, 1 pound; pulse, 3 cabs; nuts, 10 nuts; peaches, 5 peaches; pomegranates, 2; citrons, 1; and if of any other fruit, it shall not be less than may be sold for such a sum as will buy food sufficient for two meals. If the owner's means are slender and the poor so numerous that he is unable to give to each the specified measure, he is to produce the whole tithe and place it before them so that they may divide it among themselves. The owner may only give one half of the tithe to his own poor relatives, and the other he must distribute among the poor generally. If a man and woman apply together, the woman is to be satisfied first. No debts are allowed to be paid out of the poor tithe, nor a recompense to be made for benefits, nor captives redeemed, nor is it to be devoted to nuptial feasts or alms, nor is it to be taken out of Palestine into a foreign land (Maimonides, *ibid.* vi, 7-17). Though no tithes were paid in Palestine in the sabbatical year, when all was in common [see *SABBATICAL YEAR*], yet the land of Egypt, Ammon, and Moab had to pay them for the support of the poor of Israel, because the Sabbath of the soil was not observed in these countries, while the Babylonians had to pay the second tithe (Mishna, *Yadaiim*, iv, 3; Maimonides, *Iad Ha-Chezaka, Hilchoth Mathanuth Anjim*, vi, 5).

III. *Origin and Observance of the Tithal Law.*—Without inquiring into the reason for which the number ten (q. v.) has so frequently been preferred as a number of selection in the cases of tribute-offerings (Philo derives *deka* from *δέκα* [De X. *Orac.* ii, 184]), both sacred and secular, voluntary and compulsory, we may remark that the practice of paying tithes obtained among different nations from the remotest antiquity. Thus the ancient Phœnicians and the Carthaginians sent tithes annually to the Tyrian Hercules (Diod. Sic. xx, 14; Justin, xviii, 7); the southern Arabians could not dispose of their income before paying a tenth thereof to the priests at Sabota in honor of their god Sabis (Pliny, *Hist. Nat.* xii, 32); the ancient Pelasgians paid a tithe of the produce of the soil and the increase of their herds to their deities (Dionys. Halic. i, 19, 23, etc.); and the Hellenes consecrated to their deities a tenth of their annual produce of the soil (Xenoph. *Hellen.* i, 7, 10), of their business profits (Herod. iv, 152), of confiscated estates (Xenoph. *Hellen.* i, 7, 10), of their spoils (Herod. v, 77; ix, 81; Xenoph. *Anab.* v, 3, 4; *Hellen.* ix, 3, 21; Diod. Sic. xi, 33; Pausan. iii, 18, 5; v, 10, 4; x, 10, 1; τὰς δεκάρας τῶν περιτροπένων τοῖς θεοῖς κατασκευόν; Harpocration, s. v. *Δεκατέμναι*; and Knobel, *Comment. on Lev. xxvii*, 30). Among other passages the following may be cited: 1 Macc. xi, 35; Herod. i, 89; vii, 132; Diod. Sic. v, 42; Pausan. v, 10, 2; Justin, xx, 3; Arist. *Æcon.* ii, 2; Livy, v, 21; Polyb. ix, 39; Cicero, *Ferr.* ii, 3, 6, and 7 (where tithes of wine, oil, and "minute fruges" are mentioned); *Pro Leg. Manil.* 6; Plut. *Agæ.* ch. xix, p. 389; Pliny, *Hist. Nat.* xii, 14; Macrobi. *Sat.* iii, 6; Rose, *Inscr. Gr.* p. 215; Gibbon, iii, 301, ed. Smith; and a remarkable instance of fruits tithed and offered to a deity, and a feast made, of which the people of the district partook, in Xenoph. *Anab.* v, 3, 9, answering thus to the Hebrew poor man's tithe-feast mentioned above.

In Biblical history the two prominent instances of early occurrence are: 1. Abram presenting the tenth of all his property, according to the Syriac and Arabic versions of Heb. vii, and Rashi in his *Commentary*, but, as the passages themselves appear to show, of the spoils of his victory, to Melchizedek (Gen. xiv, 20; Heb. vii, 2, 6; Josephus, *Ant.* i, 10, 2; Selden, *On Tithes*,

ch. i). 2. Jacob, after his vision at Luz, devoting a tenth of all his property to God in case he should return home in safety (Gen. xxviii, 22). These instances bear witness to the antiquity of tithes in some shape or other previous to the Mosaic tithe system. There can therefore be no doubt that, like many other Pentateuchal ordinances, the inspired legislator adopted the tithal law into the divine code because he found that, with some modifications, this primarily voluntary tax was a proper stipend for the servants of the sanctuary, and that it would, at the same time, be a means of promoting pilgrimage to the national sanctuary on the great festivals, and social intercourse between the rich and the poor.

During the monarchy, the payment of tithes was neglected, and it seems that the kings claimed them for themselves (1 Sam. viii, 14, 15, 17; with 1 Macc. ii, 35). It was, however, re-established at the restoration of religion by the pious Hezekiah (2 Chron. xxxi, 5, 6, 12), and after the return of the Jews from the Babylonian captivity (Neh. x, 38; xii, 44; xiii, 5, 12), when material alterations and modifications were made in the tithal law owing to the altered state of the commonwealth and to the disproportion of the Levites and laymen. Only 341 or 360 Levites returned at first from the Babylonian captivity, with about 37,319 laymen; while with Ezra only 38 Levites came back, with 1496 laymen; and there can be but little doubt that the same disproportion continued among those who returned afterwards, as well as in the gradual and natural increase of the nation. There were thus 97 laymen to 1 Levite, while the tithe of 9 laymen amounted to as much as was left for each private family; and if we take 10 laymen to 1 Levite, as the latter had to pay a tenth to the priest, the tithe when duly paid by all the people yielded ten times as much as the Levites required. On the other hand, there were in Judæa, after the return from Babylon, a disproportionately large number of priests, since, exclusive of those who had no register (Ezra ii, 62), 4289 of them came with Zerubbabel—i. e. twelve or thirteen times more than Levites—and two whole families, besides separate individuals, came with Ezra. These could not possibly have subsisted upon the *legal dues* (Neh. x, 36-39). In addition to the miserably provided priests, there were the 612 Nethinim who came back with Zerubbabel and Ezra (Ezra ii, 58; viii, 20; Neh. vii, 60), for whom no provision whatever existed. Ezra had therefore to take the superabundant tithe from the Levites for the support of the priests and the Nethinim. Hence Josephus distinctly tells us that the priests received tithes in later times (*Life*, 15; *Ant.* xi, 5, 8; xx, 8, 8; 9, 2; *Apion*, i, 22). It is this distribution of the Levitical tithe between the priests and the Levites which is evidently alluded to when the Talmud says that Ezra transferred the tithes from the Levites to the priests as a punishment for their tardiness in returning from exile (*Kethuboth*, 26 a; *Cholin*, 131 b; *Yebamoth*, 86 b; *Sotah*, 47 b), for it could not possibly mean that he took the *whole* tithe away from the Levites, since that would be at variance with other records (comp. Ezra x, 38, 39; Neh. xiii, 10, 13; Tobit i, 7, with *Tosephoth* on *Kethuboth*, 26 a), and would leave the Levites wholly unprovided for, and visit the good Levites who did return with the punishment deserved by those who remained behind. It is, moreover, owing to this distribution of the Levitical tithe effected by Ezra that the tithe was afterwards divided into three portions, one of which was given by the owner to his friends the priests and Levites, the other was taken to the Temple storehouse, and the third portion was distributed in Jerusalem among the poor and the needy *chaberim* (חברים) = doctors of the law (Jerusalem *Sotah*, ix, 11; Jerusalem *Maaser Sheni*, v, 15; Babylon *Yebamoth*, 86 b).

The board appointed to watch over the tithes, as well as the storehouses, which already existed in the time of Hezekiah for the reception of the tithes (2

Chron. xxxi, 11-14), were now better organized than ever. To achieve the purpose intended by Ezra in the new division of the tithe, it was absolutely necessary that the collection and the distribution thereof should take place under the careful superintendence of a body consisting of both priests and Levites. Such a board was therefore duly appointed, and it was ordained that at least one portion of the tithes should be taken to Jerusalem for the support of the ministering Levites.

During the period of sacerdotal degeneracy and Greco-ascendency in Palestine, the tithes were again discontinued; but at the rise of the Pharisees the strict payment of a tenth was made one of the two essential conditions exacted from every individual who desired to become a *chabêr* (חבר) = member of this association. The reason for this is given in the article PHARISEE.

IV. *Literature*.—Mishna, tractates *Maaseroth*, *Maaser Sheni*, and *Bekoroth*, ix, 1-8; and the Gemaras on these Mishnas; Maimonides, *Iad Ha-Chezaka*, *Hilchoth Mathanuth Anjim*, vi, 1-17; *Hilchoth Maaser* and *Maaser Sheni*; Selden, *The History of Tithes* (1618); Hottinger, *De Decimis Judæorum* (L. B. 1713); and other monographs cited by Volbeding, *Index Programmatum*, p. 170; Spencer, *De Legibus Hebræorum* (Cantabrigiæ, 1727), lib. iii, c. x; ii, 720, etc.; Michaelis, *Commentaries on the Laws of Moses* (Engl. transl. London, 1814), art. cxcii, iii, 141, etc.; Herzfeld, *Gesch. des Volkes Israel* (Nordhausen, 1855), i, 62 sq., 138 sq.

TITHES (Anglo-Saxon, *teotha*, a tenth), a tenth part of the produce of the land, which by ancient usage, and subsequently by law, is set aside for the support of the clergy and other religious uses. In the Christian dispensation the very circumstance of the existence of the clergy is supposed by many to imply a certain fixed provision for their maintenance. This obligation has been put forward in ecclesiastical legislation from the earliest period. The Apostolic Canons, the Apostolic Constitutions, St. Cyprian on the *Unity of the Church*, and the works of Ambrose, Chrysostom, Augustine, and the other fathers of both divisions of the Church, abound with allusions to it. In the early Christian Church the custom of consecrating to religious purposes a tenth of the income was voluntary, and it was not made obligatory until the Council of Tours in 567. The second Council of Macon, in 585, enjoined the payment of tithes under pain of excommunication; and Charlemagne, by his capitularies, formally established the practice within those portions of the ancient Roman empire to which his legislation extended.

The introduction of tithes into England is ascribed to Offa, king of Mercia, at the close of the 8th century; and the usage passed into other divisions of Saxon England, and was finally made general by Ethelwolf. They were made obligatory in Scotland in the 9th century, and not long after in Ireland. At first the choice of the Church to whom a person paid tithes was optional, but by a decretal of Innocent III, addressed to the archbishop of Canterbury in 1200, all were directed to pay to the clergy of their respective parishes. According to English law, tithes are of three kinds—predial, mixed, and personal. Predial tithes are those which arise immediately from the ground, as grain, fruit, herbs, etc. Mixed tithes are those proceeding from things nourished by the earth, as calves, lambs, pigs, milk, cheese, eggs, etc. Personal tithes are those arising from the profits of personal industry in the pursuit of a trade, profession, or occupation. The latter were generally paid in the form of a voluntary offering at Easter, or some other period of the year. The law exempted mines, quarries, wild animals, game, fish, and also tame animals kept for pleasure, and not for use or profit.

Another and a more arbitrary distinction is into *great* and *small*—the first being tithes of grain, hay, wood, etc.; the second being the other kind of predial, as well

as all personal and mixed tithes. The great tithes of a parish belonged to the rector, and the small tithes to the vicar. Tithes were originally paid in kind, as the tenth sheaf, the tenth lamb; but the inconvenience and trouble involved in this mode of payment led to the adoption of other methods. This was done either by the payment of a fixed amount each year, irrespective of actual produce, or by a money payment mutually agreed upon; by a partial substitution of payment or labor, as when a person contributed a smaller amount of produce, but free from the expense of harvesting, etc.; or by the payment of a bulk sum in redemption of the impost, either for a time or forever, as the case might be, so that the land became tithe-free. By 1 Elizabeth, c. 19, and 13 Elizabeth, c. 10, such alienations of tithe-payment were restricted to a term of twenty-one years, or three lives.

Originally convents occupying lands in England paid tithes to the parochial clergy; but by a decretal of Paschal II they were exempted from such payments in regard to lands held by themselves in their own occupation. This exemption was confined by subsequent legislation to the four orders, Templars, Hospitalers, Cistercians, and Premonstratensians, and after the fourth Council of Lateran, A.D. 1215, only in respect of lands held by them before that year. At the Reformation many of the forfeited Church lands when sold were held free of tithes.

These partial exemptions, and the fact that the tithes were a tax for the support of the clergy of the Established Church, made it very unpopular with those who were obliged to pay, and especially so to Dissenters. A measure of commutation became absolutely necessary, but, although recommended as far back as 1822, did not become law until 1838. Various statutes for England or Ireland have since been enacted regulating the payment of tithes (6 and 7 William IV, c. 71; 7 William IV and 1 Victoria, c. 69; 1 and 2 Victoria, c. 64; 2 and 3 Victoria, c. 32; and 5 and 6 Victoria, c. 54). Their object for England is to substitute a money rent-charge, varying on a scale regulated by the average price of grain for seven years for all the other forms of payment. In Ireland the settlement was effected by a commutation of tithe into a money rent-charge three fourths the former value. The Disestablishment Act of 1869 abolished tithes and created a common fund for the support of the Protestant Episcopal Church and clergy. In France tithes were abolished at the Revolution, and this example was followed by the other Continental countries. In the Canadian provinces of Quebec, tithes are still collected by virtue of the old French law, yet in force there. In the United States, tithes are exacted by the Mormon hierarchy. See Bingham, *Christ. Antiq.* bk. v, ch. v, § 1 sq.

**Titian**, or TIZIANO VECELLIO, one of the greatest of Italian painters, and the prince of colorists and portrait-painters, was born in the territory of Venice, at Capo del Cadore, in 1477. His early passion for art was carefully cultivated by his parents, who placed him under the instruction of Antonio Rossi of Cadore. At the age of ten years he was sent to Treviso, and became the pupil of Sebastiano Zuccati. He studied in the school of the Bellini, first with Gentile and afterwards with Giovanni, with whom he was fellow-pupil with Giorgione, his own future rival. On the death of Giorgione, Titian rose rapidly in favor, and was soon afterwards invited to the court of Alphonso, duke of Ferrara. In 1523 the Senate of Venice employed him to decorate the hall of the council-chamber; and in 1530 he went to Bologna and painted a portrait of Charles V, who had come to be crowned by pope Clement VII. About this time he was invited to the court of the duke of Mantua, and in 1543 he met pope Paul III at Ferrara, by whom he was invited to Rome, but was obliged to decline by reason of previous engagements with the duke of Urbino. He went to Rome in 1548, where he was received with marks of great distinction, and where he met Mi-

chael Angelo. Declining the office of the leaden seal, he returned to Venice, only to receive an invitation from Charles V to visit the court of Spain, and reached Madrid in 1550. Here he became a gentleman of the emperor's bedchamber, a count palatine of the empire, received the Order of St. Jago, and had bestowed upon him an annual income of two hundred ducats. After a residence of three years at Madrid, he returned to Venice, which he soon left for Innsbruck. Returning again to Venice, he continued there until his death, of the plague, Aug. 27, 1576. There is no list of the works of Titian, and it would not be an easy task to make one. One of his grandest achievements is the *Assumption of the Virgin*. From 1520 to 1530 the most celebrated of his works were, *St. Peter Martyr*:—*Victory of the Venetians over the Janizaries*:—and *St. Sebastian*. Other noted paintings are, *An Annunciation* (1537):—*Descent of the Holy Ghost upon the Apostles* (1541):—*Sacrifice of Abraham* (eod.):—*David and Goliath* (eod.):—*Death of Abel* (eod.):—*The Virgin* (1543):—*Sun Tiziano* (eod.). Among the religious works which he executed for Philip II of Spain are, *The Last Supper*:—*Christ in the Garden*:—*St. Margaret with the Dragon*:—and a *Martyrdom of San Lorenzo*. The Academy of Venice contains his *Assumption and Presentation of the Virgin*, and the Manfrini Palace in the same city *The Entombment of Christ*. In the Escorial is a *Last Supper*, upon which he labored seven years; in the Uffizi Gallery, *A Virgin and Child with Saints*; and in the Vatican, *Christ Crowned with Thorns*. See Northcote, *Life of Titian* (Lond. 1830, 2 vols.); Crowe and Cavalcaselle, *Life of Titian* (1875); Spooner, *Biog. Dict. of the Fine Arts*, s. v.

**Title** is the rendering in the A. V. of תִּטּוּל, *tsiyun*, a pillar or cippus set up as a sepulchral sign, 2 Kings xxiii, 17, or as a "waymark," Jer. xxxi, 21; "sign," Ezek. xxxix, 15; and of τῖτλος, Lat. *titulus*, a tablet with a superscription (John xix, 19, 20), set up by Pilate over Christ's cross (q. v.).

**TITLE**, in the canon law, is that by which a cleric holds his benefice. In Church records and deeds, it is a Church to which a cleric was ordained, and where he was to reside. It is also applied to a cure of souls and a ministerial charge. Augustine says that the title of the cross was written in Hebrew for Jews who gloried in God's law; in Greek, for the wise of the nations; in Latin, for Romans, the conquerors of the world. Hence churches were called *titles*, not only because the clergy took titles from them which fixed them to particular cures, but as dedicated to the Crucified. The appellation is first used by the Council of Braga (572). A *title* was also a right to serve some Church from which an ordained clerk took his title, a name derived from the titles of the martyrs' tombs, at which service was originally said, and so called for the reasons given above, or the fiscal *titulus* which marked buildings belonging to the sovereign, and thus also churches dedicated to the King of kings. The earliest title was St. Pudentiana, now called St. Praxedes. The Roman cathedral had, in 142, a title or parish church attached to it by pope Pius I. The Council of Lateran (1179) enforced ordination on a distinct title.

**TITLE to orders** in Episcopal churches. This is best explained by quoting the 33d canon of the Established Church of England:

"It has been long since provided by many decrees of the ancient fathers that none should be admitted, either deacon or priest, who had not first some certain place where he might use his function: according to which examples we do ordain that henceforth no person shall be admitted into sacred orders except (1) he shall at that time exhibit to the bishop of whom he desireth imposition of hands a presentation of himself to some ecclesiastical preferment then void in the diocese; or (2) shall bring to the said bishop a true and undoubted certificate that either he is provided of some church within the said diocese, where he may attend the cure of souls, or (3) of some minister's place vacant, either in the cathedral church of that diocese, or in some other collegiate church therein also situate, where he may execute his ministry;

or (4) that he is a fellow, or in right as a fellow; or (5) a conduct or chaplain in some college in Cambridge or Oxford; or (6) except he be a master of arts of five years' standing that liveth of his own charge in either of the universities; or (7) except by the bishop himself that doth ordain him minister he be shortly after to be admitted either to some benefice or curateship then void. And if any bishop shall admit any person into the ministry that hath none of these titles as is aforesaid, then he shall keep and maintain him with all things necessary till he do prefer him to some ecclesiastical living; and if the said bishop refuse so to do, he shall be suspended by the archbishop, being assisted with another bishop, from giving orders by the space of a year."

In the Protestant Episcopal Church of the United States, canon 19 of 1832, "of the titles of those who are to be ordained priests," declares—

"No person shall be ordained priest unless he shall produce to the bishop a satisfactory certificate from some church, parish, or congregation that he is engaged with them, and that they will receive him as their minister; or unless he be a missionary under the ecclesiastical authority of the diocese to which he belongs, or in the employment of some missionary society recognised by the General Convention; or unless he be engaged as a professor, tutor, or instructor of youth in some college, academy, or other seminary of learning duly incorporated" (*Digest of the Canons*, p. 20).

See Eden, *Theol. Dict.* s. v.; Hook, *Church Dict.* s. v.

**Tittle** (diminutive of *tit*), an old English word signifying the merest trifle (see Plumptre, *Bible Educator*, iv, 211), is used in the A. V. (*Matt.* v, 18; *Luke* xvi, 17) as a rendering for *κερία*, a little horn, hence a point (e. g. of a sailyard, *Lucan, Navig.* 4; *Polyb.* xiv, 10, 11; of an island, *Philost. Vit. Soph.* i, 21, 2); in the New Test. the apex of a Heb. letter, such as distinguishes 7 from 3, 7 from 2, i. e. the slightest distinction (so Philo, in *Flacc.* p. 984 b). See Jor.

**Tittmann, Johann August Heinrich**, a German divine, was born at Langensalza, Aug. 1, 1773. He studied at Wittenberg and Leipsic, and in 1796 became one of the theological professors in the latter of these universities. He died Dec. 30, 1831. His writings are numerous, and belong to various departments of sacred science. The following only need to be specified here: *Theolog. Encyclop.* (1798);—*De Synonymis N. T.* (1829), the second part of which was edited after his death by Becher (1832); the whole, with some appended dissertations, translated into English by Craig (*Edinb. Bib. Cabinet* [1833-37, 2 vols.]);—and his edition of the Greek New Test., "ad fidem optimorum librorum recens." (1820-24). His polemical writings, in which he labors to reconcile theology with philosophy, and to defend evangelical truth against rationalism, are the most valuable productions of his pen.

**Tittmann, Karl Christian**, father of the preceding, was born at Grossebardau, near Grimma, Aug. 20, 1744. He was appointed deacon at Langensalza in 1770, professor of theology and provost at Wittenberg in 1775, and general superintendent there in 1784. In 1789 he was made *Kirchenrath* and superintendent at Dresden, and died there, Dec. 6, 1820. He was a man of cultured and elegant rather than powerful mind, and was deeply imbued with pious feeling and evangelical sentiment. These characteristics are apparent in his *Meletemata Sacra sive Comment. Exegetico-critico-dogmaticus in Evang. Joannis* (Lips. 1816), a work full of good thoughts, good sense, and genuine piety, but deficient in critical acumen and exegetical ability. It has been translated into English, and forms 2 vols. of the *Edinb. Bib. Cabinet*. In his *Opuscula Theologica* (1803) are some dissertations of an exegetical character. Perhaps his best work is his *Tractatus de Vestigiis Gnosticorum in N. T. frustra Quæsit* (Lips. 1773).

**Titular Bishops** are bishops with no stated charge, but who are bishops in *partibus infidelium*. The custom arose in the 12th and 13th centuries in the assigning of bishops to those parts which, though once Christianized, had at length fallen under Saracen dominion. The

Church of Rome adopts the same custom, and has bishops of Tarsus, Ephesus, Aleppo, etc. This Church has 229 titulars. The primitive Church made it a law that no one should be ordained at large, but should have a specific charge. "This rule concerned bishops as well as the inferior clergy; for the *nullatenenses* of later ages, as Panormita calls titular and utopian bishops, were rarely known in the primitive Church."

**Titulus**, the Latin name given to early churches, as if in contradistinction to the *martyria*, or those erected over the graves of martyrs. See MARTYR; MENSA. The *tituli* of the Middle Ages were parish churches under the care of presbyters, who took their titles from them. Why they were called *tituli* is not exactly agreed among learned men. Baronius says that it is because they had the sign of the cross upon them, by which sign or title they were known to belong to Christ. See TITLE.

**Ti'tus** (Græcized *Tiroc*, a common Latin name, e. g. of the celebrated Roman emperor whose triumphal arch [q. v.] still stands in Rome; once in the Apocrypha [2 Macc. xi, 34] of a Roman ambassador to the Jews [see MANLIUS]), a noted Christian teacher, and fellow-laborer of Paul. He was of Greek origin (possibly a native of Antioch), but was converted by the apostle, who therefore calls him his own son in the faith (*Gal.* ii, 3; *Tit.* i, 4). This is all that we know of his early history. The following is an account of his later movements and of the epistle to him. King (*Who was St. Titus?* [Dublin, 1853, 8vo]) tries to identify him with Timothy.

1. *Sources of Information.*—Our materials for the biography of this companion of Paul must be drawn entirely from the notices of him in the Second Epistle to the Corinthians, the Galatians, and to Titus himself, combined with the Second Epistle to Timothy. He is not mentioned in the Acts at all. The reading *Ti'rov* *Ἰούδου* in Acts xviii, 7 is too precarious for any inference to be drawn from it. Wieseler, indeed, lays some slight stress upon it (*Chronol. des apost. Zeit.* [Gött. 1848], p. 204), but this is in connection with a theory which needs every help. As to a recent hypothesis that Titus and Timothy were the same person (King, *Who was St. Titus?* [Dublin, 1853]), it is certainly ingenious, but quite untenable (see 2 Tim. iv, 10). The same may be said of the suggestion of Märcker (Meining. 1861), that Titus of the epistles is the same person with Silvanus, or Silas, of the Acts, although there is nothing that absolutely forbids such an identification.

2. *His Known Journeys.*—Taking the passages in the epistles in the chronological order of the events referred to, we turn first to *Gal.* ii, 1, 3. We conceive the journey mentioned here to be identical with that (recorded in Acts xv) in which Paul and Barnabas went from Antioch to Jerusalem to the conference which was to decide the question of the necessity of circumcision to the Gentiles (A. D. 47). Here we see Titus in close association with Paul and Barnabas at Antioch. He goes with them to Jerusalem. He is, in fact, one of the *τινεις ἄλλοι* of Acts xv, 2, who were deputed to accompany them from Antioch. His circumcision was either not insisted on at Jerusalem, or, if demanded, was firmly resisted (*οἱκ ἡναγκάσθη περιμερῆσαι*). He is very emphatically spoken of as a Gentile (*Ἕλλην*), by which is most probably meant that both his parents were Gentiles. Here is a double contrast from Timothy, who was circumcised by Paul's own directions, and one of whose parents was Jewish (*xvi*, 1, 3; 2 Tim. i, 5; iii, 15). Titus would seem, on the occasion of the council, to have been specially a representative of the church of the uncircumcision.

It is to our purpose to remark that, in the passage cited above, Titus is so mentioned as apparently to imply that he had become personally known to the Galatian Christians. This, again, we combine with two other circumstances, viz. that the Epistle to the Galatians and the Second Epistle to the Corinthians were

probably written within a few months of each other [see GALATIANS, EPISTLE TO], and both during the same journey. From the latter of these two epistles we obtain fuller notices of Titus in connection with Paul.

After leaving Galatia (Acts xviii, 23), and spending a long time at Ephesus (xix, 1-xx, 1), the apostle proceeded to Macedonia by way of Throas. Here he expected to meet Titus (2 Cor. ii, 13), who had been sent on a mission to Corinth. In this hope he was disappointed [see TROAS], but in Macedonia Titus joined him (vii, 6, 7, 13-15). Here we begin to see not only the above-mentioned fact of the mission of this disciple to Corinth, and the strong personal affection which subsisted between him and Paul (*ἐν τῇ παρουσίᾳ αὐτοῦ*, ver. 7), but also some part of the purport of the mission itself. It had reference to the immoralities at Corinth rebuked in the first epistle, and to the effect of that first epistle on the offending Church. We learn, further, that the mission was so far successful and satisfactory: *ἀναγγέλλων τὴν ὑμῶν ἐπιπόθεισιν* (ver. 7), *ἐλυτρίθητε εἰς μετάνοιαν* (ver. 9), *τὴν πάντων ὑμῶν ὑπακοήν* (ver. 15); and we are enabled also to draw from the chapter a strong conclusion regarding the warm zeal and sympathy of Titus, his grief for what was evil, his rejoicing over what was good: *τῇ παρακλήσει ἢ παρηκλήθη ἐφ' ὑμῖν* (ver. 7); *ἀναπέπαιναν τὸ πνεῦμα αὐτοῦ ἀπὸ πάντων ὑμῶν* (ver. 13); *τὰ σπλάγχνα αὐτοῦ περισσotέρως εἰς ὑμᾶς ἔστιν* (ver. 15). But if we proceed further we discern another part of the mission with which he was intrusted. This had reference to the collection, at that time in progress, for the poor Christians of Judæa—*καθὼς προεηγήσατο*, viii, 6, a phrase which shows that he had been active and zealous in the matter, while the Corinthians themselves seem to have been rather remiss. This connection of his mission with the gathering of these charitable funds is also proved by another passage, which contains, moreover, an implied assertion of his integrity in the business (*μή τι ἐπιλοιδόησεν ὑμᾶς Τίτος*, xii, 18), and a statement that Paul himself had sent him on the errand (*παρεκάλεισα Τίτον*, *ibid.*). Thus we are prepared for what the apostle now proceeds to do after his encouraging conversations with Titus regarding the Corinthian Church. He sends him back from Macedonia to Corinth, in company with two other trustworthy Christians [see TROPHIMUS; TYCHICUS], bearing the second epistle, and with an earnest request (*παρακαλέσαι*, viii, 6; *τὴν παράκλησιν*, ver. 17) that he would see to the completion of the collection, which he had zealously promoted on his late visit (*ἵνα καθὼς προεηγήσατο, οὕτως καὶ ἐπιτελέσῃ*, ver. 6), Titus himself being in nowise backward in undertaking the commission. On a review of all these passages, elucidating as they do the characteristics of the man, the duties he discharged, and his close and faithful co-operation with Paul, we see how much meaning there is in the apostle's short and forcible description of him (*Εἴτε ὑπὲρ Τίτου, κοινωνὸς ἐμῆς καὶ εἰς ὑμᾶς συνεργός*, ver. 23).

All that has preceded is drawn from direct statements in the epistles; but by indirect though fair inference we can arrive at something further, which gives coherence to the rest, with additional elucidations of the close connection of Titus with Paul and the Corinthian Church. It has generally been considered doubtful who the *ἀδελφοί* were (1 Cor. xvi, 11, 12) that took the first epistle to Corinth. Timothy, who had been recently sent thither from Ephesus (Acts xix, 22), could not have been one of them (*ἐὰν ἔλθῃ Τιμ.* 1 Cor. xvi, 10), and Apollos declined the commission (ver. 12). There can be little doubt that the messengers who took that first letter were Titus and his companion, whoever that might be, who is mentioned with him in the second letter (*Παρεκάλεισα Τίτον, καὶ συναπίστέλα τὸν ἀδελφόν*, 2 Cor. xii, 18). This view was held by MacKnight, and very clearly set forth by him (*Transl. of the Apostolical Epistles, with Comm.* [Edinb. 1829], i,

451, 674; ii, 2, 7, 124). It has been more recently given by Prof. Stanley (*Corinthians*, 2d ed. p. 348, 492), but it has been worked out by no one so elaborately as by Prof. Lightfoot (*Cumb. Journal of Classical and Sacred Philology*, ii, 201, 202). There is some danger of confusing Titus and the brother (2 Cor. xii, 18), i. e. the brethren of 1 Cor. xvi, 11, 12, who (according to this view) took the first letter, with Titus and the brethren (2 Cor. viii, 16-24) who took the second letter. As to the connection between the two contemporaneous missions of Titus and Timotheus, this observation may be made here, that the difference of the two errands may have had some connection with a difference in the characters of the two agents. If Titus was the firmer and more energetic of the two men, it was natural to give him the task of enforcing the apostle's rebukes, and urging on the flagging business of the collection.

A considerable interval now elapses before we come upon the next notices of this disciple. Paul's first imprisonment is concluded, and his last trial is impending. In the interval between the two, he and Titus were together in Crete (*ἀπέλιπόν σε ἐν Κρήτῃ*, Tit. i, 5). We see Titus remaining in the island when Paul left it, and receiving there a letter written to him by the apostle. From this letter we gather the following biographical details: In the first place, we learn that he was originally converted through Paul's instrumentality; this must be the meaning of the phrase *γενήσιον τέκνον*, which occurs so emphatically in the opening of the epistle (ver. 4). Next we learn the various particulars of the responsible duties which he had to discharge in Crete. He is to complete what Paul had been obliged to leave unfinished (*ἵνα τὰ λείποντα ἐπιδορθώσῃς*, ver. 5), and he is to organize the Church throughout the island by appointing presbyters in every city. See GORTYNA; LASÆA. Instructions are given as to the suitable character of such presbyters (ver. 6-9); and we learn, further, that we have here the repetition of instructions previously furnished by word of mouth (*ὡς ἐγὼ σοι διατάξην*, ver. 5). Next he is to control and bridle (*ἐπιστομίζειν*, ver. 11) the restless and mischievous Judaizers, and he is to be peremptory in so doing (*ἐλέγχε αὐτοὺς ἀποτόμως*, ver. 13). Injunctions in the same spirit are reiterated (ii, 1, 15; iii, 8). He is to urge the duties of a decorous and Christian life upon the women (ii, 3-5), some of whom (*πρεσβυτίδας*, ver. 3), possibly, had something of an official character (*καλο-δοσκάτους, ἵνα σωφρονίζουσιν τὰς νέας*, ver. 3, 4). He is to be watchful over his own conduct (ver. 7); he is to impress upon the slaves the peculiar duties of their position (ver. 9, 10); he is to check all social and political turbulence (iii, 1), and also all wild theological speculations (ver. 9); and to exercise discipline on the heretical (ver. 10). When we consider all these particulars of his duties, we see not only the confidence reposed in him by the apostle, but the need there was of determination and strength of purpose, and therefore the probability that this was his character; and all this is enhanced if we bear in mind his isolated and unsupported position in Crete, and the lawless and immoral character of the Cretans themselves, as testified by their own writers (i, 12, 13). See CRETE.

The notices which remain are more strictly personal. Titus is to look for the arrival in Crete of Artemas and Tychicus (iii, 12), and then he is to hasten (*σπουδάσον*) to join Paul at Nicopolis, where the apostle is proposing to pass the winter (*ibid.*). Zenias and Apollos are in Crete, or expected there; for Titus is to send them on their journey, and supply them with whatever they need for it (ver. 13). It is observable that Titus and Apollos are brought into juxtaposition here, as they were before in the discussion of the mission from Ephesus to Corinth.

The movements of Paul, with which these later instructions to Titus are connected, are considered elsewhere. See PAUL; TIMOTHY. We need only observe here that there would be great difficulty in inserting

the visits to Crete and Nicopolis in any of the journeys recorded in the Acts, to say nothing of the other objections to giving the epistle any date anterior to the voyage to Rome. See TITUS, EPISTLE TO. On the other hand, there is no difficulty in arranging these circumstances, if we suppose Paul to have travelled and written after being liberated from Rome, while thus we gain the further advantage of an explanation of what Paley has well called the affinity of this epistle and the first to Timothy. Whether Titus did join the apostle at Nicopolis we cannot tell. But we naturally connect the mention of this place with what Paul wrote at no great interval of time afterwards, in the last of the Pastoral Epistles (*Τίτος εἰς Δαλματίαν*, 2 Tim. iv, 10); for Dalmatia lay to the north of Nicopolis, at no great distance from it. See NICOPOLIS. From the form of the whole sentence, it seems probable that this disciple had been with Paul in Rome during his final imprisonment: but this cannot be asserted confidently. The touching words of the apostle in this passage might seem to imply some reproach, and we might draw from them the conclusion that Titus became a second Demas: but, on the whole, this seems a harsh and unnecessary judgment.

3. *Traditionary Close of his Career.*—Whatever else remains is legendary, though it may contain elements of truth. Titus is connected by tradition with Dalmatia, and he is said to have been an object of much reverence in that region. This, however, may simply be a result of the passage quoted immediately above: and it is observable that of all the churches in modern Dalmatia (Neale, *Ecclesiological Notes on Dalm.* p. 175) not one is dedicated to him. The traditional connection of Titus with Crete is much more specific and constant, though here again we cannot be certain of the facts. He is said to have been permanent bishop in the island, and to have died there at an advanced age (Eusebius, *Hist. Eccles.* iii, 4, 2; Theodoret, *Ad 1 Tim.* iii, 1; *Const. Apost.* vii, 46; Jerome, *Ad Tit.* ii, 7; Isidore, *Vit. Sanct.* 87). The modern capital, Candia, appears to claim the honor of being his burial-place (Cave, *Apostolici*, 1716, p. 42). In the fragment *De Vita et Actis Titii*, by the lawyer Zenas (Fabricius, *Cod. Apoc. N. T.* ii, 831, 832), Titus is called bishop of Gortyna; and on the old site of Gortyna is a ruined church, of ancient and solid masonry, which bears the name of St. Titus, and where service is occasionally celebrated by priests from the neighboring hamlet of Metropolis (Falkener, *Remains in Crete, from a MS. History of Candia*, by Onorio Belli, p. 23). The cathedral of Megalocastro, in the north of the island, is also dedicated to this saint. Lastly, the name of Titus was the watchword of the Cretans when they were invaded by the Venetians; and the Venetians themselves, after their conquest of the island, adopted him to some of the honors of a patron saint; for as the response after the prayer for the Doge of Venice was "Sancte Marce, tu nos adjuva," so the response after that for the duke of Candia was "Sancte Tite, tu nos adjuva" (Pashley, *Travels in Crete*, i, 6, 175). The day on which Titus is commemorated is Jan. 4 in the Latin calendar, and Aug. 25 in the Greek.

We must not leave unnoticed the striking though extravagant panegyric of Titus by his successor in the see of Crete, Andreas Cretensis (published, with Amphilochius and Methodius, by Combefis, Paris, 1644). This panegyric has many excellent points, e. g. it incorporates well the more important passages from the Second Epistle to the Corinthians. The following are stated as facts. Titus is related to the proconsul of the island: among his ancestors are Minos and Rhadamanthus (*οἱ ἐκ Διός*). Early in life he obtains a copy of the Jewish Scriptures, and learns Hebrew in a short time. He goes to Judea, and is present on the occasion mentioned in Acts i, 15. His conversion takes place before that of Paul himself, but afterwards he attaches himself closely to the apostle. Whatever the value of these statements may be, the following description of

Titus (p. 156) is worthy of quotation: ὁ πρῶτος τῆς Κρήτων ἐκκλησίας θεμέλιος· τῆς ἀληθείας ὁ στυλοῦς· τὸ τῆς πίστεως ῥεῖσμα· τῶν εὐαγγελικῶν κηρυγμάτων ἡ ἀσκήτης σάλπιγξ· τὸ ὑψηλὸν τῆς Παύλου γλώττης ἀπήχημα.

See Walch, *De Tito Viro Apostolic.* (Jen. 1741; also in his *Miscellan. Sacra* [Amst. 1744], p. 708 sq.); Howson, *Companions of St. Paul* (London, 1871), ch. v.

TITUS, EPISTLE TO. This is the third of the so-called Pastoral Epistles of Paul, following immediately after those to Timothy.

I. *Authenticity.*—In this respect there are no specialties in this epistle which require any very elaborate treatment distinct from the other Pastoral Letters of Paul. See TIMOTHY, FIRST EPISTLE TO. If those two were not genuine, it would be difficult confidently to maintain the genuineness of this. On the other hand, if the Epistles to Timothy are received as Paul's, there is not the slightest reason for doubting the authorship of that to Titus. Amid the various combinations which are found among those who have been sceptical on the subject of the Pastoral Epistles, there is no instance of the rejection of that before us on the part of those who have accepted the other two. So far, indeed, as these doubts are worth considering at all, the argument is more in favor of this than of either of those. Tatian accepted the Epistle to Titus, and rejected the other two. Origen mentions some who excluded 2 Tim., but kept 1 Tim. with Titus. Schleiermacher and Neander invert this process of doubt in regard to the letters addressed to Timothy, but believe that Paul wrote the present letter to Titus. Credner, too, believes it to be genuine, though he pronounces 1 Tim. to be a forgery, and 2 Tim. a compound of two epistles.

To turn now from opinions to direct external evidence, this epistle stands on quite as firm a ground as the others of the pastoral group, if not a firmer ground. Nothing can well be more explicit than the quotations and references in Irenæus, *C. Hæres.* i, 16, 3 (see Tit. iii, 10); Clem. Alex. *Strom.* i, 350 (comp. Tit. i, 12), and iii, 3, 4; by Tertull. *De Præscr. Hæres.* c. 6 (comp. Tit. iii, 10, 11), and *Adv. Marc.* v, 21; and by Origen, in many places (Lardner, *Works*, vol. ii, 8vo); to say nothing of earlier allusions in Justin Martyr, *Dial. c. Tryph.* 47 (see Tit. iii, 4), which can hardly be doubted; Theoph. *Ad Autol.* ii, 95 (see Tit. iii, 5); iii, 126 (see ver. 1), which are probable; and Clem. Rom. 2 *Cor.* i (see *ibid.*), which is possible.

As to internal features, we may notice, in the first place, that the Epistle to Titus has all the characteristics of the other Pastoral Epistles. See, for instance, πιστός ὁ λόγος (iii, 8), ὑγιαίνουσα διδασκαλία (i, 9; ii, 1; comp. i, 13; ii, 8), σωφρονεῖν, σώφρων, σωφρόνως (i, 8; ii, 5, 6, 12), σωτήριος, σωτήρ, σώζω (i, 3, 4; ii, 10, 11, 13; iii, 4, 5, 7), τοῦδαίκοι μῦθοι (i, 14; comp. iii, 9), ἱπφάνεια (ii, 13), εὐσίβεια (i, 1), ἔλεος (iii, 5; in i, 4 the word is doubtful). All this tends to show that this letter was written about the same time and under similar circumstances with the other two. But, on the other hand, this epistle has marks in its phraseology and style which assimilate it to the general body of the Epistles of Paul. Such may fairly be reckoned the following: κηρύγματι δὲ ἐπιστεύειν ἑγώ (i, 3), the quotation from a heathen poet (ver. 12); the use of ἀδοκίμος (ver. 16); the "going off at a word" (σωτήριος . . . ἐπιφάνη γὰρ . . . σωτήριος . . . ii, 10, 11); and the modes in which the doctrines of the atonement (ver. 13) and of free justification (iii, 5-7) come to the surface. As to any difficulty arising from supposed indications of advanced hierarchical arrangements, it is to be observed that in this epistle πρεσβύτερος and ἐπίσκοπος are used as synonymous (ἵνα καταστήσῃς πρεσβυτέρους . . . δεῖ γὰρ τὸν ἐπίσκοπον . . . i, 5, 7), just as they are in the address at Miletus about the year A.D. 55 (Acts xx, 17, 28). At the same time, this epistle has features of its own, especially a certain tone of abruptness and severity, which probably arises partly out of the circum-

stances of the Cretan population [see CRETE], partly out of the character of Titus himself. If all these things are put together, the phenomena are seen to be very unlike what would be presented by a forgery, to say nothing of the general overwhelming difficulty of imagining who could have been the writer of the Pastoral Epistles, if it were not Paul himself.

To the objections of the German critics, founded upon the difficulty of ascertaining the proper date of this epistle, the best reply will be furnished by ascertaining, if possible, when and where the epistle was written (see below); but even should we fail in this, it would be strange were we to relinquish our conviction of the authenticity of an ancient writing simply because, possessing very imperfect information as to many parts of the alleged author's history, we were unable to say with certainty when he was in circumstances to compose it.

II. *Date*.—The only circumstances stated in the epistle itself calculated to aid us in determining this question are, that at the time it was written Paul had recently visited Crete (i, 5); that he was about to spend the winter in Nicopolis (iii, 12); and that Apollos was about to visit Crete, on his way to some other place (ver. 13). There are three hypotheses that have been formed in order to meet these facts, especially the first, namely Paul's visit to Crete.

1. We learn from the Acts of the Apostles that Paul visited Crete on his voyage to Rome (xxvii, 7); but the shortness of his visit at that time, the circumstances under which it was made, and the improbability of his expecting to spend the ensuing winter at Nicopolis, place it out of the question to suppose that it was to this visit he refers in this epistle. As this is, however, the only visit recorded by Luke, in rejecting it we are forced to suppose another visit, and to find some period in the apostle's life when it was probable that such a visit was paid.

2. It has been thought by Hug that the period referred to in Acts xviii, 18, 19 admits of our placing this visit to Crete within it. Paul, at that time, was on his journey from Corinth to Palestine, but on some account or other landed at Ephesus. This leads to the suggestion that the apostle must either voluntarily have departed from the usual course in order to visit some place lying between Corinth and Ephesus; or that he must have been driven by stress of weather from the course he meant to pursue. In either case the probability of his visiting Crete at that time is strong. We find, from the above statement made by Paul in this epistle, that Apollos, if at this time on his way from Ephesus to Corinth (Acts xviii, 24, 27; xix, 1), was to touch at Crete; which, it has been assumed, renders it not improbable that it was customary for ships sailing between these two ports to call at Crete by the way; and Paul may have availed himself of this practice in order to visit Crete before going to Palestine. Or he may have sailed in a ship bound directly from Corinth to Palestine, and have been driven out of his course, shipwrecked on Crete, and obliged to sail thence to Ephesus as his only remaining method of getting to his original destination—a supposition which will not appear very improbable when we remember that Paul must have suffered several shipwrecks of which Luke gives no account (2 Cor. xi, 25, 26); and that his getting to Ephesus on his way from Corinth to Palestine is a fact for which, in some way or other, we are bound to account. (Paul evidently, however, took that route as the only one of general travel, there being no vessel sailing direct from Corinth to Cæsarea or Antioch.) It was while staying on this occasion at Ephesus that Hug supposes Paul to have written this epistle.

As confirmatory of this have been adduced the two other facts above referred to as mentioned in the epistle itself, viz. the visit of Apollos to Crete, and Paul's intention to winter at Nicopolis. From Acts xix, 1 we learn that during the time Apollos was residing at Corinth, whence he had gone from Ephesus, Paul was en-

gaged in a tour through the upper coasts (viz. Phrygia and Galatia; comp. Acts xviii, 23), which ended in his return to Ephesus. This tour was commenced after the apostle had been at Jerusalem and Antioch (ver. 22). It appears, therefore, that Paul left Antioch much about the same time that Apollos reached Corinth. But Apollos went to Corinth from Ephesus, Paul went to Jerusalem from Ephesus. At this city, therefore, they may have met; and before leaving it Paul perhaps wrote this epistle, and gave it to Apollos to deliver to Titus at Crete, on his way to Corinth.

Further, Paul went up to Jerusalem to keep the feast; after which he visited Antioch, and then travelled for some considerable time in Upper Asia. He, therefore, is supposed to have spent the winter somewhere in Asia Minor. (On the contrary, he seems to have rapidly passed through that region.) Now there was a town named Nicopolis, between Antioch and Tarsus, near to which, if not through which, Paul must pass on his way from Antioch to Galatia (Strabo, xiv, 465, ed. Casaubon, fol. 1587). May not this have been the very place referred to in Tit. iii, 12? In such a locality it was quite natural for Paul to desire to spend the winter; and as Titus was a native of Asia, it would be well known to him, especially if he knew what route the apostle designed to pursue. All this, it is held, supports the hypothesis that Paul wrote this epistle before leaving Ephesus to go to Syria.

Another circumstance alleged in favor of this hypothesis is the close resemblance in sentiment and phraseology between this epistle and the first Epistle to Timothy. This resemblance is so close, and in some particulars so peculiar, that we are naturally led to conclude that both must have been written while the same leading ideas and forms of expression were occupying the apostle's mind. Now the First Epistle to Timothy is held by the maintainers of this theory to have been written after Paul had left Ephesus the second time to go into Macedonia, that is, about two years and a half after the period when Hug supposes the Epistle to Titus to have been written. To some this may appear too long a time to justify any stress being laid upon the similarity of the two epistles in this question of their respective dates; but when it is remembered that during the interval Paul had been dealing at Ephesus with very much the same class of persons, to whom a great part of both epistles refer, and that both are addressed to persons holding the same peculiar office, the force of this objection will be weakened.

Against this date, on the contrary, may justly be adduced the many precarious, and (as above seen) some positively inaccurate, assumptions necessary to its support. The main objection, however, is the exceeding improbability that Paul, while on his way from Corinth to Palestine, which he was in haste to reach by a given day (Acts xviii, 18, 20, 21), could have found time to stop at Crete, found numerous churches there (Tit. i, 5), and leave Titus in charge of them. Nor have we any evidence that on the voyage in question Paul was accompanied by Titus; nor yet that the individuals mentioned in iii, 12, 13, were at that time so located with reference to Paul and Titus. For these and other reasons, this hypothesis must be discarded as too problematical throughout.

3. As to the time and place and other circumstances of the writing of this epistle, the following scheme of filling up Paul's movements after his first imprisonment will satisfy all the conditions of the case: We may suppose him (possibly after accomplishing his long-projected visit to Spain) to have gone to Ephesus, and taken voyages from thence, first to Macedonia and then to Crete; during the former to have written the First Epistle to Timothy, and after returning from the latter to have written the Epistle to Titus, being at the time of despatching it on the point of starting for Nicopolis, to which place he went, taking Miletus and Corinth on the way. At Nicopolis we may conceive him to have

been finally apprehended and taken to Rome, whence he wrote the Second Epistle to Timothy. Other possible combinations may be seen in Birks (*Horæ Apostolicæ*, at the end of his edition of the *Horæ Paulinæ*, p. 299-301) and in Wordsworth (*Greek Testament*, iii, 418, 421). It is an undoubted mistake to endeavor to insert this epistle in any period of that part of Paul's life which is recorded in the Acts of the Apostles. There is in this writing that unmistakable difference of style (as compared with the earlier epistles) which associates the Pastoral Letters with one another, and with the latest period of Paul's life; and it seems strange that this should have been so slightly observed by good scholars and exact chronologists, e. g. Archdn. Evans (*Script. Biog.* iii, 327-333) and Wieseler (*Chronol. des apost. Zeitalt.* 329-355), who, approaching the subject in very different ways, agree in holding the foregoing theory (No. 2) that this letter was written at Ephesus (between 1 and 2 Cor.), when the apostle was in the early part of his third missionary journey (Acts xix). See PAUL; TITUS.

III. *Design and Contents.*—The task which Paul had committed to Titus, when he left him in Crete, was one of no small difficulty. The character of the people was unsteady, insincere, and quarrelsome; they were given to greediness, licentiousness, falsehood, and drunkenness, in no ordinary degree; and the Jews who had settled among them appear to have even gone beyond the natives in immorality. Among such a people it was no easy office which Titus had to sustain when commissioned to carry forward the work which Paul had begun, and to set in order the affairs of the churches which had arisen there, especially as heretical teachers had already crept in among them. Hence Paul addressed to him this epistle, the main design of which is to direct him how to discharge with success the duties to which he had been appointed. For this reason the apostle dilates upon the personal qualifications of Church officers and members, and their functions, with such local allusions as rendered these directions especially pertinent. After the introductory salutation, which has marked peculiarities (i, 1-4), Titus is enjoined to appoint suitable presbyters in the Cretan Church, and specially such as shall be sound in doctrine and able to refute error (ver. 5-9). The apostle then passes to a description of the coarse character of the Cretans, as testified by their own writers, and the mischief caused by Judaizing error among the Christians of the island (ver. 10-16). In opposition to this, Titus is to urge sound and practical Christianity on all classes (ii, 1-10), on the older men (ver. 2), on the older women, and especially in regard to their influence over the younger women (ver. 3-5), on the younger men (ver. 6-8), on slaves (ver. 9, 10), taking heed meanwhile that he himself is a pattern of good works (ver. 7). The grounds of all this are given in the free grace which trains the Christian to self-denying and active piety (ver. 11, 12), in the glorious hope of Christ's second advent (ver. 13), and in the atonement by which he has purchased us to be his people (ver. 14). All these lessons Titus is to urge with fearless decision (ver. 15). Next, obedience to rulers is enjoined, with gentleness and forbearance towards all men (iii, 1, 2), these duties being again rested on our sense of past sin (ver. 3), and on the gift of new spiritual life and free justification (ver. 4-7). With these practical duties are contrasted those idle speculations which are to be carefully avoided (ver. 8, 9); and with regard to those men who are positively heretical, a peremptory charge is given (ver. 10, 11). Some personal allusions then follow: Artemas or Tychicus may be expected at Crete, and on the arrival of either of them Titus is to hasten to join the apostle at Nicopolis, where he intends to winter; Zenas the lawyer, also, and Apollos, are to be provided with all that is necessary for a journey in prospect (ver. 12, 13). Finally, before the concluding messages of salutation, an admonition is given to the Cretan Christians, that they give heed to the duties of practical useful piety (ver. 14, 15).

IV. *Commentaries.*—The following are the special exegetical helps on the whole of this epistle exclusively: Megander, *Expositio* [includ. Tim.] (Basil. 1536, 8vo); Willich, *Expositio* (Lips. 1540, 8vo); Hoffmann, *Commentarius* (Freft. 1541, 8vo); Culmann, *Notæ* (Norib. 1546, 8vo); Alesius, *Explicatio* (Lips. 1550, 8vo); Espenceus [Rom. Cath.], *Commentarius* (Par. 1568, 8vo); Hunnius, *Expositio* (Marp. 1587, 1604; Vitemb. 1610, 8vo); Rhodmann, *Commentarius* (Jen. 1597, 8vo); Maglian [R. C.], *Commentarius* (Lugd. 1609, 4to); Sotto [R. C.], *Commentarius* [includ. Tim.] (Par. 1610, fol.); Taylor, *Commentary* (Camb. 1612, 4to; 1658, fol.); Scultetus, *Observationes* [includ. Tim. and Philem.] (Freft. 1624; Vitemb. 1630, 4to); Goupil [R. C.], *Paraphrasis* (Par. 1644, 8vo); Daille, *Sermons* [Fr.] (ibid. 1656, 8vo); Herbert [R. C.], *Expositio* [includ. Tim. and Philem.] (ibid. 1656, 8vo); Wallis, *Expositio* (Oxon. 1657, 8vo); Fecht, *Expositio* (Rost. 1692, 1700, 4to); Rappolt, *Observationes*, (in his *Opp.* i, 781); Breithaupt, *Exercitatio* (Hal. 1703, 4to); Outhof, *Verklaaring* (Amst. 1704, 4to); Zentgrav, *Commentarius* (Arg. 1706, 4to); Gebhard, *Paraphrasis* (Gryph. 1714, 4to); Koehnen, *Verklaaring* (Utr. 1724, 4to); Vitringa, *Verklaaring* (Franek. 1728, 4to); Rambach, *Erklärung* [includ. Gal.] (Gies. 1739, 4to); Van Haven, *Commentatio* (Hal. 1742, 4to); Hurter, *Commentarius* (Schaff. 1744, 4to); Mosheim, *Erklärung* (ed. Von Einem, Stend. 1779, 4to); Kunöl, *Explicatio* (Lips. 1788, 4to); Van den Ess, *Compositio* (L. B. 1825, 8vo); Paterson, *Commentary* [includ. Tim.] (Lond. 1848, 18mo); Graham, *Commentary* (ibid. 1860, 12mo). See EPISTLE.

**Titus**, bishop OF BOSTRA, in Arabia, was driven from his see, under Julian, A.D. 362; returned under Valentinian; and died about A.D. 371. He wrote *Contra Manicheos Lib. III*, which is extant in a Latin translation in *Biblioth. Patr.* tom. iv. A discourse *On the Branches of Palm, Greek and Latin*, and a *Commentary on Luke*, in Latin, have been published under his name, but are questioned.—Mosheim, *Eccles. Hist.* i, 248. See Herzog, *Real-Encyclop.* s. v.

**Titus**, FLAVIUS SABINUS VESPASIANUS, emperor of Rome, was the eldest son of Vespasian and Flavia Domitilla, and was born at Rome, Dec. 30, A.D. 40. He was educated at the court of Nero with Britannicus, and hence acquired some false moral principles which afterwards led him into many excesses. He was in charge of a legion of the Roman forces in the last war of the Jews, and on his father's elevation to the imperial throne, he prosecuted the war to a successful close, sharing the honors of a triumph jointly with Vespasian. On his own elevation to the throne, he reformed his habits, and became celebrated for his virtues and popularity. He died Sept. 13, A.D. 81, in the third year of his reign. His career is given by the ancient historians Suetonius and Tacitus, and his connection with the Jews by Josephus. Monographs on him have been written in Latin by Jung (1761), and in French by Roland (1830).

Coin of Titus commemorating the Capture of Judæa.

**Tizite** (Heb. *Tizi*, תִּיזִי, patial, as if from some unknown place or person called *Tiz*; Sept. *Θωσάι* v. r. *ῥεσσι*; Vulg. *Thosaites*), the designation of Joha (q. v.), the brother of Jedial and son of Shimri, one of the heroes of David's army named in the supplementary list of 1 Chron. xi, 45. The word is possibly a corruption for תִּרְזִי, *Tirzite*, i. e. inhabitant of Tirzah (q. v.).

Tablet on the Arch (q. v.) of Titus at Rome representing his Triumphal Car. (See p. 442.)

**To'ah** (Heb. *To'ach*, תֹּאֵחַ, *lowly*; Sept. *Θοοὺ* v. r. *Θοοὺ* and *Θεῖ*; Vulg. *Thohu*), son of Zuph and father of Eliel in the genealogy of Heman the Levitical musician (1 Chron. vi, 34 [Heb. 19]); elsewhere called by the similar name *TOHU* (1 Sam. i, 1), or the different one (1 Chron. vi, 26) *NAHATH* (q. v.). See *SAMUEL*.

**Tob** (Heb. *Tób*, טוֹב, *good*, as everywhere; Sept. *Τῶβ*; Vulg. *Tób*), the name of a region or district (אַרְצֵי; Sept. γῆ; Vulg. *terra*; A. V. "land") into which Jephthah withdrew when expelled from home by his half-brethren (Judg. xi, 3), and where he remained, at the head of a band of freebooters, till he was brought back by the sheiks (שֵׁיחִים) of Gilead (ver. 5). The narrative implies that the land of Tob was not far distant from Gilead; at the same time, from the nature of the case, it must have lain out towards the eastern deserts. It is undoubtedly mentioned again in 2 Sam. x, 6, 8 as one of the petty Aramitish kingdoms or states which supported the Ammonites in their great conflict with David; but in that passage the A. V. presents the name *literatim* as *ISHTOB* (q. v.), i. e. *man of Tob*, meaning, according to a common Hebrew idiom, the "men of Tob." After an immense interval it appears again (*Τῶβιον* or *Τούβιον*) in the Maccabæan history (1 Macc. v, 13), and was then the abode of a considerable colony of Jews, numbering at least a thousand males. See *TOBIE*. In 2 Macc. xii, 17 its position under the name *ΤΟΥΒΙΟΝ* (q. v.) is defined very exactly as at or near Charax, 750 stadia from the strong town Caspis, though, as the position of neither of these places is known, we are not thereby assisted in the recovery of Tob. The Targum and Abarbanel render it simply "good land," while Kimchi and Ben-Gerson look upon *Tob* as the name of the lord or owner of the land. Eusebius and Jerome make it a country, but say nothing of its situation (*Onomast.* s. v.). Ptolemy (*Geogr.* v, 19) mentions a place called *Θαῦβα* as lying to the south-west of Zobah, and therefore possibly to the east or north-east of the country of Ammon proper. In Stephanus of Byzantium and in Eckhel (*Doctr. Numm.* iii, 352) the names *Tubai* and *Tubeni* occur. The name *Tell Dobbé* (Burckhardt, *Syria*, April 25), or, as it is given by the latest explorer of those regions, *Tell Dibbe* (Wetzstein, *Map*), attached to a ruined site at the south

end of the Leja, a few miles north-west of Kenâwat, and also that of *Ed-Dub*, some twelve hours east of the mountain El-Kuleib, are both suggestive of Tob. According to Schwarz (*Palest.* p. 200) the Talmud identifies it with a Gentile town called *Susitha* or *Chephon*, somewhere on the south-east shore of the lake of Tiberias; perhaps the *Hippos* (q. v.) so often mentioned by Josephus.

**Tob-adoni'jah** (Heb. *Tób Adoniyâh*, טוב אֲדוֹנִיָּה, *good is Adonijah*; Sept. *Τωβαδωνίας* v. r. *Τωβιδωνία*; Vulg. *Thobadonias*), last named of the nine Levites sent by Jehoshaphat through the cities of Judah to teach the law to the people (2 Chron. xvii, 8). B. C. 910.

**Tobey**, ZALMON, a Baptist minister, was born in Norfolk, Conn., July 27, 1791. His parents were Congregationalists. He pursued his collegiate studies for a time at Williams College, and then became a member of Brown University, where he graduated in the class of 1817. In the fall of this year, he was ordained to the work of the ministry in Canaan, Conn., and in the following spring became pastor of the Baptist Church at Fruit Hill, Providence, R. I., where he remained five years (1818-23). He became pastor of the Fourth Baptist Church, Providence, Sept. 2, 1823, where he continued for about ten years (1823-33). During this period he fraternized chiefly with the Freewill Baptists, the Church of which he was pastor largely sympathizing with him. After being disconnected with the regular Baptists for several years, he returned to that body. His subsequent pastorates were in Bristol, R. I., for three years; Colebrook, Conn., for five years; and Pawtuxet, R. I., for seven years. In the spring of 1851 he removed to Warren, R. I. He preached as occasion offered in and around Warren for several years. He died in Norfolk, Conn., where he was visiting his relatives, Sept. 17, 1858. See Rev. Dr. H. Jackson, *Funeral Sermon*. (J. C. S.)

**Tobi'ah** (Heb. *Tobiyah*, תּוֹבִיָּה [once תּוֹבִיָּה, Neh. ii, 19], *goodness of Jehorah*; Sept. *Τωβιας* v. r. *Τωβεία*; Vulg. *Tobia*, *Tobias*), the name of two men. See also *TOBIAS*; *TOBIJAH*.

1. A person whose "children" were a family that returned with Zerubbabel, but were unable to prove their connection with Israel (Ezra ii, 60; Neh. vii, 62). B. C. ante 536.

2. A base-born ally of the Samaritans who played a conspicuous part in the rancorous opposition made by Sanballat the Moabite and his adherents to the rebuilding of Jerusalem under Nehemiah, B.C. 446. With an affectation of scorn, after the manner of Remus in the Roman legend, they looked on the constructions of the now hopeful and thriving Jews, and contemptuously said, "Even if a fox go up, he will break down their stone wall" (Neh. iv, 3). The two races of Moab and Ammon found in these men fit representatives of that hereditary hatred to the Israelites which began before the entrance into Canaan, and was not extinct when the Hebrews had ceased to exist as a nation. The horrible story of the origin of the Moabites and Ammonites, as it was told by the Hebrews, is an index of the feeling of repulsion which must have existed between these hostile families of men. In the dignified rebuke of Nehemiah it received its highest expression: "Ye have no portion, nor right, nor memorial in Jerusalem" (ii, 20). But Tobiah, though a slave (ver. 10, 19), unless this be a title of opprobrium, and an Ammonite, found means to ally himself with a priestly family, and his son Johanan married the daughter of Meshullam the son of Berechiah (vi, 18). He himself was the son-in-law of Shechaniah the son of Arah (ver. 17), and these family relations created for him a strong faction among the Jews, and may have had something to do with the stern measures which Ezra found it necessary to take to repress the intermarriages with foreigners. Even a grandson of the high-priest Eliashib had married a daughter of Sanballat (xiii, 28). In xiii, 4 Eliashib is said to have been allied to Tobiah, which would imply a relationship of some kind between Tobiah and Sanballat, though its nature is not mentioned. The evil had spread so far that the leaders of the people were compelled to rouse their religious antipathies by reading from the law of Moses the strong prohibition that the Ammonite and the Moabite should not come into the congregation of God forever (ver. 1). Ewald (*Gesch.* iv, 173) conjectures that Tobiah had been a page ("slave") at the Persian court, and, being in favor there, had been promoted to be satrap of the Ammonites. But it almost seems that against Tobiah there was a stronger feeling of animosity than against Sanballat, and that this animosity found expression in the epithet "the slave," which is attached to his name. It was Tobiah who gave venom to the pitying scorn of Sanballat (Neh. iv, 3), and provoked the bitter cry of Nehemiah (ver. 4, 5); it was Tobiah who kept up communications with the factious Jews, and who sent letters to put their leader in fear (vi, 17, 19); but his crowning act of insult was to take up his residence in the Temple in the chamber which Eliashib had prepared for him in defiance of the Mosaic statute. Nehemiah's patience could no longer contain itself, "therefore," he says, "I cast forth all the household stuff of Tobiah out of the chamber," and with this summary act Tobiah disappears from history (xiii, 7, 8). See NEHEMIAH.

**Tobiah**, BEN-ELIEZER, a Jewish writer, who flourished at Mayence, A.D. 1107, is the author of a commentary on the Pentateuch and the five Megilloth, i. e. the Song of Songs, Ruth, Lamentations, Ecclesiastes, and Esther. This commentary, the proper title of which is *Lekuch Tob* (לְכֻחַ תּוֹב)—in allusion to his name, as is evident from the quotations made by Aben-Ezra and Rashbam—but which is erroneously called *פְּסִקְתָּא* or *פְּסִקְתָּא וּוְשִׁירָא*, consists both of excerpts from the ancient expository works, such as *Siphra*, *Siphre*, *Tanchuma*, etc., and of an attempt at a grammatical explanation of the text. A portion of it, embracing the commentaries on Leviticus, Numbers, and Deuteronomy, was first published at Venice in 1546. With a Latin translation it was republished in Ugolino's *Thesaurus Antiquitatum Sacrarum* (ibid. 1764-69), vol. xv, xvi. Excerpts of the commentaries on the five Megilloth were

published by A. Jelinek (Leips. 1855-58). The whole MS. is in the Bodleian Library at Oxford (*Cod. Uri* 124). See Fürst, *Bibl. Jud.* iii, 427; Grätz, *Gesch. d. Juden*, vi, 159; Kitto, *Cyclop.* s. v.; Etheridge, *Intro. to Heb. Literature*, p. 233, 406; De' Rossi, *Dizionario Storico* (German transl.), p. 314; Zunz, *Gottesd. Vorträge*, p. 293-295. (B. P.)

**Tobias** (Τωβίας), the Greek form of the name *Tobiah* or *Tobijah*, as it occurs of two men in the Apocrypha.

1. The son of Tobit, and central character in the book of that name. See TOBIT, BOOK OF.

2. The father of Hyrcanus, apparently a man of great wealth and reputation at Jerusalem in the time of Seleucus Philopator (2 Macc. iii, 11). B.C. cir. 187. In the high-priestly schism which happened afterwards [see MENELAUS], "the sons of Tobias" took a conspicuous part (Josephus, *Ant.* xii, 5, 1). One of these, Joseph, who raised himself by intrigue to high favor with the Egyptian court, had a son named Hyrcanus (ibid. 4, 2). It has been supposed that this is the Hyrcanus referred to in 2 Macc. iii, 11; and it is not impossible that, for some unknown reason (as in the case of the Maccabees), the whole family were called after their grandfather, to the exclusion of the father's name. On the other hand, the natural recurrence of names in successive generations makes it more probable that the Hyrcanus mentioned in Josephus was a nephew of the Hyrcanus in 2 Macc. (comp. Ewald, *Gesch. d. Volkes Israel*, iv, 309; Grimm, *Ad Macc.* loc. cit.).

**To'bie**, the name of a district (τὰ Τωβίου v. r. *Touβίου*; Vulg. *locu Tubin*), where, in the time of the Maccabees, was an extensive colony of Jews (1 Macc. v, 13); probably identical with the land of Tob (q. v.) mentioned in the history of Jephthah (Judg. xi, 3, 5).

**To'biel** (Τωβιήλ, for Heb. טוֹבִיָּאל, *goodness of God*; comp. *Tobael*), the father of Tobit and grandfather of Tobias (Tobit i, 1).

**Tobi'jah** (Heb. *Tobiyáh*, טוֹבִיָּה [once (Zech. vi, 10) in the prolonged form *Tobiyah'u*, טוֹבִיָּהוּ, *goodness of Jehovah*], the name of two men. See also TOBIAH; TOBIAS.

1. (Sept. *Τωβίας*, but some MSS. omit; Vulg. *Thobias*). The eighth named of the nine Levites sent by Jehoshaphat to teach the law in the cities of Judah (2 Chron. xvii, 8). B.C. 910.

2. (Sept. οἱ ἄρχισμυνοὶ αὐτῆς; Vulg. *Tobias*). Second named of the three or four representative men of the Jewish captives in the time of Zechariah, in whose presence the prophet was commanded to take crowns of silver and gold and put them on the head of Joshua the high-priest (Zech. vi, 10, 14). B.C. 519. Rosenmüller conjectures that he was one of a deputation who came up to Jerusalem from the Jews who still remained in Babylon with contributions of gold and silver for the Temple. But Maurer considers that the offerings were presented by Tobijah and his companions, because the crowns were commanded to be placed in the Temple as a memorial of their visit and generosity. See ZECHARIAH.

**To'bit** (Sept. *Τωβείθ*, *Τωβείρ*, *Τωβίρ*; Vulg. *Tobias*; Vet. Lat. *Tobi*, *Thobi*, *Tobis*), the son of Tobiel and father of Tobias (Tobit i, 1, etc.). The name appears to answer to טוֹבִי, *Tobi*, which occurs frequently in later times (Fritzsch, *Ad Tob.* i, 1), and not (as Welte, *Einleitung*, p. 65) to טוֹבִיָּה, *Tobiah*; yet in that case *Τωβίς*, according to the analogy of *Λευίς* (לֵוִי), would have been the more natural form. The etymology of the word is obscure. Ilgen translates it simply "my goodness;" Fritzsch regards it as an abbreviation of טוֹבִיָּה, comparing *Μελαχι* (Luke lii, 24, 28), *יוֹרִי*, etc. (*Ad Tob.* loc. cit.). The form in the Vulg. is of no weight against the old Latin, except so far as it shows the reading of the Chaldaic text which Jerome used, in

which the identity of the names of the father and son is directly affirmed (i, 9, Vulg.). See TOBIT, BOOK OF.

TOBIT, BOOK OF, one of the deuterocanonical books of the Old Test., standing in most editions of the original between the Epistle of Jeremiah and the Book of Judith, but in the A. V. between 2 Esdr. and Judith. It is chiefly interesting for the insight which it gives us into the superstitious notions of the Jews during the period of the Apocrypha.

I. *Title*.—In the Greek the book is called simply Tobit (Τωβίτ, Τωβείρ) in the old MSS. At a later time the opening words of the book, Βίβλος λόγων Τωβίτ, were taken as a title. In Latin MSS. it is styled *Tobias*, *Liber Tobis*, *Liber Tobie* (Sabatier, p. 706), *Tobit et Tobias*, *Liber utriusque Tobie* (Fritzsche, *Einleit.* § 1). In the A. V. it is superscribed "The book of the words of Tobit, etc., who, in the time of Enemessar (Shalmaneser), king of the Assyrians, was led captive out of Thisbe, which is at the right hand of Kydiss of Nephthalim in Galilee, above Aser." The word Tobit is probably a Hebrew form תוביט, signifying *goodness*, a name very appropriate in a narrative of virtue suffering, yet rewarded.

II. *Design and Contents*.—The object of this book is to show that God, in his mysterious providence, permits sore calamities to befall the most pious and God-fearing in the very act of, and apparently for, obeying his commandments, but that he at the same time exercises a special care over them in the midst of their sufferings, vouchsafes them a happy issue out of all their trials, and holds them up to the world at large as patterns of patience under tribulations, as such who have been deemed worthy of being tried and purified, and who have demonstrated that the effectual and fervent prayer of a "righteous man availeth much." The method adopted by the writer for working out this design will be seen from the following analysis of the book itself.

Tobit, a Jew of the tribe of Naphtali, who strictly observed the law and remained faithful to the Temple-service at Jerusalem (i, 4-8), was carried captive to Assyria by Shalmaneser. While in captivity he exerted himself to relieve his countrymen, which his favorable position at court (ἀγοραστής, i, 13, "purveyor") enabled him to do, and at this time he was rich enough to lend ten talents of silver to a countryman, Gabael of Rages, in Media. But when Sennacherib succeeded his father, Shalmaneser, the fortune of Tobit was changed. He was accused of burying the Jews whom the king had put to death, and was only able to save himself, his wife, Anna, and his son Tobias, by flight. On the accession of Esar-haddon, he was allowed to return to Nineveh, at the intercession of his nephew, Achiacharus, who occupied a high place in the king's household (i, 22); but his zeal for his countrymen brought him into a strange misfortune. As he lay one night in the court of his house, being unclean from having buried a Jew whom his son had found strangled in the market-place, sparrows "muted warm dung into his eyes," and he became blind. Being thus disabled, he was for a time supported by Achiacharus, and after his departure (read ἰσπεύθη, ii, 10) by the labor of his wife. On one occasion he falsely accused her of stealing a kid which had been added to her wages, and in return she reproached him with the miserable issue of all his righteous deeds. Grieved by her taunts, he prayed to God for help; and it happened that on the same day Sara, his kinswoman (vi, 10, 11), the only daughter of Raguel, also sought help from God against the reproaches of her father's household. For seven young men wedded to her had perished on their marriage-night by the power of the evil spirit Asmodeus (q. v.); and she thought that she should "bring her father's old age with sorrow unto the grave" (iii, 10). So Raphael was sent to deliver both from their troubles. In the meantime Tobit called to

mind the money which he had lent to Gabael, and despatched Tobias, with many wise counsels, to reclaim it (ch. iv). On this Raphael (under the form of a kinsman, Azarias) offered himself as a guide to Tobias on his journey to Media, and they "went forth both, and the young man's dog with them," and Anna was comforted for the absence of her son (ch. v). When they reached the Tigris, Tobias was commanded by Raphael to take "the heart, and liver, and gall" of "a fish which leaped out of the river and would have devoured him," and instructed how to use the first two against Asmodeus, for Sara, Raphael said, was appointed to be his wife (ch. vi). So when they reached Ecbatana, they were entertained by Raguel, and, in accordance with the words of the angel, Sara was given to Tobias in marriage that night, and Asmodeus was "driven to the utmost parts of Egypt," where "the angel bound him" (ch. vii, viii). After this Raphael recovered the loan from Gabael (ch. ix), and Tobias then returned with Sara and half her father's goods to Nineveh (ch. x). Tobit, informed by Anna of their son's approach, hastened to meet him. Tobias, by the command of the angel, applied the fish's gall to his father's eyes and restored his sight (ch. xi). After this Raphael, addressing to both words of good counsel, revealed himself, and "they saw him no more" (ch. xii). On this Tobit expressed his gratitude in a fine psalm (ch. xiii); and he lived to see the long prosperity of his son (xiv, 1, 2). After his death Tobias, according to his instruction, returned to Ecbatana, and "before he died he heard of the destruction of Nineveh," of which "Jonas the prophet spake" (xiv, 15, 4).

III. *Historical and Religious Character of the Book*.—1. There are three theories about the reality of this story.

(1) The opinion that this book records proper history was universally held by the Christian Church up to the time of the Reformation, and has even since been maintained by bishop Gray (*A Key to the O. T.* p. 620, etc., ed. 1857), Welte (*Einleit.* p. 84 sq.), Scholz (*Einleit.* ii, 594 sq.), and most Roman Catholic writers. In support of this opinion may be urged, *a*. The minute account which it gives of Tobit's tribe, his pedigree, place of birth, the time in which he lived, his family, his condition and employment, his captivity, poverty, blindness, recovery, age, death, and place of burial (i, 1, 13, 20, 21; ii, 10; xi, 13; xiv, 11-13); *b*. The exactness of the historical remarks about the Assyrian kings (i, 2, 13, 15, 21), without deriving the names Ἐνεμίσσαρος (=Shalmaneser) and Σαρχεδονός from the Old Test., as well as the correctness of the geographical points (i, 14; ii, 21; iii, 7; vi, 1, 11); *c*. The impossibility of tracing the main features of the narrative to any Old-Test. prototype, and of explaining them on the hypothesis of fiction. The obscure place Thisbe is given as Tobit's place of birth (i, 2), and many minute particulars of his life are described which have in themselves nothing whatever to do with the plot, and which can only be accounted for on the reality of the events. On the other hand, Bertholdt (*Einleit.* § 579) has given a summary of alleged errors in detail (e. g. i, 1, 2, "Naph-tali," comp. with 2 Kings xv, 29; vi, 9, Rages, said to have been founded by Sel. Nicator), but the question turns rather upon the general complexion of the history than upon minute objections, which are often capricious and rarely satisfactory (comp. Welte, *Einleit.* p. 84-94).

(2) The opinion that it is a moral fiction was first thrown out by Luther (*Vorrede aufs Buch Tobia* [Bible, ed. 1534]), and has since been maintained by Raimond (*Censur.* i, 726), J. A. Fabricius, Buddeus (*Hist. Eccles.* ii, 489), Paul Fagius, Eichhorn (*Einleit.* p. 401 sq.), Bertholdt (*Einleit.* v, 2477 sq.), De Wette (*Einleit.* § 309), Gutmann (*Die Apokryphen*, p. 143), Ewald (*Gesch. d. I. J.* iv, 233 sq.), Fritzsche (*Kurzgef. exeget. Handb. z. d. Apokryphen*, ii, 14 sq.), Davidson (*The Text of the O. T. Considered*, p. 1001), Vaihinger (in Herzog's *Real-Encyklop.* s. v. "Tobias"), Grätz (*Gesch. der Juden*, iv, 180 [2d ed. 1866]), etc. In support of this opinion it is

urged—*a.* The narrative is completely isolated; and though the events pretend to have occurred before and shortly after the fall of Nineveh (B.C. 606), no other document written at a later period refers to them. It bears a strong likeness to the tales of the *Thousand and One Nights*, with the obvious exception that the writer has a considerable acquaintance and sympathy with the writings of the Old Test. He writes in a pleasing style, and with a good deal of power. But he is clearly at variance with the sacred books of the holy nation on important points both of fact and principle. Tobit's age, his wife's, who died after him, and that of his son are much beyond the ordinary limit of old age in his day, and bring us back to the times of the patriarchs. He was fifty-eight years of age when he lost his sight, in the reign of Esar-haddon, and lived one hundred years after that time. Now, if, according to Rawlinson, Esar-haddon began to reign B.C. 680, Tobit must have survived the fall of Nineveh (B.C. 625 or 606), of which he is made to prophesy (xiv, 4). He also takes no account of Sargon, who comes in between Shalmaneser and Sennacherib. He removes to Elymais, and yet is found at Nineveh (xi, 16), though he does not intimate his return, unless it be in iii, 17, where he speaks of coming home. *b.* The name Tobit does not occur in the Old Test., and belongs to a later age. *c.* The form, spirit, and tone of the narrative show that it belongs to a very late period. The doctrine of good and evil spirits (iii, 8; vi, 14; viii, 3; xii, 15), the ascription of human lusts to spiritual beings (vi, 14), the notion of the seven presence-angels bringing the prayers of the pious before the Divine throne (xii, 12, 15), the marriage instrument (כתובה), and the legal benediction pronounced over the wedded pair (vii, 13, 14), are of post-Babylonian origin. *d.* The stories of the angel Raphael in a human form giving a false account of himself as being a kinsman of Tobit (v, 12), of Tobit becoming blind in both eyes by the falling of some dung of sparrows (ii, 10), and of the marvellous fish (vi, 2-5) are beyond all matter of fact. The modes of repelling evil spirits and curing blindness betray a superstitious or trifling mind. The angel is made to feign himself a man, a Jew of a family known to Tobit, and to be the voucher for the false charms which are introduced. Although the extraordinary character of the details, as such, is no objection against the reality of the occurrences, yet it may be fairly urged that the character of the alleged miraculous events, when taken together, is alien from the general character of such events in the historical books of Scripture; while there is nothing exceptional in the circumstances of the persons, as in the case of Daniel, which might serve to explain this difference.

(3.) The view that the narrative is based upon a real occurrence preserved by tradition, but poetically embellished to suit the spirit of the time in which it was written, is maintained by Arnald, Dereser, Ilgen, Keil, etc. The fact that there are different recensions and embellishments of the story, and that the *Midrash Tanchuma* (pericope תנחומי) gives an independent version of it, seems to show that it was traditionally handed down from the time when the occurrence took place. It is quite possible that some real occurrences, preserved by tradition, furnished the basis of the narrative, but it does not follow by any means that the elimination of the extraordinary details will leave behind pure history (so Ilgen). As the book stands it is a distinctly didactic narrative. Its point lies in the moral lesson which it conveys, and not in the incidents. The incidents furnish lively pictures of the truth which the author wished to inculcate, but the lessons themselves are independent of them. Nor can any weight be laid on the minute exactness with which apparently unimportant details are described (e.g. the genealogy and dwelling-place of Tobit, i, 1, 2; the marriage festival, viii, 20; xi, 18, 19, quoted by Ilgen and Welte), as proving the reality of the events, for such particularity is character-

istic of Eastern romance, and appears again in the Book of Judith. The writer in composing his story necessarily observed the ordinary form of a historical narrative.

2. The religious character of the book is one of its most important and interesting features, inasmuch as it shows the phases of faith which obtained prior to the advent of Christ, and explains many points in the New Test. Few probably can read the book in the Sept. text without assenting to the favorable judgment of Luther on its merits. Nowhere else is there preserved so complete and beautiful a picture of the domestic life of the Jews after the Return. There may be symptoms of a tendency to formal righteousness of works, but as yet the works are painted as springing from a living faith. The devotion due to Jerusalem is united with definite acts of charity (i, 6-8) and with the prospect of wider blessings (xiii, 11). The giving of alms is not a mere scattering of wealth, but a real service of love (i, 16, 17; ii, 1-7; iv, 7-11, 16), though at times the emphasis which is laid upon the duty is exaggerated (as it seems) from the special circumstances in which the writer was placed (xii, 9; xiv, 10). Of the special precepts one (iv, 15, ὁ μωσὶς μὴ δέει πωλεῖσθαι) contains the negative side of the golden rule of conduct (Matt. vii, 12), which in this partial form is found among the maxims of Confucius.

But it is chiefly in the exquisite tenderness of the portraiture of domestic life that the book excels. The parting of Tobias and his mother, the consolation of Tobit (v, 17-22), the affection of Raguel (vii, 4-8), the anxious waiting of the parents (x, 1-7), the son's return (ix, 4; xi), and even the unjust suspiciousness of the sorrow of Tobit and Anna (ii, 11-14) are painted with a simplicity worthy of the best times of the patriarchs. Almost every family relation is touched upon with natural grace and affection: husband and wife, parent and child, kinsmen, near or distant, master and servant, are presented in the most varied action, and always with life-like power (i, 22; ii, 10, 13, 14; v, 14, 15, 17-22; vii, 3-8, 16; viii, 4-8; x, 1-7; xi, 1-13; xii, 1-5, etc.). Prayer hallows the whole conduct of life (iv, 19; vi, 17; viii, 5-8, etc.); and even in distress there is confidence that in the end all will be well (iv, 6, 14, 19), though there is no clear anticipation of a future personal existence (iii, 6).

The most remarkable doctrinal feature in the book is the prominence given to the action of spirits, who, while they are conceived to be subject to the passions of men and material influences (Asmodeus), are yet not affected by bodily wants, and manifested only by their own will (Raphael, xii, 19). Powers of evil (δαμόνοιοι, πνεῦμα πορνῶν, iii, 8, 17; vi, 7, 14, 17) are represented as gaining the means of injuring men by sin, while they are driven away and bound by the exercise of faith and prayer (viii, 2, 3). On the other hand, Raphael comes among men as "the healer" (comp. Dillmann, *Das Buch Henoch*, c. 20), and, by the mission of God (iii, 17; xii, 18), restores those whose good actions he has secretly watched (xii, 12, 13), and "the remembrance of whose prayers he has brought before the Holy One" (xii, 12). This ministry of intercession is elsewhere expressly recognised. Seven holy angels, of whom Raphael is one, are specially described as those "which present the prayers of the saints, and which go in and out before the glory of God" (xii, 15). It is characteristic of the same sense of the need of some being to interpose between God and man that singular prominence is given to the idea of "the glory of God," before which these archangels appear as priests in the holiest place (viii, 15; xii, 15); and in one passage "the angel of God" (v, 16, 21) occupies a position closely resembling that of the Word in the Targums and Philo (*De Mut. Nom.* § 13, etc.). Elsewhere blessing is rendered to "all the holy angels" (xi, 14, εὐλογημένοι as contrasted with εὐλογητός; comp. Luke i, 42), who are themselves united with "the elect" in the duty of praising God forever (viii, 15).

This mention of "the elect" points to a second doctrinal feature of the book, which it shares with Baruch alone of the Apocryphal writings, the firm belief in a glorious restoration of the Jewish people (xiv, 5; xiii, 9-18). But the restoration contemplated is national, and not the work of a universal Saviour. The Temple is described as "consecrated and built for all ages" (i, 4), its feasts are "an everlasting decree" (ver. 6), and when it is restored "the streets of Jerusalem shall say . . . Blessed be God which hath extolled it forever" (xiii, 18). In all there is not the slightest trace of the belief in a personal Messiah.

Comparisons have often been made between the Book of Tobit and Job, but from the outline which has been given it is obvious that the resemblance is only superficial, though Tobit ii, 14 was probably suggested by Job ii, 9, 10, while the differences are such as to mark distinct periods. In Tobit the sorrows of those who are afflicted are laid at once in prayer before God, in perfect reliance on his final judgment, and then immediately relieved by Divine interposition. In Job the real conflict is in the soul of the sufferer, and his relief comes at length with humiliation and repentance (xlii, 6). The one book teaches by great thoughts; the other by clear maxims translated into touching incidents. The contrast of Tobit and Judith is still more instructive. These books present two pictures of Jewish life and feeling, broadly distinguished in all their details, and yet mutually illustrative. The one represents the exile prosperous and even powerful in a strange land, exposed to sudden dangers, cherishing his national ties, and looking with unshaken love to the Holy City, but still mainly occupied by the common duties of social life; the other portrays a time of reproach and peril, when national independence was threatened, and a righteous cause seemed to justify unscrupulous valor. The one gives the popular ideal of holiness of living, the other of courage in daring. The one reflects the current feeling at the close of the Persian rule, the other during the struggles for freedom.

IV. *Original Language, Versions, Condition of the Text, etc.*—1. The whole complexion of the book shows that it is of Palestinian origin, and hence many have assumed that the languages in which the traditional story was first written down were Hebrew and Aramaic. Indeed, Jerome tells us that he made his Latin version from the Aramaic in one day, with the assistance of a Jew, who, being skilled in both Hebrew and Chaldee, dictated to him the import thereof in Hebrew ("Exigitis, ut librum Chaldaeorum sermone conscriptum ad Latini stylum traham, librum utique Tobie quem Hebraei de catalogo divinarum Scripturarum secantes his quæ Hagiographa [Apocrypha] memorant, manciparunt. Feci satis desiderio vestro, non tamen meo studio. . . . Et quia vicina est Chaldaeorum lingua sermoni Hebraico, utriusque linguæ pertissimum loquacem reperiens unius diei laborem arripui, et quidquid illi mihi Hebraicis verbis expressit, hoc ego accito notario sermonibus Latinis exposui" [Pref. in Tob.]). This has been thought to be corroborated by the fact that some of the difficulties in the Greek text can be removed on the supposition of a Hebrew original. Thus ἔκχεον τοὺς ἄρτους σου ἐπὶ τὸν τάφον τῶν δίκαιων (iv, 17), which has no sense, seems to be a mistranslation of שלח בְּקֶרֶב הַצִּדִּיקִים; the translator, by a transposition of the last two letters, having read בקבר instead of בקרב, and שלח instead of שפך, as is evident from the antithetical clause, "and give it not to the wicked," in harmony with the traditional injunction אסור להחיות ירי נזכר עברה, it is not lawful to strengthen the hands of the transgressor. So also καὶ εὐλόγησε Τωβίας τὴν γυναῖκα αὐτοῦ (ix, 6) may be accounted for on the supposition that it is a mistranslation of the Hebrew ויברך טוביה את אשתו. The correct rendering of it requires that either Gabael should be taken

as the subject—i. e. "and he (i. e. Gabael) saluted Tobias with his wife"—or that both Tobias and his wife should be the subject—i. e. "and Tobias and his wife saluted them," i. e. the two comers, Azarias and the servant. See also v, 11, 12, 18; vi, 9; and for the Hebraizing style, i, 1, 13; iii, 5; v, 14; xiv, 19; De Wette, *Einleit.* § 310; Grätz, *Geschichte*, iv, 466 (2d ed.).

On the other hand, superior clearness, simplicity, and accuracy of the Sept. text prove conclusively that this is nearer the original than any other text which is known, if it be not, as some have supposed (Jahn and Fritzsche doubtfully), the original itself. Indeed, the arguments which have been brought forward to show that it is a translation are far from conclusive. The supposed contradictions between different parts of the book, especially the change from the first (i-iii, 6) to the third person (iii, 7-xiv), from which Ilgen endeavored to prove that the narrative was made up of distinct Hebrew documents, carelessly put together, and afterwards rendered by one Greek translator, are explicable on other grounds; and the alleged mistranslations (iii, 6; iv, 19, etc.) depend rather on errors in interpreting the Greek text than on errors in the text itself. The style, again, though harsh in parts, and far from the classical standard, is not more so than some books which were undoubtedly written in Greek (e. g. the Apocalypse); and there is little, if anything, in it which points certainly to the immediate influence of an Aramaic text. (i, 4, εἰς πάσας τὰς γενεάς τοῦ αἰῶνος; comp. Eph. iii, 21; i, 22, ἐκ δευτέρως; iii, 15, ἵνα τί μοι ζῆν; v, 15, τίνα σοι ἔσονται μισθὸν δίδοναι; xiv, 3, προσέδραο φοβείσθαι, etc.) To this it may be added that Origen was not acquainted with any Hebrew original (*Ep. ad Afric.* 13); and the Chaldee copy which Jerome used, as far as its character can be ascertained, was evidently a later version of the story. On the other hand, there is no internal evidence against the supposition that the Greek text is a translation. The Greek offers some peculiarities in vocabulary: i, 6, πρωτοκουρία, i. e. ἡ ἀπαρχὴ τῶν κουρῶν, Dent. xviii, 4; i, 7, ἀποπαρίζομαι; i, 21, ἐκλογιστρία; ii, 3, στραγγαλῶ, etc.: and in construction, xiii, 7, ἀγαλλιάσθαι τὴν μεγαλυσύνην; xii, 4, δικαιοῦσθαι τινι; vi, 19, προσάγειν τινί (intrans.); ver. 6, ἰγγίξεν ἑν, etc. But these furnish no argument on either side.

2. There are extant different Greek, Latin, Syriac, and Hebrew texts of this book, differing more or less from one another in the details of the narrative; but yet, on the whole, so far alike that it is reasonable to suppose that all were derived from one written original, which was modified in the course of translation or transcription.

Besides the Greek text of the Sept. which was adopted into this version because it was that of the Greek Church, there is a recension, one fragment of which (i, 1-ii, 2) is contained in the *Cod. Sinaiticus* (or *Cod. Frid. Augustanus*, ed. Tischendorf [Leips. 1846]), and another (vi, 9-xiii) in the last three MSS. (44, 106, 107) of Holmes and Parsons.

Of Latin translations we have the ante-Hieronymian version, which was first published by Sabatier (*Bibliothecæ Sacrorum Latine Versiones Antiquæ*, 1743) from two MSS. of the 8th century, and which, according to the investigations of Fritzsche (p. 10 sq.), is mostly made from the recension of the Greek text, but partly (vi, 15-17; vii, 15-18; viii, 14-17; xii, 6-9, 11-22; xiii, 6-18) also from the common text, while x, 1-xi, 19 is from a mixture of both texts. In this edition of the *Vetus Latina*, Sabatier also published, in the form of notes and as various readings, two other codd., one being of the same age as the MSS. of the ante-Hieronymian version, belonging to the library of St. Germain (No. 15), and concluding (xiii, 12) with *Explicit Tobijustus*; and the other belonging to the Vatican (No. 7). The text of the latter differs so materially from the other MSS. that it is regarded as an independent version, though emanating from the same Greek source. It is less barbarous and

more fluent in style, as well as more explicit in its renderings, and it is to be regretted that it has survived as a fragment, containing only i, 1-vi, 12 (*Bibl. Lat.* ii, 706). There also existed another Latin version, as is evident from the quotations of this book contained in the *Speculum* of Augustine, which Angelo Mai has published (*Spicilegium Romanorum*, ix, 21-23). As to the Vulgate Latin version, Jerome tells us, as we have seen, that he made it in one day from the Syro-Chaldaic. It differs very materially from the Greek, and is evidently derived from a different form which this traditional story assumed in a different part of the country. The treatment of the text in this recension is very arbitrary, as might be expected from the above account which Jerome gives of the mode in which it was made; and it is of very little critical value, for it is impossible to distinguish accurately the different elements which are incorporated in it. It is evident that in this process Jerome made some use of the Old Latin version, which he follows almost verbally in a few places: iii, 3-6; iv, 6, 7, 11, 23, etc.; but the greater part of the version seems to be an independent work. On the whole, it is more concise than the Old Latin; but it contains interpolations and changes, many of which mark the asceticism of a late age: ii, 12-14 (parallel with Job); iii, 17-23 (expansion of iii, 14); vi, 17 sq. (expansion of vi, 18); ix, 11, 12; xii, 13 ("et quia acceptus eras Deo, necesse fuit ut tentatio probaret te").

The Syriac version is made from the two different recensions of the Greek; i, 1-vii, 9 being a translation of the common Greek text of the Sept., while vii, 10, etc., is from a text represented by the above-named three MSS. (44, 106, 107) of Holmes and Parsons, according to the marginal annotations in Usher's MS.

Neubauer has lately discovered a Chaldean version among the MSS. of the Bodleian Library, which may prove to be a copy of that to which Jerome refers as the basis of his version.

There are four Hebrew versions of this book, the one first published in Constantinople, 1517; then with a Latin translation by Paul Fagius, and adopted in Walton's *Polyglot* (Lond. 1657), vol. iv. It is a free translation of the common Greek text, made by a learned Jew in the 12th century. The second is that first published with a Latin translation by Sebastian Münster (Basle, 1542; then again in 1549, 1556, 1563), and has also been inserted in Walton's *Polyglot*. This Hebrew version is more in harmony with the *Vetus Latina*; and the author of it, who was a Jew, is supposed to have flourished in the 5th century. The third Hebrew version was made from the common Greek text by J. S. Fränkel (Leips. 1830); and the fourth is by J. Siebenberger—it was published in Warsaw, 1840, with a Judaio-German translation, a Hebrew commentary, and an elaborate Hebrew introduction.

As to the versions of the Reformation, Luther made his translation from the Vulgate; the Swiss-Zurich Bible (1531) is also from the Vulgate. Coverdale (1535), as usual, followed the Zurich version [see COVERDALE]; and he again was followed by Matthew's Bible (1537), Lord Cromwell's Bible (1539), Cranmer's Bible (1540), and the Bishops' Bible (1568). The Geneva version (1560) is the first made from the Greek, and our present A. V. (1611), as in most cases, followed the Geneva version, though this was interdicted by James I.

3. The first complete edition of the book was by Ilgen (*Die Gesch. Tobis . . . mit . . . einer Einleit. versehen* [Jen. 1800]), which, in spite of serious defects due to the period at which it was published, contains the most full discussion of the contents. The edition of Fritzsche (*Exeget. Handb.* [Leips. 1853], vol. ii) is concise and scholarlike, but leaves some points without illustration. In England the book, like the rest of the Apocrypha, seems to have fallen into neglect.

V. *Author, Date, and Place of Composition.*—As xii, 20 tells us that Raphael, before his disappearance, commanded Tobit and his son Tobias to record the events

of their lives; and, moreover, since Tobit, in the first three chapters, speaks in the first person, while (ch. xiii) his prayer is introduced by the statement *Kai Tw-bit ēgrapsē proseuchēn eis agalliasin kai ēipen*; the Church universal, up to the time of the Reformation, believed that Tobit himself wrote this book (B.C. cir. 600) as far as ch. xiv; that xiv, 1-11 was written by his son Tobias; and that xii, 12-15 was added by the editor of this document immediately after the death of Tobias. This opinion is shared by bishop Gray, Pridcaux, and others, who modify it by submitting that it was compiled from the memoirs of Tobit and Tobias; while Ilgen maintains that i, 1-iii, 7; xiii, 1-8, were written by Tobit in Assyria, B.C. 689; iii, 8-xii, 2-22; xiv, 1-15, were written in Palestine, B.C. cir. 280; and that from these two Hebrew documents the Chaldean version was made B.C. cir. 120, which Jerome translated into Latin. Modern critics, however, conclude, from the whole complexion of the book, its angelology, theology, etc., that it is a post-Babylonian production, and that it was written by a Palestinian Jew. But these critics differ very materially about the precise date when the book was compiled, as will be seen from the following table:

The Catholic Church—bishop Gray, Ilgen . . . . .	B.C. 689-600
Ewald . . . . .	350
Herzfeld . . . . .	300
Bertholdt . . . . .	250-200
Elchhorn . . . . .	A.D. 10
Fabrilus . . . . .	100
Grätz . . . . .	130

But though internal evidence leaves it beyond the shadow of a doubt that the book was compiled after the Babylonian captivity, yet the arguments adduced by Grätz (*Geschichte*, iii, 466, 2d ed.) to prove that it was written after the destruction of the Temple, and during the persecutions of Hadrian, are inconclusive. The reference to the destruction of the Temple (xiii, 10, 16; xiv, 4) is designed to refer to what took place in the reign of Zedekiah, when Nebuchadnezzar took Jerusalem and burned the sanctuary (2 Kings xxv). The other remark of this learned historian—viz. that the bread of heathens (*ἀπρος τῶν ἑθνῶν*=כֶּרֶם, of which Tobit speaks (ver. 1, 10), was first interdicted shortly before the destruction of the Temple by Titus—is based upon restricting the term *ἀπρος* to *actual bread*, whereas it signifies *food* generally, and this was prohibited long before the Christian æra (comp. Dan. i, 5). Indeed, the book is singularly devoid of the stringent Halachic expansions of the Mosaic enactments which obtained in later times: it contains no allusion whatever to the rewards in a future life, and has no reference to the party-strifes which were so rampant at the time of Christ, traces of which might naturally be expected in it if it had been written in or after the time of Christ. It is therefore most probable that the book was written B.C. cir. 250-200.

VI. *Canonicity and Authority.*—Like the other deutero-canonical books, Tobit was never included in the canon by the synagogue. This is established beyond the shadow of doubt, not only from the list of the Hebrew Scriptures given by the Jews themselves in the Talmud (*Baba Bathra*, 14), but from the oldest catalogues of the canon furnished by Christian fathers, such as Melito, Origen, etc. Indeed, Origen distinctly states that neither Tobit nor Judith was ever received by the Jews as Sacred Scripture—*Ἐβραῖοι τῷ Τωβίᾳ οὐ χρώμεται* (*Ep. ad Afric.* § 13; comp. *De Orat.* i, 14).

It was, however, different in the Greek Church, where the text of the Sept. was received as canonical. There appears to be a clear reference to it in the Latin version of the Epistle of Polycarp (c. 10, *elemosyna de morte liberat*; Tobit iv, 10; xii, 9). In a scheme of the Ophites, if there be no corruption in the text, Tobias appears among the prophets (Iren. i, 30, 11). Forming part of the contents of this version, Clement of Alexandria quotes Tobit iv, 15; xii, 8, as taken from *ἡ γραφή*,

*Scripture* (Strom. ii, 23, 139). But though Origen himself also quoted it as *Scripture*, yet it is ranked by Christians among such as were read to the catechumens, and contains a plainer and less elevated doctrine (*In Numb. Homil. xx*). Even Athanasius, when writing without any critical regard to the canon, quotes Tobit as *Scripture* (*Apol. c. Ariani*. § 11, *ὡς γράμμαται*, Tobit xii, 7); but when he gives a formal list of the sacred books, he definitely excludes it from the canon, and places it with other Apocryphal books among the writings which were "to be read by those who were but just entering on Christian teaching, and desirous to be instructed in the rules of piety" (*Ep. Fest.* p. 1177, ed. Migne). This distinction, however, between *canonical* and *apocryphal* afterwards disappeared, to a great extent, in the Greek Church, as is seen from the fact that Bar-Hebræus places Tobit among the sacred books in his Nomocanon of the Antiochian Church (Mai, *Script. Vett. Nova Collectio*, 53; comp. Fritzsche, p. 18).

In the Latin Church Tobit was regarded with greater sacredness. Cyprian often quotes it as *Holy Writ* (*De Opere et Eleemosynis Liber*). Hilary cites it to prove the intercession of angels (*In Psal. cxxix*, 7), and tells us that some Christians added both Tobit and Judith to the other two-and-twenty canonical books to make up their canon of four-and-twenty books (*Proh. in Psal. xv*). Lucifer quotes it as authoritative (*Pro Athan.* i, 871). Augustine includes it with the other Apocrypha of the Sept. among "the books which the Christian Church received" (*De Doctr. Christ.* ii, 8). This is expressed still more distinctly in the *Speculum* (p. 1127, C., ed. Par. 1836): "Non sunt omittendi et hi [libri] quos quidem ante Salvatoris adventum constat esse conscriptos, sed eos non receptos a Judæis recipit tamen ejusdem Salvatoris ecclesia." The preface from which these words are taken is followed by quotations from Wisdom, Ecclesiasticus, and Tobit. In this Augustine was followed by the mass of the later Latin fathers. Ambrose, in especial, wrote an essay on Tobias, treating of the evils of usury, in which he speaks of the book as a "prophetic" in the strongest terms (*De Tobia*, 1, 1; comp. *Hexam.* vi, 4). Jerome, however, followed by Rufinus, maintained the purity of the Hebrew canon of the Old Test., and, as has been seen, treated it very summarily.

The third Council of Carthage (A.D. 397), Innocent I (405), and the councils of Florence (1439) and Trent (1546), declared it canonical. Indeed, in the old Roman Missal and in the Missal of Sarum there is a proper mass of Raphael, the archangel, and it is ordered in the prefatory rubric that the office be celebrated for pilgrims, travellers, sick persons, and dæmoniacs. This is followed by two short prayers, one addressed to God and the other to Raphael (comp. Arnald, *Dissertation on Asmodeus*).

As to the Reformed Church, though Luther was the first who separated the deuterocanonical from the canonical books, yet he entertained the highest opinion of the book of Tobit. "If it is history," says the great Reformer, "it is fine holy history; but if fiction, it is indeed right beautiful, wholesome, profitable fiction, and play of an ingenious poet. . . . It is, therefore, profitable and good for us Christians to read this book as the production of an excellent Hebrew poet, who treats not on frivolous, but solid, matters" (*Vorrede zum Buche Tobia*, in his translation of the Bible, ed. 1534). In the Anglican Church the book of Tobit is looked upon with still greater favor—iv, 7-16 is quoted in the *Homilies* as the counsel of the holy father Toby (*On Alma-deeds*, pt. i); iv, 10 is cited as a lesson taught by "the Holy Ghost in Scripture" (*ibid.* pt. ii); and xii, 8 is adduced to show that the angel Raphael told Tobias that "fasting used with prayer is of great efficacy" (*Of Fasting*, pt. ii). Passages of Tobit are also incorporated in the liturgy; iv, 7-9 is among the passages used at the offertory; iii, 3, according to the Latin Vulgate, is introduced into the litany; vi, 17, according to the Vulgate, is alluded to in the preface to the Marriage Service; while in the prayer

following immediately after the versicles and responses in the same service in the First Book of Prayer of Edward VI, the following sentence is used: "And as thou didst send the angel Raphael to Thobie and Sara, the daughter of Raguel, to their great comfort, so vouchsafe to send thy blessing upon these thy servants" (Parker Society's ed. p. 131).

VII. *Commentaries*.—The following are the special exegetical helps on this Apocryphal book: Fagius, *Tobia Liber* (Isny, 1542, 4to; also in the Lond. *Polyglot*, 1657, fol.); Münster, *סֵפֶר תּוֹבִיָּה* (Basle, 1542, 1549, 1556, 1563, 4to; also in Walton's *Polyglot*); Drusius, *Tobias Græce* (Franck. 1591, 8vo; also in his *Criticæ Sacre*); Senarius, *In Libros Tobias, Judith, etc.* (Mainz, 1610, fol.); Drexel, *Tobias Illustratus* (Mun. 1611, 12mo); Sanctius, *In Libros Ruth, Tobias, etc.* (Lugd. 1628, fol.); Justinian, *Tobias Illustratus* (Col. 1629, fol.); Van Mauden, *Tobias Delineatus* (Antw. 1631, fol.); Βιβλος Λόγων Τωβίτ, etc. (in the eda. of the Apocrypha, F. ad M. 1634, 1757, 8vo; by Augusti [Leipa. 1804, 8vo]; Apel [ib. 1836, 8vo]); Celada, *Commentarius in Tob. Hist.* (Lugd. 1644, fol.); Anon. *Tobie, Judith, et Esther, avec Explication* (Paris, 1688, 8vo); Van der Hardt, *Enigma Tobias, etc.* (Helmst. 1728, 4to); Aden, *סֵפֶר תּוֹבִיָּה* (Amst. 1736, 8vo); Sabatier, *Liber Tobit* (in the *Vetus Latina* [Par. 1751, fol.], vol. i); Seiler, *Pred. üb. d. B. Tobias* (Munich, 1780, 8vo); Le Clerc, *Liber Tobias* (Par. 1785, 8vo); Bauer, *Das B. Tobias erklärt* (Bramb.-Wirtzb. 1787, 1793, 12mo); Eichhorn, *Ueb. d. B. Tobias* (in his *Bibliothek*, ii, 410-440 [Leips. 1787-1800]); Ilgen, *Die Gesch. Tob's* (Jen. 1800, 8vo); Höpfer, *Historia Tobias Græce* (Vitemb. 1802, 4to); Dereser, *Tobias, Judith u. Esth. erklärt* (Frankfort-on-the Main, 1803, 1833, 8vo); Paur, *Das B. Tobias bearbeitet* (Leips. 1817, 8vo); Van Ess, *Liber Tobias* (Tüb. 1822, 8vo); Fränkel, *Das B. Thobi* (in his *אֲחֵרֵי הַתּוֹבִיָּה* [Leips. 1830, 8vo]); Siebenberger, *תּוֹבִיָּה* (Heb. translation and commentary [Warsaw, 1839, 8vo]); Guttman, *Die Apokr. des A. T.* (Altona, 1841, 8vo); Cittadini and Bottari, *Libri di Tobia, Giuditto, e Ester* (Ven. 1844, 8vo); Fritzsche, *Die Bücher Tobit und Judith* (vol. ii of the *Kurzgef. exeg. Handb.* [Leips. 1853, 8vo]); Reusch, *Das B. Tobias erklärt* (Freib. 1857, 8vo); Sengelmann, *Das B. Tobit erklärt* (Hamb. 1857, 8vo). See APOCRYPHA.

Tobler, Titus, a German writer known for his researches in Palestine, was born June 25, 1806, at Stein, in the canton of Appenzell, Switzerland. He studied at Zurich and Vienna, was promoted as doctor of medicine in Wirtzburg, and, after spending a time in Paris, returned in 1827 to his native place and settled there as a physician. In 1835-36 he travelled in Palestine for mere medical purposes (comp. *Lustreise ins Morgenland* [Zurich, 1839, 2 vols.]), but he soon became so interested in the topographic-geographical exploration of the Holy Land that he undertook a second journey in 1845. See his *Bethlehem* (St. Gall. 1849);—*Plan von Jerusalem* (1850);—*Golgatha* (1851);—*Die Siloahquelle und der Oelberg* (1852);—*Denkblätter aus Jerusalem* (1853, 2d ed. 1856);—and especially *Topographie von Jerusalem u. seinen Umgebungen* (Berlin, 1853-54, 2 vols.);—*Beitrag zur medicin. Topographie von Jerusalem* (ibid. 1855). He undertook a third journey, and published as the results, *Planographie von Jerusalem* (Gotha, 1858);—*Dritte Wanderung nach Palästina* (ibid. 1859). In 1865 he went for the fourth time, but on account of the cholera he soon returned and published *Nazareth in Palästina, nebst Anhang der vierten Wanderung* (Berlin, 1868). Besides these works, he published, *De Locis Sanctis, quas perambulavit Antonius Martyr c. m. 570* (St. Gall. 1863);—*Theodoricus de Locis Sanctis* (ibid. 1865);—*Bibliographia Geographica Palestinae* (Leips. 1867);—*Der grosse Streit der Lateiner mit den Griechen in Palestina, etc.* (St. Gall. 1870);—*Palestinae Descriptiones ex Sæculo IV, V, et VI* (ibid. 1869);—*Descriptiones Terræ Sanctæ ex Sæculo VIII, IX, XII, et XV* (Leips. 1874);—*Bibliographia*

*Geogr. Palestina ab Anno CCCXXXIII usque ad Annum M* (Dresden, 1875). Tobler died Jan. 21, 1871, at Munich. The interesting life of this man will be found in Heim's *Dr. Titus Tobler, der Palästinafahrer: Ein appetitliches Lebensbild: Nach handschriftlichen Quellen bearbeitet* (Zurich, 1879). (B. P.)

**To'chen** (Heb. *To'ken*, תוכן, *task or measure* [as in Ezek. v, 18; xlv, 11]; Sept. *Θοκάν* v. r. *Θοχάν*; Vulg. *Thochen*), one of the towns in the tribe of Simeon (1 Chron. iv, 32); probably the same elsewhere (Josh. xv, 24) called *TELEM* (q. v.) or *TELAIM* (1 Sam. xv, 4).

**Todd, David**, a Congregational minister, was born at West Hanover, Pa., Nov. 5, 1821. He left home at the age of fifteen to attend the preparatory school of Oberlin College. After finishing his collegiate studies there, he entered the theological department, and passed through the prescribed course. He commenced his labors in Illinois, supplying the churches of Knox and Ontario, ten miles distant from each other. In these places he gathered permanent congregations and organized churches. He was ordained at Victoria, Aug. 18, 1847. In 1849 he went to Bureau County, and took charge of a Congregational Church, where he labored with success until 1863, when he accepted a call to Pine Bluffs, Ark. He remained there until 1865, when, his health failing, he found it necessary to return to his Northern home. On his return he resumed his work as pastor, and finished his course—a faithful pastor and an excellent preacher, held in high esteem by the Church and community. He died at Granville, Ill., Aug. 10, 1874. (W. P. S.)

**Todd, Henry John**, an English clergyman, was born in 1763, and educated at Hertford College, Oxford, whence he proceeded as A.M. in 1786. He became a minor canon of Canterbury Cathedral soon after. In 1792 he was presented to the vicarage of Milton, near Canterbury, and some years later to the rectory of All-hallow's, Lombard Street, London. He was appointed by the archbishop keeper of the MSS. at Lambeth; and in 1820 he was presented, by the earl of Bridgewater, to the rectory of Settrington, in Yorkshire. In 1830 he was collated by the archbishop of York to the prebend of Hushwaite in that cathedral church; and, finally, in 1832, he was appointed archdeacon of Cleveland. He died at Settrington, Yorkshire, Dec. 24, 1845. He wrote, *Some Account of the Deans of Canterbury* (Cant. 1793, 8vo);—*Catalogue of Books in the Library of Christ Church* (ibid. 1802, 8vo);—*Catalogue of the Archiepiscopal Manuscripts in the Library at Lambeth Palace* (Lond. 1812, fol.);—*Original Sin, Free-will, Regeneration, Faith, etc., as Maintained in Certain Declarations of our Reformers* (ibid. 1818, 8vo);—*Vindication of our Authorized Translation and Translators of the Bible* (ibid. 1819, 8vo);—*Observations on the Metrical Versions of the Psalms made by Sternhold, Hopkins, and others* (ibid. 1819, 8vo; 1822, 8vo);—*Memoirs of the Life and Writings of the Right Rev. Brian Walton, Bishop of Chester* (ibid. 1821, 2 vols. 8vo);—*Account of Greek MSS., Chiefly Biblical, etc.* (ibid. 1823, 8vo);—*Archbishop Cranmer's Defence of the Doctrine of the Sacrament, with a Vindication of the Author against Lingard, Milner, and Butler* (ibid. 1825, 8vo);—*Of Confession and Absolution, and the Secrecy of Confession* (ibid. 1828, 8vo);—*Life of Archbishop Cranmer* (ibid. 1831, 2 vols. 8vo);—*Authentic Account of our Authorized Translation of the Bible and of the Translators, etc.* (2d ed. Malton, 1834, 12mo; Lond. 1835, 8vo). See *English Cyclop. Biog.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Todd, Hugh**, a learned English divine, was born at Blencow, Cumberland, in 1658. He became a charity scholar of Queen's College, Oxford, in 1672; fellow of University College, Dec. 23, 1678; A.M. and chaplain to bishop of Carlisle, July 2, 1679. In 1685 he was appointed one of the four canon residentiaries of Carlisle, and the same year obtained the vicarage of Stanwix, which he resigned in 1688. He resigned his

residentialship in 1720, and died in 1728, being vicar of Penrith and rector of Arthuret. He published, *Description of Sweden* (1680, fol.);—*Life of Phorion* (1684);—*Sermon* (1707, 4to);—*Sermon*, etc. (1711, 4to).

**Todd, James Henthorne, D.D.**, an Irish clergyman, was born in Dublin, April 23, 1805; graduated at Trinity College, and became a fellow there in 1831. He was also regius professor in, and librarian of, the University of Dublin; treasurer and precentor of St. Patrick's Cathedral, and president for five years (the usual term) of the Royal Irish Academy. He was one of the founders of the Irish Archaeological Society. His death took place June 28, 1869. He published, *Historical Tablets and Medallions*, etc. (1828, r. 4to);—*Discourses on the Prophecies relating to Antichrist in the Writings of Daniel and St. Paul*; *Donellen Lecture* (Dubl. 1840, 8vo; 1842, 8vo);—*Six Discourses on the Prophecies relating to Antichrist in the Apocalypse of St. John*; *Donellen Lecture* (ibid. 1846, 8vo);—*Remarks on the Roman Dogma of Infallibility* (ibid. 1848, 8vo);—*Historical Memoirs of the Successors of St. Patrick and Archbishops of Armagh* (ibid. 1861, 2 vols. 8vo);—*The Waldensian MSS. preserved in the Library of Trinity College, Dublin*, etc. (Lond. and Camb. 1865, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Todd, John** (1), a Presbyterian minister, was a graduate of Nassau Hall in 1749, and was taken on trial by the New Brunswick Presbytery, May 7, 1750. He was licensed Nov. 13, and went to Virginia. A call was laid before the Presbytery May 22, 1751, and he was ordained on its acceptance. He was installed, by Hanover Presbytery, pastor of Providence Church in Louisa County, Va. Davies delighted in him, and speaks of him as his favorite friend, relying on his judgment in cases of importance. Todd wrote to Whitefield in 1755, giving an account of the wonderful work of God in his congregation. Col. Gordon said, after hearing him, that he "never heard a sermon, but one from Mr. Davies, with more attention and delight." He obtained from the Rev. Dr. Gordon, of Stepney, near London, scientific apparatus and valuable books, which he gave to aid Transylvania University in founding a school. He was a man of great piety, and eminently useful in edifying the Church. He died July 27, 1793. (W. P. S.)

**Todd, John** (2), D.D., an eminent Congregational minister, was born at Rutland, Vt., Oct. 9, 1800; graduated at Yale College in 1822, spent four years at the Andover Theological Seminary, and was ordained and settled at Groton in 1827. He was settled over the Edwards Church, Northampton, Mass., in 1833; the First Congregational Church, Philadelphia, Pa., in 1836; and the First Congregational Church, Pittsfield, Mass., from 1842 to 1872. He died in Pittsfield, Aug. 24, 1873. He was one of the founders of the Mount Holyoke Female Seminary, and for several years president of the trustees of the Young Ladies' Institute of Pittsford. His degree of D.D. was conferred upon him by Williams College in 1845. The following are some of his numerous publications: *Lectures to Children* (Northampton, 1834, 16mo), with translations and extended circulation;—*Student's Manual* (ibid. 1835, 12mo);—*Index Rerum* (ibid. 1834, 4to);—*Sabbath-school Teacher* (ibid. 1836, 12mo);—*Truth Made Simple* (ibid. 1839, 18mo);—*The Young Man* (ibid. 1843, 18mo);—*Simple Sketches* (Pittsfield, 1848, 2 vols. 16mo);—*Stories on the Shorter Catechism* (Northampton, 1850–51, 2 vols. 18mo);—*The Daughter at School* (ibid. 1854, 12mo);—*Questions on the Lives of the Patriarchs* (ibid. 1855, 18mo);—*Questions on the Life of Moses; Questions on the Books of Joshua and Judges* (ibid. 1853);—*The Bible Companion* (Phila. 18mo);—*Future Punishment* (N. Y. 1863, 32mo);—*Hints and Thoughts for Christians* (ibid. 1867, 12mo);—*Woman's Rights* (ibid. 1867, 18mo, 27 p.);—*Hints and Thoughts for Christians* (Lond. 1869, 12mo);—*Old-fashioned Lives* (1870). See Allibone, *Dict. of Brit. and Amer.*

*Authors, s. v.; John Todd, the Story of his Life, etc.* (N. Y. 1876, 16mo).

**Todd, Jonathan**, a Congregational minister, was born in New Haven, Conn., March 20, 1713, and graduated at Yale College in 1732. After studying theology a few months, he commenced preaching, and was settled at East Guilford, Conn., Oct. 24, 1738. During 1750 and 1751, a pestilence prevailed among his people, taking off many of his substantial friends and supporters. He continued his labors until the last year of his life, which ended Feb. 24, 1791. Mr. Todd published a *Sermon, Young People Warned* (1740):—*Election Sermon* (1749):—several memorial sermons and pamphlets. See *Sprague, Annals of the Amer. Pulpit*, i, 383.

**Todd, Nathaniel**, a Presbyterian minister, was born at Rowley, Essex Co., Mass., Jan. 27, 1780; graduated at Brown University in September, 1800; studied theology privately; was licensed by Philadelphia Presbytery, Oct. 19, 1803; ordained pastor of the Presbyterian Church in Schenectady, N. Y., in 1805, where he labored with great success for several years. He was afterwards teacher and pastor at Woodbury, N. J.; thence successively principal of an academy at Westchester, Harrisburg, Lebanon, Mifflinburg, and Beaver, Pa., and for many years of a classical school in Allegheny City, Pa. He spent the greater part of his life in teaching, and died July 8, 1867. See *Wilson, Presb. Hist. Almanac*, 1868, p. 152.

**Todros, BEN-JOSEPH, HA-LEVI ABULAFIA**, a celebrated Cabalist, was born in 1234 at Toledo, and died about 1305. He occupied a high position as physician and financier in the court of Sancho IV, king of Castile, and was a great favorite of queen Maria de Molina. When this royal pair met Philip IV, the Fair, king of France, in Bayonne (1290), he formed one of the cortege; and his advocacy of his theosophy secured for the doctrines of the Cabala a kindly reception from the French Jews. His writings on the Cabala are, *An Exposition of the Talmudic Hagadot*, entitled *אוצר החכמה*:—*A Commentary on Psalm cxix*:—*A Commentary on the Pentateuch*, in which he propounds the tenets of the Cabala. These works, however, have not yet been published. See Grätz, *Gesch. d. Juden*, vii, 204 sq.; Steinschneider, *Catal. Libr. Hebr. in Bibl. Bodl.* 2677-2680; De' Rossi, *Dizionario Storico*, p. 315 (Germ. transl.); Ginsburg, *The Kabbalah*, p. 111; Fürst, *Bibl. Jud.* iii, 428. (B. P.)

**Togarmah** (Heb. *Togarmah'*, תוגרמא [briefly תוגרמא, Gen. x, 13], of uncertain derivation; Sept. *Θοργαμά* v. r. *Θήργαμα*, etc.; Vulg. *Thogarma*), third named of the three sons of Gomer (the son of Japheth), his brothers being Ashkenaz and Riphath (Gen. x, 13; 1 Chron. i, 6). B.C. post 2513. The descendants of Togarmah are mentioned among the merchants who trafficked with Tyre, the house of Togarmah being said to trade "in its fairs with horses, and horsemen, and mules" (Ezek. xxvii, 14). They are named with Persia, Ethiopia, and Libya as followers of Gog, of the land of Magog, the chief prince of Meshech and Tubal, or, as it may be rendered (making the Hebrew *Rosh*, for chief, a proper name, as it is in the Sept. *Pw̄g*, and as the Jews say it ought to be rendered), the prince of Rosh or Russ, Meshech or Moshk, and Tubal or Tobolsk (xxxviii, 5, 6), supposed by some to mean the prince or power of Russia, the title of the emperor of Russia being prince or emperor of Russia, Moscow, and Tobolsk. Togarmah is said to be of the north quarters, and Gog is represented as a guard to it, possibly professing to guard it, or offering to it a protectorate (ver. 7). The Jews say that by Togarmah, or the house of Togarmah, we are to understand the *Turks*. Torgama, therefore, as it is given in the Sept. (and in some Heb. MSS. תורגומה), has been thought by many to mean *Turkoman*, or the Turkoman hordes from whom the Turks have sprung.

Togarmah, however, as a geographical term, is connected with Armenia, and the subsequent notices of the name (xxvii, 14; xxxviii, 6) accord with this view. Armenia was, according to Strabo (xi, 13, 9, 529), distinguished by the production of good horses (comp. Xenoph. *Anab.* iv, 5, 24; Herod. vii, 40). The countries of אררט and מנר (Μαννάς), and also הודו, were contiguous to Togarmah (Josephus, *Ant.* i, 1, 6). The name itself may possibly have reference to Armenia, for, according to Grimm (*Gesch. d. deutsch. Spr.* ii, 825), Togarmah comes from the Sanscrit *toka*, "tribe," and *Arma*=Armenia, which he further connects with Herminio the son of Mannus. The most decisive statement respecting the ethnographic relation of the Armenians in ancient literature is furnished by Herodotus, who says that they were Phrygian colonists, that they were armed in the Phrygian fashion, and were associated with the Phrygians under the same commander (Herod. vii, 78). The remark of Eudoxus (Steph. Byz. s. v. *Ἀρμενία*) that the Armenians resemble the Phrygians in many respects in language (*τῇ φωνῇ πολλὰ φρυγίζουσι*) tends in the same direction. It is hardly necessary to understand the statement of Herodotus as implying more than a common origin of the two peoples; for, looking at the general westward progress of the Japhetic races, and on the central position which Armenia held in regard to their movements, we should rather infer that Phrygia was colonized from Armenia than *vice versa*. The Phrygians were indeed reputed to have had their first settlements in Europe, and thence to have crossed into Asia (Herod. vii, 73); but this must be regarded as simply a retrograde movement of a section of the great Phrygian race in the direction of their original home. The period of this movement is fixed subsequently to the Trojan war (Strabo, xiv, 680), whereas the Phrygians appear as an important race in Asia Minor at a far earlier period (id. vii, 321; Herod. vii, 8, 11). There can be little doubt that they were once the dominant race in the peninsula, and that they spread westward from the confines of Armenia to the shores of the *Ægean*. The Phrygian language is undoubtedly to be classed with the Indo-European family. The resemblance between words in the Phrygian and Greek tongues was noticed by the Greeks themselves (Plato, *Cratyl.* p. 410), and the inscriptions still existing in the former are decidedly Indo-European (Rawlinson, *Herod.* i, 666). The Armenian language presents many peculiarities which distinguish it from other branches of the Indo-European family; but these may be accounted for partly by the physical character of the country, and partly by the large amount of foreign admixture that it has experienced. In spite of this, however, no hesitation is felt by philologists in placing Armenian among the Indo-European languages (Pott, *Etym. Forsch.* introd. p. 32; Diefenbach, *Orig. Europ.* p. 48). With regard to the ancient inscriptions at Wan, some doubt exists; some of them, but apparently not the most ancient, are thought to bear a Turanian character (Layard, *Nin. and Bab.* p. 402; Rawlinson, *Herod.* i, 652); but even were this fully established, it fails to prove the Turanian character of the population, inasmuch as they may have been set up by foreign conquerors. The Armenians themselves have associated the name of Togarmah with their early history in that they represent the founder of their race, Haik, as a son of Thorgom (Moses Choren. i, 4, 9-11. See Moses Chorenensis, *Historia Armen.* lib. iii, *Armen. edidit, Lat. vert. notisque illustr.* W. et G. Whistonii [Lond. 1786]); Heeren, *Ideen*, i, 1, 805; Michailis, *Spicilegium Geographia*, i, 67-78; Klaproth, *Travels*, ii, 64. See ARMENIA.

**Toggenburg War**, the name given to an outbreak between Protestants and Catholics in Toggenburg (or Tockenburg), a district of the canton of St. Gall, Switzerland. The dispute between the Toggenburgers and the abbot of St. Gall, Leodegar Bùrgisser, appeared at

first to be purely political, and related mainly to the labor in road-building, which the abbot had enforced upon those under his jurisdiction. At first even Catholic localities, such as Schwyz, took part with the Toggenburgers against the abbot, without regard to ecclesiastical differences. But the confessional differences soon led to serious disturbances. In the lower country, especially in Hennau, the majority were Catholics. About Easter, in 1709, they closed the church against the evangelical party, and the result was a scuffle, in which many were wounded. Alarmed at this treatment, the Protestants sought shelter in the neighboring churches, but, encouraged by their neighbors of Oberglatt, they returned in a week to Hennau, and sought to enter the church. The Catholic priest refused them, but, seeing the Protestants assembled in large numbers in the churchyard, counselled submission. But the Protestant minister was at this moment felled to the earth by a stone, and a severe struggle ensued. The priest was roughly handled, but was rescued by a member of the council, and one of his followers killed. The Reformed preacher, a native of Basle, was recalled, and a citizen of Zurich substituted, who was obliged to disguise himself for fear of the Catholics. The Catholic priest, after an absence of six weeks, was restored to his parish, under the protection of the abbot. The different cantons now took sides with the contending parties, and party feeling ran very high. Attempts were made, however, at mediation. An assembly was held at Baden, May 29, 1709, arbitrators were appointed, and proceedings begun; but all in vain. In the spring of 1712 the war broke out. It began in Toggenburg. The city of Wyl, to which the forces of the abbot had retired, was captured; the commander, Felber, was most shockingly mangled by his own people, and his corpse was thrown into the Sitter. Nabholz, at the head of the victors, marched to St. Gall, and seized the Thurgau and the Rhine valley. Meantime, the theatre of the war extended to the shores of the Reuss and the Aar. A murderous conflict, "the battle of the bushes," gave the Bernese a bloody victory. The city of Baden surrendered to Zurich, and was allowed to retain its Catholic worship, but did not dare to interfere with the erection of a Reformed Church outside of the walls of the city. Through the interference of pope Clement IX, the fire of war, which seemed about to be extinguished, was again stirred; and while the government was hesitating, the Catholic cantons of Schwyz, Unterwalden, and Zug, to the number of 4000, stormed the village of Sins. Bloody battles were fought in the vicinity of Lake Zurich, and at Bellenschantze. In Lucerne, the government was compelled by an uprising of the people to enter into the war. The Catholic parties to the war, about 12,000 strong, assembled at Mury. The Bernese were encamped at Vilmergen, and the great battle was fought on St. James's Day, July 25, and was not decided until six P.M., when the victory of the Reformers was complete. The peace, which was concluded in August at Aarau, provided religious liberty for Toggenburg. See Hagenbach, *Hist. of the Church in the 18th and 19th Cent.* i, 34 sq.

**To'hu** (Heb. *To'chu*, תוֹחִי, *lowly*; Sept. *Θοού* v. r. *Θοκ*; Vulg. *Thohu*), son of Zuph and father of Elihu among the ancestors of Samuel (1 Sam. i, 1); probably the same elsewhere called **TOAH** (1 Chron. vi, 34) or **NAHATH** (q. v.) (ver. 26).

**To'i** (Heb. *To'i*, תוֹי, in Sam., but in Chron. *To'ui*, Heb. *Tou'*, תוּי, both meaning *erring*; Sept. *Θοού* or *Θοού* v. r. *Θαει* and *Θωά*; Josephus, *Θαίνο*; Vulg. *Thou'i*), the king of Hamath on the Orontes, who, after the defeat of his powerful enemy the Syrian king Hadadezer by the army of David, sent his son Joram, or Hadoram, to congratulate the victor and do him homage with presents of gold and silver and brass (2 Sam. viii, 9, 10; 1 Chron. xviii, 9, 10). B.C. 1036. "For Hadadezer had wars with Toi," and Ewald (*Gesch.* iii, 199)

conjectures that he may have even reduced him to a state of vassalage. There was probably some policy in the conduct of Toi, and his object may have been, as Josephus says it was (*Ant.* vii, 5, 4), to buy off the conqueror with the "vessels of ancient workmanship" (*σκεύη τῆς ἀρχαίας κατασκευῆς*) which he presented.

**Tokens** (*tesseṛæ*), bits of lead or of pewter, or cards, given to the members of a Church in full communion, which they hand to the elders as they approach the Lord's table. The object is to keep out those who are not known, or who are under scandal, or for other reasons are deemed unworthy. See **TESSERÆ**.

**To'la** (Heb. *Tola'*, תּוֹלָא, a *worm*, as in Exod. xvi, 20; Sept. *Θωλά* v. r. *Θωλέ*, etc.; Vulg. *Thola*), the name of two Hebrews.

1. The first-born of Issachar (Gen. xlii, 13; 1 Chron. vi, 1). B.C. 1856. He had six sons (vii, 2), who became progenitors of families known collectively as the Tolaites (Numb. xxvi, 23), and these in David's time mustered 22,600 valiant soldiers (1 Chron. vii, 2).

2. Judge of Israel after Abimelech (Judg. x, 1, 2). He is described in that passage as "the son of Puah, the son of Dodo, a man of Issachar." In the Sept. and Vulg. he is made the son of Abimelech's uncle, Dodo (דודו) being considered an appellative. But Gideon, Abimelech's father, was a Manassite. Tola judged Israel for twenty-three years (B.C. 1819-1296) at Shamir in Mount Ephraim, where he died and was buried. Josephus does not mention him (*Ant.* vi, 7, 6); but (as Whiston remarks) inasmuch as the total of the years there agree, his name seems to have fallen out of our copies. See **JUDGE**.

**To'lad** (Heb. *Tolad'*, תּוֹלַד, *birth*; Sept. *Θωλάδ* v. r. *Θουλαίμ*), one of the towns in the tribe of Simeon in David's time (1 Chron. iv, 29); probably the same elsewhere (Josh. xv, 30) called **EL-TOLAD** (q. v.).

**To'laite** (Heb. *Tolai'*, תּוֹלָי, patronymic; Sept. *Θολαί*; Vulg. *Tholaites*), the general name of the descendants of Tola (q. v.) the son of Issachar (Numb. xxvi, 23).

**Toland, JOHN**, one of the founders of modern deism, was born Nov. 30, 1669 or 1670, in the most northern isthmus of Ireland. His Christian-name was *Janus Junius*, but at school his master ordered him to be called John, which name he retained ever after. From the school at Redcastle, near Londonderry, he went, in 1687, to the College of Glasgow, and after three years' stay there visited the University of Edinburgh, where he was made A.M. in June, 1690. He afterwards went to the University of Leyden, where he was generously supported by some eminent Dissenters in England. After a residence there of two years, he returned to England, and went to Oxford, which place he left in 1695, and went to London, whence he returned to Ireland in 1697. But so strong was the feeling aroused by his deistic notions and his own imprudent conduct that he soon returned to London. He accompanied the earl of Macclesfield to Hanover in 1701, and also made an excursion to Berlin, at which latter place he remained for some time, and then returned to England. In the spring of 1707 he again visited Germany, Holland, etc., reaching England in 1710. He died at Putney, near London, March 11, 1722. Of his many treatises we notice, *Christianity not Mysterious* (Lond. 1696, 8vo), which elicited at least fifty-four replies:—*An Apology for Mr. Toland* (ibid. 1697):—*Amyntor, or a Defence of Milton's Life*, etc. (1699, 8vo); this attack upon the canon of the New Test. was answered by Samuel Clark, Jeremiah Jones, Stephen Nye, and John Richardson:—*Socinianism Truly Stated* (1705):—*Dissertationes duæ: A deisidemon et Origines Judaica* (1709, 8vo):—*Nazarenus* (ibid. 1718, 8vo):—*History of the Druids* (Monro, 1814, 8vo), etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.; *Contemp. Rev.* June, 1868.

**Tolbanes** (Sept. *Τολβάνης*, Vulg. *Tolbanes*), a corrupt Græcized form (1 *Ésdr.* ix, 25) for the name **TELEM** (q. v.) of the Hebrew text (*Ezra* x, 24).

**Toledo, COUNCILS OF** (*Concilium Toletanum*). These councils, of which there were twenty-four, were held in the city of Toledo, in the province of the same name, in Spain. Toledo is the seat of an archbishopric; has a cathedral, founded in 1258, and completed in 1492; a founding hospital, founded by cardinal Mendoza in 1494; and a theological seminary.

I. The First Council of Toledo was held on Sept. 1, 400, under Patronus, the bishop. The reason for assembling this council, which consisted of nineteen bishops, was the troubles and disturbances caused by the heresy of the Priscillianists, which sprang up towards the close of the 4th century. Nineteen bishops, from all the Spanish provinces, attended. Many of the sect of the Priscillianists who presented themselves were received back into communion with the Church after having abjured their errors. In this council the bishop of Rome is, for the first time, spoken of simply by the title of "pope." Twenty canons were also published.

1. Permits to admit married men to the office of deacon, provided they will observe continence.

2. Forbids to admit to any higher order than that of subdeacon a man who has publicly done penance, and even restricts his administration of that office.

4. Enacts that a subdeacon, marrying a second time, shall be reduced to the rank of porter or reader, and shall not be permitted to read the Gospel or epistle; should he marry a third time, he shall be separated from the Church for two years, and then be admitted to lay communion only.

5. Deprives all priests and clerks who, having been appointed to any church in town or country, do not assist daily at mass.

7. Permits clerks whose wives do not lead a decorous life to bind them or shut them up, and to make them fast; forbids them to eat with them until they have done penance.

12. Forbids a clerk to leave his own bishop in order to attach himself to another.

13. Warns those who attend the other offices of the Church, but who do not communicate, that they must either receive the holy communion, or take place among the penitents, upon pain of excommunication.

14. Orders that any one who shall have received the holy eucharist without eating it shall be driven from the Church as guilty of sacrilege.

17. Excommunicates a married man keeping a concubine; but permits unmarried men to do so. Allows either a wife or a concubine.

20. Restricts the consecration of the chrism to the bishops; orders all priests to send a deacon or subdeacon to the bishop at Easter, in order to receive it from him.

See Mansi, *Concil.* ii, 1222.

II. The Second Council of Toledo was held about 447, during the popehood of Leo I. against the Priscillianists. Nineteen bishops attended, who condemned the heresy and the followers of Priscillian in a formulary of faith directed against all heretics, to which eighteen anathemas are attached. See Mansi, *Concil.* iii, 1465; Baronius, ann. 447, § 17, etc.

III. The Third Council of Toledo was held May 17, 531; Montanus, bishop of Toledo, presiding over seven other bishops. Five canons were published.

1. Relates to the treatment of children offered by their parents to be brought up for holy orders. Others relate to the continence of the clergy, the preservation of church property, etc.

In this council Toledo is, for the first time, spoken of as a metropolitan see. See Mansi, *Concil.* iv, 1734.

IV. The Fourth Council of Toledo was held May 8, 589; Leander, the primate of Seville, presiding over seventy-two bishops, from the different provinces under the rule of king Reccaredus, who attended in person. Eight deputies were also present. The main object of the council was to confirm the conversion of the Goths who had abjured Arianism, and who here presented a confession of faith, in which they declared their assent to the first four œcumenical councils, and anathematized the principal errors of the Arian party. Twenty-three canons were published, and as many anathemas directed, as against other heresies and evils,

so against those who deny the procession of the Holy Ghost from the Father and the Son, and those who refuse to anathematize the Council of Ariminum.

2. Directs that, according to the king's writ, the Constantinopolitan creed shall be sung by the people in every church in the kingdom before the Lord's Prayer in the eucharistical office.

5. Relates to the rule of continence to be observed by heretical bishops, priests, and deacons, when reconciled to the Church, as well as by all clerks.

7. Orders that some portion of Holy Scripture shall be read daily at the tables of priests, to prevent idle conversation.

11 and 12. Relate to penitence. Forbid to reconcile without penance; forbid the priest to admit to penance without first cutting off the hair of the penitent, if a man, or changing her dress, if a woman.

14. Forbids Jews to have Christian women for wives or concubines.

19. Leaves it to the bishop to fix the endowment to be given to a newly founded church.

22. Forbids to say anything but psalms at the funerals of the religious.

See Mansi, v, 997.

V. The Fifth Council of Toledo was held May 17, 597; sixteen bishops attended; two canons only remain, and the subscription of thirteen bishops only appear.

1. Orders that priests and deacons who will not observe the law of continence shall be degraded, shut up in a cloister, and put to penance.

2. Forbids the bishop to appropriate to himself the revenues of any church or chapel in his diocese, and declares that they belong to the ministering priest.

See Mansi, v, 1608.

VI. The Sixth Council of Toledo was held in 610; Aurasius, bishop of Toledo, presiding over fifteen bishops. The primacy of the see of Toledo over all the churches of Carthage was established, and subsequently confirmed by an edict of king Gundemar. See Mansi, v, 1620.

VII. A national council was held in this city on Dec. 9, 633, assembled from the whole of Spain, and that part of Gaul which was in subjection to the Goths; Isidore of Seville presided, sixty-six archbishops and bishops being present: among them were the metropolitans of Narbonne, Merida, Braga, Toledo, and Tarragona. Seventy-five canons were published.

1. Contains a profession of faith upon the subject of the Blessed Trinity and the incarnation.

2. Directs that the same order of prayer and of psalmody shall be observed throughout the kingdom, and the same manner of celebrating mass.

3. Orders that a national council shall be held annually, if possible; otherwise a council in each province.

4. Relates to the proper mode of holding synods, and is of some length. It orders that on the first day of the synod the church shall be cleared before sunrise and all the doors shut except one; that the bishops shall enter first and take their seats in a circle, according to the date of their consecration; then the priests; after them the deacons, who are ordered to stand in sight of the bishops; and, last of all, the laity and notaries. This done, the door is directed to be shut, and silence and devotion enjoined upon all. Then the archdeacon, standing up, shall bid them pray; upon which all shall prostrate themselves upon the floor, and, after private prayer mingled with sob and tears, one of the bishops shall rise up and say a prayer, to which all shall respond Amen. All having risen up and taken their places, a deacon in an alb shall read the canons relating to the holding of councils, and the metropolitan shall invite the bishops to proceed to business. It is forbidden to proceed to another matter until the first has been disposed of. Any clerk or layman desiring to appeal to the council is enjoined to mention his cause to the metropolitan archdeacon, who shall declare it to the council. No bishop is allowed to leave the synod before the others, nor shall the council be dissolved until everything is settled.

5. Directs that metropolitans shall consult together before Epiphany concerning the proper time for celebrating Easter, and shall signify their determination to their suffragans.

6. Approves of leaving the question about single and true immersion open; but orders single immersion to be practiced throughout Spain, to prevent schism.

7. Orders that the Passion be preached on Good-Friday, and that the people, in an audible voice, ask forgiveness of their sins, in order that, being thereby purified from sin, they may worthily celebrate the great festival of Easter, and partake of the holy eucharist with a pure heart.

8. Deprives of the Easter communion those who break their fast on Good-Friday before sunset, exception being made in favor of old and sick persons and children.

9. Relates to the benediction of the candles, etc., on Easter-eve.

10. Is directed against an abuse then prevalent in many churches in which the Lord's Prayer was said on Sundays only; orders all clerks to say it daily at the office, either openly or privately.

11. Forbids to sing the Hallelujah during Lent.

12. Orders that immediately after the epistle the gospel should be read, which should be followed by the Lauds, which in some churches were improperly sung after the epistle.

13. Condemns the opinion of those who deemed it wrong to sing hymns composed by men in honor of the apostles and martyrs on account of their not being taken out of Holy Scripture nor authorized by tradition.

14. Orders that the canticle *Benedicite Opera Omnia* be sung on Sundays and feast-days at mass at the entrance of the chancel (*in pulpito*).

15. Orders, under pain of excommunication, that at the end of each psalm shall be sung "Glory and honor be to the Father," etc., and not merely "Glory be," etc.

17. Excommunicates those who refuse to acknowledge the inspiration of the Apocalypse, and also those who refuse to read it in church from Easter to Pentecost.

18. Enumerates the cases in which persons may not be admitted to holy orders.

25. Is directed against ignorance in the clergy; requires them to be acquainted with Holy Scripture and the canons.

26. Orders that a priest when appointed to any parish shall receive a copy of the ritual from the bishop, and that when the priests attend the litanies or synods they shall give account to the bishop of their manner of celebrating the holy office and administering holy baptism.

33. Forbids the bishop to take for his own share more than one third of the revenue of the churches within his diocese.

34. Enacts that thirty years' possession shall give to a bishop lawful right over a Church situated in the diocese of another bishop if in the same province.

39. Forbids the deacons to pretend to the privileges of the priesthood and to sit in the first places.

40. Forbids them to wear two stoles, which it declares to be unfit for even a bishop or priest; directs them to wear the stole over the left shoulder, and also that it be clean, and not worked with colors or with gold.

41. Orders all clerks, as well as the priests and deacons, to shave the entire crown of the head and to leave but a slight rim of hair in the form of a circle.

46. Orders that a clerk found plundering a tomb be deposed from every ecclesiastical rank and office, and subjected to three years' penance.

51. Forbids bishops to ill-treat monks, but grants to them the exercise of their canonical authority over them, such as exhorting them to observe a good and holy life, instituting abbots and other officers, correcting those who infringe the rules, etc.

52. Enacts that monks forsaking the monastic state in order to marry and settle in the world shall be brought back and put to penance.

57. Forbids to compel Jews to profess Christianity; with regard to the compulsory conversions under king Sisebutus, it allows that they should continue to be considered as Christians because they had received baptism, chrism, and the holy eucharist.

The following nine relate to the Jews, and to Christians who had apostatized to Judaism.

The 66th and following eight relate to the case of slaves.

76. Anathematizes all who conspire against regal authority.

See Mansi, v, 1700.

VIII. The Eighth Council of Toledo was held in 636, under king Chintila, Eugenius, bishop of Toledo, presiding; twenty-two bishops in all were present. Nine canons were published, of which

1. Orders public litanies every year for three days, beginning Dec. 14, except one of the three should prove to be Sunday, in which case the litany days were to be observed in the week following.

All the others relate to the prince and the strengthening of his powers, etc. See Mansi, v, 1735.

IX. This council was held Jan. 9, 638, under Silva, metropolitan of Narbonne, in the second year of the reign of king Chintila. Fifty-two Spanish and Gallic bishops were present, either in person or by deputy. Eighteen canons were published.

8. Enacts that for the future no king should ascend the throne without making a vow to defend the Catholic faith and to rid the country of infidels; pronounces anathema against those who should violate this oath.

7. Orders that persons who, after having been admit-

ted to penance, quit that state and resume the secular dress shall be arrested by the bishop, and compelled to perform their course of penance, whether they will or not, in some monastery.

Fleury observes that this is the first time that we find mention of this compulsory penance, which evinced entire ignorance of the sound practice of antiquity. See Mansi, v, 1740.

X. The Tenth Council was held about 646, under king Chintaswinthus, by twenty-eight bishops present and the deputies of eleven who were absent. Six canons were published.

2. Allows the bishop, or any other priest who may be present, to complete the celebration of the sacred mysteries when the celebrating priest is unable to proceed through sickness; excommunicates those who, without such cause, leave the celebration unfinished, or who celebrate after having partaken of the slightest particle of food.

See Mansi, v, 1863.

XI. This council was held in 653, under Oronsius of Merida; the king, Resesuinthus, being present, and fifty-two bishops, with the deputies of ten absent. The prince read his profession of faith, in which he acknowledged the first four oecumenical councils. Twelve canons were published.

1. Contains a definition of faith.

2. Condemns all oaths and vows to commit evil actions.

3. Condemns all persons guilty of simony.

7. Condemns those who forsake the episcopal or sacerdotal office upon pretext of having been admitted to such holy office unwillingly; orders those who so return into the world and marry to be shut up for life in a monastery.

8. Forbids to ordain ignorant clerks.

9. Excludes from the Easter communion and from the privilege of eating meat for twelve months those who break the Lent fast.

12. Confirms the canons of a former council concerning the Jews.

Besides the bishops and deputies present, we find among the signatures those of ten abbots, the archpriest of Toledo, and sixteen counts. After the subscriptions there is a synodal decree concerning the disposition of the king's property, and an edict of the king confirming it. See Mansi, vi, 394.

XII. The Twelfth Council of Toledo was held Nov. 2, 655, Eugenius, the archbishop, presiding; sixteen bishops attended, and seventeen canons were published, most of which tend to repress the abuses committed by bishops in the administration of Church property.

11. Forbids to confer orders upon the slaves of the Church except they have been first set free by the bishop.

18. Orders that newly baptized Jews shall show themselves in the assemblies of the Christians on all Jewish festivals.

See Mansi, vi, 451.

XIII. Held Dec. 1, 656, under Reccasuinthus; twenty bishops were present, among whom were Eugenius, the metropolitan of Toledo; Fugitivus, the metropolitan of Seville; and St. Fructuosus, the metropolitan of Braga; five bishops who were absent sent deputies. Seven canons were published.

1. Orders that the Feast of the Annunciation shall in future be kept on Dec. 18, because that, falling in Lent, it interfered with the fast, and often with the celebration of Good-Friday.

3. Forbids bishops to present churches to their relations and friends for the sake of the revenue to be derived.

6. Directs that children devoted by their parents to the tonsure shall be compelled to lead the life of the religious; does not allow parents so to devote their children after they have attained ten years of age without their own consent.

7. Forbids to sell Christians to Jews.

See Mansi, vi, 459.

XIV. Held Nov. 7, 675, under king Wamba; seven bishops (among whom was Quirinius of Toledo), the deputies of two others, and six abbots were present. In this council the division of the country into dioceses was made, and sixteen canons of discipline were published.

8. Orders all the bishops of the province to conform to the order and ritual in use in the metropolitan Church.

4. Forbids to suffer priests who are at variance to approach the altar or to receive their offerings.

6. Deprives ecclesiastics who take part in the judgment of capital cases.

8. Enacts penalties to be enforced against priests who demand a fee for christening or for the chrism; orders bishops to punish such offenders under pain of suspension.

13. Forbids persons possessed with a devil to serve at the altar or to approach it.

14. Orders that mass shall never be celebrated by one priest only, lest he should be taken ill and the mass left unfinished.

See Mansi, vi, 539.

XV. Held Jan. 9, 681, under king Ervigius. Julian of Toledo presided at the head of thirty-four bishops, among whom were the metropolitans of Seville, Braga, and Merida. Thirteen canons were published.

1. Approves of the resignation of king Wamba, who had assumed the religious habit.

4. Declares to be null and void the consecration of a bishop for a little town in the immediate vicinity of Toledo made by the bishop of Merida against his own will and against the canons at the command of Wamba; and generally forbids to consecrate a bishop to a place which has not hitherto had a bishop.

6. Enacts that, in order to prevent any further delay in filling up the vacant bishoprics, it shall be lawful for the bishop of Toledo to consecrate those persons whom the king shall choose, without prejudice, however, to the rights of the province.

10. Confirms, with the king's consent, the privilege of asylum to those who take refuge in a church, or anywhere within thirty paces of it.

11. Orders the abolition of every remnant of idolatry.

See Mansi, vi, 1221.

XVI. Held in November, 683, under king Ervigius, who was present; forty-eight bishops, four of whom were metropolitans, attended, Julian of Toledo presiding. Twelve canons were published, the Nicene Creed having been first read, which from this time was sung in all churches in Spain.

The fifth is the extraordinary canon which absolutely forbids the widows of kings to remarry, even with princes.

From the tenth it appears not to have been uncommon at this period for persons (even bishops), in time of dangerous illness, to submit to be put to public penance without confessing, or their conscience accusing them of, any particular sin, but for greater security.

See Mansi, vi, 1253.

XVII. This council was held at the request of pope Leo II, under king Ervigius, in 684, to receive and approve the Sixth Ecumenical Council held at Constantinople against the Monothelites; seventeen bishops, ten deputies, and six abbots attended. In the answer of the bishops to Leo they make no mention of the fifth ecumenical council, saying, in canon 7, that they decree that this council (the Seventh Ecumenical) shall rank after the Council of Chalcedon in honor, place, and order. See Mansi, vi, 1278.

XVIII. Held May 11, 688, under king Egica, Julian of Toledo presiding over sixty bishops, in order to explain certain expressions made use of in a confession of faith drawn up by the Spanish bishops some years before which had given offence to pope Benedict II. These expressions related to the two wills in our Lord Jesus Christ; and it was decreed to be not contrary to Christian truth to maintain that in God the will proceeds from the will—"voluntatem ex voluntate procedere." See Mansi, vi, 1294.

XIX. This council was held May 2, 693; composed of fifty-nine bishops, five abbots, and the deputies of three bishops absent; there were also present the king, Egica, and sixteen lords. In this council the decision of the previous council concerning the procession of the will from the will, and of the essence from the essence, in God was further explained. Twelve or thirteen canons were published.

6. Relates to the conduct of some priests, who, instead of using bread made for the purpose in the holy eucharist, contented themselves with offering on the holy table common bread cut into a round form. The canon orders that the bread used at the altar shall be made expressly for that purpose.

9. Excommunicated for life and deposed Sisbertus of Toledo, convicted of conspiring against the person of king Egica and his family.

See Mansi, vi, 1327.

XX. This council was held Nov. 9, 694. The subscriptions of the bishops present are lost. Eight canons were published.

1. Directs that, during the three days preceding the opening of any council, and during which a strict fast ought to be observed, nothing shall be discussed which does not refer to matters of faith, morals, and ecclesiastical discipline.

8. Orders that bishops, following the example of our Lord, shall observe the ceremony of washing the feet of the poor on Holy Thursday.

6. Condemns to excommunication and perpetual imprisonment priests who, from a vile and wicked superstition, shall say the office of the mass for the dead for the living, in order by so doing to cause their death.

See Mansi, vi, 1361.

XXI. This council was held Nov. 21, 1324, by John, archbishop of Toledo. Eight canons were published, in the preface to which it is ordered that they shall be observed together with those which the legate William de Gondi, bishop of Sabino, had made in the Council of Valladolid (1322). These canons, among other things, order bishops to attend the synods, and relate to the conduct and dress of clerks; forbid priests to demand anything for masses said by them, but allow them to receive voluntary offerings; forbid to say more than one mass in a day, except on Christmas-day. See Mansi, xi, 1712.

XXII. This was held in 1339 by Egidius, archbishop of Toledo, six bishops being present. Five canons were published.

2. Forbids to ordain any illiterate person.

3. Provides that in cathedral or collegiate churches some shall be compelled to study theology, the canon law, and the liberal arts.

5. Orders all rectors to keep a list of such of their parishioners as are of age, in order to effect the observation of the canon "omnis utriusque sexus."

See Mansi, xi, 1869.

XXIII. (Also called COUNCIL OF ARENDA.) Held Dec. 5, 1473, in the borough of Arenda, by Alphonso de Carille, archbishop of Toledo. This council was numerously attended, and twenty-nine canons were published.

1. Orders that provincial councils shall be held biennially and diocesan synods annually.

2. Orders curates to instruct their flocks in the principal articles of belief.

3. Forbids to promote to holy orders persons ignorant of Latin.

4. Forbids to receive a clerk from another diocese without letters from his bishop.

5 and 6. Relate to the dress of bishops and clerks; forbid them to wear garments made of red and green silk, short garments, and white shoes, etc.

7. Relates to the proper observance of Sundays and festivals.

8. Forbids ecclesiastics to wear mourning.

9. Orders the punishment of incontinent clerks.

10. Forbids to admit to parochial churches or prebends persons ignorant of Latin, unless, for good cause, the bishop shall think fit to dispense with it.

11. Inflicts a pecuniary fine upon ecclesiastics who play with dice.

12. Orders that all priests shall celebrate mass four times in the year at the least, and bishops three times.

13. Forbids all preaching without the bishop's license.

14. Enacts penalties to be enforced against clerks in the minor orders who do not wear the clerical habit and observe the tonsure.

15. Forbids ecclesiastics to furnish soldiers to any temporal lord except the king, or to accept of lands upon condition of so doing.

16. Forbids the celebration of marriages at uncanonical times.

17. Excommunicates those who are married clandestinely without five witnesses, and suspends for three months the priest who shall officiate.

18. Excommunicates those who buy or sell the property of a vacant benefice.

19. Forbids the custom of performing, at certain times, spectacles, etc., and singing songs, and uttering profane discourses in churches.

20. Directs that persons dying of wounds received in duels shall not be allowed Christian burial, even though they may have received the sacrament of penance before death.

21. Excommunicates those who hinder the clergy from receiving tithe and enjoying their privileges, etc.

23. Orders that sentences of excommunication pronounced in any one diocese shall be observed in all others.

24. Puts under an interdict the place from which any clerk has been forcibly expelled.

25. Forbids any sort of fee on account of ordination.

27. Grants to the bishop the power of absolving from synodal censures.

28. Provides for the publication of these canons in diocesan synods and in cathedral churches.

See Mansi, xiii, 1448.

XXIV. Held Sept. 8, 1565. Christopher de Sandoval, bishop of Cordova, was called upon to preside on account of his being the oldest bishop of the province. The bishops of Sigüenza, Segovia, Palencia, Cuenca, and Osma attended, with the abbot of Alcalá el Real. Three sessions were held; in the first the decree of Trent relating to the celebration of provincial synods was read; also a profession of faith which was signed by all present. In the second session thirty-one articles of reformation were published relating to bishops, curates, officials, proctors, residence, and divine service. In the third session, held March 25, twenty-eight articles were drawn up, and the decrees of Trent relating to residence were read. Bishops were directed not to admit to the tonsure those who had no benefices immediately in view. Rules were laid down to guide curates in preaching and instructing their people, etc. See Mansi, xv, 751.

**Toledo** (French *Tolet*), **Francisco de**, a Spanish cardinal, was born at Cordova, Nov. 10, 1532. His education was gained at the University of Salamanca, and, after receiving his degree, he taught philosophy in the same institution. In 1558 he joined the Jesuits, and was sent to Rome to teach theology. Pius V, admiring his eloquence, secured his services as preacher in ordinary, and Toledo held the position under four succeeding popes. At the same time he was councillor of the Inquisition, and was employed in many ecclesiastical embassies. Among others, he went to Germany to urge a league with Poland against the Turks. Clement VIII gave him the cardinal's hat in 1593. Toledo died at Rome, Sept. 14, 1596. His works are chiefly commentaries: *In Joannis Evangelium* (Rome, 1588);—*In XII Capita Evang. secunda Lucam* (Venice, 1601, fol.);—*In Epistolam Pauli ad Romanos* (Rome, 1602, 4to);—*Summa Casuum Conscientie* (ibid. 1602; Lyons, 1630, 4to). See Antonio, *Bibl. Hisp. Nova*; De Thou, *Hist. sui Temp.*—Hoefer, *Nouv. Biog. Générale*, s. v.

**Toledo, Roderigo de**, an eminent Spanish ecclesiastic, was born at Rada, in Navarre, about 1170. He was sent to Paris to complete his education, and on his return he attached himself to Sancho V, king of Navarre, by whom he was employed to negotiate a peace with Alfonso VIII of Castile. Procuring the favor of Alfonso, he was appointed by him bishop of Sigüenza, and was afterwards made archbishop of Toledo. He showed great zeal in the frequent wars with the Moors, often directing in person incursions upon the Mohammedan territory. Nor did he have any less zeal for learning; he persuaded Alfonso to found the University of Palencia. At the Fourth Lateran Council he not only harangued the fathers in elegant Latin, but gained over the secular nobles and ambassadors by conversing with each of them in his mother tongue. He died in France in 1247, after attending the Council of Lyons convoked by Innocent IV. He wrote several historical works, most of which are still unedited. His *Rerum in Hispania Gestarum Chronicon* (Granada, 1545) is an invaluable production. It was subsequently published in a collection entitled *Hispania Illustrata*, by Andreas Schott (Frankf. 1603-8, 4 vols. fol.). He also wrote, *Historia Arabum*, published in vol. ii of Andreas Schott's collection (1603); and subsequently (1625) by Erpennius, as an appendix to his *Historia Saracenicæ* of Georgius Elmacin. He wrote a history of the Ostrogoths, of the Huns, Vandals, Suevi, Alans, and Silingi, published by R. Bell, in the collection entitled *Rerum Hispanicarum Scriptores Aliquot* (Frankf. 1579, 3 vols. fol.);—also *Breviarium Ecclesiæ Catholicæ*, and others still unedited.

**Toledoth Jeshu** (תולדות ישו, i. e. *History of*

*Jesus*). Under this title a Jewish apocryphal work, or rather libel, is extant, purporting to give the history of Jesus. It first became known to Christians in the 13th century; but who was the author of the *Toledoth Jeshu* is not known. In reality, we have two such books, each called *Toledoth Jeshu*, not recensions of an earlier text, but independent collections of the stories circulating among the Jews relative to the life of Christ. The name of *Jesus*, which in Hebrew is *Joshua* or *Jehoshua*, is in both contracted into *Jeshu* by the dropping of an *אין*, יֵשׁוּ for יֵשׁוּעַ. Elias in Tishbi, s. v. "Jeshu," says, "Because the Jews will not acknowledge him to be the Saviour, they do not call him Jeshua, but reject the *Ain* and call him Jeshu." Rabbi Abraham Perizol, or Farrisol, in his book *Magen Abraham*, c. 59, says, "His name was Jeshua, but as rabbi Moses Maimonides has written it, and as we find it throughout the Talmud, it is written Jeshu. They have carefully left out the *Ain* because he was not able to save himself." By omitting the *Ain*, the Cabalists gave a signification to the name. In its curtailed form it is composed of the letters Jod, Shin, Vav, which are taken to stand for יְהוֹשֻׁעַ, i. e. "his name and remembrance shall be extinguished." This is the reason given in the *Toledoth Jeshu*.

The *Toledoth Jeshu* was known to Luther, who condensed it in his *Schem Humphorus* (see his *Werke* [Hemberg, 1566], v. 509-535), as the following passage (p. 515) will show: "The proud evil spirit carries on all sorts of mockery in this book. First he mocks God, the Creator of heaven and earth, and his Son Jesus Christ, as you may see for yourself, if you believe as a Christian that Christ is the Son of God. Next he mocks us, all Christendom, in that we believe in such a Son of God. Thirdly, he mocks his own fellow-Jews, telling them such disgraceful, foolish, senseless affairs, as of brazen dogs and cabbage-stalks and such like, enough to make all dogs bark themselves to death, if they could understand it, at such a pack of idiotic, blustering, raging, nonsensical fools. Is not that a masterpiece of mockery which can thus work all three at once? The fourth mockery is this, that whoever wrote it has made a fool of himself, as we, thank God, may see any day." Voltaire also knew the work; for in his *Lettres sur les Juifs* (*Œuvres*, i, 69, p. 36) he says, "Le *Toledos Jeshu* est le plus ancien écrit Juif qui nous ait été transmis contre notre religion. C'est une vie de Jésus-Christ, toute contraire à nos Saints Évangiles: elle paraît être du premier siècle, et même écrite avant les évangiles." He evidently seems to identify this work with the one mentioned by Justin Martyr in his colloquy with Tryphon, xvii, 108. Of the two widely differing recensions of this book of unknown authorship, the first edition was published by Wagenseil, in his *Tela Ignea Satanae*, etc. (Altdorf, 1681); the second by Huldreich, at Leyden, in 1705, under the title *Historia Jeshuæ Nazareni, a Judæis Blasphemia Corrupta*. Neither can boast of an antiquity greater than, at the outside, the 12th century. It is difficult to say, with certainty, which is the earlier of the two. Probably both came into use about the same time; the second certainly in Germany, for it speaks of Worms in the German empire. According to the first, Jesus was born in the year of the world 4671 = B.C. 910, in the reign of Alexander Jannæus (B.C. 106-79)! According to the second, he was born in the reign of Herod the Proselyte, i. e. B.C. 70-4. A comparison of both shows so many gross anachronisms as to prove that they were drawn up at a very late date, and by Jews singularly ignorant of the chronology of their history. As to the contents, its blasphemies are too gross and grotesque to need further notice. Being a late and detestable compilation, put together out of fragmentary Talmudic legends, all respectable Jews themselves have regarded it as utterly contemptible.

Besides the editions of Wagenseil and Huldreich, see Clemens, *Die geheimgehaltenen oder sogenannten apokry-*

*phischen Evangelien* (Stuttg. 1850), pt. v; Alm, *Die Urtheile heidnischer und jüdischer Schriftsteller der vier ersten christlichen Jahrhunderte über Jesus und die ersten Christen* (Leips. 1864), p. 137 sq.; Baring-Gould, *The Lost and Hostile Gospels* (Lond. 1874), p. 67 sq.; De' Rossi, *Dizionario Storico* (Germ. transl.), p. 316 sq. See JESUS CHRIST. (B. P.)

**Toleration** is the allowance given to that which is not approved. The Church, as the depository and dispenser of religious truth, cannot bring within the range of its theory the allowance of that which it holds to be an error. The Church of England holds (Art. vi) that it is not required of any man that anything should be believed as an article of the faith, or be thought requisite or necessary to salvation, which is not read in Holy Scripture or may not be proved thereby. But if any man profess what is clearly contrary to that which the Church has laid down as an article of the faith, then, in the Church's view, he professes what is contrary to the Scripture, and there can be no warrant for allowing that which is contrary to Scripture. The Church, however, while refusing any allowance to error, may refrain from denunciation and persecution of those who profess and maintain erroneous doctrines.—Hook, *Church Dict.* s. v. See PERSECUTION.

**TOLERATION, ACTS OF.** Previous to 1868 the statute law of Great Britain (see 35 Eliz. and 22 Car. II) forbade the public exercise of any other religion than that of the Church of England. The Toleration Act (1 Will. and Mary, c. 18) frees from the penalty of nonconformity those who take the oaths of allegiance and supremacy, and who subscribe the declaration against popery of 30 Car. II, ii, c. 1, reserving in force 35 Car. II, c. 2, and 13 Car. II, c. 1, the acts, that is, for preventing dangers which may happen from popish recusants, and for preserving the king's person and government by disabling papists from sitting in Parliament. It did not relieve Dissenters from such previous acts as required members of town corporations, and all persons holding office, under the crown, to receive the sacrament of the Lord's supper according to the usage of the Church of England, which were continued in force until 1828, when they were repealed by the 9 Geo. IV, c. 17. Preachers taking the oaths and subscribing the Articles of Religion, except xxxiv, xxxv, xxxvi, and the clause of xx regarding the power and authority of the Church, are freed from the penalties of the Acts of Nonconformity; and Baptist preachers are excused the part of Art. xxvii touching infant baptism. Quakers, upon making a declaration of fidelity, and subscribing a profession of Christian belief, are exempted from the oaths and enjoy the privileges of other Dissenters.

By the 19 Geo. III, c. 44, Protestant Dissenting ministers and schoolmasters are exempted from the subscription to the articles on making and subscribing a declaration that the Scriptures contain the revealed will of God, and are received as the rule of doctrine and practice. By the 53 Geo. III, c. 106, the provisions of the Act of Will. and Mary, also those of 9 and 10 Will. III respecting the denial of the Trinity, were repealed, the common law with respect to impugning the doctrine of the Trinity not being altered. By the 52 Geo. III, c. 155, the Five-mile and Conventicle acts, and an Act relating to Quakers (13 and 14 Car. II, c. 1), are repealed; all religious assemblies of fewer than twenty persons become lawful without registration; those of more than twenty persons are to be registered and certified; and a fine of twenty pounds is laid upon those who disturb any congregation assembled for worship. By 9 Geo. IV, c. 17, the Test and Corporation acts are repealed, and a declaration substituted in lieu of the sacramental test. See Blunt, *Hist. of Doct.* s. v.; Hook, *Church Dict.* s. v.

**Tolet (or Toletanus).** See TOLÉDO.

**Toll** (תָּוֶל, Ezra iv, 20, or [Chald.] תָּוֶלָה, iv, 13; vii, 24, *tribute* [so called from being measured or appor-

tioned], as Neh. v, 4) is strictly a tax for passing along a highway or other thoroughfare. See TAX; TRIBUTE. In the Roman period taxes were collected along the roads or along the navigable waters by the *postulatores*, or custom-house officers. There was also a class of publicans who had houses or booths built for them at the foot of bridges, at the mouth of rivers, and by the seashore, where they took toll of passengers that went to and fro. For this purpose they used tickets or seals, which, when a man had paid toll on one side of a river, were given him by the publican to show to him that sat on the other side that it might appear he had paid. On these were written two great letters, larger than those in common use. Modern Oriental usages illustrate the custom referred to in Matt. ix, 9. Arriving at Persepolis, Mr. Morier observes, "Here is a station of *rahbars*, or toll-gatherers, appointed to levy a toll upon *kafilahs*, or caravans of merchants, and who in general exercise their office with so much brutality and extortion as to be execrated by all travellers. The collections of the toll are farmed, consequently extortion ensues; and, as most of the *rahbars* receive no other emolument than what they can exact over and above the prescribed dues from the traveller, their insolence is accounted for, and a cause sufficiently powerful is given for their insolence, on the one hand, and the detestation in which they are held, on the other. *Eaf-gah* means the place of tribute; it may also be rendered the receipt of custom, and perhaps it was from a place like this that our Saviour called Matthew to follow him." See CUSTOM, RECEIPT OF. At Smyrna the *miriji* sits in the house allotted to him, as Matthew sat at the receipt of custom (or in the custom-house of Capernaum), and receives the money which is due from various persons and commodities entering the city. "The exactions and rude behavior of these men," says Mr. Hartley, "are just in character with the conduct of the publicans mentioned in the New Test. When men are guilty of such conduct as this, no wonder that they were detested in ancient times as were the publicans, and in modern times as are the *mirijis*." See PUBLICAN.

**Töllner, JOHANN GOTTLIEB**, a German theologian, was born Dec. 9, 1724, at Charlottenburg. He completed his studies at the Orphanage and the University of Halle under the guidance of Baumgarten, Knapp, Michaelis, Wolff, Weber, and Meier, and then became private tutor and military chaplain. In 1760 he was made professor of theology and philosophy at Frankfurt-on-the-Oder. He delivered four lectures each day, wrote numerous learned books—his practice being to write upon one while dictating to an amanuensis the contents of another, so that two were in process of simultaneous preparation—and entered into most intimate and direct relations with his numerous students. He was accustomed to conduct devotional meetings after the ending of the public services of the Sabbath, and to train the students in homiletical and catechetical duties. During much of his public life his health was infirm. Extreme terrors sometimes came over him when about to ascend the pulpit, and rendered it impossible for him to preach; and upon these followed asthma and a racking cough, to which he finally succumbed at the age of forty-nine years. He died Jan. 20, 1774, while uttering the word "Overcome."

Of Töllner's writings, the following may perhaps be regarded as of chief importance: *Gedanken von der wahren Lehrart in d. dogm. Theologie* (1759);—*Grundriss der dogm. Theologie* (1760);—*Grundriss der Moral-Theologie* (1773);—*Grundriss der Hermeneutik* (1773);—*Grundriss der Pastoral-Theologie* (1773);—*Der thätige Gehorsam Christi* (1773);—*Theologische Untersuchungen* (1773). He occupied entirely orthodox ground in theology, though the ethics of Christianity held the foremost place in his thoroughly practical mind, and though he made far-reaching concessions to rationalism. With reference to confessions of faith his position was independent, and with reference to the contradic-

tions of his time he stood midway between the extremes. The school of Spener and Francke had gradually come to assume a position of hostility, or at least indifference, towards science, and over against it stood the scholastic or philosophical school of the Wolfian type, which undertook to demonstrate everything mathematically. Töllner regarded both extremes as overstrained, and adopted the *scientific* method, which regarded all dogmatic truths as constituting a *science*, i. e. a learned and comprehensive knowledge, and which attempted a logical explanation of every tenet without the employment of any illustrations whatsoever.

Handbuch berühmter u. denkw. Professoren des 18ten Jahrhunderts* (Leips. 1818), XIV, ii; Wetzer u. Welte, *Kirchen-Lex.* s. v.; Herzog, *Real-Encyklop.* s. v.

**Tomasini**, JACOPO FILIPPO, an Italian prelate, was born at Padua, Nov. 17, 1597; instructed by Benedetti of Legnano; afterwards entered the congregation of the regular canons of St. George, in Alga; and received the degree of doctor at Padua in 1619. He went to Rome, where he was cordially received, especially by Urban VIII, who would have appointed him to a bishopric in the island of Candia. At his own request, this was exchanged for the see of Citta Nuova, in Istria, to which he was consecrated in 1642. There he remained until his death, in 1654. He wrote, *Illustrium Virorum Elogia Iconibus Exornata* (Padua, 1630, 4to; 2d vol. 1644):—*Titus Livius Patavinus* (ibid. 1630, 4to):—*Petrarcha Redivivus Integram Poete Celeberrimi Vitam Iconibus Aere Caelatis Exhibens* (ibid. 1635, 4to):—*Christine Fæminæ Cassandra Fidelis Venetæ Epistolæ et Orationes Posthumæ* (ibid. 1636, 12mo):—*De Donatistis ac Tubellis Votivis*, etc. (Utin. 1639, 4to):—*Laureæ Ceratæ Epistolæ, cum Notis*, etc. (Padua, 1640, 12mo):—*Bibliotheca Patavinæ Manuscripta*, etc. (ibid. 1639, 4to):—*Bibliotheca Venetæ Manuscripta*, etc. (Utin. 1650, 4to).

**Tomb** (קבר, a *tumulus*, Job xxi, 32; elsewhere "stack" or "shock" of corn; τάφος, μνημα, or μνημειον, usually "sepulchre"). The most conspicuous objects in Palestine to this day are its *tombs*, called, according to the person commemorated, or the purpose of commemoration, *keber*, or *mazar*, or *wely*. One does not find this to be the case throughout Europe, where tombs are not usually conspicuous; but in Egypt and Syria they meet the eye in all directions, and are, with a few exceptions, Mohammedan erections. In Egypt, the tombs of its ancient kings, and the more modern tombs of the Mamelukes, are very remarkable and interesting. In the Sinaitic desert there are some interesting graveyards, dotted with unhewn stones and adorned with the *retem*, or broom; and one of these places of sepulture is known as Turbet-es-Yahûd, the graves of the Jews. There is only one conspicuous monument in it, Kuber Nebi Harûn, the "tomb of the prophet Aaron," on Mount Hor. But soon after entering Palestine you find tombs in all directions. At Hebron you have the tomb of Abraham and the patriarchs in the well-known cave of Machpelah, marked or rather concealed by a Moslem mosque. On one of the eastern hills, seen from the heights above Hebron, you have the tomb of Lot; farther on, the tomb of Rachel; and then, as you approach Jerusalem, the tomb of David, outside the modern city, and the tomb of Samuel, on a height above Gibeon, some seven miles to the north-west, greets your eye. As you traverse the land you meet with these monuments in all positions—the tomb of Jonah near Sidon, and even the tomb of Abel a little farther north!

Besides these conspicuous objects, there are others less visible, but quite as remarkable. At Hebron there is the Jewish burying-ground covered with large slabs, and curious tombs cut in the rock, with loculi on all sides, which are probably patriarchal, or at least Jewish.

Around Jerusalem there are numerous tombs, many of them remarkable for their beauty, their size, their peculiar structure. See JERUSALEM. Almost all of these are Jewish, and give us a good idea of "how the manner of the Jews was to bury." Whoever could afford it chose the *rock*, not the *earth*, for the covering of his body, and preferred to have his body deposited on a clean rocky shelf, not let down into and covered over with the soil. Hence our ideas of burial are not the same as those of the Jews. According to us, there is always the letting down into the earth; according to them, there is the taking possession of some stony chamber for the last sleep. Hence the expression "*buried* with him by baptism into death" would not to a Hebrew suggest immersion, as it seems to do to us, and to the early Christian the symbol of baptismal burial would be associated with the Lord's own tomb.

The first mention of a *keber*, or burying-place, in Scripture is in Gen. xxiii, 4, where Abraham asks the sons of Heth for the "possession of a *keber*," receiving for answer, "In the choice of our *keburs* bury thy dead." After this there is frequent mention of these sepulchres, and some of them are specially singled out for notice. Yet Machpelah was the most memorable; and we know not if ever a tomb was more touchingly and poetically described than by Jacob on his death-bed in Egypt, when, looking back on the land from which he was an exile, the land of his fathers' sepulchres, he points as with his finger to the well-known patriarchal burying-place—"There they buried Abraham and Sarah his wife; there they buried Isaac and Rebekah his wife; and there I buried Leah" (Gen. xlix, 31). We have also Kibroth-hataavah, the graves of lust, in the wilderness (Numb. xi, 34); the tomb of Joash in Ophrah, where Gideon was buried (Judg. viii, 32); the tomb of Manoh between Zorah and Eshtaol, where Samson was buried (xvi, 31); the tomb of Zeruiah (or her husband) in Bethlehem, where Asahel was buried (2 Sam. ii, 32); the tomb of Abner in Hebron (iii, 32; iv, 12); the tomb in Giloh of Ahithophel's father, where his suicide son was buried; the paternal and maternal tomb in Gilead, in which Barzillai sought burial (xix, 37); the tomb of Kish in Zelah, where the bones of Saul and Jonathan were deposited (xxi, 14); the tomb of the old prophet in Bethel (1 Kings xiii, 30); the tomb of Elisha, probably near Jericho (2 Kings xiii, 21); the tombs of "the children of the people," in the valley of the Kedron (xxiii, 6); the tombs in "the Mount," near Bethel (ver. 16); the tomb or tombs of David (Neh. iii, 16); the tombs of the kings (2 Chron. xxi, 20). The New-Test. references to "tombs" are chiefly in connection with the Lord's burial. His tomb is called sometimes *τάφος* (Matt. xxvii, 61), sometimes *μνημα* (Luke xxiii, 53), and sometimes *μνημειον* (John xix, 41).

At this day the tombs of Syria are either like our own, underground, as at Hebron, Tiberias, and the valley of Jehoshaphat; or in artificial excavations in the rock, as in the ridge south of Jerusalem (Acel-dama), the tombs of the prophets on Olivet, the tombs of the kings and judges north and north-west of the city; or entirely above ground, as the tomb of Rachel, of Absalom, of Samuel, and of Joseph.

All (in Jewish ages) who could bear the cost seem to have chosen the rocky excavation for sepulture, as in the case of Joseph of Arimathea. This is evident from such a passage as Isa. xxii, 16, addressed to Shebna the treasurer, "What hast thou here, and whom hast thou here, that thou hast hewed thee out a *sepulchre* here, as he that heweth him out a sepulchre on high, that graveth an habitation for himself in a rock?" It is supposed by Lowth, Scott, Alexander, etc., that Shebna was a foreigner, and that the questions *what* and *whom* refer to this, implying that he had no right to such an honor. It was, perhaps, peculiarly a national privilege, so that, as no Gentile could inherit the land, none could obtain such a place for a tomb as he could

call his own. The question then would be, "What connection hast thou with Israel that thou assumest one of Israel's special privileges?" Possibly, however, he was only a person of low origin from a distant part of the country, and of ungodly principles, who vainly thought to establish for himself a name and a place in Jerusalem.

The large tombs, such as those of the kings and judges, have no inscriptions; but the flat stones in the valley of Jehoshaphat have their epitaphs, some of considerable length in Hebrew, with the title לְיָצָא at the top, that word meaning originally a cippus or pillar (2 Kings xxiii, 17; Ezek. xxxix, 15), and in Talmudical Hebrew denoting a sign or mark (Levi, *Lingua Sacra*, vol. v, s. v.; Carpov, *Notes on Goodwin*, p. 645). This last writer tells us that the use of such a mark was specially to warn off passers-by lest they should contract uncleanness by touching the grave. For this end, also, the tombs were whitewashed every year on the 15th of Adar (Lamy, *Apparatus Biblicus*, I, xiv). See *SEPUCHRE*.

**Tombs, JOHN**, a learned Baptist divine, was born at Bewdley, in Worcestershire, in 1603, and graduated at Magdalen Hall, Oxford. There he gained such a distinction for ability and learning that he was appointed, in 1624, catechetical lecturer, which position he held for about seven years. He then, we may presume, took orders and went to Worcester, and after that to Leominster, Hertfordshire, of which he had the living. Being obliged to leave it in 1641 by the king's soldiers, he went to Bristol, where the parliamentary general, Fiennes, gave him the living of All-Saints'. The next year he removed to London, when he made known his scruples respecting infant baptism; and not only made no converts among the clergy, but, being appointed preacher at Fenchurch, his congregation refused him both hearing and stipend. He accepted a call from Temple Church, where he remained four years, when he was dismissed for publishing a treatise on infant baptism. After this he went to Bewdley, and there formed a Baptist church, while he continued minister of the parish, and had also the parsonage of Ross given to him. This last he resigned on being made master of Ledbury Hospital; and, his parishioners at Bewdley having forsaken him, he was restored to his first living at Leominster, and these two he held till the Reformation. He died at Salisbury, May 22, 1676. He published many tracts against infant baptism, Romanists, and Socinians.

**Tombstone** is a mark of a grave, or a *monument*, to remind the passer-by that a person is buried beneath. In the earliest ages a heap of stones, or a single upright stone, such as the *menhir*, seems to have marked the resting-place of the dead. Among the early Britons the cromlech—that is, two or three stones standing upright, with one or more across them on the top—was a common form of tomb. But contemporary with them was the simplest of all structures, the mound of earth.

When the Romans came, they brought over with them, among other customs, their modes of burial. Considering the time of their occupation, the remains of their tombs belonging to this period are not so numerous as might be expected; but still there are several, and in most cases they consisted of a single stone with an inscription commonly addressed to one or more of the heathen gods. A few instances of stone coffins of this period have been found, as at York. To this kind of tomb, or rather stone coffin, the name of *sarcophagus* is usually applied.

The Saxon marks of interment were probably mounds of earth only; and it is only by the nature of the pottery or other implements and articles of dress found in the graves that the burial-places of the Saxons can be distinguished from those of the Britons. Of course among the later Saxons, when Christianity prevailed and they

Roman Coffin, York.

were buried in the church-yard, more lasting memorials were erected, though, with the exception, perhaps, of a few doubtful fragments, we have no examples to refer to.

The sepulchral monuments throughout the Middle Ages were of great importance from an architectural point of view; and, while we find them following the prevailing style, we frequently find also that on them was lavished the most elaborate work possible. The examples which remain to us are those which were placed within the church. No doubt there were many tombs of no mean design or work placed in the church-yard, but they have, for the most part, perished.

Of the former we have many of the 12th century (some, perhaps, of the 11th). The covers of these were at first simply coped, afterwards frequently ornamented with crosses of various kinds and other devices, and sometimes had inscriptions on them; subsequently they were sculptured with recumbent figures in high-relief, but still generally diminishing in width from the head to the feet to fit the coffins of which they formed the lids. Many of the figures of this period represent knights in armor with their legs crossed; these are supposed to have been either Templars, or such as had joined, or vowed to join, in a crusade to the Holy Land. The figures usually had canopies, which were often richly carved over the heads, supported on small shafts which ran along each side of the effigy, the whole worked in the same block of stone. This kind of tomb was sometimes placed beneath a low arch or recess

Tomb, Waterperry, Oxfordshire, cir. 1400.

formed within the substance of the church wall, usually about seven feet in length, and not more than three feet above the coffin, even in the centre. These arches were at first semicircular or segmental at the top, afterwards obtusely pointed; they often remain when the figure or brass, and perhaps the coffin itself, has long disappeared and been forgotten. On many tombs of the 13th century there are plain pediment-shaped canopies over the heads of the recumbent effigies, the earliest of which contain a pointed trefoil-arched recess. Towards the end of the century, these canopies became gradually enriched with crockets, finials, and other architectural details.

In the reign of Edward I the tombs of persons of rank began to be ornamented on the sides with armorial bearings and small sculptured statues within pedimental canopied recesses; and from these we may progressively trace the peculiar *minutiae* and enrichments of every style of ecclesiastical architecture up to the Reformation.

Altar, or table tombs, called by Leland "high tombs," with recumbent effigies, are common during the whole of the 14th century. These sometimes appear beneath splendid pyramidal canopies, as the tomb of Edward II in Gloucester Cathedral, Hugh le Despenser and

Flat Gravestone, Great Milton, Oxfordshire.

Sir Guy de Brian at Tewkesbury; or flat testoons, as the tombs of Edward III and Richard II at Westminster, and Edward the Black Prince at Canterbury. Towards the middle of the 13th century the custom commenced, and in the earlier part of the 14th prevailed, of inlaying flat stone with brasses; and sepulchral inscriptions, though they had not yet become general, are more frequently to be met with. The sides of these tombs are sometimes relieved with niches, surmounted by decorated pediments, each containing a small sculptured figure, sometimes with arched panels filled with tracery. Other tombs about the same period, but more frequently in the 15th century, were decorated along the sides with large square-panelled compartments, richly foliated or quatrefoiled, and containing shields.

Many of the tombs of the 15th and 16th centuries appear beneath arched recesses fixed in or projecting from the wall, and enclosing the tomb on three sides. These were constructed so as to form canopies, which are often of the most elaborate and costly workmanship: they are frequently flat at the top, particularly in the later period. These canopies were sometimes of carved wood of very elaborate workmanship; and sometimes the altar-tomb of an earlier date was at a later period enclosed within a screen of open-work, with a groined stone canopy, and an upper story of wood, forming a mortuary chapel or chantry, as the shrine of St. Frideswide at Christ Church, Oxford.

In the early part of the 16th century the monuments were generally of a similar character to those of the preceding age; but alabaster slabs with figures on them, cut in outline, were frequently used. The altar-tombs with figures in niches, carved in bold relief, were also frequently of alabaster, which was extensively quarried in Derbyshire. Towards the middle of this century the Italian style of architecture had come into general use; Wade's monument, in St. Michael's Church, Coventry, 1556, is a good example of the mixture of the two styles which then prevailed.

In the two following centuries every sort of barbarism was introduced on funeral monuments; but the ancient style lingered longer in some places than in others. The tomb of Sir Thomas Pope, founder of

Altar-tomb of Sir John Clerke, St. Mary's, Thame, Oxfordshire.

Bredon, Worcestershire.

Trinity College, Oxford—who died in 1558—in the chapel of that society, shows the altar-tomb in its debased form, after the 'true æra of Gothic architecture had passed away.

A few traces of square tombs remain in our churchyards, but they are in all cases much decayed by the weather. There is also a kind of stone known as a head-stone, which is chiefly used in modern times; but while there are few mediæval examples remaining, there is no reason to suppose but that they were very numerous. One at Temple Bruer is probably of the 12th century; another at Lincoln is probably of the 13th. A very simple example from Handborough church-yard is possibly of the 15th century.

Handborough, Oxfordshire.

**Tomline, GEORGE, D.D.**, an English prelate, the son of George and Susan Pretyman, was born at Bury St. Edmund's, Suffolk, Oct. 9, 1750. He was educated at Bury School and at Pembroke Hall, Cambridge, where he took his A.B. degree, and was senior wrangler in 1772. The following year he was elected a fellow of his college, and was immediately appointed tutor to Mr. Pitt. Between 1773 and 1775 he was ordained deacon and priest, and in the latter year proceeded A.M., becoming in 1781 moderator of the university. He became private secretary to Mr. Pitt when the latter was made chancellor of the exchequer, in 1782. In this year he was collated to the rectory of Corwen, in Merionethshire, and in 1784 he was appointed to a prebendal stall in Westminster. He was presented in 1785 to the rectory of Sudborne-cum-Offord, in Suffolk; and in January, 1787, was advanced to the bishopric of Lincoln and the deanery of St. Paul's, when he ceased to be private secretary to Mr. Pitt. In 1813 he refused the see of London, and continued bishop of Lincoln over thirty-two years, being translated to the see of Winchester in July, 1820, in which he continued till the time of his death, Nov. 14, 1827. His publications are, *Elements of Christian Theology* (1799, 2 vols. 8vo; republished in 19 editions):—*Exposition of the XXXIX Articles, with an Account of English Translations of the Bible and Liturgy* (Oxf. 1835, 12mo):—*Refutation of Calvinism* (Lond. 1811, 8vo; 4th

ed. in preparation the same year):—*Sermons, etc.* See *Engl. Cyclop.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Tomlinson, George, D.D.**, a prelate of the Church of England, was educated at St. John's College, Cambridge, from which he graduated in 1822. After having served for several years as minister of St. Matthew's Chapel, Spring Gardens, Westminster, he was nominated, in 1842, to the bishopric of Gibraltar, which extends over Malta and the neighboring islands. He died at Gibraltar in 1863. See *Amer. Quar. Chærch Rev.* April, 1863, p. 154.

**Tomlinson, Joseph Smith, D.D.**, a minister of the Methodist Episcopal Church, was born in Georgetown, Ky., March 15, 1802. He was educated at the Transylvania University, and was licensed to preach before his graduation in 1825. He was appointed professor of mathematics and natural philosophy of Augusta College the same year, and also admitted to the traveling connection. In due time he was ordained both deacon and elder. After having served some time as professor of Augusta College, he was chosen its president, and held the office until the institution ceased to exist in 1849. He was subsequently elected to a professorship in the Ohio Wesleyan University, Delaware, O., but did not accept it, though he acted as agent for the institution for two years. He then accepted a professorship in the Ohio University at Athens, and after a year's service was chosen its president. This he declined because of ill-health. Subsequently he was elected to the presidency of the Springfield High-school and of the State University of Indiana, both of which he declined under the conviction that the state of his body and mind disqualified him for them. He died at Neville, O., June 4, 1853. Dr. Tomlinson was a man of superior accomplishments; as a preacher and pulpit orator, his high reputation was well founded; and his religious life was pure and consistent. See Sprague, *Annals of the Amer. Pulpit*, vii, 706.

**Tommasi, GIUSEPPE MARIA**, a learned Italian cardinal, and son of Julius Tommasi, duke of Palma, was born at Alicata, Sicily, Sept. 14, 1649. He entered the society of the Theatines, and cardinal Albani, when he became pope, appointed him first qualificador of the Holy Office, then consultor of the Congregation of the Rites, and lastly cardinal (May 18, 1712). This last honor he did not long enjoy, as his death occurred Jan. 1, 1713. In the Vatican and other libraries Tommasi discovered many manuscripts of importance in ecclesiastical history, and published, *Codices Sacramentorum Nongentis Annis Vetusiores* (1680, 4to), a collection of MSS.:—*Responsoria et Antiphonaria* (1686). See Chalmers, *Biog. Dict.* s. v.; Hoefer, *Nouv. Biog. Générale*, s. v.

**Tongan Version.** The Tonga dialect, belonging to the Polynesian or Malayan languages, is spoken in Tonga, or Tongataboo, the largest of the Friendly Islands. In 1850 it was estimated to contain 9000 inhabitants, of whom considerably more than half had been converted to Christianity, the Protestants among them numbering 5000. As early as 1797 the London Missionary Society had sent nine missionaries to that island, but they had to give up that station on account of the ferocious disposition of the natives. The agents of the Wesleyan Missionary Society were at length enabled, in 1826, to settle peaceably in Tonga, and they now extend the blessings of Christian instruction to all the islands of this archipelago. At first only detached portions of Scriptures were translated into Tongan, until, in the year 1847, the version of the New Test. was completed, and an edition of 4000 copies left the mission press at Vavau. A new edition, consisting of 10,000 copies, was furnished in 1852 by the British and Foreign Bible Society; and, owing to the rapid circulation of this edition, another of 10,000 copies was undertaken in 1860, under the editorial care of the Rev. Thomas West. In the same year the preparation for translating, printing,

etc., of the Old Testament was commenced, which was completed in 1863. As to the results of the dissemination of the Word of God, we may notice that up to March 31, 1879, 28,180 copies, either in part or in whole, were circulated. (B. P.)

**Tongs** is the rendering, in the A. V., of two Heb. words: 1. מַלְכָּחָ'יִם, *melkacha'yim* (1 Kings vii, 49; 2 Chron. iv, 21; Isa. vi, 6), or מַלְכָּחָ'יִם, *mal'kacha'yim* (Exod. xxv, 38; xxvii, 23 ["snuffers"]; Numb. iv, 9), both from לָקַח, *to take*, and signifying prop. *pincers*, either for holding coals or for trimming a lamp [see **SNUFFERS**]; and 2. מַטְאֵד, *mat'ad* (Isa. xlii, 12), an *axe* (q. v.) (as rendered in Jer. x, 8), from נָצַץ, *to fell* a tree.

**Tongue** (לָשׁוֹן, *lashon*, γλῶσσα) is used in Scripture in various senses.

1. It stands, *literally*, for the human tongue (Judg. vii, 5; Job xxvii, 4; Psa. xxxv, 28; xxxix, 1, 8; li, 14; lxvi, 17; Prov. xv, 2; Zech. xiv, 12; Mark vii, 33, 35; Luke i, 64; xvi, 24; Rom. iii, 13; 1 Cor. xiv, 9; James i, 26; iii, 5, 6, 8; 1 Pet. iii, 10; Rev. xvi, 10; Eccles. xvii, 6; Wisd. x, 21; 2 Macc. vii, 4): and so for the tongue of the dog (Psa. lxxviii, 23), of the viper (Job xx, 16), of idols (Baruch vi, 8); the tongues of the seven brethren cut out (2 Macc. vii, 4, 10; comp. Prov. x, 20).

Various explanations have been offered why (in the passage first cited above) Gideon's three hundred followers should have been selected because they lapped water out of their hands, standing or perhaps moving onward, while they who stayed and "bowed down to drink" were rejected. Josephus says that the former thereby showed their timorousness and fear of being overtaken by the enemy, and that these poor-spirited men were chosen on purpose to illustrate the power of God in the victory (*Ant.* v, 6, 3).

On Mark vii, 33, 35, Dr. A. Clarke offers the interpretation that it was the deaf and stammering man himself who put his own fingers into his ears to intimate his deafness; spat or emptied his mouth that the Saviour might look at his tongue; touched his own tongue to intimate that he could not speak; looked up to heaven as imploring divine aid; and groaned to denote his distress under his affliction; and that our Saviour simply said, "Be opened" (*Commentary*). This explanation certainly clears the passage of some obscurities.

James iii, 8, Dr. Macknight translates, "But the tongue of men no one can subdue;" that is, the tongue of other men, for the apostle is exhorting the Christian to subdue his own (comp. ver. 13). He observes that Ecumenius read the passage interrogatively, as much as to say, "Wild beasts, birds, serpents, marine animals, have been tamed by man, and can no man tame the tongue?"

2. It is *personified*. "Unto me every tongue shall swear," that is, every man (Isa. xlv, 23; comp. Rom. xiv, 11; Phil. ii, 11; Isa. liv, 17). The tongue is said to rejoice (Acts ii, 26); to meditate (Psa. lii, 2); to hate (Prov. xxvi, 28); to be bridled (James i, 26); to be tamed (iii, 8; comp. Eccles. xxviii, 18, etc.). It is apostrophized (Psa. cxx, 3).

3. It is used by *metonymy* for speech generally. "Let us not love in tongue only" (1 John iii, 18; comp. γλῶσση φῶλος, Theogn. lxxiii, 13; Job vi, 30; xv, 5; Prov. vi, 24); "a soft tongue," i. e. soothing language (xxv, 15); "accuse not a servant to his master," literally "hurt not with thy tongue" (xxx, 10); "the law of kindness is in her tongue," i. e. speech (xxxi, 26; Isa. iii, 8; l, 4; Wisd. i, 6). On the "confusion of tongues," see **BABEL**; **ETHNOLOGY**; **LANGUAGE**, etc.

4. For a *particular language* or dialect spoken by any particular people. "Every one after his tongue" (Gen. x, 5, 20, 31); so also in Deut. xxviii, 49; Esth. i, 22; Dan. i, 4; John v, 2; Acts i, 19; ii, 4, 8, 11; xxvi, 14; 1 Cor. xii, 10; xiii, 1; xiv, 2; Rev. xvi, 16).

5. For the *people speaking a language* (Isa. lxvi, 18;

Dan. iii, 4, 7, etc.; Rev. v, 9; vii, 9; x, 11; xi, 9; xiv, 6; xvii, 15).

6. It is used *figuratively* for anything resembling a tongue in shape. Thus, "a wedge of gold," literally a "tongue" (Josh. vii, 21, 24; γλῶσσα μία χρυσῆ; Vulg. *regula aurea*). The French still say, *un lingot d'or*, "a little tongue of gold," whence, by corruption, our word "ingot." "The bay that looketh southward," literally "tongue" (xv, 2; xviii, 19); "a tongue of fire" (Isa. v, 24; comp. Acts ii, 8; Isa. xi, 15).

7. Some of the Hebrew *idioms, phrases*, etc., formed of this word are highly expressive. Thus, "an evil-speaker" (Psa. cxi, 11; לָשׁוֹן רָע, literally "a man of tongue;" comp. Eccles. viii, 8, and see Eccles. x, 11, Hebrew, or margin); "a froward" or rather "false tongue" (Prov. x, 31; לָשׁוֹן פְּתוּרָה, "a tongue of revolvings"); "a wholesome tongue" (Prov. xv, 4; מִרְפָּא לָשׁוֹן, literally "the healing of the tongue," reconciliation, etc.; Sept. *ταῖς γλώσσης, lingua placabilis*); "a backbiting tongue" (Prov. xxv, 23; סֵתֶר, secret); "slow of speech" (Exod. iv, 10; לָשׁוֹן כָּבֵד, literally "heavy of tongue," unfit to be an orator, *βραδύγλωσσος*; contrast Eccles. iv, 29); "the tongue of the stammerer" (Isa. xxxii, 4), i. e. rude, illiterate (comp. xxxv, 6; on Isa. xxviii, 11, see Lowth). In xxxiii, 19, it means a foreign language, which seems gibberish to those who do not understand it (comp. Ezek. iii, 5); "the tongue of the learned" (Isa. l, 4), i. e. of the instructor. The lexicons will point out many other instances.

8. Some *metaphorical* expressions are highly significant. Thus, Hos. vii, 16, "the rage of the tongue," i. e. verbal abuse; "strife of tongues" (Psa. xxxi, 20); "scourge of the tongue" (Job v, 21 [see **EXECRATION**]; comp. Eccles. xxvi, 6; xxviii, 17); "snare of the slanderous tongue" (li, 2); on the phrase "strange tongue" (Isa. xxviii, 11), see Lowth, notes on ver. 9-12, and afterwards the vivid rendering of the Vulg.; "to slip with the tongue" (Eccles. xx, 18; xxv, 8), i. e. use inadvertent or unguarded speech; "they bend their tongues, their bows, for lies" (Jer. ix, 8), i. e. tell determined and malicious falsehoods; "they sharpen their tongues" (Psa. civ, 3), i. e. prepare cutting speeches (comp. lvii, 4); "to smoothe the tongue" (Jer. xxiii, 31), employ flattering language; "to smite with the tongue" (Jer. xviii, 18), i. e. to traduce—if it should not be rendered, "on the tongue," alluding to a punishment for false witness; "to lie in wait with the tongue" (Eccles. v, 14); "to stick out the tongue" (Isa. lvii, 4), i. e. to mock; "against any of the children of Israel shall not a dog move his tongue" (Exod. xi, 7), i. e. none shall hurt them; but both Sept. and Vulg. have "not a dog belonging to the children of Israel shall howl," which, as opposed to the "great cry" in Egypt over the first-born, means, not one of the children of Israel shall have cause to wail (Josh. x, 21; Judith xi, 9). "To hide under the tongue" means to have in the mouth, whether spoken of hidden wickedness (Job xx, 12; comp. Psa. x, 7) or delicious language (Cant. iv, 11); "the word of God in the tongue" denotes inspiration (2 Sam. xxiii, 2); "to divide the tongues of the wicked" is to raise up dissensions among them (Psa. lv, 9; comp. 2 Sam. xv, 34; xvii, 14, 15). "The tongue cleaving to the palate" signifies profound attention (Job xxix, 10) or excessive thirst (Lam. iv, 4; comp. xxii, 16); "to cause the tongue to cleave to the palate" is to inflict supernatural dumbness (Ezek. iii, 26; Psa. cxxxvii, 6). To gnaw one's tongue is a sign of fury, despair, and torment (Rev. xvi, 10).

9. Some beautiful *comparisons* occur. "An evil tongue is a sharp sword" (Psa. lvii, 4); "the tongue of the wise is health" (Prov. xii, 18); "like choice silver" (x, 20), i. e. his words are solid, valuable, sincere.

10. The *vices* of the tongue are specified in great variety: flattery (Psa. v, 9; Prov. xxviii, 33); backbiting (Psa. xv, 3), literally "run about with the tongue" (Prov. xxv, 23); deceit (Psa. l, 19); unrestrained speech

(Lxxiii, 9); lying (cix, 2); "a lying tongue hateth those that are afflicted by it" (Prov. xxvi, 28; comp. Tacit. *Agr.* 42, "Proprium humani ingenii est, odiosae quem læseris"). "They have taught their tongue to speak lies, and weary themselves to commit iniquity" (Jer. ix, 5)—words which beautifully illustrate the fact that falsehood and vice are not natural, but are a restraint and compulsion upon nature: "double-tongued" (1 Tim. iii, 8), *διλόγος*, saying one thing to this man and another to that (comp. *Ecclus.* v, 9, 14; xxviii, 13). The retribution of evil-speakers is represented as brought on themselves (Psa. lxiv, 8).

11. The *virtuous* uses of the tongue are specified: "keeping the tongue" (Psa. xxxiv, 13; 1 Pet. iii, 10; Prov. xxi, 23); "ruling the tongue" (*Ecclus.* xix, 6; James i, 26); the origin of the right and wrong use of the tongue traced to the heart (Matt. xii, 34).

12. Mistranslations: as "holding the tongue," the Hebrews had no such idiom (Psa. xxxix, 2; *Ecclus.* xx, 1, 7; comp. the Bible and Prayer-book version of Hab. i, 13). In Ezra iv, 7, "the Syrian tongue," literally "in Syriac" (*Esth.* vii, 4). Our mistranslation of Prov. xvi, 1 has misled many: "The preparations of the heart in man, and the answer of the tongue, is from the Lord;" literally, "Of man are the dispositions of the heart, but a hearing of the tongue is of the Lord."

13. The miraculous *gift of tongues*, as well as its corresponding gift of interpretation, has been the subject of two opinions. It was promised by Christ to believers: they shall speak *γλώσσαις καιναις* (Mark xvi, 17); and fulfilled at Pentecost, when the apostles and their companions "began to speak *ἑτάρας γλώσσας*" (Acts ii, 4, 11; comp. Acts x, 46; xix, 6; 1 Cor. xii, 80; xiv, 2, 39). In the last passage we have "to pray in a tongue" (ver. 14), "to speak words in a tongue" (ver. 19), "tongues" (1 Cor. xii, 10, 28; xiii, 8; xiv, 22, 26). The obvious explanation of most of these passages is, to speak in *other living languages*, the supernatural acquisition of which demonstrated the truth of the Gospel, and was a means of diffusing it. Some verses in 1 Cor. xiv, however, have given rise to the notion of a *strange*, ecstatic, inspired, unearthly language; but these all admit of a different solution. In ver. 2, "he who speaketh in a tongue" evidently means, he who speaks some foreign living language; the supplied word "unknown" in the A. V. is needless, and misleads the English reader. It is further said that "he edifieth himself" (which, as Macknight justly pleads, required that he should understand himself), and edifieth the Church also if an interpreter were present (ver. 28). The apostle says (ver. 14), "If I pray in a tongue, my spirit prayeth, but my understanding is unfruitful," which words in English seem to intimate that the speaker might not understand himself; but the words *οὐ δὲ νοῶν μου* signify "my meaning" (comp. ii, 16; Vulg. "sensum Domini"), or, as Hammond and Schleusner say, "my faculty of thinking upon and explaining to others the meaning of what I utter" (comp. ver. 15, 19), though in ver. 15 some take *τῷ νοί* as a *dativus commodi*, and render "that others may understand." The key to the difficulties of this subject is the supposed absence of an inspired interpreter (ver. 28), in which case the gift would not be *profitable* to the hearers. The gift of tongues was to cease (1 Cor. xiii, 8). Irenæus testifies (v, 6) that it subsisted in the Church in his time. When Paul says, that though he should speak with the tongue of men and of angels, it would be nothing without charity, he uses a supposed hyperbole; as when we say, angelical beauty, angelical voice, etc., e. g. "I would have every one set a due value on the gift of tongues; but though a man possessed the most exquisite eloquence, this inestimable gift would be of little use to him, as to salvation, if he be without charity." See Macknight, *Notes on 1 Cor. xiv*; Olshausen, *Comment. on Acts ii*, 4; Neander, *Hist. of the Apostolic Age*, and in *Bibl. Repos.* iv, 249, etc.; Stöckh, *Archæol. Econ. N. T.* p. 93; Gataker, *ad M. Anton.* p. 120; and Ernesti, *Lex. Techn. Gr. Rhet.* p. 62. See SPIRITUAL GIFTS.

**Tongues, Confusion of.** The Biblical account of this is given in the usual anthropomorphic style of Scripture in Gen. xi, 1-9, and has been the occasion of much discussion and speculation. To inquire into the date of this part of Genesis would lead us into a long discussion: it may be sufficient to express an opinion that the indications of x, 12 perhaps (strangely ignored by most writers), and ver. 18 certainly, seem to point to an age much before that of Moses. See below. We propose under the present head to treat the subject under two aspects, the historical and the linguistic, referring the reader to other and kindred articles for further details on this disputed question.

I. *The Event.*—The part of the narrative relating to the present subject thus commences: "And the whole earth [or *land*, אֶרֶץ] was of one language [or *lip*, שָׁפָה] and of one speech [or *words*, דְּבָרִים]." The journey and the building of the tower are then related, and the divine determination to "confound their language that they may not understand one another's speech." The scattering of the builders and the discontinuance of the building of the city having been narrated, it is added, "Therefore is the name of it called Babel, because the Lord did there confound the language of all the earth, and [or *for*] from thence did the Lord scatter them abroad upon the face of all the earth" (Gen. xi, 1-9).

1. *Character of the Infliction.*—An orderly and peaceful distribution and migration of the families descended from Noah had been directed by divine authority and carried into general effect. But there was a part of mankind who would not conform themselves to this wise and benevolent arrangement. This rebellious party, having discovered a region to their taste, determined to remain in it. They built their houses in contiguity, and proceeded to the other method described for guarding against any further division of their company. This was an act of rebellion against the divine government. The omniscient and righteous God therefore frustrated it by inflicting upon them a remarkable affection of the organs of speech, which produced discord and separation.

At the same time, we cannot dogmatically affirm that this infliction was absolutely and visibly miraculous. It is an undeniable character of the scriptural idiom, especially in the Old Test., that verbs denoting *direct* efficiency are used when only *mediate* action is to be understood, or permission, or declaration. Instances are numerous, e. g. "God caused me to wander" (Gen. xx, 13); "I have made—given—sustained" (xxvii, 37); the "hardening of wicked men's hearts" (Exod. vii; Isa. vi, etc.); "I will come up into the midst of them" (Exod. xxxiii, 5). All such declarations are perfectly true. The Infinitely Wise and Holy and Powerful worketh all things according to the counsel of his own will, as much when his operation is through the instrumentality of rational creatures and the free exercise of their own faculties as when there is a miraculous intervention. Shuckford inclines at least to the opinion that the whole was the result of natural and moral second causes, fulfilling the purposes of the Most High (*Connect. of Hist.* i, 133-135). This view, however, does not seem to meet adequately the judicial character of the passage.

Still it is unnecessary to assume that the judgment inflicted on the builders of Babel amounted to a loss, or even a suspension, of articulate speech. The desired object would be equally attained by a miraculous forestalment of those dialectical differences of language which are constantly in process of production, but which, under ordinary circumstances, require time and variations of place and habits to reach such a point of maturity that people are unable to understand one another's speech. The elements of the one original language may have remained, but so disguised by variations of pronunciation, and by the introduction of new

combinations, as to be practically obliterated. Each section of the human family may have spoken a tongue unintelligible to the remainder, and yet containing a substratum which was common to all. Our own experience suffices to show how completely even dialectical differences render strangers unintelligible to one another; and if we further take into consideration the differences of habits and associations, of which dialectical differences are the exponents, we shall have no difficulty in accounting for the result described by the sacred historian.

2. *Date of the Incident.*—This is not definitely given in the sacred narratives. By many interpreters it is thought that we cannot satisfactorily place it so early as at one hundred years after the Flood, as it is in the commonly received chronology, and hence they are inclined to one of the larger systems—that of the Septuagint, which gives five hundred and thirty years, or that of Josephus, adopted, with a little emendation, by Dr. Hales, which gives six hundred years; and thus we have at least five centuries for the intervening period. Prof. Wallace, in his elaborate work, makes it more than eight centuries (*Dissertation on the True Age of the World and the Chronology to the Christian Era* [1844], p. 298). We see no reason to depart from the usual view, countenanced by the position of the incident in the context and the express indication in Gen. xi, 2 (“as they journeyed from the east”), that it took place not very long after the Deluge.

3. *Extent of the Catastrophe.*—Upon the question whether all of mankind were engaged in this act of concerted disobedience, or only a part, we confess ourselves unable to adduce irrefragable evidence on either side, but we think that there is a great preponderance of argument on the part of the latter supposition. The simple phraseology of the text wears an appearance of favoring the former; but the extreme brevity and insulated character of these primeval fragments forbid our arguing from the mere juxtaposition of the first and the second sentence. It is a common idiom in Hebrew that a pronoun, whether separate or suffixed, stands at the introduction of a new subject, even when that subject may be different and remote from the nearest preceding, and requires to be supplied by the intelligence of the reader (see, e.g., Ps. ix, 13 [12]; xviii, 15 [14]; xlv, 8 [2]; lxx, 10 [9]; cv, 37). So far as the grammatical structure is concerned, we may regard the two sentences as mutually independent, and that, therefore, the question is open to considerations of reason and probability. It is difficult to suppose that Noah and Shem, and all others of the descendants of Noah, were confederates in this proceeding. Hence the opinion has been maintained, more or less definitely, by many critics and expositors that it was perpetrated by only a part of mankind, chiefly, if not solely, the posterity of Ham, and upon the instigation and under the guidance of Nimrod, who (Gen. x, 10) is declared to have had Babel for the head place of his empire. The latter part of this position is asserted by Josephus, and the whole by Augustine and other ancients. Of modern writers who have maintained this opinion, we may specify Luther, Calvin (by apparent implication), Cornelius à Lapide, Bonfère, Poole (in his *English Annotations*), Patrick, Wells, Samuel Clarke (the annotator), Henry (by implication); narratives derived from Arabian and Hindû sources, in Charles Taylor's *Illustrations of Calmet*, frag. 528; and the late Jacob Bryant, who, though too imaginative and sanguine a theorist, and defective in his knowledge of the Oriental tongues, often gives us valuable collections of facts, and sound reasonings from them. A considerable part of his celebrated work, the *Analysis of Ancient Mythology*, is occupied with tracing the historical vestiges of the builders of Babel, whom, on grounds of high probability at least, he regards as Cushites (assumed to be a dialectic variety for Cushites), the descendants of Cush, the son of Ham, but with whom were united many dissatisfied and apostate

individuals of the branches of Japheth. Dr. Doig, in the article “Philology,” in the *Encyclop. Britannica* (7th ed. 1842), has entered at some length into this question, and arrives at the following conclusion: “From these circumstances, we hope it appears that the whole mass of mankind was not engaged in building the tower of Babel; that the language of all the human race was not confounded upon that occasion, and that the dispersion reached only to a combination of Hamites, and of the most profligate part of the two other families who had joined their wicked confederacy.” Nevertheless, as this was the first occurrence of any dialectical variety, it is properly given by the sacred writer as the initial point of that wide ethnic diversity of tongues which has since gradually spread over the earth.

4. *Traces of the Event.*—(1.) *Monumental.*—The history of the confusion of languages was preserved at Babylon, as we learn by the testimonies of classical and Babylonian authorities (Abydenus, *Fragm. Hist. Græc.* [ed. Didot], vol. iv). Only the Chaldeans themselves did not admit the Hebrew etymology of the name of their metropolis; they derived it from *Bab-el*, the door of *El* (Kronos, or Saturnus), whom Diodorus Siculus states to have been the planet most adored by the Babylonians.

The Talmudists say that the true site of the tower of Babel was at Borsif, the Greek Borsippa, the Birs Nimrûd, seven miles and a half from Hillah, S.W., and nearly eleven miles from the northern ruins of Babylon. Several passages state that the air of Borsippa makes forgetful (אִיר מִשְׁכַּח, *air mashkach*); and one rabbi says that Borsif is Bulsif, the confusion of tongues (*Bereschith Rabba*, fol. 42, p. 1). The Babylonian name of this locality is Barsip, or Barzipa, which we explain by “Tower of Tongues.” The French expedition to Mesopotamia found at the Birs Nimrûd a clay cake, dated from Barsip the 30th day of the 6th month of the 16th year of Nabonid, and the discovery confirmed the hypothesis of several travellers, who had supposed the Birs Nimrûd to contain the remains of Borsippa.

Borsippa (the Tongue Tower) was formerly a suburb of Babylon, when the old Babel was merely restricted to the northern ruins, before the great extension of the city, which, according to ancient writers, was the greatest that the sun ever warmed with its beams. Nebuchadnezzar included it in the great circumvallation of 480 stades, but left it out of the second wall of 360 stades; and when the exterior wall was destroyed by Darius, Borsippa became independent of Babylon. The historical writers respecting Alexander state that Borsippa had a great sanctuary dedicated to Apollo and Artemis (Strabo, xvi, 739; Stephanus Byz. s. v. Βόρσιππα), and the former is the building elevated in modern times on the very basement of the old tower of Babel.

This building, erected by Nebuchadnezzar, is the same that Herodotus describes as the tower of Jupiter Belus. In the *Expédition en Mésopotamie*, i, 208, there is given a description of this ruin, proving the identity. This tower of Herodotus has nothing to do with the pyramid described by Strabo, which is certainly to be seen in the remains called now Babil (the Mujellibeh of Rich). The temple of Borsippa is written with an ideogram (*bi-zi-da*), composed of the signs for *house* and *spirit* (anima), the real pronunciation of which was probably *sarakh*, tower.

The temple consisted of a large substructure, a stade (six hundred Babylonian feet) in breadth and seventy-five feet in height, over which were built seven other stages of twenty-five feet each. Nebuchadnezzar gives notice of this building in the Borsippa inscription. He named it the temple of the *Seven Lights of the Earth*, i. e. the planets. The top was the temple of Nebo, and in the substructure (*igar*) was a temple consecrated to the god Sin, god of the month. This building, mentioned in the East India House inscription (col. iv, l. 61), is spoken of by Herodotus (i, 181, etc.).

Here follows the Borsippa inscription:

"Nabuchodonosor, king of Babylon, shepherd of peoples, who attests the immutable affection of Merodach, the mighty ruler-exalting Nebo; the savior, the wise man who lends his ears to the orders of the highest god; the lieutenant without reproach, the repaire of the Pyramid and the Tower, eldest son of Nabopalassar, king of Babylon.

"We say: Merodach, the great master, has created me: he has imposed on me to reconstruct his building. Nebo, the guardian over the legions of the heaven and the earth, has charged my hands with the sceptre of justice.

"The Pyramid is the temple of the heaven and the earth, the seat of Merodach, the chief of the gods; the place of the oracles, the spot of his rest, I have adorned in the form of a cupola, with shining gold.

"The Tower, the eternal house, which I founded and built, I have completed its magnificence with silver, gold, other metals, stone, enamelled bricks, fir, and pine.

"The first, which is the house of the earth's base, the most ancient monument of Babylon, I built and finished it; I have highly exalted its head with bricks covered with copper.

"We say for the other, that is, this edifice, the house of the Seven Lights of the Earth, the most ancient monument of Borsippa: A former king built it (they reckon forty-two ages), but he did not complete its head. Since a remote time people had abandoned it, without order expressing their words. Since that time, the earthquake and the thunder had dispersed its sun-dried clay; the bricks of the casing had been split, and the earth of the interior had been scattered in heaps. Merodach, the great lord, excited my mind to repair this building. I did not change the site, nor did I take away the foundation-stone. In a fortunate month, an auspicious day, I undertook to build porticos around the crude brick masses, and the casing of burnt bricks. I adapted the circuits. I put the inscription of my name in the *Kittir* of the porticos.

"I set my hand to finish it, and to exalt its head. As it had been in former times, so I founded, I made it; as it had been in ancient days, so I exalted its summit.

"Nebo, son of himself, ruler who exaltest Merobach, be propitious to my works to maintain my authority. Grant me a life until the remotest time, a sevenfold progeny, the stability of my throne, the victory of my sword, the pacification of foes, the triumph over the lands! In the columns of thy eternal table, that fixes the destinies of the heaven and of the earth, bless the course of my days, inscribe the fecundity of my race.

"Imitate, O Merodach, king of heaven and earth, the father who begot thee: bless my buildings, strengthen my authority. May Nebuchadnezzar, the king-repairer, remain before thy face!"

This allusion to the Tower of the Tongues is the only one that has as yet been discovered in the cuneiform inscriptions (see *Expédition en Mésopotamie*, i, 208). The story is a Shemitic and not merely a Hebrew one, and we have no reason whatever to doubt of the existence of the same story at Babylon. The ruins of the building elevated on the spot where the story placed the tower of the dispersion of tongues have therefore a more modern origin, but interest, nevertheless, by their stupendous appearance. See BABEL.

(2.) *Historical*.—The following are the principal passages of ancient authors, rescued from the wreck of time by the quotations of Josephus and Eusebius. It scarcely need be said that we do not adduce these fragments as authorities in any other sense than that they repeat the traditional narratives which had descended from the remotest antiquity among the people to whom they relate. The "Sibyl" cited by Josephus is the fictitious appellation of some unknown author, probably about the 2d century B.C. Alexander Cornelius Polyhistor flourished about one hundred years before Christ. Eupolemus was probably an Asiatic Greek, two or three centuries earlier. Abydenus (if he was Palæphatus) lived in the middle of the 4th century B.C.

"Concerning this tower, and the discordance of language among men, the Sibyl also makes mention, saying thus: 'All men having one language, some of them built a very high tower, as if they proposed by means of it to climb to heaven; but the gods, by sending storms of wind, overthrew the tower, and gave to each person a peculiar language: and on this account the city came to be called Babylon'" (Josephus, *Ant.* i, 4, 3).

The Sibyl here quoted may be that very ancient anonymous authority to which we have obscure references (in the discourse of Theophilus to Autolytus) in

X.—G G

Plutarch's *Morals*, in Virgil's *Pollio*, and in the *Stromata* of Clemens Alexandrinus.

"Alexander Polyhistor—a man of the highest celebrity for talents and attainments, in the estimation of those Greeks who are the most profoundly and accurately learned—has the following passage: 'Eupolemus, in his book concerning the Jews of Assyria, says that the city of Babylon was first built by those who had been preserved from the Deluge; that they were giants [the Greeks used this word to signify, not so much men of enormous stature as their mythological heroes, of great prowess, and defying the gods]; that they also erected the tower of which history gives account; but that it was overthrown by the mighty power from God, and consequently the giants were scattered abroad over the whole earth'" (Eusebius, *Præpar. Evang.* col. 1688).

"Further, with respect to the narrative of Moses concerning the building of the tower, and how, from one tongue, they were confounded so as to be brought into the use of many dialects, the author before mentioned [Abydenus], in his book concerning the Assyrians, gives his confirmation in these words: 'There are some who say that the first men sprang out of the earth; that they boasted of their strength and size; that they contemptuously maintained themselves to be superior to the gods; that they erected a lofty tower where now is Babylon; then, when it had been carried on almost up to heaven, the very winds came to assist the gods, and overthrew the vast structure upon its builders. Its ruins were called Babylon. The men, who before had possessed one tongue, were brought by the gods to a many-sounding voice; and afterwards war arose between Kronos [Saturn] and Titan. Moreover, the place in which they built the tower is now called Babylon, on account of the confusing of the prior clearness with respect to speech; for the Hebrews call confusion Babel'" (Eusebius, *Præpar. Evang.* ix, 14).

Abydenus, the Grecian historian of Assyria, is known to us only by citations in Eusebius, Cyril of Alexandria, and Syncellus, but they confirm his respectability as a writer.

On the event under discussion, see the Latin monographs by Linck (Vitemb. 1656), Zobel (ibid. 1664), Schroeder (Groning. 1752), Kanne (Norimb. 1819), and in English by Wetton (Lond. 1732); also the literature cited by Darling, *Cyclop. Bibliog.* col. 179, 180.

II. *Philological and Ethnological Considerations*.—The unity of the human race is most clearly implied, if not positively asserted, in the Mosaic writings. The general declaration "So God created man in his own image, . . . male and female created he them" (Gen. i, 27) is limited as to the mode in which the act was carried out by the subsequent narrative of the creation of the protoplast Adam, who stood alone on the earth amid the beasts of the field until it pleased Jehovah to create "an help meet for him" out of the very substance of his body (ii, 22). From this original pair sprang the whole antediluvian population of the world; and hence the author of the book of Genesis conceived the unity of the human race to be of the most rigid nature—not simply a generic unity, nor, again, simply a specific unity (for unity of species may not be inconsistent with a plurality of original centres), but a specific based upon a numerical unity, the species being nothing else than the enlargement of the individual. Such appears to be the natural meaning of the first chapters of Genesis when taken by themselves; much more so when read under the reflected light of the New Test.; for not only do we meet with references to the historical fact of such an origin of the human race—e. g. in Paul's declaration that God "hath made of one blood every nation of men to dwell on all the face of the earth" (Acts xvii, 26)—but the same is evidently implied in the numerous passages which represent Jesus Christ as the counterpart of Adam in regard to the universality of his connection with the human race. Attempts have indeed been made to show that the idea of a plurality of original pairs is not inconsistent with the Mosaic writings; but there is a wide distinction between a view not inconsistent with, and a view drawn from, the words of the author: the latter is founded upon the facts he relates, as well as his mode of relating them; the former takes advantage of the weaknesses arising out of a concise or unmethodical style of composition. Even if such a view could be

sustained in reference to the narrative of the original creation of man, it must inevitably fail in reference to the history of the repopulation of the world in the post-diluvian age; for, whatever objections may be made to the historical accuracy of the history of the Flood, it is at all events clear that the historian believed in the universal destruction of the human race, with the exception of Noah and his family, and consequently that the unity of the human race was once more reduced to one of a numerical character. To Noah the historian traces up the whole postdiluvian population of the world: "These are the three sons of Noah: and of them was the whole earth overspread" (Gen. ix, 19).

Unity of language is assumed by the sacred historian apparently as a corollary of the unity of race. No explanation is given of the origin of speech, but its exercise is evidently regarded as coeval with the creation of man. No support can be obtained in behalf of any theory on this subject from the first recorded instance of its exercise ("Adam gave names to all cattle"), for the simple reason that this notice is introductory to what follows: "but for Adam there was not found an help meet for him" (Gen. ii, 20). It was not so much the intention of the writer to state the fact of man's power of speech as the fact of the inferiority of all other animals to him, and the consequent necessity for the creation of woman. The proof of that inferiority is, indeed, most appropriately made to consist in the authoritative assignment of names, implying an act of reflection on their several natures and capacities, and a recognition of the offices which they were designed to fill in the economy of the world. The exercise of speech is thus most happily connected with the exercise of reflection, and the relationship between the inner act of the mind (*λόγος ἐνδιάθετος*) and the outward expression (*λόγος προφορικός*) is fully recognised. Speech, being thus inherent in man as a reflecting being, was regarded as handed down from father to son by the same process of imitation by which it is still perpetuated. Whatever divergences may have arisen in the antediluvian period, no notice is taken of them, inasmuch as their effects were obliterated by the universal catastrophe of the Flood. The original unity of speech was restored in Noah, and would naturally be retained by his descendants as long as they were held together by social and local bonds.

The confusion of tongues and the dispersion of nations are spoken of in the Bible as contemporaneous events. "So the Lord scattered them abroad" is stated as the execution of the divine counsel "Let us confound their language." The divergence of the various families into distinct tribes and nations ran parallel with the divergence of speech into dialects and languages, and thus the tenth chapter of Genesis is posterior in historical sequence to the events recorded in the eleventh chapter. Both passages must be taken into consideration in any disquisition on the early fortunes of the human race. We propose, therefore, to inquire, in the first place, how far modern researches into the phenomena of language favor the idea that there was once a time when "the whole earth was of one speech and language; and, in the second place, whether the ethnological views exhibited in the Mosaic table accord with the evidence furnished by history and language, both in regard to the special facts recorded in it and in the general scriptural view of a historical, or, more properly, a gentile, unity of the human race. These questions, though independent, yet exercise a reflexive influence on each other's results. Unity of speech does not necessarily involve unity of race, nor yet *vice versa*; but each enhances the probability of the other, and therefore the arguments derived from language, physiology, and history may ultimately furnish a cumulative amount of probability which will fall but little below demonstration.

(A.) The advocate of the historical unity of language has to encounter two classes of opposing arguments:

one arising out of the differences, the other out of the resemblances, of existing languages. On the one hand, it is urged that the differences are of so decisive and specific a character as to place the possibility of a common origin wholly out of the question; on the other hand, that the resemblances do not necessitate the theory of a historical unity, but may be satisfactorily accounted for on psychological principles. It will be our object to discuss the amount, the value, and the probable origin of the varieties exhibited by languages, with a view to meet the first class of objections. But, before proceeding to this, we will make a few remarks on the second class, inasmuch as these, if established, would nullify any conclusion that might be drawn from the other.

A psychological unity is not necessarily opposed to a gentile unity. It is perfectly open to any theorist to combine the two by assuming that the language of the one protoplast was founded on strictly psychological principles. But, on the other hand, a psychological unity does not necessitate a gentile unity. It permits of the theory of a plurality of protoplasts, who, under the influence of the same psychological laws, arrived at similar independent results. Whether the phenomena of language are consistent with such a theory, we think extremely doubtful; certainly they cannot furnish the basis of it. The whole question of the origin of language lies beyond the pale of historical proof, and any theory connected with it admits neither of being proved nor disproved. We know, as a matter of fact, that language is communicated from one generation to another solely by force of imitation, and that there is no play whatever for the inventive faculty in reference to it. But in what manner the substance of language was originally produced we do not know. No argument can be derived against the common origin from analogies drawn from the animal world; and when Prof. Agassiz compares similarities of language with those of the cries of animals (Von Bohlen, *Introd. to Gen.* ii, 278), he leaves out of consideration the important fact that language is not identical with sound, and that the words of a rational being, however originally produced, are perpetuated in a manner wholly distinct from that whereby animals learn to utter their cries. Nor does the internal evidence of language itself reveal the mystery of its origin; for, though a very large number of words may be referred either directly or mediately to the principle of onomatopœia, there are others—as, for instance, the first and second personal pronouns—which do not admit of such an explanation. In short, this and other similar theories cannot be reconciled with the intimate connection evidently existing between reason and speech, which is so well expressed in the Greek language by the application of the term *λόγος* to each, reason being nothing else than inward speech, and speech nothing else than outward reason, neither of them possessing an independent existence without the other. As we conceive that the psychological as opposed to the gentile unity involves questions connected with the origin of language, we can only say that in this respect it falls outside the range of our inquiry.

Reverting to the other class of objections, we proceed to review the extent of the differences observable in the languages of the world in order to ascertain whether they are such as to preclude the possibility of a common origin. Such a review must necessarily be imperfect, both from the magnitude of the subject and also from the position of the linguistic science itself, which as yet has hardly advanced beyond the stage of infancy. On the latter point we would observe that the most important links between the various language families may yet be discovered in languages that are either unexplored or, at all events, unplaced. Meanwhile, no one can doubt that the tendency of all linguistic research is in the direction of unity. Already it has brought within the bounds of a well-established relationship languages so remote from each other in

external guise, in age, and in geographical position as Sanscrit and English, Celtic and Greek. It has done the same for other groups of languages equally widely extended, but presenting less opportunities of investigation. It has recognised affinities between languages which the ancient Greek ethnologist would have classed under the head of "barbarian" in reference to each other, and even in many instances where the modern philologist has anticipated no relationship. The lines of discovery, therefore, point in one direction, and favor the expectation that the various families may be combined by the discovery of connecting-links into a single family, comprehending in its capacious bosom all the languages of the world. But, should such a result never be attained, the probability of a common origin would still remain unshaken; for the failure would probably be due to the absence, in many classes and families, of that chain of historical evidence which in the case of the Indo-European and Shemitic families enables us to trace their progress for above three thousand years. In many languages no literature at all, in many others no ancient literature, exists to supply the philologist with materials for comparative study: in these cases it can only be by laborious research into existing dialects that the original forms of words can be detected amid the incrustations and transmutations with which time has obscured them.

In dealing with the phenomena of language, we should duly consider the plastic nature of the material out of which it is formed, and the numerous influences to which it is subject. Variety in unity is a general law of nature, to which even the most stubborn physical substances yield a ready obedience. In the case of language it would be difficult to set any bounds to the variety which we might *a priori* expect it to assume. For, in the first place, it is brought into close contact with the spirit of man, and reflects with amazing fidelity its endless variations, adapting itself to the expression of each feeling, the designation of each object, the working of each cast of thought or stage of reasoning power. Secondly, its sounds are subject to external influences, such as peculiarities of the organ of speech, the result either of natural conformation, of geographical position, or of habits of life and associations of an accidental character. In the third place, it is generally affected by the state of intellectual and social culture of a people, as manifested more especially in the presence or absence of a standard literary dialect, and in the processes of verbal and syntactical structure, which again react on the very core of the word and produce a variety of sound-mutations. Lastly, it is subjected to the wear and tear of time and use, obliterating, as in an old coin, the original impress of the word, reducing it in bulk, producing new combinations, and occasionally leading to singular interchanges of sound and idea. The varieties resulting from the modifying influences above enumerated may be reduced to two classes, according as they affect the formal or the radical elements of language.

(I.) Widely as languages now differ from each other in external form, the raw material (if we may use the expression) out of which they have sprung appears to have been in all cases the same. A substratum of significant monosyllabic roots underlies the whole structure, supplying the materials necessary, not only for ordinary predication, but also for what is usually termed the "growth" of language out of its primary into its more complicated forms. It is necessary to point this out clearly in order that we may not be led to suppose that the elements of one language are in themselves endowed with any greater vitality than those of another. Such a distinction, if it existed, would go far to prove a specific difference between languages, which could hardly be reconciled with the idea of their common origin. The appearance of vitality arises out of the manipulation of the roots by the human mind, and is not inherent in the roots themselves.

1. The proofs of this original equality are furnished by the languages themselves. Adopting for the present the threefold morphological classification into isolating, agglutinative, and inflecting languages, we shall find that no original element exists in the one which does not also exist in the other. With regard to the isolating class, the terms "monosyllabic" and "radical," by which it is otherwise described, are decisive as to its character. Languages of this class are wholly unsusceptible of grammatical mutations; there is no formal distinction between verb and noun, substantive and adjective, preposition and conjunction; there are no inflections, no case or person terminations of any kind; the bare root forms the sole and whole substance of the language. In regard to the other two classes, it is necessary to establish the two distinct points—(1) that the formal elements represent roots, and (2) that the roots both of the formal and the radical elements of the word are monosyllabic. Now it may be satisfactorily proved by analysis that all the component parts of both inflecting and agglutinative languages are reducible to two kinds of roots, predicable and pronominal—the former supplying the material element of verbs, substantives, and adjectives; the latter that of conjunctions, prepositions, and particles; while each kind, but more particularly the pronominal, supplies the formal element, or, in other words, the terminations of verbs, substantives, and adjectives. Whether the two classes of roots, predicable and pronominal, are further reducible to one class is a point that has been discussed, but has not as yet been established (Bopp, *Compar. Gram.* § 105; Müller, *Lectures*, p. 269). We have further to show that the roots of agglutinative and inflecting languages are monosyllabic. This is an acknowledged characteristic of the Indo-European family: monosyllabism is, indeed, the only feature which its roots have in common; in other respects they exhibit every kind of variation, from a uniliteral root, such as *i* (*ire*), up to combinations of five letters, such as *scand* (*scandere*), the total number of admissible forms of root amounting to no less than eight (Schleicher, § 206). In the Shemitic family monosyllabism is not a *prima facie* characteristic of the root; on the contrary, the verbal stems exhibit bisyllabism with such remarkable uniformity that it would lead to the impression that the roots also must have been bisyllabic. The bisyllabism, however, of the Shemitic stem is in reality triconsonantalism, the vowels not forming any part of the essence of the root, but being wholly subordinate to the consonants. It is at once apparent that a triconsonantal and even a quadriconsonantal root may be in certain combinations unsyllabic. But, further, it is more than probable that the triconsonantal has been evolved out of a biconsonantal root, which must necessarily be unsyllabic if the consonants stand, as they invariably do in Shemitic roots, at the beginning and end of the word. With regard to the agglutinative class, it may be assumed that the same law which we have seen to prevail in the isolating and inflecting classes prevails also in this, holding as it does an intermediate place between those opposite poles in the world of language.

2. From the consideration of the crude materials of language, we pass on to the varieties exhibited in its structure, with a view to ascertain whether in these there exists any bar to the idea of an original unity. (1.) Reverting to the classification already noticed, we have to observe, in the first place, that the principle on which it is based is the nature of the connection existing between the predicable and the relational or inflectional elements of a word. In the isolating class these two are kept wholly distinct; relational ideas are expressed by juxtaposition or by syntactical arrangement, and not by any combination of the roots. In the agglutinative class the relational elements are attached to the principal or predicable theme by a mechanical kind of junction, the individuality of each being preserved even in the combined state. In the inflecting class the junc-

tion is of a more perfect character, and may be compared to a chemical combination, the predicable and relational elements being so fused together as to present the appearance of a single and indivisible word. It is clear that there exists no insuperable barrier to original unity in these differences, from the simple fact that every inflecting language must once have been agglutinative, and every agglutinative language once isolating. If the predicable and relational elements of an isolating language be linked together, either to the eye or the ear, it is rendered agglutinative; if the material and formal parts are pronounced as one word, eliminating, if necessary, the sounds that resist incorporation, the language becomes inflecting. (2.) In the second place, it should be noted that these three classes are not separated from each other by any sharp line of demarcation. Not only does each possess, in a measure, the quality predominant in each other, but, moreover, each graduates into its neighbor through its bordering members. The isolating languages are not wholly isolating; they avail themselves of certain words as relational particles, though these still retain elsewhere their independent character; they also use composite, though not strictly compound, words. The agglutinative are not wholly agglutinative; the Finnish and Turkish classes of the Ural-Altaian family are in certain instances inflectional, the relational adjunct being fully incorporated with the predicable stem, and having undergone a large amount of attrition for that purpose. Nor, again, are the inflectional languages wholly inflectional; Hebrew, for instance, abounds with agglutinative forms, and also avails itself largely of separate particles for the expression of relational ideas; our own language, though classed as inflectional, retains nothing more than the vestiges of inflection, and is in many respects as isolating and juxtapositional as any language of that class. While, therefore, the classification holds good with regard to the predominant characters of the classes, it does not imply differences of a specific nature. (3.) But, further, the morphological varieties of language are not confined to the exhibition of the single principle hitherto described. A comparison between the westerly branches of the Ural-Altaian, on the one hand, and the Indo-European, on the other, belonging respectively to the agglutinative and inflectional classes, will show that the quantitative amount of synthesis is fully as prominent a point of contrast as the qualitative. The combination of primary and subordinate terms may be more perfect in the Indo-European, but it is more extensively employed in the Ural-Altaian family. The former, for instance, appends to its verbal stems the notions of time, number, person, and occasionally of interrogation; the latter further adds suffixes indicative of negation, hypothesis, causativeness, reflexiveness, and other similar ideas, whereby the word is built up tier on tier to a marvellous extent. The former appends to its substantival stems suffixes of case and number; the latter adds governing particles, rendering them post-positional instead of pre-positional, and combining them synthetically with the predicable stem. If, again, we compare the Shemitic with the Indo-European languages, we shall find a morphological distinction of an equally diverse character. In the former the grammatical category is expressed by internal vowel-changes, in the latter by external suffixes. So marked a distinction has not unnaturally been constituted the basis of a classification, wherein the languages that adopt this system of internal flexion stand by themselves as a separate class, in contradistinction to those which either use terminational additions for the same purpose, or which dispense wholly with inflectional forms (Bopp, *Compar. Gram.* i, 102). The singular use of preformatives in the Coptic language is, again, a morphological peculiarity of a very decided character. Even within the same family, say the Indo-European, each language exhibits an idiosyncrasy in its morphological character whereby it stands out apart from the

other members with a decided impress of individuality. The inference to be drawn from the number and character of the differences we have noticed is favorable, rather than otherwise, to the theory of an original unity. Starting from the same common ground of monosyllabic roots, each language-family has carried out its own special line of development, following an original impulse, the causes and nature of which must remain probably forever a matter of conjecture. We can perceive, indeed, in a general way, the adaptation of certain forms of speech to certain states of society. The agglutinative languages, for instance, seem to be specially adapted to the nomadic state by the prominence and distinctness with which they enunciate the leading idea in each word, an arrangement whereby communication would be facilitated between tribes or families that associate only at intervals. We might almost imagine that these languages derived their impress of uniformity and solidity from the monotonous steppes of Central Asia, which have in all ages formed their proper habitat. So, again, the inflectional class reflects cultivated thought and social organization, and its languages have hence been termed "state" or "political." Monosyllabism, on the other hand, is pronounced to be suited to the most primitive stage of thought and society, wherein the family or the individual is the standard by which things are regulated (Müller, *Philos. of Hist.* i, 285). We should hesitate, however, to press this theory as furnishing an adequate explanation of the differences observable in language-families. The Indo-European languages attained their high organization amid the same scenes and in the same nomad state as those wherein the agglutinative languages were nurtured, and we should rather be disposed to regard both the language and the higher social status of the former as the concurrent results of a higher mental organization.

3. If from words we pass on to the varieties of syntactical arrangement, the same degree of analogy will be found to exist between class and class, or between family and family in the same class; in other words, no peculiarity exists in one which does not admit of explanation by a comparison with others. The absence of all grammatical forms in an isolating language necessitates a rigid collocation of the words in a sentence according to logical principles. The same law prevails to a very great extent in our own language, wherein the subject, verb, and object, or the subject, copula, and predicate, generally hold their relative positions in the order exhibited, the exceptions to such an arrangement being easily brought into harmony with that general law. In the agglutinative languages the law of arrangement is that the principal word should come last in the sentence, every qualifying clause or word preceding it, and being, as it were, sustained by it. The syntactical is thus the reverse of the verbal structure, the principal notion taking the precedence in the latter (Ewald, *Sprachw. Abhandl.* ii, 29). There is in this nothing peculiar to this class of languages, beyond the greater uniformity with which the arrangement is adhered to; it is the general rule in the classical, and the occasional rule in certain of the Teutonic, languages. In the Shemitic family the reverse arrangement prevails; the qualifying adjectives follow the noun to which they belong, and the verb generally stands first; short sentences are necessitated by such a collocation, and hence more room is allowed for the influence of emphasis in deciding the order of the sentence. In illustration of grammatical peculiarities, we may notice that in the agglutinative class adjectives qualifying substantives, or substantives placed in apposition with substantives, remain undeclined; in this case the process may be compared with the formation of compound words in the Indo-European languages, where the final member alone is inflected. So, again, the omission of a plural termination in nouns following a numeral may be paralleled with a similar usage in our own language, where the

terms "pound" and "head" are used collectively after a numeral. We may again cite the peculiar manner of expressing the genitive in Hebrew. This is effected by one of the two following methods—placing the governing noun in the *status constructus*, or using the relative pronoun with a preposition before the governed case. The first of these processes appears a strange inversion of the laws of language; but an examination into the origin of the adjuncts, whether prefixes or affixes, used in other languages for the indication of the genitive will show that they have a more intimate connection with the governing than with the governed word, and that they are generally resolvable into either relative or personal pronouns, which serve the simple purpose of connecting the two words together (Garnett, *Essays*, p. 214-227). The same end may be gained by connecting the words in pronunciation, which would lead to a rapid utterance of the first, and consequently to the changes which are witnessed in the *status constructus*. The second or periphrastic process is in accordance with the general method of expressing the genitive; for the expression "the Song which is to Solomon" strictly answers to "Solomon's Song," the *s* representing (according to Bopp's explanation) a combination of the demonstrative *sa* and the relative *ya*. It is thus that the varieties of construction may be shown to be consistent with unity of law, and that they therefore furnish no argument against a common origin.

4. Lastly, it may be shown that the varieties of language do not arise from any constitutional inequality of vital energy. Nothing is more remarkable than the compensating power apparently inherent in all language, whereby it finds the means of reaching the level of the human spirit through a faithful adherence to its own guiding principle. The isolating languages, being shut out from the manifold advantages of verbal composition, attain their object by multiplied combinations of radical sounds, assisted by an elaborate system of accentuation and intonation. In this manner the Chinese language has framed a vocabulary fully equal to the demands made upon it; and though this mode of development may not commend itself to our notions as the most effective that can be devised, yet it plainly evinces a high susceptibility on the part of the linguistic faculty, and a keen perception of the correspondence between sound and sense. Nor does the absence of inflection interfere with the expression even of the most delicate shades of meaning in a sentence; a compensating resource is found partly in a multiplicity of subsidiary terms expressive of plurality, motion, action, etc., and partly in strict attention to syntactical arrangement. The agglutinative languages, again, are deficient in compound words, and in this respect lack the elasticity and expansiveness of the Indo-European family; but they are eminently synthetic, and no one can fail to admire the regularity and solidity with which its words are built up, suffix on suffix, and, when built up, are suffused with a uniformity of tint by the law of vowel-harmony. The Shemitic languages have worked out a different principle of growth, evolved, not improbably, in the midst of a conflict between the systems of prefix and suffix, whereby the stem, being, as it were, enclosed at both extremities, was precluded from all external increment, and was forced back into such changes as could be effected by a modification of its vowel-sounds. But whatever may be the origin of the system of internal inflection, it must be conceded that the results are very effective, as regards both economy of material and simplicity and dignity of style.

The result of the foregoing observations is to show that the formal varieties of language present no obstacle to the theory of a common origin. Amid these varieties there may be discerned manifest tokens of unity in the original material out of which language was formed, in the stages of formation through which it has passed, in the general principle of grammatical expression, and, lastly, in the spirit and power displayed in

the development of these various formations. Such a result, though it does not prove the unity of language in respect to its radical elements, nevertheless tends to establish the *a priori* probability of this unity; for if all connected with the forms of language may be referred to certain general laws, if nothing in that department owes its origin to chance or arbitrary appointment, it surely favors the presumption that the same principle would extend to the formation of the roots, which are the very core and kernel of language. Here, too, we might expect to find the operation of fixed laws of some kind or other, producing results of a uniform character; here, too, actual variety may not be inconsistent with original unity.

(II.) Before entering on the subject of the radical identity of languages, we must express our conviction that the time has not yet arrived for a decisive opinion as to the possibility of establishing it by proof. Let us briefly review the difficulties that beset the question. Every word as it appears in an organic language, whether written or spoken, is resolvable into two distinct elements, which we have termed predicable and formal, the first being what is commonly called the root, the second the grammatical termination. In point of fact, both of these elements consist of independent roots; and in order to prove the radical identity of two languages, it must be shown that they agree in both respects, that is, in regard both to the predicable and the formal roots. As a matter of experience, it is found that the formal elements (consisting, for the most part, of pronominal bases) exhibit a greater tenacity of life than the others; and hence agreement of inflectional forms is justly regarded as furnishing a strong presumption of general radical identity. Even foreign elements are forced into the formal mould of the language into which they are adopted, and thus bear testimony to the original character of that language. But though such a formal agreement supplies the philologist with a most valuable instrument of investigation, it cannot be accepted as a substitute for complete radical agreement: this would still remain to be proved by an independent examination of the predicable elements. The difficulties connected with these latter are many and varied. Assuming that two languages or language-families are under comparison, the phonological laws of each must be investigated in order to arrive, in the first place, at the primary forms of words in the language in which they occur, and, in the second place, at the corresponding forms in the language which constitutes the other member of comparison, as has been done by Grimm for the Teutonic as compared with the Sanscrit and the classical languages. The genealogy of sound, as we may term it, must be followed up by a genealogy of signification, a mere outward accordance of sound and sense in two terms being of no value whatever, unless a radical affinity be proved by an independent examination of the cognate words in each case. It still remains to be inquired how far the ultimate accordance of sense and sound may be the result of onomatopoeia, of mere borrowing, or of a possible mixture of languages on equal terms. The final stage in etymological inquiry is to decide the limit to which comparison may be carried in the primitive strata of language—in other words, how far roots, as ascertained from groups of words, may be compared with roots, and reduced to yet simpler elementary forms. Any flaw in the processes above described will, of course, invalidate the whole result. Even where the philologist is provided with ample materials for inquiry in stores of literature ranging over long periods of time, much difficulty is experienced in making good each link in the chain of agreement; and yet in such cases the dialectic varieties have been kept within some degree of restraint by the existence of a literary language, which, by impressing its authoritative stamp on certain terms, has secured both their general use and their external integrity. Where no literature exists, as is the case with the general mass of languages

in the world, the difficulties are infinitely increased by the combined effects of a prolific growth of dialectic forms, and an absence of all means of tracing out their progress. Whether, under these circumstances, we may reasonably expect to establish a radical unity of language is a question which each person must decide for himself. Much may yet be done by a larger induction and a scientific analysis of languages that are yet comparatively unknown. The tendency hitherto has been to enlarge the limits of a "family" according as the elements of affinity have been recognised in outlying members. These limits may perchance be still more enlarged by the discovery of connecting-links between the language-families, whereby the criteria of relationship will be modified, and new elements of internal unity be discovered amid the manifold appearances of external diversity.

Meanwhile we must content ourselves with stating the present position of the linguistic science in reference to this important topic. In the first place, the Indo-European languages have been reduced to an acknowledged and well-defined relationship: they form one of the two families included under the head of "inflectional" in the morphological classification. The other family in this class is the (so-called) Shemitic, the limits of which are not equally well defined, inasmuch as it may be extended over what are termed the sub-Shemitic languages, including the Egyptian or Coptic. The criteria of the proper Shemitic family (i. e. the Aramean, Hebrew, Arabic, and Ethiopic languages) are distinctive enough; but the connection between the Shemitic and the Egyptian is not definitely established. Some philologists are inclined to claim for the latter an independent position, intermediate between the Indo-European and Shemitic families (Bunsen, *Phil. of Hist.* i, 185 sq.). The agglutinative languages of Europe and Asia are combined by Prof. M. Müller in one family named "Turanian." It is conceded that the family bond in this case is a loose one, and that the agreement in roots is very partial (*Lectures*, p. 290-292). Many philologists of high standing, and more particularly Pott (*Ungleich. d. mensch. Rassen*, p. 232), deny the family relationship altogether, and break up the agglutinative languages into a great number of families. Certain it is that within the Turanian circle there are languages—such, for instance, as the Ural-Altaian—which show so close an affinity to one another as to be entitled to form a separate division, either as a family, or a subdivision of a family; and, this being the case, we should hesitate to put them on a parity of footing with the remainder of the Turanian languages. The Caucasian group, again, differs so widely from the other members of the family as to make the relationship very dubious. The monosyllabic languages of South-eastern Asia are not included in the Turanian family by Prof. M. Müller (*Lectures*, p. 290, 326), apparently on the ground that they are not agglutinative; but as the Chinese appears to be connected radically with the Burmese (Humboldt, *Verschied.* p. 368), with the Thibetan (*Phil. of Hist.* i, 393-395), and with the Ural-Altaian languages (Schott, in *Abh. Ab. Berl.* 1861, p. 172), it seems to have a good title to be placed in the Turanian family. With regard to the American and the bulk of the African languages, we are unable to say whether they can be brought under any of the heads already mentioned, or whether they stand by themselves as distinct families. The former are referred by writers of high eminence to an Asiatic or Turanian origin (Bunsen, *Phil. of Hist.* ii, 111; Latham, *Man and his Migrat.* p. 186); the latter to the Shemitic family (Latham, p. 148).

The problem that awaits solution is whether the several families above specified can be reduced to a single family by demonstrating their radical identity. It would be unreasonable to expect that this identity should be coextensive with the vocabularies of the various languages; it would naturally be confined to such ideas and objects as are common to mankind generally.

Even within this circle the difficulty of proving the identity may be infinitely enhanced by the absence of materials. There are, indeed, but two families in which these materials are found in anything like sufficiency, viz. the Indo-European and the Shemitic, and even these furnish us with no historical evidence as to the earlier stages of their growth. We find each, at the most remote literary period, already exhibiting its distinctive character of stem- and word-formation, leaving us to infer, as we best may, from these phenomena the processes by which they had reached that point. Hence there arises abundance of room for difference of opinion, and the extent of the radical identity will depend very much on the view adopted as to these earlier processes. If we could accept in its entirety the system of etymology propounded by the analytical school of Hebrew scholars, it would not be difficult to establish a very large amount of radical identity; but we cannot regard as established the prepositional force of the initial letters, as stated by Delitzsch in his *Jeshurun* (p. 166, 173, note), still less the correspondence between these and the initial letters of Greek and Latin words (p. 170-172). The striking uniformity of bisyllabism in the verbal stems is explicable only on the assumption that a single principle underlies the whole; and the existence of groups of words differing slightly in form, and having the same radical sense, leads to the presumption that this principle was one not of composition, but of euphonism and practical convenience. This presumption is still further favored by an analysis of the letters forming the stems, showing that the third letter is in many instances a reduplication, and in others a liquid, a nasal, or a sibilant, introduced either as the initial, the medial, or the final letter. The Hebrew alphabet admits of a classification based on the radical character of the letter according to its position in the stem. The effect of composition would have been to produce, in the first place, a greater inequality in the length of the words, and, in the second place, a greater equality in the use of the various organic sounds.

Many supposed instances of etymological correspondence have been falsely based on the analytical tenets; but there still exists a considerable amount of radical identity which appears to be above suspicion. Under PHILOLOGY, COMPARATIVE, we have given a list of terms in which that identity is manifested. After deducting whatever may be due to fanciful or accidental agreement, there still remain many instances which cannot possibly be explained on the principle of onomatopœia, and which would therefore seem to be the common inheritance of the Indo-European and Shemitic families. Whether this agreement is, as Renan suggests, the result of a keen susceptibility of the onomatopœic faculty in the original framers of the words (*Hist. Gén.* i, 465) is a point that can neither be proved nor disproved. But even if it were so, it does not follow that the words were not framed before the separation of the families. Our list of comparative words might have been much enlarged if we had included comparisons based on the reduction of Shemitic roots to a bisyllabic form. A list of such words may be found in Delitzsch, *Jeshurun*, p. 177-180. In regard to pronouns and numerals, the identity is but partial. We may detect the *t* sound, which forms the distinctive sound of the second personal pronoun in the Indo-European languages, in the Hebrew *attâh*, and in the personal terminations of the perfect tense; but the *m*, which is the prevailing sound of the first personal pronoun in the former, is supplanted by an *n* in the latter. The numerals *shesh* and *sheba*, for "six" and "seven," accord with the Indo-European forms: those representing the numbers from "one" to "five" are possibly, though not evidently, identical. With regard to the other language-families, it will not be expected, after the observations already made, that we should attempt the proof of their radical identity. The Ural-Altaian languages have been extensively studied, but are hardly ripe for com-

parison. Occasional resemblances have been detected in grammatical forms and in the vocabularies; but the value of these remains to be proved, and we must await the results of a more extended research into this and other regions of the world of language.

(B.) We pass on to the second point proposed for consideration, viz. the ethnological views expressed in the Bible, and more particularly in ch. x of Genesis, which records the dispersion of nations consequent on the confusion of tongues.

(I.) The Mosaic table does not profess to describe the process of the dispersion; but, assuming that dispersion as a *fait accompli*, it records the ethnic relations existing between the various nations affected by it. These relations are expressed under the guise of a genealogy; the ethnological character of the document is, however, clear both from the names, some of which are gentile in form, as Ludim, Jebusite, etc., others geographical or local, as Mizraim, Sidon, etc., and, again, from the formula which concludes each section of the subject, "after their families, after their tongues, in their countries, and in their nations" (ver. 5, 20, 31). Incidentally, the table is geographical as well as ethnological; but this arises out of the practice of designating nations by the countries they occupy. It has, indeed, been frequently surmised that the arrangement of the table is purely geographical, and this idea is, to a certain extent, favored by the possibility of explaining the names Shem, Ham, and Japheth on this principle; the first signifying the "high" lands, the second the "hot" or "low" lands, and the third the "broad," undefined regions of the north. The three families may have been so located, and such a circumstance could not have been unknown to the writer of the table. But neither internal nor external evidence satisfactorily proves such to have been the leading idea or principle embodied in it, for the Japhethites are mainly assigned to the "isles" or maritime districts of the west and north-west, while the Shemites press down into the plain of Mesopotamia, and the Hamites, on the other hand, occupy the high lands of Canaan and Lebanon. We hold, therefore, the geographical as subordinate to the ethnographical element, and avail ourselves of the former only as an instrument for the discovery of the latter.

The general arrangement of the table is as follows: The whole human race is referred back to Noah's three sons, Shem, Ham, and Japheth. The Shemites are described last, apparently that the continuity of the narrative may not be further disturbed; and the Hamites stand next to the Shemites, in order to show that these were more closely related to each other than to the Japhethites. The comparative degrees of affinity are expressed, partly by coupling the names together, as in the cases of Elishah and Tarshish, Kittim and Dodanim (ver. 4), and partly by representing a genealogical descent, as when the nations just mentioned are said to be "sons of Javan." An inequality may be observed in the length of the genealogical lines, which, in the case of Japheth, extends only to one, in Ham to two, in Shem to three, and even four degrees. This inequality clearly arises out of the varying interest taken in the several lines by the author of the table, and by those for whose use it was designed. We may lastly observe that the occurrence of the same name in two of the lists, as in the cases of Lud (ver. 13, 22) and Sheba (ver. 7, 28), possibly indicates a fusion of the races.

a. The identification of the Biblical with the historical or classical names of nations is by no means an easy task, particularly where the names are not subsequently noticed in the Bible. In these cases, comparisons with ancient or modern designations are the only resource, and where the designation is one of a purely geographical character, as in the case of Kipthah compared with *Kippei Montes*, or Mash compared with *Musius Mons*, great doubt must exist as to the ethnic force of the title, inasmuch as several nations may have successively occupied the same district. Equal doubt arises where

names admit of being treated as appellatives, and so of being transferred from one district to another. Recent research into Assyrian and Egyptian records has, in many instances, thrown light on the Biblical titles. In the former we find Meshech and Tubal noticed under the forms *Muskai* and *Tuplai*, while Javan appears as the appellation of Cyprus, where the Assyrians first met with Greek civilization. In the latter the name Phut appears under the form of *Pount*, Hittite as *Khita*, Cush as *Keesh*, Canaan as *Kanana*, etc.

1. The list of Japhethites contains fourteen names, of which seven represent independent and the remainder affiliated nations, as follows:

- (i.) Gomer, connected ethnically with the *Cimmerii*, *Cimbri* (?), and *Cymri*; and geographically with *Crimæa*. Associated with Gomer are the three following:
  - (a.) *Ashkenaz*, generally compared with Lake *Ascanus* in Bithynia, but by Knobel with the tribe *Asai*, *As*, or *Ossætes* in the Caucasian district. On the whole, we prefer Hasse's suggestion of a connection between this name and that of the *Azenus*, later the *Euxinus* Pontus.
  - (b.) Kipthah, the *Kippei Montes*, which Knobel connects etymologically and geographically with *Carpathus Mons*.
  - (c.) Togarmah, undoubtedly *Armenia*, or a portion of it.
- (ii.) Magog, the *Scythians*.
- (iii.) Madai, *Media*.
- (iv.) Javan, the *Ionians*, as a general appellation for the Hellenic race, with whom are associated the four following:
  - (a.) Elishah, the *Æolians*, less probably identified with the district *Elia*.
  - (b.) Tarshish, at a later period of Biblical history certainly identical with *Tartessus* in Spain, to which, however, there are objections as regards the table, partly from the too extended area thus given to the Mosaic world, and partly because Tartessus was a Phœnician, and consequently not a Japhetic settlement. Knobel compares the *Tyrseni*, *Tyrrheni*, and *Tusci* of Italy; but this is precarious.
  - (c.) Kittim, the town *Citium* in Cyprus.
  - (d.) Dodanim, the *Dardani* of Illyria and *Myia*: *Dodona* is sometimes compared.
- (v.) Tubal, the *Tibareni* in Pontus.
- (vi.) Meshech, the *Moschi* in the north-western part of Armenia.
- (vii.) Tiras, perhaps *Thracia*.

2. The Hamitic list contains thirty names, of which three represent independent and the remainder affiliated nations, as follows:

- (i.) Cush, in two branches, the western or African representing *Æthiopia*, the *Keesh* of the old Egyptian, and the eastern or Asiatic being connected with the names of the tribe *Cusæi*, the district *Cisra*, and the province *Susiana* or *Khuzistan*. With Cush are associated:
  - (a.) Seba, the *Sabei* of Yemen in South Arabia.
  - (b.) Havilah, the district *Khailân* in the same part of the peninsula.
  - (c.) Sabtah, the town *Sabatha* in Hadramaut.
  - (d.) Raamah, the town *Rhegma* on the south-eastern coast of Arabia, with whom are associated:
    - (a.) Sheba, a tribe probably connected ethnically or commercially with the one of the same name already mentioned, but located on the west coast of the Persian Gulf.
    - (b.) Dedan, also on the west coast of the Persian Gulf, where the name perhaps still survives in the island *Dadan*.
  - (e.) Sabtechah, perhaps the town *Samyda* on the coast of the Indian Ocean eastward of the Persian Gulf.
  - (f.) Nimrod, a personal and not a geographical name, the representative of the Eastern Cushites.
- (ii.) Mizraim, the two *Misra*, i. e. Upper and Lower Egypt, with whom the following seven are connected:
  - (a.) Ludim, according to Knobel, a tribe allied to the Shemitic Lud, but settled in Egypt; others compare the river *Laud* (Pliny, v, 2), and the *Lewdâh*, a Berber tribe on the Syrtes.
  - (b.) Ananim, according to Knobel, the inhabitants of the *Delta*, which would be described in Egyptian by the term *sanemhit* or *tanemhit*, "northern district," converted by the Hebrews into Ananim.
  - (c.) Naphtuhim, variously explained as the people of *Nephthys*, i. e. the northern coast district (Bochart), and as the worshippers of Phthah, meaning the inhabitants of Memphis.
  - (d.) Pathrusim, Upper Egypt, the name being explained as meaning in the Egyptian "the south" (Knobel).
  - (e.) Casluhim, *Casius Mons*, *Cassiotis*, and *Cassium*,

eastward of the Delta (Knobel): the *Colchians*, according to Bochart, but this is unlikely.

(f.) Caphtorim, most probably the district about *Coptos* in Upper Egypt [see CAPHTOR]; the island of Crete according to many modern critics, Cappadocia according to the older interpreters.

(g.) Phut, the *Phut* of the Egyptian inscriptions, meaning the Libyans.

(iii.) Canaan, the geographical position of which calls for no remark in this place. The name has been variously explained as meaning the "low" land of the coast district, or the "subjection" threatened to Canaan personally (Gen. ix, 25). To Canaan belong the following eleven:

(a.) Sidon, the well-known town of that name in Phœnicia.

(b.) Ieth, or the Hittites of Biblical history.

(c.) The Jebusite, of *Jebus* or Jerusalem.

(d.) The Amorite, frequently mentioned in Biblical history.

(e.) The Girgasite, the same as the Girgashtes.

(f.) The Hivite, variously explained to mean the occupants of the "interior" (Ewald), or the dwellers in "villages" (Gesenius).

(g.) The Arkite, of *Arca*, north of Tripolis, at the foot of Lebanon.

(h.) The Snite, of *Sin* or *Sinna*, places in the Lebanon district.

(i.) The Arvadite, of *Aradus* on the coast of Phœnicia.

(j.) The Zemarite, of *Simyra* on the Eleutherns.

(k.) The Hamathite, of *Hamath*, the classical *Epiphania*, on the Orontes.

3. The Shemitic list contains twenty-six names, of which five refer to independent and the remainder to affiliated tribes, as follows:

(i.) Elam, the tribe *Elymaei* and the district *Elymais* in Susiana.

(ii.) Aashur, *Assyria* between the Tigris and the range of Zagrus.

(iii.) Arphaxad, *Arrapachitis*, in Northern Assyria, with whom are associated:

(a.) Salah, a personal and also a geographical title, indicating a migration of the people represented by him: Salah's son.

(b.) Eber, representing geographically the district across (i. e. eastward of) the Euphrates; and Eber's two sons.

(c.) Peleg, a personal name indicating a "division" of this branch of the Shemitic family, and

(d.) Joktan, representing generally the inhabitants of Arabia, with the following thirteen sons of Joktan, viz.:

(a.) Almodad, probably representing the tribe of *Jurhum* near Mecca, whose leader was named *Mudad*.

(b.) Sheleph, the *Salapent* in Yemen.

(c.) Hazarmaveth, *Hadramaut* in Southern Arabia.

(d.) Jerah.

(e.) Hadoram, the *Adramite* on the southern coast, in a district of *Hadramaut*.

(f.) Uzal, supposed to represent the town *Szanaa* in South Arabia, as having been founded by *Asal*.

(g.) Diklah.

(h.) Obal, or, as in 1 Chron. i, 22, Ebal, which latter is identified by Knobel with the *Gebamite* in the south-west.

(i.) Abimael, doubtfully connected with the district *Mahra*, eastward of *Hadramaut*, and with the towns *Mara* and *Mali*.

(j.) Sheba, the *Sabæi* of South-western Arabia, about Mariaba.

(k.) Ophir, probably *Adane*, on the southern coast, but see article.

(l.) Havilah, the district *Khaulân* in the north-west of Yemen.

(m.) Jobab, possibly the *Jobarite* of Ptolemy (vi, 7, 24), for which *Jobabite* may originally have stood.

(iv.) Lud, generally compared with *Lydia*, but explained by Knobel as referring to the various aboriginal tribes in and about Palestine, such as the Amalekites, Rephaites, Emim, etc. We cannot consider either of these views as well established. Lydia itself lay beyond the horizon of the Mosaic table; as to the Shemitic origin of its population, conflicting opinions are entertained, to which we shall have occasion to advert hereafter. Knobel's view has in its favor the probability that the tribes referred to would be represented in the table; it is, however, wholly devoid of historical confirmation, with the exception of an Arabian tradition that *Amik* was one of the sons of *Laud* or *Lawad*, the son of Shem.

(v.) Aram, the general name for *Syria* and Northern *Mesopotamia*, with whom the following are associated:

(a.) Uz, probably the *Ætæe* of Ptolemy.

(b.) Hul, doubtful, but best connected with the name *Huleh*, attaching to a district north of Lake Merom.

(c.) Gether, not identified.

(d.) Mash, *Masius* Mons, in the north of *Mesopotamia*.

There is yet one name noticed in the table, viz. Philistim, which occurs in the Hamitic division, but without any direct assertion of Hamitic descent. The terms used in the A. V., "out of whom (Casluhim) came Philistim" (ver. 14), would naturally imply descent, but the Hebrew text only warrants the conclusion that the Philistines sojourned in the land of the Casluhim. Notwithstanding this, we believe the intention of the author of the table to have been to affirm the Hamitic origin of the Philistines, leaving undecided the particular branch, whether Casluhim or Caphtorim, with which it was more immediately connected.

The total number of names noticed in the table, including Philistim, would thus amount to seventy-one, which was raised by patristic writers to seventy-two. These totals afforded scope for numerical comparisons, and also for an estimate of the number of nations and languages to be found on the earth's surface. It is needless to say that the Bible itself furnishes no ground for such calculations, inasmuch as it does not, in any case, specify the numbers.

b. Before proceeding further, it would be well to discuss a question materially affecting the historical value of the Mosaic table, viz. the period to which it refers. On this point very various opinions are entertained. Knobel, conceiving it to represent the commercial geography of the Phœnicians, assigns it to about B.C. 1200 (*Völkert.* p. 4-9), and Renan supports this view (*Hist. Gén.* i, 40), while others allow it no higher an antiquity than the period of the Babylonian captivity (Von Bohlen, *Gen.* ii, 207; Winer, *Realeh.* ii, 665). Internal evidence leads us to refer it back to the age of Abraham on the following grounds: (1.) The Canaanites were as yet in undisputed possession of Palestine. (2.) The Philistines had not concluded their migration. (3.) Tyre is wholly unnoticed, an omission which cannot be satisfactorily accounted for on the ground that it is included under the name either of Heth (Knobel, p. 323) or of Sidon (Von Bohlen, ii, 241). (4.) Various places, such as *Simyra*, *Sinna*, and *Arca*, are noticed which had fallen into insignificance in later times. (5.) Kittim, which in the age of Solomon was under Phœnician dominion, is assigned to Japheth, and the same may be said of Tarshish, which in that age undoubtedly referred to the Phœnician emporium of *Tartessus*, whatever may have been its earlier significance. The chief objection to so early a date as we have ventured to propose is the notice of the Medes under the name *Madai*. The Aryan nation which bears this name in history appears not to have reached its final settlement until about B.C. 900 (Rawlinson, *Herod.* i, 404). But, on the other hand, the name *Media* may well have belonged to the district before the arrival of the Aryan Medes, whether it were occupied by a tribe of kindred origin to them or by Turanians; and this probability is, to a certain extent, confirmed by the notice of a Median dynasty in Babylon, as reported by Berosus, so early as the 25th century B.C. (*ibid.* i, 434). Little difficulty would be found in assigning so early a date to the Medes if the Aryan origin of the allied kings mentioned in Gen. xiv. 1 were thoroughly established, in accordance with Renan's view (*Hist. Gén.* i, 61): on this point, however, we have our doubts. See GENESIS.

c. The Mosaic table is supplemented by ethnological notices relating to the various divisions of the Terachite family. These belonged to the Shemitic division, being descended from Arphaxad through Peleg, with whom the line terminates in the table. Reu, Serug, and Nahor form the intermediate links between Peleg and Terah (Gen. xi, 18-25), with whom began the movement that terminated in the occupation of Canaan and the adjacent districts by certain branches of the family. The original seat of Terah was Ur of the Chaldees (ver. 28); thence he migrated to Haran (ver. 31), where a section of his descendants, the representatives of Na-

hor, remained (xxiv, 10; xxvii, 43; xxix, 4 sq.), while the two branches, represented by Abraham and Lot, the son of Haran, crossed the Euphrates and settled in Canaan and the adjacent districts (xii, 5). From Lot sprang the Moabites and Ammonites (xix, 30-38); from Abraham the Ishmaelites through his son Ishmael (xxv, 12), the Israelites through Isaac and Jacob, the Edomites through Isaac and Esau (ch. xxxvi), and certain Arab tribes, of whom the Midianites are the most conspicuous, through the sons of his concubine Keturah (xxv, 1-4).

The most important geographical question in connection with the Terachites concerns their original settlement. The presence of the Chaldees in Babylonia at a subsequent period of scriptural history has led to a supposition that they were a Hamitic people, originally belonging to Babylonia, and thence transplanted in the 7th and 8th centuries to Northern Assyria (Rawlinson, *Herod.* i, 319). Others think it more consistent with the general direction of the Terachite movement to look for Ur in Northern Mesopotamia, to the east of Haran. That the Chaldees, or, according to the Hebrew nomenclature, the Kasdim, were found in that neighborhood is indicated by the name Chesed as one of the sons of Nahor (Gen. xxii, 22), and possibly by the name Arphaxad itself, which, according to Ewald (*Gesch.* i, 378), means "fortress of the Chaldees." In classical times we find the Kasdim still occupying the mountains adjacent to Arrapachitis, the Biblical Arpachsad, under the names *Chaldæi* (Xenoph. *Anab.* iv, 3, 1-4) and *Gordyæi* or *Carduchi* (Strabo, xvi, 747), and here the name still has a vital existence under the form of *Kurd*. The name Kasdim is explained by Oppert as meaning "two rivers," and thus as equivalent to the Hebrew *Naharaim* and the classical *Mesopotamia* (*Zeit. d. morg. Ges.* xi, 137). We receive this explanation with reserve; but, so far as it goes, it favors the northern locality. The evidence for the antiquity of the southern settlement is lessened if the term *Kaldai* does not occur in the Assyrian inscriptions until the 9th century B.C. (Rawlinson, i, 449). But whether we conceive the original seat of the Chaldees to have been in the north or in the south, they moved along the course of the Tigris until they reached Babylon, where we find them dominant in the 7th century B.C. Whether they first entered this country as mercenaries, and then conquered their employers, as suggested by Renan (*Hist. Gén.* i, 68), must remain uncertain; but we think the suggestion supported by the circumstance that the name was afterwards transferred to the whole Babylonian population. The sacerdotal character of the Chaldees is certainly difficult to reconcile with this or any other hypothesis on the subject.

Returning to the Terachites, we find it impossible to define the geographical limits of their settlements with precision. They intermingled with the previously existing inhabitants of the countries intervening between the Red Sea and the Euphrates, and hence we find an Aram, an Uz, and a Chesed among the descendants of Nahor (Gen. xxii, 21, 22), a Dedan and a Sheba among those of Abraham by Keturah (xxv, 3), and an Amalek among the descendants of Esau (xxxvi, 12). Few of the numerous tribes which sprang from this stock attained historical celebrity. The Israelites must of course be excepted from this description; so, also, the Nabathæans, if they are to be regarded as represented by the Nebaioth of the Bible, as to which there is some doubt (Quatremère, *Mélanges*, p. 59). Of the rest, the Moabites, Ammonites, Midianites, and Edomites are chiefly known for their hostilities with the Israelites, to whom they were close neighbors. The memory of the westerly migration of the Israelites was perpetuated in the name Hebrew, as referring to their residence beyond the river Euphrates (Josh. xxiv, 3).

d. Besides the nations whose origin is accounted for in the Bible, we find other early populations mentioned in the course of the history without any notice of their

ethnology. In this category we may place the Horim, who occupied Edom before the descendants of Esau (Deut. ii, 12, 22); the Amalekites of the Sinaitic peninsula; the Zuzim and Zamzumim of Peræa (Gen. xiv, 5; Deut. ii, 20); the Rephaim of Bashan, and of the valley near Jerusalem named after them (Gen. xiv, 5; 2 Sam. v, 18); the Emim eastward of the Dead Sea (Gen. xiv, 5), the Avim of the southern Philistine plain (Deut. ii, 23); and the Anakim of Southern Palestine (Josh. xi, 21). The question arises whether these tribes were Hamites, or whether they represented an earlier population which preceded the entrance of the Hamites. The latter view is supported by Knobel, who regards the majority of these tribes as Shemites, who preceded the Canaanites, and communicated to them the Shemitic tongue (*Völkert.* p. 204, 315). No evidence can be adduced in support of this theory, which was probably suggested by the double difficulty of accounting for the name of Lud and of explaining the apparent anomaly of the Hamites and Terachites speaking the same language. Still less evidence is there in favor of the Turanian origin, which would, we presume, be assigned to these tribes in common with the Canaanites proper, in accordance with a current theory that the first wave of population which overspread Western Asia belonged to that branch of the human race (Rawlinson, *Herod.* i, 645, note). To this theory we shall presently advert; meanwhile, we can only observe, in reference to these fragmentary populations, that, as they intermingled with the Canaanites, they probably belonged to the same stock (comp. Numb. xiii, 22; Judg. i, 10). They may, perchance, have belonged to an earlier migration than the Canaanitish, and may have been subdued by the later comers; but this would not necessitate a different origin. The names of these tribes and of their abodes, as instanced in Gen. xiv, 5; Deut. ii, 23; Numb. xiii, 22, bear a Shemitic character (Ewald, *Gesch.* i, 311), and the only objection to their Canaanitish origin arising out of these names would be in connection with Zamzumim, which, according to Renan (*Hist. Gén.* p. 35, note), is formed on the same principle as the Greek *βαρβαρος*, and in this case implies, at all events, a dialectical difference.

(II.) Having thus surveyed the ethnological statements contained in the Bible, it remains for us to inquire how far they are based on, or accord with, physiological or linguistic principles. Knobel maintains that the threefold division of the Mosaic table is founded on the physiological principle of color, Shem, Ham, and Japheth representing respectively the red, black, and white complexions prevalent in the different regions of the then known world (*Völkert.* p. 11-13). He claims etymological support for this view in respect to Ham ("dark") and Japheth ("fair"), but not in respect to Shem; and he adduces testimony to the fact that such differences of color were noted in ancient times. The etymological argument weakens rather than sustains his view; for it is difficult to conceive that the principle of classification would be embodied in two of the names, and not also in the third: the force of such evidence is wholly dependent upon its uniformity. With regard to the actual prevalence of the hues, it is quite consistent with the physical character of the districts that the Hamites of the south should be dark, and the Japhethites of the north fair, and, further, that the Shemites should hold an intermediate place in color as in geographical position. But we have no evidence that this distinction was strongly marked. The "redness" expressed in the name Edom probably referred to the soil (Stanley, *Sin. and Pal.* p. 87): the *Erythræum Mare* was so called from a peculiarity in its own tint, arising from the presence of some vegetable substance, and not because the red Shemites bordered on it, the black Cushites being equally numerous on its shores: the name *Adam*, as applied to the Shemitic man, is ambiguous, from its reference to soil as well as color. On the other hand, the Phenicians (assuming them to have

reached the Mediterranean seaboard before the table (was compiled) were so called from their red hue, and yet are placed in the table among the Hamites. The argument drawn from the red hue of the Egyptian deity Typhon is of little value until it can be decisively proved that the deity in question represented the Shemites. This is asserted by Renan (*Hist. Gén.* i, 38), who endorses Knobel's view so far as the Shemites are concerned, though he does not accept his general theory.

The linguistic difficulties connected with the Mosaic table are very considerable, and we cannot pretend to unravel the tangled skein of conflicting opinions on the subject. The primary difficulty arises out of the Biblical narrative itself, and is consequently of old standing—the difficulty, namely, of accounting for the evident identity of language spoken by the Shemitic Terachites and the Hamitic Canaanites. Modern linguistic research has rather enhanced than removed this difficulty. The alternatives hitherto offered as satisfactory solutions—namely, that the Terachites adopted the language of the Canaanites, or the Canaanites that of the Terachites—are both inconsistent with the enlarged area which the language is found to cover on each side. Setting aside the question of the high improbability that a wandering nomadic tribe, such as the Terachites, would be able to impose its language on a settled and powerful nation like the Canaanites, it would still remain to be explained how the Cushites and other Hamitic tribes, who did not come into contact with the Terachites, acquired the same general type of language. On the other hand, assuming that what are called Shemitic languages were really Hamitic, we have to explain the extension of the Hamitic area over Mesopotamia and Assyria, which, according to the table and the general opinion of ethnologists, belonged wholly to a non-Hamitic population. A further question, moreover, arises out of this explanation, viz., What was the language of the Terachites before they assumed this Hamitic tongue? This question is answered by J. G. Müller, in Herzog's *Real-Encyclop.* xiv, 238, to the effect that the Shemites originally spoke an Indo-European language—a view which we do not expect to see generally adopted.

Restricting ourselves, for the present, to the linguistic question, we must draw attention to the fact that there is a well-defined Hamitic as well as a Shemitic class of languages, and that any theory which obliterates this distinction must fall to the ground. The Hamitic type is most highly developed, as we might expect, in the country which was, *par excellence*, the land of Ham, viz. Egypt; and whatever elements of original unity with the Shemitic type may be detected by philologists, practically the two were as distinct from each other in historical times as any two languages could possibly be. We are not therefore prepared at once to throw overboard the linguistic element of the Mosaic table. At the same time, we recognise the extreme difficulty of explaining the anomaly of Hamitic tribes speaking a Shemitic tongue. It will not suffice to say, in answer to this, that these tribes were Shemites; for again the correctness of the Mosaic table is vindicated by the differences of social and artistic culture which distinguish the Shemites proper from the Phœnicians and Cushites using a Shemitic tongue. The former are characterized by habits of simplicity, isolation, and adherence to patriarchal ways of living and thinking; the Phœnicians, on the other hand, were eminently a commercial people; and the Cushites are identified with the massive architectural erections of Babylonia and South Arabia, and with equally extended ideas of empire and social progress.

The real question at issue concerns the language, not of the whole Hamitic family, but of the Canaanites and Cushites. With regard to the former, various explanations have been offered—such as Knobel's, that they acquired a Shemitic language from a prior population, represented by the Rephaim, Zuzim, Zamzumim, etc. (*Völkert.* p. 315); or Bunsen's, that they were a Shemitic

race who had long sojourned in Egypt (*Phil. of Hist.* i, 191)—neither of which is satisfactory. With regard to the latter, the only explanation to be offered is that a Joktanid immigration supervened on the original Hamitic population, the result being a combination of Cushitic civilization with a Shemitic language (Renan, *Hist. Gén.* i, 322). Nor is it unimportant to mention that peculiarities have been discovered in the Cushite Shemitic of Southern Arabia which suggest a close affinity with the Phœnician forms (*ibid.* i, 318). We are not, however, without expectation that time and research will clear up much of the mystery that now enwraps the subject. There are two directions to which we may hopefully turn for light, namely, Egypt and Babylonia, with regard to each of which we make a few remarks.

1. That the Egyptian language exhibits many striking points of resemblance to the Shemitic type is acknowledged on all sides. It is also allowed that the resemblances are of a valuable character, being observable in the pronouns, numerals, in agglutinative forms, in the treatment of vowels, and other such points (Renan, *Hist. Gén.* i, 84, 85). There is not, however, an equal degree of agreement among scholars as to the deductions to be drawn from these resemblances. While many recognise in them the proofs of a substantial identity, and hence regard Hamitism as an early stage of Shemitism, others deny, either on general or on special grounds, the probability of such a connection. When we find such high authorities as Bunsen on the former side (*Phil. of Hist.* i, 186–189; ii, 3), and Renan (*Hist. Gén.* i, 86) on the other, not to mention a long array of scholars who have adopted each view, it would be presumption dogmatically to assert the correctness or incorrectness of either. We can only point to the possibility of the identity being established, and to the further possibility that connecting-links may be discovered between the two extremes, which may serve to bridge over the gulf, and to render the use of a Shemitic language by a Hamitic race less of an anomaly than it at present appears to be.

2. Turning eastward to the banks of the Tigris and Euphrates, and the adjacent countries, we find ample materials for research in the inscriptions recently discovered, the examination of which has not yet yielded undisputed results. The Mosaic table places a Shemitic population in Assyria and Elam, and a Cushitic one in Babylon. The probability of this being ethnically (as opposed to geographically) true depends partly on the age assigned to the table. There can be no question that at a late period Assyria and Elam were held by non-Shemitic, probably Aryan, conquerors. But if we carry the table back to the age of Abraham, the case may have been different; for though Elam is regarded as etymologically identical with Iran (Renan, *Hist. Gén.* i, 41), this is not conclusive as to the Iranian character of the language in early times. Sufficient evidence is afforded by language that the basis of the population in Assyria was Shemitic (*ibid.* i, 70; Knobel, p. 154–156); and it is by no means improbable that the inscriptions belonging more especially to the neighborhood of Susa may ultimately establish the fact of a Shemitic population in Elam. The presence of a Cushitic population in Babylon is an opinion very generally held on linguistic grounds; and a close identity is said to exist between the old Babylonian and the *Mahri* language, a Shemitic tongue of an ancient type still living in a district of Hadramaut, in Southern Arabia (Renan, *Hist. Gén.* i, 60). In addition to the Cushitic and Shemitic elements in the population of Babylonia and the adjacent districts, the presence of a Turanian element has been inferred from the linguistic character of the early inscriptions. We must here express our conviction that the ethnology of the countries in question is considerably clouded by the undefined use of the terms Turanian, Scythic, and the like. It is frequently difficult to decide whether these terms are used in a linguistic sense, as equivalent to *agglutinative*, or in an ethnic sense. The presence of a certain amount of

Turanianism in the former does not involve its presence in the latter sense. The old Babylonian and Susianian inscriptions may be more agglutinative than the later ones, but this is only a proof of their belonging to an earlier stage of the language, and does not of itself indicate a foreign population; and if these early Babylonian inscriptions graduate into the Shemitic, as is asserted even by the advocates of the Turanian theory (Rawlinson, *Herod.* i, 442, 445), the presence of an ethnic Turanianism cannot possibly be inferred. Added to this, it is inexplicable how the presence of a large Scythic population in the, Achaemenian period, to which many of the Susianian inscriptions belong, could escape the notice of historians. The only Scythic tribes noticed by Herodotus in his review of the Persian empire are the Parthians and the Sacæ, the former of whom are known to have lived in the north, while the latter probably lived in the extreme east, where a memorial of them is still supposed to exist in the name *Seistan*, representing the ancient Sacastene. Even with regard to these, Scythic may not mean Turanian; for they may have belonged to the Scythians of history (the Skolots), for whom an Indo-European origin is claimed (*ibid.* iii, 197). The impression conveyed by the supposed detection of so many heterogeneous elements in the old Babylonian tongue (*ibid.* i, 442, 444, 646, notes) is not favorable to the general results of the researches.

With regard to Arabia, it may safely be asserted that the Mosaic table is confirmed by modern research. The Cushitic element has left memorials of its presence in the south in the vast ruins of Mareh and Sana (Renan, *Hist. Gén.* i, 318), as well as in the influence it has exercised on the Himyaritic and Mahri languages, as compared with the Hebrew. The Joktanid element forms the basis of the Arabian population, the Shemitic character of whose language needs no proof. With regard to the Ishmaelite element in the north, we are not aware of any linguistic proof of its existence, but it is confirmed by the traditions of the Arabians themselves.

It remains to be inquired how far the Japhetic stock represents the linguistic characteristics of the Indo-European and Turanian families. Adopting the two-fold division of the former, suggested by the name itself, into the eastern and western; and subdividing the eastern into the Indian and Iranian, and the western into the Celtic, Hellenic, Illyrian, Italian, Teutonic, Slavonian, and Lithuanian classes, we are able to assign Madai (*Media*) and Togarmah (*Armenia*) to the Iranian class; Javan (*Ionian*) and Elishah (*Eolian*) to the Hellenic; Gomer conjecturally to the Celtic; and Dodanim, also conjecturally, to the Illyrian. According to the old interpreters, Ashkenaz represents the Teutonic class, while, according to Knobel, the Italian would be represented by Tarshish, whom he identifies with the Etruscans; the Slavonian by Magog; and the Lithuanian possibly by Tiras (*Völkert.* p. 68, 90, 130). The same writer also identifies Riphath with the Gauls, as distinct from the Cymry or Gomer (p. 45); while Kittim is referred by him not improbably to the Carians, who at one period were predominant on the islands adjacent to Asia Minor (p. 98). The evidence for these identifications varies in strength, but in no instance approaches to demonstration. Beyond the general probability that the main branches of the human family would be represented in the Mosaic table, we regard much that has been advanced on this subject as highly precarious. At the same time, it must be conceded that the subject is an open one; and that as there is no possibility of proving, so, also, there is none of disproving, the correctness of these conjectures. Whether the Turanian family is fairly represented in the Mosaic table may be doubted. Those who advocate the Mongolian origin of the Scythians would naturally regard Magog as the representative of this family; and even those who dissent from the Mongolian theory may still not unreasonably conceive that the title Magog applied broadly to all the nomad tribes

of Northern Asia, whether Indo-European or Turanian. Tubal and Meshech remain to be considered: Knobel identifies these respectively with the Iberians and the Ligurians (p. 111, 119); and if the Finnish character of the Basque language were established, he would regard the Iberians as certainly, and the Ligurians as probably, Turanians—the relics of the first wave of population which is supposed to have once overspread the whole of the European continent, and of which the Finns in the north, and the Basques in the south, are the sole surviving representatives. The Turanian character of the two Biblical races above mentioned has been otherwise maintained on the ground of the identity of the names Meshech and Muscovite (Rawlinson, *Herod.* i, 652).

(III.) Having thus reviewed the ethnic relations of the nations who fell within the circle of the Mosaic table, we propose to cast a glance beyond its limits, and inquire how far the present results of ethnological science support the general idea of the unity of the human race, which underlies the Mosaic system. The chief and in many instances the only instrument at our command for ascertaining the relationship of nations is language. In its general results this instrument is thoroughly trustworthy, and in each individual case to which it is applied it furnishes a strong *prima facie* evidence; but its evidence, if unsupported by collateral proofs, is not unimpeachable, in consequence of the numerous instances of adopted languages which have occurred within historical times. This drawback to the value of the evidence of language will not materially affect our present inquiry, inasmuch as we shall confine ourselves as much as possible to the general results.

The nomenclature of modern ethnology is not identical with that of the Bible, partly from the enlargement of the area, and partly from the general adoption of language as the basis of classification. The term Shemitic is indeed retained, not, however, to indicate a descent from Shem, but the use of languages allied to that which was current among the Israelites in historical times. Hamitic also finds a place in modern ethnology, but as subordinate to, or co-ordinate with, Shemitic. Japhetic is superseded mainly by Indo-European or Aryan. The various nations, or families of nations, which find no place under the Biblical titles are classed by certain ethnologists under the broad title of Turanian, while by others they are broken up into divisions more or less numerous.

1. The first branch of our subject will be to trace the extension of the Shemitic family beyond the limits assigned to it in the Bible. The most marked characteristic of this family, as compared with the Indo-European or Turanian, is its inelasticity. Hemmed in both by natural barriers and by the superior energy and expansiveness of the Aryan and Turanian races, it retains to the present day the *status quo* of early times. The only direction in which it has exhibited any tendency to expand has been about the shores of the Mediterranean, and even here its activity was of a sporadic character, limited to a single branch of the family, viz. the Phœnicians, and to a single phase of expansion, viz. commercial colonies. In Asia Minor we find tokens of Shemitic presence in Cilicia, which was connected with Phœnicia both by tradition (Herod. vii, 91) and by language, as attested by existing coins (Gesenius, *Mon. Phœn.* iii, 2); in Pamphylia, Pisidia, and Lycia, parts of which were occupied by the Solymi (Pliny, v, 24; Herod. i, 173), whose name bears a Shemitic character, and who are reported to have spoken a Shemitic tongue (Eusebius, *Prep. Ev.* ix, 9), a statement confirmed by the occurrence of other Shemitic names, such as Phœnix and Cabalia, though the subsequent predominance of an Aryan population in these same districts is attested by the existing Lycian inscriptions, again in Caria, though the evidence arising out of the supposed identity of the names of the gods Osogo and Chrysaoreus with the *Ὀσωος* and *Χρυσάωρ* of Sanchoni-

athon is called in question (Renan, *Hist. Gén.* i, 49); and, lastly, in Lydia, where the descendants of Lud are located by many authorities, and where the prevalence of a Shemitic language is asserted by scholars of the highest standing, among whom we may specify Bunsen and Lassen, in spite of tokens of the contemporaneous presence of the Aryan element, as instanced in the name Sardis, and in spite, also, of the historical notices of an ethnical connection with Mysia (Herod. i, 171). Whether the Shemites ever occupied any portion of the plateau of Asia Minor may be doubted. In the opinion of the ancients the later occupants of Cappadocia were Syrians, distinguished from the mass of their race by a lighter hue, and hence termed *Leucoryi* (Strabo, xii, 542); but this statement is traversed by the evidences of Aryanism afforded by the names of the kings and deities, as well as by the Persian character of the religion (*ibid.* xv, 733). If, therefore, the Shemites ever occupied this district, they must soon have been brought under the dominion of Aryan conquerors (Diefenbach, *Orig. Europ.* p. 44). The Phœnicians were ubiquitous on the islands and shores of the Mediterranean: in Cyprus, where they have left tokens of their presence at Citium and other places; in Crete; in Malta, where they were the original settlers (Diod. Sic. v, 12); on the mainland of Greece, where their presence is betokened by the name Cadmus; in Samos, Same, and Samothrace, which bear Shemitic names; in Ios and Tenedos, once known by the name of Phœnicia; in Sicily, where Panormus, Motya, and Solœis were Shemitic settlements; in Sardinia (*ibid.* v, 35); on the eastern and southern coasts of Spain; and on the north coast of Africa, which was lined with Phœnician colonies from the Syrtis Major to the Pillars of Hercules. They must also have penetrated deeply into the interior, to judge from Strabo's statement of the destruction of three hundred towns by the Pharusians and Nigritians (Strabo, xvii, 826). Still, in none of the countries we have mentioned did they supplant the original population; they were conquerors and settlers, but no more than this.

The bulk of the North African languages, both in ancient and modern times, though not Shemitic in the proper sense of the term, so far resemble that type as to have obtained the title of sub-Shemitic. In the north the old Numidian language appears, from the prevalence of the syllable *Mus* in the name *Massylii*, etc., to be allied to the modern Berber; and the same conclusion has been drawn with regard to the Libyan tongue. The Berber, in turn, together with the Touarick and the great body of the North African dialects, is closely allied to the Coptic of Egypt, and therefore falls under the title of Hamitic, or, according to the more usual nomenclature, sub-Shemitic (Renan, *Hist. Gén.* i, 201, 202). Southward of Egypt the Shemitic type is reproduced in the majority of the Abyssinian languages, particularly in the Gheez, and in a less marked degree in the Amharic, the Saho, and the Galla; and Shemitic influence may be traced along the whole east coast of Africa as far as Mozambique (*ibid.* i, 336-340). As to the languages of the interior and of the south, there appears to be a conflict of opinions, the writer from whom we have just quoted denying any trace of resemblance to the Shemitic type, while Dr. Latham asserts very confidently that connecting-links exist between the sub-Shemitic languages of the north, the Negro languages in the centre, and the Caffre languages of the south; and that even the Hottentot language is not so isolated as has generally been supposed (*Man and his Migrat.* p. 134-148). Bunsen supports this view so far as the languages north of the equator are concerned, but regards the southern as rather approximating to the Turanian type (*Phil. of Hist.* i, 178; ii, 20). It is impossible as yet to form a decided opinion on this large subject.

A question of considerable interest remains yet to be noticed, namely, whether we can trace the Shemitic family back to its original cradle. In the case of the Indo-

European family this can be done with a high degree of probability; and if an original unity existed between these stocks, the domicile of the one would necessarily be that of the other. A certain community of ideas and traditions favors this assumption, and possibly the frequent allusions to the east in the early chapters of Genesis may contain a reminiscence of the direction in which the primeval abode lay (Renan, *Hist. Gén.* i, 476). The position of this abode we shall describe presently.

2. The Indo-European family of languages, as at present constituted, consists of the following nine classes: Indian, Iranian, Celtic, Italian, Albanian, Greek, Teutonic, Lithuanian, and Slavonian. Geographically, these classes may be grouped together in two divisions, Eastern and Western; the former comprising the first two, the latter the seven remaining classes. Schleicher divides what we have termed the Western into two, the South-west European and the North European; in the former of which he places the Greek, Albanian, Italian, and Celtic; in the latter, the Slavonian, Lithuanian, and Teutonic (*Compend.* i, 5). Prof. M. Müller combines the Slavonian and Lithuanian classes in the Windic, thus reducing the number to eight. These classes exhibit various degrees of affinity to each other, which are described by Schleicher in the following manner: The earliest deviation from the common language of the family was effected by the Slavono-Teutonic branch. After another interval a second bifurcation occurred, which separated what we may term the Græco-Italo-Celtic branch from the Aryan. The former held together for a while, and then threw off the Greek (including probably the Albanian), leaving the Celtic and Italian still connected: the final division of the latter two took place after another considerable interval. The first-mentioned branch — the Slavono-Teutonic — remained intact for a period somewhat longer than that which witnessed the second bifurcation of the original stock, and then divided into the Teutonic and Slavono-Lithuanian, which latter finally broke up into its two component elements. The Aryan branch similarly held together for a lengthened period, and then bifurcated into the Indian and Iranian. The conclusion Schleicher draws from these linguistic affinities is that the more easterly of the European nations, the Slavonians and Teutons, were the first to leave the common home of the Indo-European race; that they were followed by the Celts, Italians, and Greeks; and that the Indian and Iranian branches were the last to commence their migrations. We feel unable to accept this conclusion, which appears to us to be based on the assumption that the antiquity of a language is to be measured by its approximation to Sanscrit. Looking at the geographical position of the representatives of the different language-classes, we should infer that the most westerly were the earliest immigrants into Europe, and therefore probably the earliest emigrants from the primeval seat of the race; and we believe this to be confirmed by linguistic proofs of the high antiquity of the Celtic as compared with the other branches of the Indo-European family (Bunsen, *Phil. of Hist.* i, 168).

The original seat of the Indo-European race was on the plateau of Central Asia, probably to the westward of the Bolor and Mustagh ranges. The Indian branch can be traced back to the slopes of Himalaya by the geographical allusions in the Vedic hymns (Müller, *Lectures*, p. 201); in confirmation of which we may adduce the circumstance that the sole tree for which the Indians have an appellation in common with the western nations is one which in India is found only on the southern slope of that range (Pott, *Etym. Forsch.* i, 110). The westward progress of the Iranian tribes is a matter of history, and though we cannot trace this progress back to its fountain-head, the locality above mentioned best accords with the traditional belief of the Asiatic Aryans and with the physical and geographical requirements of the case (Renan, *Hist. Gén.* i, 481).

The routes by which the various western branches

reached their respective localities can only be conjectured. We may suppose them to have successively crossed the plateau of Iran until they reached Armenia, whence they might follow either a northerly course across Caucasus, and by the shore of the Black Sea, or a direct westerly one along the plateau of Asia Minor, which seems destined by nature to be the bridge between the two continents of Europe and Asia. A third route has been surmised for a portion of the Celtic stock, viz. along the north coast of Africa, and across the Straits of Gibraltar into Spain (Bunsen, *Phil. of Hist.* i, 148); but we see little confirmation of this opinion beyond the fact of the early presence of the Celts in that peninsula, which is certainly difficult to account for.

The æras of the several migrations are again very much a matter of conjecture. The original movements belong, for the most part, to the ante-historical age, and we can do no more than note the period at which we first encounter the several nations. That the Indian Aryans had reached the mouth of the Indus at all events before B.C. 1000 appears from the Sanscrit names of the articles which Solomon imported from that country. See INDIA. The presence of Aryans on the Shemitic frontier is as old as the composition of the Mosaic table; and, according to some authorities, is proved by the names of the confederate kings in the age of Abraham (Gen. xiv, 1; Renan, *Hist. Gén.* i, 61). The Aryan Medes are mentioned in the Assyrian annals about B.C. 900. The Greeks were settled on the peninsula named after them, as well as on the islands of the Ægean, long before the dawn of history, and the Italians had reached their quarters at a yet earlier period. The Celts had reached the west of Europe at all events before, probably very long before, the age of Hecateus (B.C. 500); the latest branch of this stock arrived there about that period, according to Bunsen's conjecture (*Phil. of Hist.* i, 152). The Teutonic migration followed at a long interval after the Celtic: Pytheas found them already seated on the shores of the Baltic in the age of Alexander the Great (Pliny, xxxvii, 11), and the term *gleum* itself, by which amber was described in that district, belongs to them (Diefenbach, *Orig. Europ.* p. 359). The earliest historical notice of them depends on the view taken of the nationality of the Teutones, who accompanied the Cimbri on their southern expedition in B.C. 113–102. If these were Celtic, as is not uncommonly thought, then we must look to Cæsar and Tacitus for the earliest definite notices of the Teutonic tribes. The Slavonian immigration was nearly contemporaneous with the Teutonic (Bunsen, *Phil. of Hist.* i, 72): this stock can be traced back to the *Veneti* or *Venedæ* of Northern Germany, first mentioned by Tacitus (*Germ.* 46), from whom the name *Wend* is probably descended. The designation of *Slavi* or *Sclavi* is of comparatively late date, and applied specially to the western branch of the Slavonian stock. The Lithuanians are probably represented by the *Galindæ* and *Sudeni* of Ptolemy (iii, 5, 21), the names of which tribes have been preserved in all ages in the Lithuanian district (Diefenbach, p. 202). They are frequently identified with the *Æstui*, and it is not impossible that they may have adopted the title, which was a geographical one (= the *east* men): the *Æstui* of Tacitus, however, were Germans. In the above statements we have omitted the problematical identifications of the Northern stocks with the earlier nations of history: we may here mention that the Slavonians are not unfrequently regarded as the representatives of the Scythians (Skolots) and the Sarmatians (Knobel, *Völkert.* p. 69). The writer whom we have just cited also endeavors to connect the Lithuanians with the Agathyrsi (p. 130). So, again, Grimm traced the Teutonic stock to the Getæ, whom he identified with the Goths (*Gesch. d. deutsch. Spr.* i, 178).

It may be asked whether the Aryan race were the first-comers in the lands which they occupied in historical times, or whether they superseded an earlier population. With regard to the Indian branch this ques-

tion can be answered decisively: the vestiges of an aboriginal population, which once covered the plains of Hindostan, still exist in the southern extremity of the peninsula, as well as in isolated localities elsewhere, as instanced in the case of the Brahms of the North. Not only this, but the Indian class of languages possesses a peculiarity of sound (the lingual or cerebral consonants) which is supposed to have been derived from this population and to betoken a fusion of the conquerors and the conquered (Schleicher, *Compend.* i, 141). The languages of this early population are classed as Turanian (Müller, *Lect.* p. 399). We are unable to find decided traces of Turanians on the plateau of Iran. The Sacæ, of whom we have already spoken, were Scythians, and so were the Parthians, both by reputed descent (Justin, xli, 1) and by habits of life (Strabo, xi, 515); but we cannot positively assert that they were Turanians, inasmuch as the term Scythian was also applied, as in the case of the Skolots, to Indo-Europeans. In the Caucasian district the Iberians and others may have been Turanian in early as in later times; but it is difficult to unravel the entanglement of races and languages in that district. In Europe there exists in the present day an undoubted Turanian population eastward of the Baltic, viz. the Finns, who have been located there certainly since the time of Tacitus (*Germ.* 46), and who probably at an earlier period had spread more to the southward, but had been gradually thrust back by the advance of the Teutonic and Slavonian nations (Diefenbach, *Orig. Europ.* p. 209). There exists, again, in the South a population whose language (the *Basque*, or, as it is entitled in its own land, the *Euskara*) presents numerous points of affinity to the Finnish in grammar, though its vocabulary is wholly distinct. We cannot consider the Turanian character of this language as fully established, and we are therefore unable to divine the ethnic affinities of the early Iberians, who are generally regarded as the progenitors of the Basques. We have already adverted to the theory that the Finns in the North and the Basques in the South are the surviving monuments of a Turanian population which over-spread the whole of Europe before the arrival of the Indo-Europeans. This is a mere theory which can neither be proved nor disproved.

It would be difficult, if not impossible, to assign to the various subdivisions of the Indo-European stock their respective areas, or, where admixture has taken place, their relative proportions. Language and race are, as already observed, by no means coextensive. The Celtic race, for instance, which occupied Gaul, Northern Italy, large portions of Spain and Germany, and even penetrated across the Hellespont into Asia Minor, where it gave name to the province of Galatia, is now represented linguistically by the insignificant populations among whom the Welsh and the Gaelic or Erse languages retain a lingering existence. The Italian race, on the other hand, which must have been well-nigh annihilated by, or absorbed in, the overwhelming masses of the Northern hordes, has imposed its language outside the bounds of Italy over the peninsula of Spain, France, and Wallachia. But, while the races have so intermingled as in many instances to lose all trace of their original individuality, the broad fact of their descent from one or other of the branches of the Indo-European family remains unaffected. It is, indeed, impossible to affiliate all the nations whose names appear on the roll of history to the existing divisions of that family, in consequence of the absence or the obscurity of ethnological criteria. Where, for instance, shall we place the languages of Asia Minor and the adjacent districts? The Phrygian approximates perhaps to the Greek, and yet it differs from it materially both in form and vocabulary (Rawlinson, *Herod.* i, 666); still more is this the case with the Lycian, which appears to possess a vocabulary wholly distinct from its kindred languages (*ibid.* i, 669, 677–679). The Armenian is ranged under the Iranian division; yet this, as well as the lan-

guage of the Caucasian Ossetes, whose indigenous name of *Ir* or *Iron* seems to vindicate for them the same relationship, is so distinctive in its features as to render the connection dubious. The languages prevalent in the mountainous district answering to the ancient Pontus are equally peculiar (Diefenbach, *Orig. Europ.* p. 51). Passing to the westward, we encounter the Thracians, reputed by Herodotus (v, 3) the most powerful nation in the world, the Indians excepted; yet but one word of their language (*bria* = "town") has survived, and all historical traces of the people have been obliterated. It is true that they are represented in later times by the Getæ, and these in turn by the Daci; but neither of these can be tracked either by history or language, unless we accept Grimm's more than doubtful identification which would connect them with the Teutonic branch. The remains of the Scythian language are sufficient to establish the Indo-European affinities of that nation (Rawlinson, *Herod.* iii, 196-203), but insufficient to assign to it a definite place in the family. The Scythians, as well as most of the nomad tribes associated with them, are lost to the eye of the ethnologist, having been either absorbed into other nationalities or swept away by the ravages of war. The Sarmatæ can be traced down to the Iazyges of Hungary and Podlachia, in which latter district they survived until the 10th century of our æra (Smith, *Dict. of Geog.* ii, 8), and then they also vanish. The Albanian language presents a problem of a different kind: materials for research are not wanting in this case, but no definite conclusions have as yet been drawn from them. The people who use this tongue (the *Skipeetes*, as they call themselves) are generally regarded as the representatives of the old Illyrians, who in turn appear to have been closely connected with the Thracians (Strabo, vii, 315; Justin, xi, 1), the name Dardani being found both in Illyria and on the shores of the Hellespont; it is not, therefore, improbable that the Albanian may contain whatever vestiges of the old Thracian tongue still survive (Diefenbach, *Orig. Europ.* p. 68). In the Italic peninsula the Etruscan tongue remains as great an enigma as ever: its Indo-European character is supposed to be established, together with the probability of its being a mixed language (Bunsen, *Phil. of Hist.* i, 85-88). The result of researches into the Umbrian language, as represented in the Etruscan tablets, the earliest of which date from about B.C. 400; into the Sabellian, as represented in the tablets of Velletri and Antino; and into the Oscan, of which the remains are numerous, have decided their position as members of the Italic class (*ibid.* i, 90-94). The same cannot be asserted of the Mesapian or Iapygian language, which stands apart from all neighboring dialects. Its Indo-European character is affirmed, but no ethnological conclusion can as yet be drawn from the scanty information afforded us (*ibid.* i, 94). Lastly, within the Celtic area there are ethnological problems which we cannot pretend to solve. The Ligurians, for instance, present one of these problems: were they Celts, but belonging to an earlier migration than the Celts of history? Their name has been referred to a Welsh original, but on this no great reliance can be placed, as it would be in this case a local (= *coastmen*) and not an ethnical title, and might have been imposed on them by the Celts. They evidently hold a posterior place to the Iberians, inasmuch as they are said to have driven a section of this people across the Alps into Italy. That they were distinct from the Celts is asserted by Strabo (ii, 128), but the distinction may have been no greater than exists between the British and the Gaelic branches of that race. The admixture of the Celts and Iberians in the Spanish peninsula is again a somewhat intricate question, which Dr. Latham attempts to explain on the ground that the term Celt (*Κέλται*) really meant Iberian (*Ethn. of Eur.* p. 35). That such questions as these should arise on a subject which carries us back to times of hoar antiquity forms no ground for doubting the general conclusion

that we can account ethnologically for the population of the European continent.

3. The Shemitic and Indo-European families cover, after all, but an insignificant portion of the earth's surface: the large areas of Northern and Eastern Asia, the numerous groups of islands that line its coast and stud the Pacific in the direction of South America, and, again, the immense continent of America itself, stretching well-nigh from pole to pole, remain to be accounted for. Historical aid is almost wholly denied to the ethnologist in his researches in these quarters; physiology and language are his only guides. It can hardly, therefore, be matter of surprise if we are unable to obtain certainty, or even a reasonable degree of probability, on this part of our subject. Much has been done; but far more remains to be done before the data for forming a conclusive opinion can be obtained. In Asia the languages fall into two large classes—the monosyllabic and the agglutinative. The former are represented ethnologically by the Chinese, the latter by the various nations classed together by Prof. M. Müller under the common head of Turanian. It is unnecessary for us to discuss the correctness of his view in regarding all these nations as members of one and the same family. Whether we accept or reject his theory, the fact of a gradation of linguistic types and of connecting-links between the various branches remains unaffected, and for our present purpose the question is of comparatively little moment. The monosyllabic type apparently betokens the earliest movement from the common home of the human race, and we should therefore assign a chronological priority to the settlement of the Chinese in the east and south-east of the continent. The agglutinative languages fall geographically into two divisions, a Northern and Southern. The Northern consists of a well-defined group, or family, designated by German ethnologists the Ural-Altaian. It consists of the following five branches: (1.) The Tungusian, covering a large area, east of the river Yenisei, between Lake Baikal and the Tunguska. (2.) The Mongolian, which prevails over the Great Desert of Gobi, and among the Kalmucks, wherever their nomad habits lead them on the steppes either of Asia or Europe, in the latter of which they are found about the lower course of the Volga. (3.) The Turkish, covering an immense area from the Mediterranean in the south-west to the river Lena in the north-east; in Europe spoken by the Osmanli, who form the governing class in Turkey; by the Nogai, between the Caspian and the Sea of Azof; and by various Caucasian tribes. (4.) The Samoidic, on the coast of the Arctic Ocean, between the White Sea in the west and the river Anabara in the east. (5.) The Finnish, which is spoken by the Finns and Lapps; by the inhabitants of Esthonia and Livonia to the south of the Gulf of Finland; by various tribes about the Volga (the Tcheremissians and Mordvinians) and the Kama (the Votiakes and Permians); and, lastly, by the Magyars of Hungary. The Southern branch is subdivided into the following four classes: (1.) The Tamulian, of the south of Hindostan. (2.) The Bhotiya, of Tibet, the sub-Himalayan district (Nepaul and Bhotan), and the Lohitic languages east of the Brahmapootra. (3.) The Tai, in Siam, Laos, Anam, and Pegu. (4.) The Malay, of the Malay peninsula, and the adjacent islands; the latter being the original settlement of the Malay race, whence they spread in comparatively modern times to the mainland.

The early movements of the races representing these several divisions can only be divined by linguistic tokens. Prof. M. Müller assigns to the Northern tribes the following chronological order: Tungusian, Mongolian, Turkish, and Finnish; and to the Southern division the following: Tai, Malay, Bhotiya, and Tamulian (*Phil. of Hist.* i, 481). Geographically it appears more likely that the Malay preceded the Tai, inasmuch as they occupied a more southerly district. The later movements of the European branches of the Northern division can be traced historically. The Turkish race

commenced their westerly migration from the neighborhood of the Altai range in the 1st century of our æra; in the 6th they had reached the Caspian and the Volga; in the 11th and 12th the Turcomans took possession of their present quarters south of Caucasus; in the 13th the Osmanli made their first appearance in Western Asia; about the middle of the 14th they crossed from Asia Minor into Europe; and in the middle of the 15th they had established themselves at Constantinople. The Finnish race is supposed to have been originally settled about the Ural range, and thence to have migrated westward to the shores of the Baltic, which they had reached at a period anterior to the Christian æra; in the 7th century a branch pressed southward to the Danube, and founded the kingdom of Bulgaria, where, however, they have long ceased to have any national existence. The Ugrian tribes, who are the early representatives of the Hungarian Magyars, approached Europe from Asia in the 5th and settled in Hungary in the 9th century of our æra. The central point from which the various branches of the Turanian family radiated would appear to be about Lake Baikal. With regard to the ethnology of Oceania and America we can say but little. The languages of the former are generally supposed to be connected with the Malay class (Bunsen, *Phil. of Hist.* ii, 114); but the relations, both linguistic and ethnological, existing between the Malay and the black, or Negrito, population, which is found on many of the groups of islands, are not well defined. The approximation in language is far greater than in physiology (Latham, *Essays*, p. 213, 218; Garnett, *Essays*, p. 310), and in certain cases amounts to identity (Kennedy, *Essays*, p. 85); but the whole subject is at present involved in obscurity. The polysynthetic languages of North America are regarded as emanating from the Mongolian stock (Bunsen, *Phil. of Hist.* ii, 111), and a close affinity is said to exist between the North American and the Kamtchadale and Corean languages on the opposite coast of Asia (Latham, *Man and his Migrant*, p. 185). The conclusion drawn from this would be that the population of America entered by way of Behring's Strait. Other theories have, however, been broached on this subject. It has been conjectured that the chain of islands which stretches across the Pacific may have conducted a Malay population to South America; and, again, an African origin has been claimed for the Caribs of Central America (Kennedy, *Essays*, p. 100-123). In conclusion, we may safely assert that the tendency of all ethnological and linguistic research is to discover the elements of unity amid the most striking external varieties. Already the myriads of the human race are massed together into a few large groups. Whether it will ever be possible to go beyond this, and to show the historical unity of these groups, is more than we can undertake to say. But we entertain the firm persuasion that in their broad results these sciences will yield an increasing testimony to the truth of the Bible.

See ETHNOLOGY.

TONGUES OF FIRE. In the account of the first descent of the Holy Spirit upon the apostles, it is stated (Acts ii, 3) that "there appeared unto them *cloven tongues as of fire* (δαμνηζόμεναι γλώσσαι ὡσεὶ πυρός), and it sat upon each of them." "They were appearances of tongues, which were luminous, but did not burn; not confluent into one, but distributing them-

selves on the assembled. As only *similar* to fire, they bore an analogy to *electric* phenomena; their tongue-like shape referred as a sign to that miraculous speaking which ensued immediately after, and the fire-like form to the divine presence (comp. Ezek. iii, 2), which was here operative in a manner so entirely peculiar. The whole phenomenon is here to be understood as a miraculous operation of God manifesting himself in the Spirit, by which, as by a preceding sound from heaven, the effusion of the Spirit was made known as *divine*, and his efficacy in the minds of those who were to receive him was enhanced" (Meyer, *ad loc.*). See THILLO, *De Linguis Ignitis* (Viteb. 1675). See FIRE; TONGUE.

TONGUES, GIFT OF. This was an endowment first imparted to the apostles, and apparently to all the assembled disciples, on the day of Pentecost, and afterwards continued to the Christians during the apostolic age. John the Baptist, himself a burning and a shining light, had testified of Christ, "He that cometh after me is mightier than I, whose shoes I am not worthy to bear: he shall baptize you with the Holy Ghost and with fire." After Jesus had been crucified, and before he ascended, he breathed on his disciples and said, "Receive ye the Holy Ghost." The influence so communicated must have been precious, but it was only the earnest of the inheritance, and not the entire fulfilment of John's prediction. By their secular views of the Messiah's sovereignty the disciples showed that they had not yet been favored with the full baptism of the Spirit. "When they were come together, they asked of him, saying, Wilt thou at this time restore again the kingdom to Israel?" This question implied entire confidence in the power of Christ, but it evinced no clear conceptions of the spirituality of his reign. Fifty days after the crucifixion the promise of the Father had its accomplishment, and the disciples received a special power when the Holy Ghost came upon them. Why was hope so long deferred? There was wisdom in this delay, as indicating divine presidency and direction in the ordering of the event. If the apostles were to be excited and bestirred merely by the dire experience they had passed through, the effect on natural principles should have been speedily consequent on the cause. Procrastination was calculated to sober tumultuous passion, and to restrain imperilling enterprise. In this view the descent of the Spirit received confirmation from occurring after a considerable interval of tranquillity and inaction. The specific day had also its significance. Pentecost was the feast of first-fruits, the commencement and the consecration of the harvest; and it formed, therefore, the fitting moment for the formal introduction of that work of the Spirit by which was to be secured the spiritual harvest of Christ's finished work. It had also come to be regarded as commemorative of the giving of the law from Sinai—the magnificent initiation of the Mosaic economy—and the period of the latter event must certainly have coincided very nearly, if not absolutely, with that of the other (Exod. xix, 11). Then God spake, and the mountain burned with fire. The season so regarded was suitable for the introduction of another and related æra, the inauguration of the Gospel economy: and anew God reveals himself by analogous manifestations. "Suddenly there came a sound from heaven as of a rushing mighty wind, and it filled all the house where they were sitting." This sound resembled the roar of the tempest; but instead of proceeding from any point of the compass, it descended from heaven. Here, as in the wilderness, was the voice of God, a voice full of majesty. "And there appeared unto them cloven tongues like as of fire, and it sat upon each of them." Here we have the fiery attribute of Sinai. But now it takes the form of tongues, to denote that God while speaking was endowing with speech, and that his voice like echoing thunder would multiply itself through the reverberating media on which it fell. The tongues were cloven, but into what number of divisions we are not informed. As happens with the variable flames of

as furnace, the gleaming points may have been unequally numerous. No one had all tongues in his gift; perhaps no two the same tongues, but in every case there was a plurality. The general subject has already been considered under HOLY SPIRIT, BAPTISM OF, and certain aspects of it under the foregoing heading, and under SPIRITUAL GIFTS. We here give (in addition to particulars elsewhere treated) a more detailed view of the linguistic phenomenon involved.

I. *Philological Interpretations of the Term*.—Γλῶττα, or γλῶσσα, the word employed throughout the New Test. for the gift now under consideration, is used in three senses [see TONGUE], each of which might be the starting-point for the application of the word to the gift of tongues, and each accordingly has found those who have maintained that it is so.

1. It primarily and literally signifies the bodily organ of speech. Eichhorn and Bardili (cited by Bleek, *Stud. u. Krit.* 1829, p. 8 sq.), and to some extent Bunsen (*Hippolytus*, i, 9), starting from this signification, see in the so-called gift an inarticulate utterance, the cry as of a brute creature, in which the tongue moves while the lips refuse their office in making the sounds definite and distinct.

This interpretation, it is believed, does not meet the condition of answering any of the facts of the New Test., and errs in ignoring the more prominent meaning of the word in later Greek.

2. The term γλῶσσα may stand for the use of foreign words, imported and half naturalized in Greek (Aristotle, *Rhet.* iii, 2, 14), a meaning which the words "gloss" and "glossary" preserve for us. Bleek himself (*ut sup.* p. 33) adopts this second meaning, and gives an interesting collection of passages to prove that it was, in the time of the New Test., the received sense. He infers from this that to speak in tongues was to use unusual, poetic language; that the speakers were in a high-wrought excitement which showed itself in mystic, figurative terms. In this view he had been preceded by Ernesti (*Opusc. Theolog.*; see *Morning Watch*, iv, 101) and Herder (*Die Gabe der Sprache*, p. 47, 70), the latter of whom extends the meaning to special mystical interpretations of the Old Test.

This interpretation, however, though true in some of its conclusions, and able, so far as they are concerned, to support itself by the authority of Augustine (comp. *De Gen. ad lit.* xii, 8, "Linguan esse cum quis loquatur obscuras et mysticas significationes"), appears faulty, as failing (1) to recognise the fact that the sense of the word in the New Test. was more likely to be determined by that which it bore in the Sept. than by its meaning in Greek historians or rhetoricians, and (2) to meet the phenomena of Acts ii.

3. The word γλῶσσα, in Hellenistic Greek, after the pattern of the corresponding Hebrew word (לשׁוֹן), stands for "speech" or "language" (Gen. x, 5; Dan. i, 4, etc.). The received traditional view starts from this meaning, and sees in the gift of tongues a distinctly linguistic power. It commends itself, as in this respect starting at least from the right point, and likely to lead us to the truth (comp. Olshausen, *Stud. u. Krit.* 1829, p. 538). Variations as well as objections and difficulties arising from this interpretation will be considered below.

II. *History and Explanation of the Biblical Occurrences*.—The principal passages from which we have to draw our conclusion as to the nature and purpose of the gift in question are (1) Mark xvi, 17; (2) Acts ii, 1-13; x, 46; xix, 6; (3) 1 Cor. xii, xiv. Besides these, we may derive some light from later allusions incidentally made to these phenomena. We here consider them in their chronological order, with such inferences as are suggested by them.

1. The promise of a new power coming from the Divine Spirit, giving not only comfort and insight into truth, but fresh powers of utterance of some kind, appears once and again in our Lord's teaching. The disciples are to take no thought what they shall speak, for

the Spirit of their Father shall speak in them (Matt. x, 19, 20; Mark xiii, 11). The lips of Galilean peasants are to speak freely and boldly before kings. The only condition is that they are "not to premeditate"—to yield themselves altogether to the power that works on them. Thus they shall have given to them "a mouth and wisdom" which no adversary shall be able "to gain-say or resist." In Mark xvi, 17 we have a more definite term employed: "They shall speak with new tongues" (καινὰ γλῶσσας). It can hardly be questioned that the obvious meaning of the promise is that the disciples should speak in new languages which they had not learned as other men learn them. The promise itself, however, determines little definite as to the nature of the gift or the purpose for which it was to be employed. It was to be a "sign." It was not to belong to a chosen few only—to apostles and evangelists. It was to "follow them that believed"—to be among the fruits of the living intense faith which raised men above the common level of their lives, and brought them within the kingdom of God.

2. The wonder of the day of Pentecost (Acts ii, 1-13) is, in its broad features, familiar enough to us. The days since the ascension had been spent as in a ceaseless ecstasy of worship (Luke xxiv, 53). The one hundred and twenty disciples were gathered together, waiting with eager expectation for the coming of power from on high—of the Spirit that was to give them new gifts of utterance. The day of Pentecost had come, which they, like all other Israelites, looked upon as the witness of the revelation of the Divine Will given on Sinai. Suddenly there swept over them "the sound as of a rushing mighty wind," such as Ezekiel had heard in the visions of God by Chebar (Ezek. i, 24; xliii, 2), at all times the recognised symbol of a spiritual creative power (comp. xxxvii, 1-14; Gen. i, 2; 1 Kings xix, 11; 2 Chron. v, 14; Psa. civ, 3, 4). With this there was another sign associated even more closely with their thoughts of the day of Pentecost. There appeared unto them "tongues like as of fire." Of old the brightness had been seen gleaming through the "thick cloud" (Exod. xix, 18) or "enfolding" the divine glory (Ezek. i, 4). Now the tongues were distributed (διεμερίζονται), lighting upon each of them. The outward symbol was accompanied by an inward change. They were "filled with the Holy Spirit," as the Baptist and their Lord had been (Luke i, 15; iv, 1), though they themselves had as yet no experience of a like kind. "They began to speak with other tongues as the Spirit gave them utterance." The narrative that follows leaves hardly any room for doubt that the writer meant to convey the impression that the disciples were heard to speak in languages of which they had no colloquial knowledge previously. The direct statement, "They heard them speaking, each man in his own dialect," the long list of nations, the words put into the lips of the hearers—these can scarcely be reconciled with the theories of Bleek, Herder, and Bunsen without a wilful distortion of the evidence.

Having thus recited the facts in this case, we inquire, What view are we to take of a phenomenon so marvellous and exceptional? Let us first consider what views men have actually taken.

(1.) The prevalent belief of the Church has been that in the Pentecostal gift the disciples received a supernatural knowledge of all such languages as they needed for their work as evangelists. The knowledge was permanent, and could be used at their own will, as if it had been acquired in the common order of things. With this they went forth to preach to the nations. Differences of opinion are found as to special points. Augustine thought that each disciple spoke in all languages (*De Verb. Apost.* clxxv, 3); Chrysostom that each had a special language assigned to him, and that this was the indication of the country which he was called to evangelize (*Hom. in Act. ii*). Some thought that the number of languages spoken was seventy or seven-

ty-five, after the number of the sons of Noah (Gen. x) or the sons of Jacob (ch. xvi), or one hundred and twenty, after that of the disciples (comp. Baronius, *Annal.* i, 197). Most were agreed in seeing in the Pentecostal gift the antithesis to the confusion of tongues at Babel, the witness of a restored unity. "Pena linguarum dispersit homines, donum linguarum dispersos in unum populum collegit" (Grotius, *ad loc.*).

We notice incidentally that parallels have been sought in Israelitish history. For example, there had been, it was said, tongues of fire on the original Pentecost (Schneckenburger, *Beiträge*, p. 8, referring to Buxtorf, *De Synag.*, and Philo, *De Decal.*). The later rabbins were not without their legends of a like "baptism of fire." Nicodemus ben-Gorion and Jochanan ben-Zachai, men of great holiness and wisdom, went into an upper chamber to expound the law, and the house began to be full of fire (Lightfoot, *Harm.* iii, 14; Schöttgen, *Hor. Heb. in Act. ii*). Again, with regard to the more important phenomenon, it deserves notice that there are analogies in Jewish belief. Every word that went forth from the mouth of God on Sinai was said to have been divided into the seventy languages of the sons of men (Wettstein, *On Acts ii*); and the *bath-kol*, the echo of the voice of God, was heard by every man in his own tongue (Schneckenburger, *Beiträge*). So, as regards the power of speaking, there was a tradition that the great rabbins of the Sanhedrim could speak all the seventy languages of the world.

The following are some of the direct arguments urged in favor of a literal view of the Pentecostal endowment: "(a) The power in question was virtually promised to the apostles by the very duty assigned them. They were enjoined to 'go and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost.' They were to be witnesses for Christ 'in Jerusalem, and in all Judea, and in Samaria, and to the uttermost parts of the earth.' But how could they instruct remote tribes whose phraseology was a Babel to them, unless they were divinely qualified for the work? (b) This power was in keeping with the occasion. The old economy was characteristically ritualistic. It addressed the eye, and made an impression by its superb ceremonial. The Christian dispensation was to be simple, and its strength would lie in the preaching of the word. To speak with other tongues was indeed a new thing on the earth, but so was the exigency which rendered it appropriate. Judaism was local—made purposely restrictive to preclude amalgamation with the heathen. Now there was to be catholicity, and what could better symbolize it in Christian agency than a competence to instruct the whole world, to be mouth and wisdom to all its inhabitants? (c) We never read of foreign tongues creating any impediment to the spread of the Gospel, or requiring laborious application for the acquisition of them. If we look into modern missionary reports, we meet with a great deal about learning the languages of natives. Why is there nothing of the kind in the New Test., unless because they were acquired supernaturally? (d) The account in Acts ii is explicit, and allows of no uncertainty or evasion. The speakers were Galileans, capable at most of expressing themselves in Greek, Latin, and Hebrew; and a multitude of foreigners from a great many regions heard themselves accosted as in the land of their birth. If the apostles spoke just as they might have been expected to speak, and with no more compass of expression than suited their condition and history, why should any astonishment have been produced by their attainments? But the multitude were confounded, and they were all amazed and marvelled, not merely at the doctrines propounded, but, specifically, because every man heard them speak in his own language. How came Galileans, they asked, to be such linguists? to be so familiar with languages alien to their annals? There is here an obviousness of meaning which no subtlety or sophistry can ever explain away."

X.—H H

Widely diffused as this view of the Pentecostal gift has been, it has been thought by some, in some points at least, that it goes beyond the data with which the New Test. supplies us. Each instance of the gift recorded in the Acts connects it, not so much with the work of teaching as with that of praise and adoration; not with the normal order of men's lives, but with exceptional epochs in them. (In the first instance, however, the gift certainly was largely instrumental in the conversion of hearers; and even among the Corinthians [1 Cor. xiv, 16, 17] the utterance, when properly interpreted, was a means of general edification.) It came and went as the Spirit gave men the power of utterance—in this respect analogous to the other gift of prophecy with which it was so often associated (Acts ii, 16, 17; xix, 6)—and was not possessed by them as a thing to be used this way or that, according as they chose. (It appears, however, that even the prophetic affluus was amenable to the subject's will [1 Cor. xiv, 32], and the gift in question was to be voluntarily exercised or forborne [ver. 28-30].) The speech of Peter which follows, like most other speeches addressed to a Jerusalem audience, was spoken apparently in Aramaic. (But this does not prove that Peter always spoke in that language.) When Paul, who "spake with tongues more than all," was at Lystra, there is no mention made of his using the language of Lycaonia. It is implied, however, that either he or Luke understood it (Acts xiv, 11). It is rarely implied in the discussion of spiritual gifts in 1 Cor. xii-xiv that the gift was of this nature, or given for this purpose. The objection that if it had been, the apostle would surely have told those who possessed it to go and preach to the outlying nations of the heathen world, instead of disturbing the Church by what, on this hypothesis, would have been a needless and offensive ostentation (comp. Stanley, *Corinthians* [2d ed.], p. 261), may readily be met by the consideration that Corinth, as a seaport, was almost as much a polyglot community as Jerusalem. Without laying much stress on the tradition that Peter was followed in his work by Mark as an interpreter (*ἑρμηνευτής*) (Papias, in Eusebius, *H. E.* iii, 30), that even Paul was accompanied by Titus in the same character—"Quia non potuit divinatorum sensuum majestatem digno Græci eloquii sermone explicare" (Jerome, quoted by Estius on 2 *Corinthians ii*)—they must at least be received as testimonies that the age which was nearest to the phenomena did not take the same view of them as those have done who lived at a greater distance. The testimony of Irenæus (*Adv. Her.* vi, 6), sometimes urged in support of the common view, in reality decides nothing, and, so far as it goes, tends against it (*infra*). It is also affirmed that within the limits assigned by the providence of God to the working of the apostolic Church such a gift was unnecessary. Aramaic, Greek, Latin, the three languages of the inscription on the cross, were media of intercourse throughout the empire. Greek alone sufficed, as the New Test. shows us, for the churches of the West, for Macedonia and Achaia, for Pontus, Asia, Phrygia. The conquests of Alexander and of Rome had made men *diglotitic* to an extent which has no parallel in history. But it is one thing to speak in a language imperfectly acquired by speaker and hearer, yet foreign to them both, and a very different thing—and one, we may add, highly important for the *personal* influence requisite to Gospel conviction—to be able to converse fluently in the native tongue of the congregation. The objection that we have no evidence of any actual use of the voluntary power of foreign languages by the apostles in propagating the Gospel is merely negative, and cannot stand in the light of the facts recorded in the case under consideration. Equally inconclusive is the objection against the *psychological* character of the miracle of a sudden importation of a language not learned; for it lies with quite as much force against the communication of the knowledge of a future event, and indeed it would forbid not only all

prophecy, but all inspiration itself. It is a suspicious circumstance connected with all this class of objections that their essence seems to lie in a crypto-rationalistic spirit, which really opposes the miraculous altogether, and seeks on every occasion to explain Scripture prodigies by natural causes. See MIRACLE.

(2.) Accordingly, some interpreters have advanced another solution of the difficulty by changing the character of the miracle. It lay not in any new power bestowed on the speakers, but in the impression produced on the hearers. Words which the Galilean disciples uttered in their own tongue were heard by those who listened as in their native speech. This view we find adopted by Gregory of Nyssa (*De Spir. Sanct.*), discussed, but not accepted, by Gregory of Nazianzum (*Orat. c. xlv*), and reproduced by Erasmus (*ad loc.*). A modification of the same theory is presented by Schneckenburger (*Beiträge*), and in part adopted by Olshausen (*loc. cit.*) and Neander (*Pflanz. u. Leit. i. 15*). The phenomena of somnambulism, of the so-called mesmeric state, are referred to as analogous. The speaker was *en rapport* with his hearers; the latter shared the thoughts of the former, and so heard them, or seemed to hear them, in their own tongues.

There are weighty reasons against this hypothesis.

(a) It is at variance with the distinct statement of Acts ii, 4, "They began to speak with other tongues." (b) It at once multiplies the miracle and degrades its character. Not the one hundred and twenty disciples, but the whole multitude of many thousands, are in this case the subjects of it. The gift no longer connects itself with the work of the Divine Spirit, following on intense faith and earnest prayer, but is a mere physical prodigy wrought upon men who are altogether wanting in the conditions of capacity for such a supernatural power (Mark xvi, 17). (c) It involves an element of falsehood. The miracle, on this view, was wrought to make men believe what was not actually the fact. (d) It is altogether inapplicable to the phenomena of 1 Cor. xiv.

(3.) Critics of a negative school have, as might be expected, adopted the easier course of rejecting the narrative either altogether or in part. The statements do not come from an eye-witness, and may be an exaggerated report of what actually took place—a legend with or without a historical foundation. Those who recognise such a groundwork see in "the rushing mighty wind," the hurricane of a thunder-storm, the fresh breeze of morning; in the "tongues like as of fire," the flashings of the electric fluid; in the "speaking with tongues," the loud screams of men, not all Galileans, but coming from many lands, overpowered by strong excitement, speaking in mystical, figurative, abrupt exclamations. They see in this "the cry of the new-born Christendom" (Bunsen, *Hippolytus*, ii, 12; Ewald, *Gesch. Isr.* vi, 110; Bleek, *loc. cit.*; Herder, *loc. cit.*). From the position occupied by these writers such a view was perhaps natural enough. It is out of place here to discuss in detail a theory which postulates the incredibility of any fact beyond the phenomenal laws of nature and the falsehood of Luke as a narrator.

(4.) What, then, we finally inquire under the case in question, are the facts actually brought before us? What inferences may be legitimately drawn from them?

(a) The utterance of words by the disciples in other languages than their own Galilean Aramaic is, as has been said, distinctly asserted.

(b) The words spoken appear to have been primarily determined, not by the will of the speakers, but by the Spirit which "gave them utterance." The outward tongue of flame was the symbol of the "burning fire" within, which, as in the case of the older prophets, could not without internal violence be repressed (Jer. xx, 9).

(c) The word used, ἀποθέγγεσθαι, not merely λαλεῖν, has in the Sept. a special, though not an exclusive, association with the oracular speech of true or

false prophets, and appears to imply some peculiar and probably impassioned style (comp. 1 Chron. xxv, 1; Ezek. xiii, 9; Trommii *Concordant. s. v.*; Grotius and Wettstein, *ad loc.*; Andrewes, *Whitsunday Sermons*, vol. i).

(d) The "tongues" were used as an instrument, not simply of teaching, but also of praise. At first, indeed, there were none present to be taught. The disciples were by themselves, all sharing equally in the Spirit's gifts. When they were heard by others, it was chiefly as proclaiming the praise, the mighty and great works of God (μεγαλεῖα). What they uttered was not so much a warning or reproof or exhortation as a doxology (Stanley, *loc. cit.*; Baumgarten, *Apstelgesch.* § 3). The assumption, however, appears unwarranted that when the work of teaching began it was in the language of the Jews, and that the utterance of tongues then ceased.

(e) Those who spoke them seemed to others to be under the influence of some strong excitement, "full of new wine." They were not as other men, or as they themselves had been before. Some recognised, indeed, that they were in a higher state, but it was one which, in some of its outward features, had a counterfeit likeness in the lower. When Paul uses—in Eph. v, 18, 19 (πληροῦσθε πνεύματος)—the all but self-same word which Luke uses here to describe the state of the disciples (ἐπλήσθησαν πνεύματος ἁγίου), it is to contrast it with "being drunk with wine," to associate it with "psalms and hymns, and spiritual songs."

(f) Questions as to the mode of operation of a power above the common laws of bodily or mental life lead us to a region where our words should be "wary and few." There is a risk of seeming to reduce to the known order of nature that which is by confession above and beyond it. In this and in other cases, however, it may be possible, without irreverence or doubt—following the guidance which Scripture itself gives us—to trace in what way the new power did its work, and brought about such wonderful results. It must be remembered, then, that in all likelihood similar words to those which they then uttered had been heard by the disciples before. At every feast which they had ever attended from their youth up, they must have been brought into contact with a crowd as varied as that which was present on the day of Pentecost, the pilgrims of each nation uttering their praises and doxologies. The difference was that, before, the Galilean peasants had stood in that crowd neither heeding nor understanding nor remembering what they heard, still less able to reproduce it; now, they had the power of speaking it clearly and freely.

(g) The gift of tongues, the ecstatic burst of praise, is definitely asserted to be a fulfilment of the prediction of Joel ii, 28. The twice-repeated burden of that prediction is, "I will pour out my Spirit," and the effect on those who receive it is that "they shall prophesy." We may see, therefore, in this special gift that which is analogous to one element at least of the προφητεία of the Old Test.; but the element of teaching is, as we have seen, not prominent. In 1 Cor. xiv the gift of tongues and προφητεία (in this the New-Test. sense of the word) are placed in direct contrast. We are led, therefore, to look for that which more peculiarly answers to the gift of tongues in the other element of prophecy which is included in the Old-Test. use of the word; and this is found in the ecstatic praise, the burst of song, which appears under that name in the two histories of Saul (1 Sam. x, 5-13; xix, 20-24), and in the services of the Temple (1 Chron. xxv, 3).

(h) The other instances in the Acts offer essentially the same phenomena. By implication in xiv, 15-19, by express statement in x, 47; xi, 15, 17; xix, 6, it belongs to special critical epochs, at which faith is at its highest, and the imposition of the apostles' hands brought men into the same state, imparted to them the same gift, as they had themselves experienced. In this

case, too, the exercise of the gift is at once connected with, and distinguished from, "prophecy" in its New-Test. sense.

3. The first epistle to the Corinthians supplies fuller data. The spiritual gifts are classified and compared, arranged, apparently, according to their worth, placed under regulation. This fact is in itself significant. Though recognised as coming from the one Divine Spirit, they are not therefore exempted from the control of man's reason and conscience. The Spirit acts through the calm judgment of the apostle or the Church, not less, but more, authoritatively than in the most rapturous and wonderful utterances. The facts which may be gathered in this case are briefly these:

(1.) The phenomena of the gift of tongues were not confined to one Church or section of a Church. If we find them at Jerusalem, Ephesus, Corinth, by implication at Thessalonica also (1 Thess. v, 19), we may well believe that they were frequently recurring wherever the spirits of men were passing through the same stages of experience.

(2.) The comparison of gifts in both the lists given by Paul (1 Cor. xii, 8-10, 28-30) places that of tongues, and the interpretation of tongues, lowest in the scale. They are not among the greater gifts which men are to "covet earnestly" (ver. 31; xiv, 5). As signs of a life quickened into expression where before it had been dead and dumb, the apostle could wish that "they all spake with tongues" (ibid.), could rejoice that he himself "spake with tongues more than they all" (ver. 18). It was good to have known the working of a power raising them above the common level of their consciousness. They belonged, however, to the childhood of the Christian life, not to its maturity (ver. 20). They brought with them the risk of disturbance (ver. 23). The only safe rule for the Church was not to "forbid them" (ver. 39), not to "quench" them (1 Thess. v, 19), lest in so doing the spiritual life of which this was the first utterance should be crushed and extinguished too; but not in any way to covet or excite them.

(3.) The main characteristic of the "tongue" (now used, as it were, technically, without the epithet "new" or "other") is that it is unintelligible unless "interpreted" (*διερμηνεύομαι*, to translate in course). The man "speaks mysteries," prays, blesses, gives thanks, in the tongue (*ἐν πνεύματι* as equivalent to *ἐν γλώσσῃ*, 1 Cor. xiv, 15, 16), but no one understands him (*ἀκούει*). He can hardly be said, indeed, to understand himself. The *πνεῦμα* in him is acting without the co-operation of the *νοῦς* (ver. 14). He speaks not to men, but to himself and to God (comp. Chrysost. *Hom. 35, in 1 Cor.*). In spite of this, however, the gift might, and did, contribute to the building-up of a man's own life (1 Cor. xiv, 4). This might be the only way in which some natures could be roused out of the apathy of a sensual life or the dullness of a formal ritual. The ecstasy of adoration which seemed to men madness might be a refreshment unspeakable to one who was weary with the subtle questionings of the intellect, to whom all familiar and intelligible words were fraught with recollections of controversial bitterness or the wanderings of doubt (comp. a passage of wonderful power as to this use of the gift by Irving, *Morning Watch*, v, 78).

(4.) The peculiar nature of the gift leads the apostle into what appears at first a contradiction. "Tongues are for a sign," not to believers, but to those who do not believe; yet the effect on unbelievers is not that of attracting, but repelling. A meeting in which the gift of tongues was exercised without restraint would seem to a heathen visitor, or even to the plain common-sense Christian (the *ἰδιώτης*, the man without a *χάρisma*), to be an assembly of madmen. The history of the day of Pentecost may help us to explain the paradox. The tongues are a sign. They witness that the daily experience of men is not the limit of their spiritual powers. They disturb, startle, awaken, are given *εἰς τὸ ἐκπληττεσθαι* (Chrysost. *Hom. 36, in 1 Cor.*), but they

are not, and cannot be, the grounds of conviction and belief (so *Const. Apost. c. viii*). They involve of necessity a disturbance of the equilibrium between the understanding and the feelings. Therefore it is that, for those who believe already, prophecy is the greater gift. Five clear words spoken from the mind of one man to the mind and conscience of another are better than ten thousand of these more startling and wonderful phenomena.

(5.) There remains the question whether these also were "tongues" in the sense of being languages, of which the speakers had little or no previous knowledge, or whether we are to admit here, though not in Acts ii, the theories which see in them only unusual forms of speech (Bleek), or inarticulate cries (Bunsen), or all but inaudible whisperings (Wieseler, in Olshausen, *ad loc.*). The question is not one for a dogmatic assertion, but it is believed that there is a preponderance of evidence leading us to look on the phenomena of Pentecost as representative. It must have been from them that the word *tongue* derived its new and special meaning. The companion of Paul and Paul himself were likely to use the same word in the same sense. In the absence of a distinct notice to the contrary, it is probable that the gift would manifest itself in the same form at Corinth as at Jerusalem. The "divers kinds of tongues" (1 Cor. xii, 28), the "*tongues* of men" (xiii, 1), point to differences of some kind, and it is at least easier to conceive of these as differences of language than as belonging to utterances all equally wild and inarticulate. The position maintained by Lightfoot (*Harmony of Gospels on Acts ii*), that the gift of tongues consisted in the power of speaking and understanding the true Hebrew of the Old Test., may appear somewhat extravagant, but there seems ground for believing that Hebrew and Aramaic words had over the minds of Greek converts at Corinth a power which they failed to exercise when translated, and that there the utterances of the tongues were probably, in whole or in part, in that language. Thus, the "*Maranatha*" of 1 Cor. xvi, 22, compared with xii, 3, leads to the inference that the word had been spoken under a real or counterfeit inspiration. It was the Spirit that led men to cry *Abba*, as their recognition of the fatherhood of God (Rom. viii, 15; Gal. iv, 6). If we are to attach any definite meaning to the "tongues of angels" in 1 Cor. xiii, 1, it must be by connecting it with the words surpassing human utterance which Paul heard as in Paradise (2 Cor. xii, 4), and these, again, with the great Hallelujah hymns of which we read in the Apocalypse (Rev. xix, 1-6; Stanley, *loc. cit.*; Ewald, *Gesch. Isr.* vi, 117). The retention of other words like Hosanna and Sabaoth in the worship of the Church, of the Greek formula of the Kyrie Eleison in that of the nations of the West, is an exemplification of the same feeling operating in other ways after the special power had ceased.

(6.) Here also, as in Acts ii, we have to think of some peculiar style of enunciation as frequently characterizing the exercise of the "tongues." The analogies which suggest themselves to Paul's mind are those of the pipe, the harp, the trumpet (1 Cor. xiv, 7, 8). In the case of one "singing in the spirit" (ver. 15), but not with the understanding also, the strain of ecstatic melody must have been all that the listeners could perceive. To "sing and make melody" is specially characteristic of those who are filled with the Spirit (Eph. v, 19). Other forms of utterance less distinctly musical, yet not less mighty to stir the minds of men, we may trace in the "cry" (Rom. viii, 15; Gal. iv, 6) and the "ineffable groanings" (Rom. viii, 26) which are distinctly ascribed to the work of the Divine Spirit. To those who know the wonderful power of man's voice, as the organ of his spirit, the strange, unearthly charm which belongs to some of its less normal states, the influence even of individual words thus uttered, especially of words belonging to a language which is not that of our common life (comp. Hilar. Diac. *Comm. in 1 Cor.*

xiv), it will not seem strange that, even in the absence of a distinct intellectual consciousness, the gift should take its place among the means by which a man "built up" his own life, and might contribute, if one were present to expound his utterances, to "edify" others also. Neander (*Pflanz. u. Leitt.* i, 15) refers to the effect produced by the preaching of St. Bernard upon hearers who did not understand one word of the Latin in which he preached (*Opp.* ii, 119, ed. Mabillon) as an instance of this. Like phenomena are related of St. Anthony of Padua and St. Vincent Ferrer (*Acta Sanctorum*, June 24 and April 5), of which this is probably the explanation. (Comp. also Wolff, *Curæ Philolog. in Nov. Test.*, *Acts* ii.)

(7.) Connected with the "tongues," there was, as the words just used remind us, the corresponding power of interpretation. It might belong to any listener (1 Cor. xiv, 27). It might belong to the speaker himself when he returned to the ordinary level of conscious thought (ver. 13). Its function, according to the view that has been here taken, must have been twofold. The interpreter had first to catch the foreign words, Aramaic or others, which had mingled, more or less largely, with what was uttered, and then to find a meaning and an order in what seemed at first to be without either; to follow the loftiest flights and most intricate windings of the enraptured spirit; to trace the subtle associations which linked together words and thoughts that seemed at first to have no point of contact. Under the action of one with this insight, the wild utterances of the "tongues" might become a treasure-house of deep truths. Sometimes, it would appear, not even this was possible. The power might be simply that of sound. As the pipe or harp, played boldly, the hand struck at random over the strings, but with no *διαστολή*, no musical interval, wanted the condition of distinguishable melody, so the "tongues," in their extremest form, passed beyond the limits of interpretation. There might be a strange awfulness, or a strange sweetness as of "the tongues of angels;" but what it meant was known only to God (ver. 7-11).

(8.) It is probable that, at this later period, and in the Corinthian Church (which appears, from other indications, to have been a decidedly sensuous one), the gift in question had somewhat degenerated from its Pentecostal purity into a demonstrative form, in which the human fancy and nervous susceptibility had given a looser rein to the external manifestations of what was essentially and truly a divine impulse. The history of modern religious excitements affords abundant illustration of this tendency.

4. As to other indications in early times we may remark:

(1.) Traces of the gift are found, as has been said, in the epistles to the Romans, the Galatians, the Ephesians. From the Pastoral Epistles, from those of Peter and John, they are altogether absent, and this is in itself significant. The life of the apostle and of the Church has passed into a calmer, more normal state. Wide truths, abiding graces, these are what he himself lives in and exhorts others to rest on, rather than exceptional *χαρίσματα*, however marvellous. The "tongues" are already "ceasing" (1 Cor. xiii, 8), as a thing belonging to the past. Love, which even when "tongues" were mightiest, he had seen to be above all gifts, has become more and more, all in all, to him.

(2.) It is probable, however, that the disappearance of the "tongues" was gradual. As it would have been impossible to draw the precise line of demarcation when the *προφητεία* of the apostolic age passed into the *διδασκαλία* that remained permanently in the Church, so there must have been a time when "tongues" were still heard, though less frequently, and with less striking results. The testimony of Irenæus (*Adv. Her.* v, 6) that there were brethren in his time "who had prophetic gifts, and spoke through the Spirit in all kinds of tongues," though it does not prove, what it has some-

times been alleged to prove, the permanence of the gift in the individual, or its use in the work of evangelizing (Wordsworth, *On Acts* ii), must be admitted as evidence of the existence of phenomena like those which we have met with in the Church of Corinth. For the most part, however, the part which they had filled in the worship of the Church was supplied by the "hymns and spiritual songs" of the succeeding age. In the earliest of these, distinct in character from either the Hebrew psalms or the later hymns of the Church, marked by a strange mixture of mystic names and half-coherent thoughts (such, e. g., as the hymn with which Clement of Alexandria ends his *Παιδαγωγός*, and the earliest Sibylline verses), some have seen the influence of the ecstatic utterances in which the strong feelings of adoration had originally shown themselves (Nitzsch, *Christl. Lehre*, ii, 268).

After this, within the Church we lose nearly all traces of them. The mention of them by Eusebius (*Comm. in Psal.* xlvii) is vague and uncertain. The tone in which Chrysostom speaks of them (*Comm. in 1 Cor.* xiv) is that of one who feels the whole subject to be obscure, because there are no phenomena within his own experience at all answering to it. The whole tendency of the Church was to maintain reverence and order, and to repress all approaches to the ecstatic state. Those who yielded to it took refuge, as in the case of Tertullian (*infra*), in sects outside the Church. Symptoms of what was then looked upon as an evil showed themselves in the 4th century at Constantinople—wild, inarticulate cries, words passionate but of little meaning, almost convulsive gestures—and were met by Chrysostom with the sternest possible reproof (*Hom. in Isa.* vi, 2 [ed. Migne, vi, 100]).

It thus appears that the miraculous gifts of the first days bestowed upon the Church for a definite purpose were gradually but quickly withdrawn from men when the apostles and those who had learned Christ from their lips had fallen asleep. Among these supernatural powers we can well believe that the earliest withdrawn were those new tongues first heard in their strange sweetness on that Pentecostal morning, needing then no interpreter; those tongues which during the birth-throes of Christianity gave utterance to the rapturous joy and thankfulness of the first believers. They were a power, however, which, if misused, might lead men—as history has subsequently shown—into confusion, feverish dreams, and morbid imaginings, a condition of thought which would utterly unfit men and women for the stern and earnest duties of their several callings—in a word, a life unreal and unhealthy. Therefore that chapter of sacred history which tells of these communings of men with the unseen, that beautified with unearthly glory the lives of the brave witnesses who first gave up all for Christ, was closed up forever when the "tongues" had done their work (see De Wette, *Apostelgesch.* p. 23-26).

III. *Ancient and Modern Quasi-Parallels.*—A wider question of deep interest presents itself. Can we find in the religious history of mankind any facts analogous to the manifestation of the "tongues?" Recognising, as we do, the great gap which separates the work of the Spirit on the day of Pentecost from all others, both in its origin and its fruits, there is, it is believed, no reason for rejecting the thought that there might be like phenomena standing to it in the relation of foreshadowings, approximations, counterfeits. Other *χαρίσματα* of the Spirit, wisdom, prophecy, helps, governments, had, or have, analogies, in special states of men's spiritual life, at other times and under other conditions, and so may these. The three characteristic phenomena are, especially in its Corinthian phase, as has been seen—(a) an ecstatic state of partial or entire unconsciousness, the human will being, as it were, swayed by a power above itself; (b) the utterance of words in tones startling and impressive, but often conveying no distinct meaning; (c) the use of languages which the speaker was of himself unable to converse in.

1. The history of the Old Test. presents us with some instances in which the gift of prophecy has accompanied this nature. The word includes something more than the utterance of a distinct message of God. Saul and his messengers come under the power of the Spirit, and he lies on the ground all night, stripped of his kingly armor, and joining in the wild chant of the company of prophets, or pouring out his own utterances to the sound of their music (1 Sam. xix, 24; comp. Stanley, *loc. cit.*).

2. We cannot exclude the false prophets and diviners of Israel from the range of our inquiry. As they, in their work, dress, pretensions, were counterfeits of those who truly bore the name, so we may venture to trace in other things that which resembled, more or less closely, what had accompanied the exercise of the divine gift. And here we have distinct records of strange, mysterious intonations. The ventriloquist wizards (οἱ ἐγγαστρίμυθοι, οἱ ἐκ τῆς κοιλίας φωνοῦσιν) "peep and mutter" (Isa. viii, 19). The "voice of one who has a familiar spirit" comes low out of the ground (xxix, 4). The false prophets simulate with their tongues (Sept. ἐκβάλλοντας προφητείας γλώσσης) the low voice with which the true prophets announced that the Lord had spoken (Jer. xxiii, 31; comp. Gesenius, *Thesaur.* s. v. צִיִּי).

3. The quotation by Paul (1 Cor. xiv, 21) from Isa. xxviii, 11 ("With men of other tongues [ἐν ἑτερογλώσσοις] and other lips will I speak unto this people") has a significance of which we ought not to lose sight. The common interpretation sees in that passage only a declaration that those who had refused to listen to the prophets should be taught a sharp lesson by the lips of alien conquerors. Ewald (*Prophet.* ad loc.), dissatisfied with this, sees in the new teaching the voice of thunder striking terror into men's minds. Paul, with the phenomena of the "tongues" present to his mind, saw in them the fulfilment of the prophet's words. Those who turned aside from the true prophetic message should be left to the darker, "stammering," more mysterious utterances, which were in the older what the "tongues" were in the later Ecclesia. A remarkable parallel to the text thus interpreted is found in Hos. ix, 7. There also the people are threatened with the withdrawal of the true prophetic insight, and in its stead there is to be the wild delirium, the ecstatic madness of the counterfeits (comp. especially the Sept., ὁ προφήτης ὁ παρεστηκώς, ἄνθρωπος ὁ πνευματοφόρος).

4. The history of heathen oracles presents, it need hardly be said, examples of the orgiastic state, the condition of the μάντις as distinct from the προφήτης, in which the wisest of Greek thinkers recognised the lower type of inspiration (Plato, *Timæus*, 72 b; Bleek, *loc. cit.*). The Pythoness and the Sibyl are as if possessed by a power which they cannot resist. They labor under the afflatus of the god. The wild, unearthly sounds ("nec mortale sonans"), often hardly coherent, burst from their lips. It remained for interpreters to collect the scattered utterances, and to give them shape and meaning (Virgil, *Æn.* vi, 45, 98 sq.).

5. More distinct parallels are found in the accounts of the wilder, more excited sects which have, from time to time, appeared in the history of Christendom. Tertullian (*De Anim.* c. 9), as a Montanist, claims the "revelationum charismata" as given to a sister of that sect. They came to her "inter dominica solemnia;" she was, "per ecstasin, in spiritu," conversing with angels, and with the Lord himself, seeing and hearing mysteries ("sacramenta"), reading the hearts of men, prescribing remedies for those who needed them. The movement of the mendicant orders in the 13th century, the prophesying of the 16th in England, the early history of the disciples of George Fox, that of the Jansenists in France, the revivals under Wesley and Whitefield, those of a later date in Sweden, America, and Ireland, have, in like manner, been fruitful in ecstatic phenomena more or

less closely resembling those which we are now considering.

6. The history of the French prophets at the commencement of the 18th century presents some facts of special interest. The terrible sufferings caused by the Revocation of the Edict of Nantes were pressing with intolerable severity on the Huguenots of the Cevennes. The persecuted flocks met together with every feeling of faith and hope strung to its highest pitch. The accustomed order of worship was broken, and laboring men, children, and female servants spoke with rapturous eloquence as the messengers of God. Beginning in 1686, then crushed for a time, bursting forth with fresh violence in 1700, it soon became a matter of almost European celebrity. Refugees arrived in London in 1706 claiming the character of prophets (Lacy, *Cry from the Desert*; Peyrat, *Pastors in the Wilderness*). An Englishman, John Lacy, became first a convert and then a leader. The convulsive ecstatic utterances of the sect drew down the ridicule of Shaftesbury (*On Enthusiasm*). Calamy thought it necessary to enter the lists against their pretensions (*Caveat against the New Prophets*). They gained a distinguished proselyte in Sir R. Bulkeley, a pupil of Bishop Fell's, with no inconsiderable learning, who occupied in their proceedings a position which reminds us of that of Henry Drummond among the followers of Irving (Bulkeley, *Defence of the Prophets*). Here, also, there was a strong contagious excitement. Nicholson, the Baxter of the sect, published a confession that he had found himself unable to resist it (*Falsehood of the New Prophets*), though he afterwards came to look upon his companions as "enthusiastic impostors." What is specially noticeable is that the gift of tongues was claimed by them. Sir R. Bulkeley declares that he had heard Lacy repeat long sentences in Latin, and another speak Hebrew, though, when not in the Spirit, they were quite incapable of it (*Narrative*, p. 92). The characteristic thought of all the revelations was that they were the true children of God. Almost every oracle began with "My child!" as its characteristic word (Peyrat, i, 235-313). It is remarkable that a strange revivalist movement was spreading nearly at the same time through Silesia, the chief feature of which was that boys and girls of tender age were almost the only subjects of it, and that they too spoke and prayed with a wonderful power (Lacy, *Relation*, etc., p. 31; Bulkeley, *Narrative*, p. 46).

7. The so-called Unknown Tongues, which manifested themselves first in the west of Scotland, and afterwards in the Caledonian Church in Regent Square, present a more striking phenomenon, and the data for judging of its nature are more copious. Here, more than in most other cases, there were the conditions of long, eager expectation fixed brooding over one central thought, the mind strained to a preternatural tension. Suddenly, now from one, now from another, chiefly from women, devout but illiterate, mysterious sounds were heard. Voices which at other times were harsh and unpleasing became, when "singing in the Spirit," perfectly harmonious (Cardale, *Narrative*, in *Morning Watch*, ii, 871, 872). See the independent testimony of archdeacon Stopford. He had listened to the "unknown tongue," and had found it "a sound such as I never heard before, unearthly and unaccountable." He recognised precisely the same sounds in the Irish revivals of 1859 (*Work and Counterwork*, p. 11). Those who spoke, men of known devotion and acuteness, bore witness to their inability to control themselves (Baxter, *Narrative*, p. 5, 9, 12), to their being led, they knew not how, to speak in a "triumphant chant" (*ibid.* p. 46, 81). The man over whom they exercised so strange a power has left on record his testimony, that to him they seemed to embody a more than earthly music, leading to the belief that the "tongues" of the apostolic age had been as the archetypal melody of which all the Church's chants and hymns were but faint, poor echoes (Oiphant, *Life of Irving*, ii, 208). To those who were

without, on the other hand, they seemed but an unintelligible gibberish, the yells and groans of madmen (newspapers of 1831, *passim*). Sometimes it was asserted that fragments of known languages—Spanish, Italian, Greek, Hebrew—were mingled together in the utterances of those who spoke in the power (Baxter, *Narrative*, p. 133, 134). Sometimes it was but a jargon of mere sounds (*ibid.*). The speaker was commonly unable to interpret what he uttered. Sometimes the office was undertaken by another. A clear and interesting summary of the history of the whole movement is given in Mrs. Oliphant's *Life of Irving*, vol. ii. Those who wish to trace it through all its stages must be referred to the seven volumes of the *Morning Watch*, and especially to Irving's series of papers on the *Gifts of the Spirit* in vols. iii, iv, and v. Whatever other explanation may be given of the facts, there exists no ground for imputing a deliberate imposture to any of the persons who were most conspicuous in the movement.

8. In certain exceptional states of mind and body the powers of memory are known to receive a wonderful and abnormal strength. In the delirium of fever, in the ecstasy of a trance, men speak in their old age languages which they have never heard or spoken since their earliest youth. The accent of their common speech is altered. Women, ignorant and untaught, repeat long sentences in Greek, Latin, and Hebrew, which they had once heard, without in any degree understanding or intending to remember them. In all such cases the marvellous power is the accompaniment of disease, and passes away when the patient returns to his usual state, to the healthy equilibrium and interdependence of the life of sensation and of thought (Abercrombie, *Intellectual Powers*, p. 140-143; Winslow, *Obscure Diseases of the Brain*, p. 337, 360, 374; Watson, *Principles and Practice of Physic*, i, 128). The medieval belief that this power of speaking in tongues belonged to those who were possessed by evil spirits rests, obviously, upon like psychological phenomena (Peter Martyr, *Loci Communes*, i, 10; Bayle, *Dict.* s. v. "Grandier").

We refer to the above singular phenomena of modern times not as genuine samples of the scriptural *glossolalia*, but as illustrating some of the physical and mental symptoms with which they were accompanied. In many instances, no doubt, the Biblical facts have been merely imitated, and in others they have exercised unconsciously a reproductive power. See Wieseler, in the *Stud. u. Krit.* 1838, iii, 703; 1839, ii, 483; iii, 752; 1843, iii, 659 sq.; 1847, i, 55; also the monographs cited by Volbeding, *Index Programmatum*, p. 73.

IV. This subject is not merely curious and interesting, but full of practical moment. 1. It shows how well the Gospel message was accredited in its first promulgation. It fixes attention on the high consequence of preaching the Gospel; of declaring its message with a glowing, burning earnestness, and of obtaining the live coal which is to kindle the heart from off God's altar. 2. Inasmuch as the tongues of fire appear to have rested on private Christians as well as apostles, and on women as well as men—for no distinction, no exception, is made in the narrative—we are admonished that all are bound in the measure of their ability to speak for God, to let no corrupt communication proceed out of their mouth, but that which is good to the use of edifying, that it may minister grace unto the hearers. 3. At the same time we are warned that the tongue might be had in its integrity while the fire was wanting or feeble. Paul himself, though avowing that he could speak with tongues more than they all, felt the need of being prayed for by saints, "with all prayer and supplication in the Spirit, that utterance might be given him, that he might open his mouth boldly to make known the mystery of the Gospel." 4. We learn, finally, from the apostle that faith, hope, and charity were better than this physical endowment, as having a more abiding character.

**Tonsure** (Lat. *tonsura*, *shaving*) is a name given to the distinguishing mark of the clergy of the Romish Church, formed by shaving off some of the hair. The custom is said to have been introduced at the end of the 5th century. At an earlier period it was censured as unbecoming spiritual persons, on the ground of its being among the tokens of penance. Albaspinæus notes, "It was customary to use shaving even to baldness, and sprinkling the head with ashes, as signs of sorrow and repentance; but the priests of God were not to be thus treated;" which shows that the ancients then knew nothing of this as a ceremony belonging to the ordination or life of the clergy. The ancient tonsure, therefore, was not a shaven crown, for Jerome, Ambrose, and others, equally inveigh against this as a ceremony of the priests of Isis; it was only an obligation on the monks and clergy to wear decent and short hair, as is evident from all the canons that appoint it. The tonsure in early times was called *corona clericalis*, and the clergy *coronati*, not, however, from their shaven crowns, but from the form of the ancient tonsure, which was made in a circular figure by cutting away the hair a little from the crown of the head and leaving a circle hanging downwards. At first the lowest church servants wore their hair short as a mark of servitude, and the monks, out of humility, imitated them, and in the 6th century the clergy adopted the fashion.

The form of the tonsure varied in different churches, and the varieties of it are of some historical interest. That of the Roman Church, called the "Tonsure of Peter," consisted of shaving the crown as well as the back of the head, so that there remained a circular ring or crown of hair. This was the form in use in Italy, Gaul, and Spain. In the Scottish (or Irish) tonsure, which was in use in Ireland, in North Britain, and in those parts of Germany in which the Irish missionaries had preached, the entire front of the head was shaved, leaving it bare as far back as the line from ear to ear. This tonsure was called "the tonsure of James," and sometimes of "Simon the Magician." The Greeks and other Orientals shaved the whole head. The supposed derivation of the Irish form of tonsure from the apostolic times led to its being held both in Ireland and Britain, as well as other churches of Irish foundation, to be of the most vital importance, inasmuch that the introduction of the Roman form was almost the occasion of a schism.

As to the *signification* of the tonsure, the catechism of the Council of Trent says that it was intended to signify that the ministers of religion are in all things so to comport themselves as to carry about them the figure and likeness of Christ. Anthony, archbishop of Florence, says, "The shaving on the upper part of the head signifies that they ought to have a mind free for the contemplation of divine things. The tonsure over the ears denotes that they ought not to have dull senses, or be involved in worldly matters, which are designated by the hair. But the cut of the hair in form of a circle designates the royal dignity which they have, and because they ought to regulate themselves and others according to the virtues." The circle formed at the back of the head by the tonsure is enlarged as the person rises in ecclesiastical dignity. Originally the tonsure was merely a part of the ceremonial of initiation in orders, and was only performed in the act of administering the higher order; but about the 7th century it came to be used as a distinct and independent ceremonial; and a question has been raised whether it is to be considered in itself as an order, and to be added to the list of what are called "minor orders." The now received opinion of Catholic writers is that tonsure is not an order, but only a preparation for orders. Concealment had already been forbidden in Edgar's canon, and by Anselm, in 1102; and Peckham, in 1281, complains that the clergy covered it out of sight with hair laces. See Bingham, *Christ. Antig.* bk. vi, ch. iv, § 16,

17; vii, iii, § 6; Walcott, *Sac. Archaeol.* s. v.; Wetzlar u. Welte, *Kirchen-Lex.* s. v.

**TOOKE**, JOHN HORNE, an English clergyman, the son of John Horne, was born in Westminster, June 25, 1786, and was educated at Westminster and Eton schools and St. John's College, Cambridge, graduating in 1758. He became an usher in a school at Blackheath, took orders, and served as curate in Kent. In 1760 he received priest's orders, and for three years had charge of the chapelry of New Brentford. After going to France as travelling tutor to the son of Mr. Elwes, of Berkshire, he returned in 1767 and took an active interest in politics, laboring to secure the election of his friend Wilkes from Middlesex. He became (1769) one of the founders of the "Society for Supporting the Bill of Rights," but quarrelled with Wilkes and was attacked by Junius, but successfully defended himself. In 1773 he formally resigned his living, designing to study law; and, rendering great assistance to a Mr. Tooke of Purley, in Surrey, was made by him his heir. He changed his name to Tooke in 1782, and received £8000 from the property. He opposed the American war, and, accusing the king's troops of barbarously murdering the Americans at Lexington, was convicted of libel, and sentenced to one year's imprisonment and a fine of £200. When released, he applied for admission to the bar, but was rejected on the ground of being a clergyman. In 1790 he was defeated as a candidate for Parliament, and in 1794 was tried for high-treason, but was acquitted. Defeated again in 1796, he succeeded in 1801 in being elected to the House of Commons for the borough of Old Sarum; and retained his seat till the dissolution in 1802, the decision of Parliament (that no one in priest's orders could be a member) disqualifying him from sitting again. He retired to Wimbledon, where he died, March 18, 1812. Mr. Tooke published, *The Petition of an Englishman* (1765):—*Sermon* (before 1778):—*Letter to John Dunning* (1778, 8vo):—*Letter to Lord Ashburton* (1782, 8vo):—*Ερετα Πτερόεντα, or the Diversions of Purley* (1786, 8vo):—and other pamphlets. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Tooth** (צֶהָן, *shén*, ὀδούς). The Hebrew word is by some derived from צָהָן, "to change" or "repeat," because the teeth are changed, or replaced by others; but it better comes from צָרַן, *to sharpen*. So likewise the Greek ὀδούς is said to be quasi ἰδούς, from ἔδω, "to eat;" and the Latin *dens*, quasi *edens*, "eating." But the three words are probably all primitives, and the latter two at least are etymologically connected with the English *tooth*.

I. In the singular this term occurs first with reference to the literal member itself in man, the loss of which, by violence, is specified by Moses, in illustration of his law concerning *taliones*, "tooth for tooth" (Exod. xxi, 24). This outrage occurring between freemen (or between an Israelite and a foreigner, Lev. xxiv, 22) admitted, like other cases of maiming, most probably of a pecuniary compensation, and under private arrangement, unless the injured party proved exorbitant in his demand, when the case was referred to the judge, who seems addressed in Deut. xix, 21. The Targum of Jonathan renders the words, "the price of a tooth for a tooth," in Exod. xxi, 24, Lev. xxiv, 20, and Deut. xix, 21 (comp. Josephus, *Ant.* iv, 8, 35, and see the art. PUNISHMENT in this *Cyclopædia*); but if a master inflicted this irreparable damage upon a servant, i. e. slave, of either sex, he was punished by the absolute loss of the slave's services (Exod. xxi, 27). The same law applied if the slave was a Gentile, notwithstanding the national glosses of the Jewish doctors (Selden, *De Jure Nat. et Gent.* iv, 1, 468). Our Lord's comment upon the law (Matt. v, 38), which was much abused in his time (Horne, *Introd.* ii, 377, 6th ed.), prohibits no more than *retaliation* upon the *injurer* (τῷ πονηρῷ), not such a

defence of our innocence as may consist in words, but *private revenge*, and especially with such a disposition as actuated the aggressor, with impetuous rage or hatred. His exhortations relate rather to those injuries which cannot be redressed by the magistrate or by course of law; these we should bear rather than resort to revenge (see Rosenmüller, Grotius, and Whitby, *ad loc.*). Indeed, the hermeneutics of our Lord's precepts in his Sermon on the Mount require much knowledge, care, and discrimination, in order to avoid a *prima facie* interpretation of them, which has often been given, at variance with his intention, subversive of the principles of natural justice, and productive of false ideas of Christian duty.

In Psa. iii, 7 we have צֶהָן, for the human jawbone; for that of an ass (Judg. xv, 15-17, *σιαγόνα*, "maxillam, i. e. mandibulam;" which becomes שֶׁחֶמֶן in ver. 19, τὸν λάκκον τὸν ἐν τῇ σιαγόνῃ, "molarem dentem in maxilla asini") [see SAMSON]; and for that of levathan (Job xl, 14, τὸ χεῖλος, *maxillam*). See JAW. A "broken (or rather "bad," בָּדָן, that is, decayed; Vulg. *dens putridus*) tooth" is referred to in Prov. xxv, 19, as furnishing an apt similitude of "confidence in an unfaithful man in the time of trouble." "The teeth of beasts," or rather "tooth," צֶהָן, is a phrase expressive of devastation by wild animals; thus, "I will send the tooth of beasts upon them" (Deut. xxxii, 24), מַחֲרִיבֵי צֶהָן (ὀδόντας θηρίων, *dentes bestiarum*; comp. 2 Kings xvii, 25).

The word is sometimes used metaphorically for a sharp cliff or summit of a rock (Job xxxix, 28); thus, "The eagle dwelleth and abideth upon the tooth of the rock," צֶהָן צֶהָן (ἐπ' ἑξοχῇ πέτρας, *inaccessis rupibus*). So also (1 Sam. xiv, 4), "a sharp rock on the one side and a sharp rock on the other side," צֶהָן צֶהָן (ὀδούς πέτρας, *quasi in modum dentium scopuli*); these eminences were named Bozez and Seneh.

II. TEETH, צֶהָן, *shinna'yim* (ὀδόντες), is found in the dual number only, referring to the two rows, yet used for the plural (1 Sam. ii, 13). The word occurs first with reference to the literal organs in man (Gen. xlix, 12), "His teeth shall be white with milk," which the Sept. and Vulg. understand to mean "whiteness greater than milk" (ἡ γάλα, *lacte candidiores*; Numb. xi, 33; Prov. x, 26; Cant. iv, 2; vi, 6). Although צֶהָן be the general word for teeth, yet the Hebrews had a distinct term for the molars, or jaw teeth, especially of the larger animals; thus, מַחֲרִיבֵי צֶהָן (Job xxix, 17; Psa. lvii, 4; Prov. xxx, 14; Joel i, 6); and by transposition מַחֲרִיבֵי צֶהָן (Psa. lviii, 6, *μύλαι*, *mole* and *molares*). The apparent teeth of the leviathan (*gyrus dentium*) are, however, called צֶהָן (Job xli, 14). Ivory, "elephants' teeth," 1 Kings x, 22, is simply צֶהָן (Sept. omits; Vulg. *dentes elephantorum*); *dens* in Latin is sometimes so used. In 2 Chron. ix, 21 the word is צֶהָן צֶהָן (ὀδόντες ἐλεφάντων, *ebur*), where צֶהָן evidently denotes a tooth; but the signification of the latter part, צֶהָן, is unknown, and Gesenius thinks that the form of the word may be so corrupted as to disguise its original meaning. May it not be of foreign origin, imported with the material from Ophir? See IVORY.

In other passages the reference to teeth is metaphorical; thus, "a flesh-hook with three teeth," that is, prongs (1 Sam. ii, 13). See HOOK. "The teeth of lions" is a symbol of the cruelty and rapacity of the wicked (Job iv, 10). "To take one's flesh into one's teeth" signifies to gnaw it with anguish (xiii, 14; comp. Rev. xvi, 10). "The skin of his teeth," with which Job says he had "escaped" in his affliction, is understood by the Vulgate, of the lips—"derelicta sunt tantummodo labia circa dentes meos;" but Gesenius understands it as a proverbial expression, meaning, I have scarcely a sound spot

in my body. "To smite upon the jaw-bone" and "to break the teeth" mean to disgrace and to disable (Psa. iii, 7; comp. Mic. vi, 13; 1 Kings xx, 35; Lam. iii, 30). The teeth of calumniators, etc., are compared to "spears and arrows" (Psa. lvii, 4; comp. 1 Sam. xxiv, 9). To break the teeth of such persons means to disable them (Psa. lviii, 6). To escape the malice of enemies is called an "escape from their teeth" (cxix, 7; Zech. ix, 7). Oppression is compared to "jaw-teeth like words, and grinders like knives" (Prov. xxx, 14). Beautiful teeth are compared to "sheep newly shorn and washed" in Cant. iv, 2; vi, 6; but the remaining part of the comparison, "whereof every one beareth twins, and none is barren among them," is much better rendered by Le Clerc, "all of them twins, and none hath lost his fellow." "To break the teeth with gravel stones" is a most hyperbolic metaphor for inflicting the harshest disappointment (Lam. iii, 16). "Iron teeth" are the symbol of destructive power (Dan. vii, 7, 19). A nation having the teeth of lions, and the cheek-teeth of a great lion, denotes one which devours with irresistible force (Joel i, 6; comp. Eccus. xxi, 2; Rev. ix, 8). "Prophets who bite with their teeth, and cry Peace," are greedy and hypocritical prophets (Mic. iii, 5). "To take away blood out of the mouth, and abominations from between the teeth," means to rescue the intended victims of cruelty (Zech. ix, 7). "Cleanness of teeth" is a periphrasis for hunger, famine (Amos iv, 6; Sept. *γομφιασμών δδόντων*, Symmachus and Theodotion, *καθαρισμών*). *Grinding of teeth* means, properly, grinding the teeth with rage or despair. The Hebrew word so rendered is *קרקר* (Job xvi, 9; Lam. ii, 16; Psa. xxxv, 16; xxxvii, 12; cxii, 10); it is invariably rendered in the Sept. *βρύχω*, and in the Vulg. *infrenio*, *frenio*, *frendo* (see also Acts vii, 54; Eccus. li, 2). In the New Test. it is said of the epileptic child (Mark ix, 18), *τρίζει τοὺς δδόντας*, *stridet dentibus*. The phrase *ὁ βρυγμός τῶν δδόντων* is in the Vulgate "stridor dentium" (Matt. viii, 12; xiii, 42, 50; xxii, 18; xxiv, 51; xxv, 30; Luke xiii, 28). Suidas defines *βρυγμός* *τρισμός δδόντων*. Galen, *ὁ ἀπὸ τῶν δδόντων συγκρουομένων ψόφος*. The phrase "lest thou gnash thy teeth" (Eccus. xxx, 10) is *γομφιάσεις τοὺς δδόντας σου*. "To cast in the teeth" is an old English phrase (for the Hebrew has no such idiom), signifying to reproach; thus "the thieves who were crucified with Jesus cast the same in his teeth," *ὠνεῖδίζον αὐτόν* (Matt. xxvii, 44; Vulg. *improperabant ei*; compare also the Bible and Prayer-book version of Psa. xlii, 11). *פִּי־יִיִר*, "a sharp threshing instrument having teeth," literally "edges" (Isa. xli, 15). The action of acids on the teeth is referred to in the proverb "the fathers have eaten sour grapes, and the children's teeth are set on edge" (Ezek. xvi, 2); *ἐγομφιάσαν, obstupuerunt* (Prov. x, 26).

**Toparchy** (*τοπαρχία, government of a district*), a term applied in one passage of the original of the Apocrypha (1 Macc. xi, 28) to indicate three districts to which elsewhere (x, 30; xi, 34) the name *νομός* is given, as also in Josephus (*Ant.* xiii, 4, 9). In all these passages the English version employs the term "governments." The three "toparchies" in question were Aphærima (*Ἀφαίριμα*), Lydda, and Ramath. They had been detached from Samaria, Peræa, and Galilee respectively, some time before the war between Demetrius Soter and Alexander Bala. Each of the two belligerents endeavored to win over Jonathan, the Jewish high-priest, to their side, by allowing him, among other privileges, the sovereign power over these districts without any payment of land-tax. The situation of Lydda is doubtful; for the toparchy Lydda of which Pliny speaks (v, 14) is situated not in Peræa, but on the western side of the Jordan. Aphærima is considered by Grotius to denote the region about Bethel, captured by Abijah from Jeroboam (2 Chron. xiii, 19). Ramath is probably the famous stronghold, the desire of obtaining which led to the unfortunate expedition of the allied sovereigns

Ahab and Jehoshaphat (1 Kings xxii). Pliny (v, 14) mentions ten toparchies in Judæa, and so does Josephus (*War*, iii, 3, 5).

The "toparchies" seem to have been of the nature of the modern Turkish *agaliks*, and the passages in which the word *τοπάρχης* occurs all harmonize with the view of that functionary as the *aga*, whose duty would be to collect the taxes and administer justice in all cases affecting the revenue, and who, for the purpose of enforcing payment, would have the command of a small military force. He would thus be the lowest in the hierarchy of a despotic administration to whom troops would be intrusted; and hence the taunt in 2 Kings xviii, 24, and Isa. xxxvi, 9 (Sept.): *πὺς ἀποστρέψει τὸ πρόσωπον (פָּנָיו, "captain") τοπάρχου ἐνός, τῶν δούλων τοῦ κυρίου μου τῶν ἐλαχίστων*;—"How wilt thou resist a single toparch, one of the very least of my lord's slaves?" But the essential character of the toparch is that of a fiscal officer, and his military character is altogether subordinate to his civil. Hence the word is employed in Gen. xli, 34 for the "officers over the land" (*פָּרָשִׁים, "overseer"*), who were instructed to buy up the fifth part of the produce of the soil during the seven years of abundance. In Dan. iii, 3, Theodotion uses the word in a much more extensive sense, making it equivalent to "satraps" (*סַטְרָפִים, "wise"*), and the English version renders the original by "princes;" but the original word here is not the same as in Dan. iii, 2, 27, and vi, 7, in every one of which cases a subordinate functionary is contemplated.

**Topaz** (*תֹּפֶז, pīdah'*, apparently of non-Heb. etymology; Sept. *τοπάσιον*; Vulg. *topazius*), a gem which was the second stone in the first row of the high-priest's breastplate (Exod. xxviii, 17; xxxix, 10). It was one of the jewels that adorned the apparel of the king of Tyre (Ezek. xxviii, 13); it was the bright stone that garnished the ninth foundation of the heavenly Jerusalem (Rev. xxi, 20). In Job xxviii, 19, where wisdom is contrasted with precious articles, it is said that "the *pīdah'* of Ethiopia shall not equal it." It is, according to most ancient versions, the topaz (*τοπάσιον*; Josephus, *τόπαζος*), which most of the ancient Greek writers describe as being of a golden yellow color (Strabo, xvi, 770; Dioc. Sic. iii, 39); while Pliny (*Hist. Nat.* xxxvii, 32) states that its color is green. The topaz of the ancient Greeks and Romans is generally thought to be our chrysolite, while their chrysolite is our topaz. Chrysolite, which is also known by the name of olivine and peridot, is a silicate of magnesia and iron; it is so soft as to lose its polish unless worn with care (Mitchell and Tennant, *Mineralogy and Crystallography*, p. 512). See CHRYSLITE. Bellermann, however (*Die Urim und Thummim*, p. 39), contends that the topaz and the chrysolite of the ancients are identical with the stones denoted by these terms at the present day. The topaz is a precious stone having a strong glass lustre. Its prevailing color is wine-yellow of every degree of shade. The dark shade of this color passes over into carnation red, and sometimes, although rarely, into lilac; the pale shade of the wine-yellow passes into grayish, and from yellowish-white into greenish-white and pale green, tinical, and celadon-green. It may thus be difficult to determine whether the *pīdah'* in the high-priest's breastplate was the yellow topaz; but that it was a topaz there is little reason to doubt. In the passage cited from Job the *pīdah'* is connected with Cush; and as the name Cush includes Southern Arabia and the Arabian Gulf, the intimation coincides with the statement of Pliny and others, that the topazes known to them came from the Topaz Island in the Red Sea (*Hist. Nat.* xxxvii, 8; comp. xi, 29), whence it was probably brought by the Phœnicians (comp. Ezek. xxviii, 13). See ETRUSCAN. Pliny adds, in explanation of the name, that the island where these precious stones were procured was surrounded by fogs, and was, in consequence, often

sought for by navigators; and that hence it received its name, the term "topazin" signifying, in the Troglo-dyte tongue, "to seek" (?).

It may be remarked that Bohlen seeks the origin of the Hebrew word in the Sanscrit language, in which *piṭa* means "yellowish," "pale;" and, as Gesenius remarks, the Greek *τοπαζιον* itself might seem to come from the Hebrew *טופזין* by transposition into *טופזין* (*Thesaur.* p. 1101). See Braunius, *De Vstitu*, p. 508; Hofmann, *Mineral.* i, 337; Pareau, *Comment.* on *Job*, p. 333; Ritter, *Erdkunde*, ii, 675. See GEM.

**To'phel** (Heb. *יד*, *תופל*, *mortar*; Sept. *Τοφώλ*; Vulg. *Thophel*), a place mentioned in Deut. i, 1 as a boundary (? on the N.E.) of the great Sinaitic desert of Paran. It has therefore been with great probability identified with *Tufleleh* (comp. Schwarz, *Palest.* p. 210) on a wady of the same name running north of Bozra towards the north-west into the Ghôr and south-east corner of the Dead Sea (Robinson, *Bibl. Res.* ii, 570). This latter is a most fertile region, having many springs and rivulets flowing into the Ghôr, and large plantations of fruit-trees, whence figs are exported. The bird *katta*, a kind of partridge, is found there in great numbers, and the steinbock pastures in herds of forty or fifty together (Burckhardt, *Holy Land*, p. 405, 406). The brook *Tufleleh*, or its immediate neighborhood, is still the recognised boundary between Edom and Moab (Tristram, *Land of Moab*, p. 57).

**To'phet** (Heb. *To'pheth*, *תופת*, *spittle*, as in Job xvii, 6; i. e. *abominable*, or, perhaps, *place of burning*; Jer. vii, 32 [second time]; xix, 11, 12; with the art., 2 Kings xxiii, 10 ["Topheth"]; Jer. vii, 31, 32; xix, 6, 13, 14; once *Topheth*, *תופת*, Isa. xxx, 33; Sept. *Τωφέζ*, *Ταφέζ*, and *Θοφθά*; Vulg. *Tophet*, *Topheth*), a place near Jerusalem, where the ancient Canaanites, and afterwards the apostate Israelites, made their children to pass through the fire to Moloch (comp. Psa. cvi, 38; Jer. vii, 31). It is first mentioned, in the order of time, by Isaiah, who alludes to it as deep and large and having an abundance of fuel (xxx, 33). He here evidently calls the place where Sennacherib's army was destroyed Tophet, by a metonymy; for it was probably overthrown at a greater distance from Jerusalem, and quite on the opposite side of it, since Nob is mentioned as the last station from which the king of Assyria should threaten Jerusalem (x, 32), where the prophet seems to have given a very exact chorographical description of his march in order to attack the city (Lowth's *Transl.* notes on xxx, 33). In the reformation of religion by king Josiah, he caused Topheth to be defiled in order to suppress idolatry (2 Kings xxiii, 10). The means he adopted for this purpose are not specified, whether by throwing all manner of filth into it, as well as by overthrowing the altars, etc., as the Syriac and Arabic versions seem to understand it. The prophet Jeremiah was ordered by God to announce from this spot (xix, 14) the approaching captivity, and the destruction, both by the siege of the city and by famine, of so many of the people, whose carcasses should be here buried, as that it should "no more be called Tophet, nor the valley of the son of Hinnom, but the valley of slaughter" (vii, 31, 32; xix, 6, 11-14). In all succeeding ages blood has flowed there in streams; corpses, buried and unburied, have filled up the hollows; and it may be that underneath the modern gardens and terraces there lies not only the débris of the city, but the bones and dust of millions—Romans, Persians, Jews, Greeks, Crusaders, Moslems. Once the royal music grove where Solomon's singers, with voice and instrument, regaled the king, the court, and the city; then the Temple of Baal, the high-place of Moloch, resounding with the cries of burning infants; then (in symbol) the place where is the wailing and gnashing of teeth. Once prepared for Israel's king as one of his choicest villas; then degraded and defiled till

it becomes the place prepared for "the King," at the sound of whose fall the nations are to shake (Ezek. xxxi, 16); and as Paradise and Eden passed into Babylon, so Tophet and Ben Hinnom pass into Gehenna and the lake of fire. These scenes seem to have taken hold of Milton's mind; for three times over, within fifty lines, he refers to "the opprobrious hill," the "hill of scandal," the "offensive mountain," and speaks of Solomon making his grove in

"The pleasant valley of Hinnom, Tophet thence  
And black Gehenna called, the type of hell."

See GEHENNA.

The name Tophet was commonly supposed to be derived from *tôph*, or drum, from the drums used to drown the cries of the children when made to pass through the fire to Moloch. This was a received Jewish opinion. But there are other derivations; that, for example, of Jerome, who from the root to open (*תפתח*) ascribes to it the sense of *latitude*; of Rosenmüller, who connects it with a different root (*תפתח*), and takes it to mean *pleasantness*; of Gesenius, who, from a Persian root, finds the sense of *inflaming, burning*; of Rödiger (in *Gesen. Thesaur.* s. v.), who takes it in the sense of *filth*, a view substantially concurred in by Böttcher, Hitzig, and Thenius, though derived in a different manner. This is, perhaps, the most probable opinion, as it seems, also, the most directly applicable to the place. See Böttcher, *De Inferis*, i, 80, 85; Panecius, *De Topheth* (Viteb. 1694).

Tophet lay somewhere east or south-east of Jerusalem, for Jeremiah went out by the sun-gate, or east gate, to go to it (xix, 2). It was in "the valley of the son of Hinnom" (vii, 31), which is "by the entry of the east gate" (xix, 2). Thus it was not identical with Hinnom, as some have written, except in the sense in which Paradise is identical with Eden, the one being part of the other. It was in Hinnom, and was, perhaps, one of its chief groves or gardens. It seems also to have been part of the king's gardens, and watered by Siloam, perhaps a little to the south of the present Birket el-Hamra. The New Test. does not refer to it, nor the Apocrypha, nor yet Josephus. Jerome is the first who notices it; but we can see that by his time the name had disappeared, for he discusses it very much as a modern commentator would do, only mentioning a green and fruitful spot in Hinnom, watered by Siloam, where he assumes it was: "Delubrum Baal, nemus ac lucus, Siloe fontibus irrigatus" (in *Jer. vii*). Eusebius, in his *Onomasticon*, under the word *Θαφέζ*, says, "In the suburbs of Ailah is still shown the place so called, to which is adjacent the fuller's pool and the potter's field, or the parcel of ground Acheldamach." Many of the old travellers (see Felix Fabri, i, 391) refer to Tophet, or *Toph*, as they call it; but they give no information as to the locality. Every vestige of Tophet, name and grove, is gone, and we can only guess at the spot; yet the references of Scripture and the present features of the locality enable us to make the guess with the same tolerable nearness as we do in the case of Gethsemane or Scopus. For an account of the modern aspect of the place, see Robinson, *Researches*, i, 202 sq.; Kitto, *Physical History of Palestine*, p. 122 sq. See JERUSALEM.

**Toplady**, AUGUSTUS MONTAGUE, an English clergyman, was born at Farnham, Surrey, Nov. 4, 1740, and received his rudimentary education at Westminster School. It being necessary for his mother to visit Ireland to pursue some claims to an estate, he accompanied her there, and was entered at Trinity College, Dublin, from which he graduated. He received orders June 6, 1762, and, after some time, was inducted into the living of Broadhembury, Devonshire; but on account of his health settled in London in 1775, where he officiated in the chapel of the French Calvinists, Leicester Fields. He died Aug. 11, 1778; and, agreeably to his own request, was buried in Tottenham Court Chapel. The fame of Mr. Toplady rests chiefly upon his controversial

writings against the Methodists, and a few hymns. Against Wesley he may be said to have had a confirmed antipathy, and employed ridicule as well as argument in opposing his opinions and conduct. He published, *The Doctrine of Absolute Predestination Stated and Asserted* (Lond. 1769; N. Y. 1773; later editions):—*Letter to Rev. John Wesley* (1770):—*More Work for Rev. John Wesley* (1772, 8vo):—*Historic Proof of the Doctrinal Culminism of the Church of England* (1774, 2 vols. 8vo):—*The Scheme of Christian and Philosophical Necessity Asserted* (1775, 8vo), in opposition to John Wesley's Tract on that subject:—*Collection of Hymns for Public and Private Worship* (1776, 1787, 12mo):—*Dying Avowal* (1778), etc. He was for some years editor of *The Gospel Magazine*. His works were published after his death by his executor (1783, 8vo), with an enlarged *Memoir* (1825, 6 vols. 8vo). One of his most celebrated hymns is—

"Rock of ages, cleft for me,  
Let me hide myself in thee," etc.

See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Tyerman, *Life and Times of John Wesley*, iii, 139, 190, 210; Belcher, *Historical Sketches of Hymns*, p. 248-250; Christopher, *Hymn-writers and their Hymns*, p. 46-49.

**Topographical Terms.** We have had continual occasion in this *Cyclopædia* to point out the great accuracy with which these are used in the original languages of the Scripture, especially the Hebrew, although often obscured by the want of exactness and uniformity in the A. V. It is our purpose under the present head to present a general view of such terms, referring for details to the respective articles. Much has already been done in this direction by Dean Stanley in the appendix to his work on *Sinai and Palestine*. See GEOGRAPHY.

#### A. LAND.

1. *Tracts* (including especially depressions, levels, and barrens).

1. *Enek* (עֵנֶק), a valley, used in general (Numb. xiv, 25; Josh. viii, 13; xlii, 19, 27; Judg. i, 19, 34; v, 15; 1 Sam. vi, 13 [Bethshemesh]; 2 Sam. xviii, 18 ["dale"]; 1 Kings xx, 23; 1 Chron. xli, 15; Jer. xli, 13; xxxi, 40; xlvii, 5; xlviii, 8; xlix, 4; Mic. i, 4); or specifically "vale of Siddim" (Gen. xiv, 3, 8, 10), "valley of Shaveh" (ver. 17), "vale of Hebron" (xxxviii, 14), "valley of Achor" (Josh. vii, 24, 26; xv, 7; Isa. lxxv, 10; Hos. ii, 15), "valley of Ajalon" (Josh. x, 12), "valley of Rephaim" (xv, 8; xlvii, 16; 2 Sam. v, 18, 22; xxiii, 13; 1 Chron. xli, 15; xiv, 9, 13; Isa. xvii, 5), "valley of Jezreel" (Josh. xvii, 16; Judg. vi, 33; vii, 1, 8, 12; Hos. i, 5; probably also 1 Sam. xxxi, 7; 1 Chron. x, 7), "valley of Keziz" (Josh. xviii, 21), "valley of Beth-rehob" (ver. 28), "valley of Elah" (1 Sam. xvii, 2, 19; xxi, 9), "valley of Berachah" (2 Chron. xx, 26), "valley of Baca" (Psa. lxxxiv, 6), "valley of Succoth" (ix, 6; cviii, 7), "valley of Gibeon" (Isa. xxviii, 21), "valley of Jehoshaphat" (Joel iii, 2, 12), "valley of Decision" (ver. 14), "Beth-emek" (Josh. xix, 27).

2. *Gey* (גַּי or גֵּי), a ravine (A. V. invariably "valley"), used generally (Psa. xxiii, 4; Isa. xxviii, 1, 4; xl, 4; Jer. li, 23; Ezek. vi, 8; vii, 16; xxxi, 12; xxxii, 6; xxxv, 8; xxxvi, 4, 6; Mic. i, 6; Zech. xiv, 4, 5), and specifically of Moab (Numb. xxi, 20; Dent. iii, 29; iv, 46; xxxiv, 6), Hinnom (Josh. xv, 8; xviii, 16; 2 Kings xxiii, 10; 2 Chron. xxxiii, 3; xxxiii, 6; Neh. xi, 30; Jer. vii, 31, 32; xix, 2, 6; xxxi, 35; prob. Isa. xxi, 1, 5; also "valley-gate," 2 Chron. xxv, 9; Neh. ii, 13, 15; iii, 13), Jiphthai-el (Josh. xiv, 14, 27), Zeboim (1 Sam. xlii, 18; comp. Neh. xi, 34), Salt (2 Sam. vii, 13; 2 Kings xiv, 7; 1 Chron. xlii, 12; 2 Chron. xxv, 11; Psa. lx, title), Zephathah (2 Chron. xiv, 10), Charashim (1 Chron. iv, 14; "craftsmen," Neh. xi, 35), "passengers" (Ezek. xxxix, 11), Hamon-gog (ver. 11, 15), Ai (Josh. viii, 2), near the Jordan (2 Kings ii, 16), Gedor (1 Chron. iv, 39).

3. *Shaveh* (שָׁוֶה), a dale, namely, of Kirjathaim (Numb. xxxii, 37), and the kings (Gen. xiv, 17; in 1 Sam. xviii, 18 this word is not used).

4. *Metullah* (מְטֻלָּה), a dell (Zech. i, 8).

5. *Hikdāh* (חִקְדָּה), a broad plain between mountains, used generally (Dent. viii, 7; xi, 11; Psa. civ, 8; Isa. xli, 18; xlii, 14; xl, 4, "plain"); specifically "valley of Jericho" (Dent. xxxiv, 3), "valley of Mizpeh" (Josh. xi, 8), "valley of Lebanon" (ver. 17; xii, 7), "valley of Megiddo" (2 Chron. xxxv, 29; Zech. xii, 11), "plain of Ono" (Neh. vi, 2), "plain of Aven" (Am. i, 5), "plain of Dura"

(Dan. iii, 1), "plain of Mesopotamia" (Ezek. iii, 23, 24; viii, 4; xxxvii, 1, 2; probably the same as "plain of Shinar," Gen. xi, 2).

6. *Mishor* (מִישׁוֹר), downs or table-land, specifically of the maritime Moab (Dent. iii, 10; iv, 43; Josh. xii, 9, 16, 17, 21; xx, 8; 1 Kings xx, 23, 25; 2 Chron. xxvi, 10; Jer. xxi, 13; xlviii, 8, 21).

7. *Sharōn* (שָׂרׁוֹן), a flat, specifically the pasture-land along the Mediterranean (Josh. xii, 19; Cant. ii, 2; Isa. xxxiii, 9; xxxv, 2; lxxv, 1), perhaps that of Gilead (1 Chron. v, 16).

8. *Shepheldāh* (שֶׁפְּתָדָה), a low country, specifically the maritime plain ("vale," Deut. i, 7; Josh. x, 40; 1 Kings x, 27; 2 Chron. i, 15; "valley," Josh. ix, 1; xi, 2, 16; xii, 8; xv, 33; Judg. i, 9; Jer. xxxii, 44; "plain," Jer. xvii, 26; Obad. 19; Zech. vii, 7; "low plains," 1 Chron. xxxvii, 25; 2 Chron. ix, 27; "low country," xxxvii, 10; xxxviii, 18; "Sepheila," 1 Macc. xii, 38).

9. *Midbār* (מִדְבָּר), a wilderness in the sense of an open tract of unoccupied common, in general a "desert" or "wilderness" (Exod. iii, 1; v, 3; xxxii, 31; Numb. xx, 1; Deut. xxxiii, 10; 2 Chron. xxvi, 10; Job xxiv, 5; Isa. xxi, 1; Jer. xxv, 24, etc.); specifically that of Sinai (Numb. xxxiii, 15, 16, etc.; "south," Psa. lxxv, 6); sometimes (with the art.) for Arabia in general, or for those parts of it which extend into Palestine (Gen. xxi, 14; Josh. viii, 15; Judg. i, 16).

10. *Arabāh* (עֲרָבָה), a desert as such, either generally ("wilderness," "desert," or "plain," Job xxiv, 5; xxxix, 6; Isa. xxxiii, 9; xxxv, 1, 6; xl, 3; xli, 19; li, 2; Jer. ii, 6; v, 6; xvii, 6; i, 12; ii, 43; Amos vi, 14; Zech. xiv, 10), or specifically (technically, with the art.) the Arabah ("desert," Ezek. xlvii, 8; "plain," Deut. i, 1, 7; ii, 9; iii, 17; iv, 49; Josh. iii, 16; viii, 14; xi, 16; xli, 1, 3; 1 Sam. xxxiii, 24; 2 Sam. ii, 29; iv, 7; 2 Kings xiv, 26; xxv, 4; Jer. xxxix, 4; lii, 7; "plains," Josh. xi, 2; xli, 8; "champaign," Deut. xi, 30; "Arabab," Josh. xviii, 18; "Beth-arabah," xv, 6), or (in the plur. without the art.) the *Ghor* or "the plains" (2 Sam. xv, 23; xvii, 16) of Moab (Numb. xxi, 1; xxvi, 3, 63; xxxi, 12; xxxiii, 48, 49, 50; xxxv, 1; xxxvii, 13; Deut. xxvii, 1, 8; Josh. xliii, 32) or Jericho (iv, 13; v, 10; 2 Kings xxv, 5; Jer. xxxix, 5; lii, 8).

11. *Jeshimon* (יִשְׁמִינ), a waste, either generally (especially of the "wilderness" of the wandering, Deut. xxxii, 10; Psa. lxxviii, 7; "desert," Psa. lxxviii, 40; cvi, 14; Isa. xliii, 19, 20; "solitary," Psa. cvii, 4), or specifically the barren tract on both sides of the Dead Sea ("Jeshimon," Numb. xxi, 20; xxiii, 29; xxxiii, 49; 1 Sam. xxiii, 19, 24; xxvi, 1, 3).

12. *Kikkār* (כִּכְאָר), a circle (primarily and often, a coin or loaf), specifically (A. V. always "plain") the floor of the valley through which the Jordan runs (2 Sam. xviii, 23; 1 Kings vii, 46; 2 Chron. iv, 17; Neh. iii, 22, xi, 28), or the oasis that formerly existed in (the southern part of) it (Gen. xiii, 10, 11, 12; xix, 17, 25, 28, 29; Dent. xxxiv, 3). Less distinctive than the above are the terms *Gēlithāh*

(גְּלִיתָה), circles, used in the general sense of frontiers ("borders," Josh. xii, 2; "coasts," Joel iii, 4), or the windings of the Jordan ("borders," Josh. xliii, 10, 11; "country," Ezek. xlvii, 8); *Carmel* (צִרְמֶל), a park, employed (besides its use as a proper name) in the general signification of a well-cultivated region ("fruitful field," Isa. x, 8; "fruitful place," Jer. iv, 26; "plentiful field," Isa. xvi, 10; Jer. xlviii, 38; "Carmel," 2 Kings xix, 23; Isa. xxxvii, 24); *Sadēh* (שָׂדֶה), arable land ("field," "country," "land");

*Shedemōth* (שְׂדֵמׁוֹת), highly cultivated soil ("fields" of Gomorrah, Dent. xxxii, 32; Kidron, 2 Kings xxiii, 4; Jer. xxxi, 40; Heshbon, Isa. xvi, 8; comp. Hab. iii, 17); *Abā* (אֲבָ), a meadow, employed as the name of a place, and usually in composition: *Maarēh* (מַעְרֶה), an open tract ("meadows" of Gibeon, Judg. xx, 38; perhaps for מַעְרֶה, a cave; by others read מַעְרֶה, from the root); *Chēlāh*

(חֶלֶה), a (smooth) plot of ground (often in general as a "portion"), in connection with *Sadēh* ("piece," "parcel," etc.) or without it ("field," "piece," "plot," etc.); *Naphāh* (נַפְּחָה), a height, only of Dor ("borders," Josh. xi, 2; "coast," xii, 28; "region," 1 Kings iv, 11), or *Jepheth* (יֶפֶת), in the same connection ("countries," Josh. xvii, 11); *Chēbel* (חֶבֶל), a district (lit. as measured by a rope); applied as a general topographical division ("portion," or "coast," Josh. xvii, 6, 14; xix, 9, 29; Zeph. ii, 5, 6, 7), especially to Argob ("region" or "country," Dent. iii, 4, 13, 14; 1 Kings iv, 13).

11. *Elevations* considered as such, without reference to their extent of area).

1. *Har* (הָר), a mountain, employed for single summits (as Sinai, Gerizim, Zion, Olivet) or for ranges (as Leba-

non); also to the general backbone or highland of Palestine, or of Judah, Ephraim, etc., in particular (A. V. "mountain," "mount," "hill"). Occasionally the cognate form *hōr* (הַר or הָרָר) is employed (usually with the art.), especially with reference to the well-known eminence of that name. The following are the various elevations to which *har* is applied: Abarim, Amara (Cant. iv, 8), Ararat, Bualah, Bual-Hermion (Judg. iii, 3; comp. Josh. xiii, 5), Bethel, Bethor (Cant. ii, 7), Carmel, Ebal, Emek (Josh. xiii, 19), Ephron (xv, 9), Gaash, Gerizim, Gilboa, Gilead, Halak (xi, 17), Heres (Judg. i, 35), Hermion, Hor, Horeb, Jearim (Josh. xv, 10), Olivet (Zech. xiv, 4); the word is not used in 2 Sam. xv, 30, Mizar (Psa. xlii, 6), Moriah, Nebo, Paran (Deut. xxxiii, 2), Perazim (Isa. xxvii, 21), Samaria (1 Kings xvi, 24), Seir, Sephar (Gen. x, 30), Sion, Slion (Sliron or Shenir, all names for Hermion, Deut. iii, 9; iv, 48), Shapher (Numb. xxxiii, 23), Tabor, Zalmon (Judg. ix, 48), Zemairam (2 Chron. xii, 4), Zion. There are also the mountains of the Amorites, of the Amalekites (Judg. xii, 15), of Ephraim, of Esau, of Israel, of Judah, of Naphtali, and of Bashan (Psa. lxxviii, 15).

The following subordinate terms are applied to parts or features of mountains in personification of the human frame: *Rish* (רֹאשׁ), *head*, the top (Gen. viii, 5; Exod. xix, 20; Deut. xxxiv, 1; 1 Kings xviii, 42); *Aznōth* (אֲזָנוֹת), *ears*, perh. some projection on the summit (Josh. xix, 34); *Katlēph* (קַטְלֵף), *the shoulder*, the brow (Deut. xxxiii, 12; Josh. xv, 8, 10; xviii, 16); *Tsad* (צֶדַע), *the side or hill-slope* (1 Sam. xxii, 26; 2 Sam. xiii, 34); *Kiślōth* (כִּסְלֹת), *loins or flanks*, i. e. base (Josh. xix, 13, 18); *Tēla* (תֵּלָא), *a rib*, i. e. spur (2 Sam. xvi, 13); *Shetēm* (שֵׁטֶם), *back*, i. e. rear (Shechem); *Amudh* (אֲמֻדָּה), *elbow*, i. e. bend (ii, 24); *Yerekh* (יֶרֶךְ), *thigh*, i. e. recesses (of Mount Ephraim, Judg. xix, 1, 13; of Lebanon, 2 Kings xix, 23; Isa. xxxviii, 24).

2. *Gibāh* (גִּבְעָה), *a hill* (as in the A. V. invariably), the Arabic *Jebel*, the common designation of less important or individual eminences; applied (besides its general use) to Zion (Isa. xxxi, 4; Ezek. xxxiv, 26), and to the following: the hill of the fox-skins (Josh. v, 8), of Phinehas (xxiv, 39), of Moreh (Judg. vii, 1), of Hachilah (1 Sam. xxiii, 19; xxvi, 1), of Anmah (2 Sam. ii, 24), of Gareb (Jer. xxxi, 39); also an element of the proper names Gibeah, Geba or Gaba, and Gibeon.

3. *Tel* (תֵּל), *a hillock* (the Arabic *Tell*), is a diminutive mound or knoll, usually an artificial heap of rubbish (Deut. xii, 17; Josh. viii, 28; Jer. xxx, 18; xlix, 2); often an element of proper names, as Tel-Abib, Tel-Harsha, Tel-Melah.

The two following are rather appropriations of appellatives as proper names than general designations of an elevated ground:

4. *Piagāh*, or rather *hap-Piagāh* (for it has the art. הַ), *the height* (comp. Engl. "the summit"), was probably the ragged edge of the table-land of Moab where it suddenly broke down into the declivity towards the Dead Sea (Numb. xxi, 20; xxiii, 14; Deut. iii, 17; xxxiv, 1).

5. *Ōphel* (עֹפֶל), *a swelling mound* (so of tumors, Deut. xxviii, 27; 1 Sam. v, 6, etc.), is applied to Elisha's residence near Jericho (2 Kings v, 24), elsewhere (with the doubtful exception of Isa. xxxii, 14; Mic. iv, 8) and everywhere with the art., to the sloping tongue of Mount Moriah on the south (2 Chron. xxvii, 3; xxxiii, 14; Neh. iii, 26, 27; xi, 21).

The following, likewise, are rather designations of portions or elements of hills than the elevations themselves:

6. *Maalēh* (מַעְלֵה), *an ascent or rise*, used (besides its common meaning, Judg. viii, 13) of several localities: that of the Scorpions (Numb. xxiv, 4; Josh. xv, 3; Judg. i, 36), of Adammim (Josh. xv, 7; xviii, 17), of Gur (2 Kings ix, 27), of Ziz (2 Chron. x, 16), of Lulith (Isa. xv, 5; Jer. xlviii, 6), of Bethhoron (Josh. x, 10), of Olivet (1 Macc. iii, 16; comp. 2 Sam. xv, 30), and Saul's city (probably Beth-lehem) (1 Sam. ix, 11).

7. *Morād* (מֹרָד), *a descent or fall*, applied (besides its general use, Mic. i, 4) to the declivity of the Jordan valley (Josh. vii, 6), of Bethhoron (x, 10; 1 Macc. iii, 24), of Horonaim (Jer. xlviii, 5), and Olivet (κατάβασις, Luke xix, 37).

8. *Shephēz* (שֵׁפְעִיז), *a bare spot on a hill* ("high place," Numb. xxiii, 3; Isa. xli, 18; xlix, 9; Jer. iii, 2, 21; iv, 11; vii, 29; xii, 12; xiv, 6).

9. *Ar'its* (אֲרִיץ), *a precipice* ("cliff," Job xxx, 6).

10. *Mingāb* (מִיגָב), *a bluff or inaccessible steep*, as a "refuge" (2 Sam. xxii, 3; Psa. xvii, 3; Isa. xxv, 12, etc.); with the art., a particular fortress of Moab (Jer. xlviii, 1).

11. *Kephīm* (כְּפִיִּם), *crags or rough isolated "rocks"* (Job xxx, 6; Jer. iv, 29). Hence the Syriac name *Cephās*.

There remain the two distinctive terms for a stony prominence, with their concomitants:

12. *Tsūr* (צֹר), Chald. and Arab. *Tur*, a *rock* or outstanding block of stone whether fixed or boulder, of frequent occurrence (A. V. "rock"), both literally (Deut. xv, 25; 2 Kings v, 23, etc.) and figuratively (Psa. xxxi, 2; lxi, 6, etc.), and in only a few cases referring to the height of the rock (Numb. xxiii, 1; Psa. lxi, 2, etc.); in one case assuming the dignity of a proper name, *Tyre*. It is specifically applied to Horeb (Exod. xvii, 6), the rock of Oreb (Judg. vii, 25; Isa. x, 26), and is an element of the names Helkath-hazzurim (2 Sam. ii, 16), and Beth-sur (Josh. xv, 58).

In connection with *Tsūr* twice occurs the peculiar term *Nikrah* (נִקְרָה), *a hole or "cleft"* (Exod. xxxiii, 22; Isa. li, 21).

13. *Sela* (סֵלָה), *a cliff or abrupt and elevated rock*, especially in personification (Psa. xviii, 2; xlii, 9, etc.), and as a parallel with *Tsūr* (Psa. xxxi, 2, 3; lxxviii, 15, 16; Isa. li, 21, etc.). In the A. V. it is loosely rendered "rock," "stone," etc. It is applied generally to the spot in Kadesh where Moses brought forth water (Numb. xx, 8, 10, 11; Neh. ix, 15; Psa. lxxviii, 16; comp. *Tsūr*, Jer. xl, Ezek. xvi, to the rocks of Etam (Judg. xv, 8, 11), Rimmon (xx, 46), and Sela-ham-mahlekoth (1 Sam. xxii, 28); also as a proper name to *Petra* (with the art., 2 Kings xiv, 7; 2 Chron. xxv, 12; and prob. Judg. i, 36; without the art., Isa. xvi, 1; Obad. 3).

In exclusive connection with *Sela* are found the following descriptive terms: *Chagavim* (חֲגָבִים), *chasms* (Cant. ii, 14; Jer. xlix, 16; Obad. 3); *Selph* (סֵלְפָה), *a cleft* (Judg. xv, 8, 11; Isa. li, 21; lvi, 5); *Teechtaach* (תֵּעַחְתָּאח), *a bald spot*, as the summit of a rock exposed to the drying sun (Neh. iv, 13; Ezek. xxiv, 7, 8; xxvi, 4, 14); *Nekik* (נִקִּיק), *a cranny or fissure* (Isa. vii, 19; Jer. xlii, 4; xvi, 16); and *Shen* (שֵׁן), *a tooth or sharp edge or end of a crag* (Job xxxix, 28; 1 Sam. xiv, 4, 5); also as a proper name (vii, 12).

## B. WATER.

1. *Flowing* (including the valley or bed through which it courses): of these the first two are the most general and distinctively descriptive.

1. *Nahār* (נָהָר), a *perennial river* (as almost always rendered in the A. V.), the Arab. *nahr*; used generally in the poetical books of watercourses and of the sea (Job xiv, 11; xx, 17; xxii, 16; xxviii, 11; xl, 23; Psa. xxv, 2; xli, 4; lxxviii, 16; xliii, 3; xlviii, 8; cv, 41; cvii, 38; Cant. viii, 7; Isa. xviii, 2, 7; xxxiii, 21; xli, 15; xlii, 15; xliii, 2, 19, 20; i, 2; lvi, 12); also a stream of fire (Dan. vii, 10); and specifically to some of the great rivers of Mesopotamia and Egypt (Gen. ii, 10, 13, 14; xv, 18; Exod. vii, 9; vii, 15; 2 Kings v, 12; xvii, 6; xviii, 11; 1 Chron. v, 26; Ezra viii, 15, 21, 31, 36; Isa. xlviii, 1; xix, 5, 6; Jer. xli, 7, 8; Ezek. i, 1, 3; ii, 15, 23; x, 15, 20, 22; xxxii, 2, 14; xliii, 3; Dan. x, 4; Zeph. iii, 10), especially the Euphrates (Isa. vii, 20; Jer. ii, 18; Mic. vi, 1, 12; Zech. ix, 10), or that in connection with the Tigris (Aram-Naharaim, Gen. xxiv, 10; Deut. xxxii, 4; Judg. iii, 8; Psa. li, title; 1 Chron. xix, 6), but never the Jordan (unless, perhaps, that of the Dead Sea be intended in Psa. lvi, 6; lxxv, 15; Hab. iii, 8, 9); and with the art. it specifically designates the Euphrates, either alone (Gen. xxxi, 21; xxxvi, 37; Exod. xxiii, 31; Numb. xxii, 5; xlv, 6; Josh. xxiv, 2, 3, 14, 15; 2 Sam. x, 16; 1 Kings iv, 21, 24; xiv, 15; 1 Chron. i, 48; xix, 16; 2 Chron. ix, 26; Neh. ii, 7, 9; iii, 7; Psa. lxxli, 8; lxxx, 11; Isa. viii, 7; xi, 15; xxvii, 12; xlviii, 18; lix, 19; and so in the phrase in Ezra, "beyond the river") or with the name added (Gen. ii, 14; xv, 18; Deut. i, 7; xi, 24; Josh. i, 4; 2 Sam. viii, 3; 2 Kings xxiii, 29; xxiv, 7; 1 Chron. v, 9; xviii, 8; Jer. xli, 2, 6, 10); while in the plural it apparently denotes the canals or branches of the same river (Psa. lxxxix, 25; cxxxvii, 1; Isa. xlv, 27; xlvii, 2; Ezek. xxxi, 4, 15; Nah. i, 4; ii, 6).

The following are the terms which, in the imagery of the East, are applied to the various parts of a river: *Yād* (יָד), a "hand" or *side*, either right or left (Numb. xli, 29; Deut. ii, 37; Judg. xi, 26); *Saphāh* (שֵׁפָה), a "lip" or *brink* of a river or of the sea (Gen. xxii, 17; xli, 3, 17; Exod. ii, 3; vii, 15; xiv, 30; Deut. ii, 36; iv, 48; Josh. xi, 4; xii, 2; xiii, 9, 16; Judg. vii, 12, 22; 1 Sam. xiii, 5; 1 Kings iv, 29; ix, 26; 2 Kings ii, 13; 2 Chron. viii, 17; Ezek. xlvii, 6, 7, 12; Dan. xii, 5; and so of the molten sea of Solomon's Temple, 1 Kings vii, 23, 26; 2 Chron. iv, 2); *Lashōn* (לָשׁוֹן), a "tongue" or *bay* (Josh. x, 2, 5; xvi, 19; Isa. xi, 15); *Gedōth* (גְּדוֹת), *banks* (of the Jordan, Josh. iii, 15; iv, 18; 1 Chron. xii, 15; or of the Euphrates, Isa. viii, 7); *Katēb* (קַטֵּב), *the extreme limit or end* (1 Sam. xiv, 97), whether of a river (Josh. xv, 5; xviii, 19), of the water (iii, 8, 15), or of a lake (Numb. xxxiv, 3; Josh. xv, 2), and so of a country (Gen. xlvii, 21; Exod. xli, 20;

Numb. xxxiii, 37), a mountain (Exod. xix, 12; Josh. xviii, 16), and a town (ver. 15; 1 Sam. xiv, 2); *Maabâr* (מַעְבָּר), or *Maabarâ* (מַעְבָּרָה), a *ford* (as of the Jordan, Josh. ii, 7; Judg. iii, 18; xii, 5, 6; the Jabbok, Gen. xxxii, 22; or the Arnon, Isa. xvi, 9), and so a *pass* between hills (at Michmash, 1 Sam. xlii, 23; xiv, 4; Isa. x, 29; Jer. li, 32).

2. *Náchal* (נָחַל), a *brook* or summer watercourse, the Arabic *wady*, signifying both the stream and the torrent-bed or valley (translated very variously in the A. V., "brook," "valley," "river," "stream," etc.); it is applied to the following places: the torrent of Gerar (Gen. xxvi, 17; 1 Sam. xv, 6), of Eshcol (Numb. xlii, 23, 24; xxxii, 9), of Zered (Numb. xxi, 12; Deut. ii, 13; perhaps Isa. xv, 7; Amos vi, 14), the Arnon (Numb. xxi, 14; Deut. ii, 24; iii, 8), of Jabbok (Gen. xxxii, 23; Deut. ii, 17, 37), of Kanah (Josh. xvi, 8), of Kishon (Judg. iv, 7; 1 Kings xviii, 40; Psa. lxxxiii, 9; probably Josh. xix, 11), of Besor (1 Sam. xxx, 9), of Sorek (Judg. xvi, 4), of Kedron (2 Sam. x, 23; 1 Kings ii, 37; Jer. xxxi, 40), of Gaash (2 Sam. xxiii, 30; 1 Chron. xi, 32), of Cherith (1 Kings viii, 3; perhaps 2 Sam. xxiv, 5), of Egypt (the Wady el-Arish, Numb. xxiv, 5; Josh. xv, 4; 1 Kings viii, 6; Isa. xxxvii, 12), of Shittim (Joel iii, 18).

The following terms designate artificial or temporary flowings of water of greater or less extent, some of them of local use:

3. *Yôr* (יָאֹר or יְאֹר), once (Eccles. xxiv, 37) *ôr* (אֹר, by abbreviation), is properly a *canal* (perhaps an Egyptian word), specifically a branch of the Nile (so in the plur., Exod. vii, 19; viii, 6; 2 Kings xix, 24; Job xxviii, 10; Psa. lxxviii, 44; Isa. vii, 18; xix, 6, 7; xxiii, 21; xxxvii, 26; Ezek. xxi, 3, 4, 5, 10; xxx, 12; Nah. iii, 8), and so the Nile itself (in the sing., Gen. xli, 1, 2, 3, 17; Exod. i, 22; ii, 3, 6; iv, 9; vi, 15, 17, 18, 20, 21, 24, 25; viii, 3, 9, 11; xvi, 5; Isa. xxiii, 10; Jer. xli, 7, 8; Ezek. xxi, 3, 9; Amos viii, 8; lx, 6; Zech. x, 11), and in Daniel (xii, 5, 6, 7) the river Ulai, a similar alluvial stream.

4. *Shichôr* (שִׁיחֹר), a "black" or *turbid* stream, as swollen or discolored by showers, either generally (Isa. xxiii, 3; Jer. li, 18) or specifically (the Belus, Josh. xix, 26; and perhaps the Arish, xlii, 3; 1 Chron. xlii, 5).

5. *Péleg* (פֶּלֶג), a *channel*, a poetical term for the divisions of a stream (Psa. xli, 4), such as the gullies of Reuben (Judg. v, 15, 16), the subdivisions of an irrigating stream (Psa. i, 3), contrasted with *Jubâb* (Isa. xxx, 26), or with *Náchal* (Job xx, 17), or even the dew (Psa. lxxv, 9).

6. *Mikâl* (מִיכָל), a *rivulet* (2 Sam. xvii, 30).

7. *Téldâh* (תֵּעֲלָה), a *conduit* or trench for water raised or poured out for irrigation, such as a ditch (1 Kings xviii, 32, 35, 38), an aqueduct (2 Kings xviii, 17; xx, 30; Isa. vii, 3; xxxvi, 2; see also Job xxxviii, 25), or for a garden (Ezek. xxxi, 4).

The following denote rainfall or its effects more or less direct:

8. *Géshem* (גֶּשֶׁם), a *shower*, i. e. sudden and heavy rain as it ordinarily falls in the East.

9. *Zérem* (זֶרֶם), a *storm* or violent and overwhelming rain (e. g. Job xxiv, 8; Isa. xxv, 4; xxviii, 2; Hab. iii, 10; comp. Matt. vii, 27).

10. *Yubâl* (יֻבָּל), *Yabâl* (יָבַל), or *Ubal* (אוּבָל or אֻבָּל), a *freshet* or overflow of streams from rain (Isa. xxx, 25; xli, 4; Jer. xvii, 3); hence the Ulai itself, as liable to such inundations (Dan. viii, 2, 3, 6).

11. *Aphik* (אֶפֶיִק), an *outburst* or *crevasse* in the banks of an alluvial stream or mountain torrent, throwing the water into new and destructive channels; a poetical term for any unusual rush (Job vi, 15; Psa. xlii, 1; Cant. v, 12; Isa. vii, 7; Ezek. vi, 2; xxxi, 12; Joel i, 20, etc.).

12. *Nozâl* (נוֹזַל), a *gushing*, as tears (Job xxxvi, 28; Isa. xlv, 8), brooklets (Psa. lxxviii, 16; Prov. v, 18, etc.), or the sea (Eccles. xv, 8).

13. *Shibbôleth* (שִׁבְיֹלֶת), a *full stream* (Psa. lxxix, 12, 15; Isa. xxvii, 12).

14. *Eshed* (אֶשֶׁד), a *rapid* (Numb. xxi, 15; Josh. x, 50; xii, 8), in the plur. especially the tumbling stream bursting forth from the roots of Pisgah (Deut. iii, 17; iv, 49; Josh. xii, 3; xiii, 20).

15. *Shetéph* (שֶׁטֶף), a poetical word apparently for a local *inundation* (Job xxxviii, 25; Psa. xxxii, 6; Prov. xxvii, 4; Dan. ix, 26; xl, 22; Nah. i, 8).

16. *Mabûl* (מַבּוּל), a *deluge*, as of the accumulation of waters in the sky (Psa. xxix, 10), and especially Noah's flood.

II. *Sources* of supply, whether living or otherwise.

1. *Ayin* (עַיִן), lit. "an eye," hence a *spring* of natural

water open and running (A. V. usually "fountain," but unfortunately "well" in Gen. xvi, 7; Numb. xxxiii, 9 [comp. Exod. xv, 27]; Deut. viii, 7; xxxiii, 28; 1 Sam. xxix, 1; 2 Chron. xxxii, 3; Neh. ii, 14; iii, 15; xii, 37; Prov. viii, 28). It is applied, in the nature of a proper name (being a marked feature of any locality) to the following places: simply *Ain*, a city of Simeon (Josh. xv, 82; xix, 7; xxxi, 16; 1 Chron. iv, 32); the *Ain*, a landmark of Palestine (Numb. xxxiv, 11); the *two Ains*, i. e. Enam (Josh. xv, 34; comp. Gen. xxxviii, 14, 21); the spring of Jezreel (1 Sam. xxix, 1), of Harod (Judg. vii, 1), the dragon spring (Neh. ii, 13), of Shur (Gen. xvi, 7); also En-dor, En-eglaim, En-gannim, En-gedi, En-haddah, En-hak-kore, En-hazor, En-mishpah, En-rimmon, En-rogel, En-shemesh, En-tappuah, and *Amon*.

2. *Mayân* (מַיָּן), a *fountain* consisting of a collection of springs ("fountain," Gen. vii, 10; viii, 2; Lev. xi, 36; Psa. lxxv, 15; cxiv, 8; Prov. v, 16; viii, 24; xxv, 26; Cant. iv, 12, 15; Isa. xli, 18; Hos. xiii, 15; Joel iii, 18; "well," Psa. lxxxiv, 6; Isa. xli, 8; "springs," Psa. lxxxvii, 7; civ, 10); hence (topographically) a place watered by springs ("fountain," Josh. xv, 9; 1 Kings xviii, 6; 2 Chron. xxxii, 4; "well," Josh. xviii, 15; 3 Kings iii, 19, 26).

3. *Motâd* (מוֹתָד), a *source* or spring-head ("spring," 2 Kings ii, 21; Isa. xli, 18; lviii, 11; "watercourse," 2 Chron. xxxii, 30; "water-springs," Psa. cvii, 38, 35).

4. *Makôr* (מַקּוֹר), a *well-spring* or vein of water (Lev. xii, 7; Jer. li, 36; Psa. xxxvi, 9; Prov. x, 11; xvi, 22, etc.).

5. *Gullôth* (גּוּלּוֹת), *boiling* or *bubbling* springs, used only of those given by Caleb to Achsah (Josh. xv, 19; Judg. i, 15); and in the shorter form *Gal* (גַּל), a *heap* or spring (Cant. iv, 12); hence billow of the sea (Psa. xliii, 7; cvi, 25; Isa. xlviii, 18; Jon. ii, 3, etc.).

6. *Mabbâbâ* (מַבְבָּבָה), a *gushing* spring ("spring," Isa. xxxv, 7; xlix, 10; "fountain," Eccles. xli, 6).

The following represent (mostly artificial) collections or receptacles of water:

7. *Bêr* (בְּאֵר), a *well* (as everywhere in the A. V., except "pit" in Gen. xiv, 10; Psa. lv, 23; lxxix, 15; Prov. xxiii, 27) dug in the earth or rock and yielding a perpetual supply: three such are specially named (Gen. xxvi, 20, 21, 22), besides Jacob's (John iv, 6), and one at Bahurim (2 Sam. xvii, 18). The word stands alone as a proper name (Numb. xxi, 16; Judg. ix, 21), and enters as an element into the names Beer-labai-rol, Beer-sheba, Beeroth-bene-Jaakam, Beeroth, Beer-elim, Balaith-beer, Berothah, and Berothai. Cognate with this is

8. *Bôr* (בּוֹר or בִּרָּה), a *cistern* (A. V. usually "pit" or "well"), whether dug (Deut. vi, 11; Exod. xxi, 33; 2 Chron. xxvi, 10) or built (Isa. xiv, 19; Jer. li, 13), and whether empty (and so often used for "dungeon," Gen. xxxvii, 20; xli, 14; Exod. xli, 29; 1 Sam. xlii, 16; 2 Sam. xliii, 20; 1 Chron. xi, 22; Jer. xxxvii, 16; xxxviii, 6; Zech. ix, 11) or as a receptacle of spring or rain water (Psa. vii, 15; Isa. xlv, 15; Jer. vi, 7 [Kethib]; Ezek. xxvi, 20, etc.). Special cisterns of this kind are sometimes mentioned, as they are next in importance to springs in the East; thus in Sechu (1 Sam. xix, 22), of Sirah (2 Sam. xli, 26), of Bethlehem (xxii, 15; 1 Chron. ix, 17), at Mizpah (Jer. xli, 7, 9; comp. 2 Kings xxv, 26).

9. *Berekâh* (בְּרִיכָה), a *pool* (as uniformly rendered in the A. V.), the Arab. *Birkah*, an artificial tank for surface water. Special pools of this kind are mentioned at Gibeon (2 Sam. i, 13), Hebron (iv, 12), Samaria (1 Kings xxii, 38), Heshbon (Cant. vi, 4), and several at Jerusalem, e. g. the upper (2 Kings xvi, 17; Isa. vii, 3; xxxvi, 3), the lower (xxii, 9), or old (ver. 11), the king's (Neh. ii, 14; Eccles. ii, 6), another (Neh. iii, 16), Siloam (ver. 15; John iv, 7), Bethesda (v, 2).

10. *Mikvêh* (מִקְוֵה), a *reservoir* or large receptacle for water for irrigation, etc. ("gathering together," Gen. i, 10; "pools," Exod. vii, 19; "plenty [of water]," Lev. xi, 36; "ditch," Isa. xli, 11).

11. *Agâm* (אֲגָם), a *pond* of stagnant water (Exod. vii, 19; viii, 5; "standing water," Psa. cvii, 35; cxiv, 8; hence "reeds," which abounded in such receptacles, Jer. li, 32).

12. *Kerôth* (כִּרּוֹת), *pits* or wells in holes dug to water sheep ("cottages," Zeph. ii, 6); and so likewise *Mikrêh* (מִכְרֵה), a pit for the same purpose ("salt," ver. 9).

13. *Mashabîm* (מִשְׁאָבִּים), *troughs* for watering animals (Judg. v, 11; comp. Gen. xxiv, 19, 20, 44, 45, etc.). The following are not employed with topographical exactness:

14. *Gêb* (גֵּב) or *Gêbê* (גֵּבָה), a *ditch* (2 Kings iii, 16; Isa.

xxx, 14; Ezek. xlvii, 11); hence Gebim, a place near Jerusalem (Isa. x, 31).

15. *Páchath* (פָּחַת), a hollow, used as a trap ("pit," 2 Sam. xvii, 9; xlvii, 17; Isa. xxiv, 17, 18; Jer. xlviii, 43, 44; "hole," ver. 27; "snare," Lam. iii, 47). Akin to this is

16. *Sháchath* (שָׁחַת) or *Shucháh* (שֻׁחָה), a pitfall, poetically used (variously rendered in the A. V., Psa. ix, 16; Prov. xxvi, 27; Jer. ii, 6; xviii, 20, etc.).

17. *Gumáts* (גֻּמְאִים), a deep hole or sunken shaft (Eccles. x, 8).

18. *Mahamaráh* (מַהְמָרָה), a gulf or whirlpool ("deep pit," Psa. cxi, 10).

19. *Bodies* of water and their connections. For these there really is but one Heb. term.

1. *Yám* (יָם), sea (as always rendered in the A. V. except when used for "west"), including lakes and expanses of rivers; applied specially to the Mediterranean (with the art., Josh. x, 47; sometimes with other adjuncts, as "great," Numb. xxvii, 6, 7; "hinder" or "western," Dent. xi, 24; and so sometimes when the situation is not west, as in Egypt (Exod. x, 19), Arabia (xxvii, 13; xxxviii, 12), the Red Sea, that of Chinnereth, the Dead Sea ("salt sea," "sea of the desert," "eastern sea"); also (like the Arab. *Bahr*) of great rivers, as the Nile (Jer. xix, 5; Nah. iii, 8; Ezek. xxxii, 9), the Euphrates (Isa. xlvii, 1; Jer. li, 26), dually of the laver in the Temple (1 Kings xxv, 13; 1 Chron. xviii, 8). Connected with *Yám* are the following:

*Miphráts* (מִפְרָצִים), a bay ("breaches," Judg. v, 17).

*Chóph* (חוֹף), a shore, or rather perhaps *cove* (comp. "Haifa"), as a lesser form of the preceding ("haven," Gen. xlix, 13; "side," Deut. i, 7; "coasts," Josh. ix, 1; "shore," Judg. v, 17).

*Muchóz* (מְחוֹז), a port or "haven" (Psa. cvii, 30).

*Iyám* (אִיָּם), *islands*, or the distant shores of the Mediterranean, which seemed such to the Hebrews (Isa. xx, 6; xxxiii, 2, 6; Ezek. xxxvii, 6; Jer. li, 10, etc.).

*Waves* of the sea are represented (besides *Gal*, above) by *Dákl* (דָּכַל), literally ("wave," Psa. xciii, 3); *Mishbár* (מִשְׁבָּר), an *overwhelming* (metaphor, "wave," 2 Sam. xxii, 5; Psa. xlii, 7; "billow," Jon. ii, 3); *Bamáh* (בָּמָה), a *high place*, usually on land, but put (Job ix, 8) for a ridge of the sea.

2. *Tehóm* (תְּהוֹם), the *deep*, a poetical word for ocean, corresponding to our "main" (Gen. viii, 2; Job xxviii, 14; xxxviii, 6, 30; Prov. viii, 27, 28; Ezek. xxvi, 19; xxxi, 15; Jon. ii, 6; Hab. iii, 10; fully "the great deep," Gen. vii, 11; Psa. xxxvi, 7; Isa. li, 10; Amos vii, 4); more rarely any other great mass of waters (as those covering the earth at Creation, Gen. i, 2; Psa. civ, 6; or the subterranean waters, Gen. xlix, 25; Deut. xxxiii, 13; also floods, Job xli, 32; Psa. xlii, 7; Ezek. xxxi, 4). In the plural (תְּהוֹמוֹת) it designates either the surges of the sea (Exod. xiv, 5, 8; Psa. xxxiii, 7; lxxvii, 16; lxxviii, 15; cvi, 9; Prov. iii, 20; viii, 24; Isa. lxiii, 13), or its abysses (Psa. cvii, 26; cxxxv, 6; cxlviii, 7); occasionally the depths of the earth (lxxi, 20), as a supply of streams (Deut. vii, 7).

#### C. ACCESSORIES.

These are such features as obviously affect the character of the country for purposes of occupation, but not, like the foregoing, of a permanently essential nature.

I. *Internal* (including natural cavities and grottoes).

1. *Meárah* (מְעָרָה), a *cave* ("hole," Isa. ii, 19; "den," xxxii, 14; Jer. vii, 11), Arab. *Megharah*; used as a proper name alone (Josh. xiii, 4), but generally with the adjunct of locality: of Addullam (1 Sam. xxii, 1; 2 Sam. xxi, 13), Makkedah (Josh. x, 16, etc.), Engedi (1 Sam. xxiv, 3), Obadiah (1 Kings xviii, 4), Zoar (Gen. xix, 30), Machpelah, Horeb (1 Kings xix, 9).

2. *Chór* (חוֹר) or *Chár* (חָר), a *hole* in the earth or rock (1 Sam. xiv, 11; Job xxx, 6), hence in the proper names Horite, Hauran, Beth-horon, Horonaim, Hor-haglidgad.

3. *Mechulláh* (מְחֻלָּה), a *fissure* or cavern (Isa. ii, 19).

4. *Mínharáh* (מִנְהָרָה), a *burrow* or hiding-place (Judg. vi, 2).

II. *Superficial* (including objects of natural growth, such as conspicuous and enduring vegetation).

1. *Yáar* (יָעַר), a *forest* or dense growth of trees, but occasionally a thicket only (Isa. xli, 13). In the historical books it is the usual name for the wooded tracts of Palestine, whether east or west of the Jordan; namely, the "forest of Hareth" (1 Sam. xxii, 5), "the forest of Lebanon" (1 Kings vii, 2; x, 17, 22; 2 Chron. ix, 16, 20), "the wood of Ephraim" (2 Sam. xviii, 6, 8, 17; see also Josh.

xvii, 15, 18; 1 Sam. xiv, 25, 26; 2 Kings ii, 24). In the poetical parts of Scripture it often occurs, and is translated "forest" (but "wood" in Deut. xiv, 6; 1 Chron. xvi, 33; Psa. lxxx, 13; lxxxiii, 14; xcv, 12; cxxxiii, 26; Eccles. ii, 6; Cant. ii, 3; Isa. vii, 2; Ezek. xxiv, 29; Mic. vii, 14). It forms an element of the names Kirjath-jearim and Mount Jearim (Josh. xv, 10). In two passages (1 Sam. xiv, 27; Cant. v, 1) the word is applied to a *honey-comb*, which is the frequent product of forests.

2. *Chóresh* (חוֹרֶשׁ), a *wood*, i. e. a thick growth of vegetation, whether in a single tree or in a copse: thus in Ezek. xxxi, 3 it is used for the thick foliage ("shroud") of the cedar; elsewhere for a limited piece of woods ("forests," 2 Chron. xxvii, 4; "bough," Isa. xvii, 9; "wood of Ziph," 1 Sam. xxvii, 15, 16, 18, 19).

3. *Iardés* (יָרְדֵּס), a Persian word for a *park* or plantation of timber ("forest," Neh. ii, 8) or fruit-trees ("orchard," Eccles. ii, 5; Cant. iv, 13).

4. *Éts* (עֵץ), a *tree* in the widest sense, whether an individual one (Gen. i, 29; ii, 16; Deut. xii, 2; Josh. x, 16 [comp. Acts x, 38]; Isa. vii, 2, etc.) or "wood" as its product (Exod. vii, 19; Lev. xi, 32; 1 Sam. vi, 14, etc.); hence "timber" (1 Kings v, 6, etc.), or a piece ("stick," Numb. xv, 32; 1 Kings xvii, 10; sometimes as wrought "staff" of a spear, 1 Sam. vii, 7; "handle" of an axe, Deut. xix, 6).

The most important or generally used names of particular species of trees are the following, which do not always seem to be used exactly or distinctively:

5. *El* in some of its various forms (all from אֵל, אֵלִי, or אֵלֶּל, to be *strong*), which, according to Gesenius, are used thus: *Eyl* may be either an *oak* or a *terebinth*; where *Alón* is opposed to *Eláh* (as in Isa. vi, 13; Hos. iv, 13), the former is the oak, the latter the terebinth; on the other hand, all the words appear to be interchangeable, for the same tree which is *Alón* (Josh. xix, 33) is also *Elón* (Judg. iv, 11), while that which is *Elón* ("plain," ix, 6) is likewise *Eláh* (Gen. xxxv, 4) and *Aláh* (Josh. xxiv, 26). The following are the several terms and their application:

*Eyl* (אֵיל), in the sing., occurs only in the combination El-pan (Gen. xiv, 6); in the masc. plur. *Eylím* (אֵילִים) or *Alárim* (אֱלָרִים) of a collection of trees ("oaks," Isa. i, 29; "trees," lxi, 8; Ezek. xxxi, 14), and the proper name Elim (from the seventy palms there, Exod. xv, 27; xvi, 1; Numb. xxxiii, 9, 10). The fem. plur. *Eylóth* (אֵילֹת) or *Eyláth* (אֵילָת), as a proper name Elóth or Elath, probably refers to the palm-grove at Akabah (Deut. ii, 8; 1 Kings ix, 26; 2 Kings xiv, 22; xvi, 6; 2 Chron. viii, 17; xxvi, 2).

*Eláh* (אֵלָה), designated a notable tree, perhaps the terebinth ("oak," Gen. xxxv, 4; Isa. i, 30; Ezek. vi, 13; "elm," Hos. iv, 13; "tell-tree," Isa. vi, 13; with the art., Judg. vi, 11, 19; 2 Sam. xviii, 9, 10, 14; 1 Kings xiii, 14; "Elah," 1 Sam. xvii, 2, 19; xxi, 9).

*Eylón* (אֵילָן), a similar notable tree, perhaps the oak ("plain" of Moreh, Gen. xii, 6; Deut. xi, 30; of Mamre, Gen. xiii, 18; xiv, 13; xviii, 1; of Zaannaim, Judg. iv, 11; of the pillar, ix, 6; of Meonenim, ver. 37; of Tabor, 1 Sam. x, 3), and also stands as a proper name, Elon (Josh. xix, 43).

*Ilán* (אֵילָן), a great tree (Dan. iv, 10, 11, 14, 20, 23, 26).

*Aláh* (אֱלָה), a marked tree ("oak," Josh. xxiv, 26), as a prop. name Alláh-mélek ("the king's oak," xix, 26).

*Alón* (אֱלֹן), the same "oak," Gen. xxx, 8; Isa. xlv, 14; Amos ii, 9; in connection with *Eláh*, Isa. vi, 13; Hos. iv, 13; of Bashan, Isa. ii, 13; Ezek. xxvii, 6; Zech. xi, 9), and in the names Allon-bachuth (Gen. xxxv, 8) and Allon-zaannaim (Judg. iv, 11), or simply Allon (Josh. xix, 33).

6. *Éshel* (אֶשֶׁל), prob. the *tamarisk* ("tree," 1 Sam. xxii, 6; xxxi, 13; "grove," Gen. xxi, 3).

7. *Asheráh* (אֲשֵׁרָה), rendered in the A. V. "grove," was an idolatrous *image* or pillar of Astarte (Judg. vi, 25-27), which, on account of its height, was planted in the ground, Deut. xvi, 21; as at Samaria, 1 Kings xvi, 32, 33; 2 Kings x, 20; xvii, 16; at Bethel, xxiii, 15; at Ophrah, Judg. vi, 25; and even at Jerusalem, 2 Kings xxi, 37; xxiii, 6; so in the plur. אֲשֵׁרִים, Baal's *cippi*, 1 Kings xiv, 23, etc.); and hence the goddess herself (xv, 13, etc.).

Among other species of trees that seem to have given names to localities we mention *Rimmon*, the pomegranate; *Láz*, the almond; *Tamar*, the palm; *Shittáh* (in the plur. *Shittím*), the acacia; *Libneh* (or *Libnah*), the white poplar; and *Róthem* (*Rithmah*), the Spanish broom.

III. *Human structures* (including residences or defences), whether collective or individual, public or private.

1. *Ír* (עִיר) or *Ár* (עָר), a *city* (as always rendered in the A. V., except "town," in Deut. iii, 5; 1 Sam. xvi, 4; xxiii,

7; xxvii, 5; Esth. ix, 9; Jer. xix, 15; "court," in 2 Kings xx, 4, designates a fortified place (x, 25; xvii, 9; xlii, 8; 1 Chron. xi, 5, etc.), such as Jerusalem, Samaria, Jericho, etc., especially walled cities (Gen. xxiii, 10, 18; xxxiv, 20, 24; Josh. viii, 29; x, 4; Judg. xvi, 2, 8; Ruth iii, 11; 1 Sam. xxiii, 7; 1 Kings iv, 13; xvii, 10; 1 Chron. xix, 9; 2 Chron. viii, 5, etc.), in contrast with others (Lev. xxv, 29, 31; 1 Sam. vi, 18); but in one case (Deut. iii, 5) we have "unwalled cities." The former of these two cognate terms occurs as part of a proper name in Ir-hat-temarim (Deut. xxxiv, 3; Judg. i, 16; iii, 13; 2 Chron. xxi, 15), Ir-ham-melach (Josh. xv, 62), Ir-shemesh (xix, 41), Ir-nahash (1 Chron. iv, 12), Ir-ha-heres (Isa. xix, 18), Rechoboth-ir (Gen. x, 11); the latter as Ar (Numb. xxi, 15; Deut. ii, 9, 18, 29) or Ar-Moab (Numb. xxi, 28; xxii, 36; Isa. xv, 1).

2. *Kiryâh* (קִירְיָה), a town, apparently the ancient (hence the Canaanitic *Kirjath*) and poetical (but proverbial, Deut. ii, 36; iii, 4; 1 Kings i, 41, 45; or Samaritan, Ezra iv, 10, 12, 15, 16, 19, 21) word for a city (Numb. xxi, 28; Psa. lxxviii, 2; Isa. xxv, 2), especially in the proper names Kirjath, Kirjathaim, Kirjath-arba, Kirjath-hnzoth, Kirjath-jearim, Kirjath-arim, Kirjath-baal, Kirjath-sepher, Kirjath-sannah, Kerioth, and Karchah.

3. *Perazâh* (פֶּרָזָה), only with the plur. *Perazôth*, פֶּרָזוֹת, and the collective *Perazôn*, פֶּרָזוֹן, or *Perazi*, פֶּרָזִי, an unwalled town or open village of considerable size and character (Deut. iii, 5; 1 Sam. vi, 18; Esth. ix, 19; Ezek. xxxviii, 11; Zech. ii, 4; but "villages" in Judg. v, 7, 11; Hab. iii, 14, means *chiefs*), and in the designation of the Perazites, or inhabitants of open villages.

4. *Kaphâr* (כֶּפֶר), a hamlet or small collection of houses ("village," 1 Sam. vi, 18; 1 Chron. xxvii, 25; Cant. vii, 11), occurs chiefly in combination as a proper name: Chephar-ha-Ammonai (Josh. xviii, 24), Chephirah (ix, 17), Caphtar-saba (1 Macc. vii, 31), Capernaum, and many Talmudic places (Caphar), like the Arab. *Kefr*.

5. *Chatsêr* (חֲצֵר), a village (literally an enclosure, originally a "court" or vestibule (as of the Tabernacle, Exod. xxvii, 9, etc.; or Temple, 1 Kings vi, 36; 2 Kings xxi, 57; of a palace, xx, 4; Esth. i, 5; Jer. xxxvi, 20; comp. 22; prison, Neh. iii, 25; Jer. xxii, 2, etc.; or even of a common house, 2 Sam. xvii, 18), but topographically designating a permanent Bedawin encampment of tent-cloths spread over stone walls (Gen. xxi, 16; Isa. xlii, 11), such as the Hazerim dwelt in (Deut. ii, 23). It appears especially in the proper names Hazerôth, Hazer-uddar, Hazer-enan, Hazer-gaddah, Hazer-hat-ticon, Hazer-shual, Hazer-ensah (or -suisim), and (in a slightly changed form, *Chatsôr*, חֲצוֹר), Hazer.

6. *Chavôth* (חָבוֹת), in the plur. (*Chavôth*, חָבוֹת), a tent-village of a more temporary or frail character than the preceding, as not being surrounded by any defence ("town," Numb. xxxii, 41; Josh. xiii, 30; 1 Kings iv, 13; 1 Chron. ii, 23; "Havoth," Deut. ii, 14; Judg. iv, 13).

The following are rather separate erections or fortifications than congregated abodes, but they are of a fixed character in distinction from the simple and primitive *ôhel* (אוֹהֶל), or "tent." For all these the general name is *Bayith* (בַּיִת), a house (as almost always rendered in the A. V.), which is the common expression for a fixed habitation (very generally as *built* [from בָּנָה] of substantial materials, but occasionally a frailer structure, Gen. xxvii, 15; Judg. xviii, 31; 1 Sam. i, 7; 2 Kings xviii, 7; Job viii, 14), and for a permanent dwelling (as appears from the form of the letter called from it, ב, which represents the three sides of a house, the other being left open for a doorway). The main element of the firmer and most enduring of these erections is denoted by the word *Kîr* (קִיר), cognate with *Kiryâh* (above), a wall (as of a house, whether exterior or interior, Lev. xiv, 37; 1 Sam. xx, 25; 1 Kings vi, 5; Ezek. xxiii, 14, etc.; hence the side of an altar, Lev. i, 5; v, 9; a fence or enclosure, Numb. xxi, 25; and the wall of a town, only xxxv, 4; as the distinctive term for this last is *Chomâh*, חוֹמָה; see Josh. ii, 15, where both occur together), which itself is also used as a proper name, Kir (both in Moab, Isa. xv, 1; comp. 2 Kings iii, 25; Isa. xvi, 7, 11; Jer. xlviii, 31, 36; and in Assyria, 2 Kings xvi, 9; Isa. xxii, 6; Amos i, 5; ix, 7).

7. *Heykâl* (הַיְכָל), a palace or large edifice for royalty (Prov. xxv, 28; Isa. xxxix, 7; Dan. i, 4, etc.), especially the temple of Jehovah at Jerusalem (2 Kings xxiv, 13; 2 Chron. iii, 17; Jer. i, 28; Hag. ii, 16; Zech. vi, 14, 16; elsewhere distinguished by the epithet "holy," or denoted by "Lord's house"), and so of the tabernacle previously (1 Sam. i, 9; iii, 3; Psa. v, 8; poetically for the heavens, xi, 4, etc.), specifically for the holy place (1 Kings vi, 5, etc.).

8. *Bîrâh* (בִּירָה), a citadel (a word of wide etymological

affinities, all denoting *strength* of defence [see *BARIS*], a term of later Hebrew (for the acropolis adjoining the Temple, Neh. ii, 8; vii, 2; or the Temple itself, 1 Chron. xxix, 1, 19) or Chaldaic use (the Persian "palace," Ezra vi, 2; Neh. i, 7; Esth. i, 2; ii, 8; iii, 15; viii, 14; ix, 6, etc.; Dan. viii, 2), and in the plur. ("castles," 2 Chron. xvii, 12; xxvii, 4).

9. *Armôn* (אַרְמוֹן), once (Amos iv, 8) *Harmôn* (חֲרָמוֹן), the keep or *harem* of a "palace," a poetical term (1 Kings xvi, 18; 2 Kings xv, 25; 2 Chron. xxxvi, 19; Psa. xlviii, 3, 13; Isa. xxv, 2; Jer. xvii, 21; Amos i, 4; ii, 2, etc.).

10. *Tîrâh* (תִּירָה), a Bedawin castle (Gen. xxv, 16; Numb. xxxi, 10; "palace," Ezek. xxv, 4).

11. *Mîtsâr* (מִצְרֵי), a fortress, commonly used with *îr* ("fenced city," Numb. xxxii, 17, 36; Josh. x, 20; xix, 35; 1 Sam. vi, 18; 2 Kings iii, 19; x, 2; xvii, 9; xviii, 8; 2 Chron. xvi, 19); such as Tyre (Josh. xix, 29; 2 Sam. xxiv, 7), frequent in the poetical books ("fortress," or "defenced city," Psa. lxxix, 40; Isa. xvii, 8; Jer. i, 8; Nah. iii, 12, etc.), as well as in the historical ("stronghold," Numb. xiii, 19; 2 Kings viii, 12). Cognate is *Bîrâron* ("stronghold," Zech. ix, 12).

12. *Matôr* (מַצֹּר) or *Metûrâh* (מִצְרָה), a fort (A. V. "fort," "fenced," "stronghold," etc.), either alone (2 Chron. xi, 10) or with *îr* (viii, 5; xi, 5, 10, 11, 23; xiii, 4; xiv, 6), to denote the fortified towns of Judah and Benjamin, once (Zech. ix, 3) Tyre; and (especially in the poetical books) for offensive works of a siege ("siege," "bulwarks," or "fort," Deut. xx, 19, 20; xxviii, 5, 3; Isa. xxxix; Nah. iii, 14, etc.). As a proper name (2 Kings xix, 24; Isa. xxxvii, 25; xix, 6) Mazar seems to denote Egypt (Mizraim).

The remaining terms are rather designations of temporary and natural protection than artificial and settled abodes.

13. *Maôz* (מַצֹּד) or *Meonâh* (מְעוֹנָה), a stronghold, such as a "rock" (Judg. vi, 26), elsewhere poetically as an attributive for *military strength* ("fort," "fortress," "stronghold," "strength," Psa. xxviii, 1; such as Tyre, Isa. xxiii, 4, 11, 14; or Egypt, xxx, 2, 3; Zech. xxx, 15).

14. *Maôn* (מָוֶן) or *Meonâh* (מְעוֹנָה), a secure dwelling-place, as of Jehovah (at Shiloh, 1 Sam. ii, 29, 32; at Jerusalem, Psa. xxvi, 8; lxxviii, 5; lxxvi, 2); and so a den of a lion, Job xxxviii, 40; Psa. civ, 22; Cant. iv, 8; Nah. ii, 11, 12; Amos iii, 4; or other beast, Job xxxvii, 8; Jer. ix, 11; x, 22; xlix, 33; i, 37).

15. *Metsâd* (מִצְדָּה) or *Metûdâh* (מִצְדָּה), a lair (from the idea of hunting), prop. of wild beasts and hence of birds (Job xxxix, 28; Jer. xlviii, 41; Ezek. xvii, 20), frequent in the poetical books ("munition," "fortress," "defence") in connection with *Sela* and *Tôr*; and topographically applied to the hill forts of Judah ("hold," 1 Sam. xxii, 4, 5; xxiv, 22; 2 Sam. xxiii, 14; 1 Chron. xi, 16; xii, 8, 16; "fort," Ezek. xxxiii, 27; "stronghold," Judg. vi, 2; 1 Sam. xxiii, 14, 19, 29), especially Zion ("hold," 2 Sam. v, 17; 1 Chron. xi, 16; "fort," 2 Sam. v, 9; "castle," 1 Chron. xi, 6, 7; "stronghold," 2 Sam. v, 7).

16. *Sôk* (סֹךְ) or *Sukkâh* (סֻכָּה), a booth or canopy of leafy boughs, as a habitation for man or beast ("booth," Lev. xxiii, 42, 43; Neh. viii, 14, 15, 16, 17; Job xxxi, 20; Jon. iv, 5; "pavilion," Psa. xxxi, 20; "cottage," Isa. i, 8; "tabernacle," iv, 6), such as Jacob constructed (Gen. xxviii, 17), and the Israelites occupied during the Festival of "Tabernacles" (Lev. xxiii, 43, in commemoration of their first stopping-place out of Egypt, "Succoth," Exod. xiii, 20), and hence applied to the retreat of the lion ("den," Psa. x, 9; "coveit," Job xxxviii, 40; Jer. xxv, 38), and to Jerusalem, Jehovah's retreat (Psa. lxxvi, 2), to military tents ("tent," 2 Sam. xi, 11; "pavilion," 1 Kings xx, 12, 16), and to the clouds ("tabernacle," Job xxxvi, 29; "pavilion," 2 Sam. xxii, 12; Psa. xviii, 11).

17. *Mîstâr* (מִסְתָּר), a covert or hiding-place (A. V. "secret" place, etc.), once (Isa. iv, 6, "covert") *Mîstôr* (מִסְתּוֹר), as a shelter from the elements (Isa. iv, 6), or concealment (Jer. xiii, 17; xxiii, 24; xix, 10), and especially the lurking-place of lions (Psa. xvii, 12; Lam. iii, 10) and of violent men (Psa. x, 8, 9; lxxiv, 4; Heb. iii, 14).

In connection with this whole subject, we may add that we have had frequent illustrations, in the aptness with which geographical names are given in the Bible, of that nice sense of locality which a simple people, especially one of nomadic instincts, invariably exhibits. Indeed, the whole Hebrew language is an exemplification, particularly in the varied import of the nearly synonymous roots, which unfortunately the lexicons generally fail accurately to distinguish, of the close observance of all physical traits. In like manner the de-

scriptions of locality, which, to a modern Occidental, often seem vague and casual, are generally found, when carefully scanned, to be remarkably precise and graphic, a fact which later travellers are beginning to appreciate. Instances of this abound in the dooms-day book of Joshua, and many of them we have pointed out under the art. **TRIBE**. A question of much practical importance has arisen respecting the lists of towns in the various tribes given in that book, whether they are arranged in geographical order. The presumption, growing out of the minute character of the delineation, evidently copied from some memorandum of survey, is in favor of such accuracy, and this is confirmed by the fact now well recognised by commentators, that the list of nations mentioned in Acts ii, 9-11 proceeds regularly from the East to the West. Lieut. Conder, in his papers in the *Quar. Reports* of the "Pal. Explor. Fund," bases many of his proposed identifications of places on this theory, which he elaborately defends. We are inclined, however, to doubt its trustworthiness for that purpose, as the Oriental mind is not so uniformly methodical as this view implies; and we have found very frequent reason to depart from such a rule in the indications of identification that we have pointed out under the various places named.

**Tor.** See **TURTLE**.

**Torah** (fully *Masséketh Sépher Toráh*, מסכת ספר תורה), or *Treatise of the Law*, is a Talmudic treatise containing enactments as to the manner in which, and the material on which, the law is to be written. The five chapters of which this treatise consist are full of information, especially the first and fourth; the former containing some notices concerning the Sept., the latter bearing on the sacred text. As to the Sept., see, under that head, *Talmudic Notices concerning the Septuagint*, in this *Cyclop.* The fourth chapter gives the passages in which the word אלהים denotes the Deity or has a different signification. These differences are also noticed in correct editions of the Hebrew text by the words קדש and חול, i. e. holy or profane, thus enabling the student at once to discern whether אלהים should be translated *God* or *gods*, or *judges*, etc. This treatise has been edited, with six others, by Kirchheim (Frankfort-on-the-Main, 1851), under the title *שבע מסכתות קטנות*; also with the Latin title, *Septem Libri Talmudici Parvi Hierosolymitani quos nunc primum secundum MS. e Bibliotheca Clarissimæ Carmolii edidit*, etc. (B. P.)

**Torch** is the occasional rendering in the A. V. of לָפִיד, *lappid* (Zech. xii, 6), which usually signifies (and is translated) a *lamp*; and so λαμπάς (John xviii, 3). In Nah. ii, 3 [Heb. 4] it represents פֶּלֶדֶחַ, *pelédh*, which rather signifies *iron*. See **STEEL**. The distinc-

Modern Oriental Torches: 1. Persian; 2. Arabian.

tion in the East between a torch and a lantern (q. v.) is not very marked, as both are often but forms of flambeaus. See **LAMP**. A flaming torch is sometimes quoted by the prophets as the symbol of great anger and destruction (Zech. xii, 6). So also Isaiah (vii, 4) compares Rezin, king of Syria, and the king of Israel, two bitter enemies to Ahaz, king of Judah, to "two tails of smoking firebrands." See **FIREBRAND**.

**Tordesillas, MOSES**, a Jewish writer who flourished in 1773 at Avila, in Spain, is the author of *זכר האמונה*, in which he critically examines 125 passages of the Old Test. regarded by the Christians as Messianic. This work originated through a controversy which he had had with a Jewish convert at Avila; and, for the benefit of the congregations of Avila and Toledo, he collected all the material, which he laid down in his *זכר אמונה*, forming the second part of a work bearing the general title *זכר חזון*, the first part of it being entitled *זכר דורה*. See Fürst, *Bibl. Jud.* iii, 435; De' Rossi, *Dizionario Storico* (Germ. transl.), p. 317 sq., and *Biblioth. Jud. Antichrist.* p. 26. (B. P.)

**Torgau, CONVENTION OF.** Among the German Reformers there was considerable difference of opinion on various subjects, which opinions were advanced and supported with great warmth. All good men friendly to the new Church were desirous of a termination of so many bitter contests, because it was manifest that the papists turned them to their own advantage. After an unsuccessful endeavor to bring about a settlement of these controversies by a conference at Altenburg, it was thought best that a formula or book should be drawn up by wise and moderate theologians, in which these controversies should be examined and decided. James Andreä, a theologian of Tübingen, was appointed to this work in 1659. This business was hastened by the conduct of Kaspar Peucer, son-in-law of Melancthon, who, with others, endeavored in 1570 to abolish throughout Saxony the doctrine of Luther respecting the Lord's supper, and introduce instead that of Calvin. In 1571 they explicitly declared their dissent from Luther respecting the doctrine of the supper and the person of Christ; and, the better to accomplish their wishes, they introduced into the schools a catechism drawn up by Pezel, and favorable to the doctrine of Calvin. Accordingly the elector Augustus summoned a convention of theologians at Torgau in 1574. Having clearly learned the views of the Crypto-Calvinists, as they were generally called, he treated them with severity, imprisoning some and banishing others. After various consultations, James Andreä especially, in a convention of many divines assembled at Torgau, by order of Augustus, drew up the treatise designed to bring peace to the Reformed Church, and which received the name of the *Book of Torgau*. This book, after being

Ancient Roman Torches: a. Lantern from the Column of Trajan; b, c. Flambeaus from various sculptures.

examined and amended by many theologians, was again submitted to certain select divines assembled at Germany, and resulted in the famous *Formula of Concord* (q. v.). See Mosheim, *Ecclesiastical History*, V, iii, 151 sq.

**Toribio**, ALFONSO MONGROVEJO, *St.*, a Spanish prelate, was born at Mayorga in 1538, and studied at Valladolid, giving himself meanwhile to the most austere form of religious life. From this he was called, in 1575, to the College of San Salvador. In 1580 he was made archbishop of Lima; he was consecrated at Seville, and immediately departed for Peru. He entered Lima May 24, 1581. The diocese covered a large extent of territory, and the means of communication were very poor; but Toribio determined to make a tour of it in person. He sent evangelists into the remote districts, and did all in his power to elevate the Indians, who became much attached to him. His liberality was great, and crowds of poor people would wait at his door for alms. His knowledge of the language rendered access to the people easy, and his labors were incessant. But the fatigue of his long journeys and the warm climate proved fatal, and Toribio died during his third episcopal tour, March 23, 1606. He was beatified by Clement XI in 1679, and canonized in 1726. See Prescott, *Conquest of Peru*, iv, 3; Pinelo, *Vida de Don Toribio*, Arzobispo de Lima (Madrid, 1658).—Hoefler, *Nouv. Biog. Générale*, s. v.

**Torm' mah** (Heb. *Tormah'*, תֹּרְמָה, *deceit*; Sept. *ἐν κρυφῇ* v. r. *μετὰ ὑπόψιν*; Vulg. *clam*) occurs only in the margin of Judg. ix, 31, as the alternative rendering of the Hebrew word which in the text is given as "privily." By a few commentators it has been conjectured that the word was originally the same with Arumah (q. v.) in ver. 41, one or the other having been corrupted by the copyists. This appears to have been first started by Kimchi. It is adopted by Junius and Tremellius; but there is little to be said either for or against it, and it will probably always remain a mere conjecture.

**Tormentor** (βασιανστής, Matt. xviii, 34) signifies one who examines by torture, and is derived from βασανίζω, which in its passive form means to be tossed as by the waves of the sea. Torture, judicially applied, must be distinguished from punishment, however cruel and barbarous it may be; whether it be capital, as impalement or crucifixion; or secondary, as the putting-out of the eyes, or any other kind of mutilation. For torture was not intended to act fatally, nor was it, when so denominated, inflicted as a part of a judicial sentence. See TORTURE. It was usually employed to extort confession or evidence, as when Claudius Lysias, the chief captain, commanded Paul to be brought into the castle and "examined by scourging" (Acts xxii, 24). In the text first cited it is used as the means of obtaining payment of a debt. The "tormentors" there referred to are the jailers, who were allowed to scourge and torture the poor debtors in their care, in order to get money from them for the grasping creditors, or else to excite the compassion of friends and obtain the amount of the debt from them. In early times of Rome there were certain legal tortures, in the shape, at least, of a chain weighing fifteen pounds, and a pittance of food barely sufficient to sustain life (see Arnold, *Hist. of Rome*, i, 136), which the creditor was allowed to apply to the debtor for the purpose of bringing him to terms; and, no doubt, they often did not stop here. The incident was one with which the hearers of our Lord's parables were, no doubt, familiar, and its introduction here shows how savage and tyrannical was the spirit of the age. It is no small mark of the mild and equitable spirit of the legislation of Moses that it did not recognise the use of torture in judicial trials. See CORPORAL INFLICTIONS. For the "torment" or *tympanism* of 2 Macc. vi, 19, 28, see EXECUTION; PUNISHMENT.

**Torquemada** (Lat. *Turrecremata*), Juan de, a celebrated Spanish Dominican, was born at Valladolid in 1388. He became a friar in 1403; accompanied his superior to the Council of Constance in 1417; graduated from the University of Paris in 1424; taught theology there; was admitted doctor of the Sorbonne in 1429; and was successively chosen prior of the Dominican convents of Valladolid and Toledo. In 1431 he was sent by pope Eugenius IV to the Council of Basle, where he strenuously supported the court of Rome, and contributed to the condemnation of the doctrines of Wycliffe and Huss. He attended, in 1439, the Council of Florence as papal commissary, and was foremost in drawing up the "articles of reunion" between the Greek and Latin churches, and received from the pope the title of "defender of the faith." He was created cardinal Dec. 18, 1439; and in the year following attended, in the pope's name, the Council of Bourges, where he kept the French prelates on the side of the pope. He became bishop of Palestrina in 1455, and of Sabina in 1464. His death took place at Rome, Sept. 26, 1468. His principal works are, *Meditationes Joannis de Turrecremata*, etc. (Rome, 1467, fol.; Augsburg, 1472, fol.; and many later editions):—*Questiones Spirituales Convicii Delicibus Preferentes super Evangelium* (Rome, 1477, fol.; Nuremberg, 1478):—*Commentarii in Decretum Gratiani* (Lyons, 1519, 6 vols. fol.; Venice, 1578; Rome, 1726). Many other of his writings remain unpublished. See Hoefler, *Nouv. Biog. Générale*, s. v.

**Torquemada, Tomas de**, the first inquisitor-general of Spain, was born in 1420, and was a monk of the Order of St. Dominic at Torquemada, Spain, and prior of the monastery of Santa Cruz at Segovia. He was appointed by Ferdinand and Isabella inquisitor-general in 1483; and confirmed in that post Oct. 17 of that year by pope Innocent VIII, who gave him the title of "confessor of sovereigns." In the course of sixteen years he gave to the flames no less than eight thousand eight hundred victims, besides executing nearly as many in effigy, condemning ninety thousand to perpetual imprisonment and other severe punishments, and expelling from Spain above eight hundred thousand Jews. In his later years his authority was curtailed by the appointment of four colleagues by order of pope Alexander VI. He died at Avila, Sept. 16, 1498. See Hoefler, *Nouv. Biog. Générale*, s. v.

**Torre**, LELIO DELLA, professor in the Rabbinic College at Padua, was born in the year 1804. When sixteen years of age he was teacher in Turin, and in 1826 he was appointed preacher there. When, in 1827, the Rabbinical school was opened at Padua, he was appointed one of its professors. He died July 9, 1872. Torre wrote in German, Italian, French, and Hebrew. Of his publications we mention, *Specchio, ossia Tavola Sinottica delle Conjugazioni Ebraiche secondo le Regole dell' Analogia*, etc. (Padua, 1828):—*Cinque Discorsi detti in Padova, con Annotazioni* (ibid. 1834):—*Della Società della Legge Mosaiica* (ibid. 1836):—*Della Condizione degli Ebrei sotto l' Imperio Germanico nel Medio Evo* (ibid. 1842):—סֵפֶר הַהִלְכוֹת, *I Salmi Volgarizzati sui Testo Massoretico, ed Illustrati con Argomenti e Note* (Vienna, 1845):—פְּרָקֵי אֲבוֹת, *Sentenze dei Padri, Nuovo Traduzione*, etc. (2d ed. Padua, 1862). See Fürst, *Bibl. Jud.* iii, 435 sq.; Kayserling, *Bibliothek jüdischer Kanzelredner*, in *Homiletisches u. literarisches Beiblatt* to the second vol. (Berlin, 1872), p. 58; Servi, in *Educatore Israelitico*, July 15, 1872. (B. P.)

**Torrentius** (*Van der Beken*), LÆVINUS, a Flemish Roman Catholic divine, was born at Ghent in 1525. Educated first at Louvain, he went thence to Bologna, in order to study civil law and antiquities. There he so distinguished himself by his skill in polite literature, especially poetry, that he became known to the literati of Europe. He took holy orders, and was at length raised to the bishopric of Antwerp.

Hence he was translated to the metropolitan church of Mechlin, where he died, in 1595. Torrentius founded a college of Jesuits at Louvain, to which he left his library, coins, etc. Besides *Latin Poems* (Antwerp, 1594; printed by Plantin), he wrote *Commentaries upon Suetonius* (1592) and *Horace* (1608, 4to).

**Torrey, Joseph, D.D.**, a Congregational divine, was born at Rowley, Mass., Feb. 2, 1797; and graduated at Dartmouth College in 1816. After studying theology at Andover, he became in 1819 pastor of a Congregational Church at Royalton, Vt. In 1827 he accepted the professorship of Greek and Latin in the University of Vermont, which position he retained until 1842, when he was chosen professor of intellectual and moral philosophy. This chair he occupied until his death, at Burlington, Vt., Nov. 26, 1867. He was president of the university from 1863 to 1865. Mr. Torrey was the author of a posthumous volume of *Lectures:—A Theory of Art* (1875);—editor of the *Remains of President James Marsh* (1848);—*Select Sermons of President Worthington Smith* (1861); to both of which he prefixed carefully prepared *Memoirs*;—and translator of Neander's *General History of the Christian Religion and Church* (Boston, 1854, 5 vols.). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Torrey, Reuben**, a Congregational minister, was born at Weymouth, Mass., April 3, 1789, and was a graduate of Brown University in the class of 1816. He was licensed to preach in 1817 by the Rhode Island Congregational Consociation, and, while pursuing his theological studies, preached more or less in different places. He was ordained in May, 1820, and became pastor of the Congregational Church in Eastford, Conn., where he remained for twenty years (1820-40). On resigning, he acted as a supply of the pulpit of the Church in North Mansfield, Conn., for two years (1841-43), and for the next five years (1843-48) was pastor of the Church in Prospect, Conn. Subsequently he was pastor for seven or eight years of the Church in North Madison, Conn., and in 1852 removed to Elmwood, a part of Providence, R. I., to take charge of a Church newly formed in that section of the city. His pastorate with this Church continued for eight years (1852-60). The remainder of his life was spent in Providence, where he died, Sept. 22, 1870. (J. C. S.)

**Torrignano, Pietro**, a celebrated Italian sculptor, was born at Florence about 1472. He studied the antiquities in the gardens of Lorenzo the Magnificent in company with Michael Angelo; but, becoming jealous of the growing distinction of the latter, he assaulted him so violently that he was obliged to leave Florence. He went to Rome, where he was employed by pope Alexander VI; but he afterwards gave up his profession, and became a soldier under the duke of Valentino, and also under Vitelli and Piero de' Medici. He again returned to his profession, and, executing several bronze figures for some Florentine merchants, accompanied them to England. He was employed by Henry VIII in erecting the tomb of Henry VII in Westminster Abbey, which was completed in 1519, and, it is supposed, the tomb of Margaret, countess of Richmond, in Henry VII's Chapel. He left England finally in 1519, and visited Spain, where he executed several pieces of sculpture for convents, etc., and, among others, a group of the *Virgin and Infant*. This was so beautiful that the duke de Arcos commissioned him to make a copy of it, promising liberal payment. Disappointed in receiving a large quantity of copper coin, amounting to only thirty ducats, he seized a mallet and shivered the work into a thousand pieces. The duke accused him to the Inquisition as a sacrilegious heretic for destroying a figure of the Holy Virgin. Torrignano was condemned, but avoided the ignominious end which awaited him by

X.—I

starving himself. He died in 1522. See Spooner, *Biog. Dict. of Fine Arts*, s. v.

**Tortoise** (טָפִי, *tsâb*, so called, according to Gesenius, from *moving slowly*; Sept. ὁ κροκόδειλος ὁ χερσαίος; Vulg. *crocodilus*) occurs only in Lev. xi, 29 as the name of some unclean animal. Bochart (*Hieroz.* ii, 463) with much reason refers the Heb. term to the kindred Arabic *dhâb*, "a large kind of lizard," which, from the description of it as given by Damir, appears to be the *Psammosaurus sciurus*, or *Monitor terrestris* of Cuvier (*Règne Anim.* ii, 26). This lizard is the *waran el-hard* of the Arabs, i. e. the land-*waran* (*Varanus arenarius*), in contradistinction from the *waran el-bahr*, i. e. the water-lizard (*Monitor Niloticus*). It is common enough in the deserts of Palestine and North Africa. It is probably the κροκόδειλος χερσαίος of Herodotus (iv, 192) and Dioscorides (ii, 71), or perhaps their σκιρκος, the *Scincus officinalis*. See SNAIL. The land-monitor (*Psammosaurus sciurus*) is a lizard three or four feet in length, which, living in the sandy and rocky wastes, subsists on the beetles and other small animals that are found in such arid situations. It is of a yellowish or dusky tint, with darker green spots and bands, and with yellow claws. Tristram, however, thinks the animal in question is the "*Uromastix spinipes*, a large species of lizard very common in the des-

*Uromastix spinipes.*

ert and sands of North Africa and Arabia. It is also well known in the Judæan wilderness, living in holes of the rocks and burrowing in the sand. It sometimes attains the length of two feet. Its most peculiar characteristic is its powerful spiny tail, broad and massive, and incrustated with close rows of stout prickly scales. This is its weapon of defence, which it uses with effect against its assailant. Its color is grass green, spotted with brown, but darker when irritated. It has a slow and awkward gait, turning its head from side to side with great caution as it walks. It rarely bites, but when it does so nothing will induce it to relinquish its grasp. It feeds chiefly on beetles, but will attack larger animals, even chickens, when in confinement. It is eaten by the Arabs" (*Nat. Hist. of the Bible*, p. 255). See LIZARD.

The same Hebrew word טָפִי, *tsâb*, is translated "covered [wagons]" in Numb. vii, 3, and the same idea seems to be prominent in Isa. lxvi, 20, where our translators have rendered it "litters." According to Gesenius, it means in both these passages a sedan or palanquin (so called from being gently borne). See LITTER.

Several kinds of tortoise inhabit Palestine and the surrounding regions. Among the land-tortoises the bordered tortoise (*Testudo marginata*), probably the χελώνη χερσαία of Aristotle—a little species closely resembling the common *T. Græca*—replaces this latter in Egypt and the coast of Barbary; and a near ally, *T. Mauritanica*, extends throughout North Africa and Western Asia, from Algiers to the Caspian. Besides

Water-tortoise of Palestine (*Emys Carpica*).

these, several marsh-tortoises (*Emys*, etc.) are common in the fresh waters of those regions, and are particularly troublesome to horses wading or drinking (see Wood, *Bible Animals*, p. 507 sq.). See ZOOLOGY.

**Tortosa, COUNCIL OF** (*Concilium Dertusense*). This council was held in Tortosa, a cathedral city of Catalonia, Spain, in 1429, by Peter, cardinal de Foix. All the prelates and many ecclesiastics of the kingdoms of Aragon and Valencia, and of the principality of Catalonia, attended. The king's letters-patent confirming the liberties and immunities of the Church were read, and at the end of the fourth session twenty canons were approved and published.

4. Orders that all beneficed clerks and ecclesiastics in holy orders shall keep breviaries, in order that they may see the office privately when hindered from attending in the choir.

5. Forbids the elevation of unworthy persons to holy orders.

6. Orders curates every Sunday to teach by catechising some part of the things necessary to be known by Christians in order to salvation, which it declares to be as follows: (1.) What they ought to *believe*, contained in the articles of the faith. (2.) What they ought to *pray for*, contained in the Lord's Prayer. (3.) What they ought to *keep*, contained in the ten commandments. (4.) What they ought to *avoid*, viz. the seven mortal sins. (5.) What they ought to *desire*, viz. the joys of Paradise. (6.) What they ought to *fear*, viz. the pains of hell.

9. Orders neophytes to bring their children to church within eight days after their birth, in order that they may receive baptism.

15. Forbids the delegates of the holy see to go beyond their commission.

See *Mansi, Concil. xii*, 406.—Landon, *Manual of Councils*, s. v.

**Torture** (Lat. *torquere*, to twist) is pain inflicted as a judicial instrument for extracting evidence from unwilling witnesses or confessions from accused persons. The practice is an ancient one. In ancient Athens slaves were always examined by torture, and their evidence seems on this account to have been deemed more valuable than that of freemen. Any one might give up his slave to torture, or demand that of his opponent, and a refusal to do so was considered as a strong presumption against a person. No free Athenian could be examined by torture, and it was not inflicted upon Roman freemen or citizens until the time of the emperors. Then it was sometimes inflicted upon even freemen to extract evidence of the crime of *lesa majestas*, and thus it became a part of the Code of Justinian. Hence it was adopted during the Middle Ages by all European states in which the Roman law was made the basis of legislation. It was adopted early and extensively by the Italian municipalities. In Germany elaborate apparatus for its infliction existed, not merely in the dungeons of the feudal castles, but in the vaults beneath the town-halls of Nuremberg and Ratisbon, where the various implements used are yet to be seen. It continued to be practiced in the prisons of Germany until they were visited by Howard, in 1770. It ceased to be a part of the judicial system in France in 1789; and in Scotland it was still in frequent use after the Restoration, and was only abolished by 7 Anne, c. 21, sec. 5. In Russia it was done away with in 1801. In the United States it has never been reckoned an adjunct of judicial examination.

The first instance we have of its use in England is in 1310, in aid of the ecclesiastical law, during the struggle between pope Clement V and the Templars. Ed-

ward II, when requested to sanction the infliction of torture by the inquisitors in the case of certain Templars accused of heresy and apostasy, at first refused, but, on a remonstrance by Clement, he referred the matter to the council, and on the recommendation of the council the inquisitors were authorized to put the accused to torture, but without mutilation or serious injury to the person or effusion of blood. During the Tudor period, the council assumed the power of directing torture-warrants to the lieutenants of the Tower and other officers against state-prisoners, and occasionally also against persons accused of other serious crimes. Under James I and Charles I torture was less resorted to, and only in state-trials. It was inflicted for the last time in May, 1640. The worst application of torture was found in the hands of the Inquisition. In 1282 pope Innocent IV called on the secular powers to put to the torture persons accused of heresy in order to extract confessions against themselves and others. The necessity of secrecy in the proceedings led to its extensive adoption, and to refinements of cruelty in its use before unknown. See INQUISITION.

The instruments of torture have been many and various. The scourge was the usual instrument of torture among the Romans, who also made use of the *equuleus*, a sort of upright rack, with pincers added to tear the flesh, etc. The most celebrated instrument was the "rack," known in the south of Europe as early as the 2d century, but introduced into the Tower by the duke of Exeter, constable of the Tower. The "boot" was the favorite French instrument of torture. In this rings of iron were passed around the legs, and wooden wedges driven between them and the flesh until the muscles were reduced to jelly. Among other means of torture were the "thumb-screw;" "iron gauntlets;" the "little ease," a narrow cell in which the prisoner was confined for several days, and in which the only position possible was one which cramped every muscle; the "scavenger's" (properly Skevington's) daughter," the invention of Sir William Skevington, an instrument which compressed the body so as to start the blood from the nostrils and often from the hands. The torture by water, crucifixion, the fastening of limbs to trees which were forced into proximity to each other and then suffered to fly apart, and pouring melted lead into the ears, are a few of the means by which punishment has been inflicted.

See Barnum, *Romanism as It Is* (index); Jardine, *On the Use of Torture in the Criminal Law of England* (Lond. 1839, 8vo); Maclaurin, *Introduction to Criminal Trials*; Nicolas, *Si la Torture est un Moyen Sûr à vérifier les Crimes Secrets* (1681, 12mo); Reitemaier, *Sur la Question chez les Grecs et les Romains*; Mittermaier, *Das deutsche Strafverfahren*, vol. i. See TORMENTOR.

**Torwood Excommunication.** After the skirmish at Airmoss and the execution of Cameron, Cargill, during a field-preaching at Torwood, near Stirling, publicly excommunicated the king, the duke of York, the duke of Monmouth, the duke of Lauderdale, the duke of Rothes, General Dalziel, and Sir George Mackenzie. According to tradition, Rothes, during a dangerous sickness the following year, sent for some of the Presbyterian ministers, and in a fit of remorse confessed the justice of the sentence. The duke of Hamilton added, "We banish these men, and yet when dying we send for them."

**Tosaphôth** (תוספות) denotes those *additions* or *supplementary glosses* to Rashi's (q. v.) commentary on the Talmud which are found along with the latter in every edition of the Talmud. The disciples of Rashi, when they found that their master's expositions could be extended and improved, set about this work of exposition immediately after his death, filling up every gap, and using up every scrap which their searcher had left. Out of reverence for him, they would not

put down their opinions in an independent manner, but denominated them *חוספוט*, additions, and hence they were called *Tosaphists*. The first Tosaphists were his two sons-in-law, R. Meier ben-Samuel and Jehudah ben-Nathan, the latter called by way of abbreviation *Ribam*, רבי יחידה בן נחן; his three grandsons, R. Isaac, R. Samuel, and R. Jacob Tam, sons of R. Meier, who are respectively called from their initials *Ribam*, רייבם = ר' יצחק בן מאיר, *Rashbam* (q. v.), and *R. Tam* (q. v.); and, lastly, R. Isaac ben-Asher of Spire, called *Riba*, רייבא = ר' יצחק בן אשר, also a relative of Rashi.

The latter is called *הרוספוט*, or the Tosaphist *kar' izoxhv*. Besides these, we mention Joseph Porat, son of Samuel ben-Meier; Isaac ben-Samuel of Dompierre, also called Isaac the Elder, a nephew of R. Tam; Samuel ben-Natronai, called *Rushbat*, רשב"ט; Isaac ben-Mordecai, of Augsburg; Isaac Halaban ben-Jacob, of Prague, etc. They are enumerated by Zunz in his *Zur Geschichte und Literatur* (Berlin, 1845, p. 29 sq.), where the student will find all necessary information. (B. P.)

**Tosi**, JOSEPH, a Roman Catholic theologian, was born in the year 1824 at Witschein, in Styria. In 1846 he received holy orders, and in 1853 he was promoted at Vienna as doctor of theology. In the same year he was called as professor of dogmatics to Grätz, where he remained until the year 1868. He then went to Vienna and lectured until the year 1871, when he was appointed canon of St. Stephen's, and died May 14, 1875. He published, *Lectures on the Syllabus Errorum of the Papal Encycl.* dated Dec. 8, 1864 (Vienna, 1865):—*Ueber Religionslosigkeit und Wissenschaft, Darwinismus und den Ursprung des Menschen* (Grätz, 1865). Comp. *Literarischer Handweiser für das kathol. Deutschland*, 1866, p. 59, 153; 1875, p. 252. (B. P.)

**Tostado**, ALONSO, a Spanish prelate, was born at Madrigal in 1400. He studied at Salamanca, and at the age of twenty-two received his degree. He was elected to the chair of theology, and soon gained a wide reputation. In 1431 he was sent to the Council of Basle, and by some of his utterances attracted the attention and condemnation of the holy see. In 1443 he was ordered to appear before an assembly of theologians at Sienna, and was convicted of unsound doctrine. On his return to Spain, through the intercession of the king, he received the bishopric of Avila, and was also member of the Council of Castile. He died near Avila Sept. 3, 1455. His works are numerous, and a large number were published at Venice in 1547, 24 vols. fol.; they consist of mystical commentaries on the lives of the Bible and on Matthew. Besides these are *Comentario sobre Eusebio* (Salamanca, 1506):—*Confesionario* (Logroño, 1520). See Viera y Clavijo, *Elogio de Alonso Tostado*; Antonio, *Bibl. Hisp. Vet.*—Hofer, *Nouv. Biog. Générale*, s. v.

**Total Abstinence.** See TEMPERANCE.

**Toü** (1 Chron. xviii, 9, 10). See Toï.

**Toule**, COUNCIL OF. See TOUSI, COUNCIL OF.

**Toulmin**, JOSHUA, D.D., an English Unitarian minister, was born in London May 11, 1740. Educated at a Dissenting academy, he became minister of a Dissenting congregation in Colyton, Devonshire, and in 1765 of a Baptist congregation in Taunton. Afterwards he adopted Unitarian views from Harvard College in 1794, and in 1804 was chosen one of the ministers of the Unitarian congregation at Birmingham, formerly presided over by Dr. Priestley. Here Dr. Toulmin continued to labor until his death, July 23, 1815. He was an able preacher and an industrious writer. He wrote, *Sermons to Youth*, etc. (Honiton, 1770, 12mo; 2d ed. Taunton, 1789, 8vo):—*Memoirs of F. Socinus* (Lond. 1777, 8vo):—*Dissertations on the Evidences of Christianity* (1785, 8vo):—*Review of the Life of John Biddle* (1789, 8vo; 1791, 8vo):—*History of the Town of Taunton* (1791, 4to):—*Sermons*

(1810, 8vo):—*Historical View of the Protestant Dissenters in England under King William* (1814, 8vo):—besides single sermons, works on baptism, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

**Toulouse, COUNCILS OF** (*Concilium Tolosanum*). These councils were held in Toulouse, a city of France, capital of the department of Haute-Garonne, and situated on the Garonne. It has in it the very remarkable Church of St. Sernin, a masterpiece of Romanesque architecture, recently restored by Viollet-Leduc. The Church of the Cordeliers was erected in the 13th century, and destroyed by fire in 1871.

I. The first Council of Toulouse was held Sept. 13, 1056, eighteen bishops being present. Rambaldus, archbishop of Arles, and Pontius, archbishop of Aix, presided. Thirteen canons were published.

1. Forbids simony.
2. Forbids any fees for consecrating a Church.
3. Forbids all buying and selling of Church preferment.
4. Enacts that, if a clerk have entered upon the monastic state in order to obtain an abbacy, he shall be compelled to continue the religious life, but shall be entirely excluded from the honor he coveted.
5. Orders abbots to see that their monks follow the rule of St. Benedict in their manner of life, food, dress, etc. Any abbot or monk altering (*corrigentes*) these institutions to be corrected by his own bishop.
6. Enjoins celibacy upon priests, deacons, and other clerks holding ecclesiastical dignities; offenders to be deprived.
7. Forbids, under pain of excommunication, lay persons to apply Church property to their own use.
8. Forbids the laity to plunder the effects of dead persons.
9. 10 and 11. Relate to the payment of Church dues and tithes.
12. Forbids, under pain of excommunication, all intercourse with heretics and excommunicated persons, unless for the purpose of converting them and bringing them back from their evil ways.

In this council Berenger, viscount of Narbonne, made complaint of the conduct of archbishop Guifroi, accusing him of giving away the lands appertaining to the Church of Narbonne to those who had borne arms for him. The event of his complaint is unknown. See Mansi, *Concil.* ix, 1084.

II. The second council was held July 15, 1119, pope Calixtus II presiding, assisted by his cardinals, and the bishops and abbots of Languedoc, Gascony, and part of Spain. Ten canons were published.

1. Is directed against the buying and selling of holy orders or livings.
2. Is directed against the followers of Peter de Bruis, a sect of Manichæans, ordering that the secular authorities shall repress those who affect an extreme piety, condemn the holy sacrament of Christ's body and blood, infant baptism, the priesthood, and other ecclesiastical orders, and lawful matrimony; directs that they shall be driven out of the Church as heretics.
3. Forbids to make slaves of free persons.
4. Excommunicates monks, canons, and other clerks who quit their profession, or who allow their beard and hair to grow after the fashion of the people of the world.

See Mansi, x, 856.

III. Held in 1161, convoked by the kings of France and England, who were present. One hundred bishops and abbots of the two kingdoms attended, and solemnly recognised Alexander III as pope, to the exclusion of Victor II. See Mansi, x, 1406.

IV. The Fourth Council of Toulouse was held in September, 1229. The archbishops of Narbonne, Bordeaux, and Auch were present, with many other bishops and abbots. Raymond, count of Toulouse, with several lords, attended; also the seneschal of Carcassone, and the two consuls of Toulouse. Forty-five canons were published for the extinction of heresy and the re-establishment of peace.

The first five enact that the archbishops, bishops, and exempted abbots shall appoint in every parish a priest and two or three laymen of good character, who shall take an oath constantly and minutely to search for heretics in houses, caves, and every place in which they may be hidden; and, having taken precautions that those whom they have discovered shall not escape, to report the fact to the bishop, the lord of the place, or his bailiff.

6. Orders that the house in which any heretic shall be discovered be destroyed.

8. Forbids to punish any one as a heretic before the bishop has given his sentence.

10. Orders that heretics who have of their own accord recanted shall not be suffered to remain in their own villages, but shall be carried to some place free from all suspicion of heresy; orders them to wear two crosses upon their dress; forbids to intrust them with any public office, etc.

11. Orders that such as pretend to be converted through fear of death, or from any other motive, shall be shut up, in order that they may never again corrupt others.

12. Orders every man above fourteen years of age, and every woman above twelve, to abjure heresy, to make open profession of the Romish faith, and to swear to hunt out the heretics. This to be repeated every two years. Recusants to be looked upon as heretics.

13. Requires all persons arrived at years of discretion to confess to their own priest three times a year, and to receive the holy communion at Christmas, Easter, and Whitsuntide; those who neglect to do so to be considered as heretics.

14. Forbids the laity to have in their possession any copy of the books of the Old and New Test. except the Psalter and such portions of them as are contained in the Breviary or the Hours of the Blessed Virgin; most strictly forbids these works in the vulgar tongue.

16. Declares all wills to be void which are not made in the presence of the priest or his vicar.

26. Forbids to absent one's self from church on Sunday.

28. Declares the following to be festival days, viz. all Sundays; Christmas-day; feasts of St. Stephen, St. John the Evangelist, the Holy Innocents, St. Sylvester, the Circumcision, the Epiphany; feasts of the Purification, the Annunciation, the Assumption, and the Nativity of the Blessed Virgin Mary; Easter; the two days after Easter; the three Rogation days; Whit-Sunday; the two days after Whit-Sunday; feasts of the Nativity of St. John the Baptist, and the Invention and Exaltation of the Holy Cross; the feasts of the twelve apostles; feasts of St. Mary Magdalene, St. Lawrence, St. Martin, St. Nicholas, and the Dedication of St. Michael; and the feasts of the dedications of every church and of all saints to whose honor churches have been built.

42. Forbids women possessed of castles and other fortified places to marry men who are enemies to the faith and to peace.

43. Forbids judges to receive bribes.

44. Orders that counsel be provided gratis for the poor.

See Mansi, xi, 425.

V. This council was held in May, 1590, by the cardinal de Joyeuse, archbishop of Toulouse, assisted by the bishops of St. Papoul, Rieux, and Lavaur, and the deputies of the bishops of Lombez, Pamiers, Mirepoix, and Montauban. Various regulations were made relating to the duties of bishops, chapters, beneficed clerks, priests, and others; they also embrace the following subjects: the holy sacraments, relics, indulgences, festivals, vows, seminaries, hospitals, excommunications, residence, etc.—Mansi, xv, 1378. See Landon, *Manual of Councils*, s. v.; Hagenbach, *Hist. of Doctrines*, i, 143.

**Toup**, JONATHAN, an English clergyman and eminent critic, was born at St. Ives in December, 1713; and, after a preparatory education in that town and at the school of Mr. Gurney, of St. Merryn, removed to Exeter College, Oxford, where he took his degree of A.B. His A.M. was received at Pembroke Hall, Cambridge, in 1756. In 1760 he was appointed to the rectory of St. Martin's, and in 1774 he was installed prebendary of Exeter. In 1776 he was instituted to the vicarage of St. Merryn's. He died Jan. 19, 1785. His classical publications occupy the first rank: *Emendationes in Suidam*, etc. (Lond. 1760, 8vo; pt. ii, 1764, 8vo; pt. iii, 1766, 8vo); —*Epistola Critica ad Celeberrimum Virum Gulielmum Episcopum Glocestriensem* (ibid. 1767, 8vo); —*Curæ Posteriores, sive Appendicula Notarum atque Emendationum in Theocritum, Oxonii nuperrime publicatum* (ibid. 1772, 4to); —*D. Longini Omnia quæ extant Gr. et Lat. recensuit*, etc. (Oxon. 1778, 8vo, with later editions). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Chalmers, *Biog. Dict.* s. v.

**Tournély**, HONORÉ, a French Roman Catholic divine, was born Aug. 28, 1658, at Antibes. He received his early education from his uncle, and when duly prepared he entered the University of Paris. In 1686 he was made doctor of the Sorbonne, in 1688 professor at Douay, in 1692 professor at the Sorbonne, but retired

in 1716, devoting himself entirely to literary pursuits, and died Dec. 26, 1729. He published, *Prælectiones Theologicae de Mystero Trinitatis* (Paris, 1726); —*Prælectiones Theol. de Eccles. Christi* (ibid. eod.); —*Prælectiones Theol. de Sacramentis in Genere* (ibid. eod.); —*Prælectiones Theol. de Sacramentis Baptismi et Confirmationis* (ibid. 1727); —*Prælectiones Theol. de August. Eucharistia Sacramentis* (ibid. 1729); —*Prælectiones Theol. de Sacramentis Penitentiae et Extremæ Unctionis* (ibid. 1728). See Winer, *Handbuch der theol. Literatur*, i, 420, 449, 450, 453, 457, 460, 461; *Theologisches Universal-Lex.* s. v.; Zedler, *Universal-Lex.* s. v. (B. P.)

**Tournemine**, RENÉ JOSEPH, a French Jesuit, was born April 26, 1661, at Rennes, of a noble family. In 1680 he entered the Order of the Jesuits, became a monk in 1695, and lectured on philosophy and theology till he was called to Paris, in 1701, to edit the so-called *Mémoires de Trévoux*. In 1718 he was appointed librarian, and died May 16, 1789. His numerous writings are contained, for the most part, in the *Mémoires*. He also edited *I. S. Menochii Brevis Expositio Sensus Literalis Totius Scripturæ, ex Optimis Auctoribus per Epitomen collecta* (Paris, 1719, 2 vols. fol.). See Nicéron, *Mémoires*, xlii; Chauffepié, *Diction.* s. v.; *Biog. Universal-Lex.* s. v.; *Theolog. Universal-Lex.* s. v.; Winer, *Handb. der theol. Literatur*, i, 188. (B. P.)

**Tourneux**, NICOLAS LE, a French divine, was born at Rouen, April 30, 1640, and was sent to the Jesuits' College at Paris. He completed his philosophical studies at the Collège de Grassius, and was appointed vicar of St. Étienne des Tormesent at Rouen. In 1675 he gained the prize given by the French Academy; and, reflecting upon the inconsiderate manner in which he had engaged in all the duties of the priesthood, he renounced it, but was afterwards persuaded to resume the sacred functions by M. de Sacy. His talents procured him a benefice in the holy chapel and the priory of Villers, which the archbishop of Rouen gave him. He spent his last years at his priory of Villers-sur-Frère in Tardenois, in the diocese of Soissons. His death occurred suddenly at Paris, Nov. 28, 1686. The principal among his numerous works are, *La Vie de Jésus-Christ: — La Meilleure Manière d'Entendre la Messe: — L'Année Chrétienne* (Paris, 1685, 13 vols. 12mo); — a French translation of the *Roman Breviary* (4 vols. 8vo). An *Abridgment of the Principal Theological Treatises* (4to) is also ascribed to Tourneux.

**Tournon**, Charles Thomas, Maillard de, an Italian cardinal, was born at Turin Dec. 21, 1668. He received his education at the Propaganda at Rome, where he subsequently taught. He was made chamberlain of honor, and in 1701 was raised to the dignity of patriarch of Antioch, and confided with the difficult mission of regulating the affairs of the Church in China and the Indies. In 1702 he departed on his enterprise, touched at Madagascar, and the following year reached Pondicherry. When he reached Canton, he collected the missionaries, told the object of his coming, and ordered that all traces of the heathen worship should be removed from the churches and houses of the native Christians. The emperor was highly incensed. He joined the missionaries against Tournon, and sent him to Macao, where he was imprisoned in the Convent of the Jesuits. He died June 8, 1710. See Passionei, *Memorie Storiche*. — Hoefer, *Nouv. Biog. Générale*, s. v.

**Tournon**, François de, cardinal d'Ostia, was born at Tournon in 1489. At the age of twelve he took the habit of the regular canons of St. Augustine at the Abbey of St. Anthony in Dauphiny. Francis I gave him the Abbey of Chaise-Dieu, and in 1517 made him archbishop of Embrun. In 1525 he became archbishop of Bourges, and from that time his honors increased with every year. Francis I loaded him with benefices and offices, and employed him in political and ecclesiastical intrigues. In 1530 he was created cardinal, and

soon after rose to the dignity of dean of the College of Cardinals. He was one of the principal negotiators of the Treaty of Madrid in 1526, and was actively engaged in bringing about the Peace of Cambrai. During the quarrel between Henry VIII of England and the holy see, Tournon proposed concessions to Clement VII, which, if they had been complied with, would have prevented the whole Reformation in England. When Charles V invaded Provence, Tournon was made lieutenant-general of the French army, and directed the operations of the war. He represented France at the Conference of Nice, and in 1538 signed the treaty which gave France ten years of peace. Tournon was a bitter enemy of reform in whatever shape it might come, and stained his reputation by his bloody attacks upon heresy. The terrible persecution of the Vaudois was in great part of his instigation. At the death of Francis I he fell out of favor, and under Henry II was obliged to return to Rome. In his new diocese of Lyons he carried on a fearful persecution against the Calvinists. At the death of Henry II he returned to France, and was called to the councils of the queen mother. His appearance was the signal for new rigors, and he endeavored to obtain the return of the Jesuits, to whom he gave his college of Tournon. He had great influence over Charles IX, and what terrors may not be due to this fact? Tournon died at the abbey of Saint-Germain-des-Prés April 22, 1562. He had little time, among his political affairs, to attend to letters, and left no works behind him. See Fleury-Ternal, *Hist. du Cardinal de Tournon*; La Thaumassière, *Hist. du Berry*; De Thou, *Hist. sui Temp.*—Hoefler, *Nouv. Biog. Générale*, s. v.

**Tours, COUNCILS OF** (*Concilium Turonense*). These councils were held in Tours, department of Indre-et-Loire, France. It is the seat of an archbishopric, and the archbishop resides here in a palace of uncommon beauty. It formerly contained the celebrated cathedral of St. Martin of Tours, which was destroyed in 1793, and of which only two towers remain.

I. The first council was held Nov. 18, 461, by St. Perpetuus, archbishop of Tours, assisted by nine bishops. Thirteen canons were made for the restoration of the ancient discipline.

- 1 and 2. Enjoin celibacy upon bishops, priests, and deacons.
3. Forbids them to live, or be on terms of too great familiarity, with any woman.
4. Forbids a clerk to marry a widow.
5. Excommunicates those who renounce the ecclesiastical state.
6. Is directed against those who marry or offer violence to virgins consecrated to God.
7. Excommunicates homicides.
8. Condemns those who fall away from a state of penance after having entered upon it.
9. Deprives of communion bishops who get possession of the bishopric of another, or who promote the clerks of another bishop.
10. Declares ordinations made contrary to the canons to be null.
11. Condemns ecclesiastics who leave their own Church and go to another diocese without their bishop's leave.
12. Condemns clerks who leave their dioceses to travel without letters from their bishop.
13. Condemns usury in clerks; allows other business and employments.

Mansi adds to these thirteen canons six others (*Concil.* iv, 1049).

II. Held Nov. 17, 566; convoked by order of king Charibert, and composed of nine bishops, among whom were Germanus of Paris, Prætextatus of Rouen, and Euphronius of Tours, who presided. Twenty-seven canons were published.

1. Orders provincial councils twice a year.
3. Forbids to place the body of Jesus Christ upon the altar after any fashion, and orders that it shall be placed under the cross.
4. Forbids laymen to come close to the altar with the clerks during the office; but allows them, and women also, to enter the sanctuary for private prayer at other times, and also in order to receive the communion.
5. Orders each Church to maintain its own poor, that they may not be obliged to wander about.

6. Forbids clerks and lay persons to give letters commendatory (*epistolium*), and allows this to bishops only.

12. Orders married bishops to live with their wives as with sisters.

15. Orders that monks who leave their monastery in order to marry shall be separated from their wives, and put to penance; and that the aid of the secular powers shall be entreated in order to effect this.

17. Orders that monks shall fast during the three Rogation days and during the whole of Whitsun week; from that time to August 1, three days in each week; during September, October, and November, also three days in each week; and during December every day till Christmas. Again, on the first three days of January; and from Epiphany to Lent, three days in each week.

23. Allows hymns composed by an author of respectability to be used at the holy office, besides those of St. Ambrose.

27. Declares that bishops taking any fee, etc., for ordination are to be regarded not merely as guilty of sacrilege, but even as heretics.

See Mansi, v, 851.

III. Held in 813, by order of Charlemagne, for the purpose of re-establishing ecclesiastical discipline. Fifty-one canons were published.

1. Orders the people to be faithful to the emperor, and to pray for his preservation.

2. Orders bishops to give themselves to the study of the Holy Scriptures, especially of the gospels, and epistles of St. Paul, and to try to learn them by heart.

3. Orders them to acquaint themselves with the canons and the pastoral of St. Gregory.

4, 5, and 6. Order that they shall preach frequently; that they shall be frugal in their repasts, and entertain the poor and strangers, affording them both bodily and spiritual food.

7. Forbids priests to be present at plays and farces and all immodest exhibitions.

9. Forbids priests to administer indiscreetly the Lord's body to boys and any chance persons, lest they be in sin, and so receive the greater damnation.

15. Anathematizes those who give money in order to obtain a benefice.

16. Orders bishops to take care that the tithes of each church be divided between the priests, the poor, and the repairs, etc., of the church.

19. Warns priests not to administer the holy eucharist inconsiderately to children.

21. Forbids priests to eat and drink in taverns.

27 and 28. Forbid to give the veil to young widows, without good evidence of their sincere love of a religious life, and to virgins under twenty-five years of age.

37. Orders that prayer be made kneeling at all times, except on Sundays and during Easter.

38. Warns the faithful not to make a noise when entering church, not to talk when there, and to keep all bad thoughts out of their minds.

39. Forbids to hold pleadings in churches or church-porches.

40. Forbids to hold pleadings or markets on Sundays.

43. Is directed against the wicked habit of swearing.

50. Orders all persons to communicate at least thrice a year, unless hindered by some great crime.

See Mansi, vii, 1259.

IV. Held in 1055, by Hildebrand, the Roman legate (afterwards Gregory VII), and cardinal Geraldus. In this council Berenger was called upon to defend his opinions; but, not being able to do so satisfactorily, he retracted, and made a public confession of the true faith, which he signed; whereupon the legates, believing him to be sincere, received him into communion. See Mansi, ix, 1081.

V. Held in 1060, by cardinal Stephen, the Roman legate, and ten bishops. Ten canons were made; the first four condemn simony.

6. Declares that those bishops, priests, and deacons who, although aware of the interdict of Nicholas II, refused to abstain from the exercise of their functions, being at the time in a state of incontinence, should be irrevocably deposed.

See Mansi, ix, 1108.

VI. Held in Lent, 1096, by pope Urban II, who presided. The decrees of the Council of Clermont were confirmed. The pope received into favor king Philip (who had been excommunicated for forsaking Bertrade, his lawful wife), upon his humbly making satisfaction. See Mansi, x, 601.

VII. Held May 19, 1163, in the Church of St. Maurice, by pope Alexander III, assisted by seventeen cardinals. There were also present, besides Louis VII, king of France, one hundred and twenty-four bishops, four hun-

dred and fourteen abbots, and an immense multitude of others, both ecclesiastics and laics. These prelates were assembled from all the provinces in subjection to the kings of France and England; some few of them also were Italians, who had declared for Alexander. Among the English prelates was Thomas, archbishop of Canterbury, who was received by the pope with extraordinary honors, all the cardinals present, except two in immediate attendance upon Alexander, being sent beyond the city walls to meet him. The archbishop of Canterbury sat on the right hand of the pope, the archbishop of York on the left. The immediate object of the council was the condemnation of the synods of Pisa and Lodi, convoked by the emperor Frederick. Ten canons were published.

2. Condemns usury among the clergy.

4. Is directed against the Albigenses, and forbids all intercourse with them; forbids even to give them a retreat or protection, or to buy and sell with them.

5. Forbids to let churches to priests for an annual rent.

6. Forbids monks to leave their cloisters in order to practice medicine or to learn the civil law.

9. Declares all ordinations made by Octavianus, and other heretics or schismatics, to be null and void.

See Mansi, x, 1411.

VIII. Held June 10, 1236; Juhel de Mayenne, archbishop of Tours, presiding. Fourteen canons were published.

1. Forbids the crusaders or other Christians to kill or injure the Jews, or to plunder or ill-use them in any way; also orders the secular judges to give up to the ecclesiastical authorities any crusaders whom they may have seized on account of any crime.

7. Orders that all wills shall be put into the hands of the bishop or his archdeacon within ten days after the death of the testator.

8. Denounces those who have two wives living, declares them to be infamous, and orders that they shall be tied up in public, unless they can pay a heavy fine; orders priests to publish every Sunday in church the sin of having two wives living.

13. Orders the bishops to instruct and to provide for the subsistence of the new converts from Judaism and heresy.

See Mansi, xi, 503.

IX. Held in 1239, by Juhel de Mayenne, archbishop of Tours, and his suffragans. Thirteen canons were published, "with the approbation of the holy council;" the use of which expression in this case shows that the approbation was not confined to the pope and his legates.

1. Orders that the bishop shall appoint three clerks, or three reputable laymen, in every parish, who shall take an oath to report faithfully concerning all scandals in morality, faith, etc., happening in the neighborhood.

4. Forbids to receive anything for the administration of the sacraments; without prejudice, however, to pious customs.

5 and 6. Forbid curates and rectors to excommunicate their parishioners of their own authority.

12. Forbids clerks and monks to retain any female servants in their houses or priories.

See Mansi, xi, 565.

X. Held Aug. 1, 1282, by John de Monsoreau, archbishop of Tours, who presided. Thirteen canons were published.

1 and 2. Are directed against needless lawsuits.

3. Forbids clerks and monks to frequent taverns.

4. Excommunicates those who steal or tear the church-books and injure the furniture.

5. Orders the observance of customary processions.

6. Orders the punishment of usurers according to the canon of Lyons.

12. Is directed against those who hinder the payment of tithe.

See Mansi, xi, 1183.

XI. A general assembly of the French clergy was held, by order of Louis XII, in September, 1510, on account of the sentence of excommunication passed against him by pope Julius II. The object of the council was to discuss the question how far it was necessary for Louis to respect the spiritual weapons of the Church, when in the hands of an adversary who used them only to further injustice, and in matters purely temporal. Eight questions were discussed. The following are the most important:

2. Is it allowable for a prince, in defence of his person and property, not only to repel injustice by force of arms,

but to seize the lands of the Church in the possession of the pope, his declared enemy, not with any view of retaking them, but only in order to cripple the pope's means of injuring him? Answer in the affirmative.

3. Is it allowable for a prince, on account of such declared hatred on the part of the pope, to withdraw from the obedience of the latter, the pope having stirred up other princes to make war upon him, and urged them to seize upon his territories? Answer: that it is lawful so to withdraw from obedience, not, however, altogether, but so far as the defence of the prince's temporal rights shall render necessary.

4. This withdrawal from obedience being supposed, how is the prince to conduct himself with regard to his subjects, and the prelates with regard to other ecclesiastics, in all those matters in which recourse is usually had to the see of Rome? Answer: it is necessary in such a case to keep to the ancient common rights, and the Pragmatic Sanction taken from the decrees of the Council of Basle.

8. If the pope, without any attention to justice, or even to the appearance of right, employs arms and artifices, and publishes censures against the prince, and against those who protect and defend him, ought the latter to be deserted? Answer: that such censures are altogether null, and not binding in law.

See Mansi, xiii, 1481.

XII. Held in September, 1583, Simon de Maillé, the archbishop, presiding; the bishops of Angers, Nantes, Saint-Brien, Rennes, and Quimper, and the deputies of those of Saint-Malo and Mans, were present.

A petition was read, which it was proposed to present to the king, Henry III, requesting him to order the publication of the decrees of Trent in his states; also another petition to the pope, to induce him to remedy certain abuses in the matter of benefices. A formulary of faith, to be signed by all beneficed clerks, was drawn up, and regulations were made to prevent simony. In consequence of the appearance of the plague in Tours, the prelates adjourned the council to Angers.

See Mansi, xv, 1001.

**Tousi, COUNCILS OF** (*Concilium Tullense, or apud Saponarias*), were held at Tousi, a place in the diocese of Toul.

I. This council was held in June, 859. Charles the Bald and the sons of the emperor Lothaire were present. Thirteen canons were published, of which the first treats of the reconciliation of Charles and his brother Louis. The sixth relates to a charge of treason brought by Charles the Bald against Venilon, bishop of Sens. Canon 8 relates to the case of the Breton bishops who had been guilty of schism in separating from their metropolitan. The tenth contains certain dogmas relating to grace (originally put forth in the first six canons of Valence, in the Synod of Quiercy), concerning which there arose a great contention among the bishops present. Synodal letters were addressed to Venilon, the Breton prelates, and to those factious and seditious persons whose unbridled licentiousness had caused extreme disorder. See Mansi, *Concil.* viii, 974.

II. The second Council of Tousi (also called *Concilium Tullense, or Tussiacense*) was held in 860. Forty bishops from fourteen provinces attended. Five canons were published, directed against robbery, perjury, and other crimes, then very prevalent. Although only forty bishops were present, these canons are signed by fifty-seven, the decrees of councils being often sent to the bishops who were absent for their signature.

1. Is directed against invaders of sacred things.

2. Concerning the incontinence of virgins or widows consecrated to God.

8. On perjury and false witnesses.

4. Against robbers and others guilty of various crimes.

5. Concerning vagabond clerks and monks.

A synodal letter was also drawn up, addressed to the invaders of ecclesiastical rights and property, and the plunderers of the poor. See Mansi, viii, 702.

**Toussain, or Tussanus, DANIEL**, a French Protestant minister, was born at Montbelliard, in the department of Doubs, July 15, 1541. After some education in his native place, Toussain went to Basle in 1555, where he studied two years. He then spent two years in Tübingen, applying himself to belles-lettres, philosophy, and divinity. Finding himself indiffer-

ently acquainted with the French language, he went to Paris in 1559, and, after a residence of a year, went to Orleans, where he taught Hebrew for some time, and, being admitted into the ministry, officiated in the Church there. While in Orleans he was frequently exposed to dangers arising out of the war between the Catholics and Protestants, but escaped them and finally reached Heidelberg, whither he had been invited by Frederick III. The prince afterwards employed him in visiting the Reformed churches in his dominions. On the death of the elector in 1576, his son, Casimir, invited Toussain to Neustadt, made him superintendent of the churches there, and, on the death of Ursinus, professor of divinity. In 1578 he presided at a synod assembled by Casimir for the purpose of establishing conformity in doctrine and discipline, and of assisting the exiles of the palatinate. When the prince became regent in 1583, he removed to Heidelberg, and employed Toussain in promoting the Reformed religion. In 1586 he was appointed to succeed Grynaeus, first professor of divinity at Heidelberg; and in 1594 was chosen rector of the university. He died Jan. 10, 1602, and was buried in the university chapel. His published works, in many volumes 4to and folio, are principally commentaries on various parts of the Bible, and defences of particular doctrines of the Reformed Church. His life was published by his son Paul under the title *Vita et Obitus Danielis Tussani*, etc. (Heidelberg, 1603, 4to).

**Tow** is the rendering in the A. V. of the Heb. words (1) תָּעַר, *neo'reth* (so called as being shaken off from flax in hatchelling), *refuse* (Judg. xvi, 9); (2) פִּשְׁתִּיחַ, *pish'eh* (Isa. xliii, 37), *flax* (as elsewhere rendered). See LINEN.

**Towel** (λίπτιον, for Lat. *linteum*, a linen cloth, John xiii, 4, 5) was the apron worn by servants and persons in waiting (see Galen, *De Comp. Med.* c. ix; Sueton. *Calig.* 26). See APRON.

**Tower** is the rendering in the A. V. of the following Heb. and Gr. words: 1. בִּרְמָה, בִּרְמָה, בִּרְמָה (Sept. ἐπάλξις), from בִּרְמָה, to "search," "explore," a searcher or watcher; and hence the notion of a watch-tower. In Isa. xxxii, 14 the tower of Ophel is probably meant (Neh. iii, 26). 2. מִגְדָּל, מִגְדָּל, מִגְדָּל (πύργος; *turris*), from גָּדַל, to "become great," a lofty tower; used sometimes as a proper noun. See MGDOL. 3. מִצְדָּה (πίρρα; *munition*), a strong fortification; only once "tower" (Hab. ii, 1). See EGYPT. 4. עֵקֶל (οἶκος; *domus*), only in 2 Kings v, 24. See OPHEL. 5. פֶּנֶךְ, usually "corner," twice only "tower" (Zeph. i, 16; iii, 6; γωνία; *angulus*). 6. מִצְפֵּה (σκοπία; *specula*), "watch-tower." See MIZPAH. 7. מְצֻקָּה (ὄχυρμα; *robur*), "a refuge," only in poetry. See MISGAB. 8. Πύργος, the general term in the New Test. See FORTIFICATION.

Isolated watch-towers or fortified posts in frontier or exposed situations are mentioned in Scripture, as the tower of Edar, etc. (Gen. xxxv, 21; Mic. iv, 8; Isa. xxi, 5, 8, 11; Hab. ii, 1; Jer. vi, 27; Cant. vii, 4); the tower of Lebanon, perhaps one of David's "garrisons" (*netsib*, 2 Sam. vii, 6; Räumler, *Palest.* p. 29). Such towers or outposts for the defence of wells, and the protection of flocks and of commerce, were built by Uzziah in the pasture-grounds (*midbar*) [see DESERT], and

Solitary Tower in the East.

by his son Jotham in the forests (*choreshim*) of Judah (2 Chron. xxvi, 10; xxvii, 4). Remains of such fortifications may still be seen, which, though not perhaps themselves of remote antiquity, yet very probably have succeeded to more ancient structures built in the same places for like purposes (Robinson, *Bibl. Res.* ii, 81, 85, 180; Roberts, *Sketches*, pl. 93). Besides these military structures, we read in Scripture of towers built in vineyards as an almost necessary appendage to them (Isa. v, 2; Matt. xxi, 33; Mark xii, 1). Such towers are still in use in Palestine in vineyards, especially near Hebron, and are used as lodges for the keepers of the vineyards. During the vintage they are filled with the persons employed in the work of gathering the grapes (Robinson, *Bibl. Res.* i, 218; ii, 81; Martineau, *East. Life*, p. 434; De Saulcy, *Travels*, i, 546; Hackett, *Illustr. of Script.* p. 163, 171). See LODGE.

Mural towers were in all antiquity built as part of the fortifications of towns, especially at the corners of the walls and the gates (2 Chron. xiv, 7; xxvi, 9, 15; xxxii, 5; 1 Macc. v, 55; xiii, 33, 43, etc.; comp. Isa. xxxiii, 8; xxx, 25; Ezek. xxvi, 4, 9; see Pliny, *H. N.* vi, 22, 1). Also in the interior of cities towers served as citadels (Judg. ix, 46 sq.). Jerusalem (q. v.) was especially provided with towers of this description, many of which had special names (Neh. iii, 11; xii, 38; Jer. xxxi, 38, etc.). Those on the walls and at the gates were used for sentries (2 Kings ix, 17; xvii, 9; xviii, 8; Ezek. xxvii, 11). The Temple (q. v.) was likewise supplied with numerous towers. The "tower in Siloam" (q. v.) (Luke xiii, 4) was probably some mural defence near that fountain. See GATE; WALL.

Ancient Assyrians Attacking Mural Towers with Turreted Engines.

Among many ancient nations, especially the Babylonians, towers were employed in the siege of cities, as appears from the prophet's account of the divination used by the king of Babylon to determine his line of march into the kingdom of Judah: "At his right hand was the divination for Jerusalem, to appoint captains, to open the mouth in the slaughter, to lift up the voice with shouting, to appoint battering-rams against the gate, and to build a tower (Ezek. xxi, 22). See BATTERING-RAM. In the Maccabean age, towers borne on elephants were used to carry warriors in battle (1 Macc. vi, 37; comp. Pliny, *H. N.* xi, 1, "turrigeri elephantorum humeri"). In Roman sieges the tower (*vinea*, from the vine-branches with which it was often thatched), run on wheels along an artificial causeway (*agger*), was proverbial (Luke xix, 43). See MOUNT.

In the figurative language of Scripture, towers are

Roman Military Towers.

used for defenders and protectors, whether by counsel or strength, in peace or in war (Psa. xviii, 10; lxi, 3). See WAR.

**TOWER IN CHRISTIAN ARCHITECTURE.** Any attempt to particularize the various kinds of towers which have been adopted by different nations in former ages would far exceed the scope of this work; the following observations, therefore, are chiefly confined to those which were in use in the Middle Ages in England and the adjacent parts of Europe, and more especially to the towers of churches. Among the Greeks and Romans, towers were employed of various forms and for different purposes, but by no means so abundantly as in after-ages, and in general they appear not to have been so lofty as those of mediæval date. The tower of Andronicus Cyrrhestes, called also the Temple of the Winds, at Athens, is octagonal; at Autun, in France, a considerable part of a large and lofty square tower of late Roman work exists. The tower for the use of bells is supposed not to have been introduced till the 5th century, and hence the term *campanile*, applied to the Italian towers. See SPIRE.

In the Middle Ages the towers of castles were numerous and of striking character. During the prevalence of the Norman style the keep often consisted of a large rectangular tower, with others of smaller size attached to the angles, and these last mentioned generally rose higher than the main building, as at the White Tower of London and the castles of Rochester and Guildford. The keep tower of Conisburgh Castle, in Yorkshire, which is of the latest Norman work, is circular, with large buttresses on the outside; in other examples, especially in those of later date, the keep towers are of various forms, often irregular, apparently so constructed as being considered best adapted to the peculiarities of the sites, and the systems of defence in use at the periods of their erection. Besides these main towers, many others, which, though of less magnitude than the keep, were often of very considerable size, were employed in different parts of fortifications, especially at the entrances, where the gateways were generally flanked by towers projecting considerably before

the main walls; these were pierced with loop-holes and oilets, and were commonly surmounted with machicolations. See TURRET.

Church-towers of all dates are greatly diversified, not only in their details, but also in general proportions and form; they are occasionally detached from the building to which they belong, but are usually annexed to it, and are to be found placed in almost every possible situation except about the east end of the chancel. In all cases their use was for hanging the bells, and hence the name *belfry*. Large churches have often several towers, especially when the plan is cruciform; and in this case there are generally two at the west end, and one, of larger dimensions, at the intersection of the transepts, as at the cathedrals of Canterbury, York, and Lincoln. Ordinary parish churches have usually but one tower. In some examples, where there is an entrance to the church through the lower story of a tower, it is made to form a porch with an open archway on one side, as at Cranbrook, and many other churches in Kent; or on three sides, as at Newnham, Northamptonshire. In towns, towers are sometimes placed over public thoroughfares, and in such situations are built on open archways. It is not unusual to find church-towers which batter, or diminish upward: these are generally of Norman or Early English date; but in some districts, as in Northamptonshire, this mode of construction was continued to a later period.

The towers belonging to the style described in the article SAXON ARCHITECTURE (q.v.) are square and massive, not of lofty proportions, and apparently never were provided with stone staircases. Some of them are considerably ornamented, as at the churches of Barnack and Earl's Barton, Northamptonshire; and others are very plain, as at St. Michael's, Oxford, and St. Benet's, Cambridge: the tower of the Church of Sompington, Sussex, which belongs to this style, terminates with a gable on each of the four sides, and is surmounted by a wooden spire; but whether or not this was the original form may be doubted.

In some parts of Great Britain circular church-towers are to be found. These have sometimes been assumed to be of very high antiquity, but the character of their architecture shows that they commonly belong to the Norman and Early English styles. They are built of rough flints, generally of coarse workmanship, with very little ornament of any kind, and that little, for the most part, about the upper story: one of the best examples is that of Little Saxham Church, Suffolk. Plain round towers in the counties of Norfolk and Suffolk are of all periods: the only materials readily accessible being flints, and these not admitting of square corners, the towers were built round, and this practice is continued even to the present day.

*Norman* towers are generally square, and of rather low proportions, seldom rising much more than their own breadth above the roof of the church, and sometimes not so much. They generally have broad flat buttresses at the angles, and are usually provided with a stone staircase carried up in a projecting turret attached to one of the angles; this is very commonly rectangu-

Little Saxham Church, Suffolk.

lar externally, but the form is not unfrequently changed towards the top, especially if the turret is carried up the whole height of the tower: occasionally polygonal Norman towers are to be met with, as at Ely Cathedral. In Normandy a few examples of village church-towers of this style exist, which are capped with pyramidal stone roofs, like low square spires, but in general the roofs and parapets are additions of later date. Many Norman towers are very considerably ornamented, the upper stories being usually the richest, while others are very plain. Good specimens remain at St. Alban's Abbey; the cathedrals of Norwich, Exeter, and Winchester; Tewkesbury Abbey; Southwell Minster; the churches of St. Peter, Northampton; St. Clement, Sandwich; Iffly, Oxfordshire; Stewkley, Buckinghamshire, etc.

In *Early English* towers much greater variety of design and proportion is found than in those of prior date. The prevailing plan is square, but some examples are octagonal, and occasionally the upper part of a square tower is changed to an octagon. Projecting stair-turrets are almost universal, though they are frequently so much masked by buttresses as to be in great measure concealed. Many towers in this style are of lofty proportions, while others are low and massive. The best examples are generally more or less ornamented, and some

Middleton Stoney, Oxfordshire, cir. 1220.

are very highly enriched. The belfry windows are often large and deeply recessed, with numerous bold mouldings in the jambs, and sometimes appear to have been originally left quite open. Considerable variety of outline is produced by the different arrangement, sizes, and forms of the buttresses at the angles of towers in this as well as in the later styles of Gothic architecture, and sometimes, instead of buttresses, small turrets are used, which rise from the ground and generally terminate in pinnacles. Many towers of this date are finished at the top with parapets, some of them with pinnacles at the angles, a few with two gables, called pack-saddle roofs (as Brookthorpe, Northamptonshire), and many are surmounted with spires, which, although perhaps in the majority of cases they are of later date than the towers, appear to have been originally contemplated. Examples remain at the cathedrals of Oxford and Peterborough; the churches of St. Mary, Stamford; Ketton and Ryhall, Rutland; Loddington and Raundes, Northamptonshire; Middleton Stoney, Oxfordshire, etc.

In the *Decorated* and *Perpendicular* styles towers differ very considerably both in proportions and amount of enrichment, and considerable diversity of outline and effect is produced by varying the arrangement and form of the subordinate parts, such as windows, buttresses,

pinnacles, etc.; but in general composition they do not differ very materially from Early English towers. Many are very lofty, and others of low proportions; some highly enriched, and some perfectly plain; a large, and probably the greater, number are crowned with parapets, usually with a pinnacle at each corner, and sometimes with one or two others, commonly of rather smaller size, on each of the sides; many, also, terminate with spires, or, especially in the Perpendicular style, with lanterns. Decorated towers remain at Lincoln Cathedral; the churches of Heckington and Caythorpe, Lincolnshire; Newark, Nottinghamshire; Finedon, Northamptonshire; St. Mary's, Oxford, etc. Perpendicular towers are very numerous in all parts of the kingdom, especially in Somersetshire. Among such as are best deserving of attention may be mentioned those at Canterbury, York, and Gloucester cathedrals; and the churches at Boston and Louth, Lincolnshire; Kettering, Northamptonshire; Cirencester, Gloucestershire; Great Malvern, Worcestershire; and that at St. Mary Magdalen College, Oxford.

**Towers.** JOSEPH, LL.D., a Dissenting minister, was born in Southwalk, London, in 1737, and was apprenticed to Mr. Goadby, printer, at Sherborne, Dorsetshire, in 1754. He returned to London in 1764, where he worked at his trade, and afterwards became a book-seller. He was ordained a preacher in 1774, and was chosen pastor of a congregation at Highgate. In 1778 he became forenoon preacher at a chapel in Newington Green. He died in 1799. Mr. Towers was an Arian, though closely connected with the Unitarians. He wrote, *Review of the Genuine Doctrines of Christianity* (Lond. 1763, 8vo):—*Observations on Hume's History of England* (ibid. 1778, 8vo):—*British Biography* (1766-72, 7 vols. 8vo; 1773-80, 10 vols. 8vo [vols. i-vii by Towers; viii-x by a clergyman]):—*Vindication of the Political Opinions of Locke* (1782, 8vo):—*Memoirs of Frederick the Great* (1788, 2 vols. 8vo; 1795, 2 vols. 8vo:—*Tracts on Polit-*

Brookthorpe, Northamptonshire, cir. 1260.

Brisington, Somersetshire.

*ical and other Subjects* (1796, 8 vols. 8vo):—besides *Sermons*, and articles to the *Biographia Britannica*. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

**Towerson, GABRIEL, D.D.**, a learned English divine, was a native of Middlesex, and became a commoner of Queen's College, Oxford, in 1650, where he took his A.M. in 1657. In 1660 he was elected fellow of All-Souls', and entered holy orders at about the same time. He was first preferred to the rectory of Welwyn, in Hertfordshire, and took his degree of D.D. in 1677. An April, 1692, he was inducted into the living of St. Andrew Undershaft, London, to which he was presented by king William. He died in October, 1697, and was interred at Welwyn. His works are, *A Brief Account of Some Expressions in St. Athanasius's Creed* (Oxford, 1663, 4to):—*An Explication of the Decalogue, or Ten Commandments, and an Explication of the Catechism of the Church of England* (Lond. 1676-88, 4 pts. fol.):—*Of the Sacraments in General*, etc. (ibid. 1686, 8vo):—*Of the Sacrament of Baptism in Particular among the Heathen and Jews*, etc. (1687, 8vo). See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

**Towgood, Micaiah**, an English Dissenting minister, was born at Axminster in 1700, became pastor at Moreton-Hampstead in 1722, removed to Crediton in 1735, and in 1750 to Exeter, where he died in 1792. He wrote, *Dissenter's Apology* (Lond. 1739, 8vo):—*Dissenting Gentleman's Answer to Rev. Mr. White* (1746-48, 6th ed. 3 vols. 8vo):—*Essay on Charles I* (1748; new ed. 1811, 12mo):—*Dissertations on Christian Baptism* (1750; new ed. with notes, etc., 1815, 12mo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Manning, *Life and Writings of Towgood* (1792); Skeats, *Hist. of Free Churches of England*, p. 419 sq.

**Towgood, Richard**, an English prelate, was made dean of Bristol in 1667, and died in 1683. He published a *Sermon on Acts vii, 8* (Lond. 1676). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Town** (not carefully distinguished in the A. V. from "city," which latter is the usual rendering of עִיר, occasionally "town:" this latter is also the translation, at times, of כִּנֶּרֶת, prop. a wall, as usually rendered; נֶחֱלָה, a village, as generally rendered; and so κώμη in the New Test. [once more distinctively κομποπολις, Mark i, 38]; בֵּת, a daughter, sometimes fig. employed; חֲוֹתַיִם, only in the phrase Havoth-jair [q. v.]; פְּרוֹנוֹת, "unwalled towns," means rather open country). The first mention of such collective residence occurs early in the antediluvian history (Gen. iv, 17), but we are not to think, in the case of such primitive "cities," of anything more than a mere hamlet, the nucleus, perhaps, of an eventual metropolis. Towns, however, appear in the history of the patriarchs as strong central points of the agricultural tribes in nomadic regions. They were therefore enclosed with walls, and thus each town was originally a fortress (see Numb. xxxii, 17; hence the term מִצְדָּה, literally a fort, applied kar' ἑξοχῆν to Tyre, Josh. xix, 29; 2 Sam. xxiv, 7); such as the cities which the Israelites captured and demolished under Joshua. For this purpose eminences and hills (comp. Matt. v, 14) were naturally selected as more commanding and secure sites (see König, *De Montibus, Urbium Antiquis. Sedi-bus* [Annæberg. 1796]), a precaution which Palestine, with its varied surface and exposed situation, especially suggested (comp. 2 Sam. iv, 6). We know little, however, of the exact architectural style of its cities, with the exception of Jerusalem. In modern times Oriental towns are built very wide-spreading, and often include extensive open spaces, gardens, etc. (see Thevenot, ii, 114; Buckingham, p. 95, 335; Tavernier, i, 169; Rosenmüller, *Morgenl.* iv, 395 sq.). e. g. Damascus (Kämpfer estimates Ispahan as more than a day's ride in circuit,

*Amén. Exot.* p. 163). This especially applies to the larger cities of Asia, such as Babylon and Nineveh, which enclosed an area of many miles (see Ritter, *Erdk.* xi, 908). The gates of the cities were closed (Josh. ii, 5 sq.; Judg. xvi, 8; 1 Sam. xxiii, 7; 1 Kings iv, 13; Psa. cxlvii, 18, etc.) with strong folding-doors (מְכֻסֵּתִים) with brazen or iron bars (בְּרִירִים), and were surmounted by turrets (2 Sam. xviii, 32), which were guarded by sentries (ver. 24 sq.). In these the governors and judges held their sittings, and a more or less extensive square (רֹחַב, which, however, does not always mean an open place, but sometimes a wide [πλατεία] street, Gen. xix, 2; Judg. xix, 15, 20) adjoined (Ezra x, 9; Neh. viii, 1, 8, 16; 2 Sam. xxi, 12; 1 Chron. xxxii, 6; Job xxix, 7; Cant. iii, 2) where the market was held (2 Kings vii, 1; comp. ἀγοραί, Josephus, *Life*, 22). The streets (שְׁטֵרֹת, Job xlviii, 17; Isa. v, 25; Jer. xxxviii, 21, etc.; שְׁטֵרֹת, Cant. iii, 2; Eccles. xii, 4, etc.; πλατεῖαι, Matt. vi, 5; xii, 19; Acts v, 15, etc.) were not so narrow (yet see στενωπός applied to those of Jerusalem in Josephus, *War*, vi, 8, 5) as in modern Oriental towns (Maundrell, p. 172; Olearius, p. 291; Russegger, i, 367; Robinson, i, 38; iii, 697), where, as in Acre (Mariti, p. 246), scarcely two laden camels, or in Damascus (Schubert, iii, 29) scarcely a single one, can pass (Burkhardt, *Arah.* p. 151). The streets of Hebrew antiquity (at least in the large towns) had names, which were sometimes taken from those of the kind of trade carried on in them (Jer. xxxvii, 2; comp. ἀγοραί, Josephus, *War*, v, 8, 1, like modern bazaars; Russell, *Aleppo*, i, 29 sq.; Harmer, i, 245 sq.; Arvieux, i, 55; Ker Porter, i, 406, 407). They were occasionally paved in the later period (Josephus, *Ant.* xv, 9, 6; xvi, 5, 3; xx, 9, 7); in earlier times (comp. Isidore, *Orig.* xv, 16) we find notice of paving in the court of the Temple (2 Kings xvi, 17). From 1 Kings xx, 34 it would seem that kings sometimes constructed or improved certain avenues (comp. Rosenmüller, *Morgenl.* iii, 201 sq.). Aqueducts (מְעֻסֵּתִים) were built in Jerusalem before the exile (2 Kings xx, 20; Isa. vii, 3; xxii, 9; for Pilate's undertaking see Josephus, *Ant.* xviii, 3, 2; comp. *War*, ii, 17, 9; Robinson, ii, 166 sq.); other cities were supplied by springs (see Josephus, *Ant.* xvii, 13, 1) and cisterns, the latter, at times, of very expensive construction (*War*, vii, 8, 3). See WATER.

As to the varied condition of cities in pre-exilic times of Palestine we have only disconnected notices. The oldest ones of the land were destroyed by a natural or miraculous combustion in Abraham's time (Gen. xix, 24 sq.). During the conquest by the Israelites many were destroyed by fire (Josh. vi, 24, 26; xi, 13), but later were in part rebuilt (Judg. i, 26; 1 Kings xvi, 24) and embellished (Judg. xviii, 28; 1 Kings xii, 25; xv, 17; xvii, 21; comp. 2 Chron. viii, 5). The Chaldean invasion made (especially in the case of Jerusalem) many changes, and during the exile most of the cities were deserted. The Syrian wars under the Maccabees wasted or destroyed several (see 1 Macc. v, 44, 65; ix, 62). Others, however, especially Jerusalem, were fortified, and castles and citadels were built (ver. 50; xii, 38; xiii, 33; xv, 7, 39, 40; Josephus, *War*, iv, 7, 2; *Ant.* xiii, 16, 3). During the Roman period cities especially multiplied, chiefly under the patronage of the Herodian family; but many of them were largely occupied by Gentiles, with their heathenish theatres, gymnasia, stadia, and temples (*ibid.* xv, 5, 2; xviii, 2, 1 and 3; xx, 9, 4, etc.). Fortifications and towns also increased (*ibid.* xv, 9, 4; *War*, vii, 8, 3). The post-exilic topography of Palestine therefore exhibits many names of places not mentioned in the Old Test.; some of them, however, may have existed earlier. The district of Galilee was especially rich in towns and villages, which amounted in all to two hundred and four (*Life*, 46). See PALESTINE.

The names of Palestinian cities were almost invariably significant, as appears from the present situation and configuration of the land (e. g. Ain, *fountain*; Beth-

lehem, bread-producing; Gibeon, elevation; Mizpah, look-out; Ramah, height; many of them, accordingly, used with the article). Numbers of these are compounded, e. g. with בֵּית (house; see Rödiger, *De Arab. Libror. Hist. Interpret.* p. 21), צִיר or קִרְיָה (city), מִצְרָה (court), עֵמֶק (valley), מֵעַל (meadow), בְּאֵר (well), עֵין (spring), and in the post-exilic period with כִּפְרָה (village); those with בָּעַל (Baal) appear to have been of Canaanitish origin (see Panofka, *Ueb. d. Einfluss der Gottheiten auf Ortsnamen* [Berl. 1842]). Some are of dual (Kirjathaim, Jerusalem, Dothan) or plural form (Kerioth, Anathoth, Gebim); in one case (Beth-horon) we have the distinction of upper and lower villages. Several places of the same name are distinguished by the name of the tribe added (see Matt. ii, 1, 5; xxi, 11; Luke iv, 31). In Roman times, especially under the Herods, many old names were displaced by others of Greek or Latin origin (e. g. Diospolis, Neapolis, Sebaste, Caesarea, Tiberias; later *Elia Capitolina*), some of which have still survived (comp. Ammian. Marcel. xiv, 8), while the most of them have again yielded to the older appellation (comp. Josephus, *War*, i, 4, 2; *Ant.* xiii, 13, 3; see Reland, *Palæst.* p. 567), or to an imitation in Arabic of a similar sound (Palmer, *Desert of the Wandering*, p. 31). See NAME.

On the population of the cities of Palestine nothing definite is known, for the numbers (as Judg. xx, 15) from which an estimate might be made are in many cases corrupt (Josephus's statements [e. g. *War*, iii, 3, 1] are suspicious; but see Rümmer, *Paläst.* p. 430 sq.). See NUMBER.

A distinction between walled towns and open villages is not uniformly maintained in the Old Test., although in the later period they began to be distinguished (see מִצְרֹת, Ezek. xxxviii, 11; מִצְרֵי, Neh. xi, 25; comp. מִצְרֹת, Numb. xxi, 25, 32; Josh. xv, 45; Judg. xi, 26; Neh. xi, 25; מִצְרֹת, 2 Sam. xx, 19; see Gesenius, *Monum. Phæn.* ii, 263; a metropolis or province is called מִצְרֹתָה in the Talmud, *Maas. Shen.* iii, 4, etc.). The New Test., however, makes such distinctions (Mark i, 38; comp. Matt. x, 11; Mark vi, 56 [viii, 27]; Luke viii, 13, 22; Acts viii, 25; *κώμη*, e. g. Bethphage (Matt. xxi, 22), Bethany (John xi, 1), Emmaus (Luke xxiv, 13), Bethlehem (John vii, 42); but πόλις, e. g. Nazareth, Capernaum, Nain; but these terms are used loosely, and the compound κωμόπολις even occurs. So, likewise, Josephus uses πόλις and κώμη almost interchangeably (see *Life*, 45; *Ant.* xx, 6, 2), and he occasionally employs the diminutive πολίχνη (*War*, iv, 2, 1). In general, however, κώμη (village) chiefly belongs to those places whose name is compounded with כִּפְרָה (Gesenius, *Thesaur.* ii, 707). The Talmudists (but comp. *Megillah*, i, 3; *Erubin*, v, 6) distinguish places thus: מִצְרֵי, cities with defences; מִצְרֹת, towns without fortifications; מִצְרֵי, villages (Lightfoot, *Hor. Hebr.* p. 599 sq.). Reland gave the first extensive list of the localities of Palestine (in his *Palæstina*), which might be greatly enlarged from the Talmud (see *Baba Bathra*, ii and iii; *Baba Metsiah*, xi, 5). See TOPOGRAPHICAL TERMS.

On the municipal government of pre-exilic Palestine no definite information remains. There were judges (שֹׁפְטִים) and overseers (שֹׁמְרֵי) both named as officers (Deut. xvi, 18), but the latter title is not clear; and elsewhere the elders appear as civil authorities. In post-exilic times the magistrates of Palestinian cities are called councillors (βουλαί, Josephus, *Life*, 12, 13, 34, 61, 68), at whose head, as it would seem, stands a ruler (ἀρχων, *ibid.* 27; *War*, ii, 21, 3). But from these are to be distinguished the territorial στρατηγοί or ἑπαρχοί, who had their seat in certain towns, and probably had civil jurisdiction over a particular district (*Life*, 9, 11, 17; *Ant.* xix, 7, 4). On the civil law in cities see the Mishna (*Sanhedr.* i, 1 sq.). See GOVERNMENT.

The gates of cities were guarded during the day by sentinels, who looked out from the turret on the walls

into the distance (2 Sam. xviii, 24 sq.; 2 Kings ix, 17 sq.; comp. Ezek. xxvii, 11), and either with the voice or with a horn gave the news (Jer. vi, 17; Ezek. iii, 6). Night patrols are also mentioned (Cant. iii, 3). Of lighting the streets, however, there is no trace, as in western towns (Becker, *Gallus*, i, 333 sq.). See WATCH.

The mile-stones (still extant, Robinson, iii, 693) set up along the roads to indicate the distance of one town from another belong to Roman times (see Ideler, in the *Schrift. d. Berl. Akad.* 1812, hist. class. p. 184 sq.). On this point, and on the geographical position of towns, there are only incidental notices in the canonical books (see Gen. xii, 8; Judg. xxi, 19, etc.), and clearer indications appear in the books of Maccabees, and particularly in Josephus (see *Life*, 12, 24, 51, etc., collated by Reland, *Palæst.* ii, c. 6; comp. Mishna, *Maas. Shen.* v, 2); but it is not till the time of Eusebius and his Latin editor, Jerome (in his *Onomasticon*), that we get definite data on these points; while the later itineraries (namely, the *Itinerar. Antonini* [not the emperor of that name] and the *Itin. Hierosol.* [both edited by Wesseling, Amst. 1735, 4to]) and Abulfeda (*Tabula Syriae*) give full and exact details on the subject, which, however, have to be supplemented (and often corrected) by modern comparisons and measurements. See GEOGRAPHY.

**Town-clerk** (γραμματεὺς, a scribe, as elsewhere often rendered) is the title ascribed in the A. V. to the magistrate at Ephesus who appeased the mob in the theatre at the time of the tumult excited by Demetrius and his fellow-craftsmen (Acts xix, 35). The other primary English versions translate in the same way, except those from the Vulg. (Wycliffe, the Rhemish), which render "scribe." A digest of Böckh's views, in his *Staatshaushaltung*, respecting the functions of this officer at Athens (there were three grades of the order there), will be found in Smith's *Dict. of Class. Ant.* s. v. "Grammateus." The γραμματεὺς, or "town-clerk," at Ephesus was, no doubt, a more important person in that city than any of the public officers designated by that term in Greece (see Creswell, *Dissertations*, iv, 152). The title is preserved on various ancient coins (Wettstein, *Nov. Test.* ii, 586; Akermann, *Numismatic Illustrations*, p. 53), which fully illustrate the rank and dignity of the office. It would appear that what may have been the original service of this class of men, viz. to record the laws and decrees of the state, and to read them in public, embraced at length, especially under the ascendancy of the Romans in Asia Minor, a much wider sphere of duty, so as to make them, in some instances, in effect the heads or chiefs of the municipal government and even high-priests (Deyling, *Observ.* iii, 383; Krebs, *Decreta Rom.* p. 362). They were authorized to preside over the popular assemblies and submit votes to them, and are mentioned on marbles as acting in that capacity. In cases where they were associated with a superior magistrate, they succeeded to his place and discharged his functions when the latter was absent or had died. "On the subjugation of Asia by the Romans," says Baumstark (Pauly, *Encyclop.* iii, 949), "γραμματεῖς were appointed there in the character of governors of single cities and districts, who even placed their names on the coins of their cities, caused the year to be named from them, and sometimes were allowed to assume the dignity, or at least the name, of Ἀρχαερεὺς." See Schwartz, *Dissertatio de Γραμματέσι, Magistratu*

Coin of Ephesus referring to the "town-clerk."

*Obverse:* heads of Augustus and Livia. *Reverse:* a star (the emblem of Ephesus), with the legend (in Greek), "Aristion Menophantus, recorder of the Ephesians."

*Civilatum Asiæ Proconsulis* (Aldorf, 1735); Van Dale, *Dissertat.* v, 425; Spanheim, *De Usu et Præst. Numm.* i, 704; *New-Englander*, x, 144; Lewin, *St. Paul*, i, 315. See ASIARCH.

It is evident, therefore, from Luke's account, as illustrated by ancient records, that the Ephesian town-clerk acted a part entirely appropriate to the character in which he appears. The speech delivered by him, it may be remarked, is the model of a popular harangue. He argues that such excitement as the Ephesians evinced was undignified, inasmuch as they stood above all suspicion in religious matters (Acts xix, 35, 36); that it was unjustifiable, since they could establish nothing against the men whom they accused (ver. 37); that it was unnecessary, since other means of redress were open to them (ver. 38, 39); and, finally, if neither pride nor a sense of justice availed anything, fear of the Roman power should restrain them from such illegal proceedings (ver. 40). See EPHESUS; PAUL.

**Townley, James** (1), an English clergyman and educator, was born in London in 1715. He was educated at the Merchant Tailors' School, and thence elected to St. John's College, Oxford. Soon after taking orders he was chosen morning preacher at Lincoln's Inn Chapel, and lecturer of St. Dunstan's in the East. Through the patronage of lady Spencer, to whom his wife was related, he obtained the living of St. Bennett, Gracechurch, London; and afterwards became grammar master to Christ's Hospital. In 1759 he was chosen high master of the Merchant Tailors' School, and in 1777 was presented to a living in Wales by bishop Shipley, to whom he was chaplain. He died July 15, 1778. Besides his *High Life Below Stairs*, a farce (Lond. 1759, 8vo); *False Concord*, a farce, (1764, unsuccessful and not printed); *The Tutor*, a farce (1765, 4to, unsuccessful), he published seven single *Sermons* (1741-69, each 4to). See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Townley, James** (2), D.D., an eminent Wesleyan minister, was born in Manchester, England, May 11, 1774. His early education was received at the school of Rev. David Simpson (q. v.) of Macclesfield. The training of his pious mother and the impressions made upon his heart by the funeral services of his lamented teacher, resulted in the commencement of that earnest and true Christianity which was ever his best adornment. He became a local preacher at the age of nineteen, and in 1796 was received on probation as an itinerant, from which time until 1832 he fulfilled the duties of his ministry faithfully and with increasing honor. In 1827 he was appointed general secretary of the Wesleyan Missionary Society, in which office he abounded in loving and arduous services. At the Conference at Sheffield in 1829 he was elected to the chair; he presided at the Irish Conference of 1830, and retired to Ramsgate in 1832. This forced cessation from active work was due to physical prostration under his great literary, mission-office, and presidential toils. Dissolution, in fact, was already in progress; it was only a question of time. After a sickness of great suffering, the spirit of the gentle and generous Townley was released in the triumph of peace and faith, Dec. 12, 1833.

Amid the active duties of his pastorate and offices, Dr. Townley devoted himself to literary labors with an indomitable perseverance. His studies in Biblical lines made him in all probability the most learned man in the Wesleyan Conference after the death of Dr. Clarke (whom he only survived fifteen months and a half), particularly in all relating to the literary history of the Bible. The following is a list of his works: *Biblical Anecdotes* (Lond. 1813, 12mo); *Illustrations of Biblical Literature*, exhibiting the history and fate of the sacred writings, including notices of translators and other eminent Biblical scholars (ibid. 1821, 3 vols. 8vo; N. Y. 1842, 2 vols. 8vo); *Essays* on various subjects in ecclesiastical history and antiquity (Lond. 1824); *The Rea-*

*son of the Laws of Moses*, from the *More Nebochim* of Maimonides, excellently translated, with notes (100 pp.), dissertations (nine), and life of the author (ibid. 1827, 8vo); *Introduct. to Literary Hist. of the Bible* (ibid. 1828, 12mo; N. Y. 1832 [a kind of a sequel to his *Anecdotes*, and introduction to his *Biblical Literature*]); *Introduct. to the Critical Study of the Old and New Testaments* (his last); *Sermon* (in the volume of *Miscellaneous Sermons*, by Wesleyans, published at the Conference Office [Lond. 1833]); *History of Missions* (valuable sketches published posthumously in the *West. Meth. Mag.* for 1834, an earnest of an exhaustive work to have been written had his life been spared); various articles in the *Meth. Mag.*, etc.

Dr. Townley's fame rests upon his *Biblical Literature*, a work as valuable now as it was upon the day of its publication, and which the *Eclectic Review* (xviii, 386, 407) affirms to be the most comprehensive of the kind in the world. It won for him the doctorate from an American university (that being the first instance of such a degree being conferred upon an English Wesleyan minister), the congratulations of the University of Dublin, and numerous encomiums—slight compensation, however, for the immense labor it cost. For reviews and notices of this work see *Meth. Quar. Rev.* July, 1843, art. i; October, 1842, p. 638; *Christ. Rev.* [Baptist], June, 1844 (by Dr. Smith); *Meth. Quar. Mag.* 1822, see Index; Orme, *Biblioth. Bibl.* p. 435; Horne, *Introduct.* etc. On the Life of Dr. Townley, see *Minutes of Eng. Conf.* 1834; Hoole, *West. Meth. Mag.* May, 1835; Peck, in Amer. ed. of *Bibl. Lit.* vol. i; Smith, *Hist. of West. Meth.* ii, 649, 650; iii, 144-146, 203; Stevens, *Hist. of Methodism*, ii, 79; *Meth. Mag.* 1834, p. 78.

**Townley, John H.**, a Presbyterian minister, was born in 1817. In early life he became a devoted Christian. His career was short but brilliant. He was licensed to preach by the Presbytery of Elizabeth, and ordained and installed pastor of the Presbyterian Church at Hackettstown, N. J. He remained in this charge eight years, preaching with great acceptability and usefulness, greatly beloved by the congregation and people of the town. On resigning this charge, he accepted a call to the Church at Morristown, N. J. As in the former charge, during his ministry there were repeated outpourings of the Holy Spirit, in which many souls were converted and added to the Church, so in this, revivals followed. His energy and fidelity greatly endeared him to the people of his charge, and gave promise of continued success. His devotion to the cause of Christ, his prompt and ready co-operation in every good work, and his ability and fidelity in the discharge of every duty devolved upon him, rendered his loss peculiarly afflicting to the Church and the community. He died at Morristown, Feb. 5, 1855. (W. P. S.)

**Townsend, George**, D.D., an English divine, was born at Ramsgate in 1788, and was educated at Trinity College, Cambridge. He became chaplain to bishop Barrington in 1822, and was canon of Durham from 1825 till his death, Nov. 23, 1857. He was the author of *The Old Testament Arranged in Historical and Chronological Order, on the Basis of Lightfoot's Chronicle*, etc., with copious indexes (Lond. 1821, 2 vols. 8vo); *The New Testament Arranged in Historical and Chronological Order*, etc. (ibid. 1825, 2 vols. 8vo; 5th ed. 1860, imp. 8vo; Amer. ed. of both the foregoing, revised by T. W. Coit, D.D., Boston, 1837, 2 vols. 8vo); *The Accusations of History against the Church of Rome* (Lond. 1825, 8vo; new ed. 1845, 18mo); *Thirty Sermons on some of the most interesting Subjects in Theology* (1830, 8vo); *Plan for Abolishing Pluralities and Non-residence*, etc. (ibid. 1833, 8vo); *Life and Defence*, etc., of Bishop Bonner (1842, 8vo); *Spiritual Communion with God, or the Pentateuch and the Book of Job Arranged*, etc. (ibid. 2 vols. roy. 8vo; vol. i in 1845; vol. ii, October, 1849); *Historical Researches in Ecclesiastical and Civil History*, etc. (ibid. 1847, 2 vols. 8vo); *Journal of a*

*Tour in Italy in 1850, with an Account of an Interview with the Pope at the Vatican* (1850, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

**Townsend, John**, an English Dissenting minister, was born March 24, 1757, in the parish of White-chapel, County of Middlesex. He was educated for five years at Christ's Hospital, and was then apprenticed to his father. Having received some religious impressions from the preaching of the Rev. Henry Peckwell, he offered himself as a member at the Tabernacle, and commenced public teaching in some of the villages around London, but soon received an invitation to supply the Independent meeting at Kingston, where he was ordained, June 1, 1781. After three years Mr. Townsend quitted Kingston and settled at Bermondsey, where he commenced his official duties at midsummer, 1784, and in which situation he continued to labor in his Master's vineyard till the period of his death, Feb. 7, 1826.

Mr. Townsend was one of the founders of the London Missionary Society. He also aided in the formation of the Tract Society, the British and Foreign Bible Society, the London Female Penitentiary, the Irish Evangelical, the Society for the Conversion of the Jews, the Congregational School (raised entirely by his influence), the Fund for the Relief of Aged Ministers, and especially the Asylum for the Deaf and Dumb, which, if we are not mistaken, owed its establishment chiefly to his exertions. His sober, solid, judicious hints and observations were always listened to with profound attention, and his advice, which was never officially obtruded, was always acceptable. As a preacher he was distinguished by good sense and sound doctrine, commending himself to the conscience and the heart by a clear and judicious exhibition of divine truth. His principal works are, *Three Sermons* (1797, 8vo):—*Nine Discourses on Prayer* (2d ed. Lond. 1799, 8vo):—*Hints on Sunday-schools and Itinerant Preaching* (1801, 8vo):—single *Sermons* (1786–1808). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Townsend, Joseph**, an English clergyman, was a fellow of Caius College, Cambridge, and studied medicine at Edinburgh. He afterwards entered holy orders, and became rector of Pewsey, Wiltshire, and chaplain to Lady Huntingdon, preaching in her chapel at Bath. He died in 1816. He published, *Every True Christian a New Creature* (Lond. 1765, 12mo):—*Thoughts on Despotism and Free Governments* (1781–91, 8vo):—*Dissertation on the Poor-laws, by a Well-wisher to Mankind* (1786, 8vo):—*Observations on Various Plans for the Relief of the Poor* (1788, 8vo):—*The Character of Moses Established for Veracity as a Historian*, etc. (Bath, 1813–15, 2 vols. 4to):—besides medical and scientific works, sermons, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.* s. v.

**Townsend, Thomas Stuart, D.D.**, an English prelate, was born in Cork about 1801, and became dean of Lismore in July, 1849; dean of Waterford in August, 1850; bishop of Meath in September, 1850; and died at Malaga, Spain, Sept. 16, 1852. He published some educational and religious treatises. See *Lond. Athen.* 1849, p. 829, 1057; *Lond. Gent. Mag.* 1852, ii, 522.

**Townshend, Chauncy Hare**, an English clergyman, was born in 1800, and was educated at Trinity Hall, Cambridge, where he graduated A.B. in 1821 and A.M. in 1824. He received the university prize for English verse (*Jerusalem*) in 1828. During his last years he lived chiefly at Lausanne, Switzerland, and died Feb. 25, 1868. He bequeathed to Charles Dickens money, manuscripts, essays, letters, etc., some of which he desired to be published. Accordingly Mr. Dickens published in December, 1869, *Religious Opinions of the Rev. Chauncy Townshend*, published as directed by his will (London, 8vo). He also wrote, *Poems* (ibid. 1821, 8vo):—*Descriptive Tour in Scotland* (ibid. 1840, 8vo):—*Facts in Mesmerism*

(ibid. 1840, 8vo):—*Sermons in Sonnets*, etc. (ibid. 1851, 8vo):—*The Three Gates*, in verse (ibid. 1859, 8vo). See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Townson, Thomas, D.D.**, an English clergyman, was born at Much Lees, in Essex, in 1715. He was educated at Oxford, where he took his degree of A.M. in 1739; was ordained priest in 1742; became vicar of Hatfield Peverel in 1746; senior proctor of the university, and rector of Blithfield, Staffordshire, in 1749; and rector of Malpas in 1751, where the rest of his life was spent. In 1781 he was made archdeacon of Richmond, and in 1783 was offered the professorship of divinity at Oxford, which he declined. He died April 15, 1792. His most important works are his *Discourses on the Four Gospels, chiefly with regard to the Peculiar Design of Each, and the Order and Places in which they were Written*, published in 1778, which has passed through three editions; and his *Discourse on the Evangelical History from the Interment to the Resurrection of our Lord* (1792). His collected works were issued in 2 vols. 8vo (Lond. 1810), edited by Ralph Churton, A.M. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Kitto, *Cyclop. s. v.*; Chalmers, *Biog. Dict.* s. v.

**Tozer, Henry**, a learned Puritan divine, was born at North Tawton, Devonshire, in 1602; was educated at Exeter College, Oxford, and was chosen fellow in 1623. Having taken orders, he was engaged in moderating, reading to novices, and lecturing in the chapel. He was adverse to overturning the establishment of the Church, and in 1643 declined to be one of the assembly of divines. He remained at Oxford, where he preached at Christ Church before the king, and at St. Mary's before the Parliament. He was appointed in 1646 to take his degree of D.D., but declined. Dr. Hakewell, the rector, having left the college, the government devolved on Mr. Tozer, as sub-rector, who manfully opposed the illegality of the parliamentary visitation, and maintained the rights and privileges of the college. In March, 1647–48, he was cited before the parliamentary visitors to answer the charge of "continuing the common prayer in the college after the ordinance for the directory (the new form) came in force; also for having sent for and admonished one of the house for refusing to attend the chapel prayers on that account." He replied, in effect, "that these matters referred to the discipline of the college, and that they could be submitted to no other visitors than those mentioned in the statutes," meaning the bishop of Exeter. The visitors ordered him to be ejected, but Dr. Tozer continued to keep possession of the college for some time, and they expelled him from the college and university in June, 1648. He refused to surrender the keys of the college, there being no rector to whom he could legally give them, as a consequence he was imprisoned. After a while he was allowed to remain in his rooms in the college, and to enjoy the profits of a travelling fellowship for three years. On the strength of this he went to Holland and became minister to the English merchants at Rotterdam. He died there Sept. 11, 1650. Mr. Tozer published a few occasional sermons, *Directions for a Godly Life*, etc. (1628, 8vo):—*Dicta et Facta Christi ex quatuor Evangelistis collecta* (1634, 8vo).

**Trachonitis** (Τραχωνίτις) is mentioned in the Scriptures only in describing the political divisions of Palestine at the time of John the Baptist's first public appearance: "Philip was then tetrarch of Iturea and the region (χώρας) of Trachonitis" (Luke iii, 1). Although Trachonitis was a distinct and well-defined province, yet it appears that in this passage the phrase "region of Trachonitis" is used in a wider sense, and included two or three other adjoining provinces. As considerable misapprehension has existed among geographers regarding Trachonitis, and as its exact position and boundaries were first clearly ascertained by the researches of recent writers, it may be well in this place

to give a brief résumé of the ancient notices of the province, and then to show how they can be applied in setting aside modern errors and establishing correct views.

Josephus states that Uz, the son of Aram, founded Trachonitis and Damascus, which "lay between Palestine and Cœle-Syria" (*Ant.* i, 6, 4). His next reference to it is when it was held by Zenodorus, the bandit chief. Then its inhabitants made frequent raids, as their successors do still, upon the territories of Damascus (*Ant.* xv, 10, 1). Augustus took it from Zenodorus, and gave it to Herod the Great, on condition that he should repress the robbers (*Ant.* xvi, 9, 1). Herod bequeathed it to his son Philip, and his will was confirmed by Cæsar (*War.* ii, 6, 3). This is the Philip referred to in Luke iii, 1. At a later period it passed into the hands of Herod Agrippa (*War.* iii, 3, 5). After the conquest of this part of Syria by Cornelius Palma, in the beginning of the 2d century, we hear no more of Trachonitis.

From various incidental remarks and descriptions in Josephus's writings, the position of Trachonitis in relation to the other Transjordanic provinces may be ascertained. It lay on the east of Gaulonitis, while it bordered on both Auranitis and Batanæa (*War.* iv, 1, 1; i, 20, 4). It extended farther north than Gaulonitis, reaching to the territory of Damascus (*Ant.* xv, 10, 3, and 10, 1; *War.* iii, 10, 7). Ptolemy locates the Trachonitic Arabs along the base of Mount Alsadamus, and he includes this mountain in the province of Batanæa, of which Saccæa was a chief town (*Geogr.* v, 15). Strabo states that there were two Trachons (*ὄδο Τραχωνίτες*), and he groups Damascus and Trachon together, and states that the latter country is rugged and wild, and the people daring robbers (*Geogr.* xvi, 11). Jerome, speaking of Kenath, calls it a city of Trachonitis near Bozrah (*Onomast.* s. v. "Canath"); and the writers of the Talmud extend Trachon as far as Bozrah (Lightfoot, *Opp.* ii, 478; comp. Jerome, *Onomast.* s. v. "Ituræa;" Reland, *Palæst.* p. 109 sq.).

From these statements, compared with the results of modern research, the exact position and boundaries of this ancient province can be determined. It extended from the southern confines of Damascus, near the bank of the River Awaj (Pharpar), on the north, to Busrah (Bostra and Bozrah), on the south. Bozrah was the capital of Auranitis, and consequently that province lay along the southern end of Trachon. The province of Gaulonitis (now Jaulân) was its western boundary. Batanæa has been identified with Ard el-Bathanyeh, which embraces the whole ridge of Jebel Haurân, at whose western base lie the splendid ruins of Kenath, one of the ancient cities of Trachon (Jerome, *Onomast.* s. v. "Canath," "Kenath"). Consequently the ridge of Jebel Haurân formed the eastern boundary of Trachon, which extended southward to Busrah in the plain, near the south-western extremity of the range (Porter, *Damascus*, ii, 259 sq.; also in *Journal of Sac. Lit.* for July, 1854). The region thus marked out embraces the modern district of the *Lejah*, which may be considered the nucleus of Trachonitis; also the smooth plain extending from its northern border to the ranges of Khîyârah and Mânîa. The rocky strip of land running along the western base of Jebel Haurân, and separating the mountain-range from the smooth expanse of Auranitis, was likewise included in Trachonitis. This may explain Strabo's two Trachons. In the ruins of Musmeih, on the northern edge of Lejah, Burckhardt discovered a Greek inscription which proves that that city was Phæno, the ancient metropolis of Trachon (*Travels in Syria*, p. 117; see also *Preface*, p. xi).

At first sight it might appear as if *Trachon*, or *Trachonitis* (*Τραχών*, or *Τραχωνίτις*), were only a Greek name applied to one of the subdivisions of the ancient kingdom of Bashan; yet there is evidence to show that it is a translation of a more ancient Shemitic appellation, descriptive of the physical nature of the region. *Τραχών* signifies rough and rugged; and *Τραχωνίτις*

is "a rugged region" (*τραχὺς καὶ περρώδης τόπος*), and peculiarly applicable to the district under notice. The Hebrew equivalent is *Argob* (*אַרְגֹב*), "a heap of stones;" from *רגב* = *רגם*), which was the ancient name of an important part of Og's kingdom in Bashan. The identity of Trachon and Argob cannot now be questioned. It was admitted by the Jewish rabbins, for the Targums read *טְרַחֹנָה* (*Trachona*) instead of *אַרְגֹב* (*Argob*) in Deut. iii, 14 and 1 Kings iv, 13 (Lightfoot, *Opp.* ii, 478); and it is confirmed by the fact that Kenath, one of the threescore great cities of Argob (1 Chron. ii, 23), was also, as has been seen, a city of Trachon. Eusebius, led doubtless by similarity of names, confounded Argob with the castle of Erga or Ragaba, near the confluence of the Jordan and Jabbok. In this he has been followed by Reland (*Palæst.* p. 959, 201), Ritter (*Pal. und Syr.* ii, 1041), and even Robinson (*Bibl. Res. App.* p. 166, 1st ed.). Nothing can be more clear, however, than that Argob, a large province of Bashan containing sixty great cities, was quite distinct from Ragaba, an obscure castle in Gilead (Porter, *Damascus*, ii, 271). Eusebius also confounded Trachonitis and Ituræa (*Onomast.* s. v. "Ituræa"); a manifest error. William of Tyre gives a curious etymology of the word Trachonitis: "Videtur autem nobis a *tracombis* dicta. Tracomes enim duncur occulti et subterranei meatus, quibus ista regio abundat" (*Gesta Dei per Francos*, p. 895). Be this as it may, there can be no doubt that the whole region abounds in caverns, some of which are of vast extent. Strabo refers to the caves in the mountains beyond Trachon (*Geogr.* xvi), and he affirms that one of them is so large that it would contain 4000 men. Travellers have visited some spacious caves in Jebel Haurân, and in the interior of the Lejah.

The province of the *Lejah* (Arab. "the Retreat") comprises the principal part of the Hebrew Argob and Greek Trachon. It is oval in form, about twenty-two miles long by fourteen wide. Its physical features are unparalleled in Western Asia. It is a plain, but its surface is elevated above the surrounding plain to an average height of thirty feet or more. It is entirely composed of a thick stratum of black basalt, which appears to have been emitted from pores in the earth in a liquid state, and to have flowed out on every side until the surface of the plain was covered. Before completely cooling, it seems to have been agitated as by a tempest, and then rent and shattered by internal convulsions. The cup-like cavities from which the liquid mass was projected are still seen; and likewise the wavy surface such as a thick liquid generally assumes which cools while flowing. There are deep fissures and yawning gulfs with rugged broken edges; and there are jagged mounds that seem not to have been sufficiently heated to flow, but which were forced up by some mighty agency, and then rent and shattered to their centres. The rock is filled with air-bubbles, and is almost as hard as iron. "In the interior parts of the Lejah," says Burckhardt, "the rocks are in many places cleft asunder, so that the whole hill appears shivered and in the act of falling down; the layers are generally horizontal, from six to eight feet or more in thickness, sometimes covering the hills, and inclining to their curve, as appears from the fissures which traverse the rock from top to bottom" (*Travels in Syria*, p. 112).

It is worthy of note how minutely this description accords with that of Josephus, who says of the inhabitants of Trachon that it was extremely difficult to conquer them or check their depredations, "as they had neither towns nor fields, but dwelt in caves that served as a refuge both for themselves and their flocks. They had, besides, cisterns of water and well-stored granaries, and were thus able to remain long in obscurity and to defy their enemies. The doors of their caves are so narrow that but one man can enter at a time, while within they are incredibly large and spacious. The ground above is almost a plain, but it is covered with

rugged rocks, and is difficult of access, except when a guide points out the paths. These paths do not run in a straight course, but have many windings and turns" (*Ant. xv*, 10, 1).

The character of the inhabitants remains unchanged as the features of their country. They are wild, lawless robbers, and they afford a ready asylum to murderers, rebels, and outlaws from every part of Syria. It seems to have been so in Old-Test. times; for when Absalom murdered his brother, he fled to his mother's kindred in Geshur (a part of Trachon), "and was there three years" (2 Sam. xv, 37, 38). See GESHUR.

It is a remarkable fact that the great cities of Argob, famed at the time of the Exodus for their strength, exist still. The houses in many of them are perfect. The massive city walls are standing; and the streets, though long silent and deserted, are in some places complete as those of a modern town. The city gates, and the doors and roofs of the houses, are all of stone, bearing the marks of the most remote antiquity. It is not too much to say that, in an antiquarian point of view, Trachon is one of the most interesting provinces in Palestine (Porter, *Bashan's Giant Cities*; Burckhardt, *Travels in Syria*; Graham, in the *Journal of R. G. S.* vol. xxviii; and *Cumb. Essays*, 1858; Wetzstein, *Reisebericht über Hauran und die Trachonen*). Such as desire to compare with the above account the views previously set forth by geographers may consult Lightfoot, *loc. cit.*; Reland, *Palest.* p. 108 sq.; Cellarius, *Geogr. Ant.* ii, 617 sq. See ARGOB.

**Tract**, a psalm, or portion of a psalm, sung in the Latin mass instead of the Gradual, on fixed days, from Septuagesima to Easter, after the Epistle. At the time at which the Church is commemorating the passion of our Lord, this Tract is slowly chanted in lieu of the joyous Gradual. It is called *the Tract*, as some ritualistic writers affirm, because it is *drawn out* in a slow and solemn strain. It is said that the psalm or hymn chanted by one voice was *the Tract*, and when the singer was interrupted by the choir his part was known as *the versicle*, and the portions allotted to them were called *responsories*. See Lee, *Gloss. of Liturg. Terms*, s. v.; Walcott, *Sac. Archaeol.* s. v.

**Tractarianism.** See ENGLISH CHURCH; OXFORD TRACTS; PUSEYISM.

**Tractator**, the name given in the early Church to preachers and expositors of Scripture; his sermon or treatise being called *Tractatus*. See Bingham, *Christ. Antiq.* bk. xiv, ch. iv, § 1.

**Tractātus**, the Latin name for a sermon, discourse, etc.

**Tractoriæ**, a name sometimes given to the circular letters of metropolitans summoning the bishops to a council. These circular letters were a legal summons, which no bishop of the province might disobey under pain of suspension, or some such canonical censure. See Bingham, *Christ. Antiq.* bk. ii, ch. xvi, § 17.

**Tracts and TRACT SOCIETIES.** The term *tract*, although etymologically signifying something *drawn out* (Lat. *tractus*), has long been employed in the English language to designate a short or condensed treatise in print. It has primary reference to the form of publication, and is usually applied only to unbound sheets or pamphlets. Thus, a treatise on any topic may be published either in a book or tract form, the tract being much cheaper than the book, but also much more liable to be injured or destroyed. While many political, scientific, and other tracts have been published, yet the vast majority of publications known as tracts are of a religious character. So generally is this true that the word *tract* used without qualification rarely suggests any other idea than that of a brief religious treatise or appeal. To some extent the idea has been employed by propagandists of error, but far more generally by lovers of truth and by persons willing to make sacrifices

for its promotion. Had only miscellaneous tracts been published, or had the publication of tracts on religious subjects only taken place in an accidental or unsystematic manner, there would have been no occasion for this article.

**I. Occasion and Character of the Tract Movement.**—There has, in fact, arisen a great Christian enterprise having for its object the publication and dissemination of religious tracts. This enterprise, like the Gospel itself and other of its auxiliaries, has from small beginnings grown to vast proportions and commanding influence. Although its history is chiefly limited to the last one hundred years, it has already come to be considered one of the cardinal agencies of Christian propaganda, taking rank with the missionary and Sunday-school enterprises, and serving as a powerful auxiliary to both. Although asserting no specific divine appointment, it nevertheless claims to be authorized by inspired analogies. The sacred books both of the Old and the New Testaments were issued and circulated as separate treatises or tracts; so that the Bible itself, in its most approved modern form, may be said to be a bound volume of tracts.

The principle involved is that of giving truth a permanent and available expression in written or printed language, thus enabling it to survive the voice of the living teacher, and to reach persons and places to which he could never have access. God, from the beginning, appointed language as the medium of communication between himself and man, as well as between man and man. He spoke to our race, not only through the hearing of the ear, but also through the perceptions of the eye, thus consecrating both spoken and written language to the office of religious instruction. In giving a written law, he not only provided for the moral guidance of the generation to whom it was first addressed, but for all subsequent ages, while he also continued to teach and admonish men by the voice and the pen of prophets and holy men in successive periods. As a counterpart of the spoken language to be used in preaching, the chosen disciples of our Lord were inspired to write narratives of the life, miracles, and death of him who was the eternal Word, together with the acts and letters of the apostles embodying the instructions which they had personally received from the Lord himself, and which were thus handed down to those who should come after them. Spoken language has the advantage of instant readiness, wherever there is a tongue to speak and an ear to hear. It can also be varied with circumstances, and, adapted to the special wants and changing perceptions of those to whom it is addressed. On the other hand, written language is available at all times and in all places. It can be cheaply multiplied and scattered on the wings of the wind. It also endures from age to age, while living speakers die. Great as was the personal influence of the apostles through the agency of spoken language, the influence of their writings has been infinitely greater. Their voices expired with their natural life, but their written speech was immortal. It survived all persecutions. It became embodied in many languages, and was diffused in every direction. It has come down through the centuries. It has been taken up by the modern printing-press, and having been translated into hundreds of tongues and dialects, is now multiplied more rapidly than ever before for the benefit of the present and succeeding generations. By this adjustment of Providence, the apostles, though dead, yet speak, and will continue to speak to increasing millions while the world endures; and those who read their writings may not only receive their teachings, but become partakers and propagators of like precious faith. They may echo the truth which has made them free in their own forms of expression and with new adaptations to the ever-changing circumstances of humanity.

A peculiarity of written language is that its dissemination challenges co-operation from many not called to the office of preaching. Copyists, printers, purchas-

ers, and distributors may in their several spheres co-operate to bring the truth of God by means of it into contact with human hearts. The tract enterprise, in fact, employs and combines for a common purpose many and varied agencies. In order that a religious tract may be produced and started on a career of usefulness, there must first be a writer imbued with the spirit of truth and love, and willing to labor with his pen, in order to express his thoughts in language at once attractive and impressive. Then there must be a pecuniary investment for the publication of the document written. The task of publication, although possible to individuals, is best performed by public institutions, like the existing tract societies, which, having a corporate existence, live on though their founders die. Such societies can develop and carry out great systems of effort, which their projectors may only live to initiate. Superadded to the publication of tracts, in order to their extended usefulness, there must be co-operative and systematic agencies for their proper and continuous dissemination among readers. When this complicated machinery of moral and spiritual influence is appropriately organized, the humblest Christian may come into working relations with it and be a helper to its highest success. Thenceforward there is a grand copartnership of results, in which those who write, who print, who circulate, and who read may rejoice together.

As an illustration of the endless stream of influences which may flow outward from a single instance of bringing religious truth in a printed form to the attention of the unconverted, the following facts are condensed from authentic documents. In the latter part of the 16th century, a good man, known as Dr. Sibbs, wrote a little book entitled *The Bruised Reed*. A copy of that book, sold by a poor peddler at the door of a lowly cottage in England, was the agency of the Christian awakening of Richard Baxter, who was born in 1615. "The additional reading of a little piece of Mr. Perkins's work *On Repentance*, borrowed from a servant," says Baxter, in a sketch of his own life, "did further inform me and confirm me; and thus, without any means but books, was God pleased to resolve me for himself." Thus brought to the knowledge and experience of the truth, Baxter became one of the most earnest preachers and prolific writers of any age. He died in 1691, having published matter enough to fill twenty-three large volumes. Two of his smaller works—*The Call to the Unconverted* and *The Saints' Everlasting Rest*—have passed through countless editions both in England and America, and, doubtless, will continue to be widely read in English-speaking countries while time endures. Of the full extent of their influence it is impossible to form an adequate estimate, but here and there links in the chain of sequences can be discovered. Philip Doddridge, when young, borrowed the works of Baxter, and in due time became the author of the *Rise and Progress of Religion in the Soul*, a work which led William Wilberforce to seek for pardon through the Redeemer. Wilberforce's *Practical View of Christianity* was the instrument employed by the Holy Spirit to lead to repentance and a true faith in Christ Legh Richmond, the writer of *The Young Cottager*, *The Dairyman's Daughter*, and various other tracts. Mr. Richmond was a laborious clergyman, and for many years a secretary of the Religious Tract Society of London. His tracts above named have been translated into many languages, and have been instrumental, under the blessing of God, in the conversion of many precious souls. Only two days before his summons to a better world, he received a letter mentioning the conversion of two persons, one of them a clergyman, by the perusal of his tract *The Dairyman's Daughter*. Nearly half a century has since passed away, but the tract has lived on, and, by the help of printers, donors, and distributors, has continued to do its work; while many of those converted through its influence have themselves become successful actors in starting agencies of influence, destined to work on with

ever-increasing and multiplying power. Volumes might be filled with incidents illustrating the utility and power of tracts as an agency of evangelization and religious influence both in Christian and pagan lands. In fact, judging from the reports and annals of the various tract organizations, no branch of Christian activity has been more uniformly productive of the best results than tract-distribution.

While the tract enterprise may thus be spoken of in its separate character, it should be borne in mind that it seldom acts or stands alone. Its most approved modes of action are in connection with Church work at home and missionary effort abroad; consequently its best fruits will doubtless be found in the great day to have been the joint product of many forms of Christian activity. It may be confidently urged that Christian work in connection with the use of religious tracts is practicable to a greater number of people of every age and circumstance in life than any other generally recognised agency of usefulness. Comparatively few are called to be ministers or missionaries. Many cannot be Sunday-school teachers. But who cannot be the bearer or sender of a tract?—who, indeed, cannot, with comparatively little sacrifice, circulate many tracts through channels of business, in public thoroughfares, through the mails, and, what is better than any other way, by personal presentation?

The present is a reading age, and while, on the one hand, it is important to antagonize the evils resulting from bad reading in all its forms, on the other hand there is no community in which many persons may not be found who will have little, if any, good reading that is not brought to them by the hand of benevolence. He that searches them out and bestows upon them good gifts in the form of Christian tracts and books, accompanied, if need be, with other acts of kindness, will seldom fail of doing good; but he who adds to the tract earnest Christian inquiry or conversation will do still greater good, and in many instances secure an interest in such promises as these—"He which converteth the sinner from the error of his way shall save a soul from death" (James v, 20); "And they that turn many to righteousness [shall shine] as the stars for ever and ever" (Dan. xii, 3). Ministers of the Gospel especially should consider it a great privilege to have provided and ready to their hand a large supply of Christian truth strongly stated, neatly printed, and specially adapted to aid and render permanent the very work they are endeavoring to do by preaching and pastoral labor. In this respect the publications of the tract societies become an arsenal filled with legitimate weapons of the Christian warfare, a vast store of fixed ammunition with which to defend the citadel of Christian truth, and to assault the positions of the adversary.

In the pulpit the minister is chiefly limited to his own thoughts and expressions. In the use of tracts he may avail himself of the best thoughts, the largest experience, and the ablest statements of the wisest men who have used their pen for the glory of God. His own spoken words may vanish with the breath which utters them. At most, they are not likely to be long remembered; but the printed pages which he scatters may remain to be perused when the giver is dead, and may even descend to coming generations. In preaching, the minister is limited to his own personal efforts, and can only address those who come to hear him. In his pastoral work he is at liberty to seek out the people; and often the present of a tract or a book will secure for him the friendship and the interested attention of those who would not have volunteered to enter his congregation. Besides, in the work of tract-distribution, a hundred willing hands can help him, and feet "shod with the preparation of the Gospel of peace" will run for him in paths of duty farther and oftener than he with the utmost diligence can hope to go himself. Ministers should therefore enlist their people in the practical work of tract-distribution. This is too great and too good a

work to be confined to a few. Specially appointed tract-committees and visitors have their duties, which should neither be omitted nor excused; yet no individual should consider his or her personal responsibility relieved by the official appointment of others. The truth is, that in order to the full accomplishment of tract-distribution as a means of evangelical effort in any community, both systematic and occasional, public and individual, exertions must be put forth. The periodical distribution of tracts through districts and towns is very important, but it has disadvantages. For instance, where the district is large there is not time for sufficient personal conversation with different characters; besides, many will not listen to the voice of a stranger. If the Christian acquaintances of such persons should give them tracts as tokens of friendship, and follow up the gift with affectionate warning and entreaty, the end would be more effectually gained. Thus it is that individual Christians, in their several circles of acquaintance and business, have a work to do in which well-selected tracts may furnish invaluable aid.

II. *History of Initial Tract Enterprises.*—Aside from the circulation of portions of the Holy Scriptures in fragmentary or tract form, the use of tracts as an agency of religious usefulness dates from the dawn of the Reformation in Europe. Long before the invention of printing, the early Reformers sent out their little tractates to awaken and instruct the people who still sat under the shadow of the Dark Ages. Wycliffe's writings were the means of extensive usefulness. He sent out more than one hundred volumes, small and great, besides his translation of the Bible. Notwithstanding many of his works were burned and people were forbidden to read them on pain of death, yet they spread far and wide. Like seeds of truth borne by the wind, they lodged on the soil of the Continent, and brought forth fruit there in after-years. Works produced by the writers of that period, although extensively useful, were greatly hindered in their circulation by the size and expensiveness of the manuscript form in which they were issued.

The invention of printing in the 15th century removed many formidable obstacles to the diffusion of truth, and greatly stimulated the literary efforts of those who were striving to reform the Church. Luther appeared, and by his powerful writings and those of his associates, millions of people were led to renounce the errors than which they previously knew nothing better. The efforts of the later Reformers are thus characterized by one of their opponents: "The Gospels of these days do fill the realm with so many of their noisome little books that they be like to the swarms of locusts which did infest the land of Egypt." Fox, the martyr-logist, exults over the work and promise of the art of printing in language like this: "God hath opened the press to preach, whose voice the pope is never able to stop with all the puissance of his triple crown. By this printing, as by the gift of tongues and as by the singular organ of the Holy Spirit, the doctrine of the Gospel soundeth to all nations and countries under heaven; and what God revealed unto one man is dispersed to many; and what is known to one nation is opened to all."

In the 17th century several traces are found of associations for promoting the printing and sale of religious works, while much good resulted from the efforts of individuals, both in England and on the Continent. At length, movements on a larger scale began to be made in the line of associated efforts for the diffusion of truth in printed form. The earlier organizations of this kind, though not strictly tract societies, were preliminary, and in some sense introductory, to the great institutions subsequently formed for the exclusive object of printing and circulating religious tracts. In 1701 the Society for Promoting Christian Knowledge was established in England. In 1742 the Rev. John Wesley, in the prosecution of his evangelical work in Great

Britain, commenced printing and circulating religious tracts by personal effort and the co-operation of the preachers associated with him. In 1750 the Society for Promoting Religious Knowledge among the Poor was organized. In 1756 societies for a similar object were commenced both in Edinburgh and Glasgow. Although the three societies named accomplished good, they did not remain permanently established. In 1782 Mr. Wesley instituted a Society for the Distribution of Religious Tracts among the Poor. In his published proposals in behalf of the society, he said, "I cannot but earnestly recommend this to all those who desire to see true scriptural Christianity spread throughout these nations. Men wholly unawakened will not take the pains to read the Bible. They have no relish for it. But a small tract may engage their attention for half an hour, and may, by the blessing of God, prepare them for going forward." Membership in the society required the subscription of half a guinea or more, for which a quota of tracts would be delivered yearly. The publications of the society at that date were thirty in number, embracing Alleine's *Alarm*, Baxter's *Call*, *Ten Short Sermons*, *Tokens for Children*, *A Word to a Soldier*, *A Word to a Sailor*, *A Word to a Swearer*, *A Word to a Sabbath-breaker*, *A Word to a Drunkard*, etc. It is not difficult to see in the above scheme the germ of the largest tract societies now in existence. Its tenor, more especially when taken in connection with Mr. Wesley's methods of supplying religious books wherever his societies existed or his preachers went, fully authorized the following assertion of his biographer, Richard Watson: "He was probably the first to use, on any extensive scale, this means of popular reformation." About 1790 Hannah More appeared as a writer of popular tracts. Her first tract, entitled *William Chip*, was published anonymously. Having been encouraged by its reception, she prepared, with the aid of her sisters, a series of small publications, entitled *The Cheap Repository Tracts*. In a private memorandum, published after her decease, she said, "I have devoted three years to this work. Two millions of these tracts were disposed of during the first year. God works by weak instruments to show that the glory is all his own." From that time forward the number of persons who made themselves useful by publishing and circulating tracts in various ways became considerably increased. Among them honorable mention may be made of Mrs. Rebecca Wilkinson, of Clapham; Rev. Charles Simeon, of Cambridge; and Rev. John Campbell, of Edinburgh.

III. *Tract Societies distinctively so-called.*—The time had now arrived for broader and more thoroughly organized movements in behalf of the tract enterprise. The Religious Tract Society of London was initiated in May, 1799. Rev. George Burder, Rowland Hill, Matthew Wilks, Joseph Hughes, and others were among its organizers. A rule of the society, like that of Mr. Wesley before noted, provided that its membership "consist of persons subscribing half a guinea or upwards annually." The society was placed upon a basis of broad catholicity. Its object was defined to be the publication of "those grand doctrinal and practical truths which have in every age been mighty through God in converting, sanctifying, and comforting souls, and by the influence of which men may have been enabled, while they lived, to live to the Lord, and when they died to die unto the Lord." It is impossible to give in this article a detailed history of any of the societies enumerated; brief and general notices must suffice. But in the briefest notice of the Religious Tract Society of London, it is not too much to say that in the eighty years of its existence it has well and faithfully illustrated the catholic and evangelical principles announced by its founders in the beginning. In so doing it has accomplished its objects on a grand scale and to an unforeseen extent. An incidental event of the most interesting character grew out of the operations of the Religious Tract Society in the third year of its existence. It was no less than the

preliminary step towards the organization of the British and Foreign Bible Society—the parent Bible Society of the world. See BIBLE SOCIETIES.

For a score of years the business of the Religious Tract Society was of such a moderate extent that a small hired depository sufficed for its transaction. From 1820 the business so expanded as to require the occupation of enlarged premises in Paternoster Row, where, in 1843-44, its present commodious buildings were erected. The design of the society contemplated the double purpose of sales at or near cost, and gratuitous distribution. Both phases of its work were therefore limited to its supply of funds. Its only income, at first, was from the annual subscriptions of its members. But by degrees, and as necessity required, additions were made from other sources, such as congregational collections, auxiliary societies, life-memberships, legacies, and special donations. As the operations of the society increased, new and varied forms of action were developed, including not only sales through depositories, but by hawkers or peddlers throughout the provinces. Donations were made not only of tracts, but of assorted libraries to soldiers' barracks, to sea-going vessels, to emigrant and convict-ships, to workhouses, to coast-guard stations, to missionaries' families, to clergymen, to schoolmasters, and city missionaries, to be used for loaning to persons in destitute circumstances. During the first five years of the society's existence, it published only sixty-six different tracts in the ordinary form. Subsequently it began to enlarge the variety as well as the number of its publications. Broadsheets, handbills, childrens' books, periodicals adapted to different ages and classes, monthly volumes, standard works, and even commentaries on the Scriptures came in turn to be regularly and constantly issued under the imprint of the society. From active work in different parts of Great Britain, the society was led to extend its work into foreign fields. Such an extension had not been originally contemplated, but nevertheless took place in the order of Providence, and became a striking illustration of the expansive nature of true Christian benevolence. The circumstance which first led to the preparation of tracts in foreign languages was the obvious duty of giving religious instruction to a number of prisoners-of-war confined in England; and the first foreign languages in which the society's tracts were published were the French and the Dutch. As was to have been expected, the foreign prisoners, when released, carried more or less of the tracts they had received to their own countries, and thus, to some extent, created a demand for more and similar publications in those countries. About the same time, a correspondence sprang up between the society and representative evangelical Christians in most of the nations of Europe. Soon afterwards the enterprise of foreign missions began to be extended to various pagan nations. By similar processes, the work of the Religious Tract Society has been expanding and enlarging ever since, with a prospect of continuous expansion and usefulness in time to come.

The Reports of the society from year to year have been replete with interesting details, not only of progress, but also of results; and yet it may safely be inferred that the good which has been directly and indirectly accomplished through its instrumentality has not half been told. Eternity only can reveal the full extent of influences that have been so far-reaching, and in many instances so remote from ordinary human observation. A few items, condensed from the society's official documents, may serve as partial indications of the magnitude to which, from the small beginnings noted above, its operations have grown. The society has printed important tracts and books in one hundred and twenty different languages and dialects. Its present annual issues from its own depositories and those of foreign societies, through which it acts, are about sixty-three millions, and its aggregate issues during eighty years past have been about two thousand millions. It has co-operated

with every Protestant Christian mission in the world. It has assailed popery on the Continent of Europe, Mohammedanism in the East, and paganism of various forms in heathen lands. It has given a Christian literature to nations just emerging from barbarism. Its publications have passed the wall of China, and have entered the palace of the Celestial emperor. They have instructed the princes of Burmah, and opened the self-sealed lips of the devotees in India. They have gone to the sons of Africa to teach them, in their bondage, the liberty of the Gospel. They have preached Christ crucified to the Jew and also to the Greek; while in the homeland they have continued to offer the truths and consolations of religion to soldiers, to sailors, to prisoners, to the inmates of hospitals, and, in short, to rich and poor in every circumstance of life. In the year 1849, the Religious Tract Society celebrated its semi-centennial jubilee. In connection with that interesting event, a large jubilee fund was raised to increase the usefulness of the society. A jubilee memorial volume was also published, setting forth in an able and interesting manner the history of its first fifty years of work and progress. When, in the year 1899, the society shall celebrate its centennial, a still grander showing of results may be expected.

The additional tract societies of Great Britain, aside from merely local organizations, are not numerous. The following are the principal: The Religious Tract and Book Society of Scotland (Edinburgh). The primary organization of this society dates back to 1798. It is not a publishing society, and for many years had a feeble existence. About 1856 it adopted a system of colportage similar to that of the American Tract Society, and, since that period, has greatly multiplied its influence and usefulness. It embraces branch societies at Glasgow and Aberdeen, and employs some two hundred colporteurs. The Stirling Tract Enterprise, founded in 1848, is chiefly a publishing institution, issuing both tracts and periodicals. The Dublin Tract Society issues tracts in large numbers. The Monthly Tract Society, London, was instituted in 1837.

In passing from Great Britain to other countries, the number of tract societies is found to be very great. For the most part, they combine publication with distribution, receiving aid from the Religious Tract Society of London to enable them to publish tracts and books in their several localities. It is therefore deemed sufficient to give the title and date of organization, omitting details of history and statistics, although in many instances of great interest.

CONTINENT OF EUROPE.—Tract Society of Norway and Denmark, 1799; Stockholm Evangelical Society, 1815; Religious Tract Society of Finland, 1818; Tract Society of Copenhagen, 1820; Stuttgart Tract Society, 1813; Prussian Tract Society, Berlin, 1815; Tract Society of Wuppertal, 1814; Lower Saxony Tract Society, Hamburg, 1820; Tract Society of Leipzig, 1821; The Netherlands Tract Society, 1821; The Belgian Tract Society, 1835; The Belgian Evangelical Society, 1839; Religious Tract Society of Paris, 1830; Evangelical Society of France, 1829; Religious Book Society of Toulouse, 1835; Tract Society of Berne, 1802; Tract Society of Basle, 1810; Tract Societies of Lausanne, Neuchâtel, and Geneva, 1828; Evangelical Society of Geneva, 1881; Tract Societies of St. Gall, Zurich, and Chur, 1884; Tract and Book Publishing House of the Methodist Episcopal Church, Bremen, 1880.

INDIA.—Native Tract Society at Nagercoil, Travancore, 1894; Calcutta Book and Tract Society, 1826; Tract Societies of Madras, Bellary, Belgum, Bombay, Surat, and Benares, 1825-26; Tract Societies of Bangalore, Orissa, Allepie, Chunnar, and Quilon, 1829-30; Tract Societies of Mirzapore, Vizagapatam, Cuddapah, Neyoor, and Mangalore, 1832-40; Jaffna Religious Tract Society, 1825; Tract Societies of Cotta and Colombo, 1835; Ceylon Christian Vernacular Education Society and Religious Tract Society, 1860; North India Tract Society, Allahabad; Punjab Religious Book Society; The Christian Union of Java, 1833; Tract Society of Mauritius, 1834; Burmah Bible and Tract Society, 1861.

CHINA.—From the beginning of Christian missions in China the circulation of religious tracts and books has been diligently prosecuted. To that end nearly every separate mission has served as a publishing agency of greater or less extent. Almost all the missions have re-

ceived from the tract societies of England and America aid for their work of publication. In 1878 the Chinese Religious Tract Society was organized at Shanghai. It is composed of representative missionaries of various churches, and proposes to organize auxiliaries and local societies wherever Christian churches are established.

**JAPAN.**—Active measures are in progress for the preparation and diffusion of Christian tracts and books in Japan. But as yet such efforts are limited to the various missions aided by the principal Bible and Tract societies of England and America.

**AUSTRALIA.**—Tract Society of Sydney, 1823; Tract Society of Van Diemen's Land, 1837; Religious Tract Society of Victoria, 1836; Victoria Tract Distribution Society, 1853.

**NEW ZEALAND.**—New Zealand Tract Society, 1839; Wellington Tract Society, 1848.

**SOUTH AFRICA.**—Cape Town Auxiliary Tract Society, 1890; South African Ladies' Tract and Book Society, 1832.

**WEST INDIES.**—Jamaica Tract Society, 1835; New Providence Tract Society, 1837.

**CANADA.**—Tract Society of Quebec, 1824; Tract Society of Montreal, 1825; Religious Tract Society of Toronto, 1824; Religious Tract Society of Halifax, 1824; Religious Tract Society of St. Johns, N. B., 1825; British American Book and Tract Society, Halifax, 1868.

**UNITED STATES OF AMERICA.**—Massachusetts Society for the Promotion of Christian Knowledge, 1803; Connecticut Religious Tract Society, 1807; Vermont Religious Tract Society, 1808; The Protestant Episcopal Tract Society, 1809; New York Religious Tract Society, 1812; Evangelical Tract Society, Boston, 1813; Albany Religious Tract Society, 1813; New England Tract Society, 1814; Religious Tract Society of Philadelphia, 1815; Religious Tract Society of Baltimore, 1816; New York Methodist Tract Society, 1817; Baptist General Tract Society, 1824; American Tract Society, Boston, 1823; American Tract Society, New York, 1825; New York City Tract Society, 1827; New York City Mission and Tract Society, 1864; Willard Tract Society, Boston, 1866; Monthly Tract Society of the United States, New York, 1874.

It is not within the design of this article to give the history of the tract societies enumerated; but it is proper to remark that various modifications have taken place in the title and specific character of some of the earlier American organizations. In several instances primary associations have been merged in the formation of more important societies, while others have continued under new names and with modified forms of action. With increasing experience, the tendency has been to centralize the work of publication in a few strong societies, and to multiply the agencies of distribution outward from the great centres of publication. A few examples of combination and reconstruction may be noted. The New England Tract Society, organized in 1814, became in 1823 the American Tract Society, having its location in Boston. The same society in 1878 was merged in the American Tract Society which was organized in New York in 1825. The last-named arrangement was consummated none too soon, as great confusion had arisen from having two publishing societies of the same corporate name. The Baptist General Tract Society, organized in Washington in 1824, was subsequently transferred to Philadelphia, and in 1840 became, with enlarged designs, the American Baptist Publication Society. The New York Methodist Tract Society, organized in 1817, subsequently became incorporated as the Tract Society of the Methodist Episcopal Church.

As a counterpart to the above sketch of the rise and development of the Religious Tract Society of London, and as a specimen illustration of results from about half a century's operations of a similar American organization, the following facts are condensed from official publications of the American Tract Society: The society has a large and commodious building in Nassau Street, New York, with twenty steam-presses, tens of thousands of stereotype plates, and every facility for composing, printing, binding, storing, and issuing its own publications to the number of 4000 books, 30,000 tracts, and 20,000 papers daily. It is therefore enabled to abate, in fixing the prices of books, what otherwise would have to be added for rent of buildings hired, and for the profits of trade. It numbers on its list about 6000 distinct publications, including, besides tracts and handbills of various kinds, 1240 volumes of biography, his-

tory, and helps to Biblical study. Among what are called its home publications, 1584 distinct issues are in foreign languages, viz. German, French, Spanish, Italian, Portuguese, Swedish, Welsh, Dutch, Danish, Finnish, and Hungarian, designed for immigrants coming to the United States. Of its home publications in the English language, 28,000,000 volumes, besides about 3,000,000,000 pages of tracts, have been issued. Of its periodicals, several of which are illustrated and printed in the highest style of typography, over 5,000,000 are issued yearly to 350,000 subscribers. This society has become distinguished for its faithful and systematic prosecution of the work of colportage. By its agents, employed chiefly in frontier and destitute sections of the country, it has within a period of forty years done a work equal to that of one man for more than 5000 years. It has sold more than 11,000,000 volumes, and donated 3,000,000 to destitute persons and families. It has made more than 12,000,000 visits to families; in about 1,000,000 of which no religious book was found, with the exception of Bibles in about one third of the number. It has thus done much to meet the moral and religious wants of our frontier population in advance of schools and churches. It is accustomed to make grants each year of fifty thousand dollars' worth of its publications for circulation in prisons and hospitals, in Sabbath-schools and mission-schools, in cities and remote and lonely hamlets, to soldiers and to sailors on our inland waters, and in hundreds of outward-bound vessels for every corner of the globe. The foreign work of the society has been chiefly accomplished through donations of money granted to missionaries in seventy different foreign stations. By means of some \$700,000 thus appropriated, the society has printed, in 145 different languages and dialects, not less than 4211 distinct publications, including 640 volumes. Thus "fruits of the society's sowing may be found in almost every land—from Russia to the Cape of Good Hope, and from China in the East to Hawaii in the West."

As a summary showing of the work accomplished by a distributing tract society, the following items are copied from the Report of the New York City Mission and Tract Society for 1890:

#### RESULTS OF FIFTY-THREE YEARS' PRACTICAL WORK.

Years of missionary labor.....	1,216
Missionary visits.....	2,342,295
Tracts in English and other languages distributed.....	50,776,740
Bibles and Testaments supplied to the destitute.....	89,267
Books loaned and given.....	171,708
Children gathered into Sabbath-schools.....	112,954
Children gathered into day-schools.....	25,580
Persons gathered into Bible-classes.....	15,200
Persons induced to attend Church.....	253,375
Temperance pledges obtained.....	55,501
Religious meetings held.....	122,100
Persons restored to church fellowship.....	8,159
Converts united with evangelical churches.....	13,650

The total amount expended in fifty-three years, \$1,170,119.01.

In addition to the above sum expended in the regular missionary operations of the society, more than \$100,000 have been raised for building mission stations and chapels.

The detailed statistics of the tract enterprise in its various forms of action would fill many volumes with facts of intense interest, and form a just basis not only of admiration for its past success, but also of high expectation for its expanding and multiplying influence in the years and centuries to come.

**IV. Collateral Publishing Organizations.**—Before proceeding to enumerate the more important of them, some words of explanation seem necessary. In the development of the tract enterprise, various kinds of organizations have been found necessary or expedient. Only a few have become great publishing institutions, and no other one has attained such a magnitude of operations as that of the Religious Tract Society of London. Nevertheless, societies for the effective and appropriate distri-

bution of tracts have been found essential to the object of the enterprise as a whole. They have worked in more limited spheres, but have proved indispensable to the highest forms of success. Religious reading, when merely printed, has no more value than other merchandise. A single tract, brought to the eye and heart of an interested reader, accomplishes more for God and humanity than millions of pages resting upon the shelves of a depository. Societies, therefore, that circulate religious publications, and especially by the agency of skilful and sympathetic Christian workers, deserve high respect. Not all of them bear the specific name of tract society. Some of them have mingled the work of Bible and tract distribution. Some have adopted colportage as their chief form of work, while others have devoted their energies largely to other forms of evangelization. In this state of the case, it may not be possible to give a complete list of all the societies that have been organized to promote the circulation of religious tracts. Still less possible would it be to give, within a convenient space, the full historical data of all such institutions. Fortunately, however, numerous details are quite unnecessary, since specimen sketches like those given above are sufficiently descriptive of all similar institutions and their auxiliaries, whether conducted on a larger or smaller scale.

As to plan of organization, there are two classes of tract and book publication societies. One class represents united Christian effort in the sense of being composed of the members of different churches. The other is denominational in the sense of separate church action. These two classes of societies, though distinct from each other, are by no necessity antagonistic. They may, and usually do, simply represent different modes of accomplishing the same or similar objects. While in England, owing to the pre-eminence and catholicity of the Religious Tract Society, denominational action has generally limited itself to the work of dissemination, there is at least one important example of separate church action—it is that of the Wesleyan Methodist Church. By that body the joint enterprise of tract and book publication and circulation has been continued from the time of its inception by the Rev. John Wesley in the first half of the 18th century. The publications of the Wesleyan book-room embrace a large assortment of tracts, a variety of periodicals, and a large list of religious books. A due proportion of its tracts and books has been prepared and printed in foreign languages, in adaptation to the wants of the various mission fields of that Church. Book affairs constitute a standard topic of business at the annual meeting of the Conference, which officially appoints a publishing agent and the requisite editors. It also appoints a tract committee charged with the duty of promoting the circulation of tracts by means of auxiliary and loan societies and suitable grants. As a branch of church work, cities, villages, and country neighborhoods are districts for consecutive and periodical visitation by tract-distributors. In America, several of the more prominent denominations maintain publication societies both of tracts and books on a similar plan, although few are as thorough in the work of dissemination.

The Society for Promoting Christian Knowledge, founded in London in the early part of the present century, deserves in several respects to be classed alongside of the publishing tract societies of England. It issues, chiefly on business principles, a large assortment of books adapted to juvenile, Sunday-school, and popular reading, all of which have for their object at least indirect Christian influence, besides many thousands of religious tracts.

In addition to facts heretofore stated, it must be borne in mind that the Sunday-school unions (q. v.) of the United States have to a large extent provided the Sunday-school tracts and books used by the different churches, and thus covered an important department

of publication embraced within the operations of the Religious Tract Society of London. Besides these, several denominational religious publishing houses have grown up, in which vast numbers of tracts, books, and periodicals are printed.

The oldest and largest of these is the Book Concern of the Methodist Episcopal Church, which was a direct outgrowth of Mr. Wesley's publication enterprise in England, mentioned above. It was begun in Philadelphia by official action of the Church in 1789, and in 1804 was removed to New York, where its principal establishment has since remained. It has branch publishing-houses in Cincinnati, Chicago, and St. Louis, together with depositories in most of the large cities.

Corresponding in character to the above are the American Baptist Publication Society and the Presbyterian Board of Publication, both located in Philadelphia. All the institutions thus far named publish more or less books and tracts on the subject of temperance. But in 1866 the National Temperance Society was organized in New York, for the express purpose of providing a cheap and sound literature on all subjects relating to theoretical and practical temperance. The National Temperance Publication House may therefore be numbered among the tract and book publishing institutions of the United States. Its publications, already six hundred in number, are circulated to some extent through Sunday-schools, but more extensively through auxiliary temperance organizations in all parts of the land. It may thus be seen that from small beginnings less than a century ago, a vast system of tract and book publication in the interest of Christianity has sprung up and spread abroad its influence in most of the countries and languages of the world.

V. The literature of the subject is as yet chiefly to be found in the annual reports of the various societies and institutions above enumerated. The *Jubilee Memorial Volume of the Religious Tract Society* (Lond. 1850, 700 pp. 8vo) is a specimen of many similar volumes that will hereafter be forthcoming from that and other societies. (D. P. K.)

**Tracts** FOR THE TIMES. See PUSEYISM.

**Tractus.** See TRACT.

**Tracy, Bernard Destult de**, a French ascetic writer, was born Aug. 25, 1720, at Paray-le-Frânil, near Moulins. At the age of sixteen he joined the Theatines, and passed his whole life in retirement and piety. He died in Paris, Aug. 14, 1878. He is the author of several works on practical religion and the biographies of saints, for which see Hoefer, *Nouv. Biog. Générale*, s. v.

**Tracy, William, D.D.**, a Presbyterian minister, was born at Norwich, Conn., June 2, 1807. He went to Philadelphia and united with the Church in February, 1827. Being induced, by the advice of Rev. John L. Grant, to study for the ministry, he accordingly entered Williamstown Academy, and from thence Williams College, where he remained three years, but left before graduation. After this he taught school a year in Lexington, Ky. Then he spent a year in Andover Theological Seminary, and thence went to Princeton Seminary, where he remained two years. He was licensed to preach in 1835, and was ordained by the Philadelphia Presbytery as an evangelist. Having devoted himself to the work of foreign missions, he sailed for India, and, having reached Madras, he went to the Madura district, his field of labor, in 1837. He established a boarding-school at Tirumangalam, which grew to a high-grade seminary, having fifty pupils. Here he spent twenty-two years of his life, and he educated more than 250 young men. He prepared many text-books in theology and science, and gave important aid in revising the Tamil Bible. In November, 1877, his youngest son and wife joined him and his mother in India as missionaries, to share their labors and their home,

but his work was done. After the Sabbath which he spent in the sanctuary, he was attacked with rheumatic cramps and diarrhoea, which brought him rapidly to the end, and he died at Tinupuvanam, Nov. 28, 1877. (W. P. S.)

**Trade.** See MECHANIC; MERCHANT.

**Traditio** (ET REDDITIO) *SYMBOLI* (*delivery of the creed*). These words are used by ecclesiastical writers in reference to the practice generally adopted of requiring baptized persons to repeat the Creed and the Lord's Prayer, in which they had previously been instructed. In the case of infants the sponsors at first repeated these formularies on behalf of the child for whom they answered; but afterwards, in the Middle Ages, the Romish Church began to dispense with this usage, and to satisfy itself with the priest's repeating them. There is still a remnant of this practice in some countries: sponsors are subjected to a catechetical examination by the minister previously to their admission.

**Tradition** (*παράδοσις*), JEWISH. The Jews pretend that, besides their written law contained in the Pentateuch, God delivered to Moses an oral law, which was handed down from generation to generation. The various decisions of the Jewish doctors or priests on points which the law had either left doubtful or passed over in silence were the true sources of their traditions. They did not commit their numerous traditions (which appear to have been a long time in accumulating) to writing before their wars against the Romans under Hadrian and Severus. The Mishna, the Gemara, and perhaps the Masorah were collected by the rabbins of Tiberias and later schools. See RABBINISM. Many of their false traditions were in direct opposition to the law of God; hence our Saviour often reproached the Pharisees with preferring them to the law itself. He also gives several instances of their superstitious adherence to vain observances, while they neglected essential things (Matt. xv, 2, 3; Mark vii, 3-13). The only way in which we can know satisfactorily that any tradition is of divine authority is by its having a place in those writings which are generally acknowledged to be the genuine productions of inspired men. All traditions which have not such authority are without value, and tend greatly to detract and mislead the minds of men (2 Thess. ii, 15; iii, 6).

In this respect, however, a notable division existed among the Jews themselves, which has been transmitted to the modern representatives of the two great parties. The leading tenet of the Sadducees was the negation of the leading tenet of their opponents. As the Pharisees asserted, so the Sadducees denied, that the Israelites were in possession of an oral law transmitted to them by Moses. The manner in which the Pharisees may have gained acceptance for their own view is noticed elsewhere in this work [see PHARISEE]; but, for an equitable estimate of the Sadducees, it is proper to bear in mind emphatically how destitute of historical evidence the doctrine was which they denied. That doctrine is, at the present day, rejected, probably by almost all, if not by all, Christians; and it is, indeed, so foreign to their ideas that the greater number of Christians have never even heard of it, though it is older than Christianity, and has been the support and consolation of the Jews under a series of the most cruel and wicked persecutions to which any nation has ever been exposed during an equal number of centuries. It is likewise now maintained all over the world by those who are called the orthodox Jews. It is therefore desirable to know the kind of arguments by which, at the present day, in a historical and critical age, the doctrine is defended. For this an opportunity has lately been given by a learned French Jew, grand-rabbi of the circumscription of Colmar (Klein, *Le Judaïsme, ou la Vérité sur le Talmud* [Mulhouse, 1859]), who still asserts as a fact the existence of a Mosaic oral law. To

do full justice to his views, the original work should be perused. But it is doing no injustice to his learning and ability to point out that not one of his arguments has a positive historical value. Thus he relies mainly on the inconceivability (as will be again noticed in this article) that a divine revelation should not have explicitly proclaimed the doctrine of a future state of rewards and punishments, or that it should have promulgated laws left in such an incomplete form and requiring so much explanation and so many additions as the laws in the Pentateuch. Now arguments of this kind may be sound or unsound; based on reason or illogical; and for many they may have a philosophical or theological value; but they have no pretence to be regarded as historical, inasmuch as the assumed premises, which involve a knowledge of the attributes of the Supreme Being and the manner in which he would be likely to deal with man, are far beyond the limits of historical verification. The nearest approach to a historical argument is the following (p. 10): "In the first place, nothing proves better the fact of the existence of the tradition than the belief itself in the tradition. An entire nation does not suddenly forget its religious code, its principles, its laws, the daily ceremonies of its worship to such a point that it could easily be persuaded that a new doctrine presented by some impostors is the true and only explanation of its law and has always determined and ruled its application. Holy Writ often represents the Israelites as a stiff-necked people impatient of the religious yoke; and would it not be attributing to them rather an excess of docility, a too great condescension, a blind obedience, to suppose that they suddenly consented to troublesome and rigorous innovations which some persons might have wished to impose on them some fine morning? Such a supposition destroys itself, and we are obliged to acknowledge that the tradition is not a new invention, but that its birth goes back to the origin of the religion; and that, transmitted from father to son as the word of God, it lived in the heart of the people, identified itself with the blood, and was always considered as an inviolable authority." But, if this passage is carefully examined, it will be seen that it does not supply a single fact worthy of being regarded as a proof of a Mosaic oral law. Independent testimony of persons contemporary with Moses that he had transmitted such a law to the Israelites would be historical evidence; the testimony of persons in the next generation as to the existence of such an oral law which their fathers told them came from Moses would have been secondary historical evidence; but the belief of the Israelites on the point twelve hundred years after Moses cannot, in the absence of any intermediate testimony, be deemed evidence of a historical fact. Moreover, it is a mistake to assume that they who deny a Mosaic oral law imagine that this oral law was at some one time as one great system introduced suddenly among the Israelites. The real mode of conceiving what occurred is far different. After the return from the Captivity, there existed probably among the Jews a large body of customs and decisions not contained in the Pentateuch; and these had practical authority over the people long before they were attributed to Moses. The only phenomenon of importance requiring explanation is, not the existence of the customs sanctioned by the oral law, but the belief accepted by a certain portion of the Jews that Moses had divinely revealed those customs as laws to the Israelites. To explain this historically from written records is impossible, from the silence on the subject of the very scanty historical Jewish writings purporting to be written between the return from the Captivity in B.C. 536 and that uncertain period when the canon was finally closed, which probably could not have been very long before the death of Antiochus Epiphanes, B.C. 164. For all this space of time, a period of about three hundred and seventy-two years, a period as long as from the accession of Henry VIII to the present day, we have no He-

brew account, nor, in fact, any contemporary account, of the history of the Jews in Palestine, except what may be contained in the short works entitled Ezra and Nehemiah. The last named of these works does not carry the history much later than one hundred years after the return from the Captivity; so that there is a long and extremely important period of more than two centuries and a half before the heroic rising of the Maccabees, during which there is a total absence of contemporary Jewish history. In this dearth of historical materials, it is idle to attempt a positive narration of the circumstances under which the oral law became assigned to Moses as its author. It is amply sufficient if a satisfactory suggestion is made as to how it *might* have been attributed to Moses; and in this there is not much difficulty for any one who bears in mind how notoriously in ancient times laws of a much later date were attributed to Minos, Lycurgus, Solon, and Numa.

Under this head we may add that it must not be assumed that the Sadducees, because they rejected a Mosaic oral law, rejected likewise all traditions and all decisions in explanation of passages in the Pentateuch. Although they protested against the assertion that such points had been divinely settled by Moses, they probably, in numerous instances, followed practically the same traditions as the Pharisees. See SADDUCEE.

**TRADITION, CHRISTIAN.** In the older ecclesiastical fathers, the words *παράδοσις* and *traditio* are used to denote any instruction which one gives to another, whether oral or written. In the New Test. also, and in the classical writers, *παράδουναί* and *tradere* signify, in general, to teach, to instruct. In this wider sense, tradition was divided into *scripta* and *non scripta sive oralis*. The latter, *traditio oralis*, was, however, frequently called *traditio*, by way of eminence. This oral tradition was often appealed to by Irenæus, Clements of Alexandria, Tertullian, and others of the ancient fathers, as a test by which to try the doctrines of contemporary teachers, and by which to confute the errors of the heretics. They describe it as being instruction received from the mouth of the apostles by the first Christian churches, transmitted from the apostolic age, and preserved in purity until their own times.

Oral tradition is still regarded by the Roman Church as a *principium cognoscendi* in theology, and they attempt to support their hypothesis respecting it by the use made of it by the fathers. Much dispute has arisen about the degree of weight to be assigned to tradition generally; many, however, consider that this is an idle controversy, and that each particular tradition should be tried on its own grounds. In coming to a decision on the merits of the question respecting doctrinal tradition, everything depends upon making the proper distinctions with regard to time.

In the first period of Christianity, the authority of the apostles was so great that all their doctrines and ordinances were strictly and punctually observed by the churches which they had planted. The doctrine and discipline which prevailed in those apostolical churches were, at the time, justly considered by others to be purely such as the apostles themselves had taught and established. This was the more common, as the books of the New Test. had not, as yet, come into general use among Christians; nor was it, at that early period, attended with any special liability to mistake. In this way we can account for it that Christian teachers of the 2d and 3d centuries appeal so frequently to oral tradition. But in later periods of the Church, the circumstances were far different. After the commencement of the 3d century, when the first teachers of the apostolical churches and their immediate successors had passed away and another race sprung up, other doctrines and forms were gradually introduced, which differed in many respects from apostolical simplicity. And now those innovators appealed more frequently than

had ever been done before to apostolical tradition, in order to give currency to their own opinions and regulations. They went so far, indeed, as to appeal to this tradition for many things not only at variance with other traditions, but with the very writings of the apostles which they had in their hands. From this time forward, tradition naturally became more and more uncertain and suspicious. No wonder, therefore, that we find Augustine establishing the maxim that it could not be relied upon, in the ever-increasing distance from the age of the apostles, except when it was universal and perfectly consistent with itself. The Reformers justly held that tradition is not a sure and certain source of knowledge respecting the doctrines of theology, and that the Holy Scriptures are the only *principium cognoscendi*. See Knapp, *Christian Theology*, vii, 3; Eden, *Theol. Dict.* s. v.; Cunningham, *Hist. Theology*, i, 186, 480; Hagenbach, *Hist. of Doctrines* (Index); Hook, *Church Dict.* s. v.; Milman, *Hist. of the Jews*, ii, 42; Van Oosterzee, *Christian Dogmatics*, art. "Faith, Rule of."

**TRADITION, in the Church of England,** refers to customs, forms, rites, ceremonies, etc., which have been transmitted by oral communication, and, as used in Article 84, is not to be understood as including *matters of faith*. The traditions for which the article requires respect and obedience are all those customs and ceremonies in established use which are not expressly named in the Scriptures, nor in the written laws or rubrics of the Church, but stand simply on the ground of prescription. Among these may be mentioned the alternate mode of reading the Psalter, the custom of bowing in the Creed, the postures in various offices of the Church, the use of a doxology and collects after a sermon, the practice of pouring the baptismal water upon the head, the quantity of the elements consumed in the eucharist, etc. These, though unwritten, are not the less obligatory when ascertained to be standing customs of the Church. The article ordains that "whosoever, through his private judgment, willingly and purposely doth openly break the traditions and ceremonies of the Church which be not repugnant to the Word of God, and be ordained and approved by common authority, ought to be rebuked openly (that others may fear to do the like) as he that offendeth against the common order of the Church," etc.

**Traditores (surrenderers or traitors),** a name applied by the ancient Christians to those persons who delivered up their Bible and sacred utensils of the Church to the heathen in time of persecution. See Bingham, *Christ. Antiq.* bk. xvi, ch. vi, § 25.

**Traducianism** is the belief that the souls of children, as well as their bodies, are propagated from their parents, and is opposed to Creationism (q. v.) and the doctrine of the Pre-existents (q. v.). According to Jerome, both Tertullian and Apollinarius were advocates of this opinion, and the opponents of Pelagianism, in general, have been inclined to it. Since the Reformation, it has been more approved than any other in the Lutheran Church, and that not by philosophers and naturalists merely, but also by divines. Luther himself, though he did not declare distinctly in its favor, was also inclined towards this theory; and in the *Formula Concordiæ* it is distinctly taught that both soul and body are propagated by the parents in ordinary generation. What has rendered the hypothesis more acceptable to theologians is its affording the easiest solution of the doctrine of native depravity; and it seems to receive confirmation from the psychological facts that the natural disposition of children not unfrequently resembles that of their parents, and that the mental excellences and imperfections of parents are inherited nearly as often by their children as any bodily attributes. But, after all that can be said, we must be content to remain in uncertainty respecting the subject.

"As thou knowest not what is the way of the Spirit, nor how the bones do grow in the womb of her that is with child, even so thou knowest not the works of God who maketh all" (Eccles. xi, 5). See Buck, *Theol. Dict.* s. v.; Delitzsch, *Bibl. Psychology*, p. 128-131; *New-Englander*, July, 1868, p. 475. See SOUL, ORIGIN OF.

**Traducians**, the adherents of Traducianism (q. v.).

**Traheron**, BARTHOLOMEW, a learned English divine at the period of the Reformation, was born at Cornwall and educated at Oxford, either in Exeter College or Hart Hall. He travelled extensively in Germany and Italy, and, returning to England, was made keeper of the king's library. In 1551 king Edward VI conferred on him the deanery of Chichester. This he lost on the accession of queen Mary, and, joining the English exiles in Germany, wrote all his important works there. The time of his death is uncertain. Traheron's works are, *Parænesis*, lib. i:—*Carmina in Mortem Henrici Dudley*:—*Analysis Scoparum Johannis Cochleæ*:—*Exposition of a Part of St. John's Gospel* (1558, 8vo):—*Exposition of the Fourth Chapter of St. John's Revelation* (1557, 8vo):—*An Answer Made by Bartholomew Traheron to a Private Papist*.

**Traill**, ROBERT, an eminent divine of the Church of Scotland, was born at Ely, May, 1642. He was educated at the University of Edinburgh, and pursued the study of divinity with great ardor for several years. In 1666 he was obliged to secrete himself, because some copies of *An Apologetic Relation*, etc., were found in his mother's house; and the following year, being suspected of opposing the king, he was obliged to join his father in Holland. In 1670 he went to England, and was ordained by Presbyterian divines in London. In 1677 Mr. Traill was imprisoned for preaching privately, but was released in October of the same year. He then located at Cranbrook, in Kent, but for many years afterwards was pastor of a Scotch congregation in London. He was warmly attached to the Calvinistic doctrines, and took a zealous concern in the doctrinal controversies. He died in May, 1716. He published a number of theological treatises and discourses, which for many years were printed separately, but collectively after his death (Edinb. 1745, 4 vols. 12mo; 1754, 2 vols. 12mo; Glasgow, 1776, 3 vols. 8vo; best ed. 1806, 4 vols. 8vo). See Chalmers, *Biog. Dict.* s. v.; Allibone, *Dict. of Brit. and Amer. Authors*, s. v.

**Train**, ARTHUR SAVAGE, D.D., a Baptist divine, was born at Framingham, Mass., Sept. 1, 1812, and was a graduate of Brown University in the class of 1833. He was tutor in the university two years after his graduation, carrying on at the same time his theological studies under Dr. Wayland. In 1836 he was ordained pastor of the Baptist Church in Haverhill, Mass., where he had a successful ministry of twenty-three years. He was elected professor of sacred rhetoric and pastoral duties in the Newton Theological Institute in 1859, and held the office for seven years. In 1866 he accepted a call to the pastorate of the Baptist Church in Framingham, where he remained until his death, Jan. 2, 1872. Dr. Train was a trustee of Brown University from 1845 till his death. (J. C. S.)

**Trajan**, MARCUS ULPIUS NERVA, emperor of Rome from A.D. 98 to 117, is a noteworthy personage in the history of ancient times by reason of his personal qualities, and also as a general and ruler. He is important to the history of the Church through his connection with the persecution of the adherents of Christianity in his time. At first tolerated by the policy of the Roman rulers as a comparatively feeble though despicable excrecence on the loathsome superstition of Judaism, Christianity was forced upon the notice of the emperors by the tumults excited among the populace by heathen priests, who observed the remarkable progress of that faith with alarm, and Trajan was accordingly led to

issue edicts for the gradual suppression of the new teaching which transformed men into haters of the gods. The administration of the younger Pliny as governor of Bithynia was complicated with matters growing out of the rapid extension of Christianity and the consequent rage of the heathen population within his province. He therefore endeavored to enforce against Christians the laws for the suppression of the really dangerous *Hæteries* (see Pliny, *Epist.* x, 43), but found the complaints to be so numerous and the result of the judicial investigations so unsatisfactory that he referred the whole matter to the emperor for instructions. Of the accused, many denied that they were in any way implicated in Christianity; others declared that they had returned to the old faith, and offered incense and libations before the image of the emperor and blasphemed the name of Christ. Those who avowed themselves Christians confessed to nothing of a damaging character. Their offence consisted merely in meeting before sunrise of a specified day to sing a common hymn in honor of Christ as a god, and in the assumption of a voluntary obligation, under oath, to commit no theft, robbery, nor adultery, but to keep a promise and acknowledge the possession of goods committed to their trust. The torture applied to two maids disclosed nothing more criminal than these statements. Trajan commended the governor's action, and observed that no general and definite prescriptions could be given for such matters. He added that search should not be made for suspected persons, though, if accused and convicted, they should be punished unless they interposed a denial of the charge of being Christians, and authenticated it by calling on the gods. Anonymous accusations of any sort should not be received. The execution of several Christians, among them the aged Symeon, who was the son of Clopas, and successor of James at Jerusalem, must be explained in view of the fact that the emperor was at the same time regent of the State and chief priest (*pontifex maximus*), and would consider it necessary to protect and preserve the religion which was so closely interwoven with the interests of the State. The same idea will apply to the case of Ignatius.

*Literature*.—The principal sources for the history of Trajan are Pliny the younger, *Epistola*, especially lib. x,

Trajan's Column in Rome.

**Tramontane** (*across the mountain*), a term applied by the Italians to those dwelling north of the Alps, and especially to the ecclesiastics and professors of the canon law of Germany and France. See **ULTRAMONTANE**.

**Trance** (*ἵκστασις, ecstasy*), a supernatural state of body and mind, the nature of which has been well conjectured by Doddridge, who defines it "such a rapture of mind as gives the person who falls into it a look of astonishment, and renders him insensible of the external objects around him, while in the meantime his imagination is agitated in an extraordinary manner with some striking scenes which pass before it and take up all the attention." He refers to some extraordinary instances of this kind mentioned by Gualterius in his note on Acts x, 10 (*Family Expositor*, ad loc. note g). Stockius also describes it as "a sacred ecstasy, or rapture of the mind out of itself, when, the use of the external senses being suspended, God reveals something in a peculiar manner to prophets and apostles, who are then taken or transported out of themselves." The same idea is intimated in the English word *trance*, from the Latin *transitus*, the state of being carried out of one's self. See **INSPIRATION**; **PROPHECY**.

1. In the only passage (Numb. xxiv, 4, 16) in which this word occurs in the English of the Old Test. there is, as the italics show, no corresponding word in Hebrew, simply נָפַל, "falling," for which the Sept. gives ἐν ὕπνῳ, and the Vulg. more literally *qui cecidit*. In the New Test. we meet with the word three times (Acts x, 10; xi, 5; xxii, 17), the Vulg. giving "excessus" in the two former, "stupor mentis" in the latter. The Greek word ἵκστασις employed in these passages denotes the effect of any passion by which the thoughts are wholly absorbed. In the Sept. it corresponds to שֹׁמֵה, a "wonderful thing" (Jer. v, 30), רִמְיָהוּ, "astonishment" (Deut. xxviii, 28), and חֵרֶם, a prophetic lethargy or "deep sleep" (Gen. ii, 21; xv, 12, etc.). In the New Test. it usually represents the absorbing effects of admiration (Mark v, 42; Luke v, 26; Acts iii, 10); of terror (Mark xvi, 8).

2. Used as the Greek word is by Luke (Acts, *ut sup.*) "the physician," and, in this special sense, by him only, in the New Test., it would be interesting to inquire what precise meaning it had in the medical terminology of the time. From the time of Hippocrates, who uses it to describe the loss of conscious perception, it had probably borne the connotation which it has had, with shades of meaning for good or evil, ever since. Thus, Hesychius gives as the account of a man in an ecstasy that he is *ὁ εἰς εαυτὸν μὴ ὄν*. Apuleius (*Apologia*) speaks of it as "a change from the earthly mind (ἀπὸ τοῦ γήινου φρονήματος) to a divine and spiritual condition both of character and life." Tertullian (*De An.*

45) compares it to the dream-state in which the soul acts, but not through its usual instruments. Augustine (*Confess.* ix, 11) describes his mother in this state as "abstracta a presentibus," and gives a description of like phenomena in the case of a certain Restitutius (*De Civ. Dei*, xiv, 24).

3. We may compare with these statements the more precise definitions of modern medical science. There the ecstatic state appears as one form of catalepsy. In catalepsy pure and simple, there is "a sudden suspension of thought, of sensibility, of voluntary motion." "The body continues in any attitude in which it may be placed;" there are no signs of any process of thought; the patient continues silent. In the ecstatic form of catalepsy, on the other hand, "the patient is lost to all external impressions, but wrapt and absorbed in some object of the imagination." The man is "as if out of the body." "Nervous and susceptible persons are apt to be thrown into these trances under the influence of what is called mesmerism. There is, for the most part, a high degree of mental excitement. The patient utters the most enthusiastic and fervid expressions or the most earnest warnings. The character of the whole frame is that of intense contemplative excitement. He believes that he has seen wonderful visions and heard singular revelations" (Watson, *Principles and Practice*, lect. xxxix; Copland, *Dict. of Medicine*, s. v. "Catalepsy"). The causes of this state are to be traced commonly to strong religious impressions; but some, though, for the most part, not the ecstatic, phenomena of catalepsy are producible by the concentration of thought on one object, or of the vision upon one fixed point (*Quart. Rev.* xciii, 510–22, by Dr. Carpenter); and, in some more exceptional cases, like that mentioned by Augustine (there, however, under the influence of sound, "ad imitatas quasi lamentantis cujuslibet hominis voces"), and that of Jerome Cardan (*Var. Rer.* viii, 43), men have been able to throw themselves into a cataleptic state at will.

4. Whatever explanation may be given of it, it is true of many, if not of most, of those who have left the stamp of their own character on the religious history of mankind, that they have been liable to pass at times into this abnormal state. The union of intense feeling, strong volition, long-continued thought (the conditions of all wide and lasting influence), aided in many cases by the withdrawal from the lower life of the support which is needed to maintain a healthy equilibrium, appears to have been more than the "earthen vessel" will bear. The words which speak of "an ecstasy of adoration" are often literally true. The many visions—the journey through the heavens, the so-called epilepsy of Mohammed—were phenomena of this nature. Of three great mediæval teachers, St. Francis of Assisi, St. Thomas Aquinas, and Joannes Scotus, it is recorded that they would fall into the ecstatic state, remain motionless, seem as if dead, sometimes for a whole day, and then, returning to consciousness, speak as if they had drunk deep of divine mysteries (Gualterius, *Crit. Sac.* on Acts x, 10). The old traditions of Aristeas and Epimenides, the conflicts of Dunstan and Luther with the powers of darkness, the visions of Savonarola, George Fox, Swedenborg, and Böhme are generically analogous. Where there has been no extraordinary power to influence others, other conditions remaining the same, the phenomena have appeared among whole classes of men and women in proportion as the circumstances of their lives tended to produce an excessive susceptibility to religious or imaginative emotion. The history of monastic orders, of American and Irish revivals, gives countless examples. Still more noticeable is the fact that many of the *improvisatori* of Italy are "only able to exercise their gift when they are in a state of ecstatic trance, and speak of the gift itself as something morbid" (Copland, *loc. cit.*); while in strange contrast with their earlier history, and pointing perhaps to a national character that has become harder and less emotional, there

is the testimony of a German physician (Frank), who had made catalepsy a special study, that he never met with a single case of it among the Jews (Copland, *loc. cit.*; comp. Maury, *La Magie et l'Astrologie*).

5. We are now able to take a true estimate of the trances of Biblical history. As in other things, so also here, the phenomena are common to higher and lower, to true and false systems. The nature of man continuing the same, it could hardly be that the awfulness of the divine presence, the terrors of divine judgment, should leave it in the calm equilibrium of its normal state. Whatever made the impress of a truth more indelible, whatever gave him to whom it was revealed more power over the hearts of others, might well take its place in the divine education of nations and individual men. We may not point to trances and ecstasies as proofs of a true revelation, but still less may we think of them as at all inconsistent with it. Thus, though we have not the word, we have the thing in several clear instances in the Bible. Some, perhaps many, things recorded in Scripture belong to this supernatural state of trance which are not expressly referred to it. See the long list of such supposed cases in Bp. Law's *Consideration of the Theory of Religion* (Lond. 1820, p. 85, 86). We notice here only the most marked examples.

In the Old Test. a state of supernatural ecstasy is evidently denoted by the "deep sleep" which fell upon Adam during the creation of Eve (Gen. ii, 21), and during which, as appears from the narrative, he was made aware of the transaction, and of the purport of the attendant circumstances (ver. 21-24). See MARRIAGE. A similar state occurs again in the "deep sleep" which fell upon Abraham (xv, 12), during which the bondage of his descendants in Egypt was revealed to him. Possibly all the accounts recorded in that chapter occurred in "vision" (ver. 1-12), which ultimately deepened into the trance (ver. 12-21). Comp. ver. 5, 12, where he is said to have seen the stars, though the sun had not gone down. The apparent objection that Abraham was "brought forth abroad" to see the stars is only of the same nature with others explained in the art. TEMPTATION OF CHRIST. Balaam, as if overcome by the constraining power of a spirit mightier than his own, "sees the vision of God, *fulfilling*, but with opened eyes" (Numb. xxiv, 4). The incident of the ass speaking to him, etc., is also understood by many learned Jews and Christians to have occurred in a vision (Bp. Law, *ut sup.*). To the same mode of divine communication must be referred the magnificent description in Job iv, 13-21. Saul, when the wild chant of the prophets stirred the old depths of feeling, himself also "prophesied" and "fell down" (most, if not all, of his kingly clothing being thrown off in the ecstasy of the moment) "all that day and all that night" (1 Sam. xix, 24). Something there was in Jeremiah that made men say of him that he was as one that "is mad and maketh himself a prophet" (Jer. xxix, 26). In Ezekiel the phenomena appear in more wonderful and awful forms. He sits motionless for seven days in the stupor of astonishment, till the word of the Lord comes to him (Ezek. iii, 15). The "hand of the Lord" falls on him, and he too sees the "visions of God" and hears the voice of the Almighty, is "lifted up between the earth and heaven," and passes from the river of Chebar to the Lord's house in Jerusalem (viii, 3). As other elements and forms of the prophetic work were revived in "the apostles and prophets" of the New Test., so also was this. More distinctly even than in the Old Test., it becomes the medium through which men rise to see clearly what before was dim and doubtful, in which the mingled hopes and fears and perplexities of the waking state are dissipated at once. Though different in form, it belongs to the same class of phenomena as the "gift of tongues," and is connected with "visions and revelations of the Lord." In some cases, indeed, it is the chosen channel for such revelations. To the "trance" of Peter in the city, where all outward circumstances tended to bring the thought of

an expansion of the divine kingdom more distinctly before him than it had ever been brought before, we owe the indelible truth stamped upon the heart of Christendom, that God is "no respecter of persons," that we may not call any man "common or unclean" (Acts x, xi). To the "trance" of Paul, when his work for his own people seemed utterly fruitless, we owe the mission which was the starting-point of the history of the Universal Church, the command which bade him "depart . . . far hence unto the Gentiles" (xxii, 17-21). Wisely, for the most part, did that apostle draw a veil over these more mysterious experiences. He would not sacrifice to them, as others have often sacrificed, the higher life of activity, love, prudence. He could not explain them to himself. "In the body or out of the body," he could not tell, but the outer world of perception had passed away, and he had passed in spirit into "paradise," into "the third heaven," and had heard "unspeakable words" (2 Cor. xii, 1-4). Those trances too, we may believe, were not without their share in fashioning his character and life, though no special truth came distinctly out of them. United as they then were, but as they have seldom been since, with clear perceptions of the truth of God, with love wonderful in its depth and tenderness, with energy unresting, and subtle tact almost passing into "guile," they made him what he was, the leader of the apostolic band, emphatically the "master-builder" of the Church of God (comp. Jowett, *Fragment on the Character of St. Paul*).
